GRADE BEAMS & FOOTINGS	4000 PSI
RETAINING WALLS	4000 PSI
REINFORCING	
TYPICAL	ASTM A-615 - GRADE 60
LOW ALLOY/WELDABLE	ASTM A-706 - GRADE 60
ANCHOR RODS	ASTM F-1554 - GRADE 36 UNO
BOLTS	ASTM A325 (3/4" DIAMETER MINIMUM)
WELD	
STRUCTURAL STEEL	E70XX
LIGHT GAUGE METALS	E60XX

PRE-ENGINEERED BUILDING

A. THE BUILDING SHALL BE A MANUFACTURER'S STANDARD PREFABRICATED METAL STRUCTURE OF THE APPROXIMATE INSIDE AREA SHOWN, EXCEPT AS NOTED. RIGID FRAMES SHALL BE SPACED AS SHOWN ON THE DRAWINGS, BUT OVERALL DIMENSIONS AND CONSTRUCTION DETAILS MAY VARY TO SUIT MANUFACTURER'S STANDARD DESIGN. HOWEVER, MINIMUM WEB THICKNESS OF RIGID FRAMES SHALL BE 3/16 INCH.
B. THE BUILDING SHALL BE DESIGNED AND FABRICATED ACCORDING TO AISC, AWS, AND AISI LATEST SPECIFICATIONS. THE DIMENSIONAL TOLERANCES APPLICABLE TO ROLL FORM STEEL UNDER THE AISC "STANDARD MILL PRACTICE" SECTION SHALL BE REQUIRED IN THE FABRICATION OF THE STEEL BUILDING FRAMES.
C. A COMPLETE DESIGN ANALYSIS SHOWING ALL CALCULATIONS FOR THE RIGID FRAMES, GIRTS, PURLINS, AND X-BRACING FOR WIND AND SEISMIC LOADS AND A LAYOUT OF ANCHOR BOLTS AND OTHER EMBEDDED ITEMS SHALL BE SUBMITTED FOR APPROVAL WITH THE SHOP DRAWINGS. SHOP DRAWINGS SHALL INCLUDE DETAILS OF MAIN MEMBERS, TYPICAL CONNECTIONS (SHOWING BOLT HOLES AND WELDS), AND ERECTION DRAWINGS.
D. THE BUILDING SHALL BE DESIGNED TO SUPPORT ALL MECHANICAL EQUIPMENT INCLUDING HEATERS, SPRINKLERS, EXHAUST SYSTEMS, AND ALL OTHER SUCH DEVICES. ADDITIONAL GIRTS OR PURLINS SHALL BE PROVIDED IN CONVENIENT LOCATIONS FOR ATTACHMENT OF ALL MECHANICAL EQUIPMENT.

DESIGN LOADS

A. ALL APPLICABLE DEAD LOADS
B. LIVE LOADS

ROOF LIVE LOAD:	20 PSF
FLOOR LIVE LOAD:	100 PSF
MEZZANINE LIVE LOAD:	125 PSF

C. COLLATERAL LOAD: 10 PSF
D. SNOW LOAD: PER ASCE 7-10

GROUND SNOW LOAD, P_g:	5 PSF
FLAT-ROOF SNOW LOAD, P_f:	5 PSF
DRIFT SURCHARGE LOAD(S, P_d:	NA
SNOW EXPOSURE FACTOR, C_e:	C
SNOW LOAD IMPORTANCE FACTOR, I_s:	1
THERMAL FACTOR, C_t:	1.0
SLOPE FACTOR(S), C_s:	1.0
WIDTH OF SNOW DRIFT(S), w:	NA

E. LATERAL SOIL PRESSURE:

AT- REST	56 PCF
ACTIVE	37 PCF
PASSIVE	360 PCF

F. WIND LOAD: PER ASCE 7-16

BASIC WIND SPEED	105 MPH
EXPOSURE	C
CATEGORY	II

G. SEISMIC LOADS: PER ASCE 7-16

BUILDING CATEGORY:	II
SEISMIC IMPORTANCE FACTOR, I_E:	1.00
MAPPED SPECTRAL RESPONSE ACCELERATION, S_S:	12.4%g
MAPPED SPECTRAL RESPONSE ACCELERATION, S_1:	3.3%g
SITE CLASS:	D
SPECTRAL RESPONSE COEFFICIENT, S_{DS}:	13.2
SPECTRAL RESPONSE COEFFICIENT, S_{D1}:	5.3
SEISMIC DESIGN CATEGORY*:	A
BASIC SEISMIC FORCE RESISTING SYSTEM:	
MEZZANINE	SHEAR WALL
PEMB	MF
DESIGN BASE SHEAR, V: MEZZZANINE	0.4 k
SEISMIC RESPONSE COEFFICIENT, C:	0.01
RESPONSE MODIFICATION FACTOR, R:	A-15
ANALYSIS PROCEDURE USED:	EQUIVALENT LATERAL FORCE

H. DISTRIBUTE THE MAXIMUM LOAD HUNG FROM ANY STRUCTURAL MEMBER FOR MEP DUCTWORK, PIPING, ETC. OVER THE MEMBER'S TRIBUTARY AREA IN A WAY THAT THE DESIGN SUPERIMPOSED DEAD LOADS LISTED IN CONTRACT DOCUMENTS ARE NOT EXCEEDED. HANGING ITEMS FROM DECK IS STRICTLY PROHIBITED. THE CONTRACTOR SHALL COORDINATE THE LOADS OF ALL TRADES AND PROVIDE ADDITIONAL SUPPORT OR DISTRIBUTION FRAMING AS REQUIRED TO ACHIEVE THE ALLOWABLE LOAD DISTRIBUTION.

FOUNDATIONS

A. ALL FOOTINGS ARE DESIGNED ON AN ALLOWABLE SOIL BEARING PRESSURE OF 3,500 POUNDS PER SQUARE FOOT AT A MINIMUM DEPTH OF 3.0 FOOT BELOW 100'-0" FINISHED FLOOR ELEVATION.
B. PLACE 4 INCH GRANULAR FILL, MEETING IDOT ITEM 247, GRADE 3, UNDER VAPOR BARRIER UNDER ALL UNSUPPORTED FLOOR SLABS ON FILL, EXCEPT AS OTHERWISE NOTED.
C. ALL EXTERIOR GRADE BEAMS SHALL BE CHAMFERED 3/4 INCH ON THE EXPOSED EXTERIOR CORNER.
D. REFER TO THE SOIL REPORT FOR SUBSOIL CONDITIONS THAT MAY BE ENCOUNTERED IN THE INSTALLATION OF FOUNDATIONS, AND OTHER INFORMATION RELEVANT TO FOUNDATIONS AND SITE PREPARATION.
E. DESIGN OF FOUNDATIONS AND STRUCTURAL COMPONENTS IN CONTACT WITH SOIL, AT THE WEST SIDE, IS BASED ON THE RECOMMENDATIONS GIVEN IN THE FOLLOWING GEOTECHNICAL REPORT:

REPORT BY	:	BEYOND ENGINEERING AND TESTING
DATE OF REPORT	:	JANUARY 5, 2022
REPORT NUMBER	:	GT21111061

SITE PLANNING AND FILL NOTES

A. PROPER CONSTRUCTION DRAINAGE SHALL BE PROVIDED AND MAINTAINED AT ALL TIMES DURING FOUNDATION CONSTRUCTION. PONDING OF WATER AT THE SITE SHOULD BE AVOIDED DURING ALL PHASES OF CONSTRUCTION.
B. REMOVE SURFACE DEBRIS, VEGETATION, ORGANIC TOPSOIL, LOOSE SOIL AND MAJOR ROOT SYSTEMS. REMOVAL SHALL EXTEND 5 FOOT BEYOND BUILDING AREAS, CITIZENS DISPOSAL AREA AND 2 FOOT BEYOND PAVING AREAS.
C. COMPACT RESULTING SUBGRADE AND VERIFY STABILITY USING A PROOF-ROLL TEST. CONDUCT A PROOF-ROLL TESTS AS INDICATED IN THE GEOTECHNICAL REPORT. FOR SOFT SPOTS AND AREAS THAT EXHIBIT PUMPING, SCARIFY AND RECOMPACT TOP 8 INCHES OF SUBGRADE TO MINIMUM OF 98 PERCENT OF ASTM D698 OR ASTM D1557 MAXIMUM DENSITY.
D. BUILDING PAD SHALL BE RAISED TO PROPER ELEVATION USING SATISFACTORY SOILS COMPACTED IN 8 INCH MAXIMUM LOOSE LIFTS TO 98 PERCENT OF ASTM D698 MAXIMUM DENSITY, OR AS PRESCRIBED BY THE GEOTECHNICAL ENGINEER. MOISTURE SHALL BE CONTROLLED TO WITHIN 2 PERCENT OF OPTIMUM FOR COHESIVE SOILS AND 3 PERCENT FOR COHESIONLESS SOILS PER D698 DURING COMPACTION OPERATIONS.
E. FOOTINGS MAY BE BACK FILLED USING SATISFACTORY SOILS AS SPECIFIED, COMPACTED IN 8 INCH MAXIMUM LOOSE LIFTS TO 98 PERCENT OF MAXIMUM DENSITY PER ASTM D698.
F. UTILITY TRENCHES WITHIN BUILDING OR PAVING AREAS SHALL BE FILLED PER THE ABOVE CRITERIA.

CONCRETE

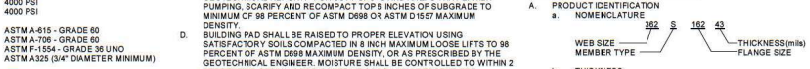
A. ALL EXTERIOR CONCRETE, INCLUDING WALKS AND CURBS OUTSIDE THE BUILDING LINE, SHALL BE AIR ENTRAINED.
B. PROVIDE STANDARD BAR CHAIRS AND SPACERS FOR REINFORCING AT A MAXIMUM OF 4 FOOT CENTERS FOR ALL SLABS AND BEAMS.
C. LAP CONTINUOUS UNSCHEDULED REINFORCING BARS AS FOLLOWS: BOTTOM BARS IN MEMBERS SUPPORTED BY COLUMNS OR FOOTINGS - 12 INCH AT SUPPORTS ONLY; ALL OTHERS - (36) BAR DIAMETERS MINIMUM.
D. ALL HORIZONTAL REINFORCING IN CONTINUOUS FOOTINGS AND WALLS SHALL BE CONTINUOUS AROUND CORNERS OR HAVE CORNER BARS OF THE SAME SIZE AND SPACING AS THE HORIZONTAL BARS AND LAP A MINIMUM OF (30) BAR DIAMETERS, OR 24 INCH MINIMUM.
E. THERE SHALL BE NO HORIZONTAL CONSTRUCTION JOINTS IN CONCRETE BEAM, FOOTING, OR SLAB POURS. ALL CONSTRUCTION JOINTS SHALL BE MADE WITHIN THE CENTER THIRD OF SPANS WITH VERTICAL BULKHEADS. THE LOCATION OF CONSTRUCTION JOINTS SHALL BE APPROVED BY THE STRUCTURAL ENGINEER.
F. WHERE CONCRETE PILASTERS, COLUMNS, OR BEAMS ARE TO BE LEFT EXPOSED AND DO NOT ABUT OTHER MATERIALS, EXTERNAL CORNERS SHALL BE CHAMFERED 3/4 INCH.
G. WHERE SLEEVES ARE REQUIRED THROUGH BEAMS OR JOISTS, VERTICAL OR HORIZONTAL PIPE SLEEVES SHALL BE PROVIDED AS SPECIFIED UNDER THE MECHANICAL AND ELECTRICAL SECTIONS OF THE SPECIFICATION. LOCATION OF ALL SUCH SLEEVES SHALL BE APPROVED BY THE STRUCTURAL ENGINEER. WHERE NECESSARY FOR STRUCTURAL REASONS, BEAMS OR JOISTS SHALL BE WIDENED TO COMPENSATE FOR THE LOSS OF CROSS SECTION DUE TO THE SLEEVE. ADD ONE EXTRA TIE OR STIRRUP ON BOTH SIDES OF EACH SLEEVE. WHERE TWO OR MORE PIPE SLEEVES ARE REQUIRED THROUGH CONCRETE SLABS, A DISTANCE EQUAL TO THREE TIMES THE LARGER SLEEVE DIAMETER SHALL BE PROVIDED BETWEEN SLEEVES.

CONCRETE MIX DESIGNS

ALL CONCRETE TO BE NORMAL WEIGHT CONCRETE, MAXIMUM FLY ASH CONTENT TO BE NO MORE THAN 25% OF TOTAL CEMENTITIOUS WEIGHT. IF TYPE 1L CEMENT USED, MIX DESIGN OR STRENGTH RESULTS MUST BE FOR TYPE 1L CEMENT.

A. CONTINUOUS FOOTINGS, GRADE BEAMS AND TIE BEAMS:
   a. CEMENT TYPE I-II.
   b. MINIMUM COMPRESSIVE STRENGTH:
      1. 4,000 PSI AT 28 DAYS
   c. MAXIMUM W/C RATIO:
      1. 0.50
   d. MAXIMUM AGGREGATE SIZE:
      1. 3/4 INCH
   e. SLUMP LIMIT:
      1. 4 INCHES SLUMP, ± 1 INCH
B. RETAINING WALLS:
   a. CEMENT TYPE I-II.
   b. MINIMUM COMPRESSIVE STRENGTH:
      1. 4,000 PSI AT 28 DAYS
   c. MAXIMUM W/C RATIO:
      1. 0.50
   d. MAXIMUM AGGREGATE SIZE:
      1. 3/4 INCH
   e. SLUMP LIMIT:
      1. 6 INCHES PLUS OR MINUS 1 INCH FOR CONCRETE WITH A VERIFIED SLUMP OF 5 INCHES, ± 1 INCH
C. SLABS-ON-GRADE
   a. CEMENT TYPE I-II.
   b. MINIMUM COMPRESSIVE STRENGTH:
      1. 4,000 PSI AT 28 DAYS
   c. MAXIMUM W/C RATIO:
      1. 0.45
   d. MAXIMUM AGGREGATE SIZE:
      1. 3/4 INCH
   e. SLUMP LIMIT:
      1. 6 INCHES PLUS OR MINUS 1 INCH FOR CONCRETE WITH A VERIFIED SLUMP OF 5 INCHES ± 1 INCH
   f. AIR CONTENT:
      1. DO NOT ALLOW AIR CONTENT OF TROWEL-FINISHED FLOORS TO EXCEED 3%
   g. MINIMUM CEMENTITIOUS MATERIALS CONTENT:
      1. MINIMUM CEMENTITIOUS MATERIAL SHALL BE PER TABLE 4.2.2.1 IN ACI 301 RELATIVE TO THE MAXIMUM AGGREGATE SIZE

FLOOR SLABS



A. ELEVATED FLOOR SLABS SHALL BE POURED MONOLITHICALLY OR POUR STOPS MAY BE PLACED AT MOMENT FRAME LINES.
B. CURING SLABS ON GRADE
   a. SLABS ON GRADE SHALL BE WET CURED FOR 7 DAYS AFTER CONCRETE PLACEMENT. WET CURING SHALL BEGIN IMMEDIATELY AFTER FINAL FINISHING OF SLAB SURFACE AND SHALL CONSIST OF CONTINUOUS MISTING BY SPRINKLER OR WET BURLAP. CONTRACTOR SHALL APPLY APPROVED CURING COMPOUND.
C. CURING ELEVATED SLABS
   a. ELEVATED SLABS SHALL BE CURED BY APPLYING SHEETS OF PLASTIC OVER THE SURFACE FOR 7 DAYS AFTER CONCRETE PLACEMENT. CONTRACTOR SHALL APPLY APPROVED CURING COMPOUND AFTER REMOVAL OF PLASTIC SHEETS.
D. FLOOR SLAB ISOLATION JOINTS SHALL BE 30 POUND FELT, UNLESS NOTED OTHERWISE.
E. CONCRETE FLOOR SLAB ON GRADE SHALL BE PLACED IN LANES. SPACING OF JOINTS SHALL BE AS SHOWN ON THE FOUNDATION PLANS. CONSTRUCTION JOINTS SHALL BE USED FOR THE JOINTS BETWEEN LANES, WHILE WEAKENED PLANE JOINTS SHALL BE USED ACROSS EACH LANE.
F. CONSTRUCTION AND CONTRACTION JOINTS SHALL BE LOCATED AS INDICATED ON THE PLAN. WHERE CONTRACTION JOINTS ARE INDICATED, SAW CUTTING SHALL BEGIN AS SOON AS POSSIBLE WITHOUT DAMAGING THE SLAB.

REINFORCEMENT AND MISC STEEL

A. UNLESS OTHERWISE NOTED, CONCRETE COVER OVER STEEL REINFORCEMENT SHALL CONFORM TO THE MINIMUMS REQUIRED BY THE AFOREMENTIONED EDITION OF ACI 318.
B. REINFORCEMENT DETAILING AND PLACEMENT SHALL CONFORM TO ACI 318 AND ACI 315, EXCEPT WHERE OTHERWISE INDICATED.
C. SUBSTITUTION OF EXPANSION ANCHORS FOR EMBEDDED ANCHORS SHOWN ON THE DRAWINGS WILL NOT BE PERMITTED.
D. ALL REINFORCING STEEL, ANCHOR BOLTS, AND EMBEDDED ANCHORS SHALL BE SECURELY SET IN PLACE PRIOR TO PLACEMENT OF CONCRETE.

LIGHT GAUGE STEEL

A. PRODUCT IDENTIFICATION
   a. NOMENCLATURE

   b. THICKNESS:

GAUGE	DESIGN	MININUM	AISI
20	0.0346"	0.0329"	33 mils
18	0.0451"	0.0428"	43 mils
16	0.0566"	0.0533"	54 mils
14	0.0713"	0.0677"	68 mils
12	0.1017"	0.0966"	97 mils

B. STUD FRAMING
   a. ALL FIELD CUTTING OF STUDS MUST BE DONE BY SAWING, SHEARING, OR PLASMA CUTTING. OTHER TORCH CUTTING METHODS OF COLD-FORMED STEEL MEMBERS ARE UNACCEPTABLE.
   b. NOTCHING OR COPING OF STUDS IS NOT ALLOWED, UNLESS NOTED OTHERWISE.
   c. FRAMING FABRICATOR IS TO ENSURE PUNCH OUT ALIGNMENT WHEN ASSEMBLING LATERAL BRACING AND FIELD CUTTING STUDS TO LENGTH. LATERAL BRACING MUST BE INSTALLED AT THE TIME THE WALL IS ERECTED.
   d. ALL HEADERS ARE TO BE CONSTRUCTED WITH UNPUNCHED MATERIAL ONLY.
   e. THE MAXIMUM ALLOWABLE GAP (MEASURED BETWEEN THE WEB OF THE STUD AND THE WEB OF THE TRACK) FOR A STUD SEATED IN A TRACK IS 1/8". PRESSURE SHOULD BE APPLIED TO NEST THE STUDS INTO THE TRACK UNTIL THE AFOREMENTIONED TOLERANCE IS ACHIEVED.
C. CONNECTIONS
   a. FOR SCREW CONNECTIONS A MINIMUM OF 1.5 x SCREW DIAMETER CLEARANCE MUST BE MAINTAINED FROM ALL EDGES OF STEEL MEMBERS. A MINIMUM OF 3 x SCREW DIAMETER ON-CENTER SPACING MUST BE MAINTAINED BETWEEN ADJACENT SCREWS.
   b. IT IS THE RESPONSIBILITY OF THE GENERAL CONTRACTOR TO VERIFY THAT FASTENERS ARE INSTALLED ACCORDING TO THE MANUFACTURER'S INSTRUCTIONS.

POST-INSTALLED ANCHORS

EXCEPT WHERE INDICATED ON THE DRAWINGS, POST-INSTALLED ANCHORS SHALL CONSIST OF THE FOLLOWING ANCHOR TYPES, AS PROVIDED BY HILTI, INC. OR APPROVED EQUAL. CONTACT HILTI AT (800) 879-8000 FOR PRODUCT RELATED QUESTIONS.

A. ANCHORS TO CONCRETE
   a. ADHESIVE ANCHORS FOR CRACKED AND UNCRACKED CONCRETE USE:
      1. HILTI HIT-HY 200 V3 SAFE SET SYSTEM WITH HILTI HIT-Z ROD PER ICC ESR-3187.
      2. HILTI HIT-HY 200 V3 SAFE SET SYSTEM WITH HILTI HOLLOW DRILL BIT (TE-CD OR TE-YD) AND VC 140 VACUUM SYSTEM WITH HAS-E-55 THREADED ROD PER ICC ESR-3187.
      3. HILTI HIT-HY 200 V3 SAFE SET SYSTEM WITH HILTI ROUGHENING TOOL (HIT RT) WITH HAS-E THREADED ROD PER ICC ESR-3187 FOR DIAMOND CORED HOLES.
      4. HILTI HIT-RE-500-V3 SAFESET SYSTEM WITH HILTI HOLLOW DRILL BIT (TE-CD OR TE-YD) AND VC 140 VACUUM WITH HAS-E-55 THREADED ROD PER ICC ESR-3814 FOR SLOW CURE APPLICATIONS.
      5. HILTI HIT-RE 500-V3 SAFESET SYSTEM WITH HILTI ROUGHENING TOOL (HIT RT) WITH HAS-E THREADED ROD PER ICC EST-3814 FOR DIAMOND CURED HOLES
   b. MEDIUM DUTY MECHANICAL ANCHORS FOR CRACKED AND UNCRACKED CONCRETE USE:
      1. HILTI KWIK HUS EZ AND KWIK HUS EZ-I SCREW ANCHORS SAFE SET SYSTEM WITH HOLLOW DRILL BIT AND VACUUM SYSTEM PER ICC ESR-3027.
      2. HILTI KWIK BOLT-TZ2 EXPANSION ANCHORS SAFE SET SYSTEM WITH HOLLOW DRILL BIT AND VACUUM SYSTEM AND SI-AT-A22 WITH ADAPTIVE TORQUE PER ICC ESR-1017.
      3. HILTI KWIK BOLT 3 (CARBON STEEL) OR KWIK BOLT 3 (OTHERS), EXPANSION ANCHOR SAFE SET SYSTEM WITH HOLLOW DRILL BIT AND VACUUM SYSTEM AND SI-AT-A22 WITH ADAPTIVE TORQUE (UNCRACKED CONCRETE ONLY) PER ICCC ESR-2302.
   c. HEAVY DUTY MECHANICAL ANCHORS FOR CRACKED AND UNCRACKED CONCRETE USE:
      1. HILTI HDA UNDERCUT ANCHORS PER ICC ESR 1546.
      2. HILTI HSL-3 EXPANSION ANCHORS PER ICC ESR 1545
B. REBAR DOWELING INTO CONCRETE
   a. ADHESIVE ANCHORS FOR CRACKED AND UNCRACKED CONCRETE USE:
      1. HILTI HIT-HY 200 V3 SAFE SET SYSTEM WITH HOLLOW DRILL BIT (TE-CD OR TE-YD) AND VC 140 VACUUM SYSTEM WITH CONTINUOUSLY DEFORMED REBAR PER ICC ESR-3187.
      2. HILTI HIT-HY 200 V3 SAFESET SYSTEM WITH HILTI ROUGHENING TOOL (HIT RT) WITH HAS-E THREADED ROD PER ICC ESR-3187 FOR DIAMOND CORED HOLES.
      3. HILTI HIT-RE-500-V3 SAFE SET SYSTEM WITH HILTI HOLLOW DRILL BIT (TE-CD OR TE-YD) AND VC 140 VACUUM SYSTEM WITH CONTINUOUSLY DEFORMED REBAR PER ICC ESR-3814.
      4. HILTI HIT-RE 500-V3 SAFE SET SYSTEM WITH HILTI ROUGHENING TOOL (HIT RT) WITH CONTINUOUSLY DEFORMED REBAR PER ICC ESR-3814 IN DIAMOND CORED HOLES.
C. ANCHORAGE TO SOLID GROUTED MASONRY
   a. ADHESIVE ANCHORS USE:
      1. HILTI HIT-HY 270 MASONRY ACHESIVE ANCHORING SYSTEM (ICC ESR-4143).
      2. STEEL ANCHOR ELEMENT SHALL BE HILTI HAS-E CONTINUOUSLY THREADED ROD (OR EQUAL) OR CONTINUOUSLY DEFORMED STEEL REBAR.
   b. MECHANICAL ANCHORS USE:
      1. HILTI KWIK BOLT 3 (CARBON STEEL) OR KWIK BOLT 3 (OTHERS), EXPANSION ANCHORS PER ICC ESR-1385.
D. ANCHORAGE TO HOLLOW/MULTI-WYTHE MASONRY
   a. ADHESIVE ANCHORS USE:
      1. HILTI HIT-HY 270 MASONRY ACHESIVE ANCHORING SYSTEM PER ICC ESR-4144.
      2. STEEL ANCHOR ELEMENT SHALL BE HILTI HAS-E CONTINUOUSLY THREADED ROD (OR EQUAL) OR CONTINUOUSLY DEFORMED STEEL REBAR.
      3. THE APPROPRIATE SIZE SCREEN TUBE SHALL BE USED PER ADHESIVE MANUFACTURER'S RECOMMENDATION.
E. ANCHOR CAPACITY USED IN DESIGN SHALL BE BASED ON THE TECHNICAL DATA PUBLISHED BY HILTI OR SUCH OTHER METHOD AS APPROVED BY THE STRUCTURAL ENGINEER OF RECORD. SUBSTITUTION REQUESTS FOR ALTERNATE PRODUCTS MUST BE APPROVED IN WRITING BY THE STRUCTURAL ENGINEER OF RECORD PRIOR TO USE. CONTRACTOR SHALL PROVIDE CALCULATIONS DEMONSTRATING THAT THE SUBMITTED PRODUCT IS CAPABLE OF ACHIEVING THE PERFORMANCE VALUES OF THE SPECIFIED PRODUCT. SUBSTITUTIONS WILL BE EVALUATED BY THEIRS HAVING AN ICC ESR SHOWING COMPLIANCE WITH THE RELEVANT BUILDING CODE FOR SEISMIC USES, LOAD RESISTANCE, INSTALLATION CATEGORY, AND AVAILABILITY OF COMPREHENSIVE INSTALLATION INSTRUCTIONS. ADHESIVE ANCHOR EVALUATION WILL ALSO CONSIDER CREEP, IN-SERVICE TEMPERATURE AND INSTALLATION TEMPERATURE.
F. INSTALL ANCHOR PER THE MANUFACTURER INSTRUCTION, AS INCLUDED IN THE ANCHOR PACKAGING.
G. OVERHEAD ADHESIVE ANCHORS MUST BE INSTALLED USING THE HILTI PROFIS SYSTEM.
H. THE CONTRACTOR SHALL ARRANGE FOR AN ANCHOR MANUFACTURER'S REPRESENTATIVE TO PROVIDE ON-SITE INSTALLATION TRAINING FOR ALL OF THEIR ANCHORING PRODUCTS SPECIFIED. THE STRUCTURAL ENGINEER OF RECORD MUST RECEIVE DOCUMENTED CONFIRMATION THAT ALL OF THE CONTRACTOR PERSONNEL WHO INSTALL ANCHORS ARE TRAINED PRIOR TO COMMENCEMENT OF INSTALLING ANCHORS.
I. ANCHOR CAPACITY IS DEPENDENT UPON SPACING BETWEEN ADJACENT ANCHORS AND PROXIMITY OF ANCHORS TO EDGE OF CONCRETE. INSTALL ANCHORS IN ACCORDANCE WITH SPACING AND EDGE CLEARANCES INDICATED ON THE DRAWINGS.
J. EXISTING REINFORCING BARS IN THE CONCRETE STRUCTURAL DRAWINGS MAY CONFLICT WITH SPECIFIC ANCHOR LOCATIONS. UNLESS NOTED OTHERWISE THAT THE BARS CAN BE CUT, THE CONTRACTOR SHALL REVIEW THE EXISTING STRUCTURAL DRAWINGS AND SHALL UNDERTAKE TO LOCATE THE POSITION OF THE REINFORCING BARS AT THE LOCATIONS OF THE CONCRETE ANCHORS BY HILTI FERROSCAN, GPR, X-RAYING, CHIPPING, OR OTHER APPROVED MEANS.

PACKET 6.436 July 11, 2023

A1 FOUNDATION PLAN
1/4" = 1'-0"

GENERAL FOUNDATION NOTES

1. FLOOR SLAB ON GRADE SHALL BE 6" THICK, REINFORCED WITH #5 AT 16" ON CENTER EACH WAY, CHAIRED IN THE CENTER OF THE SLAB OVER 20 MIL VAPOR BARRIER OVER 4" COMPACTED BASE MEETING TxDOT ITEM 247, GRADE 3.
2. EXTERIOR DIMENSIONS ARE TO FACE OF GIRT AND CONCRETE.
3. INTERIOR STUD DIMENSIONS ARE TO CENTER LINE OF WALL.
4. INTERIOR STUD WALLS ARE 3 5/8" WIDE EXCEPT AS NOTED.
5. SIMPSON S/DT2Z HOLD DOWNS ARE SECURED TO STUD WITH (8) #14 SCREWS AND TO SLAB WITH HILTI KIT-HZ ROD 1/2" DIAMETER WITH 5" EMBEDMENT USING EPOXY SYSTEM INDICATED ON SHEET S-001.
6. FD = FLOOR DRAIN, REFERENCE ARCHITECTURAL AND PLUMBING DRAWINGS.
7. CJ = SLAB JOINT, EITHER CONSTRUCTION OR CONTRACTION AT CONTRACTOR'S OPTION, REFERENCE A5/S-002.

PARTITION GENERAL NOTES

THE FOLLOWING PARTITION GRAPHIC SYMBOL AND THREE PART NOTATION SYSTEM IS USED IN THE CONSTRUCTION DOCUMENTS FOR THIS PROJECT. NOTE: THE PARTITION CONSTRUCTION WILL MAINTAIN ITS DESIGNATION TO THE POINT OF AN INTERSECTING PARTITION. IF NO CHANGE IN DESIGNATION IS SHOWN BEYOND THE INTERSECTION, THE PREVIOUS PARTITION CONSTRUCTION DESIGNATION APPLIES. REFER TO CODE PLAN G-101 FOR RATED WALLS

- WHERE SOUND-ATTENUATION BLANKETS ARE SCHEDULED :
  1. INSTALL ACOUSTICAL SEALANT AT ALL PENETRATIONS PER MANUFACTURER'S INSTRUCTIONS AT TOP AND BOTTOM OF WALLS (BOTH SIDES).
  2. PUTTY PADS AT ALL WALL PENETRATIONS INCLUDING ELECTRIC OUTLETS, IT BACK BOXES.
- ALL ASSEMBLY THICKNESSES LISTED IN THE PARTITION TYPES ARE BASED ON 5/8" THICK GYPSUM BOARD. ALTERNATE GYPSUM BOARD THICKNESSES WILL HAVE A DIFFERENT ASSEMBLY THICKNESS.
- WHERE RATED ASSEMBLY EXTENDS TO STRUCTURE ABOVE PROVIDE UL APPROVED FIRE RATED HEAD OF WALL ASSEMBLY TO MATCH RATING OF WALL. WALL HEIGHTS EXCEEDING STUD MANUFACTURER'S MAXIMUM (LIMITING) SPAN USING 5PSF LATERAL LOADING SHALL BE BRACED TO STRUCTURE ABOVE. (LAY-IN CEILINGS ARE NOT ACCEPTABLE BRACING, HARD CEILINGS ARE ACCEPTABLE).
- "STRUCTURE ABOVE" (AS NOTED IN THE PARTITION CONDITIONS) IS DEFINED AS THE UNDERSIDE OF ONE OR MORE OF THE FOLLOWING:
  - COMPOSITE FLOOR SLAB
  - STAIR TREADS/RISERS
  - METAL ROOF DECK
  - STEEL BEAMS
- IN NO CASE SHALL THE BOTTOM OF STEEL JOISTS BE CONSIDERED BOTTOM OF STRUCTURE ABOVE
- NR = NOT RATED

GENERAL FINISH NOTES

FLOORS:
A. GROUND LEVEL FLOORS SHALL RECEIVE (SCN1) UNO.
B. STORAGE MEZZANINE SHALL RECEIVE (TPF1) UNO.

BASE:
A. BASE SHALL BE (RB1) UNO.

WALLS:
A. DRYWALL WALLS SHALL BE PAINTED (PT1) UNO.
B. RESTROOM WALLS SHALL RECEIVE (FRP2) FROM FLOOR TO CEILING.
C. JANITOR CLOSETS SHALL RECEIVE (FRP1) FROM FLOOR TO 4'-0" AFF ON ALL WET WALLS. WALLS SHALL BE PAINTED (PT1) ABOVE.
D. LOADING BAY WALLS TO RECEIVE PLYWOOD TO 12' - 0" AFF, PLYWOOD TO RECEIVE (TPF1) UNO.
E. MEZZANINE WALLS TO RECEIVE PLYWOOD TO 4' - 0" AFF, PLYWOOD TO RECEIVE (TPF1) UNO.

CEILINGS:
A. ACOUSTICAL CEILING SHALL BE (ACT1) UNO.
B. DRYWALL CEILINGS SHALL BE PAINTED (PT1) UNO.

MILLWORK:
A. UPPER AND LOWER MILLWORK SHALL BE (PLAM1) UNO.
B. COUNTERTOPS SHALL BE (PLAM1) UNO.

MISCELLANEOUS:
A. DOOR AND WINDOW TRIM SHALL BE (PT#).
B. HANDRAILS SHALL BE (PT2).
C. PAINTED DOORS SHALL BE (PT#) UNO.

GENERAL NOTES

A. REFER TO ACCESSIBILITY STANDARDS SHEETS FOR TYPICAL MOUNTING HEIGHTS/LOCATIONS FOR TOILET ROOM ACCESSORIES.
B. ALL INTERIOR WALLS ARE A6a UNLESS NOTED OTHERWISE. REFER TO SHEET A-002 FOR INTERIOR PARTITION SCHEDULE.
C. DIMENSIONS ARE TO FACE OF STUD, CMU, OR CENTERLINE OF STRUCTURE UNO.
D. COORDINATE WITH MEP DRAWINGS FOR LOCATIONS OF FIXTURES. LOCATE AS SHOWN ON ARCHITECTURAL PLANS AND DETAILS. NOTIFY ARCHITECT OF CONFLICTS PRIOR TO CONSTRUCTION.
E. CENTER DEVICES IN CEILING TILES UNO.
F. REFER TO INTERIOR ELEVATIONS AND ROOM FINISH SCHEDULE FOR ADDITIONAL INFORMATION CONCERNING HEIGHTS, CEILING MATERIALS AND FURRED CEILINGS.
G. AT LOCATIONS OF PERFORATED RETURN AIR GRILLES, WIRING, CABLING, ETC. TO BE HELD CLEAR OF OPEN LINE OF SIGHT THROUGH GRILLE. IN CASES WHERE THIS IS UNAVOIDABLE, ITEMS VISIBLE ABOVE GRILLE ARE TO BE PAINTED FLAT BLACK.

PLUMBING FIXTURE MOUNTING HEIGHT

* ALL DIMENSIONS ARE IN INCHES AND FROM FINISHED FLOOR	AGES: 13 THROUGH ADULTS	
	ADA/TAS	STANDARD (4)
WATER CLOSETS		
TOP OF SEAT	17 - 19 MAX	16 - 18 MAX
FLUSH CONTROLS (HANDLE HEIGHT)	30 MAX	30 MAX
URINALS		
RIM OF BASIN	17 MAX	24 MAX
MINIMUM DEPTH (5)	13 1/2 MIN	13 1/2 MIN
FLUSH CONTROLS (HANDLE HEIGHT)	46 MAX	46 MAX
LAVATORIES AND SINKS		
RIM (10)	34 MAX	34 MAX
KNEE CLEARANCE	27 MIN	27 MIN
FRONT EDGE TO WALL/FAUCET HANDLE	20 -25 MAX	20 -25 MAX
DRINKING FOUNTANS AND ELECTRIC WATER COOLERS		
SPOUT OUTLETS		
HEIGHT (LOW)	36 MAX	- - -
HEIGHT (HIGH)	38 - 43 MAX	- - -
DISTANCE FROM FRONT EDGE	5 MAX	- - -
SHOWERS		
FIXED HEAD (NON-MEDICAL APPLICATION)	48 MAX	60"
ADJUSTABLE HEAD (9)	48 MAX	60"
HOSE LENGTH	59 MIN	- - -

NOTES:

1. CONTRACTOR SHALL REFER TO ARCHITECTURAL PLANS FOR LOCATIONS OF PLUMBING FIXTURES, GRAB BARS, DISPENSERS, ETC. WITH RESPECT TO WALLS, STALLS, ETC.
2. ACCESSIBILITY GUIDELINES SHOWN ARE FOR INFORMATIONAL PURPOSES ONLY, AND INTENDED TO SERVE AS A GUIDE FOR CONSTRUCTION PROFESSIONALS AND OWNERS.
3. SOME OF THE INFORMATION SHOWN HERE MAY NOT BE APPLICABLE TO THIS PROJECT
4. STANDARD HEIGHT INFORMATION IS OBTAINED FROM ASPE (AMERICAN SOCIETY OF PLUMBING ENGINEERS). HEIGHTS NOT NOTED BY INFORMATION ON DRAWINGS.
5. DEPTH TO BE MEASURED FROM THE OUTER FACE OF THE URINAL RIM TO THE BACK OF THE FIXTURE
6. KNEE CLEARANCE FOR LAVATORIES AND SINKS SHALL COMPLY WITH TAS.
7. REFER TO DETAIL FOR COUNTER MOUNTED SINKS WITH BUBBLERS FOR DIMENSIONS, ON ARCHITECTURAL DRAWINGS.
8. DRINKING FOUNTAINS AND ELECTRIC WATER COOLER DISTANCES FROM FRONT EDGE INCLUDES BUMPERS. KNEE CLEARANCES MUST BE MAINTAINED THROUGH THE MIN./MAX. RANGE HEIGHT FOR THE SPOUT.
9. THE 30" SLIDE BAR SHALL BE MOUNTED AT A HEIGHT SO THE HAND HELD SHOWER WAND SHALL BE MOUNTED NO HIGHER THAN 48" ABOVE SHOWER FINISHED FLOOR.
10. THE CONTRACTOR SHALL COORDINATE WITH THE COUNTER TOP/BASE CABINET MANUFACTURER TO VERIFY THAT THE RIM OF THE LAVATORY/SINK IS INSTALLED AT NO MORE THAN THE MAXIMUM HEIGHT ALLOWED.

GENERAL NOTES

1. GENERAL NOTES ON THIS SHEET ARE APPLICABLE TO EACH PLUMBING DRAWING OF THIS SET OF CONSTRUCTION DOCUMENTS. NOTES SPECIFIC TO INDIVIDUAL PLUMBING DRAWINGS WILL BE SHOWN ON THE RESPECTIVE PLUMBING DRAWING.
2. THE CONTRACTOR SHALL PROVIDE A COMPLETE PLUMBING SYSTEM TO INCLUDE ALL LABOR, MATERIALS, TOOLS AND EQUIPMENT FOR A COMPLETE AND FUNCTIONAL SYSTEM INCLUDING ALL NECESSARY APPURTENANCES CUSTOMARILY INCLUDED IF NOT SPECIFICALLY CALLED OUT.
3. ENTIRE INSTALLATION, INCLUDING MATERIALS, EQUIPMENT AND WORKMANSHIP SHALL CONFORM WITH ALL APPLICABLE LAWS, CODES AND REGULATIONS.
4. APPLICABLE STANDARDS AND REGULATORY BODIES HAVE JURISDICTION OVER THE CLASS OF WORK.
5. MATERIAL AND EQUIPMENT SHALL HAVE STAMPS OR SEALS OF AHRI, ASME, UL OR ASTM.
6. THE CONTRACTOR SHALL MAKE TESTS FOR ACCEPTANCE AND APPROVAL AS REQUIRED BY CODE AND THE REQUIREMENTS OF APPLICABLE REGULATORY AGENCIES. REQUIRED TESTS SHALL BE PERFORMED IN THE PRESENCE OF THE ENGINEER OF RECORD AND/OR OWNER UNLESS OTHERWISE WAIVED IN WRITING.
7. THE CONTRACTOR SHALL OBTAIN AND PAY FOR ALL PERMITS, LICENSES, DOCUMENTS AND SERVICES RELATED TO INSTALLATION OF THE WORK.
8. THE CONTRACTOR SHALL COORDINATE HIS WORK WITH THE OTHER TRADES IN ORDER TO RESOLVE ANY CONFLICTS THAT MIGHT ARISE DUE TO THE LOCATION OF EQUIPMENT OR THE USE OF SPACE.
9. EQUIPMENT OF DIFFERENT ELECTRICAL CHARACTERISTICS MAY BE FURNISHED PROVIDED SUCH PROPOSED EQUIPMENT IS APPROVED IN WRITING AND CONNECTING ELECTRICAL SERVICE, CIRCUIT BREAKERS AND CONDUIT ARE APPROPRIATELY MODIFIED AT NO COST TO THE OWNER.
10. RUN ALL HORIZONTAL DOMESTIC COLD WATER, DOMESTIC HOT WATER, AND VENT PIPING ABOVE THE CEILING UNLESS OTHERWISE NOTED.
11. MAKE PIPE PENETRATIONS OF ALL WALLS WITH SLEEVES AS NOTED IN THE SPECIFICATIONS.
12. DO NOT INSTALL EQUIPMENT, PIPING OR DUCTWORK OVER ANY ELECTRICAL EQUIPMENT OR ELECTRICAL SERVICE SPACE.
13. LAYOUT OF PIPING IS DIAGRAMMATIC. RUN ALL EXPOSED PIPING AS HIGH AS POSSIBLE UNLESS OTHERWISE NOTED. ALLOW FOR RISES, DROPS AND OFFSETS AS REQUIRED.
14. EXTEND CONDENSATE DRAIN LINES AS INDICATED. ALL CONDENSATE DRAIN PIPING SHALL BE TRAPPED AND PITCHED DOWN IN DIRECTION OF FLOW A MINIMUM OF 1/8 INCH PER 1 FOOT.
15. INSTALL EQUIPMENT TO FACILITATE SERVICING, MAINTENANCE AND REPAIR OR REPLACEMENT OF ELECTRICAL COMPONENTS. AS MUCH AS PRACTICAL, CONNECT EQUIPMENT FOR EASE OF DISCONNECTING, WITH A MINIMUM OF INTERFERENCE WITH OTHER INSTALLATIONS.
16. FLASHING DETAILS FOR PIPES PENETRATING THE ROOF SHALL BE COORDINATED WITH ARCHITECTURE DETAILS.
17. CONTRACTOR SHALL INSTALL ALL PLUMBING VENTS AND EXHAUST AIR OUTLETS A MINIMUM OF 10'-0" AWAY (PER CODE) FROM ALL OUTSIDE AIR INTAKES, OPERABLE DOORS AND/OR WINDOWS. CONSTRUCTION DRAWINGS ARE DIAGRAMMATIC BY NATURE. FINAL MEASUREMENTS SHOULD BE MADE AT THE PROJECT SITE.
18. CONTRACTOR TO PROVIDE MEANS TO CLEAR CONDENSATE DRAIN LINE WITHOUT CUTTING THE DRAIN LINE.
19. NOT ALL SYMBOLS OR ABBREVIATIONS ARE USED.

PLUMBING ABBREVIATIONS

AUX	AUXILIARY CONDENSATE DRAIN PIPING
AVG	AVERAGE
AFF	ABOVE FINISHED FLOOR

GENERAL NOTES

A REFER TO GENERAL NOTES ON P-0C1.
B ALL INFORMATION SHOWN ON THESE PLANS APPLIES TO 2 DIFFERENT BUILDINGS.

KEY NOTES

AS INDICATED BY: (#)

1 NEW RO SYSTEM TO SUPPLY ICE MACHINE AND S-1. S-1 SHALL HAVE RO MANUFACTURER PROVIDED SPIGOT RETROFITTED. REFER TO MANUFACTURER FOR DETAIL.
2 REFER TO CIVIL FOR CONTINUATION OF LINES.
3 ADD 3" BALL VALVE IN VERTICAL. SEE P-111 P1 FOR DETAIL.
4 TURN LINE UP INTO MECHUAN 114.
5 DOWN THRU MEZZENINE FINISHED FLOOR TO CEILING SPACE.
6 TURN 3/4" CONDENSATE PIPE DOWN IN WALL TO 16"A.F.F. TURN DRAIN LINE OUT OF WALL AND DOWN TO SPILL TO SERVICE SINK. PROVIDE ESCUTCHEON AT WALL PENETRATION
7 FLOOR DRAIN SHALL BE UNDER MILLWORK TO SERVICE UNDERCOUNTER ICE MAKER.

NOTES:
1. MANUFACTURERS WITH MODEL NUMBERS ARE BASIS ITEMS. OTHER MANUFACTURERS MUST BE EQUIVALENT MANUFACTURERS UNLESS NOTED OTHERWISE.
2. FOR MOUNTING HEIGHTS OF INDIVIDUAL WALL-MOUNTED FIXTURES, REFER TO P-001 SHEET.
3. EACH UNDER SLAB OR CONCEALED P-TRAP SHALL BE A DEEP-SEAL TYPE.
4. PROVIDE EACH WALL MOUNTED PLUMBING FIXTURE SUCH AS SINKS, LAVATORIES, ELECTRIC WATER COOLERS, DRINKING FOUNTAINS, ETC., WITH A FLOOR MOUNTED SUPPORT CARRIER WITH RECTANGULAR LEGS.
5. UNLESS SCHEDULED OTHERWISE, PROVIDE EACH LAVATORY, SINK, WATER COOLER, ETC. WITH A P-TRAP ASSEMBLY CONSISTING OF A CHROME-PLATED (C.P.) CAST BRASS TRAP WITH CLEANOUT PLUG, C.P. TUBING OUTLET (MIN. 17 GA), AND C.P. CAST BRASS ESCUTCHEON WITH SETSCREW.
6. PROVIDE EACH FIXTURE WHICH REQUIRES COLD AND/OR HOT WATER (EXCEPT FLUSH VALVES) WITH A SUPPLY/STOP ASSEMBLY CONSISTING OF A C.P. BRASS STOP VALVE (MIN. 1/2") WITH QUARTER STOPS AND LOCK SHIELD, STAINLESS STEEL FLEXIBLE RISER, C.P. BRASS NIPPLE, AND C.P. CAST BRASS ESCUTCHEON WITH SETSCREW.
7. FOR EACH PUBLIC LAVATORY OR SINK WITH EXPOSED DRAIN AND BOTH COLD AND HOT SUPPLY COMPONENTS, PROVIDE A MANUFACTURED INSULATION KIT MADE FROM MOLDED CLOSED CELL VINYL THAT IS ANTI-MICROBIAL AND SEAMLESS. EACH KIT SHALL COVER THE TAILPIECE, P-TRAP, WALL BEND, BOTH WATER SUPPLY STOPS, AND BOTH WATER RISERS. KITS SHALL BE EQUAL OR EQUIVALENT TO "PROVIRA" BY McGUIRE OR LAV-GUARD BY TRUEBRO.
8. WHERE ARCHITECTURAL PLANS SHOW WATER CLOSETS AND URINALS, PROVIDE AND INSTALL FLUSHING VALVE SUCH THAT FLUSH HANDLE IS ON WIDE SIDE OF WATER CLOSET.
9. PROVIDE WATER HAMMER ARRESTORS LOCATED AND SIZED ACCORDING TO PDI RECOMMENDATIONS.
10. PROVIDE ISOLATION VALVES IN CW, HW AND HWR PIPING AS NEED OR AS SHOWN FOR ALL GROUPS OF FIXTURES.
11. INSTALL PLUMBING FIXTURES IN ACCORDANCE WITH LATEST ADA AND TAS STANDARDS.

AS INDICATED BY: (#)

1 NEW RO SYSTEM TO SUPPLY ICE MACHINE AND S-1. S-1 SHALL HAVE RO MANUFACTURER PROVIDED SPOUT.
2 REFER TO CIVIL FOR CONTINUATION OF LINES.
3 ADD 2" BALL VALVE IN VERTICAL. SEE P-111 P1 FOR DETAIL.
4 TURN LINE UP INTO MECHJAN 114.
5 FLOOR DRAIN SHALL BE UNDER MILLWORK TO SERVICE UNDERCOUNTER ICE MAKER.

PACKET 6.458 July 11, 2023

6/5/2023 8:56:26 AM

GENERAL NOTES

1. GENERAL NOTES ON THIS SHEET ARE APPLICABLE TO EACH MECHANICAL DRAWING OF THIS SET OF CONSTRUCTION DOCUMENTS. NOTES SPECIFIC TO INDIVIDUAL MECHANICAL DRAWINGS WILL BE SHOWN ON THE RESPECTIVE MECHANICAL DRAWING.
2. THE CONTRACTOR SHALL PROVIDE A COMPLETE HVAC SYSTEM TO INCLUDE ALL LABOR, MATERIALS, TOOLS AND EQUIPMENT FOR A COMPLETE AND FUNCTIONAL SYSTEM INCLUDING ALL NECESSARY APPURTENANCES CUSTOMARILY INCLUDED IF NOT SPECIFICALLY CALLED OUT.
3. ENTIRE INSTALLATION, INCLUDING MATERIALS, EQUIPMENT AND WORKMANSHIP SHALL CONFORM WITH ALL APPLICABLE LAWS, CODES AND REGULATIONS.
4. THIS PROJECT SHALL CONFORM TO APPLICABLE ASHRAE, NFPA AND SMACNA STANDARDS AND OTHER REGULATORY BODIES HAVING JURISDICTION OVER THE CLASS OF WORK.
5. MATERIAL AND EQUIPMENT SHALL HAVE STAMPS OR SEALS OF AHRI, ASME, UL OR ASTM.
6. THE CONTRACTOR SHALL MAKE TESTS FOR ACCEPTANCE AND APPROVAL AS REQUIRED BY CODE AND THE REQUIREMENTS OF APPLICABLE REGULATORY AGENCIES. REQUIRED TESTS SHALL BE PERFORMED IN THE PRESENCE OF THE ENGINEER OF RECORD AND/OR OWNER UNLESS OTHERWISE WAIVED IN WRITING.
7. THE CONTRACTOR SHALL OBTAIN AND PAY FOR ALL PERMITS, LICENSES, DOCUMENTS AND SERVICES RELATED TO INSTALLATION OF THE WORK.
8. THE CONTRACTOR SHALL COORDINATE HIS WORK WITH THE OTHER TRADES IN ORDER TO RESOLVE ANY CONFLICTS THAT MIGHT ARISE DUE TO THE LOCATION OF EQUIPMENT OR THE USE OF SPACE.
9. EQUIPMENT OF DIFFERENT ELECTRICAL CHARACTERISTICS MAY BE FURNISHED PROVIDED SUCH PROPOSED EQUIPMENT IS APPROVED IN WRITING AND CONNECTING ELECTRICAL SERVICE, CIRCUIT BREAKERS AND CONDUIT ARE APPROPRIATELY MODIFIED AT NO COST TO THE OWNER.
10. RUN ALL HORIZONTAL PIPING AND DUCTWORK ABOVE THE CEILING UNLESS OTHERWISE NOTED.
11. MAKE DUCT PENETRATIONS OF ALL WALLS WITH SHEET METAL DUCTS. FLEXIBLE DUCT PENETRATION OF WALLS ARE NOT ACCEPTABLE.
12. INSTALL TURNING VANES WHERE SHOWN ON PLANS.
13. DO NOT INSTALL EQUIPMENT, PIPING OR DUCTWORK OVER ANY ELECTRICAL EQUIPMENT OR ELECTRICAL SERVICE SPACE.
14. LAYOUT OF PIPING AND DUCTWORK IS DIAGRAMMATIC. RUN ALL EXPOSED PIPING AND DUCTWORK AS HIGH AS POSSIBLE UNLESS OTHERWISE NOTED. ALLOW FOR RISES, DROPS AND OFFSETS AS REQUIRED.
15. INSTALL MECHANICAL EQUIPMENT TO FACILITATE SERVICING, MAINTENANCE AND REPAIR OR REPLACEMENT OF ELECTRICAL COMPONENTS. AS MUCH AS PRACTICAL, CONNECT EQUIPMENT FOR EASE OF DISCONNECTING, WITH A MINIMUM OF INTERFERENCE WITH OTHER INSTALLATIONS. PIPING SHALL NOT INTERFERE WITH FILTER PULL.
16. MECHANICAL CONTRACTORS SHALL PROVIDE AUTOMATIC CONTROL DEVICES SUCH AS STARTERS, VARIABLE FREQUENCY DRIVES (VFD), TEMPERATURE SENSORS, RELAYS, AND PRESSURE SWITCHES THAT ARE ASSOCIATED WITH MECHANICAL EQUIPMENT AND ASSOCIATED CONTROL WIRING FROM CONTROL POWER LOCATION TO THE CONTROL DEVICE. ELECTRICAL CONTRACTOR SHALL PROVIDE CONDUIT AND WIRING FROM POWER SOURCE TO DISCONNECT SWITCH, FROM DISCONNECT SWITCH TO STARTER OR VFD, AND FROM STARTER OR VFD TO THE EQUIPMENT.
17. FLASHING DETAILS FOR PIPES PENETRATING THE ROOF SHALL BE COORDINATED WITH ARCHITECTURE DETAILS.
18. LOCATE TEMPERATURE SENSORS AND CO2 SENSORS 48" ABOVE FINISHED FLOOR OR AS NOTED ON PLANS.
19. COORDINATE CURBS AND SIZE OF CURBS IN ACCORDANCE WITH ACTUAL EQUIPMENT PURCHASED.
20. CONTRACTOR IS TO PROVIDE AN ADJUSTABLE ROOF CURB OR TAPER AT CURB TO MATCH ROOF SLOPE FOR CURB MOUNTED EQUIPMENT. THE USE OF SHIMS TO LEVEL EQUIPMENT IS NOT ACCEPTABLE UNLESS THE CURB DIMENSIONS ARE SMALLER THAN 36"x36".
21. CONTRACTOR TO VERIFY ALL ACCESS PANEL LOCATIONS. NOT ALL ACCESS PANELS REQUIRED ARE SHOWN. REFER TO SPECIFICATIONS FOR ACCESS PANEL REQUIREMENTS.
22. CONTRACTOR SHALL INSTALL ALL PLUMBING VENTS AND EXHAUST AIR OUTLETS A MINIMUM OF 10-0" AWAY (PER CODE) FROM ALL OUTSIDE AIR INTAKES, OPERABLE DOORS AND/ OR WINDOWS. CONSTRUCTION DRAWINGS ARE DIAGRAMMATIC BY NATURE, FINAL MEASUREMENTS SHOULD BE MADE AT THE PROJECT SITE.
23. NOT ALL SYMBOLS OR ABBREVIATIONS ARE USED.

BLOWER COIL SCHEDULE

SYMBOL	TYPE	EXTERNAL S.P. (in W.G.)	BLOWER MOTOR HP/ DRIVE	TOTAL CFM	OUTSIDE AIR CFM	COOLING					HEATING			ELECTRICAL				WEIGHT, LBS	MANUFACTURER	INDOOR UNIT MODEL NUMBER
						MINIMUM TOTAL CAPACITY, MBH	MINIMUM SENSIBLE CAPACITY, MBH	ENTERING MIXED AIR TEMPERATURE, DB / WB, F	MINIMUM COOLING SEER	OUTDOOR AMBIENT TEMPERATURE, F	MINIMUM TOTAL CAPACITY AT 47F, MBH	MIXED ENTERING AIR TEMPERATURE, F	MINIMUM EFFICIENCY, HSPF	VOLTAGE	PHASE	MCA	MOCP			
BC-1	UNITARY SPLIT SYSTEM	0.53	0.5	1050 CFM	150	34.1	24.2	78.5/63.62	14.00	102	32.4	63.53	3.2	230 V	1	5	15	155 lb	TRANE	TEM6A0C

HEAT PUMP SPLIT SYSTEM SCHEDULE

SYMBOL	SERVES	ELECTRICAL				TYPE OF REFRIGERANT	MANUFACTURER	MODEL NO.
		VOLTAGE	PHASE	MCA	MOCP			
HP-1	BC-1	230 V	1	18	30	R410	TRANE	4TWR4036

NOTES:
1. SCHEDULED UNITS ARE MANUFACTURED BY TRANE. CARRIER AND LENNOX ARE CONSIDERED EQUIVALENT.
2. EXTERNAL STATIC PRESSURE INCLUDES DUCTWORK, DAMPERS, AND AIR DEVICES. PRESSURE DROP FOR WET COIL AND FILTERS IS CONSIDERED AS INTERNAL PRESSURE DROP.
3. COOLING CAPACITIES AND SEER/EER RATINGS ARE COMBINATION RATINGS WITH OUTDOOR UNITS. CAPACITIES ARE RATED AT ENTERING AIR TEMPERATURE AND AMBIENT AS LISTED; SEER RATINGS ARE AT AHRI CONDITIONS. AIRFLOW CONDITIONS ARE RATED AT LOCAL ALTITUDE.
4. EACH OUTDOOR UNIT SHALL BE EQUIPPED WITH A HIGH PRESSURE SWITCH, HARD START KIT ON SINGLE PHASE UNIT, ANTI-SHORT CYCLE TIMER, SERVICE VALVES AND INDOOR BLOWER RELAY KIT.
5. ELECTRICAL CONTRACTOR IS TO PROVIDE AND INSTALL ALL DISCONNECTS FOR EACH DEVICE IN THE SPLIT SYSTEM PACKAGE. ELECTRICAL CONTRACTOR IS TO MAKE ALL CONNECTS AS PER DIVISION 16 SPECIFICATIONS.
6. EACH SYSTEM SHALL BE PROVIDED WITH AN ELECTRONIC PROGRAMMABLE NIGHT SETBACK THERMOSTAT WITH ONE STAGE OF COOLING AND 2 STAGES OF HEATING. MECHANICAL CONTRACTOR SHALL PROVIDE AND INSTALL THE THERMOSTAT AS PER DIVISION 16 SPECIFICATIONS FOR RUNNING WIRE AND CONDUIT.

COMBINATION LOUVER/DAMPER SCHEDULE

SYMBOL	SERVES	LOUVER FUNCTION	WIDTH	HEIGHT	MAX FACE VELOCITY	MIN FREE AREA	AIRFLOW	FRAME TYPE	ACTUATOR VOLTAGE	FAIL POSITION	BIRDSCREEN	INSECT SCREEN	MANUFACTURER	MODEL NO.
L-1	EF-2	INTAKE	36"	34"	750 FPM	2.70 FT^2	2035 CFM	CHANNEL	120 V	CLOSED	YES	NO	GREENHECK	EACC-601

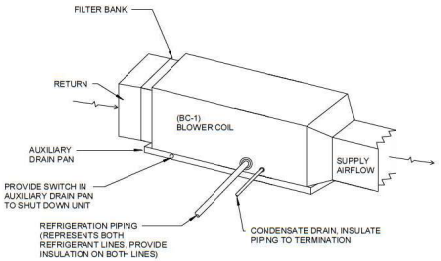
NOTES:
1. UNITS ARE SCHEDULED TO BE MANUFACTURED BY GREENHECK. RUSKIN AND CESCO ARE CONSIDERED EQUIVALENT.
2. COORDINATE FRAME TYPE WITH ARCHITECT. COORDINATE EXACT SIZE WITH ARCHITECTURAL DETAILS AND CMU BLOCK OR BRICK DIMENSIONS.
3. COORDINATE LOUVER COLOR WITH ARCHITECT.
4. INTERLOCK LOUVER TO OPEN WHEN EF-2 IS OPERATED.

EXHAUST FAN SCHEDULE

SYMBOL	TYPE	CFM	DRIVE	E.S.P. (in W.G.)	SOUND LEVEL IN SONES	FAN MOTOR POWER - HP	NOMINAL FAN RPM	ELECTRICAL			WEIGHT, LBS	MANUFACTURER	MODEL NO
								VOLTAGE	PHASE	METHOD OF CONTROL			
EF-1	IN LINE	260 CFM	DIRECT	0.32	6.8	1/10	1485	115 V	1	NOTE 7	50	GREENHECK	SQ-80-VG
EF-2	SIDEWALL PROP	2035 CFM	DIRECT	0.3	13.9	1/2	997	115 V	1	SWITCH	186	GREENHECK	AER-24-VG

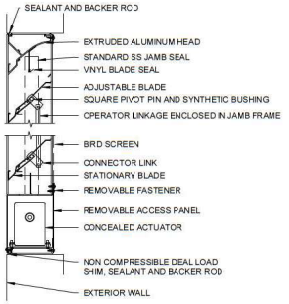
NOTES:
1. FANS ARE SCHEDULED TO BE MANUFACTURED BY GREENHECK. TWIN CITY AND COOK ARE CONSIDERED EQUIVALENT MANUFACTURERS.
2. AIRFLOW CONDITIONS RATED AT LOCAL ALTITUDE.
3. PROVIDE AND INSTALL FLEXIBLE CONNECTION ON FAN INLET DUCT CONNECTION.
4. FANS SHALL HAVE MOTOR VIBRATION ISOLATION, BACK DRAFT DAMPER AT UNIT AND LOCAL DISCONNECT SWITCH AT UNIT.
5. FAN SELECTIONS SHALL BE SUBMITTED TO ALLOW FOR A MINIMUM +/- 10% INSCHEDULED EXTERNAL STATIC AND CFM WITHIN THE PARAMETERS OF THE SCHEDULED MOTOR HP.
6. PROVIDE EF-2 WITH WALL COLLAR, 45° WEATHERHOOD WITH BIRDSCREEN, GRAVITY OPERATED DAMPER, AND INTERIOR WALL HOUSING WITH GAURD.
7. EF-1 SHALL BE CONTROLLED USING WALL MOUNTED OCCUPANCY SENSORS IN MENS 109 AND WOMENS 110. COORDINATE WITH ELECTRICAL CONTRACTOR.

AIR DISTRIBUTION SCHEDULE



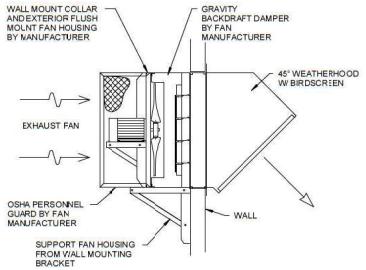
SYMBOL	SYSTEM TYPE	DESCRIPTION	INSTALLATION TYPE	MANUFACTURER	MODEL NO.
S1	SUPPLY	ALL STEEL, 24" x 24" NOMINAL FACE, FIXED AIR PATTERN, STEPPED WITH 4-CONES, SQUARE FACE AND ROUND NECK. SIZE NECK AS SHOWN ON DRAWINGS.	LAY-IN/SURFACE MOUNT	NAILOR	RNS
S2	SUPPLY	ALL STEEL, 12" x 12" NOMINAL FACE, FIXED AIR PATTERN, STEPPED WITH 4-CONES, SQUARE FACE AND ROUND NECK. SIZE NECK AS SHOWN ON DRAWINGS.	LAY-IN/SURFACE MOUNT	NAILOR	RNS
R1	RETURN	EGGCRATE RETURN GRILLE, 24"x 24" NOMINAL FACE, STEEL BORDER WITH ALUMINUM 1/2"x1/2"x1/2" CORE. SIZE NECK AS SHOWN ON DRAWINGS.	LAY-IN/SURFACE MOUNT	NAILOR	61EC
E1	EXHAUST	EGGCRATE EXHAUST GRILLE, 12"x 12" NOMINAL FACE, ALL ALUMINUM 1/2" x 1/2" x 1/2" CORE. SIZE NECK AS SHOWN ON DRAWINGS.	LAY-IN/SURFACE MOUNT	NAILOR	51EC
E2	EXHAUST	ALUMINUM, SIDEWALL EXHAUST GRILLE WITH FIXED HORIZONTAL BLADES, 3/4" BLADE SPACING. SIZE NECK AS SHOWN ON DRAWINGS.	SIDEWALL	NAILOR	5145H

NOTES:
1. AIR DEVICES SCHEDULED TO BE MANUFACTURED BY NAILOR. PRICE, TITUS, AND RUSKIN ARE CONSIDERED EQUIVALENT MANUFACTURERS.
2. UNLESS SCHEDULED OTHERWISE, AIR DEVICES SHALL BE WHITE OR OFF-WHITE IN COLOR.
3. ALL JOISTS, CONDUITS, PIPING AND EQUIPMENT ABOVE OPEN RETURN DEVICES SHALL BE PAINTED BLACK FOR AN AREA OF 2 FEET ON ALL SIDES OF THE AIR DEVICE.
4. PROVIDE MANUAL BALANCING DAMPERS AT EACH SUPPLY AND EXHAUST AIR DUCT TAP. INSTALL MBD AT MAIN DUCT TAP.
5. PROVIDE INSULATING BLANKET ON BACK OF THE SUPPLY AND RETURN GRILLES.



ELECTRIC UNIT HEATER

SYMBOL	AIR FLOW	TEMP RISE F	MINIMUM INPUT, kW	VOLTAGE	PHASE	WEIGHT, LBS	MANUFACTURER	MODEL NO
EUH-1	510 CFM	18	3	240 V	1	45	REZNOR	EGHBAK3E
EUH-2	510 CFM	18	3	240 V	1	45	REZNOR	EGHBAK3E



NOTES:
1. UNITS ARE SCHEDULED TO BE MANUFACTURED BY REZNOR. INDECCO, MARKEL AND TRANE ARE CONSIDERED EQUIVALENT MANUFACTURERS. OTHERS BY PRIOR APPROVAL.
2. ELECTRICAL UNIT HEATER AS SCHEDULED SHALL HAVE BUILT-IN CONTROL TRANSFORMER, OVERHEAT PROTECTION, INTERNAL 24V THERMOSTAT, AND MOUNTING BRACKET. MOUNT THERMOSTAT TO BACK OF UNIT HEATER.
3. MANUFACTURER TO PROVIDE A LOCAL DISCONNECT THAT IS TO BE FIELD INSTALLED.

E-001

06/27/2023 10:48:32 AM

GENERAL NOTES

A. COORDINATE WITH THE UTILITY SERVICE PROVIDERS FOR ALL REQUIREMENTS FOR DELIVERING POWER SERVICE TO THE NEW BUILDING.
B. REFER TO THE LIGHT FIXTURE SCHEDULE FOR FIXTURE TYPES. PROVIDE THE NUMBER OF FIXTURES AND ORIENTATION NOTED FOR POLE-MOUNTED FIXTURES. POLE EPA RATINGS SHALL BE FOR THE NUMBER OF FIXTURES SHOWN.
C. CONTRACTOR SHALL VERIFY LOCATION OF ALL UNDERGROUND UTILITIES PRIOR TO ANY EARTH WORK.

KEY NOTES

AS INDICATED BY: (XX)

1. PROVIDE (2)#8 AWG + #8 GND IN 3/4" CONDUIT
2. EXTEND AND CONNECT TO LIGHTING CONTROL RELAY PANEL LOCATED IN ELECTRICAL ROOM 113.
3. NEW UNDERGROUND SECONDARY SERVICE ROUTED FROM OVERHEAD POLE MOUNTED TRANSFORMER. PROVIDE TRENCH, CONDUIT AND BACKFILL. CONTRACTOR SHALL COORDINATE ALL REQUIREMENTS WITH ONCOR ELECTRIC DELIVERY. REFER TO ELECTRICAL RISER DIAGRAM ON SHEET E-501 FOR ADDITIONAL INFORMATION.
4. POLE MOUNTED TRANSFORMERS AND OVERHEAD TO UNDERGROUND TRANSITION BY ONCOR DELIVERY.

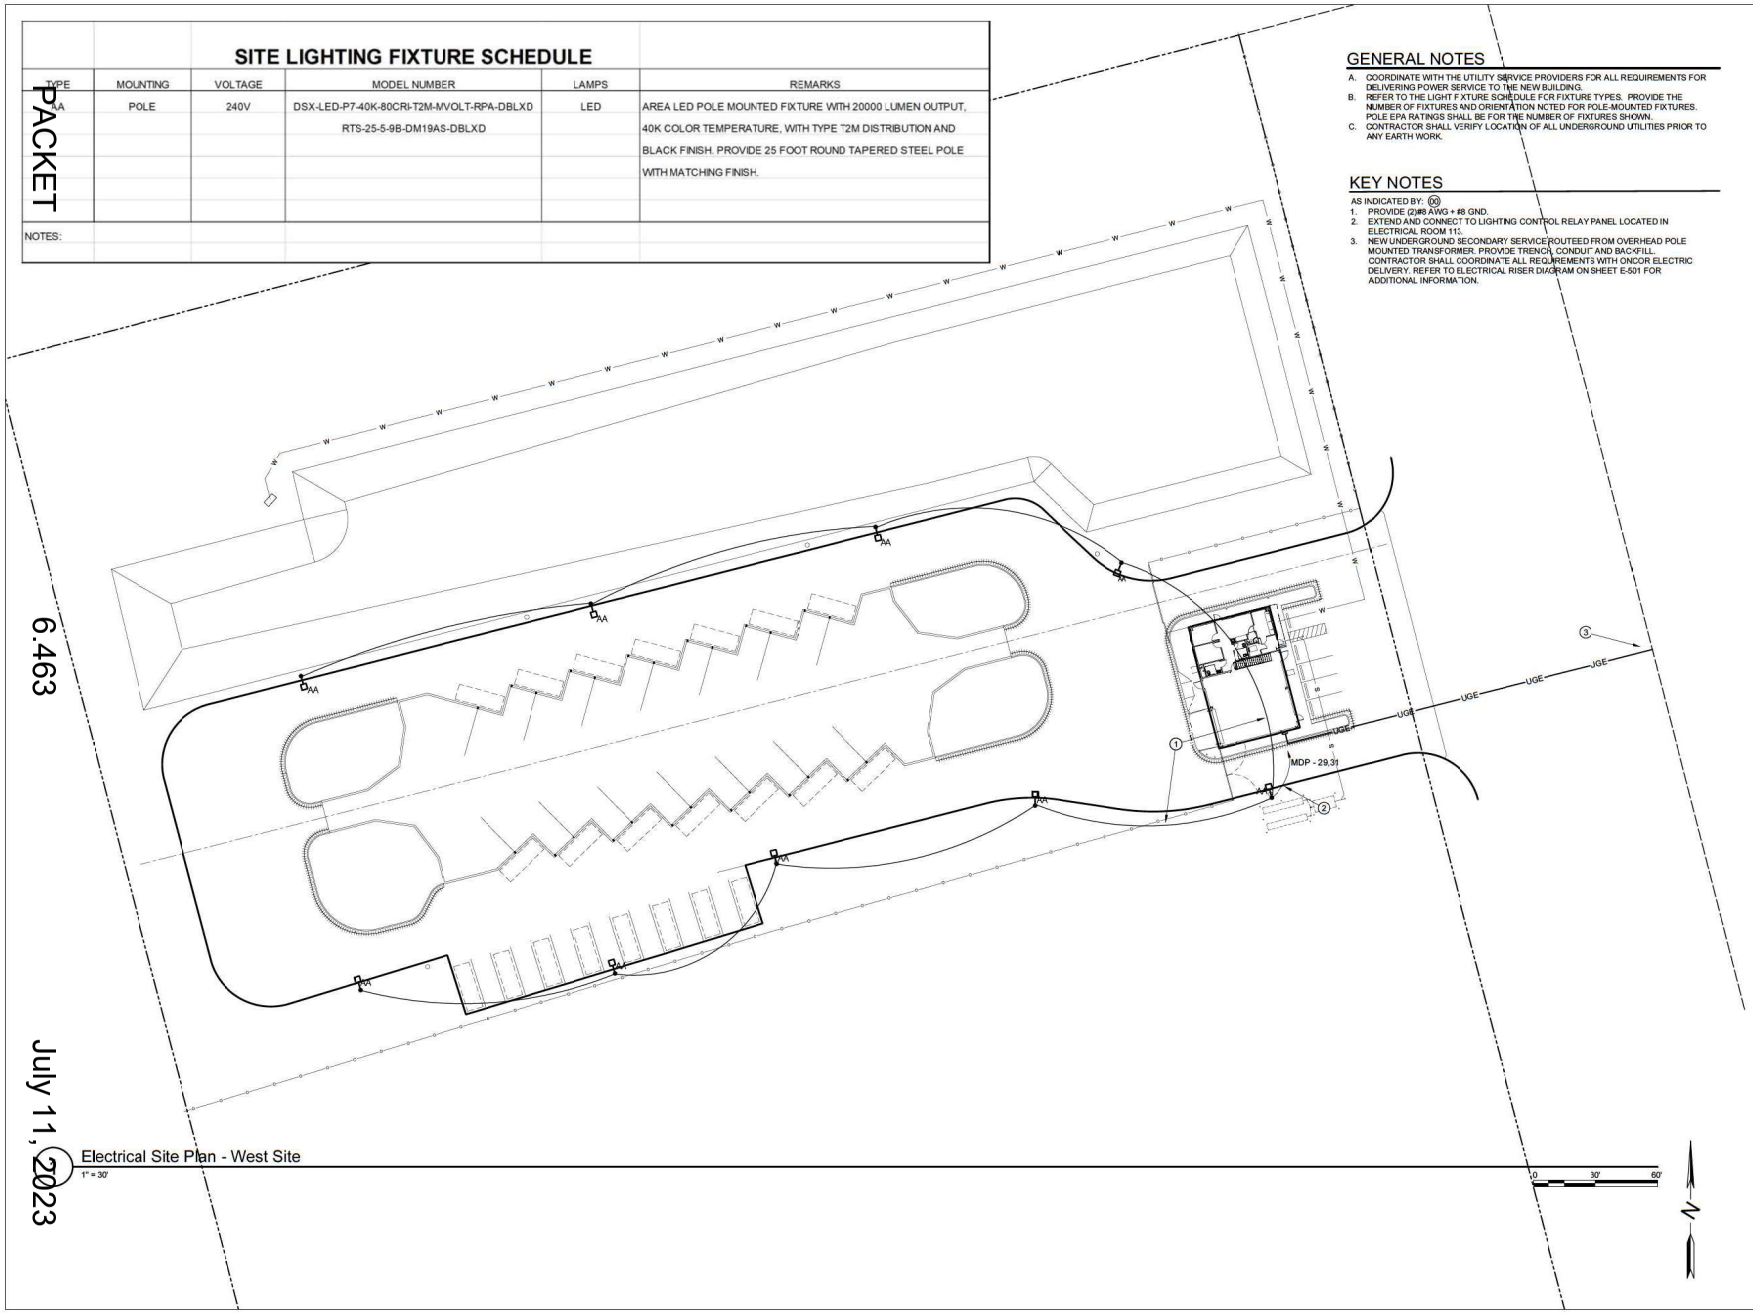
AA	POLE	240V	DSX-LED-P7-40K-80CRI-T2M-MVOLT-RPA-DBLXD RTS-25-5-9B-DM19AS-DBLXD	LED	AREA LED POLE MOUNTED FIXTURE WITH 20000 LUMEN OUTPUT, 40K COLOR TEMPERATURE, WITH TYPE "2M DISTRIBUTION AND BLACK FINISH. PROVIDE 25 FOOT ROUND TAPERED STEEL POLE WITH MATCHING FINISH.

NOTES:



GENERAL NOTES

A. COORDINATE WITH THE UTILITY SERVICE PROVIDERS FOR ALL REQUIREMENTS FOR DELIVERING POWER SERVICE TO THE NEW BUILDING.
B. REFER TO THE LIGHT FIXTURE SCHEDULE FOR FIXTURE TYPES. PROVIDE THE NUMBER OF FIXTURES AND ORIENTATION NOTED FOR POLE-MOUNTED FIXTURES. POLE EPA RATINGS SHALL BE FOR THE NUMBER OF FIXTURES SHOWN.
C. CONTRACTOR SHALL VERIFY LOCATION OF ALL UNDERGROUND UTILITIES PRIOR TO ANY EARTH WORK.

KEY NOTES

AS INDICATED BY: (XX)

1. PROVIDE (2)#8 AWG + #8 GND.
2. EXTEND AND CONNECT TO LIGHTING CONTROL RELAY PANEL LOCATED IN ELECTRICAL ROOM 115.
3. NEW UNDERGROUND SECONDARY SERVICE ROUTEED FROM OVERHEAD POLE MOUNTED TRANSFORMER. PROVIDE TRENCH, CONDUIT AND BACKFILL. CONTRACTOR SHALL COORDINATE ALL REQUIREMENTS WITH ONCOR ELECTRIC DELIVERY. REFER TO ELECTRICAL RISER DIAGRAM ON SHEET E-501 FOR ADDITIONAL INFORMATION.

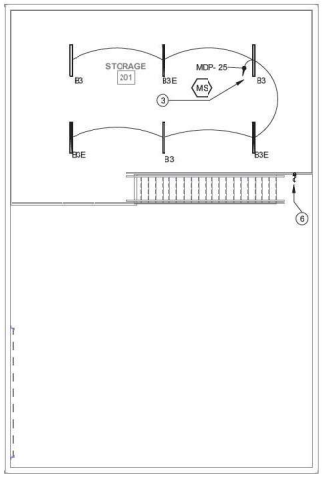
July 11, 2023

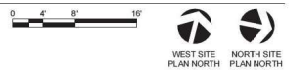
4 Lighting Plan - Callout 2
1/2" = 1'-0"

3 Lighting Plan - Callout 1
1/2" = 1'-0"

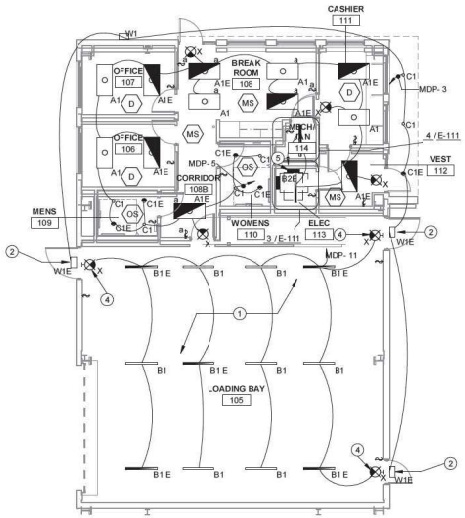


GENERAL NOTES

A. COORDINATE LOCATION OF LIGHT FIXTURES WITH ARCHITECTURAL AND MECHANICAL.
B. ALL EMERGENCY AND EGRESS LIGHTING SHALL BE CONNECTED TO THE SAME BRANCH CIRCUIT SERVING THE NORMAL LIGHTS AND SHALL BE ON THE LINE SIDE OF RELAYS OR SWITCHING DEVICES.
C. REFER TO KEYED NOTES FOR CONTROL OF ADDITIONAL EMERGENCY LIGHTING. ALL EXIT SIGNS SHALL BE CONNECTED FOR CONTINUOUS OPERATION.
D. AT LOCATIONS WHERE ROOM LIGHT FIXTURES ARE CONTROLLED THROUGH THE USE OF OCCUPANCY SENSORS, PROVIDE THE NUMBER OF SENSORS AND LOCATE THE UNITS AS REQUIRED FOR COMPLETE ROOM COVERAGE. WHERE MORE THAN ONE SENSOR IS LOCATED IN A COMMON SPACE, CONNECT THE UNITS SUCH THAT DETECTION OF OCCUPANCY FROM EITHER UNIT WILL ENERGIZE THE LIGHTING. WHERE SWITCHES ARE SHOWN IN CONJUNCTION WITH OCCUPANCY SENSORS, CONNECT THE SWITCHES TO DE-ENERGIZE THE LIGHTING INDICATED REGARDLESS OF OCCUPANCY. ADJUST ALL SENSOR TIME DELAYS AND MOTION SENSITIVITIES DURING PROJECT CLOSEOUT TO MEET THE OPERATIONAL FUNCTION OF THE OWNER.
E. EXACT LOCATION AND PLACEMENT OF EXIT LIGHTING SHALL BE FIELD DETERMINED TO ENSURE PROPER LINES OF SIGHT.
F. PROVIDE DEDICATED NEUTRAL WIRE FOR ALL 120V BRANCH CIRCUITS. NO MULTI-WIRE BRANCH CIRCUITS SHALL BE ALLOWED.
G. ELECTRICAL FLOOR PLANS AND SCHEDULES ARE VALID FOR BOTH WEST AND NORTH SITES.



KEY NOTES



AS INDICATED BY: (#)

1. MOUNT FIXTURE AT 18' 0" AFF. TYPICAL OF ALL FIXTURES TYPE "B1" AND "B1E".
2. MOUNT EXTERIOR WALL PACK AT 9' 4-1/2" AFF. COORDINATE EXACT MOUNTING HEIGHT WITH ARCHITECTUAL. EXTEND AND CONNECT TO LIGHTING CONTROL RELAY PANEL FOR CONTROL.
3. MOUNT FIXTURE AT 7' 5" AFF TO BASE OF FIXTURE. TYPICAL OF ALL FIXTURES TYPE "B3" AND "B3E".
4. MOUNT EXIT SIGN 1' 0" FROM THE TOP OF THE DOOR TO THE BOTTOM OF THE FIXTURE.
5. PROVIDE LIGHTING RELAY PANEL (LRP) : ARP-INTENC08-NLT-4FCR-MVCLT-HLK-SM-DTC-ARFA-APS-OL OR EQUIVALENT. LIGHTING RELAY PANEL TO CONTROL EXTERIOR WALL PACK LIGHTS AND PARKING LOT LIGHTS. COORDINATE WITH MANUFACTURER FOR FURTHER DETAILS.
6. SECOND FLOOR LIGHT FIXTURES B3 AND B3E SHALL BE CONTROLLED BY LIGHT FIXTURE SWITCH LOCATED ON 1ST FLOOR.

GENERAL NOTES

A. REFER TO THE MECHANICAL DRAWINGS FOR THE LOCATION AND NUMBER OF SUPPLY AND RETURN AIR DUCTS. FOR UNITS THAT ARE INDICATED TO HAVE SMOKE DETECTION COVERAGE, PROVIDE THE NUMBER OF DETECTORS AS REQUIRED TO COVER ALL OF THE DUCTS.
B. ALL CONDUITS SERVING ROOF-MOUNTED EQUIPMENT SHALL BE EXTENDED INSIDE THE UNIT CURBS TO AVOID ADDITIONAL PITCH PANS. ALL EXTERIOR CONDUIT SHALL BE RIGID GALVANIZED STEEL OR LIQUID TIGHT FLEXIBLE CONDUIT AS SPECIFIED.
C. AT LOCATIONS WHERE A COMMON EXHAUST FAN IS CONTROLLED THROUGH INDEPENDENT WALL SWITCHES, CONNECT THE SWITCHES IN PARALLEL TO ALLOW EITHER SWITCH TO OPERATE THE FAN.
D. REFER TO THE MECHANICAL EQUIPMENT ELECTRICAL SCHEDULE FOR BRANCH CIRCUIT REQUIREMENTS FOR ALL MECHANICAL EQUIPMENT.
E. COORDINATE WITH SECURITY CONTRACTOR FOR ALL POWER REQUIREMENTS. REFER TO COMMUNICATION SHEETS FOR JUNCTION BOXES FOR MOTION DETECTORS, KEYPADS, DOOR CONTACTORS, ETC.
F. CONTRACTOR IS RESPONSIBLE FOR PROVIDING CONNECTION OF ALL HVAC AND PLUMBING EQUIPMENT (BUT NOT LIMITED TO RTUS, AHUS, FANS, DAMPERS, LOUVERS, PUMPS AND CONTROLS).
G. PROVIDE DEDICATED NEUTRAL WIRE FOR ALL 120V OR 277V BRANCH CIRCUITS. NO MULTI-WIRE BRANCH CIRCUITS SHALL BE ALLOWED.
H. ELECTRICAL FLOOR PLANS AND SCHEDULES ARE VALID FOR BOTH WEST AND NORTH SITES.

KEY NOTES

AS INDICATED BY: (#)

1. PROVIDE POWER FOR OVERHEAD DOOR EXTEND AND CONNECT (2)#12 AWG + #12 GND IN 3/4" CONDUIT. COORDINATE EXACT LOCATION AND CONTOL LOCATION WITH OVERHEAD DOOR MANUFACTURER.
2. PROVIDE A DEDICATED RECEPTACLE FOR BELOW COUNTER ICE MAKE AND AND REFRIGERATOR AT 30" AFF.
3. TYPICAL DATADROP. PROVIDE SINGLE GANG BACK BOX AND 3/4" CONDUIT LOCATED TO AN ACCESSIBLE LOCATION ABOVE CEILING. PROVIDE BUSHING AT END OF CONDUIT. ROUTE CAT 6 CABLE LAN RACK, UTILIZING J-HOOKS.
4. TYPICAL DATADROP FOR WIRELESS ACCESS POINT(WAP). PROVIDE SINGLE GANG BACK BOX AS REQUIRED. ROUTE CAT 6 CABLE LAN RACK, UTILIZING J-HOOKS.
5. WIRELESS ACCESS POINTS ARE TO BE CEILING MOUNTED. FIELD VERIFY FOR PROPER LOCATION.
6. MOUNT 200A/2P, SERVICE RATED DISCONNECT, WITH 150-AMP FUSES ADJACENT TO ONCOR KWH METER. FIELD VERFY FOR PROPER WORK SPACE CLEARANCE. REFER TO ELECTRIC RISER DIAGRAM FOR MORE INFORMATION.
7. PROVIDE DEDICATED RECEPTACLE FOR IT/LAN RACK. COORDINATE WITH ARCHITECHTUAL FOR PROPER PLACEMENT.
8. NEW KWH METER FOR SERVICE. COORDINATE WITH ONCOR ELECTRIC DELIVERY FOR ALL REQUIREMENTS.

LIGHTING CONTROL SEQUENCE MATRIX

DESIGNATION	TYPICAL SPACES	DIMMING	NETWORKED	OCCUPANCY (AUTO ON)	OCCUPANCY (VACANCY)	STAND ALONE	TIME CLOCK	WIRELESS	DESCRIPTION OF LIGHTING CONTROL DEVICES WITHIN SPACE
D	•OFFICES	Yes	No	No	Yes	Yes	No	No	•WALL STATION WITH ON/OFF AND 0-10V DIMMING CAPABILITIES. PROVIDE CONNECTION FOR CONTROL OF LIGHTING THROUGH MULTIPLE SWITCH LOCATIONS. •CEILING MOUNTED OCCUPANCY (VACANCY) SENSOR SHALL TURN ALL LUMINAIRES OFF AFTER TIMEOUT (20 MIN.) EXPIRES.
MS	•CORRIDORS •LOBBIES •VESTIBULES	No	No	Yes	No	Yes	Yes	No	•CN/OFF WALL SWITCH, PROVIDE CONNECTIONS REQUIRED FOR CONTROL OF LIGHTING THROUGH MULTIPLE SWITCH LOCATIONS. •CEILING MOUNTED OCCUPANCY (AUTO "ON") SENSOR SHALL TURN ALL LUMINAIRES OFF AFTER TIMEOUT (20 MIN.) EXPIRES. SHALL AUTOMATICALLY TURN ALL LUMINARES ON TO 100% UPON DETECTION OF MAJOR OR MINOR MOTION. •THIS AREA WILL BE PROGRAMMED WITH TIME CONTROL TO ALLOW FIXTURES TO STAY ON DURING OCCUPIED TIMES (COORDINATE OCCUPIED TIMES AND PROGRAMMING WITH OWNER). LIGHT SWITCH SHALL WLLOW FOR OVERRIDE OF OCCUPANCY SENSORS, PHOTOCELLS, AND TIME PROGRAM.
OS	•SMALL RESTROOMS •SMALL STORAGE ROOMS	No	No	No	Yes	Yes	No	No	•CN/OFF WALL SWITCH WITH INTEGRAL OCCUPANCY SENSOR. INTEGRAL OCCUPANCY SENSOR SHALL TURN ALL LUMINAIRES OFF AFTER (20 MIN.) EXPIRES. •(NETWORK CONTROLS NOT REQUIRED. STAND-ALONE CONTROLS ONLY FOR THIS SPACE.)
SS	•ELECTRICAL ROOMS •MECHANICAL/JANITOR ROOMS	No	No	No	No	Yes	No	No	•CN/OFF WALL SWITCH CONTROL (ONLY) TO AVOID POSSIBLE SAFETY CONCERN OF INADVERTENT OF THAT COULD BE CAUSED BY OCCUPANCY SENSING DEVICES. •(NETWORK CONTROLS NOT REQUIRED. STAND-ALONE CONTROLS ONLY FOR THIS SPACE.)

NOTES:

A. REFER TO PLANS FOR LIGHTING DEVICE LOCATIONS AND OTHER INFORMATION.
B. SYMBOLS PROVIDED IN EACH SPACE (INDICATED IN THE LIGHTING CONTROLS SEQUENCE MATRIX SCHEDULE) ARE INTENDED TO DENOTE THE TYPES OF CONTROLS REQUIRED FOR EACH ASSOCIATED SPACES. THE SWITCH SYMBOLS DENOTE REQUIRED LOCATIONS FOR THE CONTROL DEVICES IN EACH ASSOCIATED SPACE.
C. IN ADDITION TO CONTROL TYPES INDICATED, PROVIDE DAYLIGHT CONTROLS IN ALL AREAS SHOWN WITH DAYLIGHTING ZONES (INDICATED BY HATCHED AREAS ON PLANS). DIMMABLE DRIVERS IN EACH DAYLIGHT ZONE TO BE DIMMED SEPARATELY BY ZONE (CURRENT LIGHT LEVEL TO OFF, CONTINUOUS DIMMING, NO STEP DIMMING). DIMMING FUNCTION IN EACH DAYLIGHT ZONE IS TO MAINTAIN EVEN ILLUMINATION ACROSS THE ZONE, BASED ON THE SETTINGS OF THE SWITCH.
D. PROVIDE NUMBER OF RELAY PACKS, DIMMING RELAY PACKS, OCCUPANCY SENSORS AND PHOTOCELLS FOR COMPLETE AND PROPER OPERATION OF THE LIGHTING SYSTEM.
E. IN COMMON USE SPACES SUCH AS CORRIDORS, LOBBIES, CAFETERIA, AND HUBS/CLUBS. PROVIDE CONNECTION TO FIRE ALARM TO BRING LIGHTING IN THESE AREAS/SPACES TO FULL "ON" IN THE EVENT OF AN ALARM.
F. LIGHTING CONTROLS SHALL COMPLY WITH THE REQUIREMENTS OF THE IECC 2015 AND SHALL BE COMMISIONED IN ACCORDANCE WITH THE REQUIREMENTS OF IECC 408.
G. REFER TO SPECIFICATION SECTION 26 09 43 NETWORKED LIGHTING CONTROLS FOR ADDITIONAL REQUIREMENTS.
H. ELECTRICAL LIGHTING CONTROLS SCHEDULES ARE VALID FOR BOTH WEST AND NORTH SITES.

E-601

City Council Meeting

Item Number: 7

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Regina Stephenson, Director

Subject: **RESOLUTION APPROVING THE SELECTION OF BEYOND ENGINEERING AND TESTING, LLC, ENPROTEC/HIBBS & TODD, INC. DOING BUSINESS AS GEOTEC LABS, AND TERRACON CONSULTANTS, INC. TO ASSIST THE ENGINEERING SERVICES DEPARTMENT WITH CONSTRUCTION MATERIALS TESTING BY PROVIDING PROFESSIONAL ENGINEERING SERVICES AND OTHER SERVICES IN CONNECTION THEREWITH ON AN AS-NEEDED BASIS; AUTHORIZING THE NEGOTIATION AND EXECUTION OF A PROFESSIONAL SERVICES AGREEMENT WITH EACH FIRM; PROVIDING THAT EACH AGREEMENT SHALL BE FOR A TERM NOT TO EXCEED THREE YEARS; AUTHORIZING THE NEGOTIATION AND EXECUTION OF TASK ORDERS IN ACCORDANCE WITH SUCH AGREEMENTS; PROVIDING THAT THE PAYMENT FOR EACH TASK ORDER EXECUTED IN ACCORDANCE WITH SUCH AN AGREEMENT SHALL NOT EXCEED $150,000.00; PROVIDING THAT THE TOTAL COST TO THE CITY FOR ALL TASK ORDERS EXECUTED EACH YEAR IN ACCORDANCE WITH EACH AGREEMENT SHALL NOT EXCEED $300,000.00 PER AGREEMENT PER YEAR; AND AUTHORIZING PAYMENT (DISTRICT: ALL) (GENERAL SERVICES)**

Purpose:

Resolution selecting three (3) engineering firms to provide construction material testing services on an as needed basis for the Engineering Services Department.

Recommended City Council Action:

Approve

Fiscal Impact:

Funding is not required at this time.

Discussion:

The City Manager authorized advertisement and the issuance of a request for qualifications for professional services for up to three (3) firms to assist the Engineering Services Department by providing professional services for construction material testing services for city-wide construction projects on an as-needed basis. Forty-five (45) requests for qualifications were issued. We received four (4) statements of qualifications. Staff recommends selecting Beyond Engineering and Testing, LLC, Enprotec-Hibbs & Todd, Inc. dba Geotec Labs and Terracon Consultants, Inc. and entering into an agreement with each firm to provide these services. Please see the attached memo from Bobby Wojciechowski, Capital Improvement Project Manager, for additional information.

Tina Jaug

City Manager's Office

INTEROFFICE MEMORANDUM

TO: Regina Stephenson, Director of General Services

FROM: Bobby Wojciechowski, CIP Manager

SUBJECT: Professional Services Agreement for Multiple Projects for Construction Material Testing Services

DATE: 6/27/2023 **COUNCIL MEETING DATE:** 7/11/2023

Please carry a council agenda to obtain approval for us to enter PSAs for construction material testing services for city-wide construction projects for Engineering Services. The contracts will be task order style as used currently for us. This contract would be available for use by multiple departments to ensure quality materials and construction methods are used in the City's construction projects.

The three firms, selected according to their qualifications are: Beyond Engineering and Testing, Enprotec - Hibbs, & Todd, Terracon Consultant, Inc. (Firms list in alphabetical order)

Each of the three firms will be considered pre-qualified status to enter into a task order contract as engineering work is needed by the City. Funds to pay the firms will be determined at the time of issuance of the task order.

Let me know if you have any questions.

cc: Jose Ortiz, P.E.
Erika Munoz
Natalie Burgard

RESOLUTION NO. _____

RESOLUTION APPROVING THE SELECTION OF BEYOND ENGINEERING AND TESTING, LLC, ENPROTEC/HIBBS & TODD, INC. DOING BUSINESS AS GEOTEC LABS, AND TERRACON CONSULTANTS, INC. TO ASSIST THE ENGINEERING SERVICES DEPARTMENT WITH CONSTRUCTION MATERIALS TESTING BY PROVIDING PROFESSIONAL ENGINEERING SERVICES AND OTHER SERVICES IN CONNECTION THEREWITH ON AN AS-NEEDED BASIS; AUTHORIZING THE NEGOTIATION AND EXECUTION OF A PROFESSIONAL SERVICES AGREEMENT WITH EACH FIRM; PROVIDING THAT EACH AGREEMENT SHALL BE FOR A TERM NOT TO EXCEED THREE YEARS; AUTHORIZING THE NEGOTIATION AND EXECUTION OF TASK ORDERS IN ACCORDANCE WITH SUCH AGREEMENTS; PROVIDING THAT THE PAYMENT FOR EACH TASK ORDER EXECUTED IN ACCORDANCE WITH SUCH AN AGREEMENT SHALL NOT EXCEED $150,000.00; PROVIDING THAT THE TOTAL COST TO THE CITY FOR ALL TASK ORDERS EXECUTED EACH YEAR IN ACCORDANCE WITH EACH AGREEMENT SHALL NOT EXCEED $300,000.00 PER AGREEMENT PER YEAR; AND AUTHORIZING PAYMENT

WHEREAS, the City of Midland advertised a Request for Qualifications for firms to assist the Engineering Services Department with construction materials testing by providing professional engineering services and other services in connection therewith on an as-needed basis (the "Professional Services"); and

WHEREAS, the firms identified in Section One hereof have agreed to perform said Professional Services; and

WHEREAS, the City Council finds that the firms identified in Section One hereof are qualified to perform said Professional Services; and

WHEREAS, the City Council finds that the fees proposed by the firms identified in Section One hereof are consistent with and not higher than the recommended practices and fees published by the applicable professional associations and do not exceed any maximum provided by law; and

WHEREAS, the City Council finds that the firms identified in Section One hereof provide the Professional Services for a fair and reasonable price; and

WHEREAS, the City Council finds it to be in the public interest to approve the selection of the firms identified in Section One hereof as the most highly qualified providers of said Professional Services based on demonstrated competence, knowledge, and qualifications and on the reasonableness of the proposed fee for the Professional Services;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF MIDLAND, TEXAS:

SECTION ONE. That the selection of Beyond Engineering and Testing, LLC, Enprotec/Hibbs & Todd, Inc. doing business as Geotec Labs, and Terracon Consultants, Inc. to provide the Professional Services is hereby approved.

SECTION TWO. That the Interim City Manager is hereby authorized and directed to negotiate and execute, on behalf of the City of Midland, a professional services agreement with each firm identified in Section One hereof for said Professional Services; provided, however, that each said agreement (1) shall be for a term not to exceed three years, (2) shall provide for the execution of task orders, the cost to the City for each such task order not exceeding $150,000.00, and (3) shall provide that the total cost to the City for all task orders executed each year in accordance with such agreement shall not exceed $300,000.00. Each said agreement shall be maintained on file in the office of the City Secretary, referenced by the date and number of this resolution.

SECTION THREE. That the Interim City Manager is hereby authorized and directed to negotiate and execute, on behalf of the City of Midland, task orders in accordance with said professional services agreements; provided, however, (1) that the payment from the City for each task order shall not exceed $150,000.00 and (2) that the total cost to the City for all task orders executed each year in accordance with each agreement shall not exceed $300,000.00 per agreement per year.

SECTION FOUR. That the City Comptroller is hereby authorized and directed to pay for all work performed under professional services agreements and task orders executed

in accordance with this resolution, pursuant to the terms of said professional services agreements and task orders, from funds available in authorized projects or the Engineering Services Operating Budget, as appropriate, upon receipt of proper invoices or statements approved by the Interim City Manager.

On motion of Council member _____, seconded by Council member _____, the above and foregoing resolution was adopted by the City Council of the City of Midland at a regular meeting on the _____ day of _____, A.D., 2023, by the following vote:

PROFESSIONAL SERVICES AGREEMENT FOR MULTIPLE PROJECTS
23003764-1 Construction Material Testing Services

THIS AGREEMENT is made and effective the 12th day of July 2023, by and between the CITY OF MIDLAND, TEXAS, a municipal corporation, hereinafter called "CITY," and, Beyond Engineering and Testing, LLC, hereinafter referred to as "COMPANY."

WHEREAS, CITY desires to retain COMPANY, a professional engineering firm, to provide professional engineering services, architecture services, landscape architecture services, land surveying services, real estate appraising services, and services provided in connection therewith on one or more projects in which the CITY is involved; and

WHEREAS, COMPANY desires to provide such services on such projects as may be agreed from time to time by the parties;

NOW, THEREFORE, in consideration of the mutual covenants contained herein, the parties agree as follows:

ARTICLE I. PURPOSE

The purpose of this Agreement is to state the terms and conditions under which COMPANY shall perform professional engineering services, architecture services, landscape architecture services, land surveying services, real estate appraising services, and services provided in connection therewith for the City of Midland.

ARTICLE II. SERVICES TO BE PERFORMED

1. This Agreement shall apply to as many projects as CITY and COMPANY agree will be performed under the terms and conditions of this Agreement.
2. Each project that COMPANY performs for CITY hereunder shall be designated by a "Task Order." A Task Order shall be in the form of that attached hereto and incorporated herein as Exhibit "A" or a form substantially similar thereto. No Task Order shall be binding or enforceable unless and until it has been properly executed by both CITY and COMPANY. Each properly executed Task Order shall become a separate supplemental agreement to this Agreement.
3. COMPANY shall provide those services described in each properly executed Task Order.
4. COMPANY shall perform said services (1) with the professional skill and care ordinarily provided by competent professionals practicing in the same or similar locality

and under the same or similar circumstances and professional license and (2) as expeditiously as is prudent considering the ordinary professional skill and care of a competent professional. COMPANY represents that any employee who performs services under this Agreement shall be fully qualified and competent to perform said services.

5. In resolving potential conflicts between this Agreement and the Task Order pertaining to a specific project, the terms of the Task Order shall control except to the extent that the terms of the Task Order conflict with Article III below.

ARTICLE III. FINANCIAL CONSIDERATIONS

CITY agrees to pay COMPANY for said professional services in accordance with Part 5 of each Task Order; provided, however, (1) that the payment from CITY to COMPANY for each Task Order shall not exceed $150,000.00 and (2) that the total cost to CITY for all Task Orders executed by CITY and COMPANY each year in accordance with this Agreement shall not exceed $300,000.00 per year. COMPANY shall provide to CITY a monthly invoice. The monthly invoice shall set forth all service fees for the month and those expenses described in the Task Order incurred during the previous month which have received advance written approval from the City Manager. The City Manager must approve all additional expenses and reimbursable expenses in advance. Within 30 days of the date on which COMPANY's invoice is received by CITY, CITY shall pay the full amount of such invoice; provided, however, that if CITY objects to any portion of an invoice, CITY shall notify COMPANY of CITY's objection and the grounds therefor within 15 days of the date of receipt of the invoice, and the parties immediately shall make every effort to settle the disputed portion of the invoice. CITY in any event shall pay every portion of the invoice that is not in dispute within the 30-day period for payment.

ARTICLE IV. TERM

The Initial term of this Agreement shall be from July 12, 2023 until July 12, 2026 unless by providing written notice to COMPANY of CITY's desire to extend the Contract not later than sixty (60) days prior to the end of the then current term. Extensions of this Contract will be based on acceptable performance as long as the price does not exceed administrative parameters.

ARTICLE V. TERMINATION AT WILL

CITY may terminate this Agreement at will for no or any reason upon giving at least one-hundred-eighty (180) days written notice to COMPANY. The parties to this Agreement

understand and agree that it is in CITY'S sole discretion to cancel the Agreement during the term of the Agreement without penalty to CITY. COMPANY has no expectation and has received no guarantees that this Agreement will not be terminated before the end of the Agreement term. The parties have bargained for the flexibility of terminating this Agreement upon tender of the requisite notice at any time during the term of the Agreement. All work and services under the Agreement shall be suspended upon termination of the Agreement becoming effective.

ARTICLE VI. ASSIGNMENT

COMPANY shall not, either directly or indirectly, assign all or any part of this Agreement or any interest, right or privilege herein, without the prior written consent of CITY. The issue on whether or not to grant consent to an assignment is in the sole discretion of CITY.

ARTICLE VII. OWNERSHIP AND CONFIDENTIALITY OF DOCUMENTS AND OTHER WORK PRODUCT

All reports, information and other data ("instruments of service"), given to, prepared or assembled by COMPANY under this Agreement, and any other related documents or items shall become the sole property of CITY and shall be delivered to CITY, without restriction, except that COMPANY may make copies of any and all instruments of service for its files. CITY shall not make any modification to the plans and specifications or make them available for use by third parties without the prior written authorization of COMPANY, which consent shall not be unreasonably withheld.

ARTICLE VIII. INDEPENDENT CONTRACTOR

It is expressly understood and agreed that COMPANY shall perform all work and services described herein as an independent contractor and not as an officer, agent, servant or employee of CITY; that COMPANY shall have exclusive control of and the exclusive right to control the details of the services and work performed hereunder, and all persons performing the same; and shall be solely responsible for the acts and omissions of its officers, agents, employees, contractors and subcontractors; that the doctrine of respondeat superior shall not apply as between CITY and COMPANY, its officers, agents, employees, contractors and subcontractors; and that nothing herein shall be construed as creating a partnership or joint enterprise between CITY and COMPANY. No person performing any of the work and services described hereunder by COMPANY shall be considered an officer, agent, servant or employee of CITY. Further, it is specifically understood and agreed that nothing in this Agreement is

intended or shall be construed as creating a "Community of Pecuniary Interest" or "An Equal Right of Control" which would give rise to vicarious liability. COMPANY shall be an independent contractor under this Agreement and shall assume all of the rights, obligations and liabilities, applicable to it as such independent contractor hereunder. CITY does not have the power to direct the order in which the work is done. CITY shall not have the right to control the means, methods or details of COMPANY'S work. COMPANY shall assume exclusive responsibility for the work. COMPANY is entirely free to do the work in its own way.

ARTICLE IX. INSURANCE

COMPANY shall at all times during the term of this Agreement maintain and keep in full force and effect insurance in the following types and minimum amounts with companies authorized to do business in the State of Texas:

Commercial General Liability (including Contractual liability):

-Personal Injury:	$1,000,000.00 per person
	$1,000,000.00 per occurrence
-Property Damage:	$500,000.00 per occurrence
Business Automobile Liability:	$250,000.00 combined single limit - Personal Injury and Property Damage
Workers' Compensation:	Statutory limits
Employers' Liability:	$500,000.00 per accident or occurrence

The Commercial General Liability shall be on a per project aggregate, including completed operations, and shall be on a claims-occurred basis. This insurance shall name CITY as an additional insured and waive subrogation in favor of CITY.

The Business Automobile Liability insurance provided by COMPANY shall cover any auto for bodily injury and property damage, including owned vehicles, hired and non-city vehicles, and employee non-ownership, and the amount of such policy shall be a minimum of $250,000.00 covering any vehicle used for the execution of the work that is the subject of this Agreement. This insurance shall name CITY as an additional insured and waive subrogation in favor of CITY.

The Workers' Compensation coverage provided by COMPANY shall inure to the benefit of employees injured during the course and scope of their employment by COMPANY pursuant to this Agreement. The Workers' Compensation shall waive all rights of subrogation in favor of CITY.

All insurance required pursuant to this Agreement shall provide for a waiver of

subrogation in favor of CITY. All insurance required pursuant to this Agreement, except for Workers' Compensation Insurance, shall name CITY as an additional insured on a claims occurred basis. CITY shall be provided the notice by COMPANY'S insurance provider not later than thirty (30) days prior to any reduction or termination of such coverage.

COMPANY shall contractually require all contractors, subcontractors, and sub-subcontractors that work on any portion of the work that is the subject of this Agreement to obtain insurance coverage that meets or exceeds the policy requirements and minimum amounts specified herein. All contractors, subcontractors, and sub-subcontractors shall obtain insurance policies that provide blanket waivers of subrogation in favor of the City of Midland and policies that name the City of Midland as an additional insured on a claims occurred basis (except workers' compensation).

The parties agree that, prior to the execution of the Agreement, COMPANY shall provide one or more certificates of insurance specifically stating that these requirements have been met and subject to the approval of CITY. CITY shall not be required to provide any insurance whatsoever pursuant to this Agreement.

COMPANY certifies that the certificate of insurance provided as required herein complies with the requirements of Chapter 1811 of the Texas Insurance Code. COMPANY shall not use an unapproved certificate of insurance or insert inappropriate language on a certificate. Compliance with state law is the sole responsibility of COMPANY.

ARTICLE X. ATTORNEY FEES

BY EXECUTING THIS AGREEMENT, COMPANY AGREES TO WAIVE AND DOES HEREBY KNOWINGLY, CONCLUSIVELY, VOLUNTARILY AND INTENTIONALLY WAIVE ANY CLAIM IT HAS OR MAY HAVE IN THE FUTURE AGAINST CITY, REGARDING THE AWARD OF ATTORNEY'S FEES, WHICH ARE IN ANY WAY RELATED TO THE AGREEMENT, OR THE CONSTRUCTION, INTERPRETATION OR BREACH OF THE AGREEMENT. COMPANY SPECIFICALLY AGREES THAT IF COMPANY BRINGS OR COMMENCES ANY LEGAL ACTION OR PROCEEDING RELATED TO THIS AGREEMENT, THE CONSTRUCTION, INTERPRETATION, VALIDITY OR BREACH OF THIS AGREEMENT, INCLUDING BUT NOT LIMITED TO ANY ACTION PURSUANT TO THE PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE SECTION 37.001, ET SEQ., AS AMENDED), OR CHAPTER 271 OF THE TEXAS LOCAL GOVERNMENT CODE,

COMPANY AGREES TO ABANDON, WAIVE AND RELINQUISH ANY AND ALL RIGHTS TO THE RECOVERY OF ATTORNEY'S FEES TO WHICH COMPANY MIGHT OTHERWISE BE ENTITLED.

COMPANY AGREES THAT THIS IS THE VOLUNTARY AND INTENTIONAL RELINQUISHMENT AND ABANDONMENT OF A PRESENTLY EXISTING KNOWN RIGHT. COMPANY ACKNOWLEDGES THAT IT UNDERSTANDS ALL TERMS AND CONDITIONS OF THE AGREEMENT. COMPANY FURTHER ACKNOWLEDGES AND AGREES THAT THERE WAS AND IS NO DISPARITY OF BARGAINING POWER BETWEEN CITY AND COMPANY. THIS SECTION SHALL NOT BE CONSTRUED OR INTERPRETED AS A WAIVER OF GOVERNMENTAL IMMUNITY.

COMPANY AND CITY ARE RELYING ON THEIR OWN JUDGMENT. EACH PARTY HAD THE OPPORTUNITY TO DISCUSS THIS AGREEMENT WITH COMPETENT LEGAL COUNSEL PRIOR TO ITS EXECUTION.

ARTICLE XI. GOVERNMENTAL IMMUNITY

By executing this agreement CITY is not waiving its right of governmental immunity. CITY is retaining its immunity from suit. CITY is not granting consent to be sued by legislative resolution or action.

THERE IS NO WAIVER OF GOVERNMENTAL IMMUNITY.

ARTICLE XII. NO THIRD-PARTY BENEFICIARIES

CITY'S approval of this agreement does not create a third-party beneficiary. There is no third-party beneficiary to this Agreement. No person or entity who is not a party to this Agreement shall have any third-party beneficiary or other rights hereunder.

ARTICLE XIII. RELEASE

NOTWITHSTANDING ANY OTHER PROVISIONS, COMPANY HEREBY RELEASES, ACQUITS, RELINQUISHES AND FOREVER DISCHARGES CITY, CITY'S EMPLOYEES AND OFFICERS, FROM ANY AND ALL DEMANDS, CLAIMS, DAMAGES, OR CAUSES OF ACTION OF ANY KIND WHATSOEVER WHICH COMPANY HAS OR MIGHT HAVE IN THE FUTURE, INCLUDING BUT NOT LIMITED TO BREACH OF AGREEMENT, QUANTUM MERUIT, CLAIMS UNDER

THE DUE PROCESS AND TAKINGS CLAUSES OF THE TEXAS AND UNITED STATES CONSTITUTIONS, TORT CLAIMS, OR CITY'S NEGLIGENCE.

ARTICLE XIV. GENERAL PROVISIONS

A. Waiver. No waiver by CITY of a breach of any covenant, condition, or restriction of this Agreement shall be construed or held to be a waiver of any succeeding or preceding breach of the same or any other covenant, condition, or restriction contained in this Agreement.

B. Governing Law and Venue. This Agreement shall be governed by the laws of the State of Texas. All performance and payment made pursuant to this Agreement shall be deemed to have occurred in Midland County, Texas. Exclusive venue for any claims, suits or any other action arising from or connected in any way to this Agreement or the performance of this Agreement shall be in Midland County, Texas. The obligations and undertakings of each of the parties to this Agreement shall be deemed to have occurred in Midland County, Texas. This Agreement shall be governed by, interpreted, enforced and construed under the laws of the State of Texas. The laws of the State of Texas shall govern, construe and enforce all the rights and duties of the parties, including but not limited to tort claims and any and all contractual claims or disputes, arising from or relating in any way to the subject matter of this Agreement, without regard to conflict of laws and rules that would direct application of the laws of another jurisdiction.

C. Notice. Any notice or demand that shall be made regarding this Agreement, shall be made in writing and delivered either in person or by certified or registered mail. Notice by mail shall be complete upon deposit of the paper, postage prepaid, in a post office or official depository under the care and custody of the United States Postal Service addressed as follows:

If to CITY: City Manager's Office
P.O. Box 1152
Midland, Texas 79702

If to COMPANY: Beyond Engineering and Testing, LLC
3801 Doris Lane, Suite B
Round Rock, TX 78664

The parties hereto may change the above-designated addresses by giving notice pursuant to the terms of this Section.

D. Severability. In case any one or more of the provisions contained in this Agreement shall for any reason be held to be invalid, illegal, or unenforceable in any respect, this invalidity, illegality, or unenforceability shall not affect any other provision of the Agreement, and this Agreement shall be construed as if the invalid, illegal, or unenforceable provision had never been contained herein.

E. Use of Language. Words in the singular shall be held to include the plural, unless the context otherwise requires.

F. Amendments, Modifications, Alterations. No amendment, modification, or alteration of the terms of this Agreement shall be binding unless it is in writing, dated subsequent to the date of this Agreement, and duly executed by the parties to this Agreement.

G. Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be deemed as original, and all of which shall constitute one and the same instrument.

H. Federal Wage Requirements. If applicable, the Davis-Bacon Act, 29 CFR 5.5, and any related acts or regulations are hereby incorporated by reference and made a part of this Agreement, and all terms and requirements under said laws, by such incorporation, are made terms and requirements of this Agreement, to which the parties to this Agreement have agreed to be bound.

I. Notice of Alleged Breach; Statutory Prerequisites. As a condition precedent to filing suit for alleged damages incurred by an alleged breach of an express or implied provision of this Agreement, COMPANY or his legal representative, shall give the City Manager, or any other reasonable official of CITY, notice in writing (consisting of one original and seven copies of notice attached to a copy of this Agreement) of such damages, duly verified, within one-hundred fifty (150) days after the same has been sustained. The discovery rule does not apply to the giving of this notice. The notice shall include when, where and how the damages occurred, the apparent extent thereof, the amount of damages sustained, the amount for which COMPANY will settle, the physical and mailing addresses of COMPANY at the time and date the claim was presented and the physical and mailing addresses of COMPANY for the six months immediately preceding the occurrence of such damages, and the names and addresses of the witnesses upon whom COMPANY relies to establish its claim; and a failure to so notify the City Manager within the time and manner provided herein shall exonerate, excuse and except CITY from any liability whatsoever. CITY is under no obligation to provide notice to COMPANY that COMPANY'S

notice is insufficient. CITY reserves the right to request reasonable additional information regarding the claim. Said additional information shall be supplied within thirty (30) days after receipt of notice.

The statutory prerequisites outlined herein constitute jurisdictional requirements pursuant to Section 271.154 of the Texas Local Government Code and Section 311.034 of the Texas Government Code. Notwithstanding any other provision, COMPANY'S failure to comply with the requirements herein shall perpetually bar COMPANY'S claim for damages under Chapter 271 of the Texas Local Government Code, and Section 311.034 of the Texas Government Code, regardless if CITY has actual or constructive notice or knowledge of said claim or alleged damages. COMPANY agrees that the requirements of this entire Agreement are reasonable.

J. PROMPT PAY ACT - CITY and COMPANY agree that Texas Government Code, Chapter 2251, Payment for Goods and Services (the "Prompt Pay Act") does not waive governmental immunity.

K. Compliance. – COMPANY agrees that it shall comply with Texas Government Code Section 2252.908, as amended. COMPANY agrees that it shall comply with Texas Local Government Code Section 176.006, as amended.

L. Anti-Boycott Statutes. To the extent that Tex. Gov't Code §§ 2271.002 and 2274.002 apply to this Agreement, COMPANY hereby verifies that:

- COMPANY does not boycott Israel and will not boycott Israel during the term of this Agreement;
- COMPANY does not boycott energy companies and will not boycott energy companies during the term of this Agreement; and
- COMPANY does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association and will not discriminate during the term of this Agreement against any firearm entity or firearm trade association.

If Tex. Gov't Code § 2270.002 does not apply to this Agreement, such verification is not required, and COMPANY shall be deemed to have not made such verification.

M. Records Retention and Production of Information. To the extent that this Agreement is a contract described by Tex. Gov't Code § 552.371, COMPANY shall: (i) preserve all contracting information related to the Agreement as provided by the records retention requirements applicable to CITY for the duration of the contract; (ii) promptly provide to CITY

any contracting information related to the Agreement that is in the custody or possession of COMPANY on request of CITY; and (iii) on completion of the Agreement, either (a) provide at no cost to CITY all contracting information related to the Agreement that is in the custody or possession of COMPANY, or (b) preserve the contracting information related to the Agreement as provided by the records retention requirements applicable to CITY.

N. Public Information. To the extent that this Agreement is a contract described by Tex. Gov't Code § 552.371, COMPANY agrees as follows in accordance with Tex. Gov't Code § 552.372(b): The requirements of Subchapter J, Chapter 552, Government Code, may apply to this contract, and the contractor or vendor agrees that the contract can be terminated if the contractor or vendor knowingly or intentionally fails to comply with a requirement of that subchapter.

O. Conflict of Terms. If a conflict of terms or language exists between: (i) any of the provisions of this Agreement; and (ii) any of the provisions contained in any exhibit(s) attached to this Agreement, precedence shall be given to the provisions of this Agreement. For the avoidance of any doubt, the provisions contained in this Agreement shall supersede any and all conflicting provisions contained in any exhibit(s) attached hereto. Furthermore, the Parties acknowledge and agree that any provision contained in an exhibit(s) attached to this Agreement that imposes an additional express or implied obligation on CITY is hereby made void and of no force or effect. CITY's sole and exclusive obligations under this Agreement are contained in the provisions of this Agreement that precede the signature page(s), which evidences the Parties' execution and acceptance hereof.

P. Iron or Steel Products Statute. Company agrees that all iron or steel products produced through a manufacturing process and used in the project that is the subject of this Agreement shall be produced in the United States in accordance with Government Code § 2252.202, et seq., as amended.

Q. Interpretation. By executing this Agreement, the Parties acknowledge and agree that this Agreement shall not be interpreted or construed against any Party solely because such Party or its legal counsel drafted this Agreement. The Parties have read, understood, and approve of the language and terms set forth herein.

PROFESSIONAL SERVICES AGREEMENT FOR MULTIPLE PROJECTS
23003764-3 Construction Material Testing Services

THIS AGREEMENT is made and effective the 12th day of July 2023, by and between the CITY OF MIDLAND, TEXAS, a municipal corporation, hereinafter called "CITY," and, Enprotec/Hibbs & Todd, Inc. dba Geotec Labs, hereinafter referred to as "COMPANY."

WHEREAS, CITY desires to retain COMPANY, a professional engineering firm, to provide professional engineering services, architecture services, landscape architecture services, land surveying services, real estate appraising services, and services provided in connection therewith on one or more projects in which the CITY is involved; and

WHEREAS, COMPANY desires to provide such services on such projects as may be agreed from time to time by the parties;

NOW, THEREFORE, in consideration of the mutual covenants contained herein, the parties agree as follows:

ARTICLE I. PURPOSE

The purpose of this Agreement is to state the terms and conditions under which COMPANY shall perform professional engineering services, architecture services, landscape architecture services, land surveying services, real estate appraising services, and services provided in connection therewith for the City of Midland.

ARTICLE II. SERVICES TO BE PERFORMED

1. This Agreement shall apply to as many projects as CITY and COMPANY agree will be performed under the terms and conditions of this Agreement.
2. Each project that COMPANY performs for CITY hereunder shall be designated by a "Task Order." A Task Order shall be in the form of that attached hereto and incorporated herein as Exhibit "A" or a form substantially similar thereto. No Task Order shall be binding or enforceable unless and until it has been properly executed by both CITY and COMPANY. Each properly executed Task Order shall become a separate supplemental agreement to this Agreement.
3. COMPANY shall provide those services described in each properly executed Task Order.
4. COMPANY shall perform said services (1) with the professional skill and care ordinarily provided by competent professionals practicing in the same or similar locality

and under the same or similar circumstances and professional license and (2) as expeditiously as is prudent considering the ordinary professional skill and care of a competent professional. COMPANY represents that any employee who performs services under this Agreement shall be fully qualified and competent to perform said services.

5. In resolving potential conflicts between this Agreement and the Task Order pertaining to a specific project, the terms of the Task Order shall control except to the extent that the terms of the Task Order conflict with Article III below.

ARTICLE III. FINANCIAL CONSIDERATIONS

CITY agrees to pay COMPANY for said professional services in accordance with Part 5 of each Task Order; provided, however, (1) that the payment from CITY to COMPANY for each Task Order shall not exceed $150,000.00 and (2) that the total cost to CITY for all Task Orders executed by CITY and COMPANY each year in accordance with this Agreement shall not exceed $300,000.00 per year. COMPANY shall provide to CITY a monthly invoice. The monthly invoice shall set forth all service fees for the month and those expenses described in the Task Order incurred during the previous month which have received advance written approval from the City Manager. The City Manager must approve all additional expenses and reimbursable expenses in advance. Within 30 days of the date on which COMPANY's invoice is received by CITY, CITY shall pay the full amount of such invoice; provided, however, that if CITY objects to any portion of an invoice, CITY shall notify COMPANY of CITY's objection and the grounds therefor within 15 days of the date of receipt of the invoice, and the parties immediately shall make every effort to settle the disputed portion of the invoice. CITY in any event shall pay every portion of the invoice that is not in dispute within the 30-day period for payment.

ARTICLE IV. TERM

The Initial term of this Agreement shall be from July 12, 2023 until July 12, 2026 unless by providing written notice to COMPANY of CITY's desire to extend the Contract not later than sixty (60) days prior to the end of the then current term. Extensions of this Contract will be based on acceptable performance as long as the price does not exceed administrative parameters.

ARTICLE V. TERMINATION AT WILL

CITY may terminate this Agreement at will for no or any reason upon giving at least one-hundred-eighty (180) days written notice to COMPANY. The parties to this Agreement

understand and agree that it is in CITY'S sole discretion to cancel the Agreement during the term of the Agreement without penalty to CITY. COMPANY has no expectation and has received no guarantees that this Agreement will not be terminated before the end of the Agreement term. The parties have bargained for the flexibility of terminating this Agreement upon tender of the requisite notice at any time during the term of the Agreement. All work and services under the Agreement shall be suspended upon termination of the Agreement becoming effective.

ARTICLE VI. ASSIGNMENT

COMPANY shall not, either directly or indirectly, assign all or any part of this Agreement or any interest, right or privilege herein, without the prior written consent of CITY. The issue on whether or not to grant consent to an assignment is in the sole discretion of CITY.

ARTICLE VII. OWNERSHIP AND CONFIDENTIALITY OF DOCUMENTS AND OTHER WORK PRODUCT

All reports, information and other data ("instruments of service"), given to, prepared or assembled by COMPANY under this Agreement, and any other related documents or items shall become the sole property of CITY and shall be delivered to CITY, without restriction, except that COMPANY may make copies of any and all instruments of service for its files. CITY shall not make any modification to the plans and specifications or make them available for use by third parties without the prior written authorization of COMPANY, which consent shall not be unreasonably withheld.

ARTICLE VIII. INDEPENDENT CONTRACTOR

It is expressly understood and agreed that COMPANY shall perform all work and services described herein as an independent contractor and not as an officer, agent, servant or employee of CITY; that COMPANY shall have exclusive control of and the exclusive right to control the details of the services and work performed hereunder, and all persons performing the same; and shall be solely responsible for the acts and omissions of its officers, agents, employees, contractors and subcontractors; that the doctrine of respondeat superior shall not apply as between CITY and COMPANY, its officers, agents, employees, contractors and subcontractors; and that nothing herein shall be construed as creating a partnership or joint enterprise between CITY and COMPANY. No person performing any of the work and services described hereunder by COMPANY shall be considered an officer, agent, servant or employee of CITY. Further, it is specifically understood and agreed that nothing in this Agreement is

intended or shall be construed as creating a "Community of Pecuniary Interest" or "An Equal Right of Control" which would give rise to vicarious liability. COMPANY shall be an independent contractor under this Agreement and shall assume all of the rights, obligations and liabilities, applicable to it as such independent contractor hereunder. CITY does not have the power to direct the order in which the work is done. CITY shall not have the right to control the means, methods or details of COMPANY'S work. COMPANY shall assume exclusive responsibility for the work. COMPANY is entirely free to do the work in its own way.

ARTICLE IX. INSURANCE

COMPANY shall at all times during the term of this Agreement maintain and keep in full force and effect insurance in the following types and minimum amounts with companies authorized to do business in the State of Texas:

Commercial General Liability (including Contractual liability):

-Personal Injury:	$1,000,000.00 per person
	$1,000,000.00 per occurrence
-Property Damage:	$500,000.00 per occurrence
Business Automobile Liability:	$250,000.00 combined single limit - Personal Injury and Property Damage
Workers' Compensation:	Statutory limits
Employers' Liability:	$500,000.00 per accident or occurrence

The Commercial General Liability shall be on a per project aggregate, including completed operations, and shall be on a claims-occurred basis. This insurance shall name CITY as an additional insured and waive subrogation in favor of CITY.

The Business Automobile Liability insurance provided by COMPANY shall cover any auto for bodily injury and property damage, including owned vehicles, hired and non-city vehicles, and employee non-ownership, and the amount of such policy shall be a minimum of $250,000.00 covering any vehicle used for the execution of the work that is the subject of this Agreement. This insurance shall name CITY as an additional insured and waive subrogation in favor of CITY.

The Workers' Compensation coverage provided by COMPANY shall inure to the benefit of employees injured during the course and scope of their employment by COMPANY pursuant to this Agreement. The Workers' Compensation shall waive all rights of subrogation in favor of CITY.

All insurance required pursuant to this Agreement shall provide for a waiver of

subrogation in favor of CITY. All insurance required pursuant to this Agreement, except for Workers' Compensation Insurance, shall name CITY as an additional insured on a claims occurred basis. CITY shall be provided the notice by COMPANY'S insurance provider not later than thirty (30) days prior to any reduction or termination of such coverage.

COMPANY shall contractually require all contractors, subcontractors, and sub-subcontractors that work on any portion of the work that is the subject of this Agreement to obtain insurance coverage that meets or exceeds the policy requirements and minimum amounts specified herein. All contractors, subcontractors, and sub-subcontractors shall obtain insurance policies that provide blanket waivers of subrogation in favor of the City of Midland and policies that name the City of Midland as an additional insured on a claims occurred basis (except workers' compensation).

The parties agree that, prior to the execution of the Agreement, COMPANY shall provide one or more certificates of insurance specifically stating that these requirements have been met and subject to the approval of CITY. CITY shall not be required to provide any insurance whatsoever pursuant to this Agreement.

COMPANY certifies that the certificate of insurance provided as required herein complies with the requirements of Chapter 1811 of the Texas Insurance Code. COMPANY shall not use an unapproved certificate of insurance or insert inappropriate language on a certificate. Compliance with state law is the sole responsibility of COMPANY.

ARTICLE X. ATTORNEY FEES

BY EXECUTING THIS AGREEMENT, COMPANY AGREES TO WAIVE AND DOES HEREBY KNOWINGLY, CONCLUSIVELY, VOLUNTARILY AND INTENTIONALLY WAIVE ANY CLAIM IT HAS OR MAY HAVE IN THE FUTURE AGAINST CITY, REGARDING THE AWARD OF ATTORNEY'S FEES, WHICH ARE IN ANY WAY RELATED TO THE AGREEMENT, OR THE CONSTRUCTION, INTERPRETATION OR BREACH OF THE AGREEMENT. COMPANY SPECIFICALLY AGREES THAT IF COMPANY BRINGS OR COMMENCES ANY LEGAL ACTION OR PROCEEDING RELATED TO THIS AGREEMENT, THE CONSTRUCTION, INTERPRETATION, VALIDITY OR BREACH OF THIS AGREEMENT, INCLUDING BUT NOT LIMITED TO ANY ACTION PURSUANT TO THE PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE SECTION 37.001, ET SEQ., AS AMENDED), OR CHAPTER 271 OF THE TEXAS LOCAL GOVERNMENT CODE,

COMPANY AGREES TO ABANDON, WAIVE AND RELINQUISH ANY AND ALL RIGHTS TO THE RECOVERY OF ATTORNEY'S FEES TO WHICH COMPANY MIGHT OTHERWISE BE ENTITLED.

COMPANY AGREES THAT THIS IS THE VOLUNTARY AND INTENTIONAL RELINQUISHMENT AND ABANDONMENT OF A PRESENTLY EXISTING KNOWN RIGHT. COMPANY ACKNOWLEDGES THAT IT UNDERSTANDS ALL TERMS AND CONDITIONS OF THE AGREEMENT. COMPANY FURTHER ACKNOWLEDGES AND AGREES THAT THERE WAS AND IS NO DISPARITY OF BARGAINING POWER BETWEEN CITY AND COMPANY. THIS SECTION SHALL NOT BE CONSTRUED OR INTERPRETED AS A WAIVER OF GOVERNMENTAL IMMUNITY.

COMPANY AND CITY ARE RELYING ON THEIR OWN JUDGMENT. EACH PARTY HAD THE OPPORTUNITY TO DISCUSS THIS AGREEMENT WITH COMPETENT LEGAL COUNSEL PRIOR TO ITS EXECUTION.

ARTICLE XI. GOVERNMENTAL IMMUNITY

By executing this agreement CITY is not waiving its right of governmental immunity. CITY is retaining its immunity from suit. CITY is not granting consent to be sued by legislative resolution or action.

THERE IS NO WAIVER OF GOVERNMENTAL IMMUNITY.

ARTICLE XII. NO THIRD-PARTY BENEFICIARIES

CITY'S approval of this agreement does not create a third-party beneficiary. There is no third-party beneficiary to this Agreement. No person or entity who is not a party to this Agreement shall have any third-party beneficiary or other rights hereunder.

ARTICLE XIII. RELEASE

NOTWITHSTANDING ANY OTHER PROVISIONS, COMPANY HEREBY RELEASES, ACQUITS, RELINQUISHES AND FOREVER DISCHARGES CITY, CITY'S EMPLOYEES AND OFFICERS, FROM ANY AND ALL DEMANDS, CLAIMS, DAMAGES, OR CAUSES OF ACTION OF ANY KIND WHATSOEVER WHICH COMPANY HAS OR MIGHT HAVE IN THE FUTURE, INCLUDING BUT NOT LIMITED TO BREACH OF AGREEMENT, QUANTUM MERUIT, CLAIMS UNDER

THE DUE PROCESS AND TAKINGS CLAUSES OF THE TEXAS AND UNITED STATES CONSTITUTIONS, TORT CLAIMS, OR CITY'S NEGLIGENCE.

ARTICLE XIV. GENERAL PROVISIONS

A. Waiver. No waiver by CITY of a breach of any covenant, condition, or restriction of this Agreement shall be construed or held to be a waiver of any succeeding or preceding breach of the same or any other covenant, condition, or restriction contained in this Agreement.

B. Governing Law and Venue. This Agreement shall be governed by the laws of the State of Texas. All performance and payment made pursuant to this Agreement shall be deemed to have occurred in Midland County, Texas. Exclusive venue for any claims, suits or any other action arising from or connected in any way to this Agreement or the performance of this Agreement shall be in Midland County, Texas. The obligations and undertakings of each of the parties to this Agreement shall be deemed to have occurred in Midland County, Texas. This Agreement shall be governed by, interpreted, enforced and construed under the laws of the State of Texas. The laws of the State of Texas shall govern, construe and enforce all the rights and duties of the parties, including but not limited to tort claims and any and all contractual claims or disputes, arising from or relating in any way to the subject matter of this Agreement, without regard to conflict of laws and rules that would direct application of the laws of another jurisdiction.

C. Notice. Any notice or demand that shall be made regarding this Agreement, shall be made in writing and delivered either in person or by certified or registered mail. Notice by mail shall be complete upon deposit of the paper, postage prepaid, in a post office or official depository under the care and custody of the United States Postal Service addressed as follows:

If to CITY: City Manager's Office
P.O. Box 1152
Midland, Texas 79702

If to COMPANY: Enprotec/Hibbs & Todd, Inc. dba Geotec Labs
402 Cedar Street
Abilene, Texas 79601

The parties hereto may change the above-designated addresses by giving notice pursuant to the terms of this Section.

D. Severability. In case any one or more of the provisions contained in this Agreement shall for any reason be held to be invalid, illegal, or unenforceable in any respect, this invalidity, illegality, or unenforceability shall not affect any other provision of the Agreement, and this Agreement shall be construed as if the invalid, illegal, or unenforceable provision had never been contained herein.

E. Use of Language. Words in the singular shall be held to include the plural, unless the context otherwise requires.

F. Amendments, Modifications, Alterations. No amendment, modification, or alteration of the terms of this Agreement shall be binding unless it is in writing, dated subsequent to the date of this Agreement, and duly executed by the parties to this Agreement.

G. Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be deemed as original, and all of which shall constitute one and the same instrument.

H. Federal Wage Requirements. If applicable, the Davis-Bacon Act, 29 CFR 5.5, and any related acts or regulations are hereby incorporated by reference and made a part of this Agreement, and all terms and requirements under said laws, by such incorporation, are made terms and requirements of this Agreement, to which the parties to this Agreement have agreed to be bound.

I. Notice of Alleged Breach; Statutory Prerequisites. As a condition precedent to filing suit for alleged damages incurred by an alleged breach of an express or implied provision of this Agreement, COMPANY or his legal representative, shall give the City Manager, or any other reasonable official of CITY, notice in writing (consisting of one original and seven copies of notice attached to a copy of this Agreement) of such damages, duly verified, within one-hundred fifty (150) days after the same has been sustained. The discovery rule does not apply to the giving of this notice. The notice shall include when, where and how the damages occurred, the apparent extent thereof, the amount of damages sustained, the amount for which COMPANY will settle, the physical and mailing addresses of COMPANY at the time and date the claim was presented and the physical and mailing addresses of COMPANY for the six months immediately preceding the occurrence of such damages, and the names and addresses of the witnesses upon whom COMPANY relies to establish its claim; and a failure to so notify the City Manager within the time and manner provided herein shall exonerate, excuse and except CITY from any liability whatsoever. CITY is under no obligation to provide notice to COMPANY that COMPANY'S

notice is insufficient. CITY reserves the right to request reasonable additional information regarding the claim. Said additional information shall be supplied within thirty (30) days after receipt of notice.

The statutory prerequisites outlined herein constitute jurisdictional requirements pursuant to Section 271.154 of the Texas Local Government Code and Section 311.034 of the Texas Government Code. Notwithstanding any other provision, COMPANY'S failure to comply with the requirements herein shall perpetually bar COMPANY'S claim for damages under Chapter 271 of the Texas Local Government Code, and Section 311.034 of the Texas Government Code, regardless if CITY has actual or constructive notice or knowledge of said claim or alleged damages. COMPANY agrees that the requirements of this entire Agreement are reasonable.

J. PROMPT PAY ACT - CITY and COMPANY agree that Texas Government Code, Chapter 2251, Payment for Goods and Services (the "Prompt Pay Act") does not waive governmental immunity.

K. Compliance. – COMPANY agrees that it shall comply with Texas Government Code Section 2252.908, as amended. COMPANY agrees that it shall comply with Texas Local Government Code Section 176.006, as amended.

L. Anti-Boycott Statutes. To the extent that Tex. Gov't Code §§ 2271.002 and 2274.002 apply to this Agreement, COMPANY hereby verifies that:

- COMPANY does not boycott Israel and will not boycott Israel during the term of this Agreement;
- COMPANY does not boycott energy companies and will not boycott energy companies during the term of this Agreement; and
- COMPANY does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association and will not discriminate during the term of this Agreement against any firearm entity or firearm trade association.

If Tex. Gov't Code § 2270.002 does not apply to this Agreement, such verification is not required, and COMPANY shall be deemed to have not made such verification.

M. Records Retention and Production of Information. To the extent that this Agreement is a contract described by Tex. Gov't Code § 552.371, COMPANY shall: (i) preserve all contracting information related to the Agreement as provided by the records retention requirements applicable to CITY for the duration of the contract; (ii) promptly provide to CITY

any contracting information related to the Agreement that is in the custody or possession of COMPANY on request of CITY; and (iii) on completion of the Agreement, either (a) provide at no cost to CITY all contracting information related to the Agreement that is in the custody or possession of COMPANY, or (b) preserve the contracting information related to the Agreement as provided by the records retention requirements applicable to CITY.

N. Public Information. To the extent that this Agreement is a contract described by Tex. Gov't Code § 552.371, COMPANY agrees as follows in accordance with Tex. Gov't Code § 552.372(b): The requirements of Subchapter J, Chapter 552, Government Code, may apply to this contract, and the contractor or vendor agrees that the contract can be terminated if the contractor or vendor knowingly or intentionally fails to comply with a requirement of that subchapter.

O. Conflict of Terms. If a conflict of terms or language exists between: (i) any of the provisions of this Agreement; and (ii) any of the provisions contained in any exhibit(s) attached to this Agreement, precedence shall be given to the provisions of this Agreement. For the avoidance of any doubt, the provisions contained in this Agreement shall supersede any and all conflicting provisions contained in any exhibit(s) attached hereto. Furthermore, the Parties acknowledge and agree that any provision contained in an exhibit(s) attached to this Agreement that imposes an additional express or implied obligation on CITY is hereby made void and of no force or effect. CITY's sole and exclusive obligations under this Agreement are contained in the provisions of this Agreement that precede the signature page(s), which evidences the Parties' execution and acceptance hereof.

P. Iron or Steel Products Statute. Company agrees that all iron or steel products produced through a manufacturing process and used in the project that is the subject of this Agreement shall be produced in the United States in accordance with Government Code § 2252.202, et seq., as amended.

Q. Interpretation. By executing this Agreement, the Parties acknowledge and agree that this Agreement shall not be interpreted or construed against any Party solely because such Party or its legal counsel drafted this Agreement. The Parties have read, understood, and approve of the language and terms set forth herein.

Request for Qualifications
For
23003764
Construction Material Testing Service

General Scope of Work

The project scope is to collect materials and conduct materials testing during the construction phase of capital improvement projects. Expected testing shall be conducted on the following areas, but not limited to, embankment, flexible base, prime coat, tack coat, seal coat and flowable backfill. The frequency of testing shall be dependent on approved engineering practices specific to each testing procedure used.

The project will be titled: Construction Materials Testing – Capital Improvement Projects. A total of three hardcopies and one electronic copy (in PDF format) of the statement of qualifications must be received no later than 2:00 P. M. on June 14, 2023 at:

City of Midland
Purchasing Office
Attn: Erika Martinez, Purchasing Manager
300 N. Loraine St. Suite 220
Midland, TX 79701

The City of Midland uses its own professional services agreement in contracting for professional services. The characteristics of that agreement include: 1.) An indemnification provision holding the City harmless from negligence on the part of the professional, professional's employees, agents or consultants; 2.) A requirement that the service provider comply with all Federal, State and local requirements and is responsible for obtaining all applicable permits, licenses and reviews relating to the project; 3.) A requirement that the service provider carry and show proof of comprehensive general liability insurance, including contractual liability and worker's compensation as required by law and the City of Midland. The service provider must be willing to sign the contract "as is" and without modifications.

The City of Midland expressly reserves the right to accept or reject any and all statements of qualifications submitted; and is under no legal requirement to execute a resulting contract on the basis of its advertisement and intends the material provided only as a means of identifying the various consultant alternatives.

Qualifications will be evaluated by a committee of City of Midland staff. This committee will select the top-rated prospective firms whose response best demonstrate the competence and qualifications needed to perform the services required for this project.

If so desired by the committee, each prospective firm will be given the opportunity to make a presentation to the selection committee, followed by questions by the selection committee. Notice will be given as to the time and place of the presentation (if needed).

Based on the score of the submitted qualifications (plus the presentation by each prospective firm - if needed), the selection committee will select the three (3) most qualified firms for the contract. The City of Midland and the selected firms will then enter fee negotiations for the project. In the event that the City of Midland and the first selected firms can't agree on reasonable fees for the project, negotiations will be stopped, and the next most qualified firm will be selected to enter into fee negations for the project.

This request for Statement of Qualifications does not commit the City of Midland to pay any costs prior to execution of a contract. Issuance of this material in no way obligates the City of Midland to award a contract or to pay any costs incurred in the preparation of a response. The City of Midland specifically reserves the right to vary all provisions of a contract set forth at any time prior to execution of a contract where it deems it to be in the best interest of the City of Midland.

Any inquiries relating to this request for statement of qualifications should be directed to Bobby Wojciechowski, by telephone at (432) 685–7519. In the event it becomes necessary to revise any part of this RFQ, addenda will be provided to all consultants who responded to the RFQ prior to the deadline.

Waiver

WAIVER OF CLAIMS ARISING FROM THE COMPETITIVE REQUEST FOR QUALIFICATION PROCESS OF AWARD OF CONTRACT

BY SUBMITTING A STATEMENT OF QUALIFICATIONS, EACH SUBMITTER AGREES TO AND DOES HEREBY WAIVE ANY CLAIM THE SUBMITTER HAS OR MAY HAVE AGAINST THE CITY AND/OR THE CITY'S EMPLOYEES, AGENTS AND OFFICERS, ARISING OUT OF OR IN ANY WAY CONNECTED WITH THE FOLLOWING:

1. THE ADMINISTRATION, EVALUATION OR RECOMMENDATION OF ANY STATEMENT OF QUALIFICATIONS.

2. WAIVER OR DELETION OF ANY OF THE REQUIREMENTS UNDER THE STATEMENT OF QUALIFICATIONS OR THE CONTRACT DOCUMENTS.

3. ACCEPTANCE OR REJECTION OF ANY STATEMENT OF QUALIFICATION.

4. AWARD OF CONTRACT.

By submitting a Statement of Qualifications, the submitter acknowledges that he or she understands all terms of the proposal documents and consents to the competitive selection process and the possibility of a negative assessment. By submitting a Statement of Qualifications, the submitter acknowledges and agrees that there was and is no disparity of bargaining power between the submitter and the City.

The submitter agrees that this is the intentional relinquishment of the above listed presently existing known rights.

WAIVER OF ATTORNEY FEES

BY SUBMITTING A STATEMENT OF QUALIFICATIONS, EACH SUBMITTER AGREES TO WAIVE AND DOES HEREBY WAIVE ANY CLAIM THE SUBMITTER HAS OR MAY HAVE AGAINST THE CITY AND/OR ITS RESPECTIVE EMPLOYEES AND REPRESENTATIVES, FOR THE AWARD OF ATTORNEY FEES, ARISING OUT OF OR IN CONNECTION WITH THE ADMINISTRATION, EVALUATION, OR RECOMMENDATION OF ANY STATEMENT OF QUALIFICATIONS, WAIVER OF ANY REQUIREMENTS UNDER THIS RFP, ACCEPTANCE OR REJECTION OF ANY STATEMENT OF QUALIFICATIONS, AND AWARD OF THE CONTRACT. BY SUBMITTING A STATEMENT OF QUALIFICATIONS, THE SUBMITTER SPECIFICALLY WAIVES ANY RIGHT TO RECOVER OR BE PAID ATTORNEY'S FEES FROM THE CITY OR ANY OF THE CITY'S EMPLOYEES AND REPRESENTATIVES UNDER ANY OF THE PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE, SECTION 37.001, ET. SEQ. AS AMENDED).

The submitter agrees that this is the intentional relinquishment of a presently existing known right.

By execution and submission of a Statement of Qualifications under this RFQ, the submitter hereby represents and warrants to the City that the submitter has read and understands the RFQ and the Statement of Qualifications is submitted in accordance with this RFQ. The submitter acknowledges that it understands all terms within the proposal documents, which include the waiver provisions, and that it had the right to consult with counsel regarding all of the above documents.

This section shall not be construed as a Waiver of Sovereign

Immunity. SOVEREIGN IMMUNITY

The City is not waiving its right of sovereign immunity. The City is retaining its immunity from suit. The City is not granting consent to be sued by legislative resolution or action.

The City of Midland assures that no person shall on the grounds of race, color, national origin, sex, age, disability or income as provided by Title VI of the Civil Rights Act of 1964 and related authorities, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any USDOT sponsored program or activity.

The City of Midland further assures every effort will be made to ensure non-discrimination in all of its programs and activities, whether those programs and activities are federally funded or not. Consideration will be given to respondents with DBE eligibility in the selection process.

On-line responses will not be allowed for this solicitation.

Delivery of Submittals: Bid packets must be received in the City Secretary's Office no later than designated bid date and time. Bidders are responsible for the means of timely delivering the bid packet. Delays due to any instrumentality used to transmit the bid packet (e.g., delay occasioned by a bidder, City's internal mailing system, etc.) are the sole responsibility of the bidder. **Late bid packets will not be accepted under any circumstances.**

Please print these documents and submit your bid in a sealed envelope to:

Mailing Address:

The City Secretary's Office
City of Midland
P. O. Box 1152
Midland, TX 79702

OR

Physical Address:

The City Secretary's Office
City of Midland
300 N. Loraine, Suite 330
Midland, TX 79701

ATTENTION: The deadline for submitting additional questions is 72 working hours before the bid opening date. Questions submitted before the Noon deadline will be included in the Addendum. Questions submitted after the Noon deadline will not receive any additional information and will instead only be directed to the information already provided.

IMPORTANT NOTICE

Conflict Of Interest Reporting Requirements

Compliance with LOCAL GOVERNMENT CODE TITLE 5. MATTERS AFFECTING PUBLIC OFFICERS AND EMPLOYEES SUBTITLE C. MATTERS AFFECTING PUBLIC OFFICERS AND EMPLOYEES OF MORE THAN ONE TYPE OF LOCAL GOVERNMENT CHAPTER 176. DISCLOSURE OF CERTAIN RELATIONSHIPS WITH LOCAL GOVERNMENT OFFICERS; PROVIDING PUBLIC ACCESS TO CERTAIN INFORMATION.

Form CIQ: This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session. This questionnaire shall be filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a). By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. See Section 176.006(a-1), Local Government Code. A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

Bidders are responsible for filing Conflict of Interest form "CIQ" in accordance with the above referenced statute. Failure to do so is a class C Misdemeanor. Contracts or Purchase Orders awarded to a vendor that has violated this law is subject to termination at such time that the violation is discovered with no recourse to the City of Midland. The bidder will be subsequently removed from the bidders list for a minimum of one year.

When there is no known conflict of interest as defined by the statute, it is not necessary to file/submit the Form CIQ. The form must be submitted if a conflict is subsequently discovered.

By submitting a response to this request, vendor represents that it complies with the requirements of Chapter 176 of the Texas Local Government Code.

For a current list of the local government officers go to: http://www.midlandtexas.gov/

Upon completion of the form, sign and submit with bid or mail to:

City of Midland

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

_____

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

Signature of vendor doing business with the governmental entity Date July 11, 2023

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

Re: RFQ for 23003764 Construction Material Testing Services

Dear Ms. Martinez:

Enprotec / Hibbs & Todd, Inc. (eHT) is pleased to submit the qualifications of our firm to the City of Midland (City) for consideration to provide construction materials testing services during the construction phase of capital improvement projects. eHT appreciations our on-going relationship with the City and we look forward to assisting you with these projects.

Should additional information be required, please don't hesitate to contact me at (325) 698-5560 or scott.yungblut@e-ht.com.

Sincerely,
Enprotec / Hibbs & Todd, Inc.

Scott Yungblut, PE
Vice President

QUALIFICATIONS

eHT Capabilities

Over the past 33 years, Enprotec / Hibbs & Todd, Inc. (eHT) has established itself as a premier engineering firm in the State of Texas. eHT, a corporation, has substantial experience managing planning, design and construction projects throughout Texas.

Our client service commitment to be a "user-friendly" company, providing clear, informative communication and quality work, is one of our strengths. We feel our firm is the "right-size" to offer a small firm's personal touch, yet has the breadth of a larger firms' service. We develop relationships with clients that are valuable and productive.

Construction Materials Testing

Geotec Labs, an in-house branch, is a fully operating and equipped geotechnical and materials testing laboratory. Most standard soil and construction materials tests can be performed at our laboratory. Our staff utilizes state-of-the-art equipment and instrumentation. Our procedures and methodologies conform to federal and state standards such as American Standards and Testing Methods (ASTM), TEX and American Concrete Institute (ACI). Our services include:

- Material Sampling
- Concrete Mix Design
- Concrete Cylinders and Beams
- Slump Testing
- Air Content Testing
- Plant Inspection
- Moisture Contents
- Atterberg Limits Testing
- Sieve Analysis
- Specific Gravity and Absorption
- Proctor Information
- Field Density Testing
- Core Sampling
- Wet Ball Mill Testing
- Soundness Testing
- Abrasion Testing
- CBR Testing
- Hot Mix Design

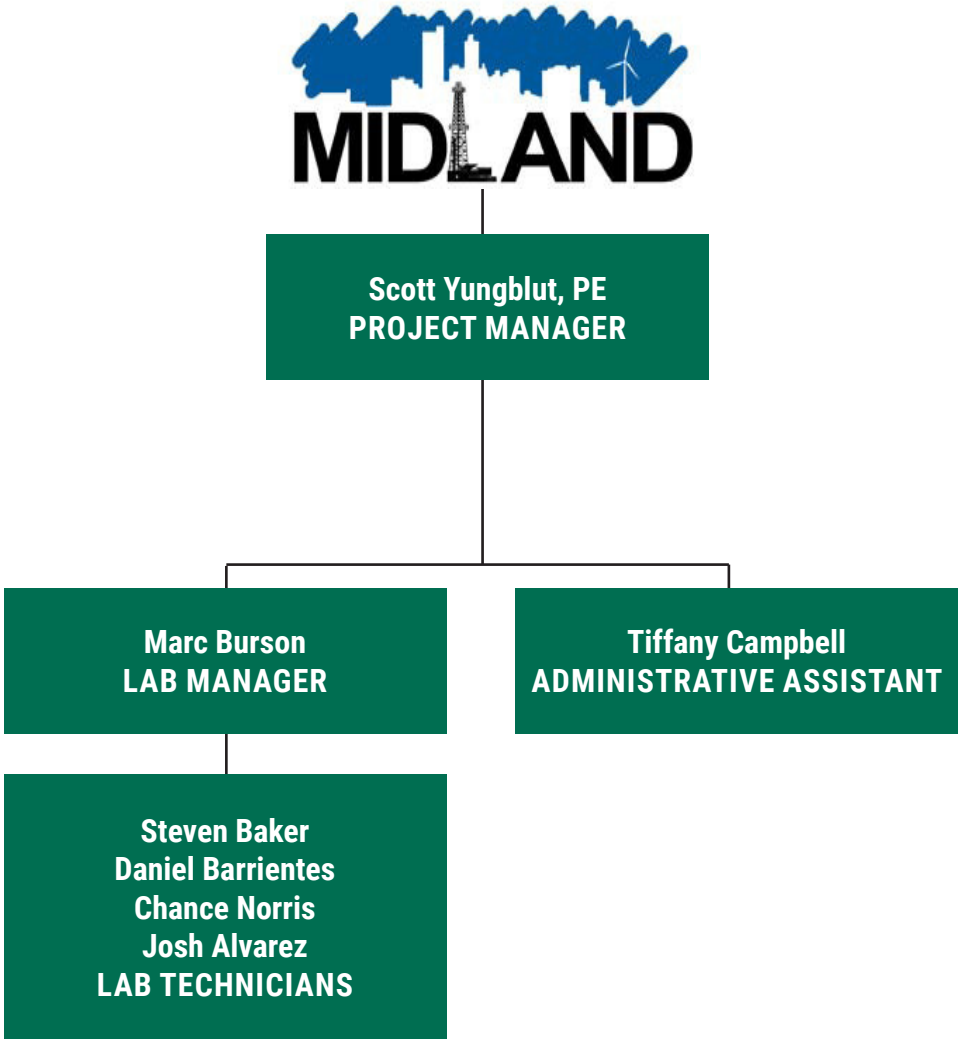
Geotechnical Engineering

Our geotechnical investigations provide data necessary to evaluate a wide variety of geotechnical issues. We use truck-mounted drilling units, in-house testing of soil and construction materials and the latest in field sampling equipment. These investigations help establish recommendations for foundation types, depths, allowable loadings and construction observation requirements for all types of structures.

Resources

High Senior Staff Interaction
Regional Texas Offices
Diverse Expertise
Low Overhead
Engineering-Science-Operations Mix
System Operators on Staff

Emphasis on Relationships



Regulatory Agency Relationships
Funding Agency Relationships
Client Commitment
Experienced Attention to Project Needs and Goals
Partnership, Advocacy and Planning

CAPACITY TO PERFORM

Organizational Structure

Key Personnel are listed herein. Additional personnel are available as needed.

Labor Resources

eHT can be supplemented and supported by other professionals within the company to handle peaks and illness. We do not anticipate substantial attrition. We have a very stable and cohesive group of employees. In the event that the Principal-in-Charge or Project Manager are not available during the performance period, their responsibilities will be assumed by other officers of eHT.

eHT is prepared to increase staff as necessary to complete projects to the satisfaction and expectations of the client. This is a high priority project for our company and we will not accept additional projects that could adversely affect our ability to meet the demands of this project.

Scott Yungblut, PE
Project Manager

PROFESSIONAL EXPERIENCE

Mr. Yungblut has 27 years of experience in performing engineering analysis and design on geotechnical and construction materials testing projects throughout Texas, Louisiana, Arkansas and Oklahoma. He supervises and manages eHT's soil and materials testing laboratory responsibilities including proposal preparation, field investigation, field and laboratory analysis, report preparation and construction quality assurance and quality control.

The eHT laboratory staff utilizes state-of-the-art equipment and instrumentation. eHT procedures and methodologies conform to federal and/or state standards such as American Standards and Testing Methods (ASTM), TxDOT and American Concrete Institute (ACI).

PROJECT EXPERIENCE

Geotechnical Expertise

Mr. Yungblut's geotechnical expertise includes:

- Subsurface Exploration
- Soil Property Evaluations
- Shallow and Deep Foundation Design Recommendations
- Foundations on Expansive Soils
- Pavement Design and Evaluation
- Roadway and Parking Lot Upgrades
- Airfield Pavements

Notable Civil Projects

- Abilene ISD: Various new schools and athletic facilities
- City of Midland Monopole Tower Sites
- Lamesa High School Improvements
- Hampton Inn & Suites, Lubbock
- Abilene Fire Training Academy
- Burger King/Popeyes, Midland
- Chisolm Truck Stop, Lubbock
- Hendrick Home for Children, Main Building, Abilene
- Avis Lube 126, Midland

Marc Burson
Lab Manager

PROFESSIONAL EXPERIENCE

Mr. Burson is the Senior Lab Manager for Geotec Labs, a subsidiary division of Enprotec / Hibbs & Todd, Inc. (eHT). He oversees all lab operations throughout the organization. With over 39 years of lab management experience, Mr. Burson is a valuable asset to the overall operations of the eHT laboratories. He brings a wealth of technical expertise to the operation that is rarely found in most testing labs. He constantly monitors lab operations to ensure accuracy of data and testing procedures and to ensure the most accurate reporting of materials testing possible.

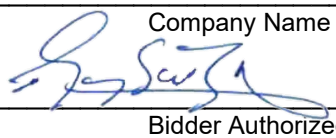
ADDENDUM # 1

BID # 23003764

TO ALL BIDDERS ON THE SUBJECT BID:

ADDENDUM # 1

DATE: May 5, 2023



The following questions were raised by one or more of the proposers. The answers are provided as a matter of clarification for all proposers as follows:

Q1: Are there any specific requirements for the bid packets? Such as page limit, required tabs etc.?
A1: No, there is no page limit or required tabs for this RFQ.

PLEASE RETURN THIS ADDENDUM WITH YOUR BID BY THE CLOSING DATE.

All other terms and conditions shall remain the same.

CITY OF MIDLAND

ADDENDUM

BID # 23003764

TO ALL BIDDERS ON THE SUBJECT BID:

ADDENDUM # 2

DATE: June 7, 2023

The following changes have been made to the specifications.

Please incorporate the following into the bid documents:

SELECTION CRITERIA:

The City will select three (3) firms for on-call services to provide continuous services for three (3) years. The City will make its selection from those responding to this RFQ. If deemed necessary by the City, interviews with the firms deemed most qualified, may be conducted. Once a selection is made of the most qualified firms, each chosen firm may be assigned projects. Once work is assigned, the selected firm will be requested to submit a scope of work and cost estimate to perform the specific services. If a mutually satisfactory agreement cannot be reached with the selected professional, negotiations will be terminated with that firm and the negotiation process will be initiated with another qualified firm. This process may be repeated until a mutually satisfactory agreement is reached.

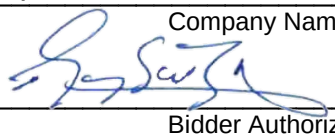
The City maintains the right to terminate the selection process at any time if they deem it is in the best interest of the City. At such time as an agreement is reached, City staff will make a recommendation to the City Council to execute a contract pursuant to the agreement and subject to the availability of funding. The City reserves the right to accept or reject any or all proposals and to accept, in the judgment of the Mayor and City Council, what is the most advantageous proposals. The following criteria will be used to evaluate the qualifications of consultants:

The following criteria will be used to evaluate the qualifications of consultants:

1. Capability to perform the required services for the project: 30%

2. Recent experience on similar projects: 20%

3. Reputation, personal and professional integrity, and competency of the firm: 15%



4. Professional background, availability, and caliber of key personnel to be assigned to this project: 15%

5. Capability to meet schedules or deadlines: 20%

PLEASE RETURN THIS ADDENDUM WITH YOUR BID BY THE CLOSING DATE.

All other terms and conditions shall remain the same.

PROFESSIONAL SERVICES AGREEMENT FOR MULTIPLE PROJECTS
23003764-2 Construction Material Testing Services

THIS AGREEMENT is made and effective the 12th day of July 2023, by and between the CITY OF MIDLAND, TEXAS, a municipal corporation, hereinafter called "CITY," and, Terracon Consultants, Inc., hereinafter referred to as "COMPANY."

WHEREAS, CITY desires to retain COMPANY, a professional engineering firm, to provide professional engineering services, architecture services, landscape architecture services, land surveying services, real estate appraising services, and services provided in connection therewith on one or more projects in which the CITY is involved; and

WHEREAS, COMPANY desires to provide such services on such projects as may be agreed from time to time by the parties;

NOW, THEREFORE, in consideration of the mutual covenants contained herein, the parties agree as follows:

ARTICLE I. PURPOSE

The purpose of this Agreement is to state the terms and conditions under which COMPANY shall perform professional engineering services, architecture services, landscape architecture services, land surveying services, real estate appraising services, and services provided in connection therewith for the City of Midland.

ARTICLE II. SERVICES TO BE PERFORMED

1. This Agreement shall apply to as many projects as CITY and COMPANY agree will be performed under the terms and conditions of this Agreement.
2. Each project that COMPANY performs for CITY hereunder shall be designated by a "Task Order." A Task Order shall be in the form of that attached hereto and incorporated herein as Exhibit "A" or a form substantially similar thereto. No Task Order shall be binding or enforceable unless and until it has been properly executed by both CITY and COMPANY. Each properly executed Task Order shall become a separate supplemental agreement to this Agreement.
3. COMPANY shall provide those services described in each properly executed Task Order.
4. COMPANY shall perform said services (1) with the professional skill and care ordinarily provided by competent professionals practicing in the same or similar locality

and under the same or similar circumstances and professional license and (2) as expeditiously as is prudent considering the ordinary professional skill and care of a competent professional. COMPANY represents that any employee who performs services under this Agreement shall be fully qualified and competent to perform said services.

5. In resolving potential conflicts between this Agreement and the Task Order pertaining to a specific project, the terms of the Task Order shall control except to the extent that the terms of the Task Order conflict with Article III below.

ARTICLE III. FINANCIAL CONSIDERATIONS

CITY agrees to pay COMPANY for said professional services in accordance with Part 5 of each Task Order; provided, however, (1) that the payment from CITY to COMPANY for each Task Order shall not exceed $150,000.00 and (2) that the total cost to CITY for all Task Orders executed by CITY and COMPANY each year in accordance with this Agreement shall not exceed $300,000.00 per year. COMPANY shall provide to CITY a monthly invoice. The monthly invoice shall set forth all service fees for the month and those expenses described in the Task Order incurred during the previous month which have received advance written approval from the City Manager. The City Manager must approve all additional expenses and reimbursable expenses in advance. Within 30 days of the date on which COMPANY's invoice is received by CITY, CITY shall pay the full amount of such invoice; provided, however, that if CITY objects to any portion of an invoice, CITY shall notify COMPANY of CITY's objection and the grounds therefor within 15 days of the date of receipt of the invoice, and the parties immediately shall make every effort to settle the disputed portion of the invoice. CITY in any event shall pay every portion of the invoice that is not in dispute within the 30-day period for payment.

ARTICLE IV. TERM

The Initial term of this Agreement shall be from July 12, 2023 until July 12, 2026 unless by providing written notice to COMPANY of CITY's desire to extend the Contract not later than sixty (60) days prior to the end of the then current term. Extensions of this Contract will be based on acceptable performance as long as the price does not exceed administrative parameters.

ARTICLE V. TERMINATION AT WILL

CITY may terminate this Agreement at will for no or any reason upon giving at least one-hundred-eighty (180) days written notice to COMPANY. The parties to this Agreement

understand and agree that it is in CITY'S sole discretion to cancel the Agreement during the term of the Agreement without penalty to CITY. COMPANY has no expectation and has received no guarantees that this Agreement will not be terminated before the end of the Agreement term. The parties have bargained for the flexibility of terminating this Agreement upon tender of the requisite notice at any time during the term of the Agreement. All work and services under the Agreement shall be suspended upon termination of the Agreement becoming effective.

ARTICLE VI. ASSIGNMENT

COMPANY shall not, either directly or indirectly, assign all or any part of this Agreement or any interest, right or privilege herein, without the prior written consent of CITY. The issue on whether or not to grant consent to an assignment is in the sole discretion of CITY.

ARTICLE VII. OWNERSHIP AND CONFIDENTIALITY OF DOCUMENTS AND OTHER WORK PRODUCT

All reports, information and other data ("instruments of service"), given to, prepared or assembled by COMPANY under this Agreement, and any other related documents or items shall become the sole property of CITY and shall be delivered to CITY, without restriction, except that COMPANY may make copies of any and all instruments of service for its files. CITY shall not make any modification to the plans and specifications or make them available for use by third parties without the prior written authorization of COMPANY, which consent shall not be unreasonably withheld.

ARTICLE VIII. INDEPENDENT CONTRACTOR

It is expressly understood and agreed that COMPANY shall perform all work and services described herein as an independent contractor and not as an officer, agent, servant or employee of CITY; that COMPANY shall have exclusive control of and the exclusive right to control the details of the services and work performed hereunder, and all persons performing the same; and shall be solely responsible for the acts and omissions of its officers, agents, employees, contractors and subcontractors; that the doctrine of respondeat superior shall not apply as between CITY and COMPANY, its officers, agents, employees, contractors and subcontractors; and that nothing herein shall be construed as creating a partnership or joint enterprise between CITY and COMPANY. No person performing any of the work and services described hereunder by COMPANY shall be considered an officer, agent, servant or employee of CITY. Further, it is specifically understood and agreed that nothing in this Agreement is

intended or shall be construed as creating a "Community of Pecuniary Interest" or "An Equal Right of Control" which would give rise to vicarious liability. COMPANY shall be an independent contractor under this Agreement and shall assume all of the rights, obligations and liabilities, applicable to it as such independent contractor hereunder. CITY does not have the power to direct the order in which the work is done. CITY shall not have the right to control the means, methods or details of COMPANY'S work. COMPANY shall assume exclusive responsibility for the work. COMPANY is entirely free to do the work in its own way.

ARTICLE IX. INSURANCE

COMPANY shall at all times during the term of this Agreement maintain and keep in full force and effect insurance in the following types and minimum amounts with companies authorized to do business in the State of Texas:

Commercial General Liability (including Contractual liability):

-Personal Injury:	$1,000,000.00 per person
	$1,000,000.00 per occurrence
-Property Damage:	$500,000.00 per occurrence
Business Automobile Liability:	$250,000.00 combined single limit - Personal Injury and Property Damage
Workers' Compensation:	Statutory limits
Employers' Liability:	$500,000.00 per accident or occurrence

The Commercial General Liability shall be on a per project aggregate, including completed operations, and shall be on a claims-occurred basis. This insurance shall name CITY as an additional insured and waive subrogation in favor of CITY.

The Business Automobile Liability insurance provided by COMPANY shall cover any auto for bodily injury and property damage, including owned vehicles, hired and non-city vehicles, and employee non-ownership, and the amount of such policy shall be a minimum of $250,000.00 covering any vehicle used for the execution of the work that is the subject of this Agreement. This insurance shall name CITY as an additional insured and waive subrogation in favor of CITY.

The Workers' Compensation coverage provided by COMPANY shall inure to the benefit of employees injured during the course and scope of their employment by COMPANY pursuant to this Agreement. The Workers' Compensation shall waive all rights of subrogation in favor of CITY.

All insurance required pursuant to this Agreement shall provide for a waiver of

subrogation in favor of CITY. All insurance required pursuant to this Agreement, except for Workers' Compensation Insurance, shall name CITY as an additional insured on a claims occurred basis. CITY shall be provided the notice by COMPANY'S insurance provider not later than thirty (30) days prior to any reduction or termination of such coverage.

COMPANY shall contractually require all contractors, subcontractors, and sub-subcontractors that work on any portion of the work that is the subject of this Agreement to obtain insurance coverage that meets or exceeds the policy requirements and minimum amounts specified herein. All contractors, subcontractors, and sub-subcontractors shall obtain insurance policies that provide blanket waivers of subrogation in favor of the City of Midland and policies that name the City of Midland as an additional insured on a claims occurred basis (except workers' compensation).

The parties agree that, prior to the execution of the Agreement, COMPANY shall provide one or more certificates of insurance specifically stating that these requirements have been met and subject to the approval of CITY. CITY shall not be required to provide any insurance whatsoever pursuant to this Agreement.

COMPANY certifies that the certificate of insurance provided as required herein complies with the requirements of Chapter 1811 of the Texas Insurance Code. COMPANY shall not use an unapproved certificate of insurance or insert inappropriate language on a certificate. Compliance with state law is the sole responsibility of COMPANY.

ARTICLE X. ATTORNEY FEES

BY EXECUTING THIS AGREEMENT, COMPANY AGREES TO WAIVE AND DOES HEREBY KNOWINGLY, CONCLUSIVELY, VOLUNTARILY AND INTENTIONALLY WAIVE ANY CLAIM IT HAS OR MAY HAVE IN THE FUTURE AGAINST CITY, REGARDING THE AWARD OF ATTORNEY'S FEES, WHICH ARE IN ANY WAY RELATED TO THE AGREEMENT, OR THE CONSTRUCTION, INTERPRETATION OR BREACH OF THE AGREEMENT. COMPANY SPECIFICALLY AGREES THAT IF COMPANY BRINGS OR COMMENCES ANY LEGAL ACTION OR PROCEEDING RELATED TO THIS AGREEMENT, THE CONSTRUCTION, INTERPRETATION, VALIDITY OR BREACH OF THIS AGREEMENT, INCLUDING BUT NOT LIMITED TO ANY ACTION PURSUANT TO THE PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE SECTION 37.001, ET SEQ., AS AMENDED), OR CHAPTER 271 OF THE TEXAS LOCAL GOVERNMENT CODE,

COMPANY AGREES TO ABANDON, WAIVE AND RELINQUISH ANY AND ALL RIGHTS TO THE RECOVERY OF ATTORNEY'S FEES TO WHICH COMPANY MIGHT OTHERWISE BE ENTITLED.

COMPANY AGREES THAT THIS IS THE VOLUNTARY AND INTENTIONAL RELINQUISHMENT AND ABANDONMENT OF A PRESENTLY EXISTING KNOWN RIGHT. COMPANY ACKNOWLEDGES THAT IT UNDERSTANDS ALL TERMS AND CONDITIONS OF THE AGREEMENT. COMPANY FURTHER ACKNOWLEDGES AND AGREES THAT THERE WAS AND IS NO DISPARITY OF BARGAINING POWER BETWEEN CITY AND COMPANY. THIS SECTION SHALL NOT BE CONSTRUED OR INTERPRETED AS A WAIVER OF GOVERNMENTAL IMMUNITY.

COMPANY AND CITY ARE RELYING ON THEIR OWN JUDGMENT. EACH PARTY HAD THE OPPORTUNITY TO DISCUSS THIS AGREEMENT WITH COMPETENT LEGAL COUNSEL PRIOR TO ITS EXECUTION.

ARTICLE XI. GOVERNMENTAL IMMUNITY

By executing this agreement CITY is not waiving its right of governmental immunity. CITY is retaining its immunity from suit. CITY is not granting consent to be sued by legislative resolution or action.

THERE IS NO WAIVER OF GOVERNMENTAL IMMUNITY.

ARTICLE XII. NO THIRD-PARTY BENEFICIARIES

CITY'S approval of this agreement does not create a third-party beneficiary. There is no third-party beneficiary to this Agreement. No person or entity who is not a party to this Agreement shall have any third-party beneficiary or other rights hereunder.

ARTICLE XIII. RELEASE

NOTWITHSTANDING ANY OTHER PROVISIONS, COMPANY HEREBY RELEASES, ACQUITS, RELINQUISHES AND FOREVER DISCHARGES CITY, CITY'S EMPLOYEES AND OFFICERS, FROM ANY AND ALL DEMANDS, CLAIMS, DAMAGES, OR CAUSES OF ACTION OF ANY KIND WHATSOEVER WHICH COMPANY HAS OR MIGHT HAVE IN THE FUTURE, INCLUDING BUT NOT LIMITED TO BREACH OF AGREEMENT, QUANTUM MERUIT, CLAIMS UNDER

THE DUE PROCESS AND TAKINGS CLAUSES OF THE TEXAS AND UNITED STATES CONSTITUTIONS, TORT CLAIMS, OR CITY'S NEGLIGENCE.

ARTICLE XIV. GENERAL PROVISIONS

A. Waiver. No waiver by CITY of a breach of any covenant, condition, or restriction of this Agreement shall be construed or held to be a waiver of any succeeding or preceding breach of the same or any other covenant, condition, or restriction contained in this Agreement.

B. Governing Law and Venue. This Agreement shall be governed by the laws of the State of Texas. All performance and payment made pursuant to this Agreement shall be deemed to have occurred in Midland County, Texas. Exclusive venue for any claims, suits or any other action arising from or connected in any way to this Agreement or the performance of this Agreement shall be in Midland County, Texas. The obligations and undertakings of each of the parties to this Agreement shall be deemed to have occurred in Midland County, Texas. This Agreement shall be governed by, interpreted, enforced and construed under the laws of the State of Texas. The laws of the State of Texas shall govern, construe and enforce all the rights and duties of the parties, including but not limited to tort claims and any and all contractual claims or disputes, arising from or relating in any way to the subject matter of this Agreement, without regard to conflict of laws and rules that would direct application of the laws of another jurisdiction.

C. Notice. Any notice or demand that shall be made regarding this Agreement, shall be made in writing and delivered either in person or by certified or registered mail. Notice by mail shall be complete upon deposit of the paper, postage prepaid, in a post office or official depository under the care and custody of the United States Postal Service addressed as follows:

If to CITY: City Manager's Office
P.O. Box 1152
Midland, Texas 79702

If to COMPANY: Terracon Consultants, Inc.
10400 State Hwy 191
Midland, Texas 79707

The parties hereto may change the above-designated addresses by giving notice pursuant to the terms of this Section.

D. Severability. In case any one or more of the provisions contained in this Agreement shall for any reason be held to be invalid, illegal, or unenforceable in any respect, this invalidity, illegality, or unenforceability shall not affect any other provision of the Agreement, and this Agreement shall be construed as if the invalid, illegal, or unenforceable provision had never been contained herein.

E. Use of Language. Words in the singular shall be held to include the plural, unless the context otherwise requires.

F. Amendments, Modifications, Alterations. No amendment, modification, or alteration of the terms of this Agreement shall be binding unless it is in writing, dated subsequent to the date of this Agreement, and duly executed by the parties to this Agreement.

G. Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be deemed as original, and all of which shall constitute one and the same instrument.

H. Federal Wage Requirements. If applicable, the Davis-Bacon Act, 29 CFR 5.5, and any related acts or regulations are hereby incorporated by reference and made a part of this Agreement, and all terms and requirements under said laws, by such incorporation, are made terms and requirements of this Agreement, to which the parties to this Agreement have agreed to be bound.

I. Notice of Alleged Breach; Statutory Prerequisites. As a condition precedent to filing suit for alleged damages incurred by an alleged breach of an express or implied provision of this Agreement, COMPANY or his legal representative, shall give the City Manager, or any other reasonable official of CITY, notice in writing (consisting of one original and seven copies of notice attached to a copy of this Agreement) of such damages, duly verified, within one-hundred fifty (150) days after the same has been sustained. The discovery rule does not apply to the giving of this notice. The notice shall include when, where and how the damages occurred, the apparent extent thereof, the amount of damages sustained, the amount for which COMPANY will settle, the physical and mailing addresses of COMPANY at the time and date the claim was presented and the physical and mailing addresses of COMPANY for the six months immediately preceding the occurrence of such damages, and the names and addresses of the witnesses upon whom COMPANY relies to establish its claim; and a failure to so notify the City Manager within the time and manner provided herein shall exonerate, excuse and except CITY from any liability whatsoever. CITY is under no obligation to provide notice to COMPANY that COMPANY'S

notice is insufficient. CITY reserves the right to request reasonable additional information regarding the claim. Said additional information shall be supplied within thirty (30) days after receipt of notice.

The statutory prerequisites outlined herein constitute jurisdictional requirements pursuant to Section 271.154 of the Texas Local Government Code and Section 311.034 of the Texas Government Code. Notwithstanding any other provision, COMPANY'S failure to comply with the requirements herein shall perpetually bar COMPANY'S claim for damages under Chapter 271 of the Texas Local Government Code, and Section 311.034 of the Texas Government Code, regardless if CITY has actual or constructive notice or knowledge of said claim or alleged damages. COMPANY agrees that the requirements of this entire Agreement are reasonable.

J. PROMPT PAY ACT - CITY and COMPANY agree that Texas Government Code, Chapter 2251, Payment for Goods and Services (the "Prompt Pay Act") does not waive governmental immunity.

K. Compliance. – COMPANY agrees that it shall comply with Texas Government Code Section 2252.908, as amended. COMPANY agrees that it shall comply with Texas Local Government Code Section 176.006, as amended.

L. Anti-Boycott Statutes. To the extent that Tex. Gov't Code §§ 2271.002 and 2274.002 apply to this Agreement, COMPANY hereby verifies that:

- COMPANY does not boycott Israel and will not boycott Israel during the term of this Agreement;
- COMPANY does not boycott energy companies and will not boycott energy companies during the term of this Agreement; and
- COMPANY does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association and will not discriminate during the term of this Agreement against any firearm entity or firearm trade association.

If Tex. Gov't Code § 2270.002 does not apply to this Agreement, such verification is not required, and COMPANY shall be deemed to have not made such verification.

M. Records Retention and Production of Information. To the extent that this Agreement is a contract described by Tex. Gov't Code § 552.371, COMPANY shall: (i) preserve all contracting information related to the Agreement as provided by the records retention requirements applicable to CITY for the duration of the contract; (ii) promptly provide to CITY

any contracting information related to the Agreement that is in the custody or possession of COMPANY on request of CITY; and (iii) on completion of the Agreement, either (a) provide at no cost to CITY all contracting information related to the Agreement that is in the custody or possession of COMPANY, or (b) preserve the contracting information related to the Agreement as provided by the records retention requirements applicable to CITY.

N. Public Information. To the extent that this Agreement is a contract described by Tex. Gov't Code § 552.371, COMPANY agrees as follows in accordance with Tex. Gov't Code § 552.372(b): The requirements of Subchapter J, Chapter 552, Government Code, may apply to this contract, and the contractor or vendor agrees that the contract can be terminated if the contractor or vendor knowingly or intentionally fails to comply with a requirement of that subchapter.

O. Conflict of Terms. If a conflict of terms or language exists between: (i) any of the provisions of this Agreement; and (ii) any of the provisions contained in any exhibit(s) attached to this Agreement, precedence shall be given to the provisions of this Agreement. For the avoidance of any doubt, the provisions contained in this Agreement shall supersede any and all conflicting provisions contained in any exhibit(s) attached hereto. Furthermore, the Parties acknowledge and agree that any provision contained in an exhibit(s) attached to this Agreement that imposes an additional express or implied obligation on CITY is hereby made void and of no force or effect. CITY's sole and exclusive obligations under this Agreement are contained in the provisions of this Agreement that precede the signature page(s), which evidences the Parties' execution and acceptance hereof.

P. Iron or Steel Products Statute. Company agrees that all iron or steel products produced through a manufacturing process and used in the project that is the subject of this Agreement shall be produced in the United States in accordance with Government Code § 2252.202, et seq., as amended.

Q. Interpretation. By executing this Agreement, the Parties acknowledge and agree that this Agreement shall not be interpreted or construed against any Party solely because such Party or its legal counsel drafted this Agreement. The Parties have read, understood, and approve of the language and terms set forth herein.

City Council Meeting

Item Number: 8

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Mark Widmann, Director

Subject: RESOLUTION AMENDING THE CITY OF MIDLAND PERSONNEL POLICIES; CONVERTING THE CITY'S VACATION AND SICK LEAVE PROGRAMS INTO A PAID TIME OFF PROGRAM; AMENDING OTHER LEAVE POLICIES; AND PROVIDING AN EFFECTIVE DATE OF JULY 12, 2023 (DISTRICT: ALL) (ADMINISTRATIVE SERVICES)

Purpose:

The proposed leave plan changes aim to continue attracting and retaining highly effective qualified staff.

Recommended City Council Action:

Approve

Fiscal Impact:

The fiscal impact for the PTO payout is estimated based on the current turnover rate of 18% and additional costs incurred for on-duty staff for holidays. The additional cost is estimated at $1,015,600 across general and enterprise funds. Please refer to the cost breakdown listed below.

Discussion:
In October 2022, Administrative Services Talent Acquisition conducted an employee survey on employee attraction and retention. Employees were asked about current leave policies, and the results showed that sick and vacation leaves and additional time off were important to them. Listed below are some comments received:

- PTO Leave. Many employees prefer a single leave bank replacing vacation and sick leave.
- Increased accrual rates, employees would like to see the amount of leave accrues

increased and at a quicker rate.

- Leave payout. Employees think the payout of leave upon retirement or separation is unfair.
- Personal/Mental Health Days. Many employees, especially our first responders, would like mental health days to be available.
- Matching Holidays Employees would like to see the holiday calendar match up with the county, school districts, and state-level government.

November of 2022, Administrative Services Talent Acquisition held a briefing with the Council outlining the concerns and priorities of our employees. As a result, we are recommending the following Chapter V. Personnel Policy changes for Council consideration.

Create PTO:

Creating a single Paid Time Off (PTO) bank that would combine the current vacation and sick leaves, effective October 1, 2023, the following charts indicate the difference between the current policy and the proposed policy:

Please See Tables 1 & 2

Tables 3, 4, & 5 indicate the difference between the current and recommended PTO payout policies.
Please See Tables 3, 4, & 5

Personal/Mental Health Days

Eligible full-time employees shall receive two (2) Mental Health Days per calendar year. This benefit shall not carry over into the following year and shall not be paid out at termination of employment.

Community Service Leave

Full-time employees are eligible to request one (1) day per calendar year to participate in organizations and activities that benefit the local community. Community Service Leave is noncumulative, nontransferable, and not paid out at termination.

Holidays

Additionally, recognized the following holidays as City holidays: 1) Juneteenth National

Independence Day (currently provided), and 2) Veterans Day.

Birthday Leave

A currently provided benefit added to the Personnel Policy's full-time employees are eligible for one (1) day of paid birthday leave annually. Birthday leave is taken during the employees' birthday month. Unused birthday leave will not carry over to the next year and is not paid out at termination.

Costing

The chart below illustrates the estimated additional budgeted cost.

Proposed Leave		Amount
Paid Time Off	Estimated additional payout cost based on the current turnover rate	$715,600
Personal/Mental Health Days (2 Days)	Based on the OT cost of mandated positions, 100% participation	$150,000
Community Service Leave (1 Day)	Based on the OT cost of mandated positions, 100% participation	$75,000
Additional Holiday (Veterans Day)	Based on the OT cost of mandated positions, 100% participation	$75,000
	Total	$1,015,600

In addition to Chapter V, Leave Plans changes, multiple formatting and grammar adjustments were made.

RESOLUTION NO. _____

RESOLUTION AMENDING THE CITY OF MIDLAND PERSONNEL POLICIES; CONVERTING THE CITY'S VACATION AND SICK LEAVE PROGRAMS INTO A PAID TIME OFF PROGRAM; AMENDING OTHER LEAVE POLICIES; AND PROVIDING AN EFFECTIVE DATE OF JULY 12, 2023

WHEREAS, the City Council finds it to be in the public interest to approve and adopt certain amendments to the City of Midland Personnel Policies;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF MIDLAND, TEXAS:

SECTION ONE. That the City of Midland Personnel Policies are hereby amended to read in their entirety as shown in Exhibit "A", which is attached hereto and incorporated herein (the "Amended Personnel Policies").

SECTION TWO. That the Amended Personnel Policies shall become effective July 12, 2023 (the "Effective Date"); provided, however, that the provisions of the City of Midland Personnel Policies that existed the day before the Effective Date concerning vacation leave and sick leave shall continue to be effective until the Paid Time Off program established in the Amended Personnel Policies becomes effective on October 1, 2023.

SECTION THREE. That the Administrative Services Director is hereby authorized to make non-substantive ministerial revisions to the Amended Personnel Policies, such as correcting misspellings, grammatical errors, and cross-references and making formatting changes.

SECTION FOUR. That should any section, clause, or provision of this resolution or the Amended Personnel Policies be declared by a court of competent jurisdiction to be invalid, same shall not affect the validity of this resolution or any other resolution of the City as a whole, or any part thereof, or the Amended Personnel Policies other than the part so declared to be invalid.

On motion of Council member _____, seconded by Council member _____, the above and foregoing resolution was adopted by the City Council of the

City of Midland at a regular meeting on the _____ day of _____, A.D., 2023, by the following vote:

Personnel Policies
With Explanations

Foreword

The intent of this document is to provide helpful personnel information to every employee of the City of Midland. It is compiled after much consideration by many members of the City staff. It is designed as a device for better understanding and communication among the employees.

This manual is to be used as a reference, and knowledge of its contents is essential.

Policy changes may occur often, and the information in this handbook will change. As an employee, your input is important and appreciated.

City of Midland Personnel Policies

Chapter I

Purpose

Section 1 Objectives

The objectives of these rules are to facilitate efficient and economical services to the public and to provide for a fair and equitable system of personnel management for the City. While these rules constitute a precise statement of policies and procedures, they are not intended to cover every conceivable personnelsituation that may arise. As with any ordinance or regulation, these rules must be supplemented with administrative regulations in addition to the principles and policies set forth. For this reason, considerable latitude shall be given to the City Manager and the Administrative Services Director for administration of these policies within the framework set forth in these rules. It is expected that amendments and revisions affecting personnel policies will be made from time to time when they are necessary to meet changing conditions.

Section 2 Applicability

These rules, policies and procedures shall apply to and govern all employees of the City of Midland, except when these rules are inconsistent with State legislation. Words used in the singular shall be construed to read in the plural and words used in the masculine gender shall be construed to read in the feminine. Failure to comply with these policies may result in disciplinary action being taken against an employee. Nothing in these rules, policies and procedures, except Chapter XII, shall be considered or construed to establish an employment agreement or contractor right of employment with the City of Midland. Nothing in these policies, rules and procedures, except Chapter XII, should be construed as an employment agreement, guarantee of or contract for continued benefits from or employment by the City of Midland. Severance as defined in these rules and policies shall mean salary and all other compensation. Severance is to be paid in a lump sum upon involuntary separation. The Mayor shall have the authority to execute and approve amendments and modifications to employment agreements entered into under Chapter XII. The standard for compliance by the City with these personnel policies, rules or procedures shall be substantial compliance. A violation of or failure to follow any rule or procedure shall not form a basis for any civil or criminal action against the City or any employee or official of the City who is acting on behalf of the City except as authorized by Sections 271.151 through 271.160 of the Texas Local Government Code, as amended. The administrative remedy set out in these rules and procedures is the exclusive remedy. There shall be no appeal to or action in any court except on constitutional or statutory grounds. These personnel rules, policies and procedures shall be implemented, administered and construed to comply with applicable local, state and federal laws.That the term Other Employees as used in these policies shall only mean the Deputy City Manager, Assistant City Manager and First Assistant City Attorney. That Chapter XII and its related definitions are a contract for providing services as authorized by Sections 271.151 through 271.160 of the Texas Local Government Code, as amended. The testing of employees conducted in conjunction with the administration and enforcement of the City's drug and alcohol testing policy shall be conducted in accordance with the United States Constitution, the Texas Constitution, federal and state laws, and regulations and judicial precedent. Except as outlined in Chapter XII, an employee's at-will employment status is not modified by these policies and the Midland City Council reserves the right to amend these personnel policies in accordance with applicable statues. As used in these rules and policies, council appointees shall mean the City Manager, City Attorney, City Secretary, the Presiding Municipal Court Judge and the Associate Municipal Court Judge.

Section 3 Nondiscrimination

Equal employment opportunities shall be afforded to all qualified persons seeking employment with the City of Midland, Texas, and no person shall be refused employment because of race, age, color, creed, sex, national origin, disability, or genetic information, nor shall any person be promoted, demoted, transferred or discharged for reasons other than merit. Discrimination against any person in recruitment, examination, appointment, training, promotion, retention, discipline, compensation or any other aspect of

personnel administration because of race, age, color, creed, sex, national origin, disability, or genetic information is prohibited.

Section 4 Mission

We, the employees of the City of Midland, are passionate and energetic about the service we provide to each other and our community.

Section 5 Vision

Midland is a growing urban center in Texas, with a healthy economy and a vibrant downtown.

We enjoy great living, abundant leisure opportunities, and effective transportation-easy movement through our City.

Our diverse Midland community works together for a bright sustainable future; our City is recognized as a leader.

Section 6 Guiding Principles

1. Demonstrate integrity, respect and value everyone.
2. Exhibit professionalism by being accountable and dependable.
3. Exercise cooperation through a dedication to serve others.

Chapter II

General Provisions

Section 1 Political Activity

While in uniform or on active duty, an employee of the City of Midland may not engage in a political activity relating to a campaign for an elective office.

For the purposes of this section, a person engages in a political activity if the person:

a. Makes a public political speech supporting or opposing a candidate;

b. Distributes a card or other political literature relating to the campaign of a candidate;

c. Wears a campaign button;

d. Circulates or signs a petition for a candidate;

e. Solicits votes for a candidate;

f. Solicits campaign contributions for a candidate.

While out of uniform and not on active duty, an employee of the City of Midland may engage in a political activity relating to a campaign for an elective office, including each activity listed, except that the person may not solicit campaign contributions for a candidate other than from members of an employee organization to which that person belongs. See Texas Local Government Code 150.002.

Section 2 Disclosure of Religious Affiliations

No question in any text, in any application form or in any personnel proceeding, or of any appointing authority, shall be so framed as to attempt to elicit information concerning religious opinions or affiliations of any applicant or employee. No appointment to, or removal from, a position with the City of Midland shall be affected or influenced in any manner by any religious opinion or affiliation.

Section 3 Nepotism

a. No person related, within the second degree of affinity (marriage) or within the third degree of consanguinity (blood), to the Mayor, member of the City Council, or the City Manager shall be appointed to any office, position or clerkship or other service to the City.

b. In addition to the above stipulation, it is hereby provided that relatives or family members related within the second degree of affinity or the second degree of consanguinity (as defined in section "d" of this regulation) shall not be appointed to serve in positions in the same division (except for Police and Fire Departments, where the term “on the same shift assignment” shall be substituted for the term “in the same division”) or in a position where one relative is to supervise or have influence over the other's employment. Any Department Manager who feels that such appointments are justified and necessary must present to the Administrative Services Director the reason and needs which are the basis for requesting the appointment. The City Manager's approval will be needed to make the appointment official.

c. In the event of reorganization, promotion, or marriage between two City employees, the following shall apply:

1) If the affected employees are employed in different departments or different divisions of a department and neither is in a position to supervise or have influence over the other's employment, no change in employment status will be required,

2) If the affected employees are employed in the same division of a department (or one is in a position to supervise or have influence over the other's employment), one of them must seek a transfer to another division of that department or to another department. Said employee may apply for any position for which they meet the minimum qualifications, but cannot remain in the same division for more than 90 days. At the end of the 90-day period one of the two must either terminate employment or accept reassignment to a position selected by the City Manager. Such reassignment shall be at the City Manager's sole discretion with due regard for the individual's skills and qualifications and the organization's needs. The City Manager may extend the 90 day limit an additional 90 days if the City Manager finds an extension to be in the best interest of the City of Midland.

d. For the purpose of this policy, the following shall constitute familial relationships:

1) Consanguinity (Blood): 1st degree includes Mother, Father, Son and Daughter; 2nd degree includes Brother, Sister, Grandfather, Grandmother, Grandson, Granddaughter; 3rd degree includes Uncle, Aunt, Nephew, Niece, Great Grandson, Great Granddaughter, Great Grandfather, Great Grandmother.

2) Affinity (Marriage): 1st degree includes Spouse, Mother-in-law, Father-in-law, Son-in-law, and Daughter-in-law (for the purposes of this policy 1st degree relationship will also apply to Stepmother, Stepfather, Stepson, and Stepdaughter); 2nd degree includes Brother-in-law, Sister-in-law (for the purpose of this policy 2nd degree relationship will also apply to Stepbrother and Stepsister), Grandfather-in-law, Grandmother-in-law, Grandson-in-law, Granddaughter-in-law.

Relatives who are currently employed in situations that would be a violation of this policy on the date it becomes effective shall not have their current employment status affected.

Section 4 Oath of Office

"All officers of the City, whether elective or appointive, shall qualify by taking the oath prescribed by the constitution of this state and by executing such bond as may be required under the provisions of this Charter and the ordinances and resolutions of the City". (Charter of the City of Midland, Article IV, Section 8)

Section 5 Solicitations

No solicitation of funds of any character or for any purpose whatsoever shall be permitted among city employees on the job without the express approval of the City Manager.

Section 6 Financial Responsibility of Employees

Employees of the City of Midland are expected to maintain a good credit standing in the community and to pay their obligations promptly. The City shall in no way serve as a collecting agency or arbitrator. Failure of an employee to pay or make reasonable provisions for future payment of his debts to such an extent that such failure shall be detrimental to the City services may be just cause for dismissal.

Section 7 Outside Employment

Full-time City employees are not encouraged to accept additional employment from another source. However, in certain situations, occasional and part-time work will be allowed if approved by the Department Manager and the City Manager and if the work does not constitute a conflict of interest, does not interfere with the employee efficiently carrying out his normal duties with the City, and does not involve the use of City time or City equipment. If an employee shall become unable to perform the duties of his City job because of any injury or other incapacitating cause while in the employment of an employerother than the City, the City may, at its sole option, reduce the benefits otherwise granted by thesepolicies to whatever amount or degree the City deems to be justified.

Section 8 City-Owned Vehicles

All employees who drive City-owned vehicles in the performance of their duties are responsible for their proper operation. No City vehicle or piece of equipment used in normal operation or an emergency vehicle housed at an employee's home is to be used for personal business, except police. No City employee may drive a City vehicle if he does not have a valid driver's license.

Section 9 Employment Conditions

These rules shall become a part of the employment conditions of each employee and employment or continued employment with the City shall be contingent upon the employee's compliance with theprovisions of these rules. Within ninety (90) days after the adoption of these rules and at the time of employment of each new employee, a copy of these rules in handbook form incorporating pertinent phrases of these rules shall be furnished to each employee.

Section 10 Amendment and Revision of Rules

The Director of Administrative Services may make recommendations for amendment and revision ofthese rules to the City Manager. If the City Manager shall approve such changes, he in turn shall submit them to the City Council for their approval. All rules and amendments thereto shall become effective uponthe date of their approval by the City Council.

A copy of the Personnel Policies, Rules and Procedures, and all amendments or changes shall be filed in the office of the City Secretary and shall be available for inspection by all City employees and the public. Such filing shall constitute notice to all employees of the personnel policies, rules and procedures and of all amendments and changes. The Personnel Policies, Rules and Procedures manual, as amended or changed from time to time, shall supersede any conflicting provisions previously adopted. The rules, policies and procedures described herein may be amended, changed or terminated in whole or in part, at any time by the City of Midland. If an employee continues to work for the City of Midland for thirty (30) days after the effective date of any such amendment, change or termination, the employee will be deemed to have accepted such amendment, change or termination.

Section 11 Possession of Weapons

No employee, other than a peace officer, shall carry on or about his/her person, at a City work site, any instrument or weapon that is specifically designed, made, or adapted for the purpose of inflicting serious bodily injury or death, including, but not limited to, clubs, firearms, handguns, illegal knives, explosives, crossbows, bow and arrows, throwing stars and knuckles. No employee, other than a peace officer, shall carry a concealed weapon in any City building, regardless of whether or not the person is duly licensed by the State of Texas to carry a concealed handgun. No employee, other than a peace officer, may carry a weapon on or about his/her person at any time while conducting City business. The term "City work site" includes not only City buildings and property, but also other assigned work locations, City vehicles and City equipment. The term "City building" means any and all buildings or portions of buildings owned, leased, or otherwise controlled by the City of Midland.

Chapter III

Organization and Administration

Section 1 Organization of Personnel

a. The City Council. "The compensation of all appointive officers and employees shall be fixed by the City Council, who may increase or diminish compensation at will or abolish any appointive office entirely at any time." (Charter of the City of Midland, Article IV, Section 14c)

b. The City Manager. The City Manager will advise the City Council on personnel matters and recommend to them changes in personnel policies, changes in personnel rules and regulations, the compensation rates of appointive officers and other City employees, and any other changes that he may deem necessary or expedient. The City Manager is responsible for the administration of the personnel program of the City of Midland and to assist him in this function he may appoint a Director of Administrative Services.

c. Director of Administrative Services. The Director of Administrative Services and the Administrative Services Department, acting under his supervision, will represent the City Manager with regard to routine administration of all phases of these rules and policies.

d. Department Managers. Department managers are expected to effectively supervise their employees and to maintain proper working relationships. They may adopt and enforce departmental regulations not inconsistent with these rules and regulations. Department Managers will report on the efficiency of their subordinates and notify the Director of Administrative Services of changes in duties of their employees, in order that the City of Midland classification plan may be maintained. The Department Managers will recommend to the City Manager merit increases for their employees. Department Managers will have the power of appointment and removal in their departments, including the power to appoint division managers. The appointment of new employees by department managers will be made only from eligible applicants referred to them by the Director of Administrative Services with exceptions as noted under Chapter IV, Section 2. Transfers and reclassification should be consummated only after a study of information contained in the individual's file and after consultation with the Director of Administrative Services.

Chapter IV

Applications, Applicants, and Conditions of Employment

Section 1 Basis of Employment

All initial employment with the City of Midland shall be based on merit, ability, and physical and moral fitness, and may include any or all of the following:

a. Training and experience as reflected by the application form, plus other documentary evidence as to certification, registration, etc., if requested;

b. Job related written and/or performance tests as required;

c. A job related physical examination and/or functional capacity screening;

d. Background check for conviction of crimes involving moral turpitude and (in connection with jobs involving the operation of motor vehicles) moving traffic violations;

e. Character investigations made by the Administrative Services Department and/or the manager of the department concerned.

Exceptions to the procedures in this chapter may apply to: (1) Police officers, (2) Firefighters, (3)Seasonal recreation employees, (4) Department managers, (5) Council appointees and their assistants.

Section 2 Recruitment

This function is one of the services performed by the Administrative Services Department, for permanent, part-time, and seasonal employees paid by the City. The central office will maintain files of applications. These are to be obtained through personal contacts from individuals applying to the City, throughcontacts with established employment agencies, and/or by way of advertising. The Director of Administrative Services or those designated by him will conduct the initial recruiting, and screening. Suitable and eligible applicants will be referred to Department Managers or those designated by them for additional interview and employment.

Section 3 Requests for Personnel

When departments submit requests to the Administrative Services Department for persons to fill vacancies, such requests shall include the title of the position to be filled, contemplated initial salary or wages, desired training and/or experience qualifications and such other pertinent information as may be needed to enable the Administrative Services Department to most satisfactorily find the personnel being sought by the department. When circumstances permit, requests for personnel should be made areasonable period of time in advance of the actual need.

Section 4 Applicant Preference

Other qualifications being equal, departments will be expected to extend hiring preference to persons currently employed by the City of Midland.

Section 5 Residence

Other qualifications being equal, applicants who live inside the corporate limits of the City of Midland should be given preference over those living outside the City limits when appointments to positions with the City are being made.

Section 6 Announcements

All positions will be opened to applicants outside the city organization, at the department's discretion, and shall be posted for at least 5 working days. If a shorter publication period is required due to an emergency, written justification should be included with the requisition and must be approved by the City Manager.

Section 7 Application and Selection Procedures

All persons seeking initial employment or re-employment will be required to complete an application with the Administrative Services Department. Applications will be maintained by the City of Midland's Administrative Services Office, City Hall, 300 N. Loraine. Referrals will be made from the City of Midland's applicant database. Suitable and eligible candidates will be selected according to the requirements the department places on the requisition; which will include education, skills, experience and any affirmative action requirements, etc. Candidates will be required to complete typing, data entry, aptitude and/or psychological testing when necessary.

Recruiting departments shall only interview those persons who have completed a City of Midland Application Form. No formal job offers are to be made at the time of the interview. If the interviewer determines that a candidate is acceptable, the Administrative Services office will extend an offer of employment, contingent upon the successful completion of background investigations, physical examinations and/or functional capacity screening, and drug/alcohol screening.

Section 8 Appointments

As indicated above, no person shall be employed prior to completion of the application and selection process described above. The recruiting department shall notify the Administrative Services office of the preferred candidate and the date they would like to have the candidate begin employment. The department shall schedule an appointment with the Administrative Services Department for the enrollment/orientation of all new employees.

If no candidate possessing the minimum qualifications is located or approved by the recruiting department, a lesser-qualified person in a lesser classification may fill the budgeted position.

Section 9 Physical Standards

a. Medical Examination Requirements. All new and former employees will undergo a prescribed medical and/or functional capacity examination, to be made by some officially designated medical authority. The purpose of the examination will be the determination and certification of physical fitness and ability to perform duties of the position to which appointment is being considered. Such examinations are to be made as near the effective date of employment as possible.

The Administrative Services Department has the responsibility of making appointments and arrangements for obtaining the examinations, and matters concerning the initiation and completion of the requirements should be taken up with the Administrative Services Department.

b. Exceptions. Physical standards and requirements may vary somewhat in accordance with the duties and working conditions as generally set forth in the specifications for various positions and also as to anticipated length of employment.

The Administrative Services Department will advise the examining medical officer regarding any special or unusual requirements of this nature. The opinion and recommendation of the examining medical officer will govern and determine the acceptability of any person for employment, and particular attention will be given to the present or future capacity of the prospective employee to perform the required duties of the position, with or without a reasonable accommodation.

The examining medical officer will complete and forward to the Administrative Services Department a complete report on the prescribed form indicating his specific recommendations as to the suitability of the person for employment in the position indicated.

Section 10 Age Requirements

Age limits are indicated in some specifications for various classes of positions, upon the basis of a bona fide occupational qualification or statutory requirement.

Within statutory limits and restrictions, minors may be considered for employment in positions of a non-hazardous nature. In all instances, the parents of such minors shall be required to execute a waiver and release form, which will be provided by the Administrative Services Department. Any questions relative to matters of this nature, which cannot be satisfactorily solved by the Administrative Services department, will be referred to the City Attorney, whose ruling shall be final and governing.

Section 11 Standards of Conduct

To an unusual extent, and in a peculiar sense, employees of a municipal organization are the "Good Will Ambassadors" of the City, and such status involves a degree of duty and obligation regarding public and private conduct which is not common to many other classes of employment. The attitude and deportment of City employees should at all times be such as to promote the good will and favorable attitude of the public toward City Administration and its program and policies.

Section 12 Types of Positions

a. Full-Time. Full-time employees are employees who have a required workweek equaling or exceeding the full-time, established workweek.

b. Part-Time. Part-time employees are hourly paid employees working less than 30 hours each week. Part-time employees who are not temporary employees and who work at least 1,000 hours each year shall participate in the Texas Municipal Retirement System.

Part-Time employees shall not be eligible for Paid Time Off, holidays, or participation in any benefit program, including group insurance programs and other special benefit programs, unless specifically provided for in these policies, or required by State or Federal Law.

c. Temporary. Temporary employees are employees (whether full-time or part-time) who are anticipated to be working for the City for a comparatively short or definitely limited duration, not exceeding 960 working hours within a 12 month period. If a temporary employee who has had no break of time in his service and who works a full eight-hour day and a full normal work week is transferred to permanent status, he will be eligible for all the benefits of a permanent employee retroactive to the employment date of his uninterrupted service.

Section 13 Disqualification for Employment

The Director of Administrative Services may reject any application that indicates on its face that the applicant does not possess the minimum qualifications required for the position, and he may exclude or deny certification to any application for, but not limited to, the following reasons:

a. He does not possess the bona fide occupational qualifications necessary for the performance of the duties of the position to which he seeks appointment.

b. He has intentionally made false statements in his application or in the examination or has practiced or attempted to practice deception or fraud in connection with such application.

c. He is receiving pension benefits under a retirement plan of the City.

d. He refuses to participate in a retirement system, insurance program or social security program as required in these rules under Chapter X.

e. Any other grounds set forth in Chapter VIII of these rules.

Section 14 Probation Periods

a. Every employee, including part-time, seasonal, and temporary employees, shall be on probation for a period of one year (twelve months), unless the City Manager otherwise specifies a shorter period. In no case shall a probation period be less than six months.

b. When the employee first reports for work, he shall be notified of the fact that he will be on probation for the required number of months. During that time, the supervisor shall observe his work with particular care, train, and advise the employee in the performance of his duties, and let him know whether he is progressing satisfactorily. The probationary period of an employee entering duty beforethe 16th of the month shall start on the first day of the same month and that of an employee startingon or after the 16th of the month shall start on the 16th day of the same month.

c. At the close of the probation period, the Department Manager may do one of the following:
1) End the employee's probation status and process any pay increase that may be allowed under the pay plan structure (normally 5% for classified, non-public safety employees);
2) extend the probation period for a period not to exceed three months and so notify theemployee and the Administrative Services Department; or
3) dismiss the employee.

d. Probationary employees are entitled to all benefits as set out in these rules, however, probationary employees may be discharged with or without specific reason and shall not be entitled to the appeal procedure set out in these rules for any adverse action to or termination during the probation period. Probationary employees shall be entitled to a "name clearing hearing" as outlined in Chapter VIII of these rules.

e. Employees promoted or transferred within the City service shall be on probation for their first twelve months. During that time the Department Manager may cancel the promotion or transfer and assign the employee to his former or a similar position. If the former position is no longer available, nor a similar position available, the employee may be discharged under this policy.

Section 15 City of Midland Drug and Alcohol Testing Policy

a. **Introduction**

The City of Midland recognizes that drug and alcohol abuse ranks as one of the major health problems in the world and adversely affects an employee's performance and safety on the job.

Therefore, it is necessary and required by law for the City to provide a drug free working environment for its employees.

It is the City of Midland's intention to comply fully with the DOT's (Department of Transportation) regulations governing drug and alcohol use and testing, and these requirements have been incorporated into this Policy. In the event federal and state regulations are amended, this Policy and the applicable terms, conditions and/or requirements of this Policy shall be deemed to have been amended automatically at that time in order to reflect and be consistent with said regulations.

b. **Definitions and Terms Used in This Policy**

1) **Safety-sensitive function -** for the purpose of this Policy, means any of the following:
   a) Driving or operating any City- owned motor driven equipment on a full time, part time or temporary basis;
   b) Inspecting, servicing, repairing, or conditioning motor equipment; or
   c) Loading or unloading, giving or receiving shipments being loaded or unloaded.

2) **DOT driver** - means any current or prospective employee who may be required to operate a motor vehicle having a gross vehicle weight rating in excess of 26,000 pounds in interstate or intrastate commerce, or driver of a motor vehicle used to transport hazardous materials in quantity that requires the vehicle to be placarded regardless of the vehicle's size.

3) **Safety sensitive worker** - means any current and/or prospective employee who falls into the category of:
   a) Performers of safety-sensitive functions as described in Section 1 above;
   b) Operators of personal vehicles which are used for city business;
   c) Public safety personnel (Police, Fire, etc.); or
   d) Public safety communications personnel.

4) **City business** - includes, but is not limited to, work performed on or in City property including a City vehicle, and work performed on or in a non-City vehicle being used for conducting City business.

5) **Refusing to be tested - means:**
   a) Failing to provide adequate urine specimen for a drug test without a valid medical explanation;
   b) Failing to provide adequate breath for an alcohol test without a valid medical explanation;
   c) Failing to submit to a test as directed or engaging in any conduct, which clearly obstructs the testing process.

   Examples of obstructing the testing process would include leaving the scene of an accident without a valid medical or safety reason; not showing up for a test at the time directed withouta valid excuse; tampering with a urine specimen; tampering with an alcohol testing device; failing to provide required identification; failing to cooperate with federal, state or local law enforcement officers at the scene.

6) **Positive alcohol breath test -** is when the alcohol concentration level registers 0.02 or greater.

c. **Prohibited Drug and Alcohol Use and Activities**

1) The City of Midland prohibits its employees from:
   a) Using or being under the influence of or possessing illegal drugs
   b) Using or being under the influence of legal drugs that are being used illegally;
   c) Using or being under the influence of legal drugs whose use can adversely affect the ability of the driver to perform his or her job safely.
   d) Selling, buying, soliciting to buy or sell, transporting, or possessing illegal drugs while on City time or property (except for approved law enforcement activities.)

2) Employees are prohibited from:
   a) Using alcohol intoxicants within 4 hours of reporting for work;
   b) Being under the influence of alcohol at any time while at work;
   c) Possessing any amount of alcohol intoxicants on City property or in City vehicles (except for approved law enforcement activities.);
   d) Testing positive for alcohol;
   e) Refusing to be tested for drugs and alcohol as defined in Section b.5 of this Policy;
   f) Violating any applicable federal and/or state requirement governing the use of drugs or alcohol (See Chapter VIII).

d. **Required Tests**

1) **Pre-employment/Transfer Testing**
Once a job offer has been made, the applicant will be required to submit to a drug and alcohol test as part of his post-job offer physical. This is to be completed before the applicant is allowed to

report for work. This also applies to an employee who transfers from a non-covered position into a position that is covered by this policy on or after January 1, 1995.

Prior to taking a pre-employment drug and alcohol test, the applicant will be asked to execute a general consent and release form to be tested for drugs and alcohol.

All employment offers made by the City of Midland to hire an applicant, or transfer an employee are conditioned upon the applicant:

a) Completing all of the “consent to be tested” forms;
b) Taking and passing the drug and alcohol test as described by this policy;
c) Signing the authorization form for the City of Midland to obtain all of the applicant’s past drug and alcohol test results, including any refusals to test, for the previous two years if required by DOT regulations.

Any applicant who refuses or fails to comply with this policy will not be considered qualified for the position for which they have applied and will also be subject to adverse action, up to and including termination.

2) **Post-accident Drug and Alcohol Testing**

Any employee who is involved in an accident while operating a City vehicle or a personal vehicle for City business must submit to a post-accident drug and alcohol test when:

a) It involves the death of a human being;
b) The employee receives a citation for a moving violation (or the employee’s actions are cited in the official Peace Officer’s report as a contributing factor) and either a person requires immediate medical attention away from the scene or one or more of the vehicles must be towed away from the scene because of disabling damage. The drug and alcohol test is to be conducted within 2 hours post-accident, or 8 hours in unusual circumstances.

An employee who is required to take a post-accident drug and alcohol test will be assigned to a non safety-sensitive function while awaiting the results of the tests.

An employee who refuses or fails to submit to a post-accident drug and alcohol test, who testspositive for drugs and/or alcohol, who unnecessarily delays reporting to the test site following an accident, or who fails to comply with the City's post accident testing procedures, will be subject to adverse action, up to and including termination.

3) **Reasonable Suspicion Testing**

An employee will be required to submit to a drug and alcohol test whenever the City has a reasonable suspicion to believe that an employee has used drugs and/or alcohol in violation of these policies. Reasonable suspicion shall be based on specific, objective facts and reasonable inferences drawn from those facts in light of the experience that the employee has engaged in Prohibited Conduct with regard to the use of drugs and/or alcohol, as described in Chapter VIII of the City of Midland Personnel Policies.

Reasonable suspicion exists when an employee’s behavior, appearance, speech or body odor indicates drug and/or alcohol use; such must be personally observed and documented by City of Midland supervisory personnel who have received training regarding the physical, behavioral, speech, and performance indicators of probably drug and/or alcohol use.
If an employee is required to submit to a drug and alcohol test based on a reasonable suspicion regarding his/her use of drugs and/or alcohol (“Reasonable Suspicion Test”), the employee shall be informed that he/she may:

a) Submit to a Reasonable Suspicion Test;
b) Appeal the matter to another supervisor (to begin at the Division Manager level) authorized to act as an Appeals Officer; or
c) Refuse the Reasonable Suspicion Test and be subject to Adverse Action (as defined in Chapter VIII) up to and including termination.

If the employee requests an appeal, a hearing shall be conducted immediately with the supervisor requesting the Reasonable Suspicion Test, the Appeals Officer, and the employee present.

The Appeals Officer shall determine whether there is a reasonable suspicion to believe that the employee engaged in Prohibited Conduct with regard to the use of drugs and/or alcohol. The Appeals Officer shall have the authority to either:

a) Order the employee to submit to a Reasonable Suspicion Test; or
b) Order that the allegations against the employee be dismissed.

An employee who is required or ordered to submit to a Reasonable Suspicion Test shall be escorted by supervisory personnel to a testing site.

An employee who is required or ordered to submit to a Reasonable Suspicion Test is prohibited from performing safety-sensitive functions while awaiting the results of the Reasonable Suspicion Test.

An employee who receives a positive Reasonable Suspicion Test, or fails to timely submit to a Reasonable Suspicion Test, shall be subject to Adverse Action up to and including termination.

4) **Random Testing**

DOT drivers and safety sensitive workers are subject to random drug and alcohol testing.

The City of Midland will conduct drug and alcohol testing on a random, unannounced basis at the beginning, during or at the end of a regularly scheduled work shift. The testing dates and times are unannounced and are with unpredictable frequency throughout the year. The number of random testsconducted will (at a minimum) equal the amount required by federal and/or state regulations for employees who possess a commercial driver's license and perform in that capacity. Non-DOT employee random testing amounts will be at the discretion of the City Manager or designee.

The City of Midland shall maintain two separate pools for random testing, one for DOT drivers andone for safety-sensitive workers as defined in this policy. Every employee in the selected job classes or organizational divisions will have an equal chance of being selected each and every time the selection is conducted. Appropriate safeguards will be present to ensure that the identity of individuals cannot be determined prior to or at the time of their selection.

Whenever an employee is randomly selected to be tested, he or she will be instructed to report to the collection site immediately and will be given written notice of the testing procedures.

Any employee who tests positive or who refuses to submit to a test is subject to adverse action up to and including termination.

5) **Return to Duty Testing**

Should the City of Midland elect to consider reinstating or rehiring an employee who violates this policy, he or she will be required to submit to and pass a drug and alcohol test before he or she will be permitted to return to duty. For a return to duty alcohol test, the alcohol level must be less than 0.02.

Before being permitted to return to work, the employee must execute a "last chance agreement" and submit to at least six unannounced follow-up tests during the next 12 months.

Any employee who refuses to comply with the return-to-duty requirements, or who tests positive will be considered medically unqualified to perform his or her job and subject to adverse action up to and including termination.

6) **Follow up Testing**

An employee who is returned to duty after a positive drug or alcohol test is required to submit tounannounced follow-up testing as one condition of continued employment.

At a minimum, the employee will be required to submit to at least six tests during the next 12 months following the employees' return to duty. The date and time of such tests will be at the discretion of a substance abuse professional or the Division and/or Department Manager and conducted at random, without prior notice being given to the employee.

An employee who tests positive or who refuses to submit to a test, will be considered unqualified to perform his or her job and subject to adverse action up to and including termination.

e. **Testing Methodology and Integrity**

1) To insure the integrity of each test, all specimen collection, analysis, and laboratory procedures for personnel subject to 49CFR Part 40 and § 552.001, Texas Commercial Driver's License Act shall be conducted in accordance with DOT procedural protocols and safeguards. This includes, among other things:

a) Procedures to ensure the correct identity of each employee at the time of testing;
b) Strict chain of custody procedure to ensure that the specimen is not tampered with by the collection agency;
c) The use of a trained breath alcohol technician (BAT) and DOT approved testing devices for conducting alcohol tests;
d) The use of a laboratory which has been certified by the Substance Abuse and Mental Health Services Administration, a division of the U.S. Department of Health and Human Services (DHHS/SAMSHA);
e) The confirmation of an initial positive drug screen by a second analysis using gas chromatography/mass spectrometry (GCMS);
f) The confirmation of an initial positive alcohol screen by a second analysis;
g) The City's appointment of a qualified Medical Review Officer (MRO) to review positive drug test results before they are reported to the City of Midland's designated representative.

2) The City of Midland will provide employees with written and/or oral instructions regarding the conduct of the specific test before each testing event,

3) Drug Testing Procedures
a) Drug testing will require the employee to provide a specimen of his or her urine.
b) At a minimum, urine specimens will be analyzed for the presence of the following drugs: marijuana, cocaine, opiates, amphetamines, and/or phencyclidine (PCP).
c) Personnel not subject to 49 CFR Part 40 and § 522.001, Texas Commercial Driver's License Act, may be subject to the pre-employment drug test via the rapid drug test method conducted by a trained technician. Positive test results will be confirmed with City's Department of Health and Human Services approved testing facility. All other drug tests will be administered using the split sample methodology required by DOT. Under this methodology, the employee must provide at least 45 ml (milliliters) in a specimen container. The specimen will then be divided, into two specimens. The bottle containing 30 ml will be analyzed as the employee's primary

specimen. The second bottle will be held by the laboratory, to be sent to another lab at the employees' request in the event that the primary specimen is verified as positive. In the event the primary specimen is verified as positive, the employee will be notified by the City's MRO or by the City's designated representative of the positive test and given the option to have the second bottle sent to a different laboratory for analysis. To exercise this option, the employee must advise the city's MRO or designated representative within 72 hours of being informed of the primary positive result. The employee will be responsible for the cost of having the second sample analyzed.

d) Except for the use of methadone and medications containing alcohol, nothing in this Policy prohibits the employee's use of a medication legally prescribed by a licensed physician who is familiar with the employee's medical history and specific job duties and who has advised the employee that the prescribed medications will not adversely affect the employee's ability to perform his job safely. Medications prescribed for someone other than the employee, however will not be considered lawfully used when taken by the employee under any circumstances.

e) A "positive" drug test may be declared "negative" by the MRO, if the employee can prove with clear and convincing evidence that the drug which was used was prescribed by a licensed physician who is familiar with the employee's medical history and specific job duties. The determination of this will be made by the MRO.

f) In the event that the test result of an employee's primary specimen is positive, the employee will be notified by the MRO. If the MRO is unable to reach the employee after making reasonable efforts, then the employee may be notified by the City's designated representative. The MRO or the City's designated representative shall advise the employee that he or she has 72 hours to request that the MRO send the secondary specimen to a second NIDA approved laboratory for analysis. The employee will be responsible for the cost of the second test.

g) Before an employee's test result will be confirmed positive for drugs, the employee will be given the opportunity to speak with the City's MRO and demonstrate that there was a legitimate medical explanation for the positive test result. If the MRO determines that a legitimate medical reason does exist, the test result will be reported to the City as a "negative," If the MRO determines that a legitimate medical reason does not exist, the test result will be reported to the City as a "confirmed positive."

4) Alcohol Testing Procedures

a) Alcohol testing under this Policy requires that an employee must provide a breath specimen for any test conducted by, or for the City of Midland.

b) In addition to this policy, an employee could be subject to alcohol testing conducted by a federal, state or local law enforcement officer following an accident. The employee must provide either a breath or blood specimen, as directed by the law enforcement officer.

c) Alcohol tests will be administered using a breath specimen, taken by a breath alcohol technician (BAT) using an approved breath-testing device (EBT).

d) Before being tested by the City, each employee will be positively identified through presentation of a photo-identification or by other means approved by the City of Midland and will be required to execute a "Breath Alcohol Test" form provided by the BAT. An employee who refuses to provide proper identification, provides false identification, refuses to execute the forms, or who otherwise refuses or fails to cooperate will be treated as though he or she had tested positive and will be subject to adverse action, up to and including termination.

e) Prior to each alcohol breath test, the BAT will instruct the employee on how the test will be performed.

f) To protect each employee, the BAT will open and attach to the testing devise an individually sealed mouthpiece in the employee's view. The employee will then be directed to blow forcefully into the breath-testing device until an adequate amount of breath has been maintained.

g) In the event that the employee is unable to provide an adequate amount of breath for the initial or confirmatory test after several attempts to do so, the employee will be required to submit to an evaluation by a licensed medical physician to determine whether a valid medical condition does exist. If the physician determines that a valid medical condition does exist, the test result

will be considered as "negative". If the physician determines that a valid medical condition does not exist, the test result will be considered a "confirmed positive".

h) In the event that an employee provides an adequate breath specimen and the initial test registers an alcohol concentration level that is less than .02, the test results will be reported, as "negative" and no additional testing will be required at that time.

i) In the event that an employee provides an adequate breath specimen and the initial test registers an alcohol concentration of .02 or greater, a second confirmatory will be performed. If the confirmatory breath test registers less than .02, the test results will be reported as a "negative." The confirmation breath test will be administered no sooner than 15 minutes from the initial breath test and no longer than 20 minutes from the initial breath test. During the wait period for the confirmation test, the employee is not allowed to put anything into his mouth and should be discouraged from belching or burping.

f. Test Results - Adverse Action

1) An employee who violates these prohibitions will be subject to restrictions mandated by the DOT as described in part d, item 6 of this Section and subject to adverse action as described in ChapterVIII of the City of Midland's Personnel Policies Manual, up to and including termination.

2) Any employee whose test result is confirmed positive for drugs will be considered unqualified to perform or continue to perform his or her functions safely and subject to adverse action up to and including termination. The employee could also be subject to civil and criminal penalties imposed by DOT.

3) An employee whose confirmatory test registers .02 or more but less than .04 will be removed from service and placed on leave for a minimum of 24 hours. The employee will be subject to return to dutytesting and follow up testing and may be subject to adverse action up to and including termination.

   An employee whose confirmatory test registers .04 or greater will be removed from service andplaced on leave for a minimum of 24 hours and referred to a Substance Abuse Professional (SAP). The employee may be subject to adverse action up to and including termination.

   Before consideration can be given to returning an employee to duty who has had a BAC (breath alcohol concentration) of .04 or greater, the employee must complete the rehabilitation program as prescribed by the SAP and be subject to return to duty and follow up testing.

g. Confidentiality

The results of all individual drug and alcohol tests will be kept in a secure location with controlled access.

All individual test results will be considered confidential. The release of an individual employee's results will only be given with an individual employee's written authorization, or as is otherwise required by DOT regulations, or by other applicable federal or state law.

Section 16 Harassment Policy and Procedures

a. Prohibited Conduct

The City of Midland prohibits harassment based on race, color, religion, sex, age, national origin, disability or any other basis protected by federal, state or local law. It is the policy of the City of Midland that all employees shall be able to enjoy a work environment free from all forms of discrimination and harassment, including sexual harassment. In general, harassment may be defined as unsolicited words or conduct which tend to annoy, alarm or abuse another person, or a course of vexatious comment or conduct that is known or ought reasonable to be known to be unwelcome. Additionally, sexual harassment is a form of misconduct that undermines the integrity of the

employment relationship. No employee, either male or female, should be subjected to unsolicited andunwelcome sexual overtures or conduct, either verbal or physical. Such actions will not be tolerated.

Each employee has the responsibility to maintain the workplace free of all types of harassment. In keeping with such, the City of Midland has the responsibility of providing this policy to all employees and assuring them that they are not to endure insulting, degrading, or exploitative sexual treatment.

Specifically, no person shall threaten or insinuate, either explicitly or implicitly, that an employee's refusal to submit to sexual advances will adversely affect the employee's employment, evaluation, wages, advancement, assigned duties, shifts, or any other condition of employment or career development. In addition, while on duty or while acting in an official capacity, no employee shall knowingly or intentionally engage in conduct which has the purpose or effect of substantially interfering with an individuals' work performance or creating an intimidated, hostile, or offensive work environment; or conduct which subjects a member of the public to sexual harassment.

b. **Examples of Prohibited Activity**

Examples of unlawful harassment based on race, color, religion, sex, age, national origin, disability, or other protected basis includes, but is not limited to the following:

1) Verbal actions such as slurs, derogatory comments or jokes, epithets or unwanted sexual invitations, advances, or comments;
2) Physical actions such as unwanted touching, assault, blocking another's way, or interference with work;
3) Visual conduct such as sexually-oriented, pornographic and/or derogatory photographs, posters, drawings, cartoons, gestures, e-mail, or Internet sites;
4) Threats or demands to submit to sexual advances or requests as a condition of continued employment, offers of employment benefits in return for sexual favors, or to avoid some other negative employment action; and
5) Retaliation against any employee for making an allegation of harassment or for participating in such an investigation.

Sexual harassment is defined as unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature that affects an employee in any one of the following ways:

1) Submission to such conduct is made explicitly or implicitly a term or condition of a person's employment;
2) Submission to or rejection of such conduct by an individual is used as a basis for employment decisions affecting that individual; or
3) Such conduct has the purpose or effect of unreasonably interfering with an individual's work performance or creating an intimidating, hostile, or offensive work environment.

c. **Procedures**

Any employee who believes that he or she has been subjected to general harassment as defined above should avail themselves of the grievance procedures outlined in Chapter IX of these policies. Any employee (or member of the public) who believes that he or she is or has been subject to sexual harassment by a City employee should report the alleged charge immediately, in accordance with the following procedures. (All information will be held in strictest confidence and will be disclosed only ona need to know basis to investigate and resolve the matter).

1) The individual alleging harassment may report the incident to their immediate supervisor, their Department Manager, the City Manager's Office or the Administrative Services Department. If an employee's immediate supervisor is involved in the alleged harassment, it is unnecessary to make a report to that individual. If accusations are made to any other person or if supervisory

personnel otherwise become aware of suspected acts of harassment, the matter should be directed immediatelyto the Administrative Services Department. The supervisor or administrator contacted will offer the individual alleging harassment the opportunity to complete a written statement specifically outlining the complaint. If the complainant does not put the complaint in writing, the person contacted still must notify the Administrative Services Department. Employees are encouraged to promptly report the alleged harassment within three (3) calendar days of the offense. The City of Midland takes all complaints seriously and handles them as promptly, thoroughly, and confidently as possible.

2) Once a written complaint is filed, the Administrative Services Department will conduct an investigation within 48 hours of their receipt of the complaint (excluding weekends and holidays).

3) If corrective action (other than adverse action as outlined in Chapter VIII of these policies) is deemed appropriate as a result of the investigation, the City Manager's Office may authorize the Administrative Services Department or the Department Manager to enforce said action as needed. Any adverse action recommended as a result of the investigation will be subject to approval by the Department Manager and will be subject to the appeals procedure outlined in Chapter VIII of these policies. If allegations prove not to constitute harassment, or the evidence provided does not substantiate the claim, the accused employee will not be subject to any adverse action. Employees who register complaints in good faith will not be subject to any retaliation. Employees who willfully register false accusations will face adverse action, up to and including termination.

Section 17 Workplace Violence Policy

The City of Midland is committed to maintaining a safe work environment, and has a zero tolerance policyfor violence in the workplace. “Workplace violence” is defined to include:

a. Physically aggressive, violent, or threatening behavior, such as attempts to instill fear in others or intimidation;
b. Verbal or physical threats of any sort;
c. Any other conduct that suggests a tendency toward violent behavior. Such behavior includesbut is not limited to, excessive arguing, profanity, threats of sabotage of City property, belligerent speech or demonstrated pattern of insubordination, and refusal to follow City policies and procedures;
d. Causing physical damage to City facilities or defacing property; or
e. With the exception of authorized City personnel as described in Chapter II, carrying firearms or weapons of any type or kind while conducting City business in or on City buildings and property, other assigned work locations, and City vehicles and equipment.

If any employee becomes aware of or observes any of the above-referenced behavior or actions by a co-worker, consultant, customer, third party vendor, visitor, or any other party, he or she should notify his/her supervisor, any member of management, and/or the Administrative Services Department immediately.

All reports of workplace violence will be taken seriously. To the extent possible, the identity of the reporting individual(s) will be kept confidential. The City will not tolerate retaliation in any form against anemployee who makes a report of workplace violence.

Any employee found to be in violation of this policy will be subject to adverse action up to and including termination.

Chapter V

Attendance and Leaves

Section 1 Hours of Work

All offices of the City, except those for which special regulations are required, shall be kept open continuously from 8:00 a.m., until 12:00 p.m. (noon) and from 1:00 p.m. until 5:00 p.m., Monday through Friday.

Section 2 Regular Working Day

For the purpose of these policies and all the following sections which deal with attendance and leave, a "regular working day" or an "accrued day" of leave shall be 8 hours for all full-time employees; provided, however, that for the Fire Department's 56-hour shift personnel ("Fire Department Shift Personnel"), a "regular working day" or "accrued day" shall be 12 hours. No employee may receive additional compensation by working during his or her leave without the express approval of the City Manager. Temporary employees will earn no Paid Time Off or other leaves except as otherwise expressly stated in these policies.

Section 3 Work Week

The work week will be determined by the needs of the City and set by the City Manager with due regard for certain State statutes.

Section 4 Overtime

Employees may be required to work overtime when necessary, in order to maintain the proper City services. All employees required to work overtime shall be compensated at rates set by the City Manager and pursuant to law. Many employee classifications are eligible for compensatory time off rather than paid overtime. No more than forty (40) hours of compensatory time may be accumulated.

Section 5 Attendance

An employee shall be in attendance at his or her worksite in accordance with the rules regarding hours of work, holidays, and leaves as determined by the employee's department. Excessive tardiness, neglect of duties, or unauthorized absences will be grounds for dismissal. All departments shall keep daily attendance records of employees. Any employee absent from work without notice for three (3) consecutive days will be considered as having abandoned the job. Such abandonment shall be considered a voluntary resignation from employment, and the City will process such separation of employment as a voluntary resignation.

Section 6 Inclement Weather / Emergency Closure

The City of Midland offices and activities will remain open and in operation, during established working hours unless the City Manager declares the offices, excluding emergency services, officially closed due to inclement weather or emergency closure due to unusual circumstances.

a. **Non-Sworn Employees.** For purposes of this Section, "non-sworn employees" are all City employees except peace officers and fire protection personnel.

b. **Reporting to Work.** If the City has not been officially closed, employees shall make a reasonable effort to report to work. An employee who is unable to report to work due to inclement weather shall notify the employee's supervisor in accordance with these policies and applicable departmental rules

and procedures. An employee who fails to so notify the employee's supervisor may be subject to adverse action, up to and including dismissal.

c. Compensation for Inclement Weather / Emergency Closing Absences.

Compensation for absences will be as follows:

1) **Official Closing.** If the City Manager closes a facility, a non-exempt non-sworn employee designated by the employee's Department Manager may work remotely to ensure department operations continue during the closure period. An employee who works remotely shall be paid for hours worked in addition to receiving the "City Closed" accrual for their scheduled shift. Hours worked remotely count as hours worked in determining overtime in accordance with the Fair Labor Standards Act. An employee who does not work remotely shall be paid for the employee's scheduled shift. Such "City Closed" hours shall not count as hours worked for the purpose of overtime. If an employee is on Paid Time Off or any other leave during the declared times of closing, the appropriate leave compensation will apply.

2) **No Official Closing.** If the City Manager does not close a facility and an employee is unable to report to work due to inclement weather, compensation will be handled in the following manner:

    a) **Non-exempt Employees.** A non-exempt employee who misses work hours due to inclement weather may use accrued vacation time or compensatory leave. If an employee has no paid leave available, the employee may be granted authorized leave without pay.

    b) **Exempt Employees.** An exempt employee who misses work hours due to inclement weather or other emergencies may use accrued vacation time if the absence is for a full workday.

3) **Delay Start / Early Closing.** If the City Manager delays the opening of a facility or closes a facility early due to inclement weather, an employee who reported for work will be paid "City Closed" for the remainder of the employee's normal shift. Employees who remain as part of a skeleton crew will be compensated for all hours worked in addition to receiving the "City Closed" accrual for hours the City was closed due to the delayed opening or early closure.

4) **Critical Service Personnel.** Employees designated by their Department Manager to provide critical services shall report to work on-site as provided by their department rules during an official closing. Non-exempt non-sworn employees who are required to report to work hereunder shall be paid for all hours worked in addition to receiving the "City Closed" accrual for their scheduled shift. Such personnel may include, but are not limited to, from the following:
    a) Airport Operations Personnel;
    b) Utilities Personnel;
    c) Transportation Personnel;
    d) Traffic Operations Personnel; and
    e) Solid Waste Personnel.

Section 7 Holidays

Municipal offices with the exception of those in emergency categories, shall be closed on the following legal holidays: New Year's Day, Martin Luther King Day, Presidents Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Veterans Day, Thanksgiving Day, Friday after Thanksgiving, Christmas Eve Day, and Christmas Day. Firefighters shall be granted one (1) floating holiday designated as the "September 11th Floating Holiday." Non-exempt employees' holiday time will be

considered actual hours worked to determine eligibility for overtime.

Holidays falling on Sunday or Saturday. If a holiday falls on Sunday, the following Monday shall be observed, and if a holiday falls on Saturday, the preceding Friday shall be observed. The City Manager may designate any additional holidays which he feels may be justified in particular situations after giving due regard to the need for City services.

Eligibility for Pay for Holidays. An employee shall be eligible for holiday pay provided that the employee worked the last scheduled working day before and the next scheduled working day following the holiday or is otherwise on approved leave (either paid or unpaid) for those same days. In approving leave around a holiday, directors and division managers must ensure that adequate personnel are on duty to conduct departmental business.

Section 8 Vacation / Sick Leaves

a. Vacation
Effective October 1, 2023, vacation leave accruals shall be discontinued. The final accrual of vacation leave will be through the pay period ending September 30, 2023 (pay date of October 13, 2023). All vacation leave balances shall be converted to Paid Time Off on a one-to-one basis.

b. Sick Leave
Effective October 1, 2023, sick leave accruals will be discontinued. The final accrual of sick leave will be through the pay period ending September 30, 2023 (pay date of October 13, 2023). All sick leave balances shall be converted to Paid Time Off on a one-to-one basis.

c. Council Appointees, Other Employees, and Department Managers
Vacation and sick leave provided in any Council Appointee's, Other Employee's, or Department Manager's employment agreement shall be replaced with Paid Time Off.

Section 9 Paid Time Off ("PTO")

Effective October 1, 2023, the City will convert its Vacation and Sick Leave programs into a single Paid Time Off ("PTO") program. PTO is a comprehensive paid time off program that can be used for any type of time off from work that previously would have been covered under the Vacation and Sick Leave policies but does not include time taken under any other City's paid time off policies. In accordance with Texas Local Government Code 142.0013, PTO is equivalent to vacation time for fire protection and peace officer personnel.

Employees may not receive additional compensation by working during their PTO leave without the express approval of the City Manager. Temporary employees are not eligible for PTO.

a. PTO Accrual
All full-time employees are eligible to accrue PTO effective October 1, 2023 (Pay Date October 27, 2023) at the accrual rates listed below:

Full-Time Employees (based on a 40-hour work week)				
Years of Service	**Accrue Annual (Days)**	**Accrue/Paycheck 26 pays (Hours)**	**Maximum Days**	**Maximum Hours**
Upon hire	5			
Less than 1 year	20	6.1539		
At least 1 but less than 4 years	27	8.3077	118	944
At least 4 but less than 9 years	29	8.9231	128	1024
At least 9 but less than 15 years	31	9.5385	133	1064

At least 15 years, but not hired prior to June 1, 1990	33	10.1539	139	1112
Hired prior to June 1, 1990	44	13.5385	145	1160
Fire Department Shift Personnel (based on a 56-hour workweek)				
Years of Service	**Accrue Annual (Days)**	**Accrue/Paycheck 26 pays (Hours)**	**Maximum Days**	**Maximum Hours**
Upon hire	5			
Less than 1 year	20	9.2308		
At least 1 but less than 4 years	27	12.4616	118	1416
At least 4 but less than 9 years	29	13.3847	128	1536
At least 9 but less than 15 years	31	14.3077	133	1596
At least 15 years, but not hired prior to June 1, 1990	33	15.2308	139	1668
Hired prior to June 1, 1990	44	20.3077	145	1740

b. Requesting PTO

PTO may be used for various reasons, including personal days, vacations, and illness or injury (non-work related). PTO will be paid at the employee's regular rate of pay earned at the time the PTO is used. PTO does not count as hours worked for the purpose of overtime under the Fair Labor Standards Act (FLSA).

An employee shall schedule PTO in advance with the employee's supervisor or Department Manager for approval unless the employee uses it for an unexpected illness or injury. In the event of an unexpected illness or injury, the employee shall notify the employee's immediate supervisor prior to the time set for the employee to begin the employee's shift. If an employee takes PTO without prior approval for medical or emergency reasons, the City reserves the right to require medical documentation or other documentation of the reasons given for the unapproved PTO. If the employee is unable to contact the employee's supervisor, the employee may notify the Office of Administrative Services. In general, employees should seek approval for planned absences at least five (5) days in advance. Employees may not use more than ten (10) days of PTO days at one time without approval from the employee's Department Manager. Depending on staffing and departmental needs, PTO requests will be granted to the extent feasible.

c. Payment of PTO for Terminating Employees

A regular employee, Department Manager, Other Employee, or Council Appointee (unless the employee's employment agreement states otherwise) who terminates employment with the City, or whose employment is terminated by the City, shall be paid in a lump sum for unused PTO as listed below:

Years of Service	Payout % of Accrual
Upon hire	0.00%
Less than 1 year	0.00%
At least 1 but less than 4 years	70.00%
At least 4 but less than 9 years	73.00%
At least 9 but less than 15 years	76.00%
At least 15 years, but not hired prior to June 1, 1990	79.00%
Hired prior to June 1, 1990	82.00%

d. Payment of PTO for Retiring Employees

Retiring employees may request a maximum of 250 hours of the PTO payment listed in Subsection c above to be deposited into a Retiree Medical Reimbursement Account, which may be used to reimburse out-of-pocket medical expenses on a tax-free basis as authorized by the United States Internal Revenue Code. This provision shall not apply to any employee who is not eligible to retire at the time of separation of employment or whose employment is terminated under the provisions of Chapter VIII, "Adverse Action," or Chapter XII, "Employment At Will" of the City of Midland Personnel Policies.

For the avoidance of doubt, this Subsection applies only to the following employees:

i. An active employee who has completed a minimum of twenty (20) consecutive years of service prior to retirement;
ii. An active employee who is at least sixty (60) years of age and has completed a minimum of five (5) consecutive years of service with the City prior to retirement; or
iii. An active employee who is eligible for retirement through the Texas Municipal Retirement System or through the Midland Fireman's Relief and Retirement Fund.

Section 10 PTO Bank for Sick Leave

Beginning October 1, 2023, a Paid Time Off Bank ("PTO Bank") for sick leave shall be established and maintained by the City.

a. **Membership**

Membership in the PTO Bank shall be voluntary on the part of employees.

b. **Eligibility**

Any non-probationary, full-time employee with one full year of continuous service with the City of Midland is eligible to join.

c. **Enrollment**

Any eligible employee, within thirty (30) days following the completion of his or her first year of employment, may enroll in the PTO Bank by completing a membership application and donating two (2) days of the employee's accumulated PTO leave to the PTO Bank. In addition, any eligible employee may enroll during the open enrollment period. Open enrollment shall occur annually during the month of September, with the PTO donation being deducted from the 2nd paycheck of October. For the purposes of this policy, a PTO Bank Day is defined as 8 hours for regular employees and 12 hours for Fire Department Shift Personnel.

Any employee who was previously enrolled in the City's Sick Leave Bank shall be enrolled in the PTO Bank with no further donation or other action on the employee's part being necessary.

d. **Procedures**

1) The Administrative Services Department shall govern the operations of the PTO Bank.

2) A new employee must enroll within thirty (30) calendar days following the first-anniversary of his or her date of employment. Otherwise, participant enrollment will be held annually during the open enrollment period during the month of September.

3) An employee shall exhaust all of the employee's accrued PTO before the employee may utilize the PTO Bank.

4) An employee must be suffering from a serious health condition that makes the employee unable to perform the functions of the employee's job. A serious health condition is an illness, injury, impairment, or physical or mental condition that involves either inpatient care or continuing

treatment by a health care provider, including but not limited to a stroke, a heart attack, cancer, or injuries sustained in an automobile accident.

5) A physician's statement diagnosing the condition in detail and indicating the duration of treatment is required with the Request for PTO Bank Days.

6) Employees covered under a workers' compensation program may not utilize the PTO Bank for those conditions covered under workers' compensation.

7) Additional accrual donations may be required in the event the current PTO Bank balance falls below an acceptable level.

8) The total lifetime benefit under the PTO Bank program shall not exceed ninety (90) working days per individual.

e. **Application Process**

1) Should a member of the PTO Bank incur a long-term, serious illness or injury necessitating additional days after all of the member's accumulated PTO leave days have been used, the member may submit a Request for PTO Bank Days.

2) A member who requests days from the PTO Bank shall submit to the Office of Administrative Services Employee Benefits Division the following information within thirty (30) calendar days of the date that they have exhausted their accrued PTO leave days:

(i) A completed Request for PTO Bank Days form, which is available in the Employee Benefits Office; or
(ii) A detailed statement from a physician verifying the illness or injury.

3) Forms for the above purpose have been prepared and are available from the Employee Benefits Office.

4) The Employee Benefits Division will not consider a request for days from the PTO that does not conform to the requirements of this subsection.

5) If a member is unable to file a Request for PTO Bank Days, the immediate supervisor or Department Manager may initiate the request at the request of the member's family.

6) An applicant may be required to undergo a medical review by a second-opinion physician of the City's choice at any time at the expense of the City.

f. **Regulations**

1) Additional accrual donations may be assessed in the event the current PTO Bank balances falls below an acceptable level.
2) The Employee Benefits Division will review and act on all requests within thirty (30) working days of receipt of a Request for PTO Bank Days and necessary documents.
3) If a member is not satisfied with the Employee Benefits Division's decision regarding a Request for PTO Bank Days, the member may request a conference with the City Manager or the City Manager's designee by filing a written Request for Review with the Administrative Services Director within ten (10) business days of the member's receipt of the Employee Benefits Division's decision. The written Request for Review shall set forth contain all the relevant facts as well as the specific grounds for the review of the decision.
   (i) Upon receipt of a Request for Review, the City Manager or the City Manager's designee shall:
      1. schedule a conference to discuss the request; or

2. take action that addresses the matter described in the Request for Review to the reasonable satisfaction of the member.

(ii) Following a conference to discuss the request, the City Manager or the City Manager's designee shall provide the member a written decision regarding the request within ten (10) business days.

(iii) The decision or action taken by the City Manager or the City Manager's designee shall be the final decision of the City regarding the Request for Review.

Section 11 PTO Buy-Back

An eligible employee may elect to participate in the Paid Time Off Buy-Back ("PTO Buy-Back") program under which the City may buy back a portion of the employee's unused PTO leave as described in this Section.

a. For purposes of this Section, an eligible employee is a full-time employee who has completed at least one (1) year of continuous service before the beginning of the fiscal year (October 1st) during which the employee elects to participate in the PTO Buy-Back Program.

b. An eligible employee who elects to participate in the PTO Buy-Back program shall be subject to the following limits:

1) If the employee is not an employee of the Fire Department, the employee may elect for the City to buy back 40 hours of unused PTO leave per buy-back, with a maximum of two (2) buy-backs (80 hours) per fiscal year.

2) If the employee is an employee of the Fire Department who is not Fire Department Shift Personnel, the employee may elect for the City to buy back 20 hours of unused PTO leave per buy-back, with a maximum of four (4) buy-backs (80 hours) per fiscal year.

3) If the employee is Fire Department Shift Personnel, the employee may elect for the City to buy back 28 hours of unused PTO leave per buy-back, with a maximum of four (4) buy-backs (112) hours) per fiscal year.

4) The employee must have a minimum of three (3) days of PTO leave remaining after a buy-back. There will be no incremental buy-back.

c. An employee who elects to participate in the PTO Buy-Back program must complete and return the PTO Buy-Back form to the Administrative Services Department no less than 30 days prior to the scheduled buy-back.

d. An employee who elected to participate in the PTO Buy-Back and whose employment was terminated prior to receiving the PTO Buy-Back payment shall be subject to Section 9.c above and shall not receive the PTO Buy-Back payment.

e. A PTO Buy-Back payment will be an additional amount added to the employee's regular paycheck scheduled for the date(s) selected. Upon a PTO Buy-Back payment being made, the number of hours that were bought back will be deducted from the employee's accrued PTO leave. PTO buy-back is subject to deductions for retirement plan contributions under the Federal Insurance Contributions Act and all other applicable deductions.

f. The PTO Buy-Back program shall be subject to the availability of funds.

Section 12 Birthday Leave

Full time employees are eligible for one (1) day of paid birthday leave annually. Birthday leave shall be taken during the employee's birthday month unless the employee's Department Manager makes an exception. Exceptions may be made only after the employee's birthday and prior to December 31st.

An employee must request birthday leave from the employee's supervisor or Department Manager at least one (1) week prior to taking birthday leave.

An employee's unused birthday leave will not carry over to the next year, and an employee will not receive payment for unused birthday leave upon separation of employment.

Section 13 Bereavement Leave

All employees may be granted bereavement leave with pay for a period not to exceed three (3) days unless a longer period of time (not to exceed an additional two (2) days) is approved by the City Manager in case of death of a grandparent, grandchild or other member of their immediate family, which shall consist of the father, mother, son or daughter, husband, wife, brother or sister of the employee's spouse or the employee. Leave up to ½ day may be granted to an employee by his immediate supervisor to attend funerals for other than immediate family members. This leave shall not be charged against PTO or other accrued leave.

Part-time, seasonal, and temporary employees may be granted leave of absence without pay in such cases.

Section 14 Family/Medical Leave Act (FMLA)

The City of Midland complies with the Family and Medical Leave Act (FMLA) and will grant up to 12 weeks of leave during a 12-month period to eligible employees or up to 26 weeks of military caregiver leave.

The purpose of this policy is to provide employees with a general description of their FMLA rights. In the event of any conflict between this policy and the applicable law, employees will be afforded all rights required by law. If you have any questions, concerns, or disputes with this policy, please contact the manager of employee benefits.

a. **Definitions**

As used in this Section:

1) **Covered active duty** means (1) with respect to a member of a regular component of the Armed Forces, duty during deployment of the member with the Armed Forces to a foreign country, or (2) with respect to a member of the Reserve components of the Armed Forces, duty during the deployment of the member with the Armed Forces to a foreign country under a federal call or order to active duty in support of a contingency operation in accordance with 29 CFR 825.102.
2) **Covered service member** is a current member of the Armed Forces, including a member of the National Guard or Reserves, who is receiving medical treatment, recuperation, or therapy or is in outpatient status or on the temporary disability retired list for a serious injury or illness.
3) **Next of kin of a covered service member** is the nearest blood relative, other than the covered service member's spouse, parent, or child, in the following order of priority: blood relatives who have been granted legal custody of the covered service member by court decree or statutory provisions, brothers and sisters, grandparents, aunts and uncles, and first cousins, unless the covered service member has specifically designated in writing another blood relative as his or her nearest blood relative for purposes of military caregiver leave under the FMLA.
4) **Parent** means a biological, adoptive, step or foster father or mother, or any other individual who stood in loco parentis to the employee when the employee was a child. This term does not include parents "in law."
5) **Qualifying exigency** includes short-notice deployment, military events and activities, childcare, and school activities, financial and legal arrangements, counseling, rest and recuperation, post-deployment activities, and additional activities that arise out of active duty, provided that the employer and employee agree, including the agreement on timing and duration of the leave.
6) **Serious health condition** means an illness, injury, impairment, or physical or mental condition that involves inpatient care or continuing treatment by a health care provider. This can include conditions with short-term, chronic, long-term or permanent periods of incapacity.
7) **Serious injury or illness** is one that is incurred by a current member of the Armed Forces in the line of duty on active duty that may cause the member to be medically unfit to perform the duties of his or her office, grade, rank, or rating. A serious injury or illness also includes injuries

or illnesses that existed before the member's active duty and that were aggravated by service in the line of duty on active duty.

8) **Spouse** means (1) a husband or wife as defined or recognized in the state where the individual was married or (2) a husband or wife in a marriage that was validly entered into outside of the United States if the marriage could have been entered into in at least one state.

b. **Eligibility**

To be eligible for leave under this policy, employees must meet **all** of the following requirements:

1) Have worked at least twelve (12) months for the City of Midland.
2) Have worked at least 1,250 hours for the City of Midland over the twelve (12) months preceding the date when the leave would commence.

The 12 months of employment do not have to be consecutive. All periods of absence from work due to or necessitated by service in the Armed Forces are counted as hours worked in determining eligibility.

c. **Reasons for Leave**

To qualify as FMLA leave under this policy, the leave must be for one of the following reasons:

1) The birth of a child or placement of a child with the employee for adoption or foster care.
2) To care for a spouse, child or parent who has a serious health condition.
3) For a serious health condition that makes the employee unable to perform the essential functions of his or her job.
4) For any qualifying exigency arising out of the fact that a spouse, child or parent is a member of the Armed Forces on covered active duty or on call to covered active duty status.
5) To care for a covered service member with a serious injury or illness.

d. **Amount of Leave**

An eligible employee may take up to 12 weeks of FMLA leave during any 12-month period. The City will measure the 12-month period as a rolling 12-month period measured backward from the date an employee uses any leave under this policy. Each time an employee takes leave, the City will compute the amount of leave the employee has taken under this policy in the last 12 months and subtract it from the 12 weeks of available FMLA leave, and the balance remaining is the amount the employee is entitled to take at that time.

An eligible employee may take up to 26 weeks of FMLA military caregiver leave during a single 12-month period. The City will measure the 12-month period as a rolling 12-month period measured forward. FMLA leave already taken for other FMLA circumstances will be deducted from the total of 26 weeks available.

Eligible spouses who both work for the City may only take a combined total of 12 weeks of FMLA leave for the birth of a child, adoption or placement of a child in foster care, or to care for a parent (but not a parent "in-law") with a serious health condition. Both may only take a combined total of 26 weeks of leave to care for a covered service member (if each spouse is a parent, spouse, child or next of kin of the covered service member).

e. **Intermittent Leave or a Reduced Work Schedule**

Employees may take FMLA leave in one consecutive block of time, may take FMLA leave intermittently (e.g., take a day periodically when needed over the year) or, under certain circumstances, may take FMLA leave to reduce the workweek or workday, resulting in a reduced hour schedule. In all cases, the leave may not exceed a total of 12 workweeks (or 26 workweeks to care for a covered service member) in a 12-month period.

The City may temporarily transfer an employee to an available alternative position with equivalent pay and benefits if the alternative position would better accommodate the intermittent or reduced schedule in instances when leave for the employee or employee's family member is foreseeable

and for planned medical treatment, including recovery from a serious health condition or to care for a child after birth or placement for adoption or foster care.

For the birth, adoption, or foster care of a child, the City and the employee shall mutually agree to the schedule before the employee may take the leave intermittently or work a reduced-hour schedule. Leave for birth, adoption, or foster care of a child must be taken within one year of the birth or placement of the child.

When leave is needed for planned medical treatment, the employee shall make a reasonable effort to schedule treatment so as not to unduly disrupt the City's operations.

f. **Employee Notice Requirement**
An employee who takes FMLA leave must provide verbal or written notice of the need for FMLA leave to the employee's Department Manager or the manager of employee benefits.

When the need for FMLA leave is foreseeable, the employee shall provide the City with at least 30 days' notice. When an employee becomes aware of a need for FMLA leave fewer than 30 days in advance, the employee shall provide notice of the need for the leave either the same day the need for leave is discovered or the next business day. When the need for FMLA leave is not foreseeable, the employee shall comply with the City's usual and customary notice and procedural requirements for requesting leave, absent unusual circumstances.

Within five business days after an employee has provided this notice, the manager of employee benefits, or the manager's designee, will complete and provide the employee with a Notice of Eligibility and Rights and request a medical certification or other supporting documentation as necessary.

g. **Designation of FMLA Leave**
Within five business days after an employee has submitted the required medical certification or other documentation, the manager of employee benefits, or the manager's designee, will complete and provide the employee with a written response to the employee's request for FMLA leave using the FMLA Designation Notice.

h. **Employee Status and Benefits During Leave**
The City will continue an employee's health benefits during the FMLA leave period at the same level and under the same conditions as if the employee was continuously at work.

While on paid leave, the City will continue to make payroll deductions to collect the employee's share of insurance premiums. While on unpaid leave, the employee shall continue to make this payment, either in person, by mail, or by prearranged payment agreement. The payment must be received by the 15th day of each month. If the payment is more than 30 days late, the employee's healthcare coverage may be dropped for the duration of the leave.

The City will provide 15 days' notification prior to the employee's loss of coverage.

If the employee chooses not to return to work for reasons other than a continued serious health condition of the employee or the employee's family member or a circumstance beyond the employee's control, the City will require the employee to reimburse the City the amount it paid for the employee's health insurance premium during the FMLA leave period.

If the employee contributes to a life insurance or disability plan, the City will continue making payroll deductions while the employee is on paid leave. While the employee is on unpaid leave, the employee may request the continuation of such benefits and pay his or her portion of the premiums, or the City may elect to maintain such benefits during the leave and pay the employee's share of the premium payments. If the employee does not continue these payments and the City does not elect to maintain such coverage, the City will discontinue coverage during the leave. If

the City maintains coverage, the City may recover the costs incurred for paying the employee's share of any premiums, whether or not the employee returns to work.

i. **Employee Status After Leave**
An employee who takes leave under this policy may be asked to provide a fitness for duty clearance from a health care provider. This requirement will be included in the City's response to the FMLA request. Generally, an employee who takes FMLA leave will be able to return to the same position or a position with equivalent status, pay, benefits, and other employment terms. The position will be the same or one that is virtually identical in terms of pay, benefits, and working conditions. The City may choose to exempt certain key employees from this requirement and not return them to the same or similar position when doing so will cause substantial and grievous economic injury to business operations. Key employees will be given written notice at the time FMLA leave is requested of his or her status as a key employee.

j. **Use of Paid and Unpaid Leave**
An employee who is taking FMLA leave because of the employee's own serious health condition or the serious health condition of a family member must use all PTO and any other accrued leaves prior to being eligible for unpaid leave. PTO shall be exhausted prior to other accrued leave. Paid leaves run concurrently with FMLA leave if the reason for the FMLA leave is covered by the established policies.

Workers' compensation leave (to the extent that it qualifies) and injury leave will be designated as FMLA leave and will run concurrently with FMLA.

An employee who is taking leave for the adoption or foster care of a child must use all PTO and other accrued leaves prior to being eligible for unpaid leave.

An employee who is using FMLA leave for a qualifying exigency must use all PTO and other accrued leaves prior to being eligible for unpaid leave. An employee using FMLA leave to care for a covered service member must also use all PTO and other accrued leaves prior to being eligible for unpaid leave.

k. **Intent to Return to Work from FMLA Leave**
On a basis that does not discriminate against employees on FMLA leave, the City may require an employee on FMLA leave to report periodically on the employee's status and intent to return to work.

l. **Coordination of FMLA Leave with Other Leave Policies**
The FMLA leave policies do not affect any federal, state, or local law prohibiting discrimination or supersede any state or local law that provides greater family or medical leave rights. For additional information concerning leave entitlements and obligations that might arise when FMLA leave is either not available or exhausted, please consult the City's other leave policies or contact the manager of employee benefits.

Section 15 Military Leave

In time of war or national emergency, those employees of the City of Midland who are members of a retirement system or participating in a retirement system sanctioned by the City, or who are holding permanent positions shall be entitled to military leave or absence without pay if called to duty with the Armed Forces through the process of selective service or membership in reserve components of the Armed Forces. The City also acknowledges that time spent by employees on military leave often is relevant or complementary to their workplace responsibilities and that the skills, leadership, discipline, and teamwork experience that employees acquire during military service can prove valuable on the job.

a. Accrual Leave Credit. Credit for PTO or other accrual leaves shall accrue only during military leave allowance described below. However, employees may be allowed to draw pay from their PTO, or other accrued leaves during an approved military leave.

b. Military Leave Allowance. In accordance with Section 437.202, Texas Government Code:

1) A person who is an officer or employee of the City and who is a member of the Texas military forces, a reserve component of the Armed Forces, or a member of a state or federally authorized urban search and rescue team is entitled to a paid leave of absence from the person's duties on a day on which the person is engaged in authorized training or duty ordered or authorized by proper authority for not more than 15 workdays in a fiscal year. During a leave of absence, the person may not be subjected to loss of time, efficiency rating, personal time, or PTO.

2) An employee of the City who is a member of the Texas military forces, a reserve component of the armed forces, or a member of a state or federally authorized urban search and rescue team and who is ordered to duty by proper authority is entitled, when relieved from duty, to be restored to the position that the employee held when ordered to duty.

c. Retirement System Credits. Employees who leave their deposits with the retirement system while on military leave shall retain their membership in the retirement system. The period spent by such employees on military leave shall count toward membership service but shall not increase the retirement benefits due to the employee unless he makes retirement deposits to cover all or a portion of the time spent on military leave. If the employee does make such retirement contributions after returning from military leave, the City shall match such deposits of the employee. Employees desiring to withdraw their retirement deposits from the system when they enter upon military leave may do so. However, such action means that these employees will lose retirement credit for the years they belonged to the retirement system prior to beginning military leave. Notwithstanding the foregoing, current rules of a particular system shall control.

d. Reinstatement upon Return from Military Leave. All employees who have been granted a military leave of absence, and who apply for reinstatement with the City not later than thirty (30) days after being discharged or separated from the Armed Forces, will be re-employed in the same position or a position of like seniority and status at the then current rate of pay, provided such employees are physically and mentally qualified for reinstatement. If upon termination of such leaves of absence, employees are physically or mentally incapacitated and not qualified to perform the duties of the positions held at the time of commencement of such absences, employees shall be eligible for placement in such other positions for which they may qualify. In the event two or more employees have occupied the same position and have been called into service, the first employee occupying and leaving such position after the effective date of this policy shall have first priority on reinstatement; the second person occupying and leaving such position shall have second consideration, etc. An attempt will be made to re-employ every employee who enters the Armed Forces and upon his release desires to re-enter employment with the City of Midland.

e. Credit for Service Time. For the purpose of computing longevity pay, a military leave shall not be counted as a break in service and upon return of an employee to duty with the City his service time shall be increased by an amount equivalent to the time spent on military leave.

f. Accrued Balances of Paid Time Off and Other Accrued Leaves. Any classified full-time employee who is a member of a military reserve organization which requires participation in a training program, will be granted a leave of absence from their respective duties without loss of time or efficiency rating or vacation time or salary on all days during which they shall be engaged in authorized training or duty ordered or authorized by proper authority, not to exceed fifteen (15) days in any one calendar year. For the purposes of this policy, a military leave day shall be defined as any consecutive 24-hour period. The employee must provide the City with a copy of the written orders prior to taking leave.

Any full-time employee who is a member of a military reserve organization that is called to active duty may use their accrued time to supplement their military pay. If the employee desires to return to his/her position at the City upon completion of military service, a request for "Military Leave of Absence" must be approved by the Director of Administrative Services prior to the leave. A copy of the written orders should be attached to this request. If the written order is not available upon departure, it must be

provided as soon as possible thereafter.
The accrued balances of PTO, or any other leaves may be used to supplement the military pay up to a maximum of 80 hours per pay period.

Fire Department Shift Personnel will be allowed to supplement the military pay up to a maximum of 112 hours per pay period.

An employee who intends to use this benefit must notify the employee's supervisor of such intent by completing the "Military Leave of Absence" form available in the Administrative Services office. A supervisor may not designate the time without the employee's consent.

Section 16 Lactation Break

City of Midland will provide a reasonable amount of break time to accommodate employees desiring to express breast milk for their infant child, in accordance with and to the extent required by applicable law. The break time, if possible, should run concurrently with rest and meal periods already provided.

The employee's supervisor will coordinate with Employee Benefits Manager or designee to make reasonable efforts to provide employees with the use of a room or location other than a restroom to express milk in private.

The designated space:

a) may be the place where the employee normally works if there is adequate privacy (for example, the employee's private office or a lockable conference room or another identified space);
b) should have an electrical outlet, table and chair, lock or signage on door prohibiting entry when in use; and
c) should be within reasonable proximity to the employee's work area.

Employees should make requests for break time in writing to their supervisor or manager as soon as practicable after an employee learns of the need for lactation break time or the need for a change in previously approved lactation break times.

Section 17 Injuries

a. **On the Job Injury Leave**

An employee injured in the line of duty shall receive workers' compensation or injury leave benefits under the terms and conditions prescribed in the applicable programs and as required by law.

1) Leave and Compensation: Injury leave is defined as fully compensable absence from work arising from an on-the-job accidental injury. An employee injured on the job, in the line of duty, may be granted injury leave, which shall not be charged against his accumulated PTO or other accrued leave, for the period of time he is disabled and unable to perform his duties but said injury leave shall not exceed one hundred eighty (180) work days. Injury leave runs concurrently with FMLA. Healthcare provider's statement is required indicating that the employee is unable to return to work and shall be required for an employee to receive injury leave. Any injury leave so granted is deemed to be purely discretionary on the part of the City and may be terminated at any time by change of these policies. The total amount of injury leave granted in conjunction with any given injury shall never exceed one hundred eighty (180) work days.

(i) An employee shall forfeit all rights to injury leave if the employee:
1. Is found to be working, either part-time or full-time for pay;
2. Resigns for any reason;
3. Is discharged for any reason;
4. Retirement or death;
5. Fails or refuses to comply with or follow, or disregards or violates the treating physician's instructions regarding treatment and/or rehabilitation of the injury;

6. Refuses to perform light, partial or part-time duty when offered by the Department Manager or designee, which does not require him to perform activities, which are restricted by the treating physician;
7. Falsifies or misrepresents his physical condition or capacity;
8. Refuses to return to duty on the working day he has been released to duty by the treating physician;
9. Fails to submit an acceptable physician's statement when requested by his supervisor or designee; or
10. Has been injured as a result of his failure to observe safety policies, procedures, or instructions as determined by the Employee's Department Manager or designee.

(ii) Injury Leave ends when:
1. The injured worker reached one hundred and eighty (180) work days of leave; or
2. The injured worker returns to work with or without restrictions; or
3. A healthcare provider determines that no further healing or recovery from the injury can be expected (maximum medical improvement); or
4. The injured worker reaches the end of the Temporary Income Benefits period, which is 104 weeks after the eighth day of work-related disability (statutory maximum medical improvement).

If the injury is controverted, the employee exhausts all leave as defined above, or the employee experiences sporadic absence from work, the employee may be eligible to begin drawing weekly benefits payable under the Workers Compensation Act. If so, the employee may use accrued leaves to supplement their workers' compensation income and retain their active status with the City of Midland

2) Procedure:

(i) If an employee's injury meets the criteria for a serious health condition, the employee's injury leave shall run concurrently with FMLA leave, as provided in Section 14 of this Chapter.
(ii) An employee who sustains an injury or illness in the performance of the employee's duties shall fully and promptly report the injury or illness, however minor, to the employee's supervisor as soon as possible, but no later than the end of the business day. Written notification of the injury or illness must be received by the Workers' Compensation / Leave Coordinator within 24 hours of the incident in order for the employee to be granted injury leave.
(iii) Injury leave taken by an employee because of a substantiated and documented work-related injury sustained during the course of employment shall not be charged against the employee's PTO or other accrued leaves
(iv) During the approved injury leave, PTO shall continue to accrue.
(v) The Workers' Compensation / Leave Coordinator will coordinate with the employee's healthcare provider to determine whether the injury would allow an employee to perform modified temporary work or other duties.
(vi) An employee who is on injury leave shall update the employee's supervisor or the Workers' Compensation / Leave Coordinator of the employee's status at regular intervals.
(vii) An employee who is unable to perform the essential functions of the employee's position due to a disability, injury, illness, or medical condition (and reasonable accommodation is not possible) is not guaranteed a return to the employee's position at the conclusion of the disability, injury, illness, or medical condition.

b. **Off the Job Injury**

Injuries, Off the Job (Leave and Compensation). An employee injured off the job shall have the resulting absence from work, if any, charged against the employee's accumulated PTO leave.

Any employee so injured who has no accrued PTO leave or has exhausted the employee's PTO leave may receive compensation during his absence from work by using other accrued leave time, if any.

If an employee's injury meets the criteria for a serious health condition, the employee's time off shall run concurrently with FMLA leave, as provided in Section 14 of this Chapter.

All absence reporting requirements as outlined in Section 9, b. of this Chapter must be followed.

c. **First Responder Illness/Injury Leave**

1) Definitions. For purposes of this subsection:

(i) "Emergency medical services personnel" means a person described by Section 773.003, Health and Safety Code, who is a paid employee of the City of Midland.

(ii) "Firefighter" means a firefighter who is a permanent, paid employee of the City of Midland's Fire Department. The term includes the chief of the Fire Department.

(iii) "Line of duty illness or injury" means an illness or injury that occurs during the course and scope of employment.

(iv) "Police officer" means a paid employee who is full-time, holds an officer license issued under Chapter 1701, Occupations Code, and regularly serves in a professional law enforcement capacity in the Police Department, the Municipal Court, or other department of the City of Midland. The term includes the chief of the Police Department.

2) Illness / Injury Leave:

A firefighter, police officer, or emergency medical services personnel shall be provided a leave of absence for a line of duty illness or injury. This leave is with full pay for a period commensurate with the nature of the line of duty illness or injury. If necessary, the leave shall continue for up to one year. The City will continue the employee's health benefits during the leave period at the same level and under the same conditions as if the employee was continuously at work. Workers' compensation benefits shall be offset to the extent applicable by any amount for incapacity received as provided by this subsection. Leave under this subsection shall run concurrently with FMLA leave.

3) Use of PTO; Temporary Leave:

If a firefighter, police officer, or emergency medical services personnel is temporarily disabled by a line of duty injury or illness and the paid leave of absence granted under this subsection has expired, the employee may use accumulated PTO or other accumulated leaves for a period commensurate with the nature of the temporary disability. A firefighter, police officer, or emergency medical services personnel who requires additional leave shall be placed on unpaid temporary leave.

4) Medical Certification:

When requested by the Workers' Compensation / Leave Coordinator, a firefighter, police officer, or emergency medical services personnel who receives leave under this subsection shall provide medical certification and recertification documents from a health care provider to support the need for the leave.

5) Return to Duty:

If able, a firefighter, police officer, or emergency medical services personnel may return to modified duty as outlined in Section 18.a of this chapter, while recovering from a temporary disability. If medically necessary, the modified duty assignment may continue for up to one year.

A firefighter, police officer, or emergency medical services personnel who takes leave under this subsection may be required to provide a fitness for duty clearance from a health care provider upon return. After recovery from a temporary disability, a firefighter, police officer, or emergency medical

services personnel shall be reinstated at the same rank and with the same seniority the person had before going on leave.

Section 18 Return to Work / Inability to Return to Work

a. **Modified Duty**

"Modified Duty" is a temporary assignment which is for a specified and limited period and fulfills a necessary job function, appropriate to the employee's skills and level of experience as determined by the City, and which the employee can perform without violating any medical restriction imposed as a result of a temporary disability, illness or injury, for which the employee is compensated at the employee's normal rate of pay and benefits.

The number, availability and duration of such assignments are limited by departmental needs as determined by the Department Manager or the Department Manager's designee.

If restrictions as noted on the Physician's Release to Return to Work form are determined to be permanent, the employee shall not be eligible for a Modified Duty assignment.

1) Limitation of Modified Duty Assignment:
   The Modified Duty assignment shall end on the earliest of:
   (i) The date when the employee is released to the employee's regular schedule with no restrictions as evidenced on the Physician's Release to Return to Work form;
   (ii) The date when a physician determines the employee's has permanent restrictions;
   (iii) The date the Maximum Modified Duty Assignment Period ends; and
   (iv) The date the Employee fails to take a required medical examination, without good cause.

2) Maximum Modified Duty Assignment Period:
   A Modified Duty assignment may be intermittent or continuous, but in no event shall such an assignment continue for more than 180 work days after the date when the employee was initially unable to perform each and every essential function of the employee's job (the "Maximum Modified Duty Assignment Period"). At the end of the Modified Duty assignment, if an employee is unable to return to work without restrictions, the employee may be placed on the appropriate leave.

   Once an employee has been unable to perform each and every essential function of the employee's position that the employee held when the disability, illness or injury arose for 90 calendar days during a 12 month period or has exhausted all leave granted under previous sections of this Chapter (whichever comes first), the employee may request a meeting with the employee's Department Manager, the Director of Administrative Services, or the City Manager or the City Manager's designee in order to determine if the City has any current vacancies for which the Employee is qualified and is currently able to physically perform.

3) Procedure:
A "Physician's Release to Return to Work" form shall be completed by a physician (for injury leave, such physician shall be one of the designated providers selected for the City's workers' compensation insurance) and shall include the probable length of the restrictions and the nature of the restrictions. An additional statement confirming the ability to perform the Modified Duty assignment may also be required.

Once an employee has seen a physician and the physician has completed the Physician's Release to Return to Work form indicating that the employee can return to work, the applicable procedures below shall be followed:

(i) Return to work with Regular Hours and No Restrictions:
   The employee obtains the completed Physician's Release to Return to Work form from the physician indicating that there are no restrictions and that the employee has the

ability to work during the employee's regularly scheduled hours. This form must be submitted to the employee's supervisor and the Office of Administrative Services' Workers' Compensation / Leave Coordinator upon the employee's return to work.

(ii) Return to Work with Restrictions:
The employee obtains the completed Physician's Release to Return to Work form from the physician indicating that the employee needs (i) restricted duties (for example, limitations on lifting, walking, stooping, bending, etc.) and/or (ii) restricted number of hours worked per day or per week, with or without limitations on the duties performed.

1. If the physician releases the employee to return to work with restrictions, as evidenced by completion of the Physician's Release to Return to Work form, the form must be submitted to the employee's supervisor and the office of Administrative Services' Workers' Compensation / Leave Coordinator prior to or immediately upon return to work for consideration of a Modified Duty assignment. The supervisor and a representative from Administrative Services will review the restrictions and determine if the employee is eligible for a Modified Duty assignment. The employee must report for work at the time designated by the employee's supervisor.
2. If the employee is approved for a Modified Duty assignment, the employee shall comply with the restrictions indicated in the Physician's Release to Return to Work form. If the employee's restrictions change at any time, the employee shall notify the employee's supervisor immediately and submit to the supervisor and the office of Administrative Services Worker's Compensation / Leave Plan Coordinator a copy of the revised Physician's Release to Return to Work form.
While working a Modified Duty assignment, the employee may be required to provide periodic updates from the physician up to every 30 days. Additionally, the employee may be required to submit to a periodic physical examination as a condition of continued Modified Duty status.

3. If a Modified Duty assignment is not available, a representative from Administrative Services will determine what remaining leave benefits are available to the Employee, if any.

If the employee is unable to perform the Modified Duty assignment, the employee shall contact the physician to review and potentially revise the Physician's Release to Return to Work form.

b. **Inability to Return to Work**.

When a treating physician determines that an employee is permanently incapable of returning to work in the employee's full duty capacity, the City will accommodate such disability to extent it is required under the Americans with Disabilities Act, or the employee may apply for available positions within the City for which the employee is qualified. The Department Manager or his designee, based on the assessment of a licensed medical doctor that an employee is not able to perform the required physical duties or tasks of employee's present position (regardless of whether the incapacity is due to on the job injuries, off the job injuries, or illness), then the employee will not be returned to the employee's full duty with the City until a medical doctor states in writing that the employee is able to perform all the required physical tasks or duties of the position. Wherever possible, it is the policy of the City to provide Modified Duty to employees who have been released by a physician to return to work in a limited capacity.

Once an employee has exhausted all leave granted to the employee under previous sections of this Chapter or has been unable to perform each and every essential function of the position which he held at the time of injury with the City for 90 calendar days during a 12 month period (whichever comes first), the employee may request a meeting with the employee's Department Manager, the City's Director of Administrative Services, or the City Manager in order to determine if the City has any current vacancies for which the employee is qualified and is currently able to physically perform.

If a job vacancy exists that the employee is qualified for and can physically perform, the employee may apply for that position. The employee has the choice to either accept or decline any offered position:

1) If the offer is accepted, it is recognized and understood by the employee that the employee may have to take a reduction in salary.
2) Any employee so reassigned will be compensated at a pay rate in the pay range of the position to which the employee has been reassigned. However, the affected employee shall be entitled to start in the new band/zone equal to his previous salary if that band/zone is equal to or below the midpoint of the new pay range.
3) If the employee does not seek another position, or if the offer of a new position is declined, or if no job vacancy exists that the employee is qualified for and can physically perform, then the employee shall be allowed to exhaust any leave granted to the employee under previous sections of this Chapter

Under no circumstances will the City continue an employee's active status once the employee exhausts the leave granted under previous sections of this Chapter.

Once an employee is placed on inactive status, the City shall no longer pay the employee a salary, and the employee shall no longer accumulate PTO leave or other accrued leaves. The employee may continue to receive the employee's worker' compensation benefits, and the employee will also be able to retain the City's health insurance if the employee pays the rate as established by the City as required by the Consolidated Omnibus Budget Reconciliation Act (COBRA). Such coverage shall be limited to the minimum length of time established by the Act.

An employee who has been placed on inactive status under this policy may apply for positions with the City of Midland for which the employee is qualified and physically able to perform. Should an employee who has accepted another position with the City or been placed on inactive status due to an on the job injury recover and be able and qualified to perform all the tasks required of the employee's previous position within 12 consecutive calendar months from the date of the employee's acceptance of the new position with the City or placement on inactive status, then the employee will be offered reinstatement to the previous position should said position become vacant. The employee's recovery must be confirmed by a written statement from a licensed medical doctor. The City shall have the right to request a second medical opinion, but that second opinion shall be paid for by the City. Under this policy, no employee's
inactive status will continue for more than 12 consecutive months, unless required by federal, state or local law.

Section 19 Paid Quarantine Leave

a. Purpose.

The purpose of this policy is to provide for and maintain employment benefits for certain employees who are ordered to quarantine or isolate due to a possible or known exposure to a communicable disease while on duty.

b. Applicability

This policy applies to the following employees of the City:

1) Fire protection personnel; and
2) Peace officers of the Police Department and the Municipal Court.

c. Conditions

The paid leave and benefits provided by this policy are only available to an employee who is ordered to quarantine or isolate due to a possible or known exposure to a communicable disease while on duty by the employee's supervisor or the City's health authority. An employee may be required to provide proof of an order to quarantine and may be denied paid leave or benefits if the employee fails to provide proof within a reasonable time.

d. Benefits

If an employee is ordered to quarantine under the conditions in Subsection c above, the employee will receive all employment benefits and compensation for the duration of the leave, including paid leave accrual, pension benefits, and health benefit plan benefits that the employee would customarily be provided on paid leave.

e. Reimbursement for Expenses

If an employee is ordered to quarantine under the conditions in Subsection c above, the employee may request reimbursement for reasonable costs related to the quarantine, including lodging, medical treatment and transportation by submitting a reimbursement request via the Employee Self Service portal of the Human Resources Information System within five (5) days after returning from the leave ordered under this policy. An employee may be required to provide receipts or proof of payment with the request and reserves and may be denied reimbursement that the City deems unreasonable or unrelated to quarantine.

f. Effect on Paid Leave Balances

The City will not reduce an eligible employee's PTO or other paid leave balance for quarantine leave ordered under this policy.

Section 20 Peace Officer and Telecommunicator Mental Health Leave

a. Purpose

The purpose of this Section is to allow the use of mental health leave by peace officers and full-time telecommunicators employed by the City who experience a traumatic event while on duty.

b. Applicability

This Section applies to licensed peace officers and full-time telecommunicators employed by the City. For purposes of this Section, "telecommunicator" means a person authorized to act as a telecommunicator under Section 1701.405, Occupations Code.

c. Conditions

An employee to whom this Section applies shall be allowed up to three (3) days or (30) hours of paid mental health leave per calendar year, provided that:

1) the leave is:
   (i) approved by the employee's supervisor, the Chief of Police (for Police Department peace officers and full-time telecommunicators) or the Presiding Judge (for Municipal Court peace officers); or
   (ii) ordered by a mental health professional; and
2) the leave is taken as a result of a traumatic event that occurred while on duty.

d. Anonymity

The City will keep requests to take mental health leave and any medical information related to mental health leave under this policy confidential to the extent allowed by law and separate from the employee's general personnel file held by the Administrative Services Department. The City cannot guarantee the anonymity of information that is otherwise public or necessary to carry out the City's duties under applicable laws.

e. Effect on Paid Leave Balances

The City will not reduce an eligible employee's PTO, or other paid leave balance for mental health leave taken under this policy.

Section 21 Special Leave with Pay

Department Managers may grant employees special leave with pay and actual expenses to attend professional conferences, conventions or short courses or to visit other cities in the interest of the City, as authorized by the City Manager.

Section 22 Mental Health Day

The City is committed to protecting our employees' health, safety, and well-being. Employees may access confidential free counseling through the City's Employee Assistance Program (EAP).

Each full-time employee shall receive two (2) Mental Health Days per calendar year. An employee who wishes to take a Mental Health Day shall notify the employee's immediate supervisor prior to the start of the employee's scheduled shift, if practical. Documentation of the absence shall not be required. The reason for such absence (i.e., use of a Mental Health Day) shall be held confidential as reasonably practicable. Unused Mental Health Days shall not be carried over into the following year, and employees will not be provided with payment in lieu of taking Mental Health Days. In addition, upon an employee's termination of employment or retirement, no payment shall be provided for unused Mental Health Days.

Section 23 Community Service Leave

The City encourages employees to be active citizens and provides this leave to participate in organizations and activities that benefit the local community.

All full-time employees are eligible to request eight (8) hours of Community Service Leave per calendar year. Community Service Leave may be taken in one (1) hour increments. An employee who wishes to take Community Service Leave shall notify the employee's supervisor thereof and obtain approval prior to taking Community Service Leave. An employee, upon request, shall provide documentation to support the taking of Community Service Leave, and a failure to provide sufficient documentation thereof may result in the City's refusal to provide Community Service Leave. Community Service Leave may not be used for events with a political or religious purpose. Community Service Leave is noncumulative and nontransferable.

Section 24 Civic Duties Leave

All employees will be allowed time off with pay to attend the civic duties of voting in elections, serving as members of jury panels, or appearing before any tribunal by virtue of subpoena or summons.

Section 25 Leave of Absence

Department Managers may grant an employee one day of paid administrative leave in regard to disciplinary or safety issues. Any additional paid administrative leave in regard to discipline, safety, or investigations must be approved by the City Manager. Department Managers may grant leaves of absence without pay to regular employees, not to exceed thirty (30) days in duration. Requests for such leave shall be in writing and

submitted well in advance of the date the Employee will commence such leave. In granting such leaves, the Department Manager shall give primary consideration to the City's need for the Employee's services. Leaves of absence without pay may be granted for any legitimate purpose; however, employees will be obligated to show that the granting of such leave is to the interest of the City. Leaves of absence without pay in excess of thirty (30) days may be granted only with the approval of the City Manager and in no case shall exceed six (6) months.

Section 26 Absence without Leave

No employee may absent himself from duty for a single day or any part of a day without permission of his Department Manager. Any such absence will be without pay and the employee may be subject to adverse action. Any employee absent from work without notice for three (3) consecutive days will be considered as having abandoned the job. Any employee absent from work without notice for three (3) consecutive days will be considered as having abandoned the job. Such abandonment shall be considered a voluntary resignation from employment, and the City will process such separation of employment as a voluntary resignation.

Chapter VI

Wage and Salary Administration

Section 1 Application of Rates

All employees occupying a position in the classified or unclassified service shall be paid a salary or wage within the range currently set for that position's class under the pay plan as approved by the City Council. If an employee begins service in the middle of a pay period, he will be paid by the calculated hourly rate for the total hours worked during that time.

Section 2 Pay Rates for New Employees

Pay rates for new or probationary employees will normally be at the minimum step in the salary range established for the position that the employee is occupying. Department Managers, with the approval of the Administrative Services Director, may pay a new employee a beginning rate 15% above the minimum established in that range. Appointments with a pay rate of more than 15% above the minimum for a particular salary range may be made only with the approval of the City Manager.

Section 3 Pay Progression

Pay progression for employees in classified positions will be based on documented criteria that may include performance, attendance, certifications, training, skills testing, length of service, or other job specific factors. Pay progression dates and the amounts of the progressions shall be recommended on an annual basis by the City Manager and approved by the City Council through the budget process and/or amendments to the City's annual budget.

Section 4 Total Rate of Pay

No employee shall be paid at, or no salary advancement shall be made which would compensate an employee at, a rate more than the maximum or highest step in the salary range to which that employee's position has been assigned. Exceptions may only be made when deemed by the City Manager to be advantageous to the City service. Any such pay increases shall not exceed the assigned pay range by more than 10%. Market adjustments which impact City of Midland pay plans or cost of living adjustments which impact municipal employee salaries must be approved by the City Council.

The City of Midland takes all reasonable steps to ensure that employees receive the correct amount of pay in each paycheck and that employees are paid promptly on scheduled paydays. In the unlikely event that there is an error in the amount of pay an employee receives, he should promptly bring the discrepancy to the attention of his immediate supervisor or the Payroll Manager. If the employee has been underpaid, the City will pay the employee the difference as soon as possible. If the employee has been overpaid, arrangements will be made to return the overpayment to the City as soon as possible. Noemployee is entitled to retain any pay in excess of the amount he has earned according to his establishedrate of pay.

Section 5 Part-time, Temporary and Seasonal Rates

An employee who works regularly at less than the established workday or workweek shall be paid by the hour or at a salary proportional to the amount of time worked. The hourly or monthly rates for part-time, temporary or seasonal employees shall be established by the Department Manager concerned and the Administrative Services Director after giving due consideration to the ranges and pay rates in effect for similar positions in the current pay plan.

Section 6 Pay Rates for New Positions

Whenever a new position is created the Administrative Services Director shall, with the department manager involved, study the duties and responsibilities of the new position and in light of the existing positions and pay rates in the "Position Classification and Pay Plan" submit to the City Manager a recommendation for the proper pay range for the new position.

Section 7 Termination Pay

All employees who leave the service of the City for any reason shall receive all pay that may be due them with the following qualifications:

a. Regular employees shall be paid for unused PTO leave as set out in Subsection c of Section 9 of Chapter V.

b. An employee whose employment is terminated before the end of a pay period shall be paid for the total hours actually worked through the employee's termination date.

c. Effective October 1, 2023, any employee who is eligible to retire under either TMRS or FRRF at the time of the employee's termination of employment or retirement shall receive payments for accrued PTO as set out in Section 9 of Chapter V.

Section 8 Longevity Pay

All regular full-time employees shall be entitled to additional compensation at a rate of six dollars ($6.00) per month for each full year of continuous service with the City. The beginning of the pay period nearest the anniversary date the employee began employment with the City shall be the effective date of longevity pay increases. The rate of longevity pay shall coincide with the rate established by Texas Local Government Code Section 142.

Section 9 Performance Appraisal System

The purpose of the system is to improve employee productivity, to provide better communicationsbetween supervisors and those they supervise, to identify needs for training or other remedial actions among the workers, to provide upward mobility and the cultivation of skills and abilities, and to further the City service as a good place to work.

Evaluations shall be used as guides to judgment in granting permanent status to probationary employees, in offering promotions to employees, in recommending employees for merit pay increases, in determining that dismissals or other disciplinary actions based on performance are in fact for just cause, in avoiding any possibilities of discrimination or prejudice, and in other personnel matters.

The immediate supervisor of the employees being evaluated shall perform evaluations, but the evaluations may be reviewed and revised by Division and Department Managers before becoming final.

Evaluations of supervisory employees shall take into account the skill and judgment shown by such supervisors in the rating of those responsible to them.

Evaluations shall be completed shortly before the end of probation and thereafter on an annual basis.

An evaluation of an employee may also be conducted at any other time at the option of his supervisor; such specific evaluations are appropriate if the employee is being considered for promotion, is in need of remedial action, or is to be warned of possible disciplinary action.

If any employee believes that the performance evaluation is erroneous, unfair, or prejudiced, he may appeal the evaluation in the same way as is provided for any other grievance in Chapter IX of the personnel rules.

Section 10 Compensation Policy Statement

It shall be the policy of the City of Midland to maintain a pay structure for all municipal employees that will allow said employees the opportunity to receive reasonable, comparable wages in relation to comparable jobs in the relevant labor markets. The City Council shall establish both regional and statewide comparative markets consisting of municipalities in the population range of 75,000 to 200,000 (or larger if they are in the regional market) that shall be used in obtaining comparative wage data.

The City of Midland will also strive to maintain internal equity in the municipal job classification and pay structure through the use of a sound job analysis process and continue to promote the development and refinement of pay structures which reward employee performance and development.

Toward these ends, administrative regulations and pay structures have been adopted and may be modified as needed to accomplish the objectives of this policy, to comply with federal or state regulations, or to promote the efficiency of the City Service. At least one general review of the classification and pay plans should take place in each succeeding two-year period. The City Manager may appoint an Advisory Committee to conduct this review.

It shall be the responsibility of the City Manager to maintain administrative position classification and pay plan regulations in compliance with these policies.

Chapter VII

Transfer, Promotion, Resignation and Retirement

Section 1 Transfer

After notice to the Administrative Services Director, an employee may be transferred by a department manager at any time from one position to another position in the same or comparable class. If the transfer involves a change from one department to another department, both Department Managers must consent to the transfer unless the City Manager orders the transfer for the purpose of economy or efficiency. No person shall be transferred to a position for which he does not possess the necessary minimum qualifications, according to the classification plan.

Section 2 Promotion

Insofar as practical and consistent with the best interest of the City, all vacancies in the classified and unclassified service shall be filled by promotion of persons already employed by the City. If, in the opinion of the Department Manager or other person responsible for filling the vacancy, a position can best be filled by hiring a new employee, such information shall be forwarded to the Administrative Services Director who shall take the necessary steps to assist in recruiting qualified applicants for the position.

Section 3 Resignation

An employee who wishes to leave the employment of the City shall give at least two (2) weeks' notice to the supervisor before the effective date of his resignation. Such notice, either oral or written, shall state the reasons for such resignation. The Department Manager shall immediately notify the Administrative Services Director of such resignation and indicate the reasons therefore and whether the employee's services have been satisfactory.

Section 4 Termination Interview

The employee's termination interview and final paycheck will be received in the Administrative Services Office.

Section 5 No Recommendations or References

No person is authorized to act on behalf of the City in making recommendations or giving references with respect to former or current City employees. Any City employee who gives a recommendation or reference with respect to a current or former City employee shall be acting in his or her individual capacityand not as an agent, employee, or representative of the City of Midland, Texas, said act being beyond thescope of said employee's employment. Any employee who is sued or becomes involved in a claim or civil lawsuit due in any part to his or her giving a reference or recommendation shall not be entitled to a paidor other legal defense by the City of Midland.

Section 6 Requests for Employment Verification

Information regarding the employment of all current and former City employees shall be verified by Administrative Services only upon written request signed by the current or former employee. In absence of a written request signed by the current or former employee, Administrative Services shall be authorized to verify only the following information:

a. The date the employee began his employment with the City of Midland,

b. The date the employee ended his employment with the City of Midland,

c. The positions held while employed by the City of Midland,

d. The Department(s) to which the employee was assigned while employed by the City of Midland.

No person other than the Director of Administrative Services or the Director's designee shall be authorized to act on behalf of the City of Midland with respect to the verification of employment information.

Section 7 Personnel Files

The City of Midland retains employment records in a personnel file with the Administrative Services Department. The information contained in the file is the property of the City and must be maintained for government and record-keeping purposes. Therefore, all employees are required to notify the Administrative Services Department immediately if there is any change in relevant personal or employment information such as changes in address, phone numbers, marital status, emergency contact,insurance beneficiary, number of dependents, or legal name.

All files connected with an employee are considered strictly confidential, and access will be limited to those who have a job-related need to know the information, those who have been authorized to view the file, and as required by law. If an employee wishes to view his personnel file, he must submit written request with the Administrative Services Department. Upon receipt and approval of such request, an appointment will be scheduled for the employee to view his file. An employee may not remove or alter any information in the file in any way.

If an employee believes that information in his personnel file is incorrect, he may submit a written request to Administrative Services for change(s) to be made. If such a request is denied, the employee may request a statement of disagreement be placed in his file. This statement of disagreement will become a permanent part of the employee’s file.

The City of Midland considers falsification of personnel records to be a serious offense, and upon discovery can lead to disciplinary action up to and including termination.

Chapter VIII

Adverse Action

Section 1 Adverse Action

a. Purpose of Chapter

The purpose of this Chapter is to establish policies and administrative procedures for addressing Prohibited Conduct (as defined herein) and employment separation of City of Midland employees. The policies and procedures established herein are authorized and adopted, and the same shall be construed according to the plain meaning of its language unless defined otherwise. No policy or procedure established by this Chapter shall be enforced or interpreted in a manner that limits or abrogates protections afforded by law. The remedies set forth in this Chapter are exclusive.

b. Definitions.

In this Chapter:

1) "Adverse Action" means an administrative action taken by a Department Manager against an Employee because of the Employee's Prohibited Conduct. Said administrative actions include the following:
    a) Oral Reprimand;
    b) Written Reprimand;
    c) Suspension from employment without pay;
    d) Demotion from a current position to a lower position with lesser responsibility or compensation; and
    e) Termination of employment.
2) "Appeal Hearing" is the initial proceeding at which the Employee may contest an Adverse Action.
3) "Business Day" means a day on which the City of Midland is open for business.
4) "City" means the City of Midland.
5) "Department Manager" means the City department manager for the department that the Employee is assigned to. For the purpose of this Chapter, "Department Manager" also means an Assistant City Manager, Deputy City Manager, or the City Manager if a City department manager, Assistant City Manager, or Deputy City Manager is deemed to have engaged in Prohibited Conduct.
6) "Employee" means an employee of the City of Midland. For the purpose of this Chapter, "Employee" also means a Department Manager or Employee within the City Manager's Office if such person is deemed to have engaged in Prohibited Conduct.
7) "Hearing Officer" means the City official that presides over the Appeal Hearing.
8) "Lay-Off" means the employment separation between the Employee and the City that is not the result of an Adverse Action.
9) "Name-Clearing Hearing" means a proceeding before the City Manager at which the Employee may address allegations made by the City or its officials relating to the Employee's termination.
10) "Notice of Appeal" means the written notice submitted to the Administrative Services Department by the Employee seeking administrative review of an Adverse Action.
11) "Notice of Appeal to the Personnel Appeals Board" means the written notice submitted to the Administrative Services Department by the Employee seeking the Personnel Appeals Board's review of an Adverse Action.
12) "Notice of Hearing Officer Determination" means the written notice issued by the Hearing Officer containing the Hearing Officer's final determination resulting from the administrative review of an Adverse Action following an Appeal Hearing.

13) “Notice of Personnel Appeals Board Determination” means the written notice issued by the Personnel Appeals Board containing its final determination resulting from its review of an Adverse Action following a Personnel Appeals Board Hearing.
14) “Personnel Appeals Board” means the administrative body that presides over the Personnel Appeals Board Hearing.
15) “Personnel Appeals Board Hearing” means the final proceeding at which the Employee may contest an Adverse Action.
16) “Prohibited Conduct” means conduct of a character and nature that constitutes or is reasonably related to the following:
    a) Consumption and/or possession of alcohol or narcotics while on duty or using City-owned property;
    b) Consumption and/or possession of alcohol or narcotics in a manner that forms the basis of a crime;
    c) Criminal conduct;
    d) Delinquency;
    e) Dishonesty, including forgery, falsification of documentation, or any other falsifying action;
    f) Disruptive behavior that limits or restricts workplace efficiency;
    g) Failure to maintain necessary professional certifications or authorizations;
    h) Failure to perform employment duties;
    i) Immoral behavior, including behavior that may adversely affect the City or its officers, officials, employees, or agents, or behavior that may reasonably undermine the confidence of the public;
    j) Misappropriation or destruction of City property or information;
    k) Subversive behavior, including fighting, intimidation, profanity, insubordination, negligent or reckless actions, discourteousness, safety rule violations, misuse of City property, or violation of any established procedure, order, directive, or protocol;
    l) Unsatisfactory attendance;
    m) Failure to reasonably cooperate during an investigation involving alleged misconduct; and
    n) Violation of any policy, standard, or provision of the City of Midland, Texas Personnel Policies.
17) “Supervisor” means the person charged with the daily oversight and management of the Employee contesting an Adverse Action.
18) “Workday” means a day (including weekend days) on which the Employee is scheduled to report to work.

c. Notice Requirements

1) Any notice or communication required or permitted pursuant to this Chapter shall be in writing.
2) Subject to Section 1.c(3), a notice or communication required or permitted pursuant to this Chapter shall be deemed to be delivered and received on the date said notice or communication is:
    a) Personally delivered to the respective party to whom it is directed;
    b) Deposited by certified mail; or
    c) Sent by electronic mail.
3) Notwithstanding Section 1.c(2), a notice or communication that is sent to the City, or its employees or officials, shall be deemed to be delivered and received on the date that Administrative Services Department is in actual or physical receipt of said notice or communication.
4) The delivery of a notice or communication to the Employee shall be directed to one of the following:
    a) The City email address of the Employee;

b) The email address of the Employee's authorized representative;
c) The Employee's physical address on file with the Administrative Services Department; or
d) The physical address of the Employee's authorized representative.

5) The delivery of a notice or communication to the City or its officers, officials, or employees shall be directed to one of the following unless directed otherwise:
   a) The City email address of the current Administrative Services Director; or
   b) City of Midland
      300 N. Loraine Street
      Midland, Texas 79701
      Attn: Administrative Services Director.

d. Prohibited Conduct; Adverse Action

Employees shall refrain from engaging in Prohibited Conduct. An Employee that is deemed to have engaged in Prohibited Conduct may be subject to Adverse Action in accordance with the policies and procedures of this Chapter.

e. Discretionary Factors and Considerations Regarding Adverse Action Administration

If a Department Manager determines that the Employee engaged in Prohibited Conduct, the Department Manager may, in the Department Manager's sole and absolute discretion, incorporate the following factors and considerations in the Department Manager's decision regarding an Adverse Action to be administered to the Employee:

1) Nature of the Employee's duties;
2) Nature of the Prohibited Conduct;
3) Circumstances of the Prohibited Conduct;
4) The Employee's disciplinary history; and
5) Any other relevant facts or information.

f. Authorized Adverse Actions

Upon a Department Manager's determination that the Employee engaged in Prohibited Conduct, said Department Manager may administer (or cause to be administered) the following Adverse Actions:

1) Oral Reprimand – verbal discussion identifying the standard(s) of conduct that the Employee violated, and the corrective action required, if applicable. An Oral Reprimand may contain:
   a) Additional facts and information as deemed appropriate by the Department Manager; and
   b) A warning that future violations may result in additional Adverse Action(s) in accordance with this Chapter.
2) Written Reprimand – memorandum to the Employee (with a copy to the Employee's personnel file) identifying the standard(s) of conduct that the Employee violated, and the corrective action required, if applicable. A Written Reprimand may contain:
   a) Additional facts and information as deemed appropriate by the Department Manager; and
   b) A warning that future violations may result in additional Adverse Action(s) in accordance with this Chapter.
3) Suspension – temporary removal of the Employee from performing his/her duties and from receiving compensation. No Employee shall be suspended:
   a) For a period exceeding thirty (30) workdays; or
   b) More than thirty (30) workdays in any fiscal year.
4) Demotion – permanent reassignment of the Employee to a position with lesser responsibility or compensation.

5) Termination – permanent severance of the employment relationship between the Employee and the City.

g. Adverse Action Administration

Adverse Actions shall be administered in accordance with the following procedures:

1) Oral and Written Reprimands shall be issued as deemed appropriate by the Department Manager.
2) Suspension, Demotion, Termination
    a) Prior to issuing a Notice of Adverse Action to the Employee, a Department Manager shall deliver a copy of the proposed Notice of Adverse Action to the Administrative Services Department.
    b) Upon approval of the form of the Notice of Adverse Action by the Administrative Services Department, the Department Manager shall issue the Notice of Adverse Action to the Employee in accordance with the requirements of Section 1.c.

h. Notice of Appeal

1) If the Employee is issued a Notice of Adverse Action that results in a Suspension, a Demotion, or Termination, the Employee may seek administrative review of the Adverse Action by filing a Notice of Appeal.
2) A Notice of Appeal must be filed within two (2) Business Days of the affected Employee's receipt of a Notice of Adverse Action.
3) A Notice of Appeal shall consist of the following information:
    a) Employee name;
    b) Employee position;
    c) Department Manager name;
    d) Supervisor name; and
    e) General description of the basis for appeal.
4) A proper and timely Notice of Appeal shall be perfected upon the Administrative Services Department's receipt of the Notice of Appeal. If a Notice of Appeal does not contain the information required by Section 1.h(3), but is otherwise proper and timely, the Administrative Services Director shall notify Employee of such defect within two (2) Business Days following the Administrative Services Department's receipt of the Notice of Appeal.
5) Upon receiving notification that a Notice of Appeal does not contain the information required by Section 1.h(3), the Employee shall correct the defect and supplement the missing information within two (2) Business Days of the Employee's receipt of the notice required by Section 1.h(4).

i. Designation of Hearing Officer

1) Upon the perfection of a Notice of Appeal, the Administrative Services Director shall notify the City Manager of said Notice of Appeal within a reasonable amount of time after its delivery to the Administrative Services Department.
2) Upon receipt of the notice prescribed by Section 1.i(1), the City Manager shall designate a person to serve as the Hearing Officer to preside over the Appeal Hearing, which shall be:
    a) The City Manager;
    b) The Deputy City Manager; or
    c) An Assistant City Manager.
3) The City Manager shall notify the Administrative Services Director of the designation required by Section 1.i(2) following the same.
4) Upon request of the City Manager and agreement of the Presiding Judge of the Municipal Court, the Presiding Judge or Associate Judge of the Municipal Court may serve as the Hearing Officer.

5) If none of the foregoing individuals are available to serve as the Hearing Officer, the City Manager may designate another department manager with no knowledge of the facts that give rise to the Appeal Hearing to serve as the Hearing Officer.

j. Setting of Appeal Hearing

1) Following the designation of the Hearing Officer, the Hearing Officer shall provide the Administrative Services Director with dates and times of availability for the scheduling of the Appeal Hearing.
2) The Appeal Hearing shall occur no later than fifteen (15) Business Days following the perfection of the Notice of Appeal.
3) Notwithstanding Section 1.j(2), the Appeal Hearing may occur later than fifteen (15) Business Days following the perfection of the Notice of Appeal upon: (i) the mutual agreement of the Department Manager and the Employee; and (ii) the consent of the Hearing Officer.
4) Upon final setting of the Appeal Hearing, the Administrative Services Director shall send a Notice of Hearing to the Employee, the Hearing Officer, and the Department Manager. The Notice of Hearing shall consist of the following information:
    a) The name and position of the Employee;
    b) The name and position of the Employee's Supervisor;
    c) The date, time, and location of Appeal Hearing; and
    d) The reason/basis for appeal, as indicated by the Employee in the Notice of Appeal.

k. Appeal Hearing Procedure

1) The following persons shall be entitled to participate in an Appeal Hearing:
    a) Hearing Officer;
    b) Administrative Services Director;
    c) The Employee;
    d) A designated representative of the Employee (if any); and
    e) Department Manager.
    f) A representative of the City Attorney's Office may represent the Department Manager at the Appeal Hearing if the City Attorney receives and agrees to a request for representation from the Department Manager.
2) Minutes or Recording
    a) The Administrative Services Director shall take minutes of the Appeal Hearing or cause a recording to be made of the Appeal Hearing.
    b) The Administrative Services Department shall maintain the minutes or recording of an Appeal Hearing for at least three (3) years or as long as may be required by law.
    c) The Employee may provide, at the Employee's sole cost and expense, for a court reporter to record the Appeal Hearing. If the Employee provides for a court reporter to record the Appeal Hearing, the Employee shall provide the City with a copy of said recording (at no cost to the City) upon receiving a written request for such from the Administrative Services Director.
    d) The Employee may submit a written request for a transcript of an Appeal Hearing recording from the Administrative Services Department; provided, however, that the Employee shall pay all expenses associated with transcribing the Appeal Hearing recording, which shall be reasonably determined by the Administrative Services Director.
    e) Upon the submission of a request for a transcript of an Appeal Hearing recording, the Employee shall submit a deposit to the Administrative Services Department in an amount equal to the cost associated with transcribing the Appeal Hearing recording.
3) Witnesses
    a) The Employee, the Department Manager, and their respective witnesses shall be entitled to testify at the Appeal Hearing.

b) The Employee and the Department Manager shall be responsible for securing the availability of their respective witnesses.
c) The Employee and the Department Manager shall be entitled to call and question any witness who has knowledge of the incident(s) or alleged Prohibited Conduct that resulted in the Department Manager's administration of the Adverse Action.
d) The Hearing Officer shall have the right to exclude the testimony of any witness who is shown to not possess knowledge of the incident(s) or alleged Prohibited Conduct that resulted in the Department Manager's administration of the Adverse Action.
e) At the request of the Employee or the Department Manager, all witnesses shall be excluded from the Appeal Hearing; provided, however, that the Employee, the Department Manager, and their respective representatives may not be excluded (provided that a representative shall not testify). A request to exclude witnesses pursuant to this Section must be made prior to the commencement of any testimony.

4) Appeal Hearing Process

The Appeal Hearing shall proceed in the following manner:

a) Introduction; Swearing in of Witnesses

The Administrative Services Director shall make a formal introduction to the Appeal Hearing, which shall consist of the factual circumstances that form the basis for the Appeal Hearing. Said factual circumstances shall consist of, but not be limited to, the following:

1. Basis for Adverse Action as described in the Notice of Adverse Action;
2. Notice of Adverse Action administration date;
3. Notice of Appeal perfection date;
4. Identification of the Appeal Hearing participants; and
5. Identification of the representatives of the Employee and the Department Manager.

The Employee and the Department Manager shall notify the Administrative Services Director of their respective witnesses expected to testify during the Appeal Hearing. The Administrative Services Director shall swear in such witnesses prior to the elicitation of witness testimony.

b) Opening Statements

1. The Employee and the Department Manager (or their respective representatives) are entitled to give an opening statement prior to the commencement of any testimony. The Hearing Officer shall consider the opening statements of the Employee and the Department Manager in the following order:
    a. Department Manager
    b. Employee
2. The Employee and the Department Manager may waive the right to give an opening statement.

c) Case-in-Chief; Department Manager

1. The Department Manager's case-in-chief may consist of witness testimony, the submission of exhibits, and the Department Manager's testimony. The Hearing Officer shall have the sole discretion to determine the relevance of evidence presented during the Department Manager's case-in-chief.
2. Following the direct examination of a witness by the Department Manager, the Employee shall be afforded the opportunity to cross-examine said witness.
3. Following the cross-examination of a witness, the Department Manager shall be afforded the opportunity to re-examine said witness.
4. Following the re-examination of a witness, the Employee shall be afforded the opportunity to cross-examine said witness.

5. The Hearing Officer may examine a witness, the Department Manager, the Employee, or a representative of the Department Manager or Employee at any time.

d) Case-in-Chief; Employee
   1. The Employee's case-in-chief may consist of witness testimony, the submission of exhibits, and the Employee's testimony. The Hearing Officer shall have the sole discretion to determine the relevance of evidence presented during the Employee's case-in-chief.
   2. Following the direct examination of a witness, the Department Manager shall be afforded the opportunity to cross-examine said witness.
   3. Following the cross-examination of a witness, the Employee or the Employee's representative shall be afforded the opportunity to re-examine said witness.
   4. Following the re-examination of a witness, the Department Manager shall be afforded the opportunity to cross-examine said witness.
   5. The Hearing Officer may examine a witness, the Department Manager, the Employee, or a representative of the Department Manager or Employee at any time.

e) Closing Statements
   1. Following the cases-in-chief of the Department Manager and the Employee, the Department Manager and the Employee are entitled to give closing statements prior to the conclusion of the Appeal Hearing. The Hearing Officer shall consider the closing statements in the following order:
      a. Department Manager
      b. Employee
      c. Department Manager's rebuttal

f) Conclusion
   The Administrative Services Director shall conclude the Appeal Hearing and notify the parties of the date and time by which the Hearing Officer shall make a final determination.

g) The Rules of Evidence are not applicable to the Appeal Hearing; the Hearing Officer may consider all evidence submitted by the parties that the Hearing Officer deems relevant and consistent with the provisions of this Chapter.

h) The standard of compliance for observation of the rules and procedures contained in this Chapter shall be substantial compliance. The failure to observe any rule or procedure contained in this Chapter shall not form the basis of or give rise to any claims, damages, demands, suits, proceedings, or causes of action of any kind or character whatsoever against the City or its employees, agents, representatives, officials, Council or board members, including, but not limited to, claims for declaratory relief, claims under the state or federal constitutions, contract, tort, or other statutory or common law claims.

i) The Hearing Officer may adopt additional rules and procedures as may be deemed necessary for the orderly conduct of the Appeal Hearing. The Hearing Officer shall have the sole discretion to implement additional rules and procedures necessary for the orderly conduct of the Appeal Hearing.

5) Determination of Hearing Officer

a) The Hearing Officer shall consider the evidence presented at the Appeal Hearing and determine the following issues:
   1. Whether reasonable grounds exist to support the allegation(s) that the Employee engaged in Prohibited Conduct; and
   2. Whether a reasonable basis exists for the Department Manager's administration of the Adverse Action.

b) The Hearing Officer shall make his/her final determination within two (2) Business Days of the conclusion of the Appeal Hearing and issue a Notice of Appeal Hearing Determination.
c) Notice of Appeal Hearing Determination
    1. The Hearing Officer's final determination shall uphold, modify, or reverse the Adverse Action.
    2. The Hearing Officer shall issue a Notice of Appeal Hearing Determination to the Employee detailing said final determination, and issue a copy of the same to the Department Manager and the Administrative Services Director.
    3. If the Hearing Officer's final determination results in a suspension of five (5) Workdays or less, the Employee shall have no right to seek administrative review of the Adverse Action by the Personnel Appeals Board and the Hearing Officer's final determination shall be final.
    4. If the Hearing Officer's final determination results in a Suspension of more than five (5) Workdays, a Demotion, or Termination, the Employee shall have the right to seek administrative review of the Adverse Action by the Personnel Appeals Board. The Notice of Appeal Hearing Determination shall contain a statement indicating that the Employee has the right to seek administrative review of the Adverse Action by the Personnel Appeals Board in accordance with the requirements and procedures of this Chapter.
    5. A final determination resulting in the Employee's Suspension, Demotion, or Termination shall be stayed upon the filing of a Notice of Appeal to the Personnel Appeals Board in accordance with the requirements and procedures of this Chapter.

l. Notice of Appeal to the Personnel Appeals Board

1) If the Hearing Officer's final determination results in a Suspension of more than five (5) Workdays, a Demotion, or Termination, the Employee may seek administrative review of the Adverse Action by the Personnel Appeals Board by filing a Notice of Appeal to the Personnel Appeals Board.
2) A Notice of Appeal to the Personnel Appeals Board must be filed within two (2) Business Days of the Employee's receipt of a Notice of Appeal Hearing Determination.
3) A Notice of Appeal to the Personnel Appeals Board shall contain the information required by Section 1.h(3).
4) A proper and timely Notice of Appeal to the Personnel Appeals Board shall be perfected upon the Administrative Services Department's receipt of the Notice of Appeal. If a Notice of Appeal to the Personnel Appeals Board does not contain the information required by Section 1.h(3), but is otherwise proper and timely, the Administrative Services Director shall notify the Employee of such defect within two (2) Business Days following the Administrative Services Department's receipt of the Notice of Appeal to the Personnel Appeals Board.
5) Upon receiving notification that a Notice of Appeal to the Personnel Appeals Board does not contain the information required by Section 1.h(3), the Employee shall correct the defect and supplement the missing information within two (2) Business Days of the Employee's receipt of the notice required by Section 1.l(4).

m. Personnel Appeals Board; Composition

1) The Personnel Appeals Board shall consist of three (3) members, to include: (i) two (2) City Council members; and one (1) resident of the City who is not employed by the City.
2) All appointments to the Personnel Appeals Board shall be made by the Mayor.
3) The Mayor shall designate a Board member to serve as Chairman of the Personnel Appeals Board.

n. Setting of Personnel Appeals Board Hearing

1) Following the perfection of a Notice of Appeal to the Personnel Appeals Board, the Administrative Services Director shall notify the Personnel Appeals Board members of said notice and the Board members shall provide the Administrative Services Director with dates and times of availability for the scheduling of the Appeal Hearing.
2) The Personnel Appeals Board hearing shall occur no later than fifteen (15) Business Days following the perfection of the Notice of Appeal to the Personnel Appeals Board.
3) Notwithstanding Section 1.n(2), the Personnel Appeals Board hearing may occur later than fifteen (15) Business Days following the perfection of the Notice of Appeal upon mutual agreement of the Department Manager and the Employee.
4) Upon final setting of the Personnel Appeals Board Hearing, the Administrative Services Director shall send the Notice of Appeals Board Hearing to the Employee, Board members, and Department Manager. Upon final setting of the Personnel Appeals Board Hearing, the Administrative Services Director shall send a Notice of Personnel Appeals Board Hearing to the Employee, the Personnel Appeals Board members, and the Department Manager. The Notice of Personnel Appeals Board Hearing shall consist of the following information:
    a) The name and position of the Employee;
    b) The name and position of the Employee's Supervisor;
    c) The date, time, and location of Personnel Appeals Board Hearing; and
    d) The reason/basis for appeal, as indicated by the Employee in the Notice of Appeal.

o. Personnel Appeals Board Hearing Procedure

1) For purposes of the Personnel Appeals Board Hearing, the Personnel Appeals Board shall observe the rules and procedures prescribed by Section 1.k unless otherwise stated herein.
2) The Personnel Appeals Board shall serve as the final arbiter of all matters appealed pursuant to Section 1.l and shall have all rights, privileges, and obligations delegated to the Hearing Officer by Section 1.k for the purpose of this Section.
3) Open Meetings Act; Compliance
    a) The Personnel Appeals Board shall observe all applicable requirements of Chapter 551 of the Texas Government Code, as amended, with respect to any Personnel Appeals Board Hearing conducted pursuant to this Chapter.
    b) A Personnel Appeals Board Hearing shall commence and conclude in open session, and all final decisions of the Personnel Appeals Board shall be voted on in open session. For the purpose of this Chapter, "open session" means the portion of the Personnel Appeals Board Hearing that is conducted in a manner that is open to the public.
    c) The Personnel Appeals Board may conduct a hearing and deliberation in a closed session.
    d) At commencement of a Personnel Appeals Board Hearing, the Employee shall notify the Personnel Appeals Board of the Employee's election to have the hearing conducted in open session.
    e) If the Employee wishes for the Personnel Appeals Board's deliberation of the evidence presented at the hearing to occur in open session, the Employee shall object to the Personnel Appeals Board recessing to closed session following the announcement that the Board will recess to closed session.
    f) Upon receiving the Employee's objection pursuant to Section 1.o(3)(e), the Personnel Appeals Board shall not recess to closed session and said deliberation shall occur in open session.
    g) Notwithstanding the Employee's objection pursuant to Section 1.o(3)(e), the Personnel Appeals Board shall have the sole and absolute discretion to include any person in a closed session whose participation necessary to the matter under consideration.

4) Closed Session; Certified Agenda or Recording
    a) The Administrative Services Director shall keep a certified agenda or make a recording of a closed session held by the Personnel Appeals Board.
    b) A certified agenda of a closed session shall include the following:
        1. A statement of deliberation subject matter;
        2. A record of any action taken; and
        3. The date and time of the beginning and end of the closed session.
5) Determination of the Personnel Appeals Board
    a) The Personnel Appeals Board shall consider the evidence presented at the Personnel Appeal Board Hearing and make a determination as set forth in Section 1.k.5(a)i.
    b) The Personnel Appeals Board shall make its final determination by majority vote in open session following its deliberation of the evidence presented at the hearing. The decision of the Personnel Appeals Board shall be the final and cumulative determination of an Adverse Action matter.
6) Notice of Personnel Appeals Board Determination
    a) The Personnel Appeals Board's final determination shall uphold, modify, or reverse the Adverse Action.
    b) The Personnel Appeals Board shall issue a Notice of Personnel Appeals Board Determination to the Employee detailing said final determination, and issue a copy of the same to the Department Manager and the Administrative Services Director.
    c) The Notice of Personnel Appeals Board Determination shall be issued within three (3) Business Days following the adjournment of the Personnel Appeals Board Hearing.

p. Litigation; Judicial Review

The Employee who has exhausted all administrative remedies and appeals pursuant to this Chapter may file suit in a Midland County state district court.

1) A suit filed pursuant to this Section shall be by verified petition specifying the grounds of illegality regarding the final administrative decision. The verified petition shall be filed no later than the thirtieth (30th) day following the date on which the Employee has exhausted all administrative remedies and appeals pursuant to this Chapter.
2) A state district court shall confine its review of an action made pursuant to this Chapter to the City's record and any evidence of procedural errors alleged to have occurred by the Employee. In performing such review, a state district court shall apply the substantial evidence standard.
3) A state district court that reviews a final determination made pursuant to this Chapter shall not award any costs or attorney fees against the City.

Section 2 Lay-Off

a. Notwithstanding any contrary provision contained in this Chapter, a Department Manager is authorized to lay-off an Employee for reasons that include, but are not limited to, the following:
    1) Change in the Employee's job duties and/or functions;
    2) Change in the organizational structure of the City's administration; and
    3) Lack of funding for the Employee's position or other budgetary constraint.
b. If a Department Manager seeks to lay-off an Employee pursuant to Section 2.a, the Department Manager shall use reasonable efforts to give said Employee at least two (2) weeks' written notice when feasible; provided, however, that no such notice shall be due for the lay-off of a temporary or part-time worker.
c. An Employee that was previously laid off pursuant to Section 2.a and had satisfactory service while employed with the City shall be eligible for rehire upon the subsequent vacancy of a position for which such former employee is eligible.

Section 3 Exit Interview

Upon the request of a Department Manager or an Employee who is due to be laid off or terminated, an exit interview between the Department Manager or his/her designee and the Employee shall occur in the Administrative Services Office.

Section 4 Name-Clearing Hearing

Upon the finalization of any Termination and an Employee's exhaustion of all appeal procedures pursuant to this Chapter, the Employee shall be entitled to a Name-Clearing Hearing before the City Manager.

a. An Employee seeking a Name-Clearing Hearing shall submit a written request for such hearing to the Administrative Services Director.
b. Upon receipt of an Employee's request for a Name-Clearing Hearing, the Administrative Services Director shall deliver said written request to the City Manager within two (2) Business Days.
c. A Name-Clearing Hearing shall occur within ten (10) Business Days of the City Manager's receipt of the Employee's written request.
d. At the Name-Clearing Hearing, an Employee may address any allegation made by the City or its employees, agents, officials, Council or board members relating to said Employee's discharge.
e. Following the Name-Clearing Hearing, the City Manager may issue an exculpatory statement deemed to be just or necessary. If the City Manager issues an exculpatory statement, he/she shall cause said statement to be mailed to the Employee's address on file with the Administrative Services Department and place a copy in the Employee's personnel file. It shall be in the City Manager's sole and absolute discretion whether to issue an exculpatory statement.

Chapter IX

Grievance Procedure

Section 1 Policy

It is the policy of the City to treat all employees fairly and equitably. Any employee who feels aggrieved in his/her employment with the City has a right to present a grievance to appropriate management officials for prompt consideration. The filing of a grievance by an employee shall not reflect unfavorably on the employee's standing, and the employee should not fear reprisal or retaliation for utilizing the procedures below. For the purposes of this Chapter, capitalized terms used herein without definition shall have the meanings assigned in Chapter VIII.

Section 2 Definitions

a. "Grievance" means a formal complaint (and any relevant supporting documentation) raised by an Employee regarding an employment matter.

b. "Immediate Supervisor" means the person charged with the daily oversight and management of the Employee claiming a grievance.

Section 3 General Provisions

a. The City shall attempt to resolve a Grievance using reasonable efforts and due diligence with regard to the procedures prescribed by this Chapter. The time limits prescribed by Section 4 may be extended by mutual written agreement between the Employee and pertinent City representative.

b. The Supervisor's or Department Manager's failure to address a written Grievance in accordance with the procedures prescribed by Section 4 shall permit the Employee to proceed to the following Step and file the written Grievance with the Department Manager or City Manager, as applicable.

c. An Employee's failure to respond to a decision within the time limits specified in Section 4 shall be deemed to be an acceptance of said decision.

d. A Grievance shall be initiated within ten (10) Business Days of: (i) the date on which the matter that is the subject of the Grievance occurred, or (ii) the date on which the matter that is the subject of the Grievance became known to the Employee.

Section 4 Procedure

a. Informal Step: The Employee may discuss a Grievance with his/her Immediate Supervisor in an effort to resolve the matter informally.

b. Step 1:
   1) The Employee may file a written Grievance with his/her Immediate Supervisor and request a conference to occur within five (5) Business Days to discuss a formal resolution of the matter.
   2) Upon receipt of a written Grievance, the Immediate Supervisor shall either: (i) schedule a conference to discuss a formal resolution of the matter in accordance with Section 4.b(1); or (ii) take action that addresses the matter described in the written Grievance to the reasonable satisfaction of the Employee.

3) Following a conference to discuss a formal resolution of a Grievance, the Immediate Supervisor shall render a written decision regarding the Grievance within ten (10) Business Days.
4) Following an action taken by the Immediate Supervisor to address the matter described in the written Grievance, the Immediate Supervisor shall issue a memorandum that details the Immediate Supervisor's action.

c. Step 2:
1) If the Employee is not satisfied with the Immediate Supervisor's decision pursuant Section 4.b, the Employee may file the written Grievance with the Department Manager and request a conference to occur within five (5) Business Days to discuss a formal resolution of the matter. The Employee shall file the written Grievance within five (5) Business Days of the Employee's receipt of the Immediate Supervisor's decision.
2) Upon receipt of a written Grievance, the Department Manager shall either: (i) schedule a conference to discuss a formal resolution of the matter in accordance with Section 4.c(1); or (ii) take action that addresses the matter described in the written Grievance to the reasonable satisfaction of the Employee.
3) Following a conference to discuss a formal resolution of a Grievance, the Department Manager shall render a written decision regarding the Grievance within ten (10) Business Days.
4) Following an action taken by the Department Manager to address the matter described in the written Grievance, the Department Manager shall issue a memorandum that details the nature of the Department Manager's action.

d. Step 3:
1) If the Employee is not satisfied with the Department Manager's decision pursuant to Section 4.c, the Employee may file the written Grievance with the City Manager (through the Administrative Services Director) and request a conference to occur within ten (10) Business Days. The Employee shall file the written Grievance within five (5) Business Days of the Employee's receipt of the Department Manager's decision. The written Grievance shall contain all complaints and relevant facts that pertain to the matter described in the written Grievance.
2) Upon receipt of a written Grievance, the City Manager or his/her designee shall either: (i) schedule a conference to discuss a formal resolution of the matter in accordance with Section 4.d(1); or (ii) take action that addresses the matter described in the written Grievance to the reasonable satisfaction of the Employee.
3) Following a conference to discuss a formal resolution of a Grievance, the City Manager or his/her designee shall render a written decision regarding the Grievance within ten (10) Business Days.
4) Following an action taken by the City Manager or his/her designee to address the matter described in the written Grievance, the City Manager or his/her designee shall issue a memorandum that details the nature of the City Manager's or his/her designee's action.
5) A decision or action taken by the City Manager or his/her designee shall be final and satisfy the City's obligations regarding the consideration of the Grievance.

Section 5 Written Decisions and Memorandums

A written decision or memorandum issued pursuant to Section 4 shall be sent to the Employee, the Department Manager, and the Immediate Supervisor, as applicable. A copy of a written decision or memorandum issued pursuant to Section 4 shall be attached to a copy of the written Grievance and kept in the Employee's personnel file in the Administrative Services office.

Chapter X

Retirement System and Other Benefits

Section 1 Texas Municipal Retirement System

All regular employees are required as a condition of their continued employment to enroll in the Texas Municipal Retirement System. Seasonal, part-time, temporary, Fire Department employees and others exempt by State law, are not eligible to enroll in the retirement system, unless otherwise provided for herein or by State law.

a. Deposits. Each member of the retirement system shall, by payroll deduction, be required to contribute a percentage not to exceed seven percent (7%) of his monthly salary. The City shall also deposit a certain percentage for the benefit of each member employee as required by law.

b. Withdrawal of Deposits. If an employee leaves the service of the City for any reason, he may withdraw the deposits he has made plus any interest earned on such deposits.

c. Retirement Benefits and Restrictions. Benefits payable upon the death or retirement of an employee and any restrictions or limitations upon participation in the retirement system shall be in accordance with the provisions of the Texas Municipal Retirement System Act, Subtitle G of Title 8, Government Code.

Section 2 Firemen's Relief and Retirement

All employees of the regular City of Midland Fire Department shall be required as a condition of employment to participate in and make contributions to the Firemen's Relief and Retirement Fund. Contributions to and participation in the Firemen's Relief and Retirement Fund shall be in accordance with the provisions of Article 6243e, V.A.T.S.

Section 3 Federal Insurance Contributions Act

a. **Old-Age, Survivors, and Disability Insurance Tax (Social Security**)
All employees, except those who contribute to and participate in the Midland Firemen's Relief and Retirement Fund and others excluded by law, shall make contributions by payroll deductions to the Old-Age, Survivors, and Disability Insurance Tax (Social Security). All employees, upon commencement of employment with the City, must possess a Social Security Card.

b. **Medicare Tax**
All employees shall make contributions by payroll deductions to the Medicare Tax except those who are excluded by law.

Chapter XI

Safety

Section 1 General

These personnel rules are subject to modification when same are required to protect the safety or health of any employee. They are also subject to modification if same are necessary to comply with any state, federal, or local safety laws and regulations.

Section 2 Accident Review Board

The City Manager appoints the members of this Board with the Safety and Risk Manager as chairman. The primary function of the Board is to review all motor vehicle accidents and personal injuries occurring on the job. The Board shall consult with the administrative body of the City as well as Department/Division Managers, supervisory personnel, and other employees concerning the removal of hazardous conditions, disciplinary actions, and other improvements of the overall safety program. The Board shall not review any accident or personal injuries where a potential or existing claim or potential or existing lawsuit is pending against the City or a City employee.

Chapter XII

Employment at Will

Section 1 Council Appointees, Other Employees and Department Managers

a. When used in this Chapter, the following capitalized terms shall have the meanings set forth below:

"Council Appointees" shall mean City Manager, City Attorney, City Secretary, Municipal Court Presiding Judge, and Municipal Court Associate Judge.

"Department Managers" shall mean Director of Administrative Services, Director of Airports, Chief Information Officer, Director of Community Services, Director of Development Services, Director of Engineering Services, Director of Finance, Fire Chief, Director of General Services, Internal Auditor, Police Chief, Director of Solid Waste Management, and Director of Utilities, and any other department manager approved by the City Council.

"Other Employees" shall mean Deputy City Manager, Assistant City Manager, and First Assistant City Attorney.

b. All Council Appointees, Other Employees, and Department Managers shall be **EMPLOYEES AT WILL** and may be terminated at any time by the City of Midland with or without cause, subject to the City's personnel policies and procedures, and the terms and conditions of any applicable employment agreement.

c. In the event of an Involuntary Separation (as defined in this Chapter), a Council Appointee shall be entitled to receive a lump sum payment equal to six (6) months of his or her annual base salary as well as any other severance or separation compensation payment(s) set forth in his or her employment agreement. An Other Employee or a Department Manager shall be entitled to receive a lump sum payment equal to six (6) months of his or her annual base salary.

Notwithstanding any contrary provision of this Chapter, the City shall have no obligation to pay the severance sum(s) set forth herein if a Council Appointee, Other Employee or Department Manager is terminated for one of the following reasons: (i) conviction of a felony; (ii) conviction of a misdemeanor involving moral turpitude (which shall mean a misdemeanor involving dishonesty, fraud or deceit); or (iii) misconduct or violation of a City policy, rule, or regulation that by its nature has an adverse effect on the City, the confidence of the public in the integrity of the City, or the relationship of the employee and other employees (a *"Policy Violation"*). The determination of whether conduct constitutes a Policy Violation shall be in the sole discretion of the City Council for Council Appointees, the City Manager for a Deputy City Manager, an Assistant City Manager, or a Department Manager, and the City Attorney for the First Assistant City Attorney.

"Involuntary Separation" as used in this Chapter shall have the following meaning:

1) Resignation of a Department Manager or Other Employee within sixty (60) days following a reduction in salary in a greater percentage than an applicable across-the-board reduction for all City employees;

2) Termination of a Department Manager, a Deputy City Manager, or an Assistant CityManager by the City Manager;

3) Termination of the First Assistant City Attorney by the City Attorney; or

4) Termination of a Council Appointee by a vote of at least four (4) City Council members ata regular City Council meeting; or

5) Termination of a Department Manager, Other Employee or Council Appointee for a reason set forth in such employee's employment agreement with the City in accordancewith the terms and conditions of such employment agreement.

d. A Council Appointee shall enter into an employment agreement to be approved by the City Council. A Deputy City Manager shall enter into an employment agreement to be approved by theCity Manager. An Assistant City Manager shall enter into an employment agreement to be approved by the City Manager. The First Assistant City Attorney shall enter into an employment agreement to be approved by the City Attorney. A Department Manager shall enter into an employment agreement to be approved by the City Manager. In the event that any conflict exists between a provision of this Chapter and a provision of any such employment agreement, then theprovision of the employment agreement shall apply and take precedence over the conflicting provision contained in this Chapter.

e. A City employee deemed to be an exempt employee under the Fair Labor Standards Act shall only be suspended for period of at least one (1) week; provided, however, that a suspension of anexempt employee in good faith for an infraction(s) of a safety rule(s) of major significance may befor a period of less than one (1) week. This subsection shall be construed, interpreted, and administered in accordance with the Fair Labor Standards Act, as amended.

Section 2 Applicability

These rules, policies and procedures shall apply to and govern all employees of the City of Midland, expect when these rules affecting firefighters and police officers are inconsistent with State legislation. Words usedin the singular shall be construed to read in the plural and words used in the masculine gender shall be construed to read in the feminine. Failure to comply with these policies may result in disciplinary action being taken against an employee. Nothing in these rules, policies and procedures, except Chapter XII, should be construed as an employment agreement, guarantee of or contract for continued benefits from oremployment by the City of Midland. Severance as defined in these rules and policies shall mean salary and all other compensation and benefits. Severance shall be paid in a lump sum upon involuntary separation. The Mayor shall have the authority to execute and approve amendments and modifications to employment agreements entered into under Chapter XII. The standard for compliance by the City with these personnel policies, rules or procedures shall be substantial compliance. A violation of or failure to follow any rule or procedure shall not form a basis for any civil or criminal action against the City or any employee or official of the City who is acting on behalf of the City except as authorized by Sections 271.151 through 271.160 of the Texas Local Government Code, as amended. The administrative remedy set out in these rules and procedures is the exclusive remedy. There shall be no appeal to or action in any court except on constitutional or statutory grounds. These personnel rules, policies and procedures shall be implemented, administered and construed to comply with applicable local, state and federal laws. That the term Other Employees or Other Employee as used in these policies shall only mean the Deputy City Manager, Assistant City Manager and First Assistant City Attorney. That Chapter XII and its related definitions, and its related essential terms and benefits are a contract for providing services as authorized by Sections 271.151 through 271.160 of the Texas Local Government Code, as amended. The testing of employees conducted in conjunction with the administration and enforcement of the City's drug and alcohol testing policy shall be conducted in accordance with the United States Constitution, the Texas Constitution, federal and state laws, and regulations and judicial precedent. Except as outlined in Chapter XII, an

employee's at-will employment status is not modified by these policies and the Midland City Council reserves the right to amend these personnel policies in accordance with applicable statutes. As used in these rules and policies, Council Appointees shall mean the City Manager, City Attorney, City Secretary, the Presiding Municipal Court Judge and the Associate Municipal Court Judge. It is not required that employee sign these rules, policies and procedures, or any other document, in order to be bound by said rules, policies and procedures. Each employee shall be bound by these rules, policies and procedures by accepting employment with the City of Midland and performance of his or her job duties.

City of Midland, Texas
Personnel Policies

ORIGINAL PRINT, 1970

REVISED, July 11, 2023

Certificates

This certificate shall be placed at the beginning of the City's Personnel Policies. Resolution Number 2009-341, adopted by the Midland City Council on December 8, 2009, amends the Cityof Midland Personnel Policies. The City of Midland Personnel Policies are amended as if Resolution Number 2009-341 was entirely incorporated and written verbatim into the City of Midland Personnel Policies. Lori Blong, Mayor

Personnel Policies
With Explanations

Foreword

The intent of this document is to provide helpful personnel information to every employee of the City of Midland. It is compiled after much consideration by many members of the City staff. It is designed as a device for better understanding and communication among the employees.

This manual is to be used as a reference, and knowledge of its contents is essential.

Policy changes may occur often, and the information in this handbook will change. As an employee, your input is important and appreciated.

City of Midland Personnel Policies

Chapter I

Purpose

Section 1 Objectives

The objectives of these rules are to facilitate efficient and economical services to the public and to provide for a fair and equitable system of personnel management for the City. While these rules constitute a precise statement of policies and procedures, they are not intended to cover every conceivable personnelsituation that may arise. As with any ordinance or regulation, these rules must be supplemented with administrative regulations in addition to the principles and policies set forth. For this reason, considerable latitude shall be given to the City Manager and the Administrative Services Director for administration of these policies within the framework set forth in these rules. It is expected that amendments and revisions affecting personnel policies will be made from time to time when they are necessary to meet changing conditions.

Section 2 Applicability

These rules, policies and procedures shall apply to and govern all employees of the City of Midland, except when these rules are inconsistent with State legislation. Words used in the singular shall be construed to read in the plural and words used in the masculine gender shall be construed to read in the feminine. Failure to comply with these policies may result in disciplinary action being taken against an employee. Nothing in these rules, policies and procedures, except Chapter XII, shall be considered or construed to establish an employment agreement or contractor right of employment with the City of Midland. Nothing in these policies, rules and procedures, except Chapter XII, should be construed as an employment agreement, guarantee of or contract for continued benefits from or employment by the City of Midland. Severance as defined in these rules and policies shall mean salary and all other compensation. Severance is to be paid in a lump sum upon involuntary separation. The Mayor shall have the authority to execute and approve amendments and modifications to employment agreements entered into under Chapter XII. The standard for compliance by the City with these personnel policies, rules or procedures shall be substantial compliance. A violation of or failure to follow any rule or procedure shall not form a basis for any civil or criminal action against the City or any employee or official of the City who is acting on behalf of the City except as authorized by Sections 271.151 through 271.160 of the Texas Local Government Code, as amended. The administrative remedy set out in these rules and procedures is the exclusive remedy. There shall be no appeal to or action in any court except on constitutional or statutory grounds. These personnel rules, policies and procedures shall be implemented, administered and construed to comply with applicable local, state and federal laws.That the term Other Employees as used in these policies shall only mean the Deputy City Manager, Assistant City Manager and First Assistant City Attorney. That Chapter XII and its related definitions are a contract for providing services as authorized by Sections 271.151 through 271.160 of the Texas Local Government Code, as amended. The testing of employees conducted in conjunction with the administration and enforcement of the City's drug and alcohol testing policy shall be conducted in accordance with the United States Constitution, the Texas Constitution, federal and state laws, and regulations and judicial precedent. Except as outlined in Chapter XII, an employee's at-will employment status is not modified by these policies and the Midland City Council reserves the right to amend these personnel policies in accordance with applicable statues. As used in these rules and policies, council appointees shall mean the City Manager, City Attorney, City Secretary, the Presiding Municipal Court Judge and the Associate Municipal Court Judge.

Section 3 Nondiscrimination

Equal employment opportunities shall be afforded to all qualified persons seeking employment with the City of Midland, Texas, and no person shall be refused employment because of race, age, color, creed, sex, national origin, disability, or genetic information, nor shall any person be promoted, demoted, transferred or discharged for reasons other than merit. Discrimination against any person in recruitment, examination, appointment, training, promotion, retention, discipline, compensation or any other aspect of

personnel administration because of race, age, color, creed, sex, national origin, disability, or genetic information is prohibited.

Section 4 Mission

We, the employees of the City of Midland, are passionate and energetic about the service we provide to each other and our community.

Section 5 Vision

Midland is a growing urban center in Texas, with a healthy economy and a vibrant downtown.

We enjoy great living, abundant leisure opportunities, and effective transportation-easy movement through our City.

Our diverse Midland community works together for a bright sustainable future; our City is recognized as a leader.

Section 6 Guiding Principles

1. Demonstrate integrity, respect and value everyone.
2. Exhibit professionalism by being accountable and dependable.
3. Exercise cooperation through a dedication to serve others.

Chapter II

General Provisions

Section 1 Political Activity

While in uniform or on active duty, an employee of the City of Midland may not engage in a political activity relating to a campaign for an elective office.

For the purposes of this section, a person engages in a political activity if the person:

a. Makes a public political speech supporting or opposing a candidate;

b. Distributes a card or other political literature relating to the campaign of a candidate;

c. Wears a campaign button;

d. Circulates or signs a petition for a candidate;

e. Solicits votes for a candidate;

f. Solicits campaign contributions for a candidate.

While out of uniform and not on active duty, an employee of the City of Midland may engage in a political activity relating to a campaign for an elective office, including each activity listed, except that the person may not solicit campaign contributions for a candidate other than from members of an employee organization to which that person belongs. See Texas Local Government Code 150.002.

Section 2 Disclosure of Religious Affiliations

No question in any text, in any application form or in any personnel proceeding, or of any appointing authority, shall be so framed as to attempt to elicit information concerning religious opinions or affiliations of any applicant or employee. No appointment to, or removal from, a position with the City of Midland shall be affected or influenced in any manner by any religious opinion or affiliation.

Section 3 Nepotism

a. No person related, within the second degree of affinity (marriage) or within the third degree of consanguinity (blood), to the Mayor, member of the City Council, or the City Manager shall be appointed to any office, position or clerkship or other service to the City.

b. In addition to the above stipulation, it is hereby provided that relatives or family members related within the second degree of affinity or the second degree of consanguinity (as defined in section "d" of this regulation) shall not be appointed to serve in positions in the same division (except for Police and Fire Departments, where the term “on the same shift assignment” shall be substituted for the term “in the same division”) or in a position where one relative is to supervise or have influence over the other's employment. Any Department Manager who feels that such appointments are justified and necessary must present to the Administrative Services Director the reason and needs which are the basis for requesting the appointment. The City Manager's approval will be needed to make the appointment official.

c. In the event of reorganization, promotion, or marriage between two City employees, the following shall apply:

1) If the affected employees are employed in different departments or different divisions of a department and neither is in a position to supervise or have influence over the other's employment, no change in employment status will be required,

2) If the affected employees are employed in the same division of a department (or one is in a position to supervise or have influence over the other's employment), one of them must seek a transfer to another division of that department or to another department. Said employee may apply for any position for which they meet the minimum qualifications, but cannot remain in the same division for more than 90 days. At the end of the 90-day period one of the two must either terminate employment or accept reassignment to a position selected by the City Manager. Such reassignment shall be at the City Manager's sole discretion with due regard for the individual's skills and qualifications and the organization's needs. The City Manager may extend the 90 day limit an additional 90 days if the City Manager finds an extension to be in the best interest of the City of Midland.

d. For the purpose of this policy, the following shall constitute familial relationships:

1) Consanguinity (Blood): 1st degree includes Mother, Father, Son and Daughter; 2nd degree includes Brother, Sister, Grandfather, Grandmother, Grandson, Granddaughter; 3rd degree includes Uncle, Aunt, Nephew, Niece, Great Grandson, Great Granddaughter, Great Grandfather, Great Grandmother.

2) Affinity (Marriage): 1st degree includes Spouse, Mother-in-law, Father-in-law, Son-in-law, and Daughter-in-law (for the purposes of this policy 1st degree relationship will also apply to Stepmother, Stepfather, Stepson, and Stepdaughter); 2nd degree includes Brother-in-law, Sister-in-law (for the purpose of this policy 2nd degree relationship will also apply to Stepbrother and Stepsister), Grandfather-in-law, Grandmother-in-law, Grandson-in-law, Granddaughter-in-law.

Relatives who are currently employed in situations that would be a violation of this policy on the date it becomes effective shall not have their current employment status affected.

Section 4 Oath of Office

"All officers of the City, whether elective or appointive, shall qualify by taking the oath prescribed by the constitution of this state and by executing such bond as may be required under the provisions of this Charter and the ordinances and resolutions of the City". (Charter of the City of Midland, Article IV, Section 8)

Section 5 Solicitations

No solicitation of funds of any character or for any purpose whatsoever shall be permitted among city employees on the job without the express approval of the City Manager.

Section 6 Financial Responsibility of Employees

Employees of the City of Midland are expected to maintain a good credit standing in the community and to pay their obligations promptly. The City shall in no way serve as a collecting agency or arbitrator. Failure of an employee to pay or make reasonable provisions for future payment of his debts to such an extent that such failure shall be detrimental to the City services may be just cause for dismissal.

Section 7 Outside Employment

Full-time City employees are not encouraged to accept additional employment from another source. However, in certain situations, occasional and part-time work will be allowed if approved by the Department Manager and the City Manager and if the work does not constitute a conflict of interest, does not interfere with the employee efficiently carrying out his normal duties with the City, and does not involve the use of City time or City equipment. If an employee shall become unable to perform the duties of his City job because of any injury or other incapacitating cause while in the employment of an employerother than the City, the City may, at its sole option, reduce the benefits otherwise granted by thesepolicies to whatever amount or degree the City deems to be justified.

Section 8 City-Owned Vehicles

All employees who drive City-owned vehicles in the performance of their duties are responsible for their proper operation. No City vehicle or piece of equipment used in normal operation or an emergency vehicle housed at an employee's home is to be used for personal business, except police. No City employee may drive a City vehicle if he does not have a valid driver's license.

Section 9 Employment Conditions

These rules shall become a part of the employment conditions of each employee and employment or continued employment with the City shall be contingent upon the employee's compliance with theprovisions of these rules. Within ninety (90) days after the adoption of these rules and at the time of employment of each new employee, a copy of these rules in handbook form incorporating pertinent phrases of these rules shall be furnished to each employee.

Section 10 Amendment and Revision of Rules

The Director of Administrative Services may make recommendations for amendment and revision ofthese rules to the City Manager. If the City Manager shall approve such changes, he in turn shall submit them to the City Council for their approval. All rules and amendments thereto shall become effective uponthe date of their approval by the City Council.

A copy of the Personnel Policies, Rules and Procedures, and all amendments or changes shall be filed in the office of the City Secretary and shall be available for inspection by all City employees and the public. Such filing shall constitute notice to all employees of the personnel policies, rules and procedures and of all amendments and changes. The Personnel Policies, Rules and Procedures manual, as amended or changed from time to time, shall supersede any conflicting provisions previously adopted. The rules, policies and procedures described herein may be amended, changed or terminated in whole or in part, at any time by the City of Midland. If an employee continues to work for the City of Midland for thirty (30) days after the effective date of any such amendment, change or termination, the employee will be deemed to have accepted such amendment, change or termination.

Section 11 Possession of Weapons

No employee, other than a peace officer, shall carry on or about his/her person, at a City work site, any instrument or weapon that is specifically designed, made, or adapted for the purpose of inflicting serious bodily injury or death, including, but not limited to, clubs, firearms, handguns, illegal knives, explosives, crossbows, bow and arrows, throwing stars and knuckles. No employee, other than a peace officer, shall carry a concealed weapon in any City building, regardless of whether or not the person is duly licensed by the State of Texas to carry a concealed handgun. No employee, other than a peace officer, may carry a weapon on or about his/her person at any time while conducting City business. The term "City work site" includes not only City buildings and property, but also other assigned work locations, City vehicles and City equipment. The term "City building" means any and all buildings or portions of buildings owned, leased, or otherwise controlled by the City of Midland.

Chapter III

Organization and Administration

Section 1 Organization of Personnel

a. The City Council. "The compensation of all appointive officers and employees shall be fixed by the City Council, who may increase or diminish compensation at will or abolish any appointive office entirely at any time." (Charter of the City of Midland, Article IV, Section 14c)

b. The City Manager. The City Manager will advise the City Council on personnel matters and recommend to them changes in personnel policies, changes in personnel rules and regulations, the compensation rates of appointive officers and other City employees, and any other changes that he may deem necessary or expedient. The City Manager is responsible for the administration of the personnel program of the City of Midland and to assist him in this function he may appoint a Director of Administrative Services.

c. Director of Administrative Services. The Director of Administrative Services and the Administrative Services Department, acting under his supervision, will represent the City Manager with regard to routine administration of all phases of these rules and policies.

d. Department Managers. Department managers are expected to effectively supervise their employees and to maintain proper working relationships. They may adopt and enforce departmental regulations not inconsistent with these rules and regulations. Department Managers will report on the efficiency of their subordinates and notify the Director of Administrative Services of changes in duties of their employees, in order that the City of Midland classification plan may be maintained. The Department Managers will recommend to the City Manager merit increases for their employees. Department Managers will have the power of appointment and removal in their departments, including the power to appoint division managers. The appointment of new employees by department managers will be made only from eligible applicants referred to them by the Director of Administrative Services with exceptions as noted under Chapter IV, Section 2. Transfers and reclassification should be consummated only after a study of information contained in the individual's file and after consultation with the Director of Administrative Services.

Chapter IV

Applications, Applicants, and Conditions of Employment

Section 1 Basis of Employment

All initial employment with the City of Midland shall be based on merit, ability, and physical and moral fitness, and may include any or all of the following:

a. Training and experience as reflected by the application form, plus other documentary evidence as to certification, registration, etc., if requested;

b. Job related written and/or performance tests as required;

c. A job related physical examination and/or functional capacity screening;

d. Background check for conviction of crimes involving moral turpitude and (in connection with jobs involving the operation of motor vehicles) moving traffic violations;

e. Character investigations made by the Administrative Services Department and/or the manager of the department concerned.

Exceptions to the procedures in this chapter may apply to: (1) Police officers, (2) Firefighters, (3)Seasonal recreation employees, (4) Department managers, (5) Council appointees and their assistants.

Section 2 Recruitment

This function is one of the services performed by the Administrative Services Department, for permanent, part-time, and seasonal employees paid by the City. The central office will maintain files of applications. These are to be obtained through personal contacts from individuals applying to the City, throughcontacts with established employment agencies, and/or by way of advertising. The Director of Administrative Services or those designated by him will conduct the initial recruiting, and screening. Suitable and eligible applicants will be referred to Department Managers or those designated by them for additional interview and employment.

Section 3 Requests for Personnel

When departments submit requests to the Administrative Services Department for persons to fill vacancies, such requests shall include the title of the position to be filled, contemplated initial salary or wages, desired training and/or experience qualifications and such other pertinent information as may be needed to enable the Administrative Services Department to most satisfactorily find the personnel being sought by the department. When circumstances permit, requests for personnel should be made areasonable period of time in advance of the actual need.

Section 4 Applicant Preference

Other qualifications being equal, departments will be expected to extend hiring preference to persons currently employed by the City of Midland.

Section 5 Residence

Other qualifications being equal, applicants who live inside the corporate limits of the City of Midland should be given preference over those living outside the City limits when appointments to positions with the City are being made.

Section 6 Announcements

All positions will be opened to applicants outside the city organization, at the department's discretion, and shall be posted for at least 5 working days. If a shorter publication period is required due to an emergency, written justification should be included with the requisition and must be approved by the City Manager.

Section 7 Application and Selection Procedures

All persons seeking initial employment or re-employment will be required to complete an application with the Administrative Services Department. Applications will be maintained by the City of Midland's Administrative Services Office, City Hall, 300 N. Loraine. Referrals will be made from the City of Midland's applicant database. Suitable and eligible candidates will be selected according to the requirements the department places on the requisition; which will include education, skills, experience and any affirmative action requirements, etc. Candidates will be required to complete typing, data entry, aptitude and/or psychological testing when necessary.

Recruiting departments shall only interview those persons who have completed a City of Midland Application Form. No formal job offers are to be made at the time of the interview. If the interviewer determines that a candidate is acceptable, the Administrative Services office will extend an offer of employment, contingent upon the successful completion of background investigations, physical examinations and/or functional capacity screening, and drug/alcohol screening.

Section 8 Appointments

As indicated above, no person shall be employed prior to completion of the application and selection process described above. The recruiting department shall notify the Administrative Services office of the preferred candidate and the date they would like to have the candidate begin employment. The department shall schedule an appointment with the Administrative Services Department for the enrollment/orientation of all new employees.

If no candidate possessing the minimum qualifications is located or approved by the recruiting department, a lesser-qualified person in a lesser classification may fill the budgeted position.

Section 9 Physical Standards

a. Medical Examination Requirements. All new and former employees will undergo a prescribed medical and/or functional capacity examination, to be made by some officially designated medical authority. The purpose of the examination will be the determination and certification of physical fitness and ability to perform duties of the position to which appointment is being considered. Such examinations are to be made as near the effective date of employment as possible.

The Administrative Services Department has the responsibility of making appointments and arrangements for obtaining the examinations, and matters concerning the initiation and completion of the requirements should be taken up with the Administrative Services Department.

b. Exceptions. Physical standards and requirements may vary somewhat in accordance with the duties and working conditions as generally set forth in the specifications for various positions and also as to anticipated length of employment.

The Administrative Services Department will advise the examining medical officer regarding any special or unusual requirements of this nature. The opinion and recommendation of the examining medical officer will govern and determine the acceptability of any person for employment, and particular attention will be given to the present or future capacity of the prospective employee to perform the required duties of the position, with or without a reasonable accommodation.

The examining medical officer will complete and forward to the Administrative Services Department a complete report on the prescribed form indicating his specific recommendations as to the suitability of the person for employment in the position indicated.

Section 10 Age Requirements

Age limits are indicated in some specifications for various classes of positions, upon the basis of a bona fide occupational qualification or statutory requirement.

Within statutory limits and restrictions, minors may be considered for employment in positions of a non-hazardous nature. In all instances, the parents of such minors shall be required to execute a waiver and release form, which will be provided by the Administrative Services Department. Any questions relative to matters of this nature, which cannot be satisfactorily solved by the Administrative Services department, will be referred to the City Attorney, whose ruling shall be final and governing.

Section 11 Standards of Conduct

To an unusual extent, and in a peculiar sense, employees of a municipal organization are the "Good Will Ambassadors" of the City, and such status involves a degree of duty and obligation regarding public and private conduct which is not common to many other classes of employment. The attitude and deportment of City employees should at all times be such as to promote the good will and favorable attitude of the public toward City Administration and its program and policies.

Section 12 Types of Positions

a. Full-Time. Full-time employees are employees who have a required workweek equaling or exceeding the full-time, established workweek.

b. Part-Time. Part-time employees are hourly paid employees working less than 30 hours each week. Part-time employees who are not temporary employees and who work at least 1,000 hours each year shall participate in the Texas Municipal Retirement System.

Part-Time employees shall not be eligible for Paid Time Off, holidays, or participation in any benefit program, including group insurance programs and other special benefit programs, unless specifically provided for in these policies, or required by State or Federal Law.

c. Temporary. Temporary employees are employees (whether full-time or part-time) who are anticipated to be working for the City for a comparatively short or definitely limited duration, not exceeding 960 working hours within a 12 month period. If a temporary employee who has had no break of time in his service and who works a full eight-hour day and a full normal work week is transferred to permanent status, he will be eligible for all the benefits of a permanent employee retroactive to the employment date of his uninterrupted service.

Section 13 Disqualification for Employment

The Director of Administrative Services may reject any application that indicates on its face that the applicant does not possess the minimum qualifications required for the position, and he may exclude or deny certification to any application for, but not limited to, the following reasons:

a. He does not possess the bona fide occupational qualifications necessary for the performance of the duties of the position to which he seeks appointment.

b. He has intentionally made false statements in his application or in the examination or has practiced or attempted to practice deception or fraud in connection with such application.

c. He is receiving pension benefits under a retirement plan of the City.

d. He refuses to participate in a retirement system, insurance program or social security program as required in these rules under Chapter X.

e. Any other grounds set forth in Chapter VIII of these rules.

Section 14 Probation Periods

a. Every employee, including part-time, seasonal, and temporary employees, shall be on probation for a period of one year (twelve months), unless the City Manager otherwise specifies a shorter period. In no case shall a probation period be less than six months.

b. When the employee first reports for work, he shall be notified of the fact that he will be on probation for the required number of months. During that time, the supervisor shall observe his work with particular care, train, and advise the employee in the performance of his duties, and let him know whether he is progressing satisfactorily. The probationary period of an employee entering duty beforethe 16th of the month shall start on the first day of the same month and that of an employee startingon or after the 16th of the month shall start on the 16th day of the same month.

c. At the close of the probation period, the Department Manager may do one of the following:
1) End the employee's probation status and process any pay increase that may be allowed under the pay plan structure (normally 5% for classified, non-public safety employees);
2) extend the probation period for a period not to exceed three months and so notify theemployee and the Administrative Services Department; or
3) dismiss the employee.

d. Probationary employees are entitled to all benefits as set out in these rules, however, probationary employees may be discharged with or without specific reason and shall not be entitled to the appeal procedure set out in these rules for any adverse action to or termination during the probation period. Probationary employees shall be entitled to a "name clearing hearing" as outlined in Chapter VIII of these rules.

e. Employees promoted or transferred within the City service shall be on probation for their first twelve months. During that time the Department Manager may cancel the promotion or transfer and assign the employee to his former or a similar position. If the former position is no longer available, nor a similar position available, the employee may be discharged under this policy.

Section 15 City of Midland Drug and Alcohol Testing Policy

a. **Introduction**

The City of Midland recognizes that drug and alcohol abuse ranks as one of the major health problems in the world and adversely affects an employee's performance and safety on the job.

Therefore, it is necessary and required by law for the City to provide a drug free working environment for its employees.

It is the City of Midland's intention to comply fully with the DOT's (Department of Transportation) regulations governing drug and alcohol use and testing, and these requirements have been incorporated into this Policy. In the event federal and state regulations are amended, this Policy and the applicable terms, conditions and/or requirements of this Policy shall be deemed to have been amended automatically at that time in order to reflect and be consistent with said regulations.

b. **Definitions and Terms Used in This Policy**

1) **Safety-sensitive function -** for the purpose of this Policy, means any of the following:
   a) Driving or operating any City- owned motor driven equipment on a full time, part time or temporary basis;
   b) Inspecting, servicing, repairing, or conditioning motor equipment; or
   c) Loading or unloading, giving or receiving shipments being loaded or unloaded.

2) **DOT driver** - means any current or prospective employee who may be required to operate a motor vehicle having a gross vehicle weight rating in excess of 26,000 pounds in interstate or intrastate commerce, or driver of a motor vehicle used to transport hazardous materials in quantity that requires the vehicle to be placarded regardless of the vehicle's size.

3) **Safety sensitive worker** - means any current and/or prospective employee who falls into the category of:
   a) Performers of safety-sensitive functions as described in Section 1 above;
   b) Operators of personal vehicles which are used for city business;
   c) Public safety personnel (Police, Fire, etc.); or
   d) Public safety communications personnel.

4) **City business** - includes, but is not limited to, work performed on or in City property including a City vehicle, and work performed on or in a non-City vehicle being used for conducting City business.

5) **Refusing to be tested - means:**
   a) Failing to provide adequate urine specimen for a drug test without a valid medical explanation;
   b) Failing to provide adequate breath for an alcohol test without a valid medical explanation;
   c) Failing to submit to a test as directed or engaging in any conduct, which clearly obstructs the testing process.

   Examples of obstructing the testing process would include leaving the scene of an accident without a valid medical or safety reason; not showing up for a test at the time directed withouta valid excuse; tampering with a urine specimen; tampering with an alcohol testing device; failing to provide required identification; failing to cooperate with federal, state or local law enforcement officers at the scene.

6) **Positive alcohol breath test -** is when the alcohol concentration level registers 0.02 or greater.

c. **Prohibited Drug and Alcohol Use and Activities**

1) The City of Midland prohibits its employees from:
   a) Using or being under the influence of or possessing illegal drugs
   b) Using or being under the influence of legal drugs that are being used illegally;
   c) Using or being under the influence of legal drugs whose use can adversely affect the ability of the driver to perform his or her job safely.
   d) Selling, buying, soliciting to buy or sell, transporting, or possessing illegal drugs while on City time or property (except for approved law enforcement activities.)

2) Employees are prohibited from:
   a) Using alcohol intoxicants within 4 hours of reporting for work;
   b) Being under the influence of alcohol at any time while at work;
   c) Possessing any amount of alcohol intoxicants on City property or in City vehicles (except for approved law enforcement activities.);
   d) Testing positive for alcohol;
   e) Refusing to be tested for drugs and alcohol as defined in Section b.5 of this Policy;
   f) Violating any applicable federal and/or state requirement governing the use of drugs or alcohol (See Chapter VIII).

d. **Required Tests**

1) **Pre-employment/Transfer Testing**
Once a job offer has been made, the applicant will be required to submit to a drug and alcohol test as part of his post-job offer physical. This is to be completed before the applicant is allowed to

report for work. This also applies to an employee who transfers from a non-covered position into a position that is covered by this policy on or after January 1, 1995.

Prior to taking a pre-employment drug and alcohol test, the applicant will be asked to execute a general consent and release form to be tested for drugs and alcohol.

All employment offers made by the City of Midland to hire an applicant, or transfer an employee are conditioned upon the applicant:

a) Completing all of the "consent to be tested" forms;
b) Taking and passing the drug and alcohol test as described by this policy;
c) Signing the authorization form for the City of Midland to obtain all of the applicant's past drug and alcohol test results, including any refusals to test, for the previous two years if required by DOT regulations.

Any applicant who refuses or fails to comply with this policy will not be considered qualified for the position for which they have applied and will also be subject to adverse action, up to and including termination.

2) **Post-accident Drug and Alcohol Testing**

Any employee who is involved in an accident while operating a City vehicle or a personal vehicle for City business must submit to a post-accident drug and alcohol test when:

a) It involves the death of a human being;
b) The employee receives a citation for a moving violation (or the employee's actions are cited in the official Peace Officer's report as a contributing factor) and either a person requires immediate medical attention away from the scene or one or more of the vehicles must be towed away from the scene because of disabling damage. The drug and alcohol test is to be conducted within 2 hours post-accident, or 8 hours in unusual circumstances.

An employee who is required to take a post-accident drug and alcohol test will be assigned to a non safety-sensitive function while awaiting the results of the tests.

An employee who refuses or fails to submit to a post-accident drug and alcohol test, who testspositive for drugs and/or alcohol, who unnecessarily delays reporting to the test site following an accident, or who fails to comply with the City's post accident testing procedures, will be subject to adverse action, up to and including termination.

3) **Reasonable Suspicion Testing**

An employee will be required to submit to a drug and alcohol test whenever the City has a reasonable suspicion to believe that an employee has used drugs and/or alcohol in violation of these policies. Reasonable suspicion shall be based on specific, objective facts and reasonable inferences drawn from those facts in light of the experience that the employee has engaged in Prohibited Conduct with regard to the use of drugs and/or alcohol, as described in Chapter VIII of the City of Midland Personnel Policies.

Reasonable suspicion exists when an employee's behavior, appearance, speech or body odor indicates drug and/or alcohol use; such must be personally observed and documented by City of Midland supervisory personnel who have received training regarding the physical, behavioral, speech, and performance indicators of probably drug and/or alcohol use.
If an employee is required to submit to a drug and alcohol test based on a reasonable suspicion regarding his/her use of drugs and/or alcohol ("Reasonable Suspicion Test"), the employee shall be informed that he/she may:

a) Submit to a Reasonable Suspicion Test;
b) Appeal the matter to another supervisor (to begin at the Division Manager level) authorized to act as an Appeals Officer; or
c) Refuse the Reasonable Suspicion Test and be subject to Adverse Action (as defined in Chapter VIII) up to and including termination.

If the employee requests an appeal, a hearing shall be conducted immediately with the supervisor requesting the Reasonable Suspicion Test, the Appeals Officer, and the employee present.

The Appeals Officer shall determine whether there is a reasonable suspicion to believe that the employee engaged in Prohibited Conduct with regard to the use of drugs and/or alcohol. The Appeals Officer shall have the authority to either:

a) Order the employee to submit to a Reasonable Suspicion Test; or
b) Order that the allegations against the employee be dismissed.

An employee who is required or ordered to submit to a Reasonable Suspicion Test shall be escorted by supervisory personnel to a testing site.

An employee who is required or ordered to submit to a Reasonable Suspicion Test is prohibited from performing safety-sensitive functions while awaiting the results of the Reasonable Suspicion Test.

An employee who receives a positive Reasonable Suspicion Test, or fails to timely submit to a Reasonable Suspicion Test, shall be subject to Adverse Action up to and including termination.

4) **Random Testing**

DOT drivers and safety sensitive workers are subject to random drug and alcohol testing.

The City of Midland will conduct drug and alcohol testing on a random, unannounced basis at the beginning, during or at the end of a regularly scheduled work shift. The testing dates and times are unannounced and are with unpredictable frequency throughout the year. The number of random testsconducted will (at a minimum) equal the amount required by federal and/or state regulations for employees who possess a commercial driver's license and perform in that capacity. Non-DOT employee random testing amounts will be at the discretion of the City Manager or designee.

The City of Midland shall maintain two separate pools for random testing, one for DOT drivers andone for safety-sensitive workers as defined in this policy. Every employee in the selected job classes or organizational divisions will have an equal chance of being selected each and every time the selection is conducted. Appropriate safeguards will be present to ensure that the identity of individuals cannot be determined prior to or at the time of their selection.

Whenever an employee is randomly selected to be tested, he or she will be instructed to report to the collection site immediately and will be given written notice of the testing procedures.

Any employee who tests positive or who refuses to submit to a test is subject to adverse action up to and including termination.

5) **Return to Duty Testing**

Should the City of Midland elect to consider reinstating or rehiring an employee who violates this policy, he or she will be required to submit to and pass a drug and alcohol test before he or she will be permitted to return to duty. For a return to duty alcohol test, the alcohol level must be less than 0.02.

Before being permitted to return to work, the employee must execute a "last chance agreement" and submit to at least six unannounced follow-up tests during the next 12 months.

Any employee who refuses to comply with the return-to-duty requirements, or who tests positive will be considered medically unqualified to perform his or her job and subject to adverse action up to and including termination.

6) **Follow up Testing**

An employee who is returned to duty after a positive drug or alcohol test is required to submit tounannounced follow-up testing as one condition of continued employment.

At a minimum, the employee will be required to submit to at least six tests during the next 12 months following the employees' return to duty. The date and time of such tests will be at the discretion of a substance abuse professional or the Division and/or Department Manager and conducted at random, without prior notice being given to the employee.

An employee who tests positive or who refuses to submit to a test, will be considered unqualified to perform his or her job and subject to adverse action up to and including termination.

e. **Testing Methodology and Integrity**

1) To insure the integrity of each test, all specimen collection, analysis, and laboratory procedures for personnel subject to 49CFR Part 40 and § 552.001, Texas Commercial Driver's License Act shall be conducted in accordance with DOT procedural protocols and safeguards. This includes, among other things:

a) Procedures to ensure the correct identity of each employee at the time of testing;
b) Strict chain of custody procedure to ensure that the specimen is not tampered with by the collection agency;
c) The use of a trained breath alcohol technician (BAT) and DOT approved testing devices for conducting alcohol tests;
d) The use of a laboratory which has been certified by the Substance Abuse and Mental Health Services Administration, a division of the U.S. Department of Health and Human Services (DHHS/SAMSHA);
e) The confirmation of an initial positive drug screen by a second analysis using gas chromatography/mass spectrometry (GCMS);
f) The confirmation of an initial positive alcohol screen by a second analysis;
g) The City's appointment of a qualified Medical Review Officer (MRO) to review positive drug test results before they are reported to the City of Midland's designated representative.

2) The City of Midland will provide employees with written and/or oral instructions regarding the conduct of the specific test before each testing event,

3) Drug Testing Procedures
a) Drug testing will require the employee to provide a specimen of his or her urine.
b) At a minimum, urine specimens will be analyzed for the presence of the following drugs: marijuana, cocaine, opiates, amphetamines, and/or phencyclidine (PCP).
c) Personnel not subject to 49 CFR Part 40 and § 522.001, Texas Commercial Driver's License Act, may be subject to the pre-employment drug test via the rapid drug test method conducted by a trained technician. Positive test results will be confirmed with City's Department of Health and Human Services approved testing facility. All other drug tests will be administered using the split sample methodology required by DOT. Under this methodology, the employee must provide at least 45 ml (milliliters) in a specimen container. The specimen will then be divided, into two specimens. The bottle containing 30 ml will be analyzed as the employee's primary

specimen. The second bottle will be held by the laboratory, to be sent to another lab at the employees' request in the event that the primary specimen is verified as positive. In the event the primary specimen is verified as positive, the employee will be notified by the City's MRO or by the City's designated representative of the positive test and given the option to have the second bottle sent to a different laboratory for analysis. To exercise this option, the employee must advise the city's MRO or designated representative within 72 hours of being informed of the primary positive result. The employee will be responsible for the cost of having the second sample analyzed.

d) Except for the use of methadone and medications containing alcohol, nothing in this Policy prohibits the employee's use of a medication legally prescribed by a licensed physician who is familiar with the employee's medical history and specific job duties and who has advised the employee that the prescribed medications will not adversely affect the employee's ability to perform his job safely. Medications prescribed for someone other than the employee, however will not be considered lawfully used when taken by the employee under any circumstances.

e) A "positive" drug test may be declared "negative" by the MRO, if the employee can prove with clear and convincing evidence that the drug which was used was prescribed by a licensed physician who is familiar with the employee's medical history and specific job duties. The determination of this will be made by the MRO.

f) In the event that the test result of an employee's primary specimen is positive, the employee will be notified by the MRO. If the MRO is unable to reach the employee after making reasonable efforts, then the employee may be notified by the City's designated representative. The MRO or the City's designated representative shall advise the employee that he or she has 72 hours to request that the MRO send the secondary specimen to a second NIDA approved laboratory for analysis. The employee will be responsible for the cost of the second test.

g) Before an employee's test result will be confirmed positive for drugs, the employee will be given the opportunity to speak with the City's MRO and demonstrate that there was a legitimate medical explanation for the positive test result. If the MRO determines that a legitimate medical reason does exist, the test result will be reported to the City as a "negative," If the MRO determines that a legitimate medical reason does not exist, the test result will be reported to the City as a "confirmed positive."

4) Alcohol Testing Procedures

a) Alcohol testing under this Policy requires that an employee must provide a breath specimen for any test conducted by, or for the City of Midland.

b) In addition to this policy, an employee could be subject to alcohol testing conducted by a federal, state or local law enforcement officer following an accident. The employee must provide either a breath or blood specimen, as directed by the law enforcement officer.

c) Alcohol tests will be administered using a breath specimen, taken by a breath alcohol technician (BAT) using an approved breath-testing device (EBT).

d) Before being tested by the City, each employee will be positively identified through presentation of a photo-identification or by other means approved by the City of Midland and will be required to execute a "Breath Alcohol Test" form provided by the BAT. An employee who refuses to provide proper identification, provides false identification, refuses to execute the forms, or who otherwise refuses or fails to cooperate will be treated as though he or she had tested positive and will be subject to adverse action, up to and including termination.

e) Prior to each alcohol breath test, the BAT will instruct the employee on how the test will be performed.

f) To protect each employee, the BAT will open and attach to the testing devise an individually sealed mouthpiece in the employee's view. The employee will then be directed to blow forcefully into the breath-testing device until an adequate amount of breath has been maintained.

g) In the event that the employee is unable to provide an adequate amount of breath for the initial or confirmatory test after several attempts to do so, the employee will be required to submit to an evaluation by a licensed medical physician to determine whether a valid medical condition does exist. If the physician determines that a valid medical condition does exist, the test result

will be considered as "negative". If the physician determines that a valid medical condition does not exist, the test result will be considered a "confirmed positive".

h) In the event that an employee provides an adequate breath specimen and the initial test registers an alcohol concentration level that is less than .02, the test results will be reported, as "negative" and no additional testing will be required at that time.

i) In the event that an employee provides an adequate breath specimen and the initial test registers an alcohol concentration of .02 or greater, a second confirmatory will be performed. If the confirmatory breath test registers less than .02, the test results will be reported as a "negative." The confirmation breath test will be administered no sooner than 15 minutes from the initial breath test and no longer than 20 minutes from the initial breath test. During the wait period for the confirmation test, the employee is not allowed to put anything into his mouth and should be discouraged from belching or burping.

f. Test Results - Adverse Action

1) An employee who violates these prohibitions will be subject to restrictions mandated by the DOT as described in part d, item 6 of this Section and subject to adverse action as described in ChapterVIII of the City of Midland's Personnel Policies Manual, up to and including termination.

2) Any employee whose test result is confirmed positive for drugs will be considered unqualified to perform or continue to perform his or her functions safely and subject to adverse action up to and including termination. The employee could also be subject to civil and criminal penalties imposed by DOT.

3) An employee whose confirmatory test registers .02 or more but less than .04 will be removed from service and placed on leave for a minimum of 24 hours. The employee will be subject to return to dutytesting and follow up testing and may be subject to adverse action up to and including termination.

   An employee whose confirmatory test registers .04 or greater will be removed from service andplaced on leave for a minimum of 24 hours and referred to a Substance Abuse Professional (SAP). The employee may be subject to adverse action up to and including termination.

   Before consideration can be given to returning an employee to duty who has had a BAC (breath alcohol concentration) of .04 or greater, the employee must complete the rehabilitation program as prescribed by the SAP and be subject to return to duty and follow up testing.

g. Confidentiality

The results of all individual drug and alcohol tests will be kept in a secure location with controlled access.

All individual test results will be considered confidential. The release of an individual employee's results will only be given with an individual employee's written authorization, or as is otherwise required by DOT regulations, or by other applicable federal or state law.

Section 16 Harassment Policy and Procedures

a. Prohibited Conduct

The City of Midland prohibits harassment based on race, color, religion, sex, age, national origin, disability or any other basis protected by federal, state or local law. It is the policy of the City of Midland that all employees shall be able to enjoy a work environment free from all forms of discrimination and harassment, including sexual harassment. In general, harassment may be defined as unsolicited words or conduct which tend to annoy, alarm or abuse another person, or a course of vexatious comment or conduct that is known or ought reasonable to be known to be unwelcome. Additionally, sexual harassment is a form of misconduct that undermines the integrity of the

employment relationship. No employee, either male or female, should be subjected to unsolicited andunwelcome sexual overtures or conduct, either verbal or physical. Such actions will not be tolerated.

Each employee has the responsibility to maintain the workplace free of all types of harassment. In keeping with such, the City of Midland has the responsibility of providing this policy to all employees and assuring them that they are not to endure insulting, degrading, or exploitative sexual treatment.

Specifically, no person shall threaten or insinuate, either explicitly or implicitly, that an employee's refusal to submit to sexual advances will adversely affect the employee's employment, evaluation, wages, advancement, assigned duties, shifts, or any other condition of employment or career development. In addition, while on duty or while acting in an official capacity, no employee shall knowingly or intentionally engage in conduct which has the purpose or effect of substantially interfering with an individuals' work performance or creating an intimidated, hostile, or offensive work environment; or conduct which subjects a member of the public to sexual harassment.

b. **Examples of Prohibited Activity**

Examples of unlawful harassment based on race, color, religion, sex, age, national origin, disability, or other protected basis includes, but is not limited to the following:

1) Verbal actions such as slurs, derogatory comments or jokes, epithets or unwanted sexual invitations, advances, or comments;
2) Physical actions such as unwanted touching, assault, blocking another's way, or interference with work;
3) Visual conduct such as sexually-oriented, pornographic and/or derogatory photographs, posters, drawings, cartoons, gestures, e-mail, or Internet sites;
4) Threats or demands to submit to sexual advances or requests as a condition of continued employment, offers of employment benefits in return for sexual favors, or to avoid some other negative employment action; and
5) Retaliation against any employee for making an allegation of harassment or for participating in such an investigation.

Sexual harassment is defined as unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature that affects an employee in any one of the following ways:

1) Submission to such conduct is made explicitly or implicitly a term or condition of a person's employment;
2) Submission to or rejection of such conduct by an individual is used as a basis for employment decisions affecting that individual; or
3) Such conduct has the purpose or effect of unreasonably interfering with an individual's work performance or creating an intimidating, hostile, or offensive work environment.

c. **Procedures**

Any employee who believes that he or she has been subjected to general harassment as defined above should avail themselves of the grievance procedures outlined in Chapter IX of these policies. Any employee (or member of the public) who believes that he or she is or has been subject to sexual harassment by a City employee should report the alleged charge immediately, in accordance with the following procedures. (All information will be held in strictest confidence and will be disclosed only ona need to know basis to investigate and resolve the matter).

1) The individual alleging harassment may report the incident to their immediate supervisor, their Department Manager, the City Manager's Office or the Administrative Services Department. If an employee's immediate supervisor is involved in the alleged harassment, it is unnecessary to make a report to that individual. If accusations are made to any other person or if supervisory

personnel otherwise become aware of suspected acts of harassment, the matter should be directed immediatelyto the Administrative Services Department. The supervisor or administrator contacted will offer the individual alleging harassment the opportunity to complete a written statement specifically outlining the complaint. If the complainant does not put the complaint in writing, the person contacted still must notify the Administrative Services Department. Employees are encouraged to promptly report the alleged harassment within three (3) calendar days of the offense. The City of Midland takes all complaints seriously and handles them as promptly, thoroughly, and confidently as possible.

2) Once a written complaint is filed, the Administrative Services Department will conduct an investigation within 48 hours of their receipt of the complaint (excluding weekends and holidays).

3) If corrective action (other than adverse action as outlined in Chapter VIII of these policies) is deemed appropriate as a result of the investigation, the City Manager's Office may authorize the Administrative Services Department or the Department Manager to enforce said action as needed. Any adverse action recommended as a result of the investigation will be subject to approval by the Department Manager and will be subject to the appeals procedure outlined in Chapter VIII of these policies. If allegations prove not to constitute harassment, or the evidence provided does not substantiate the claim, the accused employee will not be subject to any adverse action. Employees who register complaints in good faith will not be subject to any retaliation. Employees who willfully register false accusations will face adverse action, up to and including termination.

Section 17 Workplace Violence Policy

The City of Midland is committed to maintaining a safe work environment, and has a zero tolerance policyfor violence in the workplace. “Workplace violence” is defined to include:

a. Physically aggressive, violent, or threatening behavior, such as attempts to instill fear in others or intimidation;
b. Verbal or physical threats of any sort;
c. Any other conduct that suggests a tendency toward violent behavior. Such behavior includesbut is not limited to, excessive arguing, profanity, threats of sabotage of City property, belligerent speech or demonstrated pattern of insubordination, and refusal to follow City policies and procedures;
d. Causing physical damage to City facilities or defacing property; or
e. With the exception of authorized City personnel as described in Chapter II, carrying firearms or weapons of any type or kind while conducting City business in or on City buildings and property, other assigned work locations, and City vehicles and equipment.

If any employee becomes aware of or observes any of the above-referenced behavior or actions by a co-worker, consultant, customer, third party vendor, visitor, or any other party, he or she should notify his/her supervisor, any member of management, and/or the Administrative Services Department immediately.

All reports of workplace violence will be taken seriously. To the extent possible, the identity of the reporting individual(s) will be kept confidential. The City will not tolerate retaliation in any form against anemployee who makes a report of workplace violence.

Any employee found to be in violation of this policy will be subject to adverse action up to and including termination.

Chapter V

Attendance and Leaves

Section 1 Hours of Work

All offices of the City, except those for which special regulations are required, shall be kept open continuously from 8:00 a.m., until 12:00 p.m. (noon) and from 1:00 p.m. until 5:00 p.m., Monday through Friday.

Section 2 Regular Working Day

For the purpose of these policies and all the following sections which deal with attendance and leave, a "regular working day" or an "accrued day" of leave shall be 8 hours for all full-time employees; provided, however, that for the Fire Department's 56-hour shift personnel ("Fire Department Shift Personnel"), a "regular working day" or "accrued day" shall be 12 hours. No employee may receive additional compensation by working during his or her leave without the express approval of the City Manager. Temporary employees will earn no Paid Time Off or other leaves except as otherwise expressly stated in these policies.

Section 3 Work Week

The work week will be determined by the needs of the City and set by the City Manager with due regard for certain State statutes.

Section 4 Overtime

Employees may be required to work overtime when necessary, in order to maintain the proper City services. All employees required to work overtime shall be compensated at rates set by the City Manager and pursuant to law. Many employee classifications are eligible for compensatory time off rather than paid overtime. No more than forty (40) hours of compensatory time may be accumulated.

Section 5 Attendance

An employee shall be in attendance at his or her worksite in accordance with the rules regarding hours of work, holidays, and leaves as determined by the employee's department. Excessive tardiness, neglect of duties, or unauthorized absences will be grounds for dismissal. All departments shall keep daily attendance records of employees. Any employee absent from work without notice for three (3) consecutive days will be considered as having abandoned the job. Such abandonment shall be considered a voluntary resignation from employment, and the City will process such separation of employment as a voluntary resignation.

Section 6 Inclement Weather / Emergency Closure

The City of Midland offices and activities will remain open and in operation, during established working hours unless the City Manager declares the offices, excluding emergency services, officially closed due to inclement weather or emergency closure due to unusual circumstances.

a. **Non-Sworn Employees.** For purposes of this Section, "non-sworn employees" are all City employees except peace officers and fire protection personnel.

b. **Reporting to Work.** If the City has not been officially closed, employees shall make a reasonable effort to report to work. An employee who is unable to report to work due to inclement weather shall notify the employee's supervisor in accordance with these policies and applicable departmental rules

and procedures. An employee who fails to so notify the employee's supervisor may be subject to adverse action, up to and including dismissal.

c. Compensation for Inclement Weather / Emergency Closing Absences.

Compensation for absences will be as follows:

1) **Official Closing.** If the City Manager closes a facility, a non-exempt non-sworn employee designated by the employee's Department Manager may work remotely to ensure department operations continue during the closure period. An employee who works remotely shall be paid for hours worked in addition to receiving the "City Closed" accrual for their scheduled shift. Hours worked remotely count as hours worked in determining overtime in accordance with the Fair Labor Standards Act. An employee who does not work remotely shall be paid for the employee's scheduled shift. Such "City Closed" hours shall not count as hours worked for the purpose of overtime. If an employee is on Paid Time Off or any other leave during the declared times of closing, the appropriate leave compensation will apply.

2) **No Official Closing.** If the City Manager does not close a facility and an employee is unable to report to work due to inclement weather, compensation will be handled in the following manner:

    a) **Non-exempt Employees.** A non-exempt employee who misses work hours due to inclement weather may use accrued vacation time or compensatory leave. If an employee has no paid leave available, the employee may be granted authorized leave without pay.

    b) **Exempt Employees.** An exempt employee who misses work hours due to inclement weather or other emergencies may use accrued vacation time if the absence is for a full workday.

3) **Delay Start / Early Closing.** If the City Manager delays the opening of a facility or closes a facility early due to inclement weather, an employee who reported for work will be paid "City Closed" for the remainder of the employee's normal shift. Employees who remain as part of a skeleton crew will be compensated for all hours worked in addition to receiving the "City Closed" accrual for hours the City was closed due to the delayed opening or early closure.

4) **Critical Service Personnel.** Employees designated by their Department Manager to provide critical services shall report to work on-site as provided by their department rules during an official closing. Non-exempt non-sworn employees who are required to report to work hereunder shall be paid for all hours worked in addition to receiving the "City Closed" accrual for their scheduled shift. Such personnel may include, but are not limited to, from the following:
    a) Airport Operations Personnel;
    b) Utilities Personnel;
    c) Transportation Personnel;
    d) Traffic Operations Personnel; and
    e) Solid Waste Personnel.

Section 7 Holidays

Municipal offices with the exception of those in emergency categories, shall be closed on the following legal holidays: New Year's Day, Martin Luther King Day, Presidents Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Veterans Day, Thanksgiving Day, Friday after Thanksgiving, Christmas Eve Day, and Christmas Day. Firefighters shall be granted one (1) floating holiday designated as the "September 11th Floating Holiday." Non-exempt employees' holiday time will be

considered actual hours worked to determine eligibility for overtime.

Holidays falling on Sunday or Saturday. If a holiday falls on Sunday, the following Monday shall be observed, and if a holiday falls on Saturday, the preceding Friday shall be observed. The City Manager may designate any additional holidays which he feels may be justified in particular situations after giving due regard to the need for City services.

Eligibility for Pay for Holidays. An employee shall be eligible for holiday pay provided that the employee worked the last scheduled working day before and the next scheduled working day following the holiday or is otherwise on approved leave (either paid or unpaid) for those same days. In approving leave around a holiday, directors and division managers must ensure that adequate personnel are on duty to conduct departmental business.

Section 8 Vacation / Sick Leaves

a. Vacation
Effective October 1, 2023, vacation leave accruals shall be discontinued. The final accrual of vacation leave will be through the pay period ending September 30, 2023 (pay date of October 13, 2023). All vacation leave balances shall be converted to Paid Time Off on a one-to-one basis.

b. Sick Leave
Effective October 1, 2023, sick leave accruals will be discontinued. The final accrual of sick leave will be through the pay period ending September 30, 2023 (pay date of October 13, 2023). All sick leave balances shall be converted to Paid Time Off on a one-to-one basis.

c. Council Appointees, Other Employees, and Department Managers
Vacation and sick leave provided in any Council Appointee's, Other Employee's, or Department Manager's employment agreement shall be replaced with Paid Time Off.

Section 9 Paid Time Off ("PTO")

Effective October 1, 2023, the City will convert its Vacation and Sick Leave programs into a single Paid Time Off ("PTO") program. PTO is a comprehensive paid time off program that can be used for any type of time off from work that previously would have been covered under the Vacation and Sick Leave policies but does not include time taken under any other City's paid time off policies. In accordance with Texas Local Government Code 142.0013, PTO is equivalent to vacation time for fire protection and peace officer personnel.

Employees may not receive additional compensation by working during their PTO leave without the express approval of the City Manager. Temporary employees are not eligible for PTO.

a. PTO Accrual
All full-time employees are eligible to accrue PTO effective October 1, 2023 (Pay Date October 27, 2023) at the accrual rates listed below:

Full-Time Employees (based on a 40-hour work week)				
Years of Service	**Accrue Annual (Days)**	**Accrue/Paycheck 26 pays (Hours)**	**Maximum Days**	**Maximum Hours**
Upon hire	5			
Less than 1 year	20	6.1539		
At least 1 but less than 4 years	27	8.3077	118	944
At least 4 but less than 9 years	29	8.9231	128	1024
At least 9 but less than 15 years	31	9.5385	133	1064

At least 15 years, but not hired prior to June 1, 1990	33	10.1539	139	1112
Hired prior to June 1, 1990	44	13.5385	145	1160
Fire Department Shift Personnel (based on a 56-hour workweek)				
Years of Service	**Accrue Annual (Days)**	**Accrue/Paycheck 26 pays (Hours)**	**Maximum Days**	**Maximum Hours**
Upon hire	5			
Less than 1 year	20	9.2308		
At least 1 but less than 4 years	27	12.4616	118	1416
At least 4 but less than 9 years	29	13.3847	128	1536
At least 9 but less than 15 years	31	14.3077	133	1596
At least 15 years, but not hired prior to June 1, 1990	33	15.2308	139	1668
Hired prior to June 1, 1990	44	20.3077	145	1740

b. Requesting PTO

PTO may be used for various reasons, including personal days, vacations, and illness or injury (non-work related). PTO will be paid at the employee's regular rate of pay earned at the time the PTO is used. PTO does not count as hours worked for the purpose of overtime under the Fair Labor Standards Act (FLSA).

An employee shall schedule PTO in advance with the employee's supervisor or Department Manager for approval unless the employee uses it for an unexpected illness or injury. In the event of an unexpected illness or injury, the employee shall notify the employee's immediate supervisor prior to the time set for the employee to begin the employee's shift. If an employee takes PTO without prior approval for medical or emergency reasons, the City reserves the right to require medical documentation or other documentation of the reasons given for the unapproved PTO. If the employee is unable to contact the employee's supervisor, the employee may notify the Office of Administrative Services. In general, employees should seek approval for planned absences at least five (5) days in advance. Employees may not use more than ten (10) days of PTO days at one time without approval from the employee's Department Manager. Depending on staffing and departmental needs, PTO requests will be granted to the extent feasible.

c. Payment of PTO for Terminating Employees

A regular employee, Department Manager, Other Employee, or Council Appointee (unless the employee's employment agreement states otherwise) who terminates employment with the City, or whose employment is terminated by the City, shall be paid in a lump sum for unused PTO as listed below:

Years of Service	Payout % of Accrual
Upon hire	0.00%
Less than 1 year	0.00%
At least 1 but less than 4 years	70.00%
At least 4 but less than 9 years	73.00%
At least 9 but less than 15 years	76.00%
At least 15 years, but not hired prior to June 1, 1990	79.00%
Hired prior to June 1, 1990	82.00%

d. Payment of PTO for Retiring Employees

Retiring employees may request a maximum of 250 hours of the PTO payment listed in Subsection c above to be deposited into a Retiree Medical Reimbursement Account, which may be used to reimburse out-of-pocket medical expenses on a tax-free basis as authorized by the United States Internal Revenue Code. This provision shall not apply to any employee who is not eligible to retire at the time of separation of employment or whose employment is terminated under the provisions of Chapter VIII, "Adverse Action," or Chapter XII, "Employment At Will" of the City of Midland Personnel Policies.

For the avoidance of doubt, this Subsection applies only to the following employees:

i. An active employee who has completed a minimum of twenty (20) consecutive years of service prior to retirement;
ii. An active employee who is at least sixty (60) years of age and has completed a minimum of five (5) consecutive years of service with the City prior to retirement; or
iii. An active employee who is eligible for retirement through the Texas Municipal Retirement System or through the Midland Fireman's Relief and Retirement Fund.

Section 10 PTO Bank for Sick Leave

Beginning October 1, 2023, a Paid Time Off Bank ("PTO Bank") for sick leave shall be established and maintained by the City.

a. **Membership**

Membership in the PTO Bank shall be voluntary on the part of employees.

b. **Eligibility**

Any non-probationary, full-time employee with one full year of continuous service with the City of Midland is eligible to join.

c. **Enrollment**

Any eligible employee, within thirty (30) days following the completion of his or her first year of employment, may enroll in the PTO Bank by completing a membership application and donating two (2) days of the employee's accumulated PTO leave to the PTO Bank. In addition, any eligible employee may enroll during the open enrollment period. Open enrollment shall occur annually during the month of September, with the PTO donation being deducted from the 2nd paycheck of October. For the purposes of this policy, a PTO Bank Day is defined as 8 hours for regular employees and 12 hours for Fire Department Shift Personnel.

Any employee who was previously enrolled in the City's Sick Leave Bank shall be enrolled in the PTO Bank with no further donation or other action on the employee's part being necessary.

d. **Procedures**

1) The Administrative Services Department shall govern the operations of the PTO Bank.

2) A new employee must enroll within thirty (30) calendar days following the first-anniversary of his or her date of employment. Otherwise, participant enrollment will be held annually during the open enrollment period during the month of September.

3) An employee shall exhaust all of the employee's accrued PTO before the employee may utilize the PTO Bank.

4) An employee must be suffering from a serious health condition that makes the employee unable to perform the functions of the employee's job. A serious health condition is an illness, injury, impairment, or physical or mental condition that involves either inpatient care or continuing

treatment by a health care provider, including but not limited to a stroke, a heart attack, cancer, or injuries sustained in an automobile accident.

5) A physician's statement diagnosing the condition in detail and indicating the duration of treatment is required with the Request for PTO Bank Days.

6) Employees covered under a workers' compensation program may not utilize the PTO Bank for those conditions covered under workers' compensation.

7) Additional accrual donations may be required in the event the current PTO Bank balance falls below an acceptable level.

8) The total lifetime benefit under the PTO Bank program shall not exceed ninety (90) working days per individual.

e. **Application Process**

1) Should a member of the PTO Bank incur a long-term, serious illness or injury necessitating additional days after all of the member's accumulated PTO leave days have been used, the member may submit a Request for PTO Bank Days.

2) A member who requests days from the PTO Bank shall submit to the Office of Administrative Services Employee Benefits Division the following information within thirty (30) calendar days of the date that they have exhausted their accrued PTO leave days:

(i) A completed Request for PTO Bank Days form, which is available in the Employee Benefits Office; or
(ii) A detailed statement from a physician verifying the illness or injury.

3) Forms for the above purpose have been prepared and are available from the Employee Benefits Office.

4) The Employee Benefits Division will not consider a request for days from the PTO that does not conform to the requirements of this subsection.

5) If a member is unable to file a Request for PTO Bank Days, the immediate supervisor or Department Manager may initiate the request at the request of the member's family.

6) An applicant may be required to undergo a medical review by a second-opinion physician of the City's choice at any time at the expense of the City.

f. **Regulations**

1) Additional accrual donations may be assessed in the event the current PTO Bank balances falls below an acceptable level.
2) The Employee Benefits Division will review and act on all requests within thirty (30) working days of receipt of a Request for PTO Bank Days and necessary documents.
3) If a member is not satisfied with the Employee Benefits Division's decision regarding a Request for PTO Bank Days, the member may request a conference with the City Manager or the City Manager's designee by filing a written Request for Review with the Administrative Services Director within ten (10) business days of the member's receipt of the Employee Benefits Division's decision. The written Request for Review shall set forth contain all the relevant facts as well as the specific grounds for the review of the decision.
   (i) Upon receipt of a Request for Review, the City Manager or the City Manager's designee shall:
      1. schedule a conference to discuss the request; or

2. take action that addresses the matter described in the Request for Review to the reasonable satisfaction of the member.

(ii) Following a conference to discuss the request, the City Manager or the City Manager's designee shall provide the member a written decision regarding the request within ten (10) business days.

(iii) The decision or action taken by the City Manager or the City Manager's designee shall be the final decision of the City regarding the Request for Review.

Section 11 PTO Buy-Back

An eligible employee may elect to participate in the Paid Time Off Buy-Back ("PTO Buy-Back") program under which the City may buy back a portion of the employee's unused PTO leave as described in this Section.

a. For purposes of this Section, an eligible employee is a full-time employee who has completed at least one (1) year of continuous service before the beginning of the fiscal year (October 1st) during which the employee elects to participate in the PTO Buy-Back Program.

b. An eligible employee who elects to participate in the PTO Buy-Back program shall be subject to the following limits:

1) If the employee is not an employee of the Fire Department, the employee may elect for the City to buy back 40 hours of unused PTO leave per buy-back, with a maximum of two (2) buy-backs (80 hours) per fiscal year.

2) If the employee is an employee of the Fire Department who is not Fire Department Shift Personnel, the employee may elect for the City to buy back 20 hours of unused PTO leave per buy-back, with a maximum of four (4) buy-backs (80 hours) per fiscal year.

3) If the employee is Fire Department Shift Personnel, the employee may elect for the City to buy back 28 hours of unused PTO leave per buy-back, with a maximum of four (4) buy-backs (112) hours) per fiscal year.

4) The employee must have a minimum of three (3) days of PTO leave remaining after a buy-back. There will be no incremental buy-back.

c. An employee who elects to participate in the PTO Buy-Back program must complete and return the PTO Buy-Back form to the Administrative Services Department no less than 30 days prior to the scheduled buy-back.

d. An employee who elected to participate in the PTO Buy-Back and whose employment was terminated prior to receiving the PTO Buy-Back payment shall be subject to Section 9.c above and shall not receive the PTO Buy-Back payment.

e. A PTO Buy-Back payment will be an additional amount added to the employee's regular paycheck scheduled for the date(s) selected. Upon a PTO Buy-Back payment being made, the number of hours that were bought back will be deducted from the employee's accrued PTO leave. PTO buy-back is subject to deductions for retirement plan contributions under the Federal Insurance Contributions Act and all other applicable deductions.

f. The PTO Buy-Back program shall be subject to the availability of funds.

Section 12 Birthday Leave

Full time employees are eligible for one (1) day of paid birthday leave annually. Birthday leave shall be taken during the employee's birthday month unless the employee's Department Manager makes an exception. Exceptions may be made only after the employee's birthday and prior to December 31st.

An employee must request birthday leave from the employee's supervisor or Department Manager at least one (1) week prior to taking birthday leave.

An employee's unused birthday leave will not carry over to the next year, and an employee will not receive payment for unused birthday leave upon separation of employment.

Section 13 Bereavement Leave

All employees may be granted bereavement leave with pay for a period not to exceed three (3) days unless a longer period of time (not to exceed an additional two (2) days) is approved by the City Manager in case of death of a grandparent, grandchild or other member of their immediate family, which shall consist of the father, mother, son or daughter, husband, wife, brother or sister of the employee's spouse or the employee. Leave up to ½ day may be granted to an employee by his immediate supervisor to attend funerals for other than immediate family members. This leave shall not be charged against PTO or other accrued leave.

Part-time, seasonal, and temporary employees may be granted leave of absence without pay in such cases.

Section 14 Family/Medical Leave Act (FMLA)

The City of Midland complies with the Family and Medical Leave Act (FMLA) and will grant up to 12 weeks of leave during a 12-month period to eligible employees or up to 26 weeks of military caregiver leave.

The purpose of this policy is to provide employees with a general description of their FMLA rights. In the event of any conflict between this policy and the applicable law, employees will be afforded all rights required by law. If you have any questions, concerns, or disputes with this policy, please contact the manager of employee benefits.

a. **Definitions**

As used in this Section:

1) **Covered active duty** means (1) with respect to a member of a regular component of the Armed Forces, duty during deployment of the member with the Armed Forces to a foreign country, or (2) with respect to a member of the Reserve components of the Armed Forces, duty during the deployment of the member with the Armed Forces to a foreign country under a federal call or order to active duty in support of a contingency operation in accordance with 29 CFR 825.102.
2) **Covered service member** is a current member of the Armed Forces, including a member of the National Guard or Reserves, who is receiving medical treatment, recuperation, or therapy or is in outpatient status or on the temporary disability retired list for a serious injury or illness.
3) **Next of kin of a covered service member** is the nearest blood relative, other than the covered service member's spouse, parent, or child, in the following order of priority: blood relatives who have been granted legal custody of the covered service member by court decree or statutory provisions, brothers and sisters, grandparents, aunts and uncles, and first cousins, unless the covered service member has specifically designated in writing another blood relative as his or her nearest blood relative for purposes of military caregiver leave under the FMLA.
4) **Parent** means a biological, adoptive, step or foster father or mother, or any other individual who stood in loco parentis to the employee when the employee was a child. This term does not include parents "in law."
5) **Qualifying exigency** includes short-notice deployment, military events and activities, childcare, and school activities, financial and legal arrangements, counseling, rest and recuperation, post-deployment activities, and additional activities that arise out of active duty, provided that the employer and employee agree, including the agreement on timing and duration of the leave.
6) **Serious health condition** means an illness, injury, impairment, or physical or mental condition that involves inpatient care or continuing treatment by a health care provider. This can include conditions with short-term, chronic, long-term or permanent periods of incapacity.
7) **Serious injury or illness** is one that is incurred by a current member of the Armed Forces in the line of duty on active duty that may cause the member to be medically unfit to perform the duties of his or her office, grade, rank, or rating. A serious injury or illness also includes injuries

or illnesses that existed before the member's active duty and that were aggravated by service in the line of duty on active duty.

8) **Spouse** means (1) a husband or wife as defined or recognized in the state where the individual was married or (2) a husband or wife in a marriage that was validly entered into outside of the United States if the marriage could have been entered into in at least one state.

b. **Eligibility**

To be eligible for leave under this policy, employees must meet **all** of the following requirements:

1) Have worked at least twelve (12) months for the City of Midland.
2) Have worked at least 1,250 hours for the City of Midland over the twelve (12) months preceding the date when the leave would commence.

The 12 months of employment do not have to be consecutive. All periods of absence from work due to or necessitated by service in the Armed Forces are counted as hours worked in determining eligibility.

c. **Reasons for Leave**

To qualify as FMLA leave under this policy, the leave must be for one of the following reasons:

1) The birth of a child or placement of a child with the employee for adoption or foster care.
2) To care for a spouse, child or parent who has a serious health condition.
3) For a serious health condition that makes the employee unable to perform the essential functions of his or her job.
4) For any qualifying exigency arising out of the fact that a spouse, child or parent is a member of the Armed Forces on covered active duty or on call to covered active duty status.
5) To care for a covered service member with a serious injury or illness.

d. **Amount of Leave**

An eligible employee may take up to 12 weeks of FMLA leave during any 12-month period. The City will measure the 12-month period as a rolling 12-month period measured backward from the date an employee uses any leave under this policy. Each time an employee takes leave, the City will compute the amount of leave the employee has taken under this policy in the last 12 months and subtract it from the 12 weeks of available FMLA leave, and the balance remaining is the amount the employee is entitled to take at that time.

An eligible employee may take up to 26 weeks of FMLA military caregiver leave during a single 12-month period. The City will measure the 12-month period as a rolling 12-month period measured forward. FMLA leave already taken for other FMLA circumstances will be deducted from the total of 26 weeks available.

Eligible spouses who both work for the City may only take a combined total of 12 weeks of FMLA leave for the birth of a child, adoption or placement of a child in foster care, or to care for a parent (but not a parent "in-law") with a serious health condition. Both may only take a combined total of 26 weeks of leave to care for a covered service member (if each spouse is a parent, spouse, child or next of kin of the covered service member).

e. **Intermittent Leave or a Reduced Work Schedule**

Employees may take FMLA leave in one consecutive block of time, may take FMLA leave intermittently (e.g., take a day periodically when needed over the year) or, under certain circumstances, may take FMLA leave to reduce the workweek or workday, resulting in a reduced hour schedule. In all cases, the leave may not exceed a total of 12 workweeks (or 26 workweeks to care for a covered service member) in a 12-month period.

The City may temporarily transfer an employee to an available alternative position with equivalent pay and benefits if the alternative position would better accommodate the intermittent or reduced schedule in instances when leave for the employee or employee's family member is foreseeable

and for planned medical treatment, including recovery from a serious health condition or to care for a child after birth or placement for adoption or foster care.

For the birth, adoption, or foster care of a child, the City and the employee shall mutually agree to the schedule before the employee may take the leave intermittently or work a reduced-hour schedule. Leave for birth, adoption, or foster care of a child must be taken within one year of the birth or placement of the child.

When leave is needed for planned medical treatment, the employee shall make a reasonable effort to schedule treatment so as not to unduly disrupt the City's operations.

f. **Employee Notice Requirement**
An employee who takes FMLA leave must provide verbal or written notice of the need for FMLA leave to the employee's Department Manager or the manager of employee benefits.

When the need for FMLA leave is foreseeable, the employee shall provide the City with at least 30 days' notice. When an employee becomes aware of a need for FMLA leave fewer than 30 days in advance, the employee shall provide notice of the need for the leave either the same day the need for leave is discovered or the next business day. When the need for FMLA leave is not foreseeable, the employee shall comply with the City's usual and customary notice and procedural requirements for requesting leave, absent unusual circumstances.

Within five business days after an employee has provided this notice, the manager of employee benefits, or the manager's designee, will complete and provide the employee with a Notice of Eligibility and Rights and request a medical certification or other supporting documentation as necessary.

g. **Designation of FMLA Leave**
Within five business days after an employee has submitted the required medical certification or other documentation, the manager of employee benefits, or the manager's designee, will complete and provide the employee with a written response to the employee's request for FMLA leave using the FMLA Designation Notice.

h. **Employee Status and Benefits During Leave**
The City will continue an employee's health benefits during the FMLA leave period at the same level and under the same conditions as if the employee was continuously at work.

While on paid leave, the City will continue to make payroll deductions to collect the employee's share of insurance premiums. While on unpaid leave, the employee shall continue to make this payment, either in person, by mail, or by prearranged payment agreement. The payment must be received by the 15th day of each month. If the payment is more than 30 days late, the employee's healthcare coverage may be dropped for the duration of the leave.

The City will provide 15 days' notification prior to the employee's loss of coverage.

If the employee chooses not to return to work for reasons other than a continued serious health condition of the employee or the employee's family member or a circumstance beyond the employee's control, the City will require the employee to reimburse the City the amount it paid for the employee's health insurance premium during the FMLA leave period.

If the employee contributes to a life insurance or disability plan, the City will continue making payroll deductions while the employee is on paid leave. While the employee is on unpaid leave, the employee may request the continuation of such benefits and pay his or her portion of the premiums, or the City may elect to maintain such benefits during the leave and pay the employee's share of the premium payments. If the employee does not continue these payments and the City does not elect to maintain such coverage, the City will discontinue coverage during the leave. If

the City maintains coverage, the City may recover the costs incurred for paying the employee's share of any premiums, whether or not the employee returns to work.

i. **Employee Status After Leave**
An employee who takes leave under this policy may be asked to provide a fitness for duty clearance from a health care provider. This requirement will be included in the City's response to the FMLA request. Generally, an employee who takes FMLA leave will be able to return to the same position or a position with equivalent status, pay, benefits, and other employment terms. The position will be the same or one that is virtually identical in terms of pay, benefits, and working conditions. The City may choose to exempt certain key employees from this requirement and not return them to the same or similar position when doing so will cause substantial and grievous economic injury to business operations. Key employees will be given written notice at the time FMLA leave is requested of his or her status as a key employee.

j. **Use of Paid and Unpaid Leave**
An employee who is taking FMLA leave because of the employee's own serious health condition or the serious health condition of a family member must use all PTO and any other accrued leaves prior to being eligible for unpaid leave. PTO shall be exhausted prior to other accrued leave. Paid leaves run concurrently with FMLA leave if the reason for the FMLA leave is covered by the established policies.

Workers' compensation leave (to the extent that it qualifies) and injury leave will be designated as FMLA leave and will run concurrently with FMLA.

An employee who is taking leave for the adoption or foster care of a child must use all PTO and other accrued leaves prior to being eligible for unpaid leave.

An employee who is using FMLA leave for a qualifying exigency must use all PTO and other accrued leaves prior to being eligible for unpaid leave. An employee using FMLA leave to care for a covered service member must also use all PTO and other accrued leaves prior to being eligible for unpaid leave.

k. **Intent to Return to Work from FMLA Leave**
On a basis that does not discriminate against employees on FMLA leave, the City may require an employee on FMLA leave to report periodically on the employee's status and intent to return to work.

l. **Coordination of FMLA Leave with Other Leave Policies**
The FMLA leave policies do not affect any federal, state, or local law prohibiting discrimination or supersede any state or local law that provides greater family or medical leave rights. For additional information concerning leave entitlements and obligations that might arise when FMLA leave is either not available or exhausted, please consult the City's other leave policies or contact the manager of employee benefits.

Section 15 Military Leave

In time of war or national emergency, those employees of the City of Midland who are members of a retirement system or participating in a retirement system sanctioned by the City, or who are holding permanent positions shall be entitled to military leave or absence without pay if called to duty with the Armed Forces through the process of selective service or membership in reserve components of the Armed Forces. The City also acknowledges that time spent by employees on military leave often is relevant or complementary to their workplace responsibilities and that the skills, leadership, discipline, and teamwork experience that employees acquire during military service can prove valuable on the job.

a. Accrual Leave Credit. Credit for PTO or other accrual leaves shall accrue only during military leave allowance described below. However, employees may be allowed to draw pay from their PTO, or other accrued leaves during an approved military leave.

b. Military Leave Allowance. In accordance with Section 437.202, Texas Government Code:

1) A person who is an officer or employee of the City and who is a member of the Texas military forces, a reserve component of the Armed Forces, or a member of a state or federally authorized urban search and rescue team is entitled to a paid leave of absence from the person's duties on a day on which the person is engaged in authorized training or duty ordered or authorized by proper authority for not more than 15 workdays in a fiscal year. During a leave of absence, the person may not be subjected to loss of time, efficiency rating, personal time, or PTO.

2) An employee of the City who is a member of the Texas military forces, a reserve component of the armed forces, or a member of a state or federally authorized urban search and rescue team and who is ordered to duty by proper authority is entitled, when relieved from duty, to be restored to the position that the employee held when ordered to duty.

c. Retirement System Credits. Employees who leave their deposits with the retirement system while on military leave shall retain their membership in the retirement system. The period spent by such employees on military leave shall count toward membership service but shall not increase the retirement benefits due to the employee unless he makes retirement deposits to cover all or a portion of the time spent on military leave. If the employee does make such retirement contributions after returning from military leave, the City shall match such deposits of the employee. Employees desiring to withdraw their retirement deposits from the system when they enter upon military leave may do so. However, such action means that these employees will lose retirement credit for the years they belonged to the retirement system prior to beginning military leave. Notwithstanding the foregoing, current rules of a particular system shall control.

d. Reinstatement upon Return from Military Leave. All employees who have been granted a military leave of absence, and who apply for reinstatement with the City not later than thirty (30) days after being discharged or separated from the Armed Forces, will be re-employed in the same position or a position of like seniority and status at the then current rate of pay, provided such employees are physically and mentally qualified for reinstatement. If upon termination of such leaves of absence, employees are physically or mentally incapacitated and not qualified to perform the duties of the positions held at the time of commencement of such absences, employees shall be eligible for placement in such other positions for which they may qualify. In the event two or more employees have occupied the same position and have been called into service, the first employee occupying and leaving such position after the effective date of this policy shall have first priority on reinstatement; the second person occupying and leaving such position shall have second consideration, etc. An attempt will be made to re-employ every employee who enters the Armed Forces and upon his release desires to re-enter employment with the City of Midland.

e. Credit for Service Time. For the purpose of computing longevity pay, a military leave shall not be counted as a break in service and upon return of an employee to duty with the City his service time shall be increased by an amount equivalent to the time spent on military leave.

f. Accrued Balances of Paid Time Off and Other Accrued Leaves. Any classified full-time employee who is a member of a military reserve organization which requires participation in a training program, will be granted a leave of absence from their respective duties without loss of time or efficiency rating or vacation time or salary on all days during which they shall be engaged in authorized training or duty ordered or authorized by proper authority, not to exceed fifteen (15) days in any one calendar year. For the purposes of this policy, a military leave day shall be defined as any consecutive 24-hour period. The employee must provide the City with a copy of the written orders prior to taking leave.

Any full-time employee who is a member of a military reserve organization that is called to active duty may use their accrued time to supplement their military pay. If the employee desires to return to his/her position at the City upon completion of military service, a request for "Military Leave of Absence" must be approved by the Director of Administrative Services prior to the leave. A copy of the written orders should be attached to this request. If the written order is not available upon departure, it must be

provided as soon as possible thereafter.
The accrued balances of PTO, or any other leaves may be used to supplement the military pay up to a maximum of 80 hours per pay period.

Fire Department Shift Personnel will be allowed to supplement the military pay up to a maximum of 112 hours per pay period.

An employee who intends to use this benefit must notify the employee's supervisor of such intent by completing the "Military Leave of Absence" form available in the Administrative Services office. A supervisor may not designate the time without the employee's consent.

Section 16 Lactation Break

City of Midland will provide a reasonable amount of break time to accommodate employees desiring to express breast milk for their infant child, in accordance with and to the extent required by applicable law. The break time, if possible, should run concurrently with rest and meal periods already provided.

The employee's supervisor will coordinate with Employee Benefits Manager or designee to make reasonable efforts to provide employees with the use of a room or location other than a restroom to express milk in private.

The designated space:

a) may be the place where the employee normally works if there is adequate privacy (for example, the employee's private office or a lockable conference room or another identified space);
b) should have an electrical outlet, table and chair, lock or signage on door prohibiting entry when in use; and
c) should be within reasonable proximity to the employee's work area.

Employees should make requests for break time in writing to their supervisor or manager as soon as practicable after an employee learns of the need for lactation break time or the need for a change in previously approved lactation break times.

Section 17 Injuries

a. **On the Job Injury Leave**

An employee injured in the line of duty shall receive workers' compensation or injury leave benefits under the terms and conditions prescribed in the applicable programs and as required by law.

1) Leave and Compensation: Injury leave is defined as fully compensable absence from work arising from an on-the-job accidental injury. An employee injured on the job, in the line of duty, may be granted injury leave, which shall not be charged against his accumulated PTO or other accrued leave, for the period of time he is disabled and unable to perform his duties but said injury leave shall not exceed one hundred eighty (180) work days. Injury leave runs concurrently with FMLA. Healthcare provider's statement is required indicating that the employee is unable to return to work and shall be required for an employee to receive injury leave. Any injury leave so granted is deemed to be purely discretionary on the part of the City and may be terminated at any time by change of these policies. The total amount of injury leave granted in conjunction with any given injury shall never exceed one hundred eighty (180) work days.

(i) An employee shall forfeit all rights to injury leave if the employee:
1. Is found to be working, either part-time or full-time for pay;
2. Resigns for any reason;
3. Is discharged for any reason;
4. Retirement or death;
5. Fails or refuses to comply with or follow, or disregards or violates the treating physician's instructions regarding treatment and/or rehabilitation of the injury;

6. Refuses to perform light, partial or part-time duty when offered by the Department Manager or designee, which does not require him to perform activities, which are restricted by the treating physician;
7. Falsifies or misrepresents his physical condition or capacity;
8. Refuses to return to duty on the working day he has been released to duty by the treating physician;
9. Fails to submit an acceptable physician's statement when requested by his supervisor or designee; or
10. Has been injured as a result of his failure to observe safety policies, procedures, or instructions as determined by the Employee's Department Manager or designee.

(ii) Injury Leave ends when:
1. The injured worker reached one hundred and eighty (180) work days of leave; or
2. The injured worker returns to work with or without restrictions; or
3. A healthcare provider determines that no further healing or recovery from the injury can be expected (maximum medical improvement); or
4. The injured worker reaches the end of the Temporary Income Benefits period, which is 104 weeks after the eighth day of work-related disability (statutory maximum medical improvement).

If the injury is controverted, the employee exhausts all leave as defined above, or the employee experiences sporadic absence from work, the employee may be eligible to begin drawing weekly benefits payable under the Workers Compensation Act. If so, the employee may use accrued leaves to supplement their workers' compensation income and retain their active status with the City of Midland

2) Procedure:

(i) If an employee's injury meets the criteria for a serious health condition, the employee's injury leave shall run concurrently with FMLA leave, as provided in Section 14 of this Chapter.
(ii) An employee who sustains an injury or illness in the performance of the employee's duties shall fully and promptly report the injury or illness, however minor, to the employee's supervisor as soon as possible, but no later than the end of the business day. Written notification of the injury or illness must be received by the Workers' Compensation / Leave Coordinator within 24 hours of the incident in order for the employee to be granted injury leave.
(iii) Injury leave taken by an employee because of a substantiated and documented work-related injury sustained during the course of employment shall not be charged against the employee's PTO or other accrued leaves
(iv) During the approved injury leave, PTO shall continue to accrue.
(v) The Workers' Compensation / Leave Coordinator will coordinate with the employee's healthcare provider to determine whether the injury would allow an employee to perform modified temporary work or other duties.
(vi) An employee who is on injury leave shall update the employee's supervisor or the Workers' Compensation / Leave Coordinator of the employee's status at regular intervals.
(vii) An employee who is unable to perform the essential functions of the employee's position due to a disability, injury, illness, or medical condition (and reasonable accommodation is not possible) is not guaranteed a return to the employee's position at the conclusion of the disability, injury, illness, or medical condition.

b. **Off the Job Injury**

Injuries, Off the Job (Leave and Compensation). An employee injured off the job shall have the resulting absence from work, if any, charged against the employee's accumulated PTO leave.

Any employee so injured who has no accrued PTO leave or has exhausted the employee's PTO leave may receive compensation during his absence from work by using other accrued leave time, if any.

If an employee's injury meets the criteria for a serious health condition, the employee's time off shall run concurrently with FMLA leave, as provided in Section 14 of this Chapter.

All absence reporting requirements as outlined in Section 9, b. of this Chapter must be followed.

c. **First Responder Illness/Injury Leave**

1) Definitions. For purposes of this subsection:

(i) "Emergency medical services personnel" means a person described by Section 773.003, Health and Safety Code, who is a paid employee of the City of Midland.

(ii) "Firefighter" means a firefighter who is a permanent, paid employee of the City of Midland's Fire Department. The term includes the chief of the Fire Department.

(iii) "Line of duty illness or injury" means an illness or injury that occurs during the course and scope of employment.

(iv) "Police officer" means a paid employee who is full-time, holds an officer license issued under Chapter 1701, Occupations Code, and regularly serves in a professional law enforcement capacity in the Police Department, the Municipal Court, or other department of the City of Midland. The term includes the chief of the Police Department.

2) Illness / Injury Leave:

A firefighter, police officer, or emergency medical services personnel shall be provided a leave of absence for a line of duty illness or injury. This leave is with full pay for a period commensurate with the nature of the line of duty illness or injury. If necessary, the leave shall continue for up to one year. The City will continue the employee's health benefits during the leave period at the same level and under the same conditions as if the employee was continuously at work. Workers' compensation benefits shall be offset to the extent applicable by any amount for incapacity received as provided by this subsection. Leave under this subsection shall run concurrently with FMLA leave.

3) Use of PTO; Temporary Leave:

If a firefighter, police officer, or emergency medical services personnel is temporarily disabled by a line of duty injury or illness and the paid leave of absence granted under this subsection has expired, the employee may use accumulated PTO or other accumulated leaves for a period commensurate with the nature of the temporary disability. A firefighter, police officer, or emergency medical services personnel who requires additional leave shall be placed on unpaid temporary leave.

4) Medical Certification:

When requested by the Workers' Compensation / Leave Coordinator, a firefighter, police officer, or emergency medical services personnel who receives leave under this subsection shall provide medical certification and recertification documents from a health care provider to support the need for the leave.

5) Return to Duty:

If able, a firefighter, police officer, or emergency medical services personnel may return to modified duty as outlined in Section 18.a of this chapter, while recovering from a temporary disability. If medically necessary, the modified duty assignment may continue for up to one year.

A firefighter, police officer, or emergency medical services personnel who takes leave under this subsection may be required to provide a fitness for duty clearance from a health care provider upon return. After recovery from a temporary disability, a firefighter, police officer, or emergency medical

services personnel shall be reinstated at the same rank and with the same seniority the person had before going on leave.

Section 18 Return to Work / Inability to Return to Work

a. **Modified Duty**

"Modified Duty" is a temporary assignment which is for a specified and limited period and fulfills a necessary job function, appropriate to the employee's skills and level of experience as determined by the City, and which the employee can perform without violating any medical restriction imposed as a result of a temporary disability, illness or injury, for which the employee is compensated at the employee's normal rate of pay and benefits.

The number, availability and duration of such assignments are limited by departmental needs as determined by the Department Manager or the Department Manager's designee.

If restrictions as noted on the Physician's Release to Return to Work form are determined to be permanent, the employee shall not be eligible for a Modified Duty assignment.

1) Limitation of Modified Duty Assignment:
   The Modified Duty assignment shall end on the earliest of:
   (i) The date when the employee is released to the employee's regular schedule with no restrictions as evidenced on the Physician's Release to Return to Work form;
   (ii) The date when a physician determines the employee's has permanent restrictions;
   (iii) The date the Maximum Modified Duty Assignment Period ends; and
   (iv) The date the Employee fails to take a required medical examination, without good cause.

2) Maximum Modified Duty Assignment Period:
   A Modified Duty assignment may be intermittent or continuous, but in no event shall such an assignment continue for more than 180 work days after the date when the employee was initially unable to perform each and every essential function of the employee's job (the "Maximum Modified Duty Assignment Period"). At the end of the Modified Duty assignment, if an employee is unable to return to work without restrictions, the employee may be placed on the appropriate leave.

   Once an employee has been unable to perform each and every essential function of the employee's position that the employee held when the disability, illness or injury arose for 90 calendar days during a 12 month period or has exhausted all leave granted under previous sections of this Chapter (whichever comes first), the employee may request a meeting with the employee's Department Manager, the Director of Administrative Services, or the City Manager or the City Manager's designee in order to determine if the City has any current vacancies for which the Employee is qualified and is currently able to physically perform.

3) Procedure:
A "Physician's Release to Return to Work" form shall be completed by a physician (for injury leave, such physician shall be one of the designated providers selected for the City's workers' compensation insurance) and shall include the probable length of the restrictions and the nature of the restrictions. An additional statement confirming the ability to perform the Modified Duty assignment may also be required.

Once an employee has seen a physician and the physician has completed the Physician's Release to Return to Work form indicating that the employee can return to work, the applicable procedures below shall be followed:

(i) Return to work with Regular Hours and No Restrictions:
   The employee obtains the completed Physician's Release to Return to Work form from the physician indicating that there are no restrictions and that the employee has the

ability to work during the employee's regularly scheduled hours. This form must be submitted to the employee's supervisor and the Office of Administrative Services' Workers' Compensation / Leave Coordinator upon the employee's return to work.

(ii) Return to Work with Restrictions:
The employee obtains the completed Physician's Release to Return to Work form from the physician indicating that the employee needs (i) restricted duties (for example, limitations on lifting, walking, stooping, bending, etc.) and/or (ii) restricted number of hours worked per day or per week, with or without limitations on the duties performed.

1. If the physician releases the employee to return to work with restrictions, as evidenced by completion of the Physician's Release to Return to Work form, the form must be submitted to the employee's supervisor and the office of Administrative Services' Workers' Compensation / Leave Coordinator prior to or immediately upon return to work for consideration of a Modified Duty assignment. The supervisor and a representative from Administrative Services will review the restrictions and determine if the employee is eligible for a Modified Duty assignment. The employee must report for work at the time designated by the employee's supervisor.
2. If the employee is approved for a Modified Duty assignment, the employee shall comply with the restrictions indicated in the Physician's Release to Return to Work form. If the employee's restrictions change at any time, the employee shall notify the employee's supervisor immediately and submit to the supervisor and the office of Administrative Services Worker's Compensation / Leave Plan Coordinator a copy of the revised Physician's Release to Return to Work form.
While working a Modified Duty assignment, the employee may be required to provide periodic updates from the physician up to every 30 days. Additionally, the employee may be required to submit to a periodic physical examination as a condition of continued Modified Duty status.

3. If a Modified Duty assignment is not available, a representative from Administrative Services will determine what remaining leave benefits are available to the Employee, if any.

If the employee is unable to perform the Modified Duty assignment, the employee shall contact the physician to review and potentially revise the Physician's Release to Return to Work form.

b. **Inability to Return to Work**.

When a treating physician determines that an employee is permanently incapable of returning to work in the employee's full duty capacity, the City will accommodate such disability to extent it is required under the Americans with Disabilities Act, or the employee may apply for available positions within the City for which the employee is qualified. The Department Manager or his designee, based on the assessment of a licensed medical doctor that an employee is not able to perform the required physical duties or tasks of employee's present position (regardless of whether the incapacity is due to on the job injuries, off the job injuries, or illness), then the employee will not be returned to the employee's full duty with the City until a medical doctor states in writing that the employee is able to perform all the required physical tasks or duties of the position. Wherever possible, it is the policy of the City to provide Modified Duty to employees who have been released by a physician to return to work in a limited capacity.

Once an employee has exhausted all leave granted to the employee under previous sections of this Chapter or has been unable to perform each and every essential function of the position which he held at the time of injury with the City for 90 calendar days during a 12 month period (whichever comes first), the employee may request a meeting with the employee's Department Manager, the City's Director of Administrative Services, or the City Manager in order to determine if the City has any current vacancies for which the employee is qualified and is currently able to physically perform.

If a job vacancy exists that the employee is qualified for and can physically perform, the employee may apply for that position. The employee has the choice to either accept or decline any offered position:

1) If the offer is accepted, it is recognized and understood by the employee that the employee may have to take a reduction in salary.
2) Any employee so reassigned will be compensated at a pay rate in the pay range of the position to which the employee has been reassigned. However, the affected employee shall be entitled to start in the new band/zone equal to his previous salary if that band/zone is equal to or below the midpoint of the new pay range.
3) If the employee does not seek another position, or if the offer of a new position is declined, or if no job vacancy exists that the employee is qualified for and can physically perform, then the employee shall be allowed to exhaust any leave granted to the employee under previous sections of this Chapter

Under no circumstances will the City continue an employee's active status once the employee exhausts the leave granted under previous sections of this Chapter.

Once an employee is placed on inactive status, the City shall no longer pay the employee a salary, and the employee shall no longer accumulate PTO leave or other accrued leaves. The employee may continue to receive the employee's worker' compensation benefits, and the employee will also be able to retain the City's health insurance if the employee pays the rate as established by the City as required by the Consolidated Omnibus Budget Reconciliation Act (COBRA). Such coverage shall be limited to the minimum length of time established by the Act.

An employee who has been placed on inactive status under this policy may apply for positions with the City of Midland for which the employee is qualified and physically able to perform. Should an employee who has accepted another position with the City or been placed on inactive status due to an on the job injury recover and be able and qualified to perform all the tasks required of the employee's previous position within 12 consecutive calendar months from the date of the employee's acceptance of the new position with the City or placement on inactive status, then the employee will be offered reinstatement to the previous position should said position become vacant. The employee's recovery must be confirmed by a written statement from a licensed medical doctor. The City shall have the right to request a second medical opinion, but that second opinion shall be paid for by the City. Under this policy, no employee's
inactive status will continue for more than 12 consecutive months, unless required by federal, state or local law.

Section 19 Paid Quarantine Leave

a. Purpose.

The purpose of this policy is to provide for and maintain employment benefits for certain employees who are ordered to quarantine or isolate due to a possible or known exposure to a communicable disease while on duty.

b. Applicability

This policy applies to the following employees of the City:

1) Fire protection personnel; and
2) Peace officers of the Police Department and the Municipal Court.

c. Conditions

The paid leave and benefits provided by this policy are only available to an employee who is ordered to quarantine or isolate due to a possible or known exposure to a communicable disease while on duty by the employee's supervisor or the City's health authority. An employee may be required to provide proof of an order to quarantine and may be denied paid leave or benefits if the employee fails to provide proof within a reasonable time.

d. Benefits

If an employee is ordered to quarantine under the conditions in Subsection c above, the employee will receive all employment benefits and compensation for the duration of the leave, including paid leave accrual, pension benefits, and health benefit plan benefits that the employee would customarily be provided on paid leave.

e. Reimbursement for Expenses

If an employee is ordered to quarantine under the conditions in Subsection c above, the employee may request reimbursement for reasonable costs related to the quarantine, including lodging, medical treatment and transportation by submitting a reimbursement request via the Employee Self Service portal of the Human Resources Information System within five (5) days after returning from the leave ordered under this policy. An employee may be required to provide receipts or proof of payment with the request and reserves and may be denied reimbursement that the City deems unreasonable or unrelated to quarantine.

f. Effect on Paid Leave Balances

The City will not reduce an eligible employee's PTO or other paid leave balance for quarantine leave ordered under this policy.

Section 20 Peace Officer and Telecommunicator Mental Health Leave

a. Purpose

The purpose of this Section is to allow the use of mental health leave by peace officers and full-time telecommunicators employed by the City who experience a traumatic event while on duty.

b. Applicability

This Section applies to licensed peace officers and full-time telecommunicators employed by the City. For purposes of this Section, "telecommunicator" means a person authorized to act as a telecommunicator under Section 1701.405, Occupations Code.

c. Conditions

An employee to whom this Section applies shall be allowed up to three (3) days or (30) hours of paid mental health leave per calendar year, provided that:

1) the leave is:
   (i) approved by the employee's supervisor, the Chief of Police (for Police Department peace officers and full-time telecommunicators) or the Presiding Judge (for Municipal Court peace officers); or
   (ii) ordered by a mental health professional; and
2) the leave is taken as a result of a traumatic event that occurred while on duty.

d. Anonymity

The City will keep requests to take mental health leave and any medical information related to mental health leave under this policy confidential to the extent allowed by law and separate from the employee's general personnel file held by the Administrative Services Department. The City cannot guarantee the anonymity of information that is otherwise public or necessary to carry out the City's duties under applicable laws.

e. Effect on Paid Leave Balances

The City will not reduce an eligible employee's PTO, or other paid leave balance for mental health leave taken under this policy.

Section 21 Special Leave with Pay

Department Managers may grant employees special leave with pay and actual expenses to attend professional conferences, conventions or short courses or to visit other cities in the interest of the City, as authorized by the City Manager.

Section 22 Mental Health Day

The City is committed to protecting our employees' health, safety, and well-being. Employees may access confidential free counseling through the City's Employee Assistance Program (EAP).

Each full-time employee shall receive two (2) Mental Health Days per calendar year. An employee who wishes to take a Mental Health Day shall notify the employee's immediate supervisor prior to the start of the employee's scheduled shift, if practical. Documentation of the absence shall not be required. The reason for such absence (i.e., use of a Mental Health Day) shall be held confidential as reasonably practicable. Unused Mental Health Days shall not be carried over into the following year, and employees will not be provided with payment in lieu of taking Mental Health Days. In addition, upon an employee's termination of employment or retirement, no payment shall be provided for unused Mental Health Days.

Section 23 Community Service Leave

The City encourages employees to be active citizens and provides this leave to participate in organizations and activities that benefit the local community.

All full-time employees are eligible to request eight (8) hours of Community Service Leave per calendar year. Community Service Leave may be taken in one (1) hour increments. An employee who wishes to take Community Service Leave shall notify the employee's supervisor thereof and obtain approval prior to taking Community Service Leave. An employee, upon request, shall provide documentation to support the taking of Community Service Leave, and a failure to provide sufficient documentation thereof may result in the City's refusal to provide Community Service Leave. Community Service Leave may not be used for events with a political or religious purpose. Community Service Leave is noncumulative and nontransferable.

Section 24 Civic Duties Leave

All employees will be allowed time off with pay to attend the civic duties of voting in elections, serving as members of jury panels, or appearing before any tribunal by virtue of subpoena or summons.

Section 25 Leave of Absence

Department Managers may grant an employee one day of paid administrative leave in regard to disciplinary or safety issues. Any additional paid administrative leave in regard to discipline, safety, or investigations must be approved by the City Manager. Department Managers may grant leaves of absence without pay to regular employees, not to exceed thirty (30) days in duration. Requests for such leave shall be in writing and

submitted well in advance of the date the Employee will commence such leave. In granting such leaves, the Department Manager shall give primary consideration to the City's need for the Employee's services. Leaves of absence without pay may be granted for any legitimate purpose; however, employees will be obligated to show that the granting of such leave is to the interest of the City. Leaves of absence without pay in excess of thirty (30) days may be granted only with the approval of the City Manager and in no case shall exceed six (6) months.

Section 26 Absence without Leave

No employee may absent himself from duty for a single day or any part of a day without permission of his Department Manager. Any such absence will be without pay and the employee may be subject to adverse action. Any employee absent from work without notice for three (3) consecutive days will be considered as having abandoned the job. Any employee absent from work without notice for three (3) consecutive days will be considered as having abandoned the job. Such abandonment shall be considered a voluntary resignation from employment, and the City will process such separation of employment as a voluntary resignation.

Chapter VI

Wage and Salary Administration

Section 1 Application of Rates

All employees occupying a position in the classified or unclassified service shall be paid a salary or wage within the range currently set for that position's class under the pay plan as approved by the City Council. If an employee begins service in the middle of a pay period, he will be paid by the calculated hourly rate for the total hours worked during that time.

Section 2 Pay Rates for New Employees

Pay rates for new or probationary employees will normally be at the minimum step in the salary range established for the position that the employee is occupying. Department Managers, with the approval of the Administrative Services Director, may pay a new employee a beginning rate 15% above the minimum established in that range. Appointments with a pay rate of more than 15% above the minimum for a particular salary range may be made only with the approval of the City Manager.

Section 3 Pay Progression

Pay progression for employees in classified positions will be based on documented criteria that may include performance, attendance, certifications, training, skills testing, length of service, or other job specific factors. Pay progression dates and the amounts of the progressions shall be recommended on an annual basis by the City Manager and approved by the City Council through the budget process and/or amendments to the City's annual budget.

Section 4 Total Rate of Pay

No employee shall be paid at, or no salary advancement shall be made which would compensate an employee at, a rate more than the maximum or highest step in the salary range to which that employee's position has been assigned. Exceptions may only be made when deemed by the City Manager to be advantageous to the City service. Any such pay increases shall not exceed the assigned pay range by more than 10%. Market adjustments which impact City of Midland pay plans or cost of living adjustments which impact municipal employee salaries must be approved by the City Council.

The City of Midland takes all reasonable steps to ensure that employees receive the correct amount of pay in each paycheck and that employees are paid promptly on scheduled paydays. In the unlikely event that there is an error in the amount of pay an employee receives, he should promptly bring the discrepancy to the attention of his immediate supervisor or the Payroll Manager. If the employee has been underpaid, the City will pay the employee the difference as soon as possible. If the employee has been overpaid, arrangements will be made to return the overpayment to the City as soon as possible. Noemployee is entitled to retain any pay in excess of the amount he has earned according to his establishedrate of pay.

Section 5 Part-time, Temporary and Seasonal Rates

An employee who works regularly at less than the established workday or workweek shall be paid by the hour or at a salary proportional to the amount of time worked. The hourly or monthly rates for part-time, temporary or seasonal employees shall be established by the Department Manager concerned and the Administrative Services Director after giving due consideration to the ranges and pay rates in effect for similar positions in the current pay plan.

Section 6 Pay Rates for New Positions

Whenever a new position is created the Administrative Services Director shall, with the department manager involved, study the duties and responsibilities of the new position and in light of the existing positions and pay rates in the "Position Classification and Pay Plan" submit to the City Manager a recommendation for the proper pay range for the new position.

Section 7 Termination Pay

All employees who leave the service of the City for any reason shall receive all pay that may be due them with the following qualifications:

a. Regular employees shall be paid for unused PTO leave as set out in Subsection c of Section 9 of Chapter V.

b. An employee whose employment is terminated before the end of a pay period shall be paid for the total hours actually worked through the employee's termination date.

c. Effective October 1, 2023, any employee who is eligible to retire under either TMRS or FRRF at the time of the employee's termination of employment or retirement shall receive payments for accrued PTO as set out in Section 9 of Chapter V.

Section 8 Longevity Pay

All regular full-time employees shall be entitled to additional compensation at a rate of six dollars ($6.00) per month for each full year of continuous service with the City. The beginning of the pay period nearest the anniversary date the employee began employment with the City shall be the effective date of longevity pay increases. The rate of longevity pay shall coincide with the rate established by Texas Local Government Code Section 142.

Section 9 Performance Appraisal System

The purpose of the system is to improve employee productivity, to provide better communicationsbetween supervisors and those they supervise, to identify needs for training or other remedial actions among the workers, to provide upward mobility and the cultivation of skills and abilities, and to further the City service as a good place to work.

Evaluations shall be used as guides to judgment in granting permanent status to probationary employees, in offering promotions to employees, in recommending employees for merit pay increases, in determining that dismissals or other disciplinary actions based on performance are in fact for just cause, in avoiding any possibilities of discrimination or prejudice, and in other personnel matters.

The immediate supervisor of the employees being evaluated shall perform evaluations, but the evaluations may be reviewed and revised by Division and Department Managers before becoming final.

Evaluations of supervisory employees shall take into account the skill and judgment shown by such supervisors in the rating of those responsible to them.

Evaluations shall be completed shortly before the end of probation and thereafter on an annual basis.

An evaluation of an employee may also be conducted at any other time at the option of his supervisor; such specific evaluations are appropriate if the employee is being considered for promotion, is in need of remedial action, or is to be warned of possible disciplinary action.

If any employee believes that the performance evaluation is erroneous, unfair, or prejudiced, he may appeal the evaluation in the same way as is provided for any other grievance in Chapter IX of the personnel rules.

Section 10 Compensation Policy Statement

It shall be the policy of the City of Midland to maintain a pay structure for all municipal employees that will allow said employees the opportunity to receive reasonable, comparable wages in relation to comparable jobs in the relevant labor markets. The City Council shall establish both regional and statewide comparative markets consisting of municipalities in the population range of 75,000 to 200,000 (or larger if they are in the regional market) that shall be used in obtaining comparative wage data.

The City of Midland will also strive to maintain internal equity in the municipal job classification and pay structure through the use of a sound job analysis process and continue to promote the development and refinement of pay structures which reward employee performance and development.

Toward these ends, administrative regulations and pay structures have been adopted and may be modified as needed to accomplish the objectives of this policy, to comply with federal or state regulations, or to promote the efficiency of the City Service. At least one general review of the classification and pay plans should take place in each succeeding two-year period. The City Manager may appoint an Advisory Committee to conduct this review.

It shall be the responsibility of the City Manager to maintain administrative position classification and pay plan regulations in compliance with these policies.

Chapter VII

Transfer, Promotion, Resignation and Retirement

Section 1 Transfer

After notice to the Administrative Services Director, an employee may be transferred by a department manager at any time from one position to another position in the same or comparable class. If the transfer involves a change from one department to another department, both Department Managers must consent to the transfer unless the City Manager orders the transfer for the purpose of economy or efficiency. No person shall be transferred to a position for which he does not possess the necessary minimum qualifications, according to the classification plan.

Section 2 Promotion

Insofar as practical and consistent with the best interest of the City, all vacancies in the classified and unclassified service shall be filled by promotion of persons already employed by the City. If, in the opinion of the Department Manager or other person responsible for filling the vacancy, a position can best be filled by hiring a new employee, such information shall be forwarded to the Administrative Services Director who shall take the necessary steps to assist in recruiting qualified applicants for the position.

Section 3 Resignation

An employee who wishes to leave the employment of the City shall give at least two (2) weeks' notice to the supervisor before the effective date of his resignation. Such notice, either oral or written, shall state the reasons for such resignation. The Department Manager shall immediately notify the Administrative Services Director of such resignation and indicate the reasons therefore and whether the employee's services have been satisfactory.

Section 4 Termination Interview

The employee's termination interview and final paycheck will be received in the Administrative Services Office.

Section 5 No Recommendations or References

No person is authorized to act on behalf of the City in making recommendations or giving references with respect to former or current City employees. Any City employee who gives a recommendation or reference with respect to a current or former City employee shall be acting in his or her individual capacityand not as an agent, employee, or representative of the City of Midland, Texas, said act being beyond thescope of said employee's employment. Any employee who is sued or becomes involved in a claim or civil lawsuit due in any part to his or her giving a reference or recommendation shall not be entitled to a paidor other legal defense by the City of Midland.

Section 6 Requests for Employment Verification

Information regarding the employment of all current and former City employees shall be verified by Administrative Services only upon written request signed by the current or former employee. In absence of a written request signed by the current or former employee, Administrative Services shall be authorized to verify only the following information:

a. The date the employee began his employment with the City of Midland,

b. The date the employee ended his employment with the City of Midland,

c. The positions held while employed by the City of Midland,

d. The Department(s) to which the employee was assigned while employed by the City of Midland.

No person other than the Director of Administrative Services or the Director's designee shall be authorized to act on behalf of the City of Midland with respect to the verification of employment information.

Section 7 Personnel Files

The City of Midland retains employment records in a personnel file with the Administrative Services Department. The information contained in the file is the property of the City and must be maintained for government and record-keeping purposes. Therefore, all employees are required to notify the Administrative Services Department immediately if there is any change in relevant personal or employment information such as changes in address, phone numbers, marital status, emergency contact,insurance beneficiary, number of dependents, or legal name.

All files connected with an employee are considered strictly confidential, and access will be limited to those who have a job-related need to know the information, those who have been authorized to view the file, and as required by law. If an employee wishes to view his personnel file, he must submit written request with the Administrative Services Department. Upon receipt and approval of such request, an appointment will be scheduled for the employee to view his file. An employee may not remove or alter any information in the file in any way.

If an employee believes that information in his personnel file is incorrect, he may submit a written request to Administrative Services for change(s) to be made. If such a request is denied, the employee may request a statement of disagreement be placed in his file. This statement of disagreement will become a permanent part of the employee’s file.

The City of Midland considers falsification of personnel records to be a serious offense, and upon discovery can lead to disciplinary action up to and including termination.

Chapter VIII

Adverse Action

Section 1 Adverse Action

a. Purpose of Chapter

The purpose of this Chapter is to establish policies and administrative procedures for addressing Prohibited Conduct (as defined herein) and employment separation of City of Midland employees. The policies and procedures established herein are authorized and adopted, and the same shall be construed according to the plain meaning of its language unless defined otherwise. No policy or procedure established by this Chapter shall be enforced or interpreted in a manner that limits or abrogates protections afforded by law. The remedies set forth in this Chapter are exclusive.

b. Definitions.

In this Chapter:

1) "Adverse Action" means an administrative action taken by a Department Manager against an Employee because of the Employee's Prohibited Conduct. Said administrative actions include the following:
    a) Oral Reprimand;
    b) Written Reprimand;
    c) Suspension from employment without pay;
    d) Demotion from a current position to a lower position with lesser responsibility or compensation; and
    e) Termination of employment.
2) "Appeal Hearing" is the initial proceeding at which the Employee may contest an Adverse Action.
3) "Business Day" means a day on which the City of Midland is open for business.
4) "City" means the City of Midland.
5) "Department Manager" means the City department manager for the department that the Employee is assigned to. For the purpose of this Chapter, "Department Manager" also means an Assistant City Manager, Deputy City Manager, or the City Manager if a City department manager, Assistant City Manager, or Deputy City Manager is deemed to have engaged in Prohibited Conduct.
6) "Employee" means an employee of the City of Midland. For the purpose of this Chapter, "Employee" also means a Department Manager or Employee within the City Manager's Office if such person is deemed to have engaged in Prohibited Conduct.
7) "Hearing Officer" means the City official that presides over the Appeal Hearing.
8) "Lay-Off" means the employment separation between the Employee and the City that is not the result of an Adverse Action.
9) "Name-Clearing Hearing" means a proceeding before the City Manager at which the Employee may address allegations made by the City or its officials relating to the Employee's termination.
10) "Notice of Appeal" means the written notice submitted to the Administrative Services Department by the Employee seeking administrative review of an Adverse Action.
11) "Notice of Appeal to the Personnel Appeals Board" means the written notice submitted to the Administrative Services Department by the Employee seeking the Personnel Appeals Board's review of an Adverse Action.
12) "Notice of Hearing Officer Determination" means the written notice issued by the Hearing Officer containing the Hearing Officer's final determination resulting from the administrative review of an Adverse Action following an Appeal Hearing.

13) “Notice of Personnel Appeals Board Determination” means the written notice issued by the Personnel Appeals Board containing its final determination resulting from its review of an Adverse Action following a Personnel Appeals Board Hearing.
14) “Personnel Appeals Board” means the administrative body that presides over the Personnel Appeals Board Hearing.
15) “Personnel Appeals Board Hearing” means the final proceeding at which the Employee may contest an Adverse Action.
16) “Prohibited Conduct” means conduct of a character and nature that constitutes or is reasonably related to the following:
    a) Consumption and/or possession of alcohol or narcotics while on duty or using City-owned property;
    b) Consumption and/or possession of alcohol or narcotics in a manner that forms the basis of a crime;
    c) Criminal conduct;
    d) Delinquency;
    e) Dishonesty, including forgery, falsification of documentation, or any other falsifying action;
    f) Disruptive behavior that limits or restricts workplace efficiency;
    g) Failure to maintain necessary professional certifications or authorizations;
    h) Failure to perform employment duties;
    i) Immoral behavior, including behavior that may adversely affect the City or its officers, officials, employees, or agents, or behavior that may reasonably undermine the confidence of the public;
    j) Misappropriation or destruction of City property or information;
    k) Subversive behavior, including fighting, intimidation, profanity, insubordination, negligent or reckless actions, discourteousness, safety rule violations, misuse of City property, or violation of any established procedure, order, directive, or protocol;
    l) Unsatisfactory attendance;
    m) Failure to reasonably cooperate during an investigation involving alleged misconduct; and
    n) Violation of any policy, standard, or provision of the City of Midland, Texas Personnel Policies.
17) “Supervisor” means the person charged with the daily oversight and management of the Employee contesting an Adverse Action.
18) “Workday” means a day (including weekend days) on which the Employee is scheduled to report to work.

c. Notice Requirements

1) Any notice or communication required or permitted pursuant to this Chapter shall be in writing.
2) Subject to Section 1.c(3), a notice or communication required or permitted pursuant to this Chapter shall be deemed to be delivered and received on the date said notice or communication is:
    a) Personally delivered to the respective party to whom it is directed;
    b) Deposited by certified mail; or
    c) Sent by electronic mail.
3) Notwithstanding Section 1.c(2), a notice or communication that is sent to the City, or its employees or officials, shall be deemed to be delivered and received on the date that Administrative Services Department is in actual or physical receipt of said notice or communication.
4) The delivery of a notice or communication to the Employee shall be directed to one of the following:
    a) The City email address of the Employee;

b) The email address of the Employee's authorized representative;
c) The Employee's physical address on file with the Administrative Services Department; or
d) The physical address of the Employee's authorized representative.

5) The delivery of a notice or communication to the City or its officers, officials, or employees shall be directed to one of the following unless directed otherwise:
   a) The City email address of the current Administrative Services Director; or
   b) City of Midland
      300 N. Loraine Street
      Midland, Texas 79701
      Attn: Administrative Services Director.

d. Prohibited Conduct; Adverse Action

Employees shall refrain from engaging in Prohibited Conduct. An Employee that is deemed to have engaged in Prohibited Conduct may be subject to Adverse Action in accordance with the policies and procedures of this Chapter.

e. Discretionary Factors and Considerations Regarding Adverse Action Administration

If a Department Manager determines that the Employee engaged in Prohibited Conduct, the Department Manager may, in the Department Manager's sole and absolute discretion, incorporate the following factors and considerations in the Department Manager's decision regarding an Adverse Action to be administered to the Employee:

1) Nature of the Employee's duties;
2) Nature of the Prohibited Conduct;
3) Circumstances of the Prohibited Conduct;
4) The Employee's disciplinary history; and
5) Any other relevant facts or information.

f. Authorized Adverse Actions

Upon a Department Manager's determination that the Employee engaged in Prohibited Conduct, said Department Manager may administer (or cause to be administered) the following Adverse Actions:

1) Oral Reprimand – verbal discussion identifying the standard(s) of conduct that the Employee violated, and the corrective action required, if applicable. An Oral Reprimand may contain:
   a) Additional facts and information as deemed appropriate by the Department Manager; and
   b) A warning that future violations may result in additional Adverse Action(s) in accordance with this Chapter.
2) Written Reprimand – memorandum to the Employee (with a copy to the Employee's personnel file) identifying the standard(s) of conduct that the Employee violated, and the corrective action required, if applicable. A Written Reprimand may contain:
   a) Additional facts and information as deemed appropriate by the Department Manager; and
   b) A warning that future violations may result in additional Adverse Action(s) in accordance with this Chapter.
3) Suspension – temporary removal of the Employee from performing his/her duties and from receiving compensation. No Employee shall be suspended:
   a) For a period exceeding thirty (30) workdays; or
   b) More than thirty (30) workdays in any fiscal year.
4) Demotion – permanent reassignment of the Employee to a position with lesser responsibility or compensation.

5) Termination – permanent severance of the employment relationship between the Employee and the City.

g. Adverse Action Administration

Adverse Actions shall be administered in accordance with the following procedures:

1) Oral and Written Reprimands shall be issued as deemed appropriate by the Department Manager.
2) Suspension, Demotion, Termination
    a) Prior to issuing a Notice of Adverse Action to the Employee, a Department Manager shall deliver a copy of the proposed Notice of Adverse Action to the Administrative Services Department.
    b) Upon approval of the form of the Notice of Adverse Action by the Administrative Services Department, the Department Manager shall issue the Notice of Adverse Action to the Employee in accordance with the requirements of Section 1.c.

h. Notice of Appeal

1) If the Employee is issued a Notice of Adverse Action that results in a Suspension, a Demotion, or Termination, the Employee may seek administrative review of the Adverse Action by filing a Notice of Appeal.
2) A Notice of Appeal must be filed within two (2) Business Days of the affected Employee's receipt of a Notice of Adverse Action.
3) A Notice of Appeal shall consist of the following information:
    a) Employee name;
    b) Employee position;
    c) Department Manager name;
    d) Supervisor name; and
    e) General description of the basis for appeal.
4) A proper and timely Notice of Appeal shall be perfected upon the Administrative Services Department's receipt of the Notice of Appeal. If a Notice of Appeal does not contain the information required by Section 1.h(3), but is otherwise proper and timely, the Administrative Services Director shall notify Employee of such defect within two (2) Business Days following the Administrative Services Department's receipt of the Notice of Appeal.
5) Upon receiving notification that a Notice of Appeal does not contain the information required by Section 1.h(3), the Employee shall correct the defect and supplement the missing information within two (2) Business Days of the Employee's receipt of the notice required by Section 1.h(4).

i. Designation of Hearing Officer

1) Upon the perfection of a Notice of Appeal, the Administrative Services Director shall notify the City Manager of said Notice of Appeal within a reasonable amount of time after its delivery to the Administrative Services Department.
2) Upon receipt of the notice prescribed by Section 1.i(1), the City Manager shall designate a person to serve as the Hearing Officer to preside over the Appeal Hearing, which shall be:
    a) The City Manager;
    b) The Deputy City Manager; or
    c) An Assistant City Manager.
3) The City Manager shall notify the Administrative Services Director of the designation required by Section 1.i(2) following the same.
4) Upon request of the City Manager and agreement of the Presiding Judge of the Municipal Court, the Presiding Judge or Associate Judge of the Municipal Court may serve as the Hearing Officer.

5) If none of the foregoing individuals are available to serve as the Hearing Officer, the City Manager may designate another department manager with no knowledge of the facts that give rise to the Appeal Hearing to serve as the Hearing Officer.

j. Setting of Appeal Hearing

1) Following the designation of the Hearing Officer, the Hearing Officer shall provide the Administrative Services Director with dates and times of availability for the scheduling of the Appeal Hearing.
2) The Appeal Hearing shall occur no later than fifteen (15) Business Days following the perfection of the Notice of Appeal.
3) Notwithstanding Section 1.j(2), the Appeal Hearing may occur later than fifteen (15) Business Days following the perfection of the Notice of Appeal upon: (i) the mutual agreement of the Department Manager and the Employee; and (ii) the consent of the Hearing Officer.
4) Upon final setting of the Appeal Hearing, the Administrative Services Director shall send a Notice of Hearing to the Employee, the Hearing Officer, and the Department Manager. The Notice of Hearing shall consist of the following information:
    a) The name and position of the Employee;
    b) The name and position of the Employee's Supervisor;
    c) The date, time, and location of Appeal Hearing; and
    d) The reason/basis for appeal, as indicated by the Employee in the Notice of Appeal.

k. Appeal Hearing Procedure

1) The following persons shall be entitled to participate in an Appeal Hearing:
    a) Hearing Officer;
    b) Administrative Services Director;
    c) The Employee;
    d) A designated representative of the Employee (if any); and
    e) Department Manager.
    f) A representative of the City Attorney's Office may represent the Department Manager at the Appeal Hearing if the City Attorney receives and agrees to a request for representation from the Department Manager.
2) Minutes or Recording
    a) The Administrative Services Director shall take minutes of the Appeal Hearing or cause a recording to be made of the Appeal Hearing.
    b) The Administrative Services Department shall maintain the minutes or recording of an Appeal Hearing for at least three (3) years or as long as may be required by law.
    c) The Employee may provide, at the Employee's sole cost and expense, for a court reporter to record the Appeal Hearing. If the Employee provides for a court reporter to record the Appeal Hearing, the Employee shall provide the City with a copy of said recording (at no cost to the City) upon receiving a written request for such from the Administrative Services Director.
    d) The Employee may submit a written request for a transcript of an Appeal Hearing recording from the Administrative Services Department; provided, however, that the Employee shall pay all expenses associated with transcribing the Appeal Hearing recording, which shall be reasonably determined by the Administrative Services Director.
    e) Upon the submission of a request for a transcript of an Appeal Hearing recording, the Employee shall submit a deposit to the Administrative Services Department in an amount equal to the cost associated with transcribing the Appeal Hearing recording.
3) Witnesses
    a) The Employee, the Department Manager, and their respective witnesses shall be entitled to testify at the Appeal Hearing.

b) The Employee and the Department Manager shall be responsible for securing the availability of their respective witnesses.
c) The Employee and the Department Manager shall be entitled to call and question any witness who has knowledge of the incident(s) or alleged Prohibited Conduct that resulted in the Department Manager's administration of the Adverse Action.
d) The Hearing Officer shall have the right to exclude the testimony of any witness who is shown to not possess knowledge of the incident(s) or alleged Prohibited Conduct that resulted in the Department Manager's administration of the Adverse Action.
e) At the request of the Employee or the Department Manager, all witnesses shall be excluded from the Appeal Hearing; provided, however, that the Employee, the Department Manager, and their respective representatives may not be excluded (provided that a representative shall not testify). A request to exclude witnesses pursuant to this Section must be made prior to the commencement of any testimony.

4) Appeal Hearing Process

The Appeal Hearing shall proceed in the following manner:

a) Introduction; Swearing in of Witnesses

The Administrative Services Director shall make a formal introduction to the Appeal Hearing, which shall consist of the factual circumstances that form the basis for the Appeal Hearing. Said factual circumstances shall consist of, but not be limited to, the following:

1. Basis for Adverse Action as described in the Notice of Adverse Action;
2. Notice of Adverse Action administration date;
3. Notice of Appeal perfection date;
4. Identification of the Appeal Hearing participants; and
5. Identification of the representatives of the Employee and the Department Manager.

The Employee and the Department Manager shall notify the Administrative Services Director of their respective witnesses expected to testify during the Appeal Hearing. The Administrative Services Director shall swear in such witnesses prior to the elicitation of witness testimony.

b) Opening Statements

1. The Employee and the Department Manager (or their respective representatives) are entitled to give an opening statement prior to the commencement of any testimony. The Hearing Officer shall consider the opening statements of the Employee and the Department Manager in the following order:
    a. Department Manager
    b. Employee
2. The Employee and the Department Manager may waive the right to give an opening statement.

c) Case-in-Chief; Department Manager

1. The Department Manager's case-in-chief may consist of witness testimony, the submission of exhibits, and the Department Manager's testimony. The Hearing Officer shall have the sole discretion to determine the relevance of evidence presented during the Department Manager's case-in-chief.
2. Following the direct examination of a witness by the Department Manager, the Employee shall be afforded the opportunity to cross-examine said witness.
3. Following the cross-examination of a witness, the Department Manager shall be afforded the opportunity to re-examine said witness.
4. Following the re-examination of a witness, the Employee shall be afforded the opportunity to cross-examine said witness.

5. The Hearing Officer may examine a witness, the Department Manager, the Employee, or a representative of the Department Manager or Employee at any time.

d) Case-in-Chief; Employee
   1. The Employee's case-in-chief may consist of witness testimony, the submission of exhibits, and the Employee's testimony. The Hearing Officer shall have the sole discretion to determine the relevance of evidence presented during the Employee's case-in-chief.
   2. Following the direct examination of a witness, the Department Manager shall be afforded the opportunity to cross-examine said witness.
   3. Following the cross-examination of a witness, the Employee or the Employee's representative shall be afforded the opportunity to re-examine said witness.
   4. Following the re-examination of a witness, the Department Manager shall be afforded the opportunity to cross-examine said witness.
   5. The Hearing Officer may examine a witness, the Department Manager, the Employee, or a representative of the Department Manager or Employee at any time.

e) Closing Statements
   1. Following the cases-in-chief of the Department Manager and the Employee, the Department Manager and the Employee are entitled to give closing statements prior to the conclusion of the Appeal Hearing. The Hearing Officer shall consider the closing statements in the following order:
      a. Department Manager
      b. Employee
      c. Department Manager's rebuttal

f) Conclusion
   The Administrative Services Director shall conclude the Appeal Hearing and notify the parties of the date and time by which the Hearing Officer shall make a final determination.

g) The Rules of Evidence are not applicable to the Appeal Hearing; the Hearing Officer may consider all evidence submitted by the parties that the Hearing Officer deems relevant and consistent with the provisions of this Chapter.

h) The standard of compliance for observation of the rules and procedures contained in this Chapter shall be substantial compliance. The failure to observe any rule or procedure contained in this Chapter shall not form the basis of or give rise to any claims, damages, demands, suits, proceedings, or causes of action of any kind or character whatsoever against the City or its employees, agents, representatives, officials, Council or board members, including, but not limited to, claims for declaratory relief, claims under the state or federal constitutions, contract, tort, or other statutory or common law claims.

i) The Hearing Officer may adopt additional rules and procedures as may be deemed necessary for the orderly conduct of the Appeal Hearing. The Hearing Officer shall have the sole discretion to implement additional rules and procedures necessary for the orderly conduct of the Appeal Hearing.

5) Determination of Hearing Officer

a) The Hearing Officer shall consider the evidence presented at the Appeal Hearing and determine the following issues:
   1. Whether reasonable grounds exist to support the allegation(s) that the Employee engaged in Prohibited Conduct; and
   2. Whether a reasonable basis exists for the Department Manager's administration of the Adverse Action.

b) The Hearing Officer shall make his/her final determination within two (2) Business Days of the conclusion of the Appeal Hearing and issue a Notice of Appeal Hearing Determination.
c) Notice of Appeal Hearing Determination
    1. The Hearing Officer's final determination shall uphold, modify, or reverse the Adverse Action.
    2. The Hearing Officer shall issue a Notice of Appeal Hearing Determination to the Employee detailing said final determination, and issue a copy of the same to the Department Manager and the Administrative Services Director.
    3. If the Hearing Officer's final determination results in a suspension of five (5) Workdays or less, the Employee shall have no right to seek administrative review of the Adverse Action by the Personnel Appeals Board and the Hearing Officer's final determination shall be final.
    4. If the Hearing Officer's final determination results in a Suspension of more than five (5) Workdays, a Demotion, or Termination, the Employee shall have the right to seek administrative review of the Adverse Action by the Personnel Appeals Board. The Notice of Appeal Hearing Determination shall contain a statement indicating that the Employee has the right to seek administrative review of the Adverse Action by the Personnel Appeals Board in accordance with the requirements and procedures of this Chapter.
    5. A final determination resulting in the Employee's Suspension, Demotion, or Termination shall be stayed upon the filing of a Notice of Appeal to the Personnel Appeals Board in accordance with the requirements and procedures of this Chapter.

l. Notice of Appeal to the Personnel Appeals Board

1) If the Hearing Officer's final determination results in a Suspension of more than five (5) Workdays, a Demotion, or Termination, the Employee may seek administrative review of the Adverse Action by the Personnel Appeals Board by filing a Notice of Appeal to the Personnel Appeals Board.
2) A Notice of Appeal to the Personnel Appeals Board must be filed within two (2) Business Days of the Employee's receipt of a Notice of Appeal Hearing Determination.
3) A Notice of Appeal to the Personnel Appeals Board shall contain the information required by Section 1.h(3).
4) A proper and timely Notice of Appeal to the Personnel Appeals Board shall be perfected upon the Administrative Services Department's receipt of the Notice of Appeal. If a Notice of Appeal to the Personnel Appeals Board does not contain the information required by Section 1.h(3), but is otherwise proper and timely, the Administrative Services Director shall notify the Employee of such defect within two (2) Business Days following the Administrative Services Department's receipt of the Notice of Appeal to the Personnel Appeals Board.
5) Upon receiving notification that a Notice of Appeal to the Personnel Appeals Board does not contain the information required by Section 1.h(3), the Employee shall correct the defect and supplement the missing information within two (2) Business Days of the Employee's receipt of the notice required by Section 1.l(4).

m. Personnel Appeals Board; Composition

1) The Personnel Appeals Board shall consist of three (3) members, to include: (i) two (2) City Council members; and one (1) resident of the City who is not employed by the City.
2) All appointments to the Personnel Appeals Board shall be made by the Mayor.
3) The Mayor shall designate a Board member to serve as Chairman of the Personnel Appeals Board.

n. Setting of Personnel Appeals Board Hearing

1) Following the perfection of a Notice of Appeal to the Personnel Appeals Board, the Administrative Services Director shall notify the Personnel Appeals Board members of said notice and the Board members shall provide the Administrative Services Director with dates and times of availability for the scheduling of the Appeal Hearing.
2) The Personnel Appeals Board hearing shall occur no later than fifteen (15) Business Days following the perfection of the Notice of Appeal to the Personnel Appeals Board.
3) Notwithstanding Section 1.n(2), the Personnel Appeals Board hearing may occur later than fifteen (15) Business Days following the perfection of the Notice of Appeal upon mutual agreement of the Department Manager and the Employee.
4) Upon final setting of the Personnel Appeals Board Hearing, the Administrative Services Director shall send the Notice of Appeals Board Hearing to the Employee, Board members, and Department Manager. Upon final setting of the Personnel Appeals Board Hearing, the Administrative Services Director shall send a Notice of Personnel Appeals Board Hearing to the Employee, the Personnel Appeals Board members, and the Department Manager. The Notice of Personnel Appeals Board Hearing shall consist of the following information:
    a) The name and position of the Employee;
    b) The name and position of the Employee's Supervisor;
    c) The date, time, and location of Personnel Appeals Board Hearing; and
    d) The reason/basis for appeal, as indicated by the Employee in the Notice of Appeal.

o. Personnel Appeals Board Hearing Procedure

1) For purposes of the Personnel Appeals Board Hearing, the Personnel Appeals Board shall observe the rules and procedures prescribed by Section 1.k unless otherwise stated herein.
2) The Personnel Appeals Board shall serve as the final arbiter of all matters appealed pursuant to Section 1.l and shall have all rights, privileges, and obligations delegated to the Hearing Officer by Section 1.k for the purpose of this Section.
3) Open Meetings Act; Compliance
    a) The Personnel Appeals Board shall observe all applicable requirements of Chapter 551 of the Texas Government Code, as amended, with respect to any Personnel Appeals Board Hearing conducted pursuant to this Chapter.
    b) A Personnel Appeals Board Hearing shall commence and conclude in open session, and all final decisions of the Personnel Appeals Board shall be voted on in open session. For the purpose of this Chapter, "open session" means the portion of the Personnel Appeals Board Hearing that is conducted in a manner that is open to the public.
    c) The Personnel Appeals Board may conduct a hearing and deliberation in a closed session.
    d) At commencement of a Personnel Appeals Board Hearing, the Employee shall notify the Personnel Appeals Board of the Employee's election to have the hearing conducted in open session.
    e) If the Employee wishes for the Personnel Appeals Board's deliberation of the evidence presented at the hearing to occur in open session, the Employee shall object to the Personnel Appeals Board recessing to closed session following the announcement that the Board will recess to closed session.
    f) Upon receiving the Employee's objection pursuant to Section 1.o(3)(e), the Personnel Appeals Board shall not recess to closed session and said deliberation shall occur in open session.
    g) Notwithstanding the Employee's objection pursuant to Section 1.o(3)(e), the Personnel Appeals Board shall have the sole and absolute discretion to include any person in a closed session whose participation necessary to the matter under consideration.

4) Closed Session; Certified Agenda or Recording
    a) The Administrative Services Director shall keep a certified agenda or make a recording of a closed session held by the Personnel Appeals Board.
    b) A certified agenda of a closed session shall include the following:
        1. A statement of deliberation subject matter;
        2. A record of any action taken; and
        3. The date and time of the beginning and end of the closed session.
5) Determination of the Personnel Appeals Board
    a) The Personnel Appeals Board shall consider the evidence presented at the Personnel Appeal Board Hearing and make a determination as set forth in Section 1.k.5(a)i.
    b) The Personnel Appeals Board shall make its final determination by majority vote in open session following its deliberation of the evidence presented at the hearing. The decision of the Personnel Appeals Board shall be the final and cumulative determination of an Adverse Action matter.
6) Notice of Personnel Appeals Board Determination
    a) The Personnel Appeals Board's final determination shall uphold, modify, or reverse the Adverse Action.
    b) The Personnel Appeals Board shall issue a Notice of Personnel Appeals Board Determination to the Employee detailing said final determination, and issue a copy of the same to the Department Manager and the Administrative Services Director.
    c) The Notice of Personnel Appeals Board Determination shall be issued within three (3) Business Days following the adjournment of the Personnel Appeals Board Hearing.

p. Litigation; Judicial Review

The Employee who has exhausted all administrative remedies and appeals pursuant to this Chapter may file suit in a Midland County state district court.

1) A suit filed pursuant to this Section shall be by verified petition specifying the grounds of illegality regarding the final administrative decision. The verified petition shall be filed no later than the thirtieth (30th) day following the date on which the Employee has exhausted all administrative remedies and appeals pursuant to this Chapter.
2) A state district court shall confine its review of an action made pursuant to this Chapter to the City's record and any evidence of procedural errors alleged to have occurred by the Employee. In performing such review, a state district court shall apply the substantial evidence standard.
3) A state district court that reviews a final determination made pursuant to this Chapter shall not award any costs or attorney fees against the City.

Section 2 Lay-Off

a. Notwithstanding any contrary provision contained in this Chapter, a Department Manager is authorized to lay-off an Employee for reasons that include, but are not limited to, the following:
    1) Change in the Employee's job duties and/or functions;
    2) Change in the organizational structure of the City's administration; and
    3) Lack of funding for the Employee's position or other budgetary constraint.
b. If a Department Manager seeks to lay-off an Employee pursuant to Section 2.a, the Department Manager shall use reasonable efforts to give said Employee at least two (2) weeks' written notice when feasible; provided, however, that no such notice shall be due for the lay-off of a temporary or part-time worker.
c. An Employee that was previously laid off pursuant to Section 2.a and had satisfactory service while employed with the City shall be eligible for rehire upon the subsequent vacancy of a position for which such former employee is eligible.

Section 3 Exit Interview

Upon the request of a Department Manager or an Employee who is due to be laid off or terminated, an exit interview between the Department Manager or his/her designee and the Employee shall occur in the Administrative Services Office.

Section 4 Name-Clearing Hearing

Upon the finalization of any Termination and an Employee's exhaustion of all appeal procedures pursuant to this Chapter, the Employee shall be entitled to a Name-Clearing Hearing before the City Manager.

a. An Employee seeking a Name-Clearing Hearing shall submit a written request for such hearing to the Administrative Services Director.
b. Upon receipt of an Employee's request for a Name-Clearing Hearing, the Administrative Services Director shall deliver said written request to the City Manager within two (2) Business Days.
c. A Name-Clearing Hearing shall occur within ten (10) Business Days of the City Manager's receipt of the Employee's written request.
d. At the Name-Clearing Hearing, an Employee may address any allegation made by the City or its employees, agents, officials, Council or board members relating to said Employee's discharge.
e. Following the Name-Clearing Hearing, the City Manager may issue an exculpatory statement deemed to be just or necessary. If the City Manager issues an exculpatory statement, he/she shall cause said statement to be mailed to the Employee's address on file with the Administrative Services Department and place a copy in the Employee's personnel file. It shall be in the City Manager's sole and absolute discretion whether to issue an exculpatory statement.

Chapter IX

Grievance Procedure

Section 1 Policy

It is the policy of the City to treat all employees fairly and equitably. Any employee who feels aggrieved in his/her employment with the City has a right to present a grievance to appropriate management officials for prompt consideration. The filing of a grievance by an employee shall not reflect unfavorably on the employee's standing, and the employee should not fear reprisal or retaliation for utilizing the procedures below. For the purposes of this Chapter, capitalized terms used herein without definition shall have the meanings assigned in Chapter VIII.

Section 2 Definitions

a. "Grievance" means a formal complaint (and any relevant supporting documentation) raised by an Employee regarding an employment matter.

b. "Immediate Supervisor" means the person charged with the daily oversight and management of the Employee claiming a grievance.

Section 3 General Provisions

a. The City shall attempt to resolve a Grievance using reasonable efforts and due diligence with regard to the procedures prescribed by this Chapter. The time limits prescribed by Section 4 may be extended by mutual written agreement between the Employee and pertinent City representative.

b. The Supervisor's or Department Manager's failure to address a written Grievance in accordance with the procedures prescribed by Section 4 shall permit the Employee to proceed to the following Step and file the written Grievance with the Department Manager or City Manager, as applicable.

c. An Employee's failure to respond to a decision within the time limits specified in Section 4 shall be deemed to be an acceptance of said decision.

d. A Grievance shall be initiated within ten (10) Business Days of: (i) the date on which the matter that is the subject of the Grievance occurred, or (ii) the date on which the matter that is the subject of the Grievance became known to the Employee.

Section 4 Procedure

a. Informal Step: The Employee may discuss a Grievance with his/her Immediate Supervisor in an effort to resolve the matter informally.

b. Step 1:
   1) The Employee may file a written Grievance with his/her Immediate Supervisor and request a conference to occur within five (5) Business Days to discuss a formal resolution of the matter.
   2) Upon receipt of a written Grievance, the Immediate Supervisor shall either: (i) schedule a conference to discuss a formal resolution of the matter in accordance with Section 4.b(1); or (ii) take action that addresses the matter described in the written Grievance to the reasonable satisfaction of the Employee.

3) Following a conference to discuss a formal resolution of a Grievance, the Immediate Supervisor shall render a written decision regarding the Grievance within ten (10) Business Days.
4) Following an action taken by the Immediate Supervisor to address the matter described in the written Grievance, the Immediate Supervisor shall issue a memorandum that details the Immediate Supervisor's action.

c. Step 2:
1) If the Employee is not satisfied with the Immediate Supervisor's decision pursuant Section 4.b, the Employee may file the written Grievance with the Department Manager and request a conference to occur within five (5) Business Days to discuss a formal resolution of the matter. The Employee shall file the written Grievance within five (5) Business Days of the Employee's receipt of the Immediate Supervisor's decision.
2) Upon receipt of a written Grievance, the Department Manager shall either: (i) schedule a conference to discuss a formal resolution of the matter in accordance with Section 4.c(1); or (ii) take action that addresses the matter described in the written Grievance to the reasonable satisfaction of the Employee.
3) Following a conference to discuss a formal resolution of a Grievance, the Department Manager shall render a written decision regarding the Grievance within ten (10) Business Days.
4) Following an action taken by the Department Manager to address the matter described in the written Grievance, the Department Manager shall issue a memorandum that details the nature of the Department Manager's action.

d. Step 3:
1) If the Employee is not satisfied with the Department Manager's decision pursuant to Section 4.c, the Employee may file the written Grievance with the City Manager (through the Administrative Services Director) and request a conference to occur within ten (10) Business Days. The Employee shall file the written Grievance within five (5) Business Days of the Employee's receipt of the Department Manager's decision. The written Grievance shall contain all complaints and relevant facts that pertain to the matter described in the written Grievance.
2) Upon receipt of a written Grievance, the City Manager or his/her designee shall either: (i) schedule a conference to discuss a formal resolution of the matter in accordance with Section 4.d(1); or (ii) take action that addresses the matter described in the written Grievance to the reasonable satisfaction of the Employee.
3) Following a conference to discuss a formal resolution of a Grievance, the City Manager or his/her designee shall render a written decision regarding the Grievance within ten (10) Business Days.
4) Following an action taken by the City Manager or his/her designee to address the matter described in the written Grievance, the City Manager or his/her designee shall issue a memorandum that details the nature of the City Manager's or his/her designee's action.
5) A decision or action taken by the City Manager or his/her designee shall be final and satisfy the City's obligations regarding the consideration of the Grievance.

Section 5 Written Decisions and Memorandums

A written decision or memorandum issued pursuant to Section 4 shall be sent to the Employee, the Department Manager, and the Immediate Supervisor, as applicable. A copy of a written decision or memorandum issued pursuant to Section 4 shall be attached to a copy of the written Grievance and kept in the Employee's personnel file in the Administrative Services office.

Chapter X

Retirement System and Other Benefits

Section 1 Texas Municipal Retirement System

All regular employees are required as a condition of their continued employment to enroll in the Texas Municipal Retirement System. Seasonal, part-time, temporary, Fire Department employees and others exempt by State law, are not eligible to enroll in the retirement system, unless otherwise provided for herein or by State law.

a. Deposits. Each member of the retirement system shall, by payroll deduction, be required to contribute a percentage not to exceed seven percent (7%) of his monthly salary. The City shall also deposit a certain percentage for the benefit of each member employee as required by law.

b. Withdrawal of Deposits. If an employee leaves the service of the City for any reason, he may withdraw the deposits he has made plus any interest earned on such deposits.

c. Retirement Benefits and Restrictions. Benefits payable upon the death or retirement of an employee and any restrictions or limitations upon participation in the retirement system shall be in accordance with the provisions of the Texas Municipal Retirement System Act, Subtitle G of Title 8, Government Code.

Section 2 Firemen's Relief and Retirement

All employees of the regular City of Midland Fire Department shall be required as a condition of employment to participate in and make contributions to the Firemen's Relief and Retirement Fund. Contributions to and participation in the Firemen's Relief and Retirement Fund shall be in accordance with the provisions of Article 6243e, V.A.T.S.

Section 3 Federal Insurance Contributions Act

a. **Old-Age, Survivors, and Disability Insurance Tax (Social Security**)
All employees, except those who contribute to and participate in the Midland Firemen's Relief and Retirement Fund and others excluded by law, shall make contributions by payroll deductions to the Old-Age, Survivors, and Disability Insurance Tax (Social Security). All employees, upon commencement of employment with the City, must possess a Social Security Card.

b. **Medicare Tax**
All employees shall make contributions by payroll deductions to the Medicare Tax except those who are excluded by law.

Chapter XI

Safety

Section 1 General

These personnel rules are subject to modification when same are required to protect the safety or health of any employee. They are also subject to modification if same are necessary to comply with any state, federal, or local safety laws and regulations.

Section 2 Accident Review Board

The City Manager appoints the members of this Board with the Safety and Risk Manager as chairman. The primary function of the Board is to review all motor vehicle accidents and personal injuries occurring on the job. The Board shall consult with the administrative body of the City as well as Department/Division Managers, supervisory personnel, and other employees concerning the removal of hazardous conditions, disciplinary actions, and other improvements of the overall safety program. The Board shall not review any accident or personal injuries where a potential or existing claim or potential or existing lawsuit is pending against the City or a City employee.

Chapter XII

Employment at Will

Section 1 Council Appointees, Other Employees and Department Managers

a. When used in this Chapter, the following capitalized terms shall have the meanings set forth below:

"Council Appointees" shall mean City Manager, City Attorney, City Secretary, Municipal Court Presiding Judge, and Municipal Court Associate Judge.

"Department Managers" shall mean Director of Administrative Services, Director of Airports, Chief Information Officer, Director of Community Services, Director of Development Services, Director of Engineering Services, Director of Finance, Fire Chief, Director of General Services, Internal Auditor, Police Chief, Director of Solid Waste Management, and Director of Utilities, and any other department manager approved by the City Council.

"Other Employees" shall mean Deputy City Manager, Assistant City Manager, and First Assistant City Attorney.

b. All Council Appointees, Other Employees, and Department Managers shall be **EMPLOYEES AT WILL** and may be terminated at any time by the City of Midland with or without cause, subject to the City's personnel policies and procedures, and the terms and conditions of any applicable employment agreement.

c. In the event of an Involuntary Separation (as defined in this Chapter), a Council Appointee shall be entitled to receive a lump sum payment equal to six (6) months of his or her annual base salary as well as any other severance or separation compensation payment(s) set forth in his or her employment agreement. An Other Employee or a Department Manager shall be entitled to receive a lump sum payment equal to six (6) months of his or her annual base salary.

Notwithstanding any contrary provision of this Chapter, the City shall have no obligation to pay the severance sum(s) set forth herein if a Council Appointee, Other Employee or Department Manager is terminated for one of the following reasons: (i) conviction of a felony; (ii) conviction of a misdemeanor involving moral turpitude (which shall mean a misdemeanor involving dishonesty, fraud or deceit); or (iii) misconduct or violation of a City policy, rule, or regulation that by its nature has an adverse effect on the City, the confidence of the public in the integrity of the City, or the relationship of the employee and other employees (a *"Policy Violation"*). The determination of whether conduct constitutes a Policy Violation shall be in the sole discretion of the City Council for Council Appointees, the City Manager for a Deputy City Manager, an Assistant City Manager, or a Department Manager, and the City Attorney for the First Assistant City Attorney.

"Involuntary Separation" as used in this Chapter shall have the following meaning:

1) Resignation of a Department Manager or Other Employee within sixty (60) days following a reduction in salary in a greater percentage than an applicable across-the-board reduction for all City employees;

2) Termination of a Department Manager, a Deputy City Manager, or an Assistant CityManager by the City Manager;

3) Termination of the First Assistant City Attorney by the City Attorney; or

4) Termination of a Council Appointee by a vote of at least four (4) City Council members ata regular City Council meeting; or

5) Termination of a Department Manager, Other Employee or Council Appointee for a reason set forth in such employee's employment agreement with the City in accordancewith the terms and conditions of such employment agreement.

d. A Council Appointee shall enter into an employment agreement to be approved by the City Council. A Deputy City Manager shall enter into an employment agreement to be approved by theCity Manager. An Assistant City Manager shall enter into an employment agreement to be approved by the City Manager. The First Assistant City Attorney shall enter into an employment agreement to be approved by the City Attorney. A Department Manager shall enter into an employment agreement to be approved by the City Manager. In the event that any conflict exists between a provision of this Chapter and a provision of any such employment agreement, then theprovision of the employment agreement shall apply and take precedence over the conflicting provision contained in this Chapter.

e. A City employee deemed to be an exempt employee under the Fair Labor Standards Act shall only be suspended for period of at least one (1) week; provided, however, that a suspension of anexempt employee in good faith for an infraction(s) of a safety rule(s) of major significance may befor a period of less than one (1) week. This subsection shall be construed, interpreted, and administered in accordance with the Fair Labor Standards Act, as amended.

Section 2 Applicability

These rules, policies and procedures shall apply to and govern all employees of the City of Midland, expect when these rules affecting firefighters and police officers are inconsistent with State legislation. Words usedin the singular shall be construed to read in the plural and words used in the masculine gender shall be construed to read in the feminine. Failure to comply with these policies may result in disciplinary action being taken against an employee. Nothing in these rules, policies and procedures, except Chapter XII, should be construed as an employment agreement, guarantee of or contract for continued benefits from oremployment by the City of Midland. Severance as defined in these rules and policies shall mean salary and all other compensation and benefits. Severance shall be paid in a lump sum upon involuntary separation. The Mayor shall have the authority to execute and approve amendments and modifications to employment agreements entered into under Chapter XII. The standard for compliance by the City with these personnel policies, rules or procedures shall be substantial compliance. A violation of or failure to follow any rule or procedure shall not form a basis for any civil or criminal action against the City or any employee or official of the City who is acting on behalf of the City except as authorized by Sections 271.151 through 271.160 of the Texas Local Government Code, as amended. The administrative remedy set out in these rules and procedures is the exclusive remedy. There shall be no appeal to or action in any court except on constitutional or statutory grounds. These personnel rules, policies and procedures shall be implemented, administered and construed to comply with applicable local, state and federal laws. That the term Other Employees or Other Employee as used in these policies shall only mean the Deputy City Manager, Assistant City Manager and First Assistant City Attorney. That Chapter XII and its related definitions, and its related essential terms and benefits are a contract for providing services as authorized by Sections 271.151 through 271.160 of the Texas Local Government Code, as amended. The testing of employees conducted in conjunction with the administration and enforcement of the City's drug and alcohol testing policy shall be conducted in accordance with the United States Constitution, the Texas Constitution, federal and state laws, and regulations and judicial precedent. Except as outlined in Chapter XII, an

employee's at-will employment status is not modified by these policies and the Midland City Council reserves the right to amend these personnel policies in accordance with applicable statutes. As used in these rules and policies, Council Appointees shall mean the City Manager, City Attorney, City Secretary, the Presiding Municipal Court Judge and the Associate Municipal Court Judge. It is not required that employee sign these rules, policies and procedures, or any other document, in order to be bound by said rules, policies and procedures. Each employee shall be bound by these rules, policies and procedures by accepting employment with the City of Midland and performance of his or her job duties.

City Council Meeting

Item Number: 9

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Justine Ruff, Director

Subject: **Motion approving the plans and specifications for the MAF Northwest Basin Wildlife Improvements Project, said plans and specifications being on file in the City Secretary's office referenced by the number and date of this motion, and authorizing the Interim City Manager or the Interim City Manager's designee to advertise for competitive bids for said project pursuant to the statutes of the State of Texas for accomplishing the work set forth in said plans and specifications (DISTRICT 4) (AIRPORTS)**

Purpose:

Motion approving the plans and specifications for the MAF Northwest Basin Wildlife Improvements Project, said plans and specifications being on file in the City Secretary's office referenced by the number and date of this motion, and to authorize the Interim City Manager or the Interim City Manager's designee to advertise for competitive bids for said project pursuant to the statues of the State of Texas for accomplishing the work set forth in said plans and specifications.

Recommended City Council Action:

Approve

Fiscal Impact:

To Be Determined

Discussion:

In Amendment #9 to the Airport's 2016 Agreement with Parkhill, Smith & Cooper, the MAF Northwest Basin Wildlife Improvements Project (700243) was added to the agreement. This project addresses the existing storm drainage basin located on the northwest side of the Airport.

In the last few years there has been a lot of vegetation growth in the basin that has attracted wildlife and made mowing/maintenance impossible. As a result of this, the Airport staff has not been able to mow the vegetation to the height recommended in the Wildlife Hazard Management Plan. This project will grade and shape the basin to allow the ability to mow vegetation growth that occurs. An access ramp to the bottom of the basin will be constructed that will allow equipment to access the area for mowing or grading. The size of the basin will not be increased other than to provide side slopes that can be maintained and the vegetation growth controlled. This project will be included in FAA Grant #70 and the grant will cover 90% of the expenses of construction of the project. The project is being bid at this time as the FAA has requested that we have “bids in hand” when the Grant is funded.

ADVERTISEMENT FOR BIDS
NOTICE TO BIDDERS

Sealed proposals addressed to the City Secretary will be received at the office of the City Secretary, City Hall, Midland, Texas until 3:00 p.m., Wednesday, August 9, 2023, for furnishing all necessary materials, machinery, equipment, superintendence, and labor for constructing certain improvements at Midland International Air & Space Port (MAF), Midland, Texas. These improvements are contained in Plans and Specifications entitled, "Midland International Air & Space Port, Northwest Basin Wildlife Improvements," dated June 2023.

Immediately following the closing time for receipt of Bids/Proposals will be publicly opened and read aloud. Any Bid received after closing time will be returned unopened.

Principal items of Work are set forth in specific detail in the Proposal Section of these Specifications; however, Work items may be generally described as regrading of an existing basin to designed slopes, construction of new drainage flumes, and new concrete access to basin floor.

Work will also include other miscellaneous materials, equipment, machinery, superintendence, and labor for constructing these improvements for MAF, Midland, Texas.

A Bid Proposal guaranty is to accompany the Bid, thereby guaranteeing the good faith of the Bidder and that Bidder will enter the written contract. The guaranty is to amount to 5 percent of the total bid and must be in the form of cash or certified check, issued by a bank satisfactory to the City of Midland, or a bid bond.

Bidders are expected to inspect site of work and inform themselves regarding all local conditions.

In all areas of employment, women will be afforded equal opportunity for employment. Employment of women shall not diminish the standards or requirements for employment of minorities.

This project is subject to Minority Business Enterprise Contract Provisions, Foreign Trade Restrictions, Federal Debarment and Suspension, Drug-free Workplace, and other requirements stated in the Instructions to Bidders and other sections of project specifications and contract documents.

Policy. It is the policy of the Department of Transportation (DOT) that disadvantaged business enterprises as defined in 49 CFR Part 26 shall have maximum opportunity to participate in performance of contracts financed in whole or in part with Federal funds.

Buy American Provision. Proposed contract is subject to the Buy American Provision under Section 9129 of the Aviation Safety and Capacity Expansion Act of 1990. Details of such requirement are contained in Specifications.

MAF treats Bidder/Offer compliance with good faith effort requirements as a matter of responsiveness.

Requirements of 49 CFR Part 26, Regulations of the U.S. Department of Transportation, apply to this Contract. It is the policy of MAF to practice nondiscrimination based on race, color, sex, or national origin in award or performance of this contract. All firms qualifying under this solicitation are encouraged to submit Bids/Proposals. Award of this Contract will be conditioned upon satisfying requirements of this bid Specification. These requirements apply to all Bidders/Offerors, including those who qualify as a DBE. DBE contract goal of 9.8 percent has been established for this Contract. Bidder/Offeror shall make good

faith efforts, as defined in Appendix A, 49 CFR Part 26, to meet contract goal for DBE participation in performance of this contract.

Successful Bidder/Offeror will be required to submit the following information:

(1) names and addresses of DBE firms that will participate in Contract;
(2) description of work each DBE firm will perform;
(3) dollar amount of participation of each DBE firm participating;
(4) written documentation of Bidder/Offeror commitment to use a DBE subcontractor whose participation submits to meet contract goal;
(5) written confirmation from DBE of participation in Contract as provided in commitment made under (4); and
(6) if contract goal is not met, evidence of good faith efforts.

Successful Bidder or Offeror must provide written confirmation of participation from each DBE firm the Bidder/Offeror lists in their commitment. Bidder/Offeror must submit DBE written confirmation of participation within five days of receiving Owner notice to successful Bidder.

Information for Bidders, Proposal forms, Specifications, and Plans are on file in the office of the Director of Airports, MAF.

Downloaded documents (PDF file extension format) can be obtained from the PSC Info Exchange website after registering as a plan holder with Parkhill via https://parkhill.com/projects-for-bid/ or by contacting Debbie German, Project Assistant, at dagerman@parkhill.com. No cost or deposit required for downloaded documents.

CITY OF MIDLAND, TEXAS
Marcia Bentley-German, City Secretary

INSTRUCTIONS TO BIDDERS

IB-1. BID FORMS

Bid shall be submitted on Proposal form in the bound Specifications.

In addition to the completed Proposals, bid forms shall include Bid Security, Financial Statement, and other specified documents. Failure to submit a complete Bid as specified will be considered as sufficient cause for rejection of the Bid.

IB-2. PREPARATION OF PROPOSALS

All blanks in the forms shall be filled in or marked "N.A." (Not Applicable) and all required information shall be included with Proposals. Bid prices shall be written in ink. Receipt of all addenda issued shall be acknowledged in the space provided on the addendum. Each addendum received and the Bid Security shall be enclosed with Proposal. Proposal and accompanying documents shall be enclosed in a sealed envelope, addressed to the City Secretary, 300 N. Loraine, Midland, Texas 79701, marked "MAF Northwest Basin Wildlife Improvements" with name and address of Bidder also shown thereon. **If Sealed Bid is sent in a mailing envelope, outside of mailing envelope must also have same marking visible.**

IB-3. EXPERIENCE RECORD AND FINANCIAL STATEMENT

Experience Record included herein, shall be filled in, showing completed jobs, of a similar nature to the one covered by Proposal, and work in progress with contract and bond amounts and percent complete.

A sworn statement of the current financial condition of Bidder shall also be enclosed with Proposal, to provide Owner with information relative to the responsibility of bidders and their ability to finance and construct the work. This statement shall be enclosed with Proposal in a separate envelope and will be returned to Bidder upon return of his bid security.

TxDOT prequalification can be submitted in lieu of a financial statement with bids; however, financial information may be required of the apparent low Bidder.

IB-4. BID SECURITY

Each proposal must be accompanied by a Bid Bond, Certified Check, or cash in the amount of not less than 5 percent of the maximum bid submitted, payable without recourse to the City of Midland, Texas. If a Bid Bond is submitted as bid security, it shall be executed by an approved surety company authorized to do business in the State of Texas and accepted according to the latest list of companies holding certificates of authority from the Secretary of the Treasury of the United States of America. Such bid security shall be so conditioned if Bidder is awarded Contract and unable or fails to furnish performance and payment bonds and execute Contract within 10 days after date of award, security shall revert to Owner as compensation for damages which Owner suffers because of such failure by Bidder.

IB-5. PERFORMANCE AND PAYMENT BONDS

With execution and delivery of the contract documents, Contractor shall furnish, on the forms provided herein, bonds, as required by the General Conditions, of 100 percent of the total contract price, executed by an approved surety company authorized to do business in the State of Texas, and accepted according to the latest list of companies holding certificates of authority from the Secretary of the Treasury of the United States of America. Performance and Payment Bonds submitted shall be in compliance with Chapter 2253 of the Texas Government Code.

IB-6. INTERPRETATION OF BIDS

No bid will be considered which fails to supply all information indicated, or which has any limitation or provisions placed upon it by Bidder. In case of a difference between the written words and the figures in Proposal, amount stated in written words will be considered as bid price, without recourse on the part of Contractor. In case of ambiguity or lack of clearness in Proposal, Owner will adopt the most advantageous construction thereof or reject the bid. Owner reserves the right to accept or reject any or all bids, if it is deemed to be in the best interest of the public. Further, Owner reserves the right to reject any bids because of irregularity or to waive such irregularity if such action is in the public interest.

IB-7. DISPOSITION OF BIDS

Owner expects to make award of the contracts as soon as possible after the opening of bids, but specifically reserves the right to hold all Proposals for a period not to exceed 90 days, before making an award. No Proposal, having been opened, may be withdrawn prior to expiration of this 90-day period. Bid security of all but the successful Bidder will be returned upon making an award.

Contract will be awarded to the responsible bidder submitting the lowest bid complying with the conditions of the Advertisement for Bidders and the Instructions to Bidders.

IB-8. EXAMINATION OF SITE, PLANS, AND SPECIFICATIONS

Before submitting Proposal, each Bidder shall have made a thorough examination of the site of work and of the plans and specifications, and shall become informed as to the location and nature of the proposed construction, labor conditions and all other matters that may affect the cost and time of completion of the work upon which he bids. Bidders shall make such investigations of the nature of the project as deemed necessary and shall assume all responsibility for fully informing themselves of the character of materials which will be encountered. Submission of a Proposal shall be prima facie evidence that Bidder has made such an examination. Contact Chris Welch, Airport Facilities Manager (432.560.2200), to schedule a site examination visit.

IB-9. PREBID CONFERENCE

A prebid conference will be held at 1:30 p.m., Tuesday, July 25, 2023, in the Conference Room at Midland International Air & Space Port (MAF). At this time, all interested bidders will be requested to appear and present any questions they may have pertaining to this project. All bidders are urged to attend prebid conference because they will be charged with notice of the matters discussed therein. Attendance to the prebid conference is NOT mandatory.

IB-10. INTERPRETATION OF SPECIFICATIONS PRIOR TO BIDDING

Any questions arising during the advertising period as to the meaning or intent of the specifications will be answered by an addendum which will be sent to all who have placed a deposit and/or furnished plans and Contract documents issued by Parkhill. Engineer shall receive requests for clarifications to specifications and plans at least three days prior to the date for receipt of bids.

Receipt of each addendum shall be acknowledged by Bidder in the space provided and each addendum shall be enclosed with Proposal when it is submitted. All addenda shall become a part of these contract documents.

IB-11. AVAILABILITY OF PLANS

A. For Bidders

All parties with an interest in the type of work included in the project covered by these documents, shall be given a reasonable opportunity to examine the documents and prepare a bid or sub-bid. Documents may be examined without charge as noted in the Notice to Bidders.

Downloadable documents (PDF file extension format) can be obtained from the PSC Info Exchange website after registering as a plan holder with Parkhill via https://parkhill.com/projects-for-bid/ or through Debbie German, Project Assistant, at dagerman@parkhillcom. No cost or deposit required for downloaded documents.

B. For Contractor

Contractor will be furnished five sets of specifications and plans for his use during construction. This shall include all plans and specifications furnished to material suppliers and subcontractors but does not include the executed contract copies. Plans and specifications for use during construction will be furnished directly only to Contractor. Contractor shall then distribute copies of plans and specifications to suppliers, subcontractors, or others, as required for proper execution of the work.

Should additional sets of documents be desired, they may be purchased, by Contractor only, at the following prices, exclusive of postage or freight charges:

Plans and Specifications are $150.00 per set.

IB-12. SPECIAL PROVISIONS

Attention of Bidders is directed to SPECIAL PROVISIONS included in these documents for requirements concerning scope of work, labor, insurance, and similar subjects.

IB-13. PLANT LOCATION AND STORAGE AREA

Contractors bidding on the work included in this contract who desire to locate a material storage area or other similar facility on the airport property may secure such site, buildings, or areas by direct negotiation with the Director of Airports, MAF, Midland, Texas. An area located adjacent to the Project area will be identified as available for use by Contractor for staging and material storage.

IB-14. WITHDRAWAL OF PROPOSALS

Any Bidder, upon his or his authorized representative's written request, will be given permission to withdraw his Proposal not later than the time set for opening thereof. At the time of opening of Proposals, when such Proposal is reached, it will be returned to him unread.

IB-15. DISQUALIFICATION OF BIDDERS

Any one or more of the following causes may be considered as sufficient for the disqualification of bidder and the rejection of his bid or bids:

More than one Proposal for the same work from an individual firm, partnership, or corporation under the same or different name.

Evidence of collusion among bidders. Participants in such collusion may not receive recognition as Bidders for any future work.

Unbalanced Proposals in which the prices for some items are out of proportion to the prices for other items.

Failure to submit a unit price for each item of work for which a bid price is required by Proposal.

Lack of competency as revealed by the financial statement submitted.

Lack of responsibility as shown by past work judged from workmanship and progress standpoints.

Uncompleted work which, in the judgment of Owner, might hinder or prevent the prompt completion of additional work if awarded.

For being in arrears on existing contracts, in litigation with Owner, or having defaulted on a previous contract.

IB-16. MATERIAL GUARANTY

Before any contract is awarded, Bidder may be required to furnish a complete statement of origin, composition, or manufacture of any or all materials proposed to be used in the construction of the work, together with samples, which may be subjected to the tests provided for in these specifications to determine their quality and fitness for the work.

IB-17. DISADVANTAGED BUSINESS ENTERPRISE CONTRACT PROVISIONS

It is the policy of the Department of Transportation (DOT) that disadvantaged business enterprises as defined in 49 CFR Part 26 shall have the maximum opportunity to participate in the performance of contracts financed in whole or in part with Federal funds under this agreement. Consequently, Bidder will be required to conform to the DBE requirements of 49 CFR Part 26.

IB-18. WAIVER

BY SUBMITTING A BID, EACH BIDDER AGREES TO AND DOES HEREBY WAIVE ANY CLAIM BIDDER HAS OR MAY HAVE AGAINST THE CITY OF MIDLAND, TEXAS, AND CITY EMPLOYEES, AGENTS, AND OFFICERS ARISING OUT OF OR IN ANY WAY CONNECTED WITH THE FOLLOWING:

1. ADMINISTRATION, EVALUATION, OR RECOMMENDATION OF ANY BID;
2. WAIVER OR DELETION OF ANY REQUIREMENT UNDER BID DOCUMENTS OR CONTRACT DOCUMENTS;
3. ACCEPTANCE OR REJECTION OF ANY BIDS; AND
4. AWARD OF CONTRACT.

BY SUBMITTING A BID, BIDDER ACKNOWLEDGES AN UNDERSTANDING OF ALL BIDDING DOCUMENT TERMS AND CONSENTS TO BIDDING PROCESS AND THE POSSIBILITY OF A NEGATIVE ASSESSMENT. BY SUBMITTING A BID, BIDDER ACKNOWLEDGES AND AGREES THAT THERE WAS/IS NO DISPARITY OF BARGAINING POWER BETWEEN BIDDER AND THE CITY OF MIDLAND, TEXAS.

BIDDER AGREES THIS IS THE INTENTIONAL RELINQUISHMENT OF THE LISTED PRESENTLY EXISTING KNOWN RIGHTS.

IB-19. WAIVER OF ATTORNEY FEES

BY EXECUTING THIS CONTRACT, CONTRACTOR AGREES TO WAIVE AND DOES HEREBY KNOWINGLY, CONCLUSIVELY, VOLUNTARILY AND INTENTIONALLY WAIVE ANY CLAIM IT HAS/MAY HAVE IN THE FUTURE AGAINST OWNER, REGARDING AWARD OF ATTORNEY FEES, WHICH ARE IN ANY WAY RELATED TO CONTRACT, OR CONSTRUCTION, INTERPRETATION OR BREACH OF CONTRACT. CONTRACTOR SPECIFICALLY AGREES IF CONTRACTOR BRINGS/COMMENCES ANY LEGAL ACTION OR PROCEEDING RELATED TO THIS CONTRACT, CONSTRUCTION, INTERPRETATION, VALIDITY, OR BREACH OF CONTRACT, INCLUDING BUT NOT LIMITED TO ANY ACTION PURSUANT TO PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE SECTION 37.001, ET. SEQ., AS AMENDED), OR CHAPTER 271 OF THE TEXAS LOCAL GOVERNMENT CODE, CONTRACTOR AGREES TO ABANDON, WAIVE, AND RELINQUISH ANY AND ALL RIGHTS TO RECOVERY OF ATTORNEY FEES TO WHICH CONTRACTOR MIGHT OTHERWISE BE ENTITLED.

CONTRACTOR AGREES THIS IS VOLUNTARY AND INTENTIONAL RELINQUISHMENT AND ABANDONMENT OF A PRESENTLY EXISTING KNOWN RIGHT. CONTRACTOR ACKNOWLEDGES AN UNDERSTANDING OF ALL TERMS AND CONDITIONS OF CONTRACT. CONTRACTOR FURTHER ACKNOWLEDGES AND AGREES THAT WAS/IS NO DISPARITY OF BARGAINING POWER BETWEEN OWNER AND CONTRACTOR.

THIS SECTION SHALL NOT BE CONSTRUED OR INTERPRETED AS A WAIVER OF SOVEREIGN IMMUNITY.

CONTRACTOR AND OWNER ARE RELYING ON THEIR OWN JUDGMENT. EACH PARTY HAD THE OPPORTUNITY TO DISCUSS THIS CONTRACT WITH COMPETENT LEGAL COUNSEL PRIOR TO ITS EXECUTION.

BID BOND

THE STATE OF TEXAS)

SURETY'S NO._____

COUNTY OF MIDLAND)

KNOWN ALL MEN BY THESE PRESENTS, THAT_____

_____(hereinafter called "Principal"), as Principal, and_____

_____ (hereinafter called "Surety"), as Surety, are held and firmly bound unto the City of Midland, a home rule municipal corporation of Midland County (hereinafter called "Obligee"), in the amount of_____

_____DOLLARS ($____), for payment whereof said Principal and Surety bind themselves and their heirs, administrators, executors, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, Principal submitted a Bid or Proposal to enter a certain written contract with Obligee to perform all work associated with the Northwest Basin Wildlife Improvements project.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS SUCH, if said Principal shall faithfully, enter such written Contract, then this obligation shall be void; otherwise to remain in full force and effect.

IT IS EXPRESSLY UNDERSTOOD AND AGREED if said Principal should withdraw its Bid any time after such Bid is opened and before official rejection of such Bid or, if successful in securing the award thereof, said Principal should fail to enter into the Contract and furnish satisfactory Performance Bond and Payment Bond, Obligee, in either of such events, shall be entitled and hereby given the right to collect this Bid Bond as liquidated damages.

PROVIDED further if any legal action be filed upon this Bond venue shall lie in Midland County, Texas.

IN WITNESS WHEREOF, the said Principal and Surety do sign and seal this instrument, this day of _____, 20___.

TOTAL BID	

Bidder is required to separate cost of materials to be incorporated into this Project. Such material costs are separated from other costs, so Bidder is a seller of such materials to the City. Bidder shall be required to issue a resale certificate on such materials in lieu of paying sales tax on such materials at time of purchase. The City will provide successful Bidder with a sales tax exemption certificate for such materials. Labor and materials charge shall be separated as follows:

BID

MATERIALS $_____

LABOR $_____

TOTAL BID **$_____**

Undersigned Bidder hereby confirms he has visited the Site of the Work and has carefully examined Plans, Specifications, and Contract Documents pertaining to Work covered by this Bid, and prices bid herein are based on minimum wage rates included in Specifications.

Bidder certifies, by submission of this Proposal or acceptance of this Contract, neither Bidder nor Bidder's principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntary excluded from participation in this transaction by any Federal department or agency. Bidder further agrees by submitting this Proposal, Bidder will include this clause without modification in all lower tier transactions, solicitations, proposals, contracts, and subcontracts. Where Bidder or any lower tier participant is unable to certify to this statement, it shall attach an explanation to this proposal.

Contractor or subcontractor, by submission of offer/execution of a contract, certifies it:

a. is not owned or controlled by one or more citizens or nationals of a foreign country included in the list of countries that discriminate against U.S. firms published by the Office of the United States Trade Representative (USTR);
b. has not knowingly entered into any contract or subcontract for this Project with a contractor that is a citizen or national of a foreign country on said list, or is owned or controlled directly or indirectly by one or more citizens or nationals of a foreign country on said list.
c. has not procured any product nor subcontracted for the supply of any product for use on the Project that is produced in a foreign country on said list.

Unless restrictions of this clause are waived by the Secretary of Transportation in accordance with 49 CFR 30.17, no contract shall be awarded to Contractor or subcontractor who is unable

to certify to the above. If Contractor knowingly procures or subcontracts for supply of any product or service of a foreign country on said list for use on Project, the Federal Aviation Administration may direct, through the sponsor, cancellation of Contract at no cost to the Government.

Further, Contractor agrees if awarded a contract resulting from this solicitation, it will incorporate this provision for certification without modification in each contract and in all lower tier subcontracts. Contractor may rely upon the certification of a prospective subcontractor unless it has knowledge that the certification is erroneous.

Contractor shall provide immediate written notice to sponsor if Contractor learns its certification or that of a subcontractor was erroneous when submitted or has become erroneous by reason of changed circumstances. Subcontractor agrees to provide immediate written notice to Contractor, if at any time it learns that its certification was erroneous by reason of changed circumstances.

This certification is a material representation of fact upon which reliance was placed when making the award. If later determined Contractor or subcontractor knowingly rendered an erroneous certification, the Federal Aviation Administration may direct, through the sponsor, cancellation of contract or subcontract for default at no cost to the Government.

Nothing contained in the foregoing shall be construed to require establishment of a system of records to render, in good faith, certification required by this provision. Knowledge and information of a contractor is not required to exceed that normally possessed by a prudent person in the ordinary course of business dealings.

This certification concerns a matter within the jurisdiction of an agency of the United States of America and making of a false, fictitious, or fraudulent certification may render maker subject to prosecution under Title 18, United States Code, Section 1001.

Bidder hereby agrees to commence work under this Contract within 10 days of a date specified in written "Notice to Proceed" and to complete work within the consecutive calendar day framework noted in Contract. Bidder further agrees to pay as liquidated damages, the sum of $ 1,000.00 for each consecutive calendar day beyond each phase of days allowed as hereinafter provided in Article 32 of the General Conditions.

Bidder acknowledges receipt of the following addendum:_____

Enclosed with this Proposal is a Cashier's or Certified Check for_____

_____ Dollars ($_____)

or, a Proposal Bond in the sum of 5 percent of Greatest Amount Bid Dollars ($ 5 percent of Greatest Bid), which it is agreed shall be collected and retained by Owner as liquidated damages in the event the Proposal is accepted by the Owner within 90 days after date advertised for the reception of bids and undersigned fails to execute Contract or required bonds with Owner, under conditions hereof, within 10 days after date said proposal is accepted; otherwise, said check or bond shall be returned to undersigned upon demand.

CONTRACT

STATE OF TEXAS

COUNTY OF MIDLAND

THIS CONTRACT, made and entered into this ___ day of _____, by and between the **CITY OF MIDLAND, TEXAS**, a home rule municipal corporation ("***Owner***"), and _____, ("***Contractor***").

WITNESSETH: That for and in consideration of the payments and agreements hereinafter mentioned, to be made and performed by Owner, and under the conditions expressed in the bond bearing even date herewith, Contractor hereby agrees to commence and complete the construction of items of work included in this project, which are described as regrading of an existing basin to designed slopes, construction of new drainage flumes, and new concrete access to basin floor.

Work will also include other miscellaneous materials, equipment, machinery, superintendence, and labor for constructing these improvements for the Midland International Air & Space Port.

These improvements are shown on the plans and Specifications entitled "Northwest Basin Wildlife Improvements" dated June 2023. The Plans and Specifications are hereby incorporated herein by reference for all legal purposes and shall apply to this Contract as if fully set forth herein.

This Contract shall include all extra work in connection therewith. All work performed hereunder shall be in accordance with those certain General Conditions and Special Provisions, which are attached hereto and hereby incorporated herein by referenced for all legal purposes and shall apply to this Contract as if fully set forth herein. Contractor shall, at Contractor's own proper cost and expense, furnish all materials, supplies, machinery, equipment, tools, superintendence, labor, insurance, and other accessories and services necessary to complete said construction, in accordance with conditions and prices stated in Proposal attached hereto, and in accordance with all General Conditions and Special Provisions, and in accordance with plans, which includes all maps, plats, blueprints, and other drawings and printed or written explanatory matter thereof, and Specifications therefor, as prepared by Parkhill ("***Engineer***"), each of which has been identified by endorsement of Contractor and Engineer thereon, together with Contractor's written Proposal, and General Conditions and Special Provisions, and Performance Bond and Payment Bond hereto attached; all of which are made a part hereof and collectively evidence and constitute the entire agreement between the parties hereof.

Contractor hereby agrees to commence work under this Contract within 10 days of a date to be specified in written "Notice to Proceed" and to complete work under Base Bid identified on plans within 90 calendar days from Notice to Proceed.

Contractor further agrees to pay as liquidated damages the sum of one thousand dollars ($1,000) for each consecutive calendar day beyond days allowed as hereinafter provided in Article 32 of the General Conditions.

Owner agrees to pay Contractor from current funds for performance of this Contract in accordance with Proposal submitted therefor, subject to additions and deductions, as provided in specifications, and to make payments on account thereof as provided therein.

BY EXECUTING THIS CONTRACT, CONTRACTOR AGREES TO WAIVE AND DOES HEREBY WAIVE ANY CLAIM CONTRACTOR HAS OR MAY HAVE AGAINST THE CITY OF MIDLAND, TEXAS, AND PARKHILL, REGARDING AWARD OF ATTORNEY FEES, WHICH ARE IN ANY WAY RELATED TO CONTRACT, OR CONSTRUCTION, INTERPRETATION OR BREACH OF CONTRACT. CONTRACTOR SPECIFICALLY AGREES IF CONTRACTOR BRINGS OR COMMENCES ANY LEGAL ACTION OR PROCEEDING RELATED TO THIS CONTRACT, CONSTRUCTION, INTERPRETATION, VALIDITY, OR BREACH OF THIS CONTRACT, INCLUDING BUT NOT LIMITED TO ANY ACTION PURSUANT TO PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE SECTION 37.001, *ET SEQ*., AS AMENDED), CONTRACTOR AGREES TO WAIVE AND RELINQUISH ANY AND ALL RIGHTS TO RECOVERY OF ATTORNEY FEES TO WHICH CONTRACTOR MIGHT OTHERWISE BE ENTITLED.

CONTRACTOR AGREES THIS IS INTENTIONAL RELINQUISHMENT OF A PRESENTLY EXISTING KNOWN RIGHT. CONTRACTOR ACKNOWLEDGES THAT CONTRACTOR UNDERSTANDS ALL TERMS AND CONDITIONS OF THIS CONTRACT.

By execution of this Contract, Contractor hereby represents and warrants to the City of Midland, Texas, that Contractor has read and understood the Contract.

This Contract shall be governed by laws of the State of Texas. Venue of any suit, right or cause of action arising under or in connection with this contract shall lie exclusively in Midland County, Texas. All payments and performance under or connected to this contract shall be deemed to have occurred exclusively in Midland County, Texas.

IN WITNESS WHEREOF, the parties to these presents have executed this Agreement in the year and day first above written.

CONTRACT ASSURANCE

Contractor will ensure the following clause is placed in every DOT-assisted contract and subcontract:

Contractor or subcontractor shall not discriminate based on race, color, national origin, or sex in performance of this Contract. Contractor shall carry out applicable requirements of 49 CFR Part 26 in award and administration of DOT-assisted contracts. Failure by Contractor to carry out requirements is a material breach of this Contract which may result in termination of this Contract or such other remedy as recipient deems appropriate. This may include, but is not limited to:

1. Withholding monthly progress payments;
2. Assessing sanctions;
3. Liquidated damages; and/or
4. Disqualifying Contractor from future bidding as non-responsible.

PROMPT PAYMENT

Prime Contractor agrees to pay each subcontractor under this Prime Contract for satisfactory performance of contract no later than 30 working days from receipt of each payment Prime Contractor receives from the City of Midland. Prime Contractor agrees further to return retainage payments to each subcontractor within 30 working days after subcontractor's work is satisfactorily completed. Any delay or postponement of payment from above referenced time frame may occur only for good cause following written approval of the City of Midland. The clause applies to both DBE and non-DBE subcontractors.

For purposes of this section, a subcontractor's work is satisfactorily completed when all tasks called for in subcontract have been accomplished and documented as required by the City of Midland. When the City of Midland makes an incremental acceptance of a portion of a prime contract, work of a subcontractor covered by that acceptance is deemed satisfactorily completed.

Contractor will not be reimbursed for work performed by subcontractors unless and until Contractor ensures subcontractors are promptly paid for work they have performed.

Contractor failure to comply with requirements of DBE Plan shall constitute a material breach of this Contract. In such a case, the City of Midland reserves the right to terminate Contract; to deduct amount of DBE goal not accomplished by DBE from money due or to become due Contractor, not as a penalty but as liquidated damages to the City of Midland or such other remedy/remedies as the City of Midland deems appropriate.

CITY OF MIDLAND DEPARTMENT OF AIRPORTS
DBE POLICY STATEMENT

Section 26.1, 26.23 Objectives/Policy Statement

The City of Midland, Owner and Operator of Midland International Air & Space Port, herein referred to as MAF, established a Disadvantaged Business Enterprise (DBE) program in accordance with regulations of the U.S. Department of Transportation (DOT), 49 CFR Part 26. MAF received Federal financial assistance from the Department of Transportation and as a condition of receiving this assistance, MAF signed an assurance to comply with 49 CFR Part 26.

It is the MAF policy to ensure DBEs, as defined in Part 26, have an equal opportunity to receive and participate in DOT-assisted contracts. It is also our policy to:

1. ensure nondiscrimination in award and administration of DOT-assisted contracts;
2. create a level playing field on which DBEs can compete fairly for DOT-assisted contracts;
3. ensure DBE Program is narrowly tailored in accordance with applicable law;
4. ensure only firms who fully meet 49 CFR Part 26 eligibility standards are permitted to participate as DBEs;
5. help remove barriers to participation of DBEs in DOT-assisted contracts; and
6. assist development of firms that can successfully compete in the marketplace outside the DBE program.

An MAF staff person has been delegated as the DBE Liaison Officer. In that capacity, appointed staff is responsible for implementing all DBE program aspects. Implementation of the DBE program is accorded the same priority as compliance with all other legal obligations incurred by MAF in financial assistance agreements with the Department of Transportation.

MAF disseminated this policy statement to the City Council of the City of Midland, Texas and all components of the organization. We distributed this statement to DBE and non-DBE business communities who perform work for us on DOT-assisted contracts. This is accomplished via inclusion in all our Bid Documents.

Justine Ruff, Director of Airports

Section 26.37Monitoring Responsibilities

MONITORING PAYMENTS TO DBEs AND NON-DBEs

MAF undertakes ongoing monitoring of prime payments to subcontractors over the course of any covered contract. Such monitoring activities will be accomplished as follows:

1. Prime Contractors must submit monthly proof of prompt payment to Airport.
2. DBELO will monitor prompt payment to subcontractors via review of cancelled checks and/or accounts payable ledgers submitted with monthly reports.
3. DBELO will verify checks payable to subcontractors are dated within prompt payment period.
4. DBELO may also contact DBE subcontractors by phone/email to confirm receipt of payment within prompt payment period.

Airport requires prime contractors to maintain records/documents of payment to subcontractors, including DBEs, for a minimum of three years unless otherwise provided by applicable record retention requirements for Airport financial assistance agreement, whichever is longer. These records will be made available for inspection upon request by any authorized representative of the MAF or DOT. This reporting requirement extends to all DBE and non-DBE subcontractors.

INFORMATION TO BE SUBMITTED (26.53(B)):

MAF treats Bidder/Offeror compliance with good faith effort requirements as a matter of responsiveness.

Requirements of 49 CFR Part 26, Regulations of the U.S. Department of Transportation, apply to this Contract. It is MAF policy to practice nondiscrimination based on race, color, sex, or national origin in award or performance of this Contract. All firms qualifying under this solicitation are encouraged to submit Bids/Proposals. Award of this Contract will be conditioned upon satisfying Bid Specification requirements applying to all Bidders/Offerors, including those who qualify as a DBE. A DBE Contract goal of 9.8 percent has been established for this Contract. Bidder/Offeror shall make good faith efforts, as defined in Appendix A, 49 CFR Part 26, to meet the Contract goal for DBE participation in performance of this Contract.

Types of actions to support good faith efforts at meeting Contract goal for DBE participation (not intended as an all-inclusive list and other methods by Bidder may be relevant in documenting good faith effort:

1. Have DBE subcontractors attend Prebid Meeting
2. Documentation of notices sent to potential DBE subcontractors requesting interest in bidding.
3. Documentation of emails sent to potential DBE subcontractors requesting interest in bidding.
4. Documentation (dates and times) of phone calls made to potential DBE subcontractors informing them of the Project and soliciting an interest in bidding. This should include follow-up calls to support aggressively attempting to obtain DBE participation.

Good faith effort documentation must be included with Proposal submitted.

TO INCLUDE WITH PROPOSAL:

Bidder/Offeror shall include with their proposal:

1. Form 1: Disadvantaged Business Enterprise (DBE) Utilization, (signed by Bidder/Offeror);
2. Form 2: Letter of Intent (for each DBE firm). Note: *DBE firm signature not required at time of proposal submission*; and
3. Completed Bidder Information Sheet.

UPON AWARD OF CONTRACT:

Successful Bidder/Offeror will be required to submit the following information within 5 days of Bid Opening:

(1) names and addresses of DBE firms who will participate in the Contract;
(2) description of work each DBE firm will perform;
(3) dollar amount of participation for each DBE firm participating;
(4) written documentation of Bidder/Offeror commitment to use a DBE subcontractor whose participation meets Contract goal;
(5) written confirmation from DBE of Contract participation as provided in commitment made under (4); and
(6) upon unmet Contract goal, evidence of good faith efforts. Successful Bidder/Offeror must submit DBE written confirmation of participation within five days after Bid Opening.

Midland International Air & Space Port

To all Bidders for AIP funded projects for Midland International Air & Space Port:

Any company desiring to submit a bid on an AIP grant project for the Midland International Air & Space Port, must complete a Bidder Information Sheet that includes:

- Name of Firm
- Address of Firm
- Age of Firm
- Whether firm is a certified disadvantaged business enterprise
- Amount of annual gross receipts

Before contract is awarded, companies must also submit Demonstration of Good Faith Efforts Form 1: DBE Utilization, and Form 2: Letter of Intent for each DBE subcontractor. If DBE goal percentage is met, complete one Form 1 and a separate Form 2 for each DBE subcontractor. If not met, complete Form 1, and submit documentation of Good Faith Efforts (see 49 CFR Part 26, Appendix A) to support percentage accomplished.

Upon Airport acceptance of bid, the following information must be submitted to Midland International Air & Space Port's Disadvantage Business Enterprises Liaison Officer (DBELO) before project is started:

- Commitments made to all subcontractors (DBE and non-DBE): MAF Form 2: Letter of Intent or TxDOT Form 4901
- Proof of DBE certification of all DBE subcontractors.

Once project starts, a Monthly Progress Report (MAF Form or TxDOT Form 4903 or 4904) of the actual dollar amount paid to DBE subcontractors should be submitted monthly to the DBELO.

For questions, please call 432.560.2200. Thank you for your time and consideration regarding this matter.

Sincerely,

MAF, Liaison Officer
Disadvantage Business Enterprise

Encl

FORMS 1 AND 2: DEMONSTRATION OF GOOD FAITH EFFORTS

Form 1: Disadvantaged Business Enterprise (DBE) Utilization

Undersigned Bidder/Offeror has satisfied bid specification requirements as follows:

☐ Bidder/Offeror met DBE contract goal:

Bidder/Offeror is committed to a minimum of 9.82% DBE utilization on this contract.

☐ Bidder/Offeror has not met DBE contract goal:

Bidder/Offeror is committed to a minimum of _____ % DBE utilization on this contract and submitted documentation demonstrating good faith efforts.

Legal name of Bidder/Offeror's firm: _____

Bidder/Offeror Representative: _____

Name/Title: _____

_____ _____

Signature Date

Form 2: Letter of Intent

Note: Authorized representative (AR) named herein must be a vested individual with authority to make contracting decisions on behalf of the firm.

Name of Bidder/Offeror's firm: _____

Name/title of firm's AR: _____

Phone: _____ Email: _____

Name of DBE firm: _____

Name/title of DBE firm's AR: _____

Address: _____

City: _____ State: ____Zip: _____

Work to be performed by DBE firm: _____

Description of Work	NAICS	Dollar Amount/%*	Dealer/Manufacturer**

**Percentage to be used only in negotiated procurements, including design-build contracts.*
***For material suppliers only, indicate if DBE is a manufacturer or regular dealer as defined by §26.55.*

Undersigned Bidder/Offeror is committed to utilizing the named DBE firm for work described herein. Total expected dollar value of this work is $_____.
Bidder/Offeror understands if awarded contract/agreement resulting from this procurement, it must enter a subcontract with identified DBE firm representative of listed type and amount of work. Bidder/Offeror understands upon submitting this form with bid/offer, it may not substitute/terminate listed DBE without following procedures of 49 CFR Part 26, §26.53.

_____ _____

Signature of Bidder/Offeror's Authorized Representative Date

Undersigned DBE affirms it is ready, willing, and able to perform amount and type of work as described herein and is properly certified to be counted for DBE participation, therefore.

_____ _____

Signature of DBE's Authorized Representative Date

If Bidder/Offeror does not receive award of prime contract, all representations in this Letter of Intent shall be null and void.

Submit this page for each DBE subcontractor.

GC□32□ TI□E F□R C□□P□ETI□□ A□D □IQUIDATED DA□AGES

It is hereby understood and mutually agreed by and between the Contractor and Owner that time is of the essence of this Contract with respect to the date of beginning and completion as specified in Contract of Work to be done hereunder. Contractor shall be entitled to receive written notice to proceed with the Work from Owner before beginning any Work under this Contract. Contractor agrees to commence Work under this Contract on a date to be specified in a written "Notice to Proceed" from Owner and to fully complete the Work within the time as specified in Contract of Work. It is expressly understood and agreed by and between Contractor and Owner that the time for the commencement, carrying on and completion of said Work is a reasonable time for the purpose, taking into consideration the average climatic conditions and usual industrial conditions prevailing in the locality. Contractor does hereby agree, as a part of consideration for awarding this Contract to pay to Owner the amount specified in Contract, not as a penalty but as liquidated damages for the breach thereof, for each calendar day that Contractor shall be in default after the time stipulated in Contract for completing the Work. Owner will suffer damage by reason of delay in completing the Work within the time specified in Contract, which damage is impracticable and extremely difficult to ascertain and determine. Therefore, Contractor agrees that should it be in default after the time stipulated in Contract for completing the Work, it will

FEDERAL CONTRACT PROVISIONS

ACCESS TO RECORDS AND REPORTS

Contractor must maintain an acceptable cost accounting system. Contractor agrees to provide the Owner, the Federal Aviation Administration and the Comptroller General of the United States or any of their duly authorized representatives access to any books, documents, papers and records of Contractor which are directly pertinent to the specific contract for the purpose of making audit, examination, excerpts and transcriptions. Contractor agrees to maintain all books, records and reports required under this contract for a period of not less than three years after final payment is made and all pending matters are closed.

NOTICE OF REQUIREMENT FOR AFFIRMATIVE ACTION TO ENSURE EQUAL EMPLOYMENT OPPORTUNITY

1. The Offeror's or Bidder's attention is called to the "Equal Opportunity Clause" and the "Standard Federal Equal Employment Opportunity Construction Contract Specifications" set forth herein.

2. The goals and timetables for minority and female participation, expressed in percentage terms for Contractor's aggregate workforce in each trade on all construction work in the covered area, are as follows:

Timetables

Goals for minority participation for each trade: 19.1%

Goals for female participation in each trade: 6.9%

These goals are applicable to all of Contractor's construction work (whether or not it is Federal or federally assisted) performed in the covered area. If Contractor performs construction work in a geographical area located outside of the covered area, it shall apply the goals established for such geographical area where the work is actually performed. With regard to this second area, Contractor also is subject to the goals for both its federally involved and nonfederally involved construction.

Contractor's compliance with the Executive Order and the regulations in 41 CFR Part 60-4 shall be based on its implementation of the Equal Opportunity Clause, specific affirmative action obligations required by the specifications set forth in 41 CFR 60-4.3(a) and its efforts to meet the goals. The hours of minority and female employment and training must be substantially uniform throughout the length of the contract, and in each trade, and Contractor shall make a good faith effort to employ minorities and women evenly on each of its projects. The transfer of minority or female employees or trainees from Contractor to Contractor or from project to project for the sole purpose of meeting Contractor's goals shall be a violation of the contract, the Executive Order and the regulations in 41 CFR Part 60-4. Compliance with the goals will be measured against the total work hours performed.

3. Contractor shall provide written notification to the Director of the Office of Federal Contract Compliance Programs (OFCCP) within 10 working days of award of any construction subcontract in excess of $10,000 at any tier for construction work under the contract resulting from this solicitation. The notification shall list the name, address, and telephone number of the subcontractor; employer identification number of the subcontractor; estimated dollar amount of the subcontract; estimated starting and completion dates of the subcontract; and the geographical area in which the subcontract is to be performed.

4. As used in this notice and in the contract resulting from this solicitation, the "covered area" is Texas, Midland County, City of Midland.

BREACH OF CONTRACT TERMS

Any violation or breach of terms of this contract on the part of Contractor or its subcontractors may result in the suspension or termination of this contract or such other action that may be necessary to enforce the rights of the parties of this agreement.

Owner will provide Contractor written notice that describes the nature of the breach and corrective actions Contractor must undertake in order to avoid termination of the contract. Owner reserves the right to withhold payments to Contractor until such time Contractor corrects the breach or the Owner elects to terminate the contract. The Owner's notice will identify a specific date by which Contractor must correct the breach. Owner may proceed with termination of the contract if Contractor fails to correct the breach by the deadline indicated in the Owner's notice.

The duties and obligations imposed by the Contract Documents and the rights and remedies available thereunder are in addition to, and not a limitation of, any duties, obligations, rights and remedies otherwise imposed or available by law.

BUY AMERICAN PREFERENCE

SOURCE

Title 49 USC § 50101

Executive Order 14005, *Ensuring the Future is Made in All of America by All of America's Workers*

Bipartisan Infrastructure Law (Pub. L. No. 117-58), Build America, Buy America (BABA)

APPLICABILITY

The Buy American Preference incorporates statutory requirements and policies outlined in the in 49 USC § 50101, Executive Order 14005, and BABA.

Section 50101 of 49 USC requires that all steel and manufactured goods used on AIP projects be produced in the United States. This section also gives the FAA the ability to issue a waiver to a Sponsor to use non-domestic material on an AIP funded project subject to meeting certain conditions. A Sponsor may request that the FAA issue a waiver from the Buy American Preference requirements if the FAA finds that:

1) Applying the provision is not in the public interest.
2) The steel or manufactured goods are not available in sufficient quantity or quality in the United States.

3) The cost of components and subcomponents produced in the United States is more than 60 percent of the total components of a facility or equipment, and final assembly has taken place in the United States. Items that have an FAA standard specification item number (such as specific airport lighting equipment) are considered the equipment.
4) Applying this provision would increase the cost of the overall project by more than 25 percent.

Executive Order 14005 advances the Administration's priority to use terms and conditions of Federal financial assistance awards to maximize the use of goods, products, and materials produced in, and services offered in, the United States. The Order directs, to the extent appropriate and consistent with applicable law, agencies shall partner with the Hollings Manufacturing Extension Partnership (MEP) to conduct supplier scouting in order to identify American companies that are able to produce goods, products, and materials in the United States that meet Federal procurement needs, prior to consideration of using non-domestic products.

The Bipartisan Infrastructure Law, Build America, Buy America (BABA) Act strengthens Made in America Laws and bolsters America's industrial base, protects national security, and supports high-paying jobs. Under BABA, iron, steel and certain construction materials are required to be 100% produced in the United States.

Under the Bipartisan Infrastructure Law (Pub. L. No. 117-58) BABA three waivers are available for iron and steel, manufactured products, and construction materials when a Federal agency finds that –

1) Applying the domestic content procurement preference would be inconsistent with the public interest (a "public interest waiver");
2) Types of iron, steel, manufactured products, or construction materials are not produced in the United States in sufficient and reasonably available quantities or of a satisfactory quality (a "nonavailability waiver"); or
3) The inclusion of iron, steel, manufactured products, or construction materials produced in the United States will increase the cost of the overall project by more than 25 percent (an "unreasonable cost waiver").

BABA defines construction materials, items that are or consists primarily of non-ferrous metals, plastic and polymer-based products (including polyvinylchloride, composite building materials, and polymers used in fiber optic cables), glass (including optic glass), lumber or drywall.

Items that consist of two or more of the aforementioned materials that have been combined together through a manufacturing process, and items that include at least one of the listed materials combined with a material that is not listed through a manufacturing process, should be treated as manufactured products, rather than as construction materials. For example, a plastic framed sliding window should be treated as a manufactured product while plate glass should be treated as a construction material**.**

The Buy America Preference requirements flow down from the Sponsor to first tier contractors, who are responsible for ensuring that lower tier contractors and subcontractors are also in compliance.

Note: The Buy American Preference does not apply to temporary equipment a contractor uses as a tool of its trade and which does not remain as part of the project.

Required Documentation

The FAA Buy American Requests. All applications (requests) for an FAA Buy American Preference Waiver includes, at minimum, a completed Content Percentage Worksheet and Final Assembly Questionnaire. Additional information may be requested from the applicant by the FAA. Airport Sponsors, consultants, construction contractors, or equipment manufacturers are responsible for completing and submitting waiver applications. The FAA is unable to make a determination on waiver requests with incomplete information. Sponsors must confirm with the bidder or offeror to assess the adequacy of the waiver request and associated information prior to forwarding a waiver request to the FAA for action. All FAA waivers forms are available from the FAA Buy American Requirements webpage.

Proprietary Confidentiality. Exemption 4 of the Freedom of Information Act protects "trade secrets and commercial or financial information obtained from a person that is privileged or confidential. Proprietary manufacturing and design information submitted to the Federal Aviation Administration for the purposes of receiving a Buy American Waiver shall not be disclosed outside the FAA. The FAA will provide a written notification to the Airport Sponsor, manufacturer(s), contractor(s) or supplier(s) when a waiver determination is complete.

Timing of Waiver Requests. Sponsors desiring a Type 2 waiver should submit their waiver request, with justification, *before* issuing a solicitation for bids or a request for proposal for a project.

The Sponsor must submit a Type 2, Type 3, or Type 4 waiver request *prior* to executing the contract. The FAA will generally not consider waiver requests after execution of the contract except where extraordinary and extenuating circumstances exist.

The Buy American Notice of Determination (NOD) Process. The FAA Reauthorization Act of 2018 requires that all approved waivers must be posted to the FAA's website and remain posted for public comment for 10 days, before becoming effective. All FAA waivers must complete the NOD process. Sponsors are encouraged to wait until approved waivers become effective before executing AIP projects.

Buy American Conformance Lists. The FAA Office of Airports maintains listings of projects and products that have received a waiver from the Buy American Preference requirements for project specific and nationwide use. Each of these conformance lists is available online at www.faa.gov/airports/aip/buy_american/. Products listed on the FAA Nationwide Buy American Conformance list do not require additional submittal of domestic content information. Nationwide waivers expire five years from the date issued, unless revoked earlier by the FAA.

Facility Waiver Requests. For construction of a facility, the Sponsor may submit the waiver request after bid opening, but prior to contract execution. Examples of facility construction include terminal buildings, terminal renovation, and snow removal equipment buildings.

Contract Types –

Construction and Equipment – The Sponsor must meet the Buy American Preference requirements of 49 USC § 50101 and BABA for all AIP funded projects that require materials that are or consists primarily of iron, steel or manufactured goods and construction materials.

Professional Services – Professional service agreements (PSAs) do not normally result in a deliverable that meets the definition of a manufactured product. However, the emergence of various project delivery methods has created situations where task deliverables under a PSA may include a manufactured product. If a PSA includes providing a manufactured good as a deliverable under the contract, the Sponsor must include the Buy American Preference provision in the agreement.

Property – Most land transactions do not involve acquiring a manufactured product. However, under certain circumstances, a property acquisition project could result in the installation of a manufactured product. For example, the installation of property fencing, gates, doors and locks, etc. represent manufactured products acquired under an AIP funded land project that must comply with Buy American Preferences.

Use of Provisions – No mandatory language provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the Sponsor uses different language, the Sponsor's revised language must fully comply with 49 USC § 50101 and BABA.

There are two types of FAA Buy American certifications. The Sponsor must incorporate the appropriate certifications of compliance with FAA Buy American Preference in the solicitation:

- **Construction Projects** involving the replacement, rehabilitation, reconstruction of airfield surfaces such as on runways, taxiways, taxilanes, aprons, roadways, parking lots, etc. – Insert the Certificate of compliance to FAA Buy American Preference based on Construction Projects.
- **Equipment and Buildings Projects** involving and including the acquisition of equipment such as snow removal equipment, navigational aids, wind cones, and the construction of buildings such as hangars, terminal development, lighting vaults, aircraft rescue & firefighting buildings, etc. - Insert the Certificate of Compliance with FAA Buy American Preference Based on Equipment/Building Projects.

Certification of Compliance with FAA Buy American Preference Statement

FAA BUY AMERICAN PREFERENCE

Contractor certifies that its bid/offer is in compliance with 49 USC § 50101, BABA and other related Made in America Laws,[1] U.S. statutes, guidance, and FAA policies, which provide that Federal funds may not be obligated unless all iron, steel and manufactured goods used in AIP funded projects are produced in the United States, unless the Federal Aviation Administration has issued a waiver for the product; the product is listed as an Excepted Article, Material Or Supply in Federal Acquisition Regulation subpart 25.108; or is included in the FAA Nationwide Buy American Waivers Issued list.

The bidder or offeror must complete and submit the certification of compliance with FAA's Buy American Preference, BABA and Made in America laws included herein with their bid or offer. The Airport Sponsor/Owner will reject as nonresponsive any bid or offer that does not include a completed certification of compliance with FAA's Buy American Preference and BABA.

The bidder or offeror certifies that all constructions materials, defined to mean an article, material, or supply other than an item of primarily iron or steel; a manufactured product; cement and cementitious materials; aggregates such as stone, sand, or gravel; or aggregate binding agents or additives that are or consist primarily of: non-ferrous metals; plastic and polymer-based products (including polyvinylchloride, composite building materials, and polymers used in fiber optic cables); glass (including optic glass); lumber; or drywall used in the project are manufactured in the U.S.

[1] Per Executive Order 14005 "Made in America Laws" means all statutes, regulations, rules, and Executive Orders relating to federal financial assistance awards or federal procurement, including those that refer to "Buy America" or "Buy American," that require, or provide a preference for, the purchase or acquisition of goods, products, or materials produced in the United States, including iron, steel, and manufactured products offered in the United States.

Certification of Compliance with FAA Buy American Preference – Construction Projects

As a matter of bid responsiveness, the bidder or offeror must complete, sign, date, and submit this certification statement with its proposal. The bidder or offeror must indicate how it intends to comply with 49 USC § 50101, BABA and other related Made in America Laws, U.S. statutes, guidance, and FAA policies, by selecting one of the following certification statements. These statements are mutually exclusive. Bidder must select one or the other (i.e., not both) by inserting a checkmark (✓) or the letter "X".

☐ Bidder or offeror hereby certifies that it will comply with 49 USC § 50101, BABA and other related U.S. statutes, guidance, and policies of the FAA by:

a) Only installing iron, steel and manufactured products produced in the United States;

b) Only installing construction materials defined as: an article, material, or supply – other than an item of primarily iron or steel; a manufactured product; cement and cementitious materials; aggregates such as stone, sand, or gravel; or aggregate binding agents or additives that are or consist primarily of non-ferrous metals; plastic and polymer-based products (including polyvinylchloride, composite building materials, and polymers used in fiber optic cables); glass (including optic glass); lumber or drywall that have been manufactured in the United States.

c) Installing manufactured products for which the Federal Aviation Administration (FAA) has issued a waiver as indicated by inclusion on the current FAA Nationwide Buy American Waivers Issued listing; or

d) Installing products listed as an Excepted Article, Material or Supply in Federal Acquisition Regulation Subpart 25.108.

By selecting this certification statement, the bidder or offeror agrees:

a) To provide to the Airport Sponsor or the FAA evidence that documents the source and origin of the iron, steel, and/or manufactured product.
b) To faithfully comply with providing U.S. domestic products.
c) To refrain from seeking a waiver request after establishment of the contract, unless extenuating circumstances emerge that the FAA determines justified.
d) Certify that all construction materials used in the project are manufactured in the U.S.

☐ The bidder or offeror hereby certifies it cannot comply with the 100 percent Buy American Preferences of 49 USC § 50101(a) but may qualify for a Type 3 or Type 4 waiver under 49 USC § 50101(b). By selecting this certification statement, the apparent bidder or offeror with the apparent low bid agrees:

a) To the submit to the Airport Sponsor or FAA within 15 calendar days of being selected as the responsive bidder, a formal waiver request and required documentation that supports the type of waiver being requested.
b) That failure to submit the required documentation within the specified timeframe is cause for a non-responsive determination that may result in rejection of the proposal.
c) To faithfully comply with providing U.S. domestic products at or above the approved U.S. domestic content percentage as approved by the FAA.

d) To furnish U.S. domestic product for any waiver request that the FAA rejects.
e) To refrain from seeking a waiver request after establishment of the contract, unless extenuating circumstances emerge that the FAA determines justified.

Required Documentation

Type 2 Waiver (Nonavailability) - The iron, steel, manufactured goods or construction materials or manufactured goods are not available in sufficient quantity or quality in the United States. The required documentation for the Nonavailability waiver is

a) Completed Content Percentage Worksheet and Final Assembly Questionnaire
b) Record of thorough market research, consideration where appropriate of qualifying alternate items, products, or materials including;
c) A description of the market research activities and methods used to identify domestically manufactured items capable of satisfying the requirement, including the timing of the research and conclusions reached on the availability of sources.

Type 3 Waiver – The cost of components and subcomponents produced in the United States is more than 60 percent of the cost of all components and subcomponents of the "facility/project." The required documentation for a Type 3 waiver is:

a) Completed Content Percentage Worksheet and Final Assembly Questionnaire including;
b) Listing of all manufactured products that are not comprised of 100 percent U.S. domestic content (excludes products listed on the FAA Nationwide Buy American Waivers Issued listing and products excluded by Federal Acquisition Regulation Subpart 25.108; products of unknown origin must be considered as non-domestic products in their entirety).
c) Cost of non-domestic components and subcomponents, excluding labor costs associated with final assembly and installation at project location.
d) Percentage of non-domestic component and subcomponent cost as compared to total "facility" component and subcomponent costs, excluding labor costs associated with final assembly and installation at project location.

Type 4 Waiver (Unreasonable Costs) - Applying this provision for iron, steel, manufactured goods or construction materials would increase the cost of the overall project by more than 25 percent. The required documentation for this waiver is:

a) A completed Content Percentage Worksheet and Final Assembly Questionnaire from
b) At minimum two comparable equal bids and/or offers;
c) Receipt or record that demonstrates that supplier scouting called for in Executive Order 14005, indicates that no domestic source exists for the project and/or component;
d) Completed waiver applications for each comparable bid and/or offer.

False Statements: Per 49 USC § 47126, this certification concerns a matter within the jurisdiction of the Federal Aviation Administration and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under Title 18, United States Code.

GENERAL CIVIL RIGHTS PROVISIONS

In all its activities within the scope of its airport program, the Contractor agrees to comply with pertinent statutes, Executive Orders, and such rules as identified in Title VI List of Pertinent Nondiscrimination Acts and Authorities to ensure that no person shall, on the grounds of race, color, national origin (including limited English proficiency), creed, sex (including sexual orientation and gender identity), age, or disability be excluded from participating in any activity conducted with or benefiting from Federal assistance.

This provision is in addition to that required by Title VI of the Civil Rights Act of 1964.

Specific Clause used for General Contract Agreements

The above provision binds Contractor and subcontractors from the bid solicitation period through the completion of the contract.

Title VI Solicitation Notice:

The Midland International Air & Space Port, in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252, 42 USC §§ 2000d to 2000d-4) and the Regulations, hereby notifies all bidders or offerors that it will affirmatively ensure that for any contract entered into pursuant to this advertisement, select businesses, or disadvantaged business enterprises will be afforded full and fair opportunity to submit bids in response to this invitation and no businesses will be discriminated against on the grounds of race, color, national origin (including limited English proficiency), creed, sex (including sexual orientation and gender identity), age, or disability in consideration for an award.

Title VI List of Pertinent Nondiscrimination Acts and Authorities

During the performance of this contract, Contractor, for itself, its assignees, and successors in interest (hereinafter referred to as the "Contractor") agrees to comply with the following non-discrimination statutes and authorities; including but not limited to:

- Title VI of the Civil Rights Act of 1964 (42 USC § 2000d *et seq*., 78 stat. 252) (prohibits discrimination on the basis of race, color, national origin);
- 49 CFR part 21 (Non-discrimination in Federally-Assisted programs of the Department of Transportation—Effectuation of Title VI of the Civil Rights Act of 1964);
- The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, (42 USC § 4601) (prohibits unfair treatment of persons displaced or whose property has been acquired because of Federal or Federal-aid programs and projects);
- Section 504 of the Rehabilitation Act of 1973 (29 USC § 794 *et seq*.), as amended (prohibits discrimination on the basis of disability); and 49 CFR part 27 (Nondiscrimination on the Basis of Disability in Programs or Activities Receiving Federal Financial Assistance);
- The Age Discrimination Act of 1975, as amended (42 USC § 6101 *et seq*.) (prohibits discrimination on the basis of age);
- Airport and Airway Improvement Act of 1982 (49 USC § 47123), as amended (prohibits discrimination based on race, creed, color, national origin, or sex);

- The Civil Rights Restoration Act of 1987 (PL 100-259) (broadened the scope, coverage and applicability of Title VI of the Civil Rights Act of 1964, the Age Discrimination Act of 1975 and Section 504 of the Rehabilitation Act of 1973, by expanding the definition of the terms "programs or activities" to include all of the programs or activities of the Federal-aid recipients, sub-recipients and contractors, whether such programs or activities are Federally funded or not);
- Titles II and III of the Americans with Disabilities Act of 1990 (42 USC § 12101, et seq) (prohibit discrimination on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing entities) as implemented by U.S. Department of Transportation regulations at 49 CFR parts 37 and 38;
- The Federal Aviation Administration's Nondiscrimination statute (49 USC § 47123) (prohibits discrimination on the basis of race, color, national origin, and sex);
- Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations (ensures nondiscrimination against minority populations by discouraging programs, policies, and activities with disproportionately high and adverse human health or environmental effects on minority and low-income populations);
- Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency, and resulting agency guidance, national origin discrimination includes discrimination because of limited English proficiency (LEP). To ensure compliance with Title VI, you must take reasonable steps to ensure that LEP persons have meaningful access to your programs 70 Fed. Reg. 74087 (2005);
- Title IX of the Education Amendments of 1972, as amended, which prohibits you from discriminating because of sex in education programs or activities (20 USC § 1681, et seq).

Compliance with Nondiscrimination Requirements:

During the performance of this contract, Contractor, for itself, its assignees, and successors in interest (hereinafter referred to as the "Contractor"), agrees as follows:

1. **Compliance with Regulations:** Contractor (hereinafter includes consultants) will comply with the Title VI List of Pertinent Nondiscrimination Acts and Authorities, as they may be amended from time to time, which are herein incorporated by reference and made a part of this contract.
2. **Nondiscrimination:** Contractor, with regard to the work performed by it during the contract, will not discriminate on the grounds of race, color, national origin (including limited English proficiency), creed, sex (including sexual orientation and gender identity), age, or disability in the selection and retention of subcontractors, including procurements of materials and leases of equipment. Contractor will not participate directly or indirectly in the discrimination prohibited by the Nondiscrimination Acts and Authorities, including employment practices when the contract covers any activity, project, or program set forth in Appendix B of 49 CFR part 21.
3. **Solicitations for Subcontracts, including Procurements of Materials and Equipment:** In all solicitations, either by competitive bidding or negotiation made by Contractor for work to be performed under a subcontract, including procurements of materials, or leases of equipment, each potential subcontractor or supplier will be notified by Contractor of Contractor's obligations under this contract and the Nondiscrimination Acts and Authorities on the grounds of race, color, or national origin.

4. **Information and Reports:** Contractor will provide all information and reports required by the Acts, the Regulations, and directives issued pursuant thereto and will permit access to its books, records, accounts, other sources of information, and its facilities as may be determined by the Sponsor or the Federal Aviation Administration to be pertinent to ascertain compliance with such Nondiscrimination Acts and Authorities and instructions. Where any information required of a contractor is in the exclusive possession of another who fails or refuses to furnish the information, Contractor will so certify to the Sponsor or the Federal Aviation Administration, as appropriate, and will set forth what efforts it has made to obtain the information.
5. **Sanctions for Noncompliance:** In the event of a Contractor's noncompliance with the non-discrimination provisions of this contract, the Sponsor will impose such contract sanctions as it or the Federal Aviation Administration may determine to be appropriate, including, but not limited to:
    a. Withholding payments to Contractor under the contract until Contractor complies; and/or
    b. Cancelling, terminating, or suspending a contract, in whole or in part.
6. **Incorporation of Provisions:** Contractor will include the provisions of paragraphs one through six in every subcontract, including procurements of materials and leases of equipment, unless exempt by the Acts, the Regulations, and directives issued pursuant thereto. Contractor will take action with respect to any subcontract or procurement as the Sponsor or the Federal Aviation Administration may direct as a means of enforcing such provisions including sanctions for noncompliance. Provided, that if Contractor becomes involved in, or is threatened with litigation by a subcontractor, or supplier because of such direction, Contractor may request the Sponsor to enter into any litigation to protect the interests of the Sponsor. In addition, Contractor may request the United States to enter into the litigation to protect the interests of the United States.

CLEAN AIR AND WATER POLLUTION CONTROL

Contractor agrees to comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act (42 USC §§ 7401-7671q) and the Federal Water Pollution Control Act as amended (33 USC §§ 1251-1387). Contractor agrees to report any violation to the Owner immediately upon discovery. The Owner assumes responsibility for notifying the Environmental Protection Agency (EPA) and the Federal Aviation Administration.

Contractor must include this requirement in all subcontracts that exceed $150,000.

CONTRACT WORKHOURS AND SAFETY STANDARDS ACT REQUIREMENTS

1. Overtime Requirements.

No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic, including watchmen and guards, in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less

than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.

2. Violation; Liability for Unpaid Wages; Liquidated Damages.

In the event of any violation of the clause set forth in paragraph (1) of this clause, Contractor and any subcontractor responsible therefor shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in paragraph (1) of this clause, in the sum of $29 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in paragraph (1) of this clause.

3. Withholding for Unpaid Wages and Liquidated Damages.

The Federal Aviation Administration (FAA) or the Owner shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by Contractor or subcontractor under any such contract or any other Federal contract with the same prime contractor, or any other federally-assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime contractor, such sums as may be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in paragraph (2) of this clause.

4. Subcontractors.

Contractor or subcontractor shall insert in any subcontracts the clauses set forth in paragraphs (1) through (4) and also a clause requiring the subcontractor to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in paragraphs (1) through (4) of this clause.

COPELAND "ANTI-KICKBACK" ACT

Contractor must comply with the requirements of the Copeland "Anti-Kickback" Act (18 USC 874 and 40 USC 3145), as supplemented by Department of Labor regulation 29 CFR part 3. Contractor and subcontractors are prohibited from inducing, by any means, any person employed on the project to give up any part of the compensation to which the employee is entitled. Contractor and each Subcontractor must submit to the Owner, a weekly statement on the wages paid to each employee performing on covered work during the prior week. Owner must report any violations of the Act to the Federal Aviation Administration.

DAVIS-BACON REQUIREMENTS

1. Minimum Wages.

(i) All laborers and mechanics employed or working upon the site of the work will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account (except such payroll deductions as are permitted by the Secretary of Labor under the Copeland Act (29 CFR Part 3)), the full amount of wages and bona fide fringe benefits (or cash equivalent thereof) due at time of payment computed at rates not less than those contained in the wage determination of the Secretary of Labor which is attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between Contractor and such laborers and mechanics.

Contributions made or costs reasonably anticipated for bona fide fringe benefits under section 1(b)(2) of the Davis-Bacon Act on behalf of laborers or mechanics are considered wages paid to such laborers or mechanics, subject to the provisions of paragraph (1)(iv) of this section; also, regular contributions made or costs incurred for more than a weekly period (but not less often than quarterly) under plans, funds, or programs which cover the particular weekly period, are deemed to be constructively made or incurred during such weekly period. Such laborers and mechanics shall be paid the appropriate wage rate and fringe benefits on the wage determination for the classification of work actually performed, without regard to skill, except as provided in 29 CFR § 5.5(a)(4). Laborers or mechanics performing work in more than one classification may be compensated at the rate specified for each classification for the time actually worked therein: *Provided,* that the employer's payroll records accurately set forth the time spent in each classification in which work is performed. The wage determination (including any additional classification and wage rates conformed under (1)(ii) of this section) and the Davis-Bacon poster (WH-1321) shall be posted at all times by Contractor and its subcontractors at the site of the work in a prominent and accessible place where it can easily be seen by the workers.

(ii)(A) The contracting officer shall require that any class of laborers or mechanics, including helpers, which is not listed in the wage determination and which is to be employed under the contract shall be classified in conformance with the wage determination. The contracting officer shall approve an additional classification and wage rate and fringe benefits therefore only when the following criteria have been met:

(1) The work to be performed by the classification requested is not performed by a classification in the wage determination;

(2) The classification is utilized in the area by the construction industry; and

(3) The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage determination.

(B) If Contractor and the laborers and mechanics to be employed in the classification (if known), or their representatives, and the contracting officer agree on the classification and wage rate (including the amount designated for fringe benefits where appropriate), a report of the action taken shall be sent by the contracting officer to the Administrator of the Wage and Hour Division, U.S. Department of Labor, Washington, DC 20210. The Administrator, or an authorized representative, will approve, modify, or disapprove every additional classification action within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30-day period that additional time is necessary.

(C) In the event Contractor, the laborers, or mechanics to be employed in the classification, or their representatives, and the contracting officer do not agree on the proposed classification and wage rate (including the amount designated for fringe benefits, where appropriate), the contracting officer shall refer the questions, including the views of all interested parties and the recommendation of the contracting officer, to the Administrator for determination. The Administrator, or an authorized representative, will issue a determination within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30-day period that additional time is necessary.

(D) The wage rate (including fringe benefits where appropriate) determined pursuant to subparagraphs (1)(ii) (B) or (C) of this paragraph, shall be paid to all workers performing work in the classification under this contract from the first day on which work is performed in the classification.

(iii) Whenever the minimum wage rate prescribed in the contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly rate, Contractor shall either pay the benefit as stated in the wage determination or shall pay another bona fide fringe benefit or an hourly cash equivalent thereof.

(iv) If Contractor does not make payments to a trustee or other third person, Contractor may consider as part of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing bona fide fringe benefits under a plan or program, *Provided,* that the Secretary of Labor has found, upon the written request of Contractor, that the applicable standards of the Davis-Bacon Act have been met. The Secretary of Labor may require Contractor to set aside in a separate account assets for the meeting of obligations under the plan or program.

2. Withholding. The Federal Aviation Administration or the Sponsor shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld from Contractor under this contract or any other Federal contract with the same prime contractor, or any other federally-assisted contract subject to Davis-Bacon prevailing wage requirements, which is held by the same prime contractor, so much of the accrued payments or advances as may be considered necessary to pay laborers and mechanics, including apprentices, trainees, and helpers, employed by Contractor or any subcontractor the full amount of wages required by the contract. In the event of failure to pay any laborer or mechanic, including any apprentice, trainee, or helper, employed or working on the site of the work, all or part of the wages required by the contract, the Federal Aviation Administration may, after written notice to Contractor, Sponsor, Applicant, or Owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds until such violations have ceased.

3. Payrolls and Basic Records.

(i) Payrolls and basic records relating thereto shall be maintained by Contractor during the course of the work and preserved for a period of three years thereafter for all laborers and mechanics working at the site of the work. Such records shall contain the name, address, and social security number of each such worker; his or her correct classification; hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in 1(b)(2)(B) of the Davis-Bacon Act); daily and weekly number of hours worked; deductions made; and actual wages paid. Whenever the Secretary of Labor has found under 29 CFR 5.5(a)(1)(iv) that the wages of any laborer or mechanic include the amount of any costs reasonably anticipated in providing benefits

under a plan or program described in section 1(b)(2)(B) of the Davis-Bacon Act, Contractor shall maintain records that show that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, and that the plan or program has been communicated in writing to the laborers or mechanics affected, and records which show the costs anticipated or the actual costs incurred in providing such benefits. Contractors employing apprentices or trainees under approved programs shall maintain written evidence of the registration of apprenticeship programs and certification of trainee programs, the registration of the apprentices and trainees, and the ratios and wage rates prescribed in the applicable programs.

(ii)(A) Contractor shall submit weekly for each week in which any contract work is performed a copy of all payrolls to the Federal Aviation Administration if the agency is a party to the contract, but if the agency is not such a party, Contractor will submit the payrolls to the applicant, Sponsor, or Owner, as the case may be, for transmission to the Federal Aviation Administration. The payrolls submitted shall set out accurately and completely all of the information required to be maintained under 29 CFR § 5.5(a)(3)(i), except that full social security numbers and home addresses shall not be included on weekly transmittals. Instead the payrolls shall only need to include an individually identifying number for each employee (*e.g.,* the last four digits of the employee's social security number). The required weekly payroll information may be submitted in any form desired. Optional Form WH–347 is available for this purpose from the Wage and Hour Division Web site at *http://www.dol.gov/esa/whd/forms/wh347instr.htm* or its successor site. The prime contractor is responsible for the submission of copies of payrolls by all subcontractors. Contractors and subcontractors shall maintain the full social security number and current address of each covered worker and shall provide them upon request to the Federal Aviation Administration if the agency is a party to the contract, but if the agency is not such a party, Contractor will submit them to the applicant, Sponsor, or Owner, as the case may be, for transmission to the Federal Aviation Administration, Contractor, or the Wage and Hour Division of the Department of Labor for purposes of an investigation or audit of compliance with prevailing wage requirements. It is not a violation of this section for a prime contractor to require a subcontractor to provide addresses and social security numbers to the prime contractor for its own records, without weekly submission to the sponsoring government agency (or the applicant, Sponsor, or Owner).

(B) Each payroll submitted shall be accompanied by a "Statement of Compliance," signed by Contractor or subcontractor or his or her agent who pays or supervises the payment of the persons employed under the contract and shall certify the following:

(1) That the payroll for the payroll period contains the information required to be provided under 29 CFR § 5.5(a)(3)(ii), the appropriate information is being maintained under 29 CFR § 5.5 (a)(3)(i), and that such information is correct and complete;

(2) That each laborer and mechanic (including each helper, apprentice, and trainee) employed on the contract during the payroll period has been paid the full weekly wages earned, without rebate, either directly or indirectly, and that no deductions have been made either directly or indirectly from the full wages earned, other than permissible deductions as set forth in Regulations, 29 CFR Part 3;

(3) That each laborer or mechanic has been paid not less than the applicable wage rates and fringe benefits or cash equivalents for the classification of work performed, as specified in the applicable wage determination incorporated into the contract.

(C) The weekly submission of a properly executed certification set forth on the reverse side of Optional Form WH-347 shall satisfy the requirement for submission of the "Statement of Compliance" required by paragraph (3)(ii)(B) of this section.

(D) The falsification of any of the above certifications may subject Contractor or subcontractor to civil or criminal prosecution under Section 1001 of Title 18 and Section 231 of Title 31 of the United States Code.

(iii) Contractor or subcontractor shall make the records required under paragraph (3)(i) of this section available for inspection, copying, or transcription by authorized representatives of the Sponsor, the Federal Aviation Administration, or the Department of Labor and shall permit such representatives to interview employees during working hours on the job. If Contractor or subcontractor fails to submit the required records or to make them available, the Federal agency may, after written notice to Contractor, Sponsor, applicant, or Owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds. Furthermore, failure to submit the required records upon request or to make such records available may be grounds for debarment action pursuant to 29 CFR § 5.12.

4. Apprentices and Trainees.

(i) Apprentices. Apprentices will be permitted to work at less than the predetermined rate for the work they performed when they are employed pursuant to and individually registered in a bona fide apprenticeship program registered with the U.S. Department of Labor, Employment and Training Administration, Office of Apprenticeship Training, Employer and Labor Services, or with a State Apprenticeship Agency recognized by the Office, or if a person is employed in his or her first 90 days of probationary employment as an apprentice in such an apprenticeship program, who is not individually registered in the program, but who has been certified by the Office of Apprenticeship Training, Employer and Labor Services or a State Apprenticeship Agency (where appropriate) to be eligible for probationary employment as an apprentice. The allowable ratio of apprentices to journeymen on the job site in any craft classification shall not be greater than the ratio permitted to Contractor as to the entire work force under the registered program. Any worker listed on a payroll at an apprentice wage rate, who is not registered or otherwise employed as stated above, shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any apprentice performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. Where a contractor is performing construction on a project in a locality other than that in which its program is registered, the ratios and wage rates (expressed in percentages of the journeyman's hourly rate) specified in Contractor's or subcontractor's registered program shall be observed. Every apprentice must be paid at not less than the rate specified in the registered program for the apprentice's level of progress, expressed as a percentage of the journeymen hourly rate specified in the applicable wage determination. Apprentices shall be paid fringe benefits in accordance with the provisions of the apprenticeship program. If the apprenticeship program does not specify fringe benefits, apprentices must be paid the full amount of fringe benefits listed on the wage determination for the applicable classification. If the Administrator determines that a different practice prevails for the applicable apprentice classification, fringes shall be paid in accordance with that determination. In the event the Office of Apprenticeship Training, Employer and Labor Services, or a State Apprenticeship Agency recognized by the Office, withdraws approval of an apprenticeship program, Contractor will no longer be permitted to utilize apprentices at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(ii) Trainees. Except as provided in 29 CFR § 5.16, trainees will not be permitted to work at less than the predetermined rate for the work performed unless they are employed pursuant to and individually registered in a program which has received prior approval, evidenced by formal certification by the U.S. Department of Labor, Employment and Training Administration. The ratio of trainees to journeymen on the job site shall not be greater than permitted under the plan approved by the Employment and Training Administration. Every trainee must be paid at not less than the rate specified in the approved program for the trainee's level of progress, expressed as a percentage of the journeyman hourly rate specified in the applicable wage determination. Trainees shall be paid fringe benefits in accordance with the provisions of the trainee program. If the trainee program does not mention fringe benefits, trainees shall be paid the full amount of fringe benefits listed on the wage determination unless the Administrator of the Wage and Hour Division determines that there is an apprenticeship program associated with the corresponding journeyman wage rate on the wage determination that provides for less than full fringe benefits for apprentices. Any employee listed on the payroll at a trainee rate that is not registered and participating in a training plan approved by the Employment and Training Administration shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any trainee performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. In the event the Employment and Training Administration withdraws approval of a training program, Contractor will no longer be permitted to utilize trainees at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(iii) Equal Employment Opportunity. The utilization of apprentices, trainees, and journeymen under this part shall be in conformity with the equal employment opportunity requirements of Executive Order 11246, as amended, and 29 CFR Part 30.

5. Compliance with Copeland Act Requirements.

Contractor shall comply with the requirements of 29 CFR Part 3, which are incorporated by reference in this contract.

6. Subcontracts.

Contractor or subcontractor shall insert in any subcontracts the clauses contained in 29 CFR §§ 5.5(a)(1) through (10) and such other clauses as the Federal Aviation Administration may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all the contract clauses in 29 CFR § 5.5.

7. Contract Termination: Debarment.

A breach of the contract clauses in paragraph 1 through 10 of this section may be grounds for termination of the contract, and for debarment as a contractor and a subcontractor as provided in 29 CFR § 5.12.

8. Compliance with Davis-Bacon and Related Act Requirements.

All rulings and interpretations of the Davis-Bacon and Related Acts contained in 29 CFR Parts 1, 3, and 5 are herein incorporated by reference in this contract.

9. Disputes Concerning Labor Standards.

Disputes arising out of the labor standards provisions of this contract shall not be subject to the general disputes clause of this contract. Such disputes shall be resolved in accordance with the procedures of the Department of Labor set forth in 29 CFR Parts 5, 6, and 7. Disputes within the meaning of this clause include disputes between Contractor (or any of its subcontractors) and the contracting agency, the U.S. Department of Labor, or the employees or their representatives.

10. Certification of Eligibility.

(i) By entering into this contract, Contractor certifies that neither it (nor he or she) nor any person or firm who has an interest in Contractor's firm is a person or firm ineligible to be awarded Government contracts by virtue of section 3(a) of the Davis-Bacon Act or 29 CFR § 5.12(a)(1).

(ii) No part of this contract shall be subcontracted to any person or firm ineligible for award of a Government contract by virtue of section 3(a) of the Davis-Bacon Act or 29 CFR § 5.12(a)(1).

(iii) The penalty for making false statements is prescribed in the U.S. Criminal Code, 18 USC § 1001.

CERTIFICATION OF OFFEROR/BIDDER REGARDING DEBARMENT

By submitting a bid/proposal under this solicitation, the bidder or offeror certifies that neither it nor its principals are presently debarred or suspended by any Federal department or agency from participation in this transaction.

CERTIFICATION OF LOWER TIER CONTRACTORS REGARDING DEBARMENT

The successful bidder, by administering each lower tier subcontract that exceeds $25,000 as a "covered transaction," must confirm each lower tier participant of a "covered transaction" under the project is not presently debarred or otherwise disqualified from participation in this federally-assisted project. The successful bidder will accomplish this by:

1. Checking the System for Award Management at website: http://www.sam.gov.
2. Collecting a certification statement similar to the Certification of Offeror /Bidder Regarding Debarment, above.
3. Inserting a clause or condition in the covered transaction with the lower tier contract.

If the Federal Aviation Administration later determines that a lower tier participant failed to disclose to a higher tier participant that it was excluded or disqualified at the time it entered the covered transaction, the FAA may pursue any available remedies, including suspension and debarment of the non-compliant participant.

DISADVANTAGED BUSINESS ENTERPRISE

Bid Information Submitted as a matter of responsiveness:

The Owner's award of this contract is conditioned upon Bidder or Offeror satisfying the good faith effort requirements of 49 CFR § 26.53.

As a condition of responsiveness, the Bidder or Offeror must submit the following information with its proposal on the forms provided herein:

1) The names and addresses of Disadvantaged Business Enterprise (DBE) firms that will participate in the contract;
2) A description of the work that each DBE firm will perform;
3) The dollar amount of the participation of each DBE firm listed under (1);
4) Written statement from Bidder or Offeror that attests their commitment to use the DBE firm(s) listed under (1) to meet the Owner's project goal
5) Written confirmation from each listed DBE firm that it is participating in the contract in the kind and amount of work provided in the prime contractor's commitment; and
6) If Bidder or Offeror cannot meet the advertised project DBE goal, evidence of good faith efforts undertaken by the Bidder or Offeror as described in appendix A to 49 CFR part 26. The documentation of good faith efforts must include copies of each DBE and non-DBE subcontractor quote submitted to the bidder when a non-DBE subcontractor was selected over a DBE for work on the contract.

Bid Information submitted as a matter of responsibility:

The Owner's award of this contract is conditioned upon Bidder or Offeror satisfying the good faith effort requirements of 49 CFR § 26.53.

As a condition of responsibility, every Bidder or Offeror must submit the following information on the forms provided herein within five days after Bid Opening.

1) The names and addresses of Disadvantaged Business Enterprise (DBE) firms that will participate in the contract;
2) A description of the work that each DBE firm will perform;
3) The dollar amount of the participation of each DBE firm listed under (1);
4) Written statement from Bidder or Offeror that attests their commitment to use the DBE firm(s) listed under (1) to meet the Owner's project goal;
5) Written confirmation from each listed DBE firm that it is participating in the contract in the kind and amount of work provided in the prime contractor's commitment; and
6) If Bidder or Offeror cannot meet the advertised project DBE goal, evidence of good faith efforts undertaken by the Bidder or Offeror as described in appendix A to 49 CFR part 26. The documentation of good faith efforts must include copies of each DBE and non-DBE subcontractor quote submitted to the bidder when a non-DBE subcontractor was selected over a DBE for work on the contract.

Contract Assurance (49 CFR § 26.13)

Contractor, subrecipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. Contractor shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted contracts. Failure by Contractor to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as the recipient deems appropriate, which may include, but is not limited to:

1) Withholding monthly progress payments;
2) Assessing sanctions;
3) Liquidated damages; and/or
4) Disqualifying Contractor from future bidding as non-responsible.

Prompt Payment (49 CFR § 26.29) –
The prime contractor agrees to pay each subcontractor under this prime contract for satisfactory performance of its contract no later than 30 days from the receipt of each payment the prime contractor receives from City of Midland, Texas. The prime contractor agrees further to return retainage payments to each subcontractor within 30 days after the subcontractor's work is satisfactorily completed. Any delay or postponement of payment from the above-referenced time frame may occur only for good cause following written approval of the City of Midland, Texas. This clause applies to both DBE and non-DBE subcontractors.

Termination of DBE Subcontracts (49 CFR § 26.53(f)) –
The prime contractor must not terminate a DBE subcontractor listed in response to this Bid Proposal (or an approved substitute DBE firm) without prior written consent of City of Midland, Texas. This includes, but is not limited to, instances in which the prime contractor seeks to perform work originally designated for a DBE subcontractor with its own forces or those of an affiliate, a non-DBE firm, or with another DBE firm.

The prime contractor shall utilize the specific DBEs listed to perform the work and supply the materials for which each is listed unless Contractor obtains written consent City of Midland, Texas. Unless City of Midland, Texas consent is provided, the prime contractor shall not be entitled to any payment for work or material unless it is performed or supplied by the listed DBE.

City of Midland, Texas may provide such written consent only if City of Midland, Texas agrees, for reasons stated in the concurrence document, that the prime contractor has good cause to terminate the DBE firm. For purposes of this paragraph, good cause includes the circumstances listed in 49 CFR §26.53.

Before transmitting to City of Midland, Texas its request to terminate and/or substitute a DBE subcontractor, the prime contractor must give notice in writing to the DBE subcontractor, with a copy to City of Midland, Texas, of its intent to request to terminate and/or substitute, and the reason for the request.

The prime contractor must give the DBE five days to respond to the prime contractor's notice and advise City of Midland, Texas and Contractor of the reasons, if any, why it objects to the proposed termination of its subcontract and why City of Midland, Texas should not approve the prime contractor's action. If required in a particular case as a matter of public necessity (e.g., safety), City of Midland, Texas may provide a response period shorter than five days.

In addition to post-award terminations, the provisions of this section apply to preaward deletions of or substitutions for DBE firms put forward by offerors in negotiated procurements.

TEXTING WHEN DRIVING

In accordance with Executive Order 13513, "Federal Leadership on Reducing Text Messaging While Driving," (10/1/2009) and DOT Order 3902.10, "Text Messaging While Driving," (12/30/2009), the Federal Aviation Administration encourages recipients of Federal grant funds to adopt and enforce safety policies that decrease crashes by distracted drivers, including policies to ban text messaging while driving when performing work related to a grant or subgrant.

In support of this initiative, the Owner encourages Contractor to promote policies and initiatives for its employees and other work personnel that decrease crashes by distracted drivers, including policies that ban text messaging while driving motor vehicles while performing work activities associated with the project. Contractor must include the substance of this clause in all sub-tier contracts exceeding $10,000 that involve driving a motor vehicle in performance of work activities associated with the project.

PROHIBITION ON CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE SERVICES OR EQUIPMENT

Contractor and Subcontractor agree to comply with mandatory standards and policies relating to use and procurement of certain telecommunications and video surveillance services or equipment in compliance with the National Defense Authorization Act.

EQUAL OPPORTUNITY CLAUSE

During the performance of this contract, Contractor agrees as follows:

(1) Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, sexual orientation, gender identify, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff, or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) Contractor will, in all solicitations or advertisements for employees placed by or on behalf of Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

(3) Contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or

applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with Contractor's legal duty to furnish information.

(4) Contractor will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided by the agency contracting officer, advising the labor union or workers' representative of Contractor's commitments under this section 202 of Executive Order 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(5) Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(6) Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(7) In the event of Contractor's noncompliance with the nondiscrimination clauses of this contract or with any such rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and Contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(8) Contractor will include the provisions of paragraphs (1) through (8) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. Contractor will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a means of enforcing such provisions, including sanctions for noncompliance*: Provided,* however, that in the event Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction, Contractor may request the United States to enter into such litigation to protect the interests of the United States.

STANDARD FEDERAL EQUAL EMPLOYMENT OPPORTUNITY
CONSTRUCTION CONTRACT SPECIFICATIONS

1. As used in these specifications:

   a. "Covered area" means the geographical area described in the solicitation from which this contract resulted;

   b. "Director" means Director, Office of Federal Contract Compliance Programs (OFCCP), U.S. Department of Labor, or any person to whom the Director delegates authority;

c. "Employer identification number" means the Federal social security number used on the Employer's Quarterly Federal Tax Return, U.S. Treasury Department Form 941;

d. "Minority" includes:

(1) Black (all persons having origins in any of the Black African racial groups not of Hispanic origin);

(2) Hispanic (all persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race);

(3) Asian and Pacific Islander (all persons having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands); and

(4) American Indian or Alaskan native (all persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation or community identification).

2. Whenever Contractor, or any subcontractor at any tier, subcontracts a portion of the work involving any construction trade, it shall physically include in each subcontract in excess of $10,000 the provisions of these specifications and the Notice which contains the applicable goals for minority and female participation and which is set forth in the solicitations from which this contract resulted.

3. If Contractor is participating (pursuant to 41 CFR part 60-4.5) in a Hometown Plan approved by the U.S. Department of Labor in the covered area either individually or through an association, its affirmative action obligations on all work in the Plan area (including goals and timetables) shall be in accordance with that Plan for those trades which have unions participating in the Plan. Contractors must be able to demonstrate their participation in and compliance with the provisions of any such Hometown Plan. Each contractor or subcontractor participating in an approved plan is individually required to comply with its obligations under the EEO clause and to make a good faith effort to achieve each goal under the Plan in each trade in which it has employees. The overall good faith performance by other contractors or subcontractors toward a goal in an approved Plan does not excuse any covered contractor's or subcontractor's failure to take good faith efforts to achieve the Plan goals and timetables.

4. Contractor shall implement the specific affirmative action standards provided in paragraphs 7a through 7p of these specifications. The goals set forth in the solicitation from which this contract resulted are expressed as percentages of the total hours of employment and training of minority and female utilization Contractor should reasonably be able to achieve in each construction trade in which it has employees in the covered area. Covered construction contractors performing construction work in a geographical areas where they do not have a Federal or federally assisted construction contract shall apply the minority and female goals established for the geographical area where the work is being performed. Goals are published periodically in the Federal Register in notice form, and such notices may be obtained from any Office of Federal Contract Compliance Programs office or from Federal procurement contracting officers. Contractor is expected to make substantially uniform progress in meeting its goals in each craft during the period specified.

5. Neither the provisions of any collective bargaining agreement, nor the failure by a union with whom Contractor has a collective bargaining agreement, to refer either minorities or women shall excuse

Contractor's obligations under these specifications, Executive Order 11246, or the regulations promulgated pursuant thereto.

6. In order for the nonworking training hours of apprentices and trainees to be counted in meeting the goals, such apprentices and trainees must be employed by Contractor during the training period, and Contractor must have made a commitment to employ the apprentices and trainees at the completion of their training, subject to the availability of employment opportunities. Trainees must be trained pursuant to training programs approved by the U.S. Department of Labor.

7. Contractor shall take specific affirmative actions to ensure equal employment opportunity. The evaluation of Contractor's compliance with these specifications shall be based upon its effort to achieve maximum results from its actions. Contractor shall document these efforts fully, and shall implement affirmative action steps at least as extensive as the following:

a. Ensure and maintain a working environment free of harassment, intimidation, and coercion at all sites, and in all facilities at which Contractor's employees are assigned to work. Contractor, where possible, will assign two or more women to each construction project. Contractor shall specifically ensure that all foremen, superintendents, and other onsite supervisory personnel are aware of and carry out Contractor's obligation to maintain such a working environment, with specific attention to minority or female individuals working at such sites or in such facilities.

b. Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when Contractor or its unions have employment opportunities available, and maintain a record of the organizations' responses.

c. Maintain a current file of the names, addresses, and telephone numbers of each minority and female off-the-street applicant and minority or female referral from a union, a recruitment source, or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to Contractor by the union or, if referred, not employed by Contractor, this shall be documented in the file with the reason therefor, along with whatever additional actions Contractor may have taken.

d. Provide immediate written notification to the Director when the union or unions with which Contractor has a collective bargaining agreement has not referred to Contractor a minority person or woman sent by Contractor, or when Contractor has other information that the union referral process has impeded Contractor's efforts to meet its obligations.

e. Develop on-the-job training opportunities and/or participate in training programs for the area which expressly include minorities and women, including upgrading programs and apprenticeship and trainee programs relevant to Contractor's employment needs, especially those programs funded or approved by the Department of Labor. Contractor shall provide notice of these programs to the sources compiled under 7b above.

f. Disseminate Contractor's EEO policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting Contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management

personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.

g. Review, at least annually, the company's EEO policy and affirmative action obligations under these specifications with all employees having any responsibility for hiring, assignment, layoff, termination, or other employment decisions including specific review of these items with onsite supervisory personnel such superintendents, general foremen, etc., prior to the initiation of construction work at any job site. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.

h. Disseminate Contractor's EEO policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to and discussing Contractor's EEO policy with other contractors and subcontractors with whom Contractor does or anticipates doing business.

i. Direct its recruitment efforts, both oral and written, to minority, female, and community organizations, to schools with minority and female students and to minority and female recruitment and training organizations serving Contractor's recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, Contractor shall send written notification to organizations such as the above, describing the openings, screening procedures, and tests to be used in the selection process.

j. Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer, and vacation employment to minority and female youth both on the site and in other areas of a contractor's work force.

k. Validate all tests and other selection requirements where there is an obligation to do so under 41 CFR part 60-3.

l. Conduct, at least annually, an inventory and evaluation at least of all minority and female personnel, for promotional opportunities and encourage these employees to seek or to prepare for, through appropriate training, etc., such opportunities.

m. Ensure that seniority practices, job classifications, work assignments, and other personnel practices do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the EEO policy and Contractor's obligations under these specifications are being carried out.

n. Ensure that all facilities and company activities are nonsegregated except that separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.

o. Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.

p. Conduct a review, at least annually, of all supervisor's adherence to and performance under Contractor's EEO policies and affirmative action obligations.

8. Contractors are encouraged to participate in voluntary associations, which assist in fulfilling one or more of their affirmative action obligations (7a through 7p). The efforts of a contractor association, joint contractor-union, contractor-community, or other similar group of which Contractor is a member and participant may be asserted as fulfilling any one or more of its obligations under 7a through 7p of these specifications provided that Contractor actively participates in the group, makes every effort to assure that the group has a positive impact on the employment of minorities and women in the industry, ensures that the concrete benefits of the program are reflected in Contractor's minority and female workforce participation, makes a good faith effort to meet its individual goals and timetables, and can provide access to documentation which demonstrates the effectiveness of actions taken on behalf of Contractor. The obligation to comply, however, is Contractor's and failure of such a group to fulfill an obligation shall not be a defense for Contractor's noncompliance.

9. A single goal for minorities and a separate single goal for women have been established. Contractor, however, is required to provide equal employment opportunity and to take affirmative action for all minority groups, both male and female, and all women, both minority and non-minority. Consequently, Contractor may be in violation of the Executive Order if a particular group is employed in a substantially disparate manner (for example, even though Contractor has achieved its goals for women generally, Contractor may be in violation of the Executive Order if a specific minority group of women is underutilized).

10. Contractor shall not use the goals and timetables or affirmative action standards to discriminate against any person because of race, color, religion, sex, sexual orientation, gender identity, or national origin.

11. Contractor shall not enter into any subcontract with any person or firm debarred from Government contracts pursuant to Executive Order 11246.

12. Contractor shall carry out such sanctions and penalties for violation of these specifications and of the Equal Opportunity Clause, including suspension, termination, and cancellation of existing subcontracts as may be imposed or ordered pursuant to Executive Order 11246, as amended, and its implementing regulations, by the Office of Federal Contract Compliance Programs. Any contractor who fails to carry out such sanctions and penalties shall be in violation of these specifications and Executive Order 11246, as amended.

13. Contractor, in fulfilling its obligations under these specifications, shall implement specific affirmative action steps, at least as extensive as those standards prescribed in paragraph 7 of these specifications, so as to achieve maximum results from its efforts to ensure equal employment opportunity. If Contractor fails to comply with the requirements of the Executive Order, the implementing regulations, or these specifications, the Director shall proceed in accordance with 41 CFR part 60-4.8.

14. Contractor shall designate a responsible official to monitor all employment related activity to ensure that the company EEO policy is being carried out, to submit reports relating to the provisions hereof as may be required by the Government, and to keep records. Records shall at least include for each employee, the name, address, telephone numbers, construction trade, union affiliation if any, employee identification number when assigned, social security number, race, sex, status (e.g., mechanic, apprentice, trainee, helper, or laborer), dates of changes in status, hours worked per week in the indicated trade, rate of pay, and locations at which the work was performed. Records shall be maintained in an easily understandable

and retrievable form; however, to the degree that existing records satisfy this requirement, contractors shall not be required to maintain separate records.

15. Nothing herein provided shall be construed as a limitation upon the application of other laws which establish different standards of compliance or upon the application of requirements for the hiring of local or other area residents (e.g. those under the Public Works Employment Act of 1977 and the Community Development Block Grant Program).

FEDERAL FAIR LABOR STANDARDS ACT (FEDERAL MINIMUM WAGE)

All contracts and subcontracts that result from this solicitation incorporate by reference the provisions of 29 CFR part 201, et seq, the Federal Fair Labor Standards Act (FLSA), with the same force and effect as if given in full text. The FLSA sets minimum wage, overtime pay, recordkeeping, and child labor standards for full and part-time workers.

Contractor has full responsibility to monitor compliance to the referenced statute or regulation. Contractor must address any claims or disputes that arise from this requirement directly with the U.S. Department of Labor – Wage and Hour Division.

CERTIFICATION REGARDING LOBBYING

The Bidder or Offeror certifies by signing and submitting this bid or proposal, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the Bidder or Offeror, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all sub-awards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all sub-recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this

transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

PROHIBITION OF SEGREGATED FACILITIES

(a) Contractor agrees that it does not and will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not and will not permit its employees to perform their services at any location under its control where segregated facilities are maintained. Contractor agrees that a breach of this clause is a violation of the Equal Employment Opportunity clause in this contract.

(b) "Segregated facilities," as used in this clause, means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees that are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, sex, sexual orientation, gender identity, or national origin because of written or oral policies or employee custom. The term does not include separate or single-user rest rooms or necessary dressing or sleeping areas provided to assure privacy between the sexes.

(c) Contractor shall include this clause in every subcontract and purchase order that is subject to the Equal Employment Opportunity clause of this contract.

OCCUPATIONAL SAFETY AND HEALTH ACT OF 1970

All contracts and subcontracts that result from this solicitation incorporate by reference the requirements of 29 CFR Part 1910 with the same force and effect as if given in full text. The employer must provide a work environment that is free from recognized hazards that may cause death or serious physical harm to the employee. The employer retains full responsibility to monitor its compliance and their subcontractor's compliance with the applicable requirements of the Occupational Safety and Health Act of 1970 (29 CFR Part 1910). The employer must address any claims or disputes that pertain to a referenced requirement directly with the U.S. Department of Labor – Occupational Safety and Health Administration.

PROCUREMENT OF RECOVERED MATERIALS

Contractor and subcontractor agree to comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, and the regulatory provisions of 40 CFR Part 247. In the performance of this contract and to the extent practicable, Contractor and subcontractors are to use products containing the highest percentage of recovered materials for items designated by the Environmental Protection Agency (EPA) under 40 CFR Part 247 whenever:

1) The contract requires procurement of $10,000 or more of a designated item during the fiscal year; or

2) Contractor has procured $10,000 or more of a designated item using Federal funding during the previous fiscal year.

The list of EPA-designated items is available at www.epa.gov/smm/comprehensive-procurement-guidelines-construction-products.

Section 6002(c) establishes exceptions to the preference for recovery of EPA-designated products if Contractor can demonstrate the item is:

a) Not reasonably available within a timeframe providing for compliance with the contract performance schedule;
b) Fails to meet reasonable contract performance requirements; or
c) Is only available at an unreasonable price.

CERTIFICATION OF OFFEROR/BIDDER REGARDING TAX DELINQUENCY AND FELONY CONVICTIONS

The applicant must complete the following two certification statements. The applicant must indicate its current status as it relates to tax delinquency and felony conviction by inserting a checkmark (✓) in the space following the applicable response. The applicant agrees that, if awarded a contract resulting from this solicitation, it will incorporate this provision for certification in all lower tier subcontracts.

Certifications

1) The applicant represents that it is ( ) is not ( ) a corporation that has any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability.

2) The applicant represents that it is ( ) is not ( ) a corporation that was convicted of a criminal violation under any Federal law within the preceding 24 months.

Note

If an applicant responds in the affirmative to either of the above representations, the applicant is ineligible to receive an award unless the Sponsor has received notification from the agency suspension and debarment official (SDO) that the SDO has considered suspension or debarment and determined that further action is not required to protect the Government's interests. The applicant therefore must provide information to the owner about its tax liability or conviction to the Owner, who will then notify the FAA Airports District Office, which will then notify the agency's SDO to facilitate completion of the required considerations before award decisions are made.

Term Definitions

> **Felony conviction:** Felony conviction means a conviction within the preceding twenty four (24) months of a felony criminal violation under any Federal law and includes conviction of an offense defined in a section of the U.S. Code that specifically classifies the offense as a felony and conviction of an offense that is classified as a felony under 18 USC § 3559.

Tax Delinquency: A tax delinquency is any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted, or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability.

TERMINATION FOR CONVENIENCE (CONSTRUCTION & EQUIPMENT CONTRACTS)

The Owner may terminate this contract in whole or in part at any time by providing written notice to Contractor. Such action may be without cause and without prejudice to any other right or remedy of Owner. Upon receipt of a written notice of termination, except as explicitly directed by the Owner, Contractor shall immediately proceed with the following obligations regardless of any delay in determining or adjusting amounts due under this clause:

1. Contractor must immediately discontinue work as specified in the written notice.
2. Terminate all subcontracts to the extent they relate to the work terminated under the notice.
3. Discontinue orders for materials and services except as directed by the written notice.
4. Deliver to the Owner all fabricated and partially fabricated parts, completed and partially completed work, supplies, equipment and materials acquired prior to termination of the work, and as directed in the written notice.
5. Complete performance of the work not terminated by the notice.
6. Take action as directed by the Owner to protect and preserve property and work related to this contract that Owner will take possession.

Owner agrees to pay Contractor for:

1. Completed and acceptable work executed in accordance with the contract documents prior to the effective date of termination;
2. Documented expenses sustained prior to the effective date of termination in performing work and furnishing labor, materials, or equipment as required by the contract documents in connection with uncompleted work;
3. Reasonable and substantiated claims, costs, and damages incurred in settlement of terminated contracts with Subcontractors and Suppliers; and
4. Reasonable and substantiated expenses to Contractor directly attributable to Owner's termination action.

Owner will not pay Contractor for loss of anticipated profits or revenue or other economic loss arising out of or resulting from the Owner's termination action.

The rights and remedies this clause provides are in addition to any other rights and remedies provided by law or under this contract.

TERMINATION FOR CAUSE (CONSTRUCTION)

Section 80-09 of FAA Advisory Circular 150/5370-10 establishes standard language for conditions, rights, and remedies associated with Owner termination of this contract for cause due to default of Contractor.

TRADE RESTRICTION CERTIFICATION

By submission of an offer, the Offeror certifies that with respect to this solicitation and any resultant contract, the Offeror –

1) is not owned or controlled by one or more citizens of a foreign country included in the list of countries that discriminate against U.S. firms as published by the Office of the United States Trade Representative (USTR);

2) has not knowingly entered into any contract or subcontract for this project with a person that is a citizen or national of a foreign country included on the list of countries that discriminate against U.S. firms as published by the USTR; and

3) has not entered into any subcontract for any product to be used on the Federal project that is produced in a foreign country included on the list of countries that discriminate against U.S. firms published by the USTR.

This certification concerns a matter within the jurisdiction of an agency of the United States of America and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under Title 18 USC § 1001.

The Offeror/Contractor must provide immediate written notice to the Owner if the Offeror/Contractor learns that its certification or that of a subcontractor was erroneous when submitted or has become erroneous by reason of changed circumstances. Contractor must require subcontractors provide immediate written notice to Contractor if at any time it learns that its certification was erroneous by reason of changed circumstances.

Unless the restrictions of this clause are waived by the Secretary of Transportation in accordance with 49 CFR § 30.17, no contract shall be awarded to an Offeror or subcontractor:

1) who is owned or controlled by one or more citizens or nationals of a foreign country included on the list of countries that discriminate against U.S. firms published by the USTR; or
2) whose subcontractors are owned or controlled by one or more citizens or nationals of a foreign country on such USTR list; or
3) who incorporates in the public works project any product of a foreign country on such USTR list.

Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by this provision. The knowledge and information of a contractor is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

The Offeror agrees that, if awarded a contract resulting from this solicitation, it will incorporate this provision for certification without modification in all lower tier subcontracts. Contractor may rely on the certification of a prospective subcontractor that it is not a firm from a foreign country included on the list of countries that discriminate against U.S. firms as published by USTR, unless the Offeror has knowledge that the certification is erroneous.

This certification is a material representation of fact upon which reliance was placed when making an award. If it is later determined that Contractor or subcontractor knowingly rendered an erroneous certification, the Federal Aviation Administration (FAA) may direct through the Owner cancellation of the contract or subcontract for default at no cost to the Owner or the FAA.

VETERAN'S PREFERENCE

In the employment of labor (excluding executive, administrative, and supervisory positions), Contractor and all sub-tier contractors must give preference to covered veterans as defined within Title 49 United States Code Section 47112. Covered veterans include Vietnam-era veterans, Persian Gulf veterans, Afghanistan-Iraq war veterans, disabled veterans, and small business concerns (as defined by 15 USC § 632) owned and controlled by disabled veterans. This preference only applies when there are covered veterans readily available and qualified to perform the work to which the employment relates.

CERTIFICATION REGARDING DOMESTIC PREFERENCES FOR PROCUREMENTS

The Bidder or Offeror certifies by signing and submitting this bid or proposal that, to the greatest extent practicable, the Bidder or Offeror has provided a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including, but not limited to, iron, aluminum, steel, cement, and other manufactured products) in compliance with 2 CFR § 200.322.

"General Decision Number: TX20230002 01/06/2023

Superseded General Decision Number: TX20220002

State: Texas

Construction Types: Heavy and Highway

Counties: Armstrong, Carson, Crosby, Ector, Irion, Lubbock, Midland, Potter, Randall, Taylor and Tom Green Counties in Texas.

HEAVY & HIGHWAY CONSTRUCTION PROJECTS

Note: Contracts subject to the Davis-Bacon Act are generally required to pay at least the applicable minimum wage rate required under Executive Order 14026 or Executive Order 13658. Please note that these Executive Orders apply to covered contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but do not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(2)-(60).

If the contract is entered into on or after January 30, 2022, or the contract is renewed or extended (e.g., an option is exercised) on or after January 30, 2022:	. Executive Order 14026 generally applies to the contract. . The contractor must pay all covered workers at least $16.20 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in 2023.
If the contract was awarded on or between January 1, 2015 and January 29, 2022, and the contract is not renewed or extended on or after January 30, 2022:	. Executive Order 13658 generally applies to the contract. . The contractor must pay all covered workers at least $12.15 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on that contract in 2023.

The applicable Executive Order minimum wage rate will be adjusted annually. If this contract is covered by one of the Executive Orders and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must still submit a conformance request.

Additional information on contractor requirements and worker protections under the Executive Orders is available at http://www.dol.gov/whd/govcontracts.

** Workers in this classification may be entitled to a higher
minimum wage under Executive Order 14026 ($16.20) or 13658
($12.15).  Please see the Note at the top of the wage
determination for more information.

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave
for Federal Contractors applies to all contracts subject to the
Davis-Bacon Act for which the contract is awarded (and any
solicitation was issued) on or after January 1, 2017.  If this
contract is covered by the EO, the contractor must provide
employees with 1 hour of paid sick leave for every 30 hours
they work, up to 56 hours of paid sick leave each year.
Employees must be permitted to use paid sick leave for their
own illness, injury or other health-related needs, including
preventive care; to assist a family member (or person who is
like family to the employee) who is ill, injured, or has other
health-related needs, including preventive care; or for reasons
resulting from, or to assist a family member (or person who is
like family to the employee) who is a victim of, domestic
violence, sexual assault, or stalking.  Additional information
on contractor requirements and worker protections under the EO
is available at
```

https://www.dol.gov/agencies/whd/government-contracts.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average

calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

* an existing published wage determination
* a survey underlying a wage determination
* a Wage and Hour Division letter setting forth a position on a wage determination matter
* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal

process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

==========

END OF GENERAL DECISIO"

TECHNICAL SPECIFICATIONS

Part 1 – General Contract Provisions

Section 10 Definition of Terms

When the following terms are used in these Specifications, in the contract, or in any documents or other instruments pertaining to construction where these Specifications govern, the intent and meaning shall be defined as follows:

Paragraph Number	Term	Definition
10-01	**AASHTO**	The American Association of State Highway and Transportation Officials.
10-02	**Access Road**	The right-of-way, the roadway and all improvements constructed thereon connecting the airport to a public roadway.
10-03	**Advertisement**	A public announcement, as required by local law, inviting bids for work to be performed and materials to be furnished.
10-04	**Airport**	Airport means an area of land or water which is used or intended to be used for the landing and takeoff of aircraft; an appurtenant area used or intended to be used for airport buildings or other airport facilities or rights of way; airport buildings and facilities located in any of these areas, and a heliport.
10-05	**Airport Improvement Program (AIP)**	A grant-in-aid program, administered by the Federal Aviation Administration (FAA).
10-06	**Air Operations Area (AOA)**	The term air operations area (AOA) shall mean any area of the airport used or intended to be used for the landing, takeoff, or surface maneuvering of aircraft. An air operation area shall include such paved or unpaved areas that are used or intended to be used for the unobstructed movement of aircraft in addition to its associated runway, taxiway, or apron.
10-07	**Apron**	Area where aircraft are parked, unloaded or loaded, fueled and/or serviced.
10-08	**ASTM International (ASTM)**	Formerly known as the American Society for Testing and Materials (ASTM).
10-09	**Award**	Owner's notice to the successful Bidder of the acceptance of the submitted bid.
10-10	**Bidder**	Any individual, partnership, firm, or corporation, acting directly or through a duly authorized representative, who submits a proposal for the work contemplated.

Paragraph Number	Term	Definition
10-11	**Building Area**	An area on the airport to be used, considered, or intended to be used for airport buildings or other airport facilities or rights-of-way together with all airport buildings and facilities located thereon.
10-12	**Calendar Day**	Every day shown on the calendar.
10-13	**Certificate of Analysis (COA)**	The COA is the manufacturer's Certificate of Compliance (COC) including all applicable test results required by the specifications.
10-14	**Certificate of Compliance (COC)**	The manufacturer's certification stating that materials or assemblies furnished fully comply with the requirements of the contract. The certificate shall be signed by the manufacturer's authorized representative.
10-15	**Change Order**	A written order to Contractor covering changes in the plans, specifications, or proposal quantities and establishing the basis of payment and contract time adjustment, if any, for work within the scope of the contract and necessary to complete the project.
10-16	**Contract**	A written agreement between Owner and Contractor that establishes the obligations of the parties including but not limited to performance of work, furnishing of labor, equipment and materials and the basis of payment. The awarded contract includes but may not be limited to: Advertisement, Contract form, Proposal, Performance bond, payment bond, General provisions, certifications and representations, Technical Specifications, Plans, Supplemental Provisions, standards incorporated by reference and issued addenda.
10-17	**Contract Item (Pay Item)**	A specific unit of work for which a price is provided in the contract.
10-18	**Contract Time**	The number of calendar days or working days, stated in the proposal, allowed for completion of the contract, including authorized time extensions. If a calendar date of completion is stated in the proposal, in lieu of a number of calendar or working days, the contract shall be completed by that date.
10-19	**Contractor**	The individual, partnership, firm, or corporation primarily liable for the acceptable performance of the work contracted and for the payment of all legal debts pertaining to the work who acts directly or through lawful agents or employees to complete the contract work.
10-20	**Contractors Quality Control (QC) Facilities**	Contractor's QC facilities in accordance with Contractor Quality Control Program (CQCP).

Paragraph Number	Term	Definition
10-21	**Contractor Quality Control Program (CQCP)**	Details the methods and procedures that will be taken to assure that all materials and completed construction required by the contract conform to contract plans, technical specifications and other requirements, whether manufactured by Contractor, or procured from subcontractors or vendors.
10-22	**Control Strip**	A demonstration by Contractor that the materials, equipment, and construction processes results in a product meeting the requirements of the specification.
10-23	**Construction Safety and Phasing Plan (CSPP)**	The overall plan for safety and phasing of a construction project developed by the airport operator, or developed by the airport operator's consultant and approved by the airport operator. It is included in the invitation for bids and becomes part of the project specifications.
10-24	**Drainage System**	The system of pipes, ditches, and structures by which surface or subsurface waters are collected and conducted from the airport area.
10-25	**Engineer**	The individual, partnership, firm, or corporation duly authorized by Owner to be responsible for engineering, inspection, and/or observation of the contract work and acting directly or through an authorized representative.
10-26	**Equipment**	All machinery, together with the necessary supplies for upkeep and maintenance; and all tools and apparatus necessary for the proper construction and acceptable completion of the work.
10-27	**Extra Work**	An item of work not provided for in the awarded contract as previously modified by change order or supplemental agreement, but which is found by Owner's Engineer or Resident Project Representative (RPR) to be necessary to complete the work within the intended scope of the contract as previously modified.
10-28	**FAA**	The Federal Aviation Administration. When used to designate a person, FAA shall mean the Administrator or their duly authorized representative.
10-29	**Federal Specifications**	The federal specifications and standards, commercial item descriptions, and supplements, amendments, and indices prepared and issued by the General Services Administration.

Paragraph Number	Term	Definition
10-30	**Force Account**	**a.** Contract Force Account - A method of payment that addresses extra work performed by Contractor on a time and material basis. **b.** Owner Force Account - Work performed for the project by Owner's employees.
10-31	**Intention of Terms**	Whenever, in these Specifications or on the plans, the words "directed," "required," "permitted," "ordered," "designated," "prescribed," or words of like import are used, it shall be understood that the direction, requirement, permission, order, designation, or prescription of Engineer and/or Resident Project Representative (RPR) is intended; and similarly, the words "approved," "acceptable," "satisfactory," or words of like import, shall mean approved by, or acceptable to, or satisfactory to Engineer and/or RPR, subject in each case to the final determination of Owner. Any reference to a specific requirement of a numbered paragraph of the contract specifications or a cited standard shall be interpreted to include all general requirements of the entire section, specification item, or cited standard that may be pertinent to such specific reference.
10-32	**Lighting**	A system of fixtures providing or controlling the light sources used on or near the airport or within the airport buildings. The field lighting includes all luminous signals, markers, floodlights, and illuminating devices used on or near the airport or to aid in the operation of aircraft landing at, taking off from, or taxiing on the airport surface.
10-33	**Major and Minor Contract Items**	A major contract item shall be any item that is listed in the proposal, the total cost of which is equal to or greater than 20% of the total amount of the award contract. All other items shall be considered minor contract items.
10-34	**Materials**	Any substance specified for use in the construction of the contract work.
10-35	**Modification of Standards (MOS)**	Any deviation from standard specifications applicable to material and construction methods in accordance with FAA Order 5300.1.
10-36	**Notice to Proceed (NTP)**	A written notice to Contractor to begin the actual contract work on a previously agreed to date. If applicable, the Notice to Proceed shall state the date on which the contract time begins.
10-37	**Owner**	The term "Owner" shall mean the party of the first part or the contracting agency signatory to the contract. Where the term "Owner" is capitalized in this document, it shall mean airport Sponsor only. Owner for this project is **Midland International Air & Space Port**.

Paragraph Number	Term	Definition
10-38	Passenger Facility Charge (PFC)	Per 14 Code of Federal Regulations (CFR) Part 158 and 49 United States Code (USC) § 40117, a PFC is a charge imposed by a public agency on passengers enplaned at a commercial service airport it controls.
10-39	**Pavement Structure**	The combined surface course, base course(s), and subbase course(s), if any, considered as a single unit.
10-40	**Payment bond**	The approved form of security furnished by Contractor and their own surety as a guaranty that Contractor will pay in full all bills and accounts for materials and labor used in the construction of the work.
10-41	**Performance bond**	The approved form of security furnished by Contractor and their own surety as a guaranty that Contractor will complete the work in accordance with the terms of the contract.
10-42	**Plans**	The official drawings or exact reproductions which show the location, character, dimensions and details of the airport and the work to be done and which are to be considered as a part of the contract, supplementary to the specifications. Plans may also be referred to as 'Contract Drawings.'
10-43	**Project**	The agreed scope of work for accomplishing specific airport development with respect to a particular airport.
10-44	**Proposal**	The written offer of the Bidder (when submitted on the approved proposal form) to perform the contemplated work and furnish the necessary materials in accordance with the provisions of the plans and specifications.
10-45	**Proposal guaranty**	The security furnished with a proposal to guarantee that the Bidder will enter into a contract if their own proposal is accepted by Owner.
10-46	**Quality Assurance (QA)**	Owner's responsibility to assure that construction work completed complies with specifications for payment.
10-47	**Quality Control (QC)**	Contractor's responsibility to control material(s) and construction processes to complete construction in accordance with project specifications.
10-48	**Quality Assurance (QA) Inspector**	An authorized representative of Engineer and/or Resident Project Representative (RPR) assigned to make all necessary inspections, observations, tests, and/or observation of tests of the work performed or being performed, or of the materials furnished or being furnished by Contractor.

Paragraph Number	Term	Definition
10-49	**Quality Assurance (QA) Laboratory**	The official quality assurance testing laboratories of Owner or such other laboratories as may be designated by Engineer or RPR. May also be referred to as Engineer's, Owner's, or QA Laboratory.
10-50	**Resident Project Representative (RPR)**	The individual, partnership, firm, or corporation duly authorized by Owner to be responsible for all necessary inspections, observations, tests, and/or observations of tests of the contract work performed or being performed, or of the materials furnished or being furnished by Contractor, and acting directly or through an authorized representative.
10-51	**Runway**	The area on the airport prepared for the landing and takeoff of aircraft.
10-52	**Runway Safety Area (RSA)**	A defined surface surrounding the runway prepared or suitable for reducing the risk of damage to aircraft. See the construction safety and phasing plan (CSPP) for limits of the RSA.
10-53	**Safety Plan Compliance Document (SPCD)**	Details how Contractor will comply with the CSPP.
10-54	**Specifications**	A part of the contract containing the written directions and requirements for completing the contract work. Standards for specifying materials or testing which are cited in the contract specifications by reference shall have the same force and effect as if included in the contract physically.
10-55	**Sponsor**	A Sponsor is defined in 49 USC § 47102(24) as a public agency that submits to the FAA for an AIP grant; or a private Owner of a public-use airport that submits to the FAA an application for an AIP grant for the airport.
10-56	**Structures**	Airport facilities such as bridges; culverts; catch basins, inlets, retaining walls, cribbing; storm and sanitary sewer lines; water lines; underdrains; electrical ducts, manholes, handholes, lighting fixtures and bases; transformers; navigational aids; buildings; vaults; and, other manmade features of the airport that may be encountered in the work and not otherwise classified herein.
10-57	**Subgrade**	The soil that forms the pavement foundation.
10-58	**Superintendent**	Contractor's executive representative who is present on the work during progress, authorized to receive and fulfill instructions from the RPR, and who shall supervise and direct the construction.

Paragraph Number	Term	Definition
10-59	**Supplemental Agreement**	A written agreement between Contractor and Owner that establishes the basis of payment and contract time adjustment, if any, for the work affected by the supplemental agreement. A supplemental agreement is required if: (1) in-scope work would increase or decrease the total amount of the awarded contract by more than 25%: (2) in-scope work would increase or decrease the total of any major contract item by more than 25%; (3) work that is not within the scope of the originally awarded contract; or (4) adding or deleting of a major contract item.
10-60	**Surety**	The corporation, partnership, or individual, other than Contractor, executing payment or performance bonds that are furnished to Owner by Contractor.
10-61	**Taxilane**	A taxiway designed for low-speed movement of aircraft between aircraft parking areas and terminal areas.
10-62	**Taxiway**	The portion of the air operations area of an airport that has been designated by competent airport authority for movement of aircraft to and from the airport's runways, aircraft parking areas, and terminal areas.
10-63	**Taxiway/Taxilane Safety Area (TSA)**	A defined surface alongside the taxiway prepared or suitable for reducing the risk of damage to an aircraft. See the construction safety and phasing plan (CSPP) for limits of the TSA.
10-64	**Work**	The furnishing of all labor, materials, tools, equipment, and incidentals necessary or convenient to Contractor's performance of all duties and obligations imposed by the contract, plans, and specifications.
10-65	**Working day**	A working day shall be any day other than a legal holiday, Saturday, or Sunday on which the normal working forces of Contractor may proceed with regular work for at least six (6) hours toward completion of the contract. When work is suspended for causes beyond Contractor's control, it will not be counted as a working day. Saturdays, Sundays and holidays on which Contractor's forces engage in regular work will be considered as working days.
10-66	**Owner Defined terms**	**None**

END OF SECTION 10

Section 20 Proposal Requirements and Conditions

20-01 Advertisement (Notice to Bidders). Project Advertisement and Instruction to Bidders may be found in Sections A-1 and IB-1, respectively, of the front end portion of the Project Manual.

20-02 Qualification of Bidders. Each Bidder shall submit evidence of competency and evidence of financial responsibility to perform the work to Owner at the time of bid opening.

Evidence of competency, unless otherwise specified, shall consist of statements covering the Bidder's past experience on similar work, and a list of equipment and a list of key personnel that would be available for the work.

Each Bidder shall furnish Owner satisfactory evidence of their financial responsibility. Evidence of financial responsibility, unless otherwise specified, shall consist of a confidential statement or report of the Bidder's financial resources and liabilities as of the last calendar year or the Bidder's last fiscal year. Such statements or reports shall be certified by a public accountant. At the time of submitting such financial statements or reports, the Bidder shall further certify whether their financial responsibility is approximately the same as stated or reported by the public accountant. If the Bidder's financial responsibility has changed, the Bidder shall qualify the public accountant's statement or report to reflect the Bidder's true financial condition at the time such qualified statement or report is submitted to Owner.

Unless otherwise specified, a Bidder may submit evidence that they are prequalified with the State Highway Division and are on the current "Bidder's list" of the state in which the proposed work is located. Evidence of State Highway Division prequalification may be submitted as evidence of financial responsibility in lieu of the certified statements or reports specified above.

20-03 Contents of proposal forms. Owner's proposal forms state the location and description of the proposed construction; the place, date, and time of opening of the proposals; and the estimated quantities of the various items of work to be performed and materials to be furnished for which unit bid prices are asked. The proposal form states the time in which the work must be completed, and the amount of the proposal guaranty that must accompany the proposal. Owner will accept only those Proposals properly executed on physical forms or electronic forms provided by Owner. Bidder actions that may cause Owner to deem a proposal irregular are given in paragraph 20-09 *Irregular proposals*.

Mobilization is limited to 10 percent of the total project cost.

A prebid conference is required on this project to discuss as a minimum, the following items: material requirements; submittals; Quality Control/Quality Assurance requirements; the construction safety and phasing plan including airport access and staging areas; and unique airfield paving construction requirements. See Section IB-2 – Instruction to Bidders for location and time of meeting.

20-04 Issuance of proposal forms. Owner reserves the right to refuse to issue a proposal form to a prospective Bidder if the Bidder is in default for any of the following reasons:

a. Failure to comply with any prequalification regulations of Owner, if such regulations are cited, or otherwise included, in the proposal as a requirement for bidding.

b. Failure to pay, or satisfactorily settle, all bills due for labor and materials on former contracts in force with Owner at the time Owner issues the proposal to a prospective Bidder.

c. Documented record of Contractor default under previous contracts with Owner.

d. Documented record of unsatisfactory work on previous contracts with Owner.

20-05 Interpretation of estimated proposal quantities. An estimate of quantities of work to be done and materials to be furnished under these Specifications is given in the proposal. It is the result of careful calculations and is believed to be correct. It is given only as a basis for comparison of proposals and the award of the contract. Owner does not expressly, or by implication, agree that the actual quantities involved will correspond exactly therewith; nor shall the Bidder plead misunderstanding or deception because of such estimates of quantities, or of the character, location, or other conditions pertaining to the work. Payment to Contractor will be made only for the actual quantities of work performed or materials furnished in accordance with the plans and specifications. It is understood that the quantities may be increased or decreased as provided in the Section 40, paragraph 40-02, Alteration of Work and Quantities, without in any way invalidating the unit bid prices.

20-06 Examination of plans, specifications, and site. The Bidder is expected to carefully examine the site of the proposed work, the proposal, plans, specifications, and contract forms. Bidders shall satisfy themselves to the character, quality, and quantities of work to be performed, materials to be furnished, and to the requirements of the proposed contract. The submission of a proposal shall be prima facie evidence that the Bidder has made such examination and is satisfied to the conditions to be encountered in performing the work and the requirements of the proposed contract, plans, and specifications.

20-07 Preparation of proposal. The Bidder shall submit their proposal on the forms furnished by Owner. All blank spaces in the proposal forms, unless explicitly stated otherwise, must be correctly filled in where indicated for each and every item for which a quantity is given. The Bidder shall state the price (written in ink or typed) both in words and numerals which they propose for each pay item furnished in the proposal. In case of conflict between words and numerals, the words, unless obviously incorrect, shall govern.

The Bidder shall correctly sign the proposal in ink. If the proposal is made by an individual, their name and post office address must be shown. If made by a partnership, the name and post office address of each member of the partnership must be shown. If made by a corporation, the person signing the proposal shall give the name of the state where the corporation was chartered and the name, titles, and business address of the president, secretary, and the treasurer. Anyone signing a proposal as an agent shall file evidence of their authority to do so and that the signature is binding upon the firm or corporation.

20-08 Responsive and responsible Bidder. A responsive bid conforms to all significant terms and conditions contained in Owner's invitation for bid. It is Owner's responsibility to decide if the exceptions taken by a Bidder to the solicitation are material or not and the extent of deviation it is willing to accept.

A responsible Bidder has the ability to perform successfully under the terms and conditions of a proposed procurement, as defined in 2 CFR § 200.318(h). This includes such matters as Contractor integrity, compliance with public policy, record of past performance, and financial and technical resources.

20-09 Irregular proposals. Proposals shall be considered irregular for the following reasons:

a. If the proposal is on a form other than that furnished by Owner, or if Owner's form is altered, or if any part of the proposal form is detached.

b. If there are unauthorized additions, conditional or alternate pay items, or irregularities of any kind that make the proposal incomplete, indefinite, or otherwise ambiguous.

c. If the proposal does not contain a unit price for each pay item listed in the proposal, except in the case of authorized alternate pay items, for which the Bidder is not required to furnish a unit price.

d. If the proposal contains unit prices that are obviously unbalanced.

e. If the proposal is not accompanied by the proposal guaranty specified by Owner.

f. If the applicable Disadvantaged Business Enterprise information is incomplete.

Owner reserves the right to reject any irregular proposal and the right to waive technicalities if such waiver is in the best interest of Owner and conforms to local laws and ordinances pertaining to the letting of construction contracts.

20-10 Bid guarantee. Each separate proposal shall be accompanied by a bid bond, certified check, or other specified acceptable collateral, in the amount specified in the proposal form. Such bond, check, or collateral, shall be made payable to Owner.

20-11 Delivery of proposal. Each proposal submitted shall be placed in a sealed envelope plainly marked with the project number, location of airport, and name and business address of the Bidder on the outside. When sent by mail, preferably registered, the sealed proposal, marked as indicated above, should be enclosed in an additional envelope. No proposal will be considered unless received at the place specified in the advertisement or as modified by Addendum before the time specified for opening all bids. Proposals received after the bid opening time shall be returned to the Bidder unopened.

20-12 Withdrawal or revision of proposals. A Bidder may withdraw or revise (by withdrawal of one proposal and submission of another) a proposal provided that the Bidder's request for withdrawal is received by Owner in writing before the time specified for opening bids. Revised proposals must be received at the place specified in the advertisement before the time specified for opening all bids.

20-13 Public opening of proposals. Proposals shall be opened, and read, publicly at the time and place specified in the advertisement. Bidders, their authorized agents, and other interested persons are invited to attend. Proposals that have been withdrawn (by written or telegraphic request) or received after the time specified for opening bids shall be returned to the Bidder unopened.

20-14 Disqualification of Bidders. A Bidder shall be considered disqualified for any of the following reasons:

a. Submitting more than one proposal from the same partnership, firm, or corporation under the same or different name.

b. Evidence of collusion among Bidders. Bidders participating in such collusion shall be disqualified as Bidders for any future work of Owner until any such participating Bidder has been reinstated by Owner as a qualified Bidder.

c. If the Bidder is considered to be in "default" for any reason specified in paragraph 20-04, *Issuance of Proposal Forms,* of this section.

20-15 Discrepancies and Omissions. A Bidder who discovers discrepancies or omissions with the project bid documents shall immediately notify Owner's Engineer of the matter. A Bidder that has doubt as to the true meaning of a project requirement may submit to Owner's Engineer a written request for interpretation no later than **three** days prior to bid opening.

Any interpretation of the project bid documents by Owner's Engineer will be by written addendum issued by Owner. Owner will not consider any instructions, clarifications or interpretations of the bidding documents in any manner other than written addendum.

END OF SECTION 20

Page Intentionally Blank

PACKET 9.129 July 11, 2023

Section 30 Award and Execution of Contract

30-01 Consideration of proposals. After the proposals are publicly opened and read, they will be compared on the basis of the summation of the products obtained by multiplying the estimated quantities shown in the proposal by the unit bid prices. If a Bidder's proposal contains a discrepancy between unit bid prices written in words and unit bid prices written in numbers, the unit bid price written in words shall govern.

Until the award of a contract is made, Owner reserves the right to reject a Bidder's proposal for any of the following reasons:

a. If the proposal is irregular as specified in Section 20, paragraph 20-09, *Irregular Proposals*.

b. If the Bidder is disqualified for any of the reasons specified Section 20, paragraph 20-14, *Disqualification of Bidders*.

In addition, until the award of a contract is made, Owner reserves the right to reject any or all proposals, waive technicalities, if such waiver is in the best interest of Owner and is in conformance with applicable state and local laws or regulations pertaining to the letting of construction contracts; advertise for new proposals; or proceed with the work otherwise. All such actions shall promote Owner's best interests.

30-02 Award of contract. The award of a contract, if it is to be awarded, shall be made within **90** calendar days of the date specified for publicly opening proposals, unless otherwise specified herein.

If Owner elects to proceed with an award of contract, Owner will make award to the responsible Bidder whose bid, conforming with all the material terms and conditions of the bid documents, is the lowest in price.

30-03 Cancellation of award. Owner reserves the right to cancel the award without liability to the Bidder, except return of proposal guaranty, at any time before a contract has been fully executed by all parties and is approved by Owner in accordance with paragraph 30-07 *Approval of Contract*.

30-04 Return of proposal guaranty. All proposal guaranties, except those of the two lowest Bidders, will be returned immediately after Owner has made a comparison of bids as specified in the paragraph 30-01, *Consideration of Proposals.* Proposal guaranties of the two lowest Bidders will be retained by Owner until such time as an award is made, at which time, the unsuccessful Bidder's proposal guaranty will be returned. The successful Bidder's proposal guaranty will be returned as soon as Owner receives the contract bonds as specified in paragraph 30-05, *Requirements of Contract Bonds.*

30-05 Requirements of contract bonds. At the time of the execution of the contract, the successful Bidder shall furnish Owner a surety bond or bonds that have been fully executed by the Bidder and the surety guaranteeing the performance of the work and the payment of all legal debts that may be incurred by reason of Contractor's performance of the work. The surety and the form of the bond or bonds shall be acceptable to Owner. Unless otherwise specified in this subsection, the surety bond or bonds shall be in a sum equal to the full amount of the contract.

30-06 Execution of contract. The successful Bidder shall sign (execute) the necessary agreements for entering into the contract and return the signed contract to Owner, along with the fully executed surety bond or bonds specified in paragraph 30-05, *Requirements of Contract Bonds,* of this section, within **10** calendar days from the date mailed or otherwise delivered to the successful Bidder.

30-07 Approval of contract. Upon receipt of the contract and contract bond or bonds that have been executed by the successful Bidder, Owner shall complete the execution of the contract in accordance with

local laws or ordinances, and return the fully executed contract to Contractor. Delivery of the fully executed contract to Contractor shall constitute Owner's approval to be bound by the successful Bidder's proposal and the terms of the contract.

30-08 Failure to execute contract. Failure of the successful Bidder to execute the contract and furnish an acceptable surety bond or bonds within the period specified in paragraph 30-06, *Execution of Contract,* of this section shall be just cause for cancellation of the award and forfeiture of the proposal guaranty, not as a penalty, but as liquidated damages to Owner.

END OF SECTION 30

Page Intentionally Blank

Section 40 Scope of Work

40-01 Intent of contract. The intent of the contract is to provide for construction and completion, in every detail, of the work described. It is further intended that Contractor shall furnish all labor, materials, equipment, tools, transportation, and supplies required to complete the work in accordance with the plans, specifications, and terms of the contract.

40-02 Alteration of work and quantities. Owner reserves the right to make such changes in quantities and work as may be necessary or desirable to complete, in a satisfactory manner, the original intended work. Unless otherwise specified in the Contract, Owner's Engineer or RPR shall be and is hereby authorized to make, in writing, such in-scope alterations in the work and variation of quantities as may be necessary to complete the work, provided such action does not represent a significant change in the character of the work.

For purpose of this section, a significant change in character of work means: any change that is outside the current contract scope of work; any change (increase or decrease) in the total contract cost by more than 25%; or any change in the total cost of a major contract item by more than 25%.

Work alterations and quantity variances that do not meet the definition of significant change in character of work shall not invalidate the contract nor release the surety. Contractor agrees to accept payment for such work alterations and quantity variances in accordance with Section 90, paragraph 90-03, *Compensation for Altered Quantities*.

Should the value of altered work or quantity variance meet the criteria for significant change in character of work, such altered work and quantity variance shall be covered by a supplemental agreement. Supplemental agreements shall also require consent of Contractor's surety and separate performance and payment bonds. If Owner and Contractor are unable to agree on a unit adjustment for any contract item that requires a supplemental agreement, Owner reserves the right to terminate the contract with respect to the item and make other arrangements for its completion.

40-03 Omitted items. Owner, Owner's Engineer or the RPR may provide written notice to Contractor to omit from the work any contract item that does not meet the definition of major contract item. Major contract items may be omitted by a supplemental agreement. Such omission of contract items shall not invalidate any other contract provision or requirement.

Should a contract item be omitted or otherwise ordered to be non-performed, Contractor shall be paid for all work performed toward completion of such item prior to the date of the order to omit such item. Payment for work performed shall be in accordance with Section 90, paragraph 90-04, *Payment for Omitted Items*.

40-04 Extra work. Should acceptable completion of the contract require Contractor to perform an item of work not provided for in the awarded contract as previously modified by change order or supplemental agreement, Owner may issue a Change Order to cover the necessary extra work. Change orders for extra work shall contain agreed unit prices for performing the change order work in accordance with the requirements specified in the order, and shall contain any adjustment to the contract time that, in the RPR's opinion, is necessary for completion of the extra work.

When determined by the RPR to be in Owner's best interest, the RPR may order Contractor to proceed with extra work as provided in Section 90, paragraph 90-05, *Payment for Extra Work*. Extra work that is necessary for acceptable completion of the project, but is not within the general scope of the work covered

by the original contract shall be covered by a supplemental agreement as defined in Section 10, paragraph 10-59, *Supplemental Agreement*.

If extra work is essential to maintaining the project critical path, RPR may order Contractor to commence the extra work under a Time and Material contract method. Once sufficient detail is available to establish the level of effort necessary for the extra work, Owner shall initiate a change order or supplemental agreement to cover the extra work.

Any claim for payment of extra work that is not covered by written agreement (change order or supplemental agreement) shall be rejected by Owner.

40-05 Maintenance of traffic. It is the explicit intention of the contract that the safety of aircraft, as well as Contractor's equipment and personnel, is the most important consideration. Contractor shall maintain traffic in the manner detailed in the Construction Safety and Phasing Plan (CSPP).

a. It is understood and agreed that Contractor shall provide for the free and unobstructed movement of aircraft in the air operations areas (AOAs) of the airport with respect to their own operations and the operations of all subcontractors as specified in Section 80, paragraph 80-04, *Limitation of Operations*. It is further understood and agreed that Contractor shall provide for the uninterrupted operation of visual and electronic signals (including power supplies thereto) used in the guidance of aircraft while operating to, from, and upon the airport as specified in Section 70, paragraph 70-15, *Contractor's Responsibility for Utility Service and Facilities of Others*.

b. With respect to their own operations and the operations of all subcontractors, Contractor shall provide marking, lighting, and other acceptable means of identifying personnel, equipment, vehicles, storage areas, and any work area or condition that may be hazardous to the operation of aircraft, fire-rescue equipment, or maintenance vehicles at the airport in accordance with the construction safety and phasing plan (CSPP) and the safety plan compliance document (SPCD).

c. When the contract requires the maintenance of an existing road, street, or highway during Contractor's performance of work that is otherwise provided for in the contract, plans, and specifications, Contractor shall keep the road, street, or highway open to all traffic and shall provide maintenance as may be required to accommodate traffic. Contractor, at their expense, shall be responsible for the repair to equal or better than preconstruction conditions of any damage caused by Contractor's equipment and personnel. Contractor shall furnish, erect, and maintain barricades, warning signs, flag person, and other traffic control devices in reasonable conformity with the Manual on Uniform Traffic Control Devices (MUTCD) (http://mutcd.fhwa.dot.gov/), unless otherwise specified. Contractor shall also construct and maintain in a safe condition any temporary connections necessary for ingress to and egress from abutting property or intersecting roads, streets or highways. Unless otherwise specified herein, Contractor will not be required to furnish snow removal for such existing road, street, or highway.

40-06 Removal of existing structures. All existing structures encountered within the established lines, grades, or grading sections shall be removed by Contractor, unless such existing structures are otherwise specified to be relocated, adjusted up or down, salvaged, abandoned in place, reused in the work or to remain in place. The cost of removing such existing structures shall not be measured or paid for directly, but shall be included in the various contract items.

Should Contractor encounter an existing structure (above or below ground) in the work for which the disposition is not indicated on the plans, the Resident Project Representative (RPR) shall be notified prior to disturbing such structure. The disposition of existing structures so encountered shall be immediately determined by the RPR in accordance with the provisions of the contract.

Except as provided in Section 40, paragraph 40-07, *Rights in and Use of Materials Found in the Work*, it is intended that all existing materials or structures that may be encountered (within the lines, grades, or grading

sections established for completion of the work) shall be used in the work as otherwise provided for in the contract and shall remain the property of Owner when so used in the work.

40-07 Rights in and use of materials found in the work. Should Contractor encounter any material such as (but not restricted to) sand, stone, gravel, slag, or concrete slabs within the established lines, grades, or grading sections, the use of which is intended by the terms of the contract to be embankment, Contractor may at their own option either:

a. Use such material in another contract item, providing such use is approved by the RPR and is in conformance with the contract specifications applicable to such use; or,

b. Remove such material from the site, upon written approval of the RPR; or

c. Use such material for Contractor's own temporary construction on site; or,

d. Use such material as intended by the terms of the contract.

Should Contractor wish to exercise option a., b., or c., Contractor shall request the RPR's approval in advance of such use.

Should the RPR approve Contractor's request to exercise option a., b., or c., Contractor shall be paid for the excavation or removal of such material at the applicable contract price. Contractor shall replace, at their expense, such removed or excavated material with an agreed equal volume of material that is acceptable for use in constructing embankment, backfills, or otherwise to the extent that such replacement material is needed to complete the contract work. Contractor shall not be charged for use of such material used in the work or removed from the site.

Should the RPR approve Contractor's exercise of option a., Contractor shall be paid, at the applicable contract price, for furnishing and installing such material in accordance with requirements of the contract item in which the material is used.

It is understood and agreed that Contractor shall make no claim for delays by reason of their own exercise of option a., b., or c.

Contractor shall not excavate, remove, or otherwise disturb any material, structure, or part of a structure which is located outside the lines, grades, or grading sections established for the work, except where such excavation or removal is provided for in the contract, plans, or specifications.

40-08 Final cleanup. Upon completion of the work and before acceptance and final payment will be made, Contractor shall remove from the site all machinery, equipment, surplus and discarded materials, rubbish, temporary structures, and stumps or portions of trees. Contractor shall cut all brush and woods within the limits indicated and shall leave the site in a neat and presentable condition. Material cleared from the site and deposited on adjacent property will not be considered as having been disposed of satisfactorily, unless Contractor has obtained the written permission of the property Owner.

END OF SECTION 40

Section 50 Control of Work

50-01 Authority of the Resident Project Representative (RPR). The RPR has final authority regarding the interpretation of project specification requirements. The RPR shall determine acceptability of the quality of materials furnished, method of performance of work performed, and the manner and rate of performance of the work. The RPR does not have the authority to accept work that does not conform to specification requirements.

50-02 Conformity with plans and specifications. All work and all materials furnished shall be in reasonably close conformity with the lines, grades, grading sections, cross-sections, dimensions, material requirements, and testing requirements that are specified (including specified tolerances) in the contract, plans, or specifications.

If the RPR finds the materials furnished, work performed, or the finished product not within reasonably close conformity with the plans and specifications, but that the portion of the work affected will, in their opinion, result in a finished product having a level of safety, economy, durability, and workmanship acceptable to Owner, the RPR will advise Owner of their determination that the affected work be accepted and remain in place. The RPR will document the determination and recommend to Owner a basis of acceptance that will provide for an adjustment in the contract price for the affected portion of the work. Changes in the contract price must be covered by contract change order or supplemental agreement as applicable.

If the RPR finds the materials furnished, work performed, or the finished product are not in reasonably close conformity with the plans and specifications and have resulted in an unacceptable finished product, the affected work or materials shall be removed and replaced or otherwise corrected by and at the expense of Contractor in accordance with the RPR's written orders.

The term "reasonably close conformity" shall not be construed as waiving Contractor's responsibility to complete the work in accordance with the contract, plans, and specifications. The term shall not be construed as waiving the RPR's responsibility to insist on strict compliance with the requirements of the contract, plans, and specifications during Contractor's execution of the work, when, in the RPR's opinion, such compliance is essential to provide an acceptable finished portion of the work.

The term "reasonably close conformity" is also intended to provide the RPR with the authority, after consultation with the Sponsor and FAA, to use sound engineering judgment in their determinations to accept work that is not in strict conformity, but will provide a finished product equal to or better than that required by the requirements of the contract, plans and specifications.

The RPR will not be responsible for Contractor's means, methods, techniques, sequences, or procedures of construction or the safety precautions incident thereto.

50-03 Coordination of contract, plans, and specifications. The contract, plans, specifications, and all referenced standards cited are essential parts of the contract requirements. If electronic files are provided and used on the project and there is a conflict between the electronic files and hard copy plans, the hard copy plans shall govern. A requirement occurring in one is as binding as though occurring in all. They are intended to be complementary and to describe and provide for a complete work. In case of discrepancy, calculated dimensions will govern over scaled dimensions; contract technical specifications shall govern over contract general provisions, plans, cited standards for materials or testing, and cited advisory circulars (ACs); contract general provisions shall govern over plans, cited standards for materials or testing, and cited ACs; plans shall govern over cited standards for materials or testing and cited ACs. If any paragraphs

contained in the Special Provisions conflict with General Provisions or Technical Specifications, the Special Provisions shall govern.

From time to time, discrepancies within cited testing standards occur due to the timing of the change, edits, and/or replacement of the standards. If Contractor discovers any apparent discrepancy within standard test methods, Contractor shall immediately ask the RPR for an interpretation and decision, and such decision shall be final.

Contractor shall not take advantage of any apparent error or omission on the plans or specifications. In the event Contractor discovers any apparent error or discrepancy, Contractor shall immediately notify Owner or the designated representative in writing requesting their written interpretation and decision.

50-04 List of Special Provisions.

SP-1 Scope of Work
SP-2 Contract Documents
SP-3 Time and Order of Completion
SP-4 Limitation of Operation
SP-5 Construction Activity
SP-6 Affidavit of Bills Paid
SP-7 Calendar Day
SP-8 Protection of Property
SP-9 Electric Power and Natural Gas
SP-10 Lines and Grades
SP-11 Water for Construction
SP-12 Material Tests
SP-13 Barricades, Signs, and Hazard Markings
SP-14 Prevention of Air and Water Pollution
SP-15 Public Convenience and Safety
SP-16 Final Cleaning Up
SP-17 Insurance
SP-18 Removal and Disposal of Structures, Utilities and Obstructions
SP-19 Conformity with Plans and Allowable Deviations
SP-20 Removal of Defective and Unauthorized Work
SP-21 Disputed Claims for Extra Work
SP-22 Federal Participation
SP-23 Indemnification
SP-24 Contractor's Responsibility for Work
SP-25 Correction of Faulty Work after Final Payment
SP-26 Texas State Sales Tax
SP-27 Separate Contracts
SP-28 Trench Safety
SP-29 Load Restrictions
SP-30 Notice to Proceed
SP-31 Payment for Materials on Hand
SP-32 Weighing and Measuring Equipment
SP-33 Progress Schedule
SP-34 Average Climatic Range
SP-35 Substantially Complete
SP-36 Submittals
SP-37 Geotechnical Information
SP-38 Sovereign Immunity
SP-39 Governing Law and Venue
SP-40 Third-Party Beneficiary

SP-41 Releases
SP-42 Independent Contractor
SP-43 Notice of Alleged Breach; Statutory Prerequisites
SP-44 Assignment
SP-45 Waiver of Attorney's Fees
SP-46 Prompt Pay Act
SP-47 Payment
SP-48 Project Closeout
SP-49 Disclosure of Interested Parties
SP-50 Parkhill/RPR Authority and Duty
SP-51 Anti-Boycott Statutes

50-05 Cooperation of Contractor. Contractor shall be supplied with an electronic PDF of the plans and specifications. Contractor shall have available on the construction site at all times one hardcopy each of the plans and specifications. Additional hard copies of plans and specifications may be obtained by Contractor for the cost of reproduction.

Contractor shall give constant attention to the work to facilitate the progress thereof, and shall cooperate with the RPR and their inspectors and with other Contractors in every way possible. Contractor shall have a competent superintendent on the work at all times who is fully authorized as their agent on the work. The superintendent shall be capable of reading and thoroughly understanding the plans and specifications and shall receive and fulfill instructions from the RPR or their authorized representative.

50-06 Cooperation between Contractors. Owner reserves the right to contract for and perform other or additional work on or near the work covered by this contract.

When separate contracts are let within the limits of any one project, each Contractor shall conduct the work not to interfere with or hinder the progress of completion of the work being performed by other Contractors. Contractors working on the same project shall cooperate with each other as directed.

Each Contractor involved shall assume all liability, financial or otherwise, in connection with their own contract and shall protect and hold harmless Owner from any and all damages or claims that may arise because of inconvenience, delays, or loss experienced because of the presence and operations of other Contractors working within the limits of the same project.

Contractor shall arrange their work and shall place and dispose of the materials being used to not interfere with the operations of the other Contractors within the limits of the same project. Contractor shall join their work with that of the others in an acceptable manner and shall perform it in proper sequence to that of the others.

50-07 Construction layout and stakes. Engineer/RPR shall establish necessary horizontal and vertical control. The establishment of Survey Control and/or reestablishment of survey control shall be by a State Licensed Land Surveyor. Contractor is responsible for preserving integrity of horizontal and vertical controls established by Engineer/RPR. In case of negligence on the part of Contractor or their employees, resulting in the destruction of any horizontal and vertical control, the resulting costs will be deducted as a liquidated damage against Contractor.

Prior to the start of construction, Contractor will check all control points for horizontal and vertical accuracy and certify in writing to the RPR that Contractor concurs with survey control established for the project. All lines, grades and measurements from control points necessary for the proper execution and control of the work on this project will be provided to the RPR. Contractor is responsible to establish all layout required for the construction of the project.

Copies of survey notes will be provided to the RPR for each area of construction and for each placement of material as specified to allow the RPR to make periodic checks for conformance with plan grades, alignments and grade tolerances required by the applicable material specifications. Surveys will be provided

to the RPR prior to commencing work items that cover or disturb the survey staking. Survey(s) and notes shall be provided in the following format(s): **DWG and PDF**.

Laser, GPS, String line, or other automatic control shall be checked with temporary control as necessary. In the case of error, on the part of Contractor, their surveyor, employees or subcontractors, resulting in established grades, alignment or grade tolerances that do not concur with those specified or shown on the plans, Contractor is solely responsible for correction, removal, replacement and all associated costs at no additional cost to Owner.

No direct payment will be made, unless otherwise specified in contract documents, for this labor, materials, or other expenses. The cost shall be included in the price of the bid for the various items of the Contract.

50-08 Authority and duties of Quality Assurance (QA) inspectors. QA inspectors shall be authorized to inspect all work done and all material furnished. Such QA inspection may extend to all or any part of the work and to the preparation, fabrication, or manufacture of the materials to be used. QA inspectors are not authorized to revoke, alter, or waive any provision of the contract. QA inspectors are not authorized to issue instructions contrary to the plans and specifications or to act as foreman for Contractor.

QA Inspectors are authorized to notify Contractor or their representatives of any failure of the work or materials to conform to the requirements of the contract, plans, or specifications and to reject such nonconforming materials in question until such issues can be referred to the RPR for a decision.

50-09 Inspection of the work. All materials and each part or detail of the work shall be subject to inspection. The RPR shall be allowed access to all parts of the work and shall be furnished with such information and assistance by Contractor as is required to make a complete and detailed inspection.

If the RPR requests it, Contractor, at any time before acceptance of the work, shall remove or uncover such portions of the finished work as may be directed. After examination, Contractor shall restore said portions of the work to the standard required by the specifications. Should the work thus exposed or examined prove acceptable, the uncovering, or removing, and the replacing of the covering or making good of the parts removed will be paid for as extra work; but should the work so exposed or examined prove unacceptable, the uncovering, or removing, and the replacing of the covering or making good of the parts removed will be at Contractor's expense.

Provide advance written notice to the RPR of work Contractor plans to perform each week and each day. Any work done or materials used without written notice and allowing opportunity for inspection by the RPR may be ordered removed and replaced at Contractor's expense.

Should the contract work include relocation, adjustment, or any other modification to existing facilities, not the property of the (contract) Owner, authorized representatives of Owners of such facilities shall have the right to inspect such work. Such inspection shall in no sense make any facility owner a party to the contract, and shall in no way interfere with the rights of the parties to this contract.

50-10 Removal of unacceptable and unauthorized work. All work that does not conform to the requirements of the contract, plans, and specifications will be considered unacceptable, unless otherwise determined acceptable by the RPR as provided in paragraph 50-02, *Conformity with Plans and Specifications*.

Unacceptable work, whether the result of poor workmanship, use of defective materials, damage through carelessness, or any other cause found to exist prior to the final acceptance of the work, shall be removed immediately and replaced in an acceptable manner in accordance with the provisions of Section 70, paragraph 70-14, *Contractor's Responsibility for Work*.

No removal work made under provision of this paragraph shall be done without lines and grades having been established by the RPR. Work done contrary to the instructions of the RPR, work done beyond the lines shown on the plans or as established by the RPR, except as herein specified, or any extra work done

without authority, will be considered as unauthorized and will not be paid for under the provisions of the contract. Work so done may be ordered removed or replaced at Contractor's expense.

Upon failure on the part of Contractor to comply with any order of the RPR made under the provisions of this subsection, the RPR will have authority to cause unacceptable work to be remedied or removed and replaced; and unauthorized work to be removed and recover the resulting costs as a liquidated damage against Contractor.

50-11 Load restrictions. Contractor shall comply with all legal load restrictions in the hauling of materials on public roads beyond the limits of the work. A special permit will not relieve Contractor of liability for damage that may result from the moving of material or equipment.

The operation of equipment of such weight or so loaded as to cause damage to structures or to any other type of construction will not be permitted. Hauling of materials over the base course or surface course under construction shall be limited as directed. No loads will be permitted on a concrete pavement, base, or structure before the expiration of the curing period. Contractor, at their own expense, shall be responsible for the repair to equal or better than preconstruction conditions of any damage caused by Contractor's equipment and personnel.

50-12 Maintenance during construction. Contractor shall maintain the work during construction and until the work is accepted. Maintenance shall constitute continuous and effective work prosecuted day by day, with adequate equipment and forces so that the work is maintained in satisfactory condition at all times.

In the case of a contract for the placing of a course upon a course or subgrade previously constructed, Contractor shall maintain the previous course or subgrade during all construction operations.

All costs of maintenance work during construction and before the project is accepted shall be included in the unit prices bid on the various contract items, and Contractor will not be paid an additional amount for such work.

50-13 Failure to maintain the work. Should Contractor at any time fail to maintain the work as provided in paragraph 50-12, *Maintenance during Construction*, the RPR shall immediately notify Contractor of such noncompliance. Such notification shall specify a reasonable time within which Contractor shall be required to remedy such unsatisfactory maintenance condition. The time specified will give due consideration to the exigency that exists.

Should Contractor fail to respond to the RPR's notification, Owner may suspend any work necessary for Owner to correct such unsatisfactory maintenance condition, depending on the exigency that exists. Any maintenance cost incurred by Owner, shall be recovered as a liquidated damage against Contractor.

50-14 Partial acceptance. If at any time during the execution of the project Contractor substantially completes a usable unit or portion of the work, the occupancy of which will benefit Owner, Contractor may request the RPR to make final inspection of that unit. If the RPR finds upon inspection that the unit has been satisfactorily completed in compliance with the contract, the RPR may accept it as being complete, and Contractor may be relieved of further responsibility for that unit. Such partial acceptance and beneficial occupancy by Owner shall not void or alter any provision of the contract.

50-15 Final acceptance. Upon due notice from Contractor of presumptive completion of the entire project, the RPR and Owner will make an inspection. If all construction provided for and contemplated by the contract is found to be complete in accordance with the contract, plans, and specifications, such inspection shall constitute the final inspection. The RPR shall notify Contractor in writing of final acceptance as of the date of the final inspection.

If, however, the inspection discloses any work, in whole or in part, as being unsatisfactory, the RPR will notify Contractor and Contractor shall correct the unsatisfactory work. Upon correction of the work, another inspection will be made which shall constitute the final inspection, provided the work has been satisfactorily

completed. In such event, the RPR will make the final acceptance and notify Contractor in writing of this acceptance as of the date of final inspection.

50-16 Claims for adjustment and disputes. If for any reason Contractor deems that additional compensation is due for work or materials not clearly provided for in the contract, plans, or specifications or previously authorized as extra work, Contractor shall notify the RPR in writing of their intention to claim such additional compensation before Contractor begins the work on which Contractor bases the claim. If such notification is not given or the RPR is not afforded proper opportunity by Contractor for keeping strict account of actual cost as required, then Contractor hereby agrees to waive any claim for such additional compensation. Such notice by Contractor and the fact that the RPR has kept account of the cost of the work shall not in any way be construed as proving or substantiating the validity of the claim. When the work on which the claim for additional compensation is based has been completed, Contractor shall, within 10 calendar days, submit a written claim to the RPR who will present it to Owner for consideration in accordance with local laws or ordinances.

Nothing in this subsection shall be construed as a waiver of Contractor's right to dispute final payment based on differences in measurements or computations.

END OF SECTION 50

Section 60 Control of Materials

60-01 Source of supply and quality requirements. The materials used in the work shall conform to the requirements of the contract, plans, and specifications. Unless otherwise specified, such materials that are manufactured or processed shall be new (as compared to used or reprocessed).

In order to expedite the inspection and testing of materials, Contractor shall furnish documentation to the RPR as to the origin, composition, and manufacture of all materials to be used in the work. Documentation shall be furnished promptly after execution of the contract but, in all cases, prior to delivery of such materials.

At the RPR's option, materials may be approved at the source of supply before delivery. If it is found after trial that sources of supply for previously approved materials do not produce specified products, Contractor shall furnish materials from other sources.

Contractor shall furnish airport lighting equipment that meets the requirements of the specifications; and is listed in AC 150/5345-53, *Airport Lighting Equipment Certification Program* and *Addendum*, that is in effect on the date of advertisement.

60-02 Samples, tests, and cited specifications. All materials used in the work shall be inspected, tested, and approved by the RPR before incorporation in the work unless otherwise designated. Any work in which untested materials are used without approval or written permission of the RPR shall be performed at Contractor's risk. Materials found to be unacceptable and unauthorized will not be paid for and, if directed by the RPR, shall be removed at Contractor's expense.

Unless otherwise designated, quality assurance tests will be made by and at the expense of Owner in accordance with the cited standard methods of ASTM, American Association of State Highway and Transportation Officials (AASHTO), federal specifications, Commercial Item Descriptions, and all other cited methods, which are current on the date of advertisement for bids.

The testing organizations performing on-site quality assurance field tests shall have copies of all referenced standards on the construction site for use by all technicians and other personnel. Unless otherwise designated, samples for quality assurance will be taken by a qualified representative of the RPR. All materials being used are subject to inspection, test, or rejection at any time prior to or during incorporation into the work. Copies of all tests will be furnished to Contractor's representative at their request after review and approval of the RPR.

A copy of all Contractor QC test data shall be provided to the RPR daily, along with printed reports, in an approved format, on a weekly basis. After completion of the project, and prior to final payment, Contractor shall submit a final report to the RPR showing all test data reports, plus an analysis of all results showing ranges, averages, and corrective action taken on all failing tests.

60-03 Certification of compliance/analysis (COC/COA). The RPR may permit the use, prior to sampling and testing, of certain materials or assemblies when accompanied by manufacturer's COC stating that such materials or assemblies fully comply with the requirements of the contract. The certificate shall be signed by the manufacturer. Each lot of such materials or assemblies delivered to the work must be accompanied by a certificate of compliance in which the lot is clearly identified. The COA is the manufacturer's COC and includes all applicable test results.

Materials or assemblies used on the basis of certificates of compliance may be sampled and tested at any time and if found not to be in conformity with contract requirements will be subject to rejection whether in place or not.

The form and distribution of certificates of compliance shall be as approved by the RPR.

When a material or assembly is specified by "brand name or equal" and Contractor elects to furnish the specified "or equal," Contractor shall be required to furnish the manufacturer's certificate of compliance for each lot of such material or assembly delivered to the work. Such certificate of compliance shall clearly identify each lot delivered and shall certify as to:

a. Conformance to the specified performance, testing, quality or dimensional requirements; and,

b. Suitability of the material or assembly for the use intended in the contract work.

The RPR shall be the sole judge as to whether the proposed "or equal" is suitable for use in the work.

The RPR reserves the right to refuse permission for use of materials or assemblies on the basis of certificates of compliance.

60-04 Plant inspection. The RPR or their authorized representative may inspect, at its source, any specified material or assembly to be used in the work. Manufacturing plants may be inspected from time to time for the purpose of determining compliance with specified manufacturing methods or materials to be used in the work and to obtain samples required for acceptance of the material or assembly.

Should the RPR conduct plant inspections, the following conditions shall exist:

a. The RPR shall have the cooperation and assistance of Contractor and the producer with whom Contractor has contracted for materials.

b. The RPR shall have full entry at all reasonable times to such parts of the plant that concern the manufacture or production of the materials being furnished.

c. If required by the RPR, Contractor shall arrange for adequate office or working space that may be reasonably needed for conducting plant inspections. Place office or working space in a convenient location with respect to the plant.

It is understood and agreed that Owner shall have the right to retest any material that has been tested and approved at the source of supply after it has been delivered to the site. The RPR shall have the right to reject only material which, when retested, does not meet the requirements of the contract, plans, or specifications.

60-05 Engineer/ Resident Project Representative (RPR) field office. An Engineer/RPR field office is not required.

60-06 Storage of materials. Materials shall be stored to assure the preservation of their quality and fitness for the work. Stored materials, even though approved before storage, may again be inspected prior to their use in the work. Stored materials shall be located to facilitate their prompt inspection. Contractor shall coordinate the storage of all materials with the RPR. Materials to be stored on airport property shall not create an obstruction to air navigation nor shall they interfere with the free and unobstructed movement of aircraft. Unless otherwise shown on the plans and/or CSPP, the storage of materials and the location of Contractor's plant and parked equipment or vehicles shall be as directed by the RPR. Private property shall not be used for storage purposes without written permission of Owner or lessee of such property. Contractor shall make all arrangements and bear all expenses for the storage of materials on private property. Upon request, Contractor shall furnish the RPR a copy of the property Owner's permission.

All storage sites on private or airport property shall be restored to their original condition by Contractor at their expense, except as otherwise agreed to (in writing) by Owner or lessee of the property.

60-07 Unacceptable materials. Any material or assembly that does not conform to the requirements of the contract, plans, or specifications shall be considered unacceptable and shall be rejected. Contractor shall remove any rejected material or assembly from the site of the work, unless otherwise instructed by the RPR.

Rejected material or assembly, the defects of which have been corrected by Contractor, shall not be returned to the site of the work until such time as the RPR has approved its use in the work.

60-08 Owner furnished materials. Contractor shall furnish all materials required to complete the work, except those specified, if any, to be furnished by Owner. Owner-furnished materials shall be made available to Contractor at the location specified.

All costs of handling, transportation from the specified location to the site of work, storage, and installing Owner-furnished materials shall be included in the unit price bid for the contract item in which such Owner-furnished material is used.

After any Owner-furnished material has been delivered to the location specified, Contractor shall be responsible for any demurrage, damage, loss, or other deficiencies that may occur during Contractor's handling, storage, or use of such Owner-furnished material. Owner will deduct from any monies due or to become due Contractor any cost incurred by Owner in making good such loss due to Contractor's handling, storage, or use of Owner-furnished materials.

END OF SECTION 60

Section 70 Legal Regulations and Responsibility to Public

70-01 Laws to be observed. Contractor shall keep fully informed of all federal and state laws, all local laws, ordinances, and regulations and all orders and decrees of bodies or tribunals having any jurisdiction or authority, which in any manner affect those engaged or employed on the work, or which in any way affect the conduct of the work. Contractor shall at all times observe and comply with all such laws, ordinances, regulations, orders, and decrees; and shall protect and indemnify Owner and all their officers, agents, or servants against any claim or liability arising from or based on the violation of any such law, ordinance, regulation, order, or decree, whether by Contractor or Contractor's employees.

70-02 Permits, licenses, and taxes. Contractor shall procure all permits and licenses, pay all charges, fees, and taxes, and give all notices necessary and incidental to the due and lawful execution of the work.

70-03 Patented devices, materials, and processes. If Contractor is required or desires to use any design, device, material, or process covered by letters of patent or copyright, Contractor shall provide for such use by suitable legal agreement with the Patentee or Owner. Contractor and the surety shall indemnify and hold harmless Owner, any third party, or political subdivision from any and all claims for infringement by reason of the use of any such patented design, device, material or process, or any trademark or copyright, and shall indemnify Owner for any costs, expenses, and damages which it may be obliged to pay by reason of an infringement, at any time during the execution or after the completion of the work.

70-04 Restoration of surfaces disturbed by others. Owner reserves the right to authorize the construction, reconstruction, or maintenance of any public or private utility service, FAA or National Oceanic and Atmospheric Administration (NOAA) facility, or a utility service of another government agency at any time during the progress of the work. To the extent that such construction, reconstruction, or maintenance has been coordinated with Owner, such authorized work (by others) must be shown on the plans and is indicated as follows: **None**.

Except as listed above, Contractor shall not permit any individual, firm, or corporation to excavate or otherwise disturb such utility services or facilities located within the limits of the work without the written permission of the RPR.

Should Owner of public or private utility service, FAA, or NOAA facility, or a utility service of another government agency be authorized to construct, reconstruct, or maintain such utility service or facility during the progress of the work, Contractor shall cooperate with such Owners by arranging and performing the work in this contract to facilitate such construction, reconstruction or maintenance by others whether or not such work by others is listed above. When ordered as extra work by the RPR, Contractor shall make all necessary repairs to the work which are due to such authorized work by others, unless otherwise provided for in the contract, plans, or specifications. It is understood and agreed that Contractor shall not be entitled to make any claim for damages due to such authorized work by others or for any delay to the work resulting from such authorized work.

70-05 Federal Participation. The United States Government has agreed to reimburse Owner for some portion of the contract costs. The contract work is subject to the inspection and approval of duly authorized representatives of the FAA Administrator. No requirement of this contract shall be construed as making the United States a party to the contract nor will any such requirement interfere, in any way, with the rights of either party to the contract.

70-06 Sanitary, health, and safety provisions. Contractor's worksite and facilities shall comply with applicable federal, state, and local requirements for health, safety and sanitary provisions.

70-07 Public convenience and safety. Contractor shall control their operations and those of their subcontractors and all suppliers, to assure the least inconvenience to the traveling public. Under all circumstances, safety shall be the most important consideration.

Contractor shall maintain the free and unobstructed movement of aircraft and vehicular traffic with respect to their own operations and those of their own subcontractors and all suppliers in accordance with Section 40, paragraph 40-05, *Maintenance of Traffic,* and shall limit such operations for the convenience and safety of the traveling public as specified in Section 80, paragraph 80-04, *Limitation of Operations*.

Contractor shall remove or control debris and rubbish resulting from its work operations at frequent intervals, and upon the order of the RPR. If the RPR determines the existence of Contractor debris in the work site represents a hazard to airport operations and Contractor is unable to respond in a prompt and reasonable manner, the RPR reserves the right to assign the task of debris removal to a third party and recover the resulting costs as a liquidated damage against Contractor.

70-08 Construction Safety and Phasing Plan (CSPP). Contractor shall complete the work in accordance with the approved Construction Safety and Phasing Plan (CSPP) developed in accordance with AC 150/5370-2, Operational Safety on Airports During Construction. The CSPP is included with Bid Package.

70-09 Use of explosives. The use of explosives is not permitted on this project.

70-10 Protection and restoration of property and landscape. Contractor shall be responsible for the preservation of all public and private property, and shall protect carefully from disturbance or damage all land monuments and property markers until Engineer/RPR has witnessed or otherwise referenced their location and shall not move them until directed.

Contractor shall be responsible for all damage or injury to property of any character, during the execution of the work, resulting from any act, omission, neglect, or misconduct in manner or method of executing the work, or at any time due to defective work or materials, and said responsibility shall not be released until the project has been completed and accepted.

When or where any direct or indirect damage or injury is done to public or private property by or on account of any act, omission, neglect, or misconduct in the execution of the work, or in consequence of the non-execution thereof by Contractor, Contractor shall restore, at their expense, such property to a condition similar or equal to that existing before such damage or injury was done, by repairing, or otherwise restoring as may be directed, or Contractor shall make good such damage or injury in an acceptable manner.

70-11 Responsibility for damage claims. Contractor shall indemnify and hold harmless Engineer/RPR and Owner and their officers, agents, and employees from all suits, actions, or claims, of any character, brought because of any injuries or damage received or sustained by any person, persons, or property on account of the operations of Contractor; or on account of or in consequence of any neglect in safeguarding the work; or through use of unacceptable materials in constructing the work; or because of any act or omission, neglect, or misconduct of said Contractor; or because of any claims or amounts recovered from any infringements of patent, trademark, or copyright; or from any claims or amounts arising or recovered under the "Workmen’s Compensation Act," or any other law, ordinance, order, or decree. Money due Contractor under and by virtue of their own contract considered necessary by Owner for such purpose may be retained for the use of Owner or, in case no money is due, their own surety may be held until such suits, actions, or claims for injuries or damages shall have been settled and suitable evidence to that effect furnished to Owner, except that money due Contractor will not be withheld when Contractor produces satisfactory evidence that he or she is adequately protected by public liability and property damage insurance.

70-12 Third party beneficiary clause. It is specifically agreed between the parties executing the contract that it is not intended by any of the provisions of any part of the contract to create for the public or any

member thereof, a third-party beneficiary or to authorize anyone not a party to the contract to maintain a suit for personal injuries or property damage pursuant to the terms or provisions of the contract.

70-13 Opening sections of the work to traffic. If it is necessary for Contractor to complete portions of the contract work for the beneficial occupancy of Owner prior to completion of the entire contract, such "phasing" of the work must be specified below and indicated on the approved Construction Safety and Phasing Plan (CSPP) and the project plans. When so specified, Contractor shall complete such portions of the work on or before the date specified or as otherwise specified.

Upon completion of any portion of work listed above, such portion shall be accepted by Owner in accordance with Section 50, paragraph 50-14, *Partial Acceptance*.

No portion of the work may be opened by Contractor until directed by Owner in writing. Should it become necessary to open a portion of the work to traffic on a temporary or intermittent basis, such openings shall be made when, in the opinion of the RPR, such portion of the work is in an acceptable condition to support the intended traffic. Temporary or intermittent openings are considered to be inherent in the work and shall not constitute either acceptance of the portion of the work so opened or a waiver of any provision of the contract. Any damage to the portion of the work so opened that is not attributable to traffic which is permitted by Owner shall be repaired by Contractor at their expense.

Contractor shall make their own estimate of the inherent difficulties involved in completing the work under the conditions herein described and shall not claim any added compensation by reason of delay or increased cost due to opening a portion of the contract work.

Contractor must conform to safety standards contained AC 150/5370-2 and the approved CSPP.

Contractor shall refer to the plans, specifications, and the approved CSPP to identify barricade requirements, temporary and/or permanent markings, airfield lighting, guidance signs and other safety requirements prior to opening up sections of work to traffic.

70-14 Contractor's responsibility for work. Until the RPR's final written acceptance of the entire completed work, excepting only those portions of the work accepted in accordance with Section 50, paragraph 50-14, *Partial Acceptance*, Contractor shall have the charge and care thereof and shall take every precaution against injury or damage to any part due to the action of the elements or from any other cause, whether arising from the execution or from the non-execution of the work. Contractor shall rebuild, repair, restore, and make good all injuries or damages to any portion of the work occasioned by any of the above causes before final acceptance and shall bear the expense thereof except damage to the work due to unforeseeable causes beyond the control of and without the fault or negligence of Contractor, including but not restricted to acts of God such as earthquake, tidal wave, tornado, hurricane or other cataclysmic phenomenon of nature, or acts of the public enemy or of government authorities.

If the work is suspended for any cause whatever, Contractor shall be responsible for the work and shall take such precautions necessary to prevent damage to the work. Contractor shall provide for normal drainage and shall erect necessary temporary structures, signs, or other facilities at their own expense. During such period of suspension of work, Contractor shall properly and continuously maintain in an acceptable growing condition all living material in newly established planting, seeding, and sodding furnished under the contract, and shall take adequate precautions to protect new tree growth and other important vegetative growth against injury.

70-15 Contractor's responsibility for utility service and facilities of others. As provided in paragraph 70-04, *Restoration of Surfaces Disturbed by Others*, Contractor shall cooperate with Owner of any public or private utility service, FAA or NOAA, or a utility service of another government agency that may be authorized by Owner to construct, reconstruct or maintain such utility services or facilities during the progress of the work. In addition, Contractor shall control their operations to prevent the unscheduled interruption of such utility services and facilities.

To the extent that such public or private utility services, FAA, or NOAA facilities, or utility services of another governmental agency are known to exist within the limits of the contract work, the approximate locations have been indicated on the plans and/or in the contract documents.

It is understood and agreed that Owner does not guarantee the accuracy or the completeness of the location information relating to existing utility services, facilities, or structures that may be shown on the plans or encountered in the work. Any inaccuracy or omission in such information shall not relieve Contractor of the responsibility to protect such existing features from damage or unscheduled interruption of service.

It is further understood and agreed that Contractor shall, upon execution of the contract, notify Owners of all utility services or other facilities of their plan of operations. Such notification shall be in writing addressed to "The Person to Contact" as provided in this paragraph and paragraph 70-04, *Restoration of Surfaces Disturbed By Others*. A copy of each notification shall be given to the RPR.

In addition to the general written notification provided, it shall be the responsibility of Contractor to keep such individual Owners advised of changes in their plan of operations that would affect such Owners.

Prior to beginning the work in the general vicinity of an existing utility service or facility, Contractor shall again notify each such Owner of their plan of operation. If, in Contractor's opinion, Owner's assistance is needed to locate the utility service or facility or the presence of a representative of Owner is desirable to observe the work, such advice should be included in the notification. Such notification shall be given by the most expeditious means to reach the utility owner's "Person to Contact" no later than two normal business days prior to Contractor's commencement of operations in such general vicinity. Contractor shall furnish a written summary of the notification to the RPR.

Contractor's failure to give the two days' notice shall be cause for Owner to suspend Contractor's operations in the general vicinity of a utility service or facility.

Where the outside limits of an underground utility service have been located and staked on the ground, Contractor shall be required to use hand excavation methods within 3 feet (1 m) of such outside limits at such points as may be required to ensure protection from damage due to Contractor's operations.

Should Contractor damage or interrupt the operation of a utility service or facility by accident or otherwise, Contractor shall immediately notify the proper authority and the RPR and shall take all reasonable measures to prevent further damage or interruption of service. Contractor, in such events, shall cooperate with the utility service or facility owner and the RPR continuously until such damage has been repaired and service restored to the satisfaction of the utility or facility owner.

Contractor shall bear all costs of damage and restoration of service to any utility service or facility due to their operations whether due to negligence or accident. Owner reserves the right to deduct such costs from any monies due or which may become due Contractor, or their own surety.

70-16 Furnishing rights-of-way. Owner will be responsible for furnishing all rights-of-way upon which the work is to be constructed in advance of Contractor's operations.

70-17 Personal liability of public officials. In carrying out any of the contract provisions or in exercising any power or authority granted by this contract, there shall be no liability upon Engineer, RPR, their authorized representatives, or any officials of Owner either personally or as an official of Owner. It is understood that in such matters they act solely as agents and representatives of Owner.

70-18 No waiver of legal rights. Upon completion of the work, Owner will expeditiously make final inspection and notify Contractor of final acceptance. Such final acceptance, however, shall not preclude or stop Owner from correcting any measurement, estimate, or certificate made before or after completion of the work, nor shall Owner be precluded or stopped from recovering from Contractor or their surety, or both, such overpayment as may be sustained, or by failure on the part of Contractor to fulfill their obligations under the contract. A waiver on the part of Owner of any breach of any part of the contract shall not be held to be a waiver of any other or subsequent breach.

Contractor, without prejudice to the terms of the contract, shall be liable to Owner for latent defects, fraud, or such gross mistakes as may amount to fraud, or as regards Owner's rights under any warranty or guaranty.

70-19 Environmental protection. Contractor shall comply with all federal, state, and local laws and regulations controlling pollution of the environment. Contractor shall take necessary precautions to prevent pollution of streams, lakes, ponds, and reservoirs with fuels, oils, asphalts, chemicals, or other harmful materials and to prevent pollution of the atmosphere from particulate and gaseous matter.

70-20 Archaeological and historical findings. Unless otherwise specified in this subsection, Contractor is advised that the site of the work is not within any property, district, or site, and does not contain any building, structure, or object listed in the current National Register of Historic Places published by the United States Department of Interior.

Should Contractor encounter, during their operations, any building, part of a building, structure, or object that is incongruous with its surroundings, Contractor shall immediately cease operations in that location and notify the RPR. The RPR will immediately investigate Contractor's finding and Owner will direct Contractor to either resume operations or to suspend operations as directed.

Should Owner order suspension of Contractor's operations in order to protect an archaeological or historical finding, or order Contractor to perform extra work, such shall be covered by an appropriate contract change order or supplemental agreement as provided in Section 40, paragraph 40-04, *Extra Work,* and Section 90, paragraph 90-05, *Payment for Extra Work*. If appropriate, the contract change order or supplemental agreement shall include an extension of contract time in accordance with Section 80, paragraph 80-07, *Determination and Extension of Contract Time*.

70-21 Insurance Requirements. See Special Provisions SP-17.

END OF SECTION 70

Page Intentionally Blank

Section 80 Execution and Progress

80-01 Subletting of contract. Owner will not recognize any subcontractor on the work. Contractor shall at all times when work is in progress be represented either in person, by a qualified superintendent, or by other designated, qualified representative who is duly authorized to receive and execute orders of the Resident Project Representative (RPR).

Contractor shall perform, with his organization, an amount of work equal to at least **25** percent of the total contract cost.

Should Contractor elect to assign their contract, said assignment shall be concurred in by the surety, shall be presented for the consideration and approval of Owner, and shall be consummated only on the written approval of Owner.

Contractor shall provide copies of all subcontracts to the RPR fourteen (14) days prior to being utilized on the project. As a minimum, the information shall include the following:

- Subcontractor's legal company name.
- Subcontractor's legal company address, including County name.
- Principal contact person's name, telephone and fax number.
- Complete narrative description, and dollar value of the work to be performed by the subcontractor.
- Copies of required insurance certificates in accordance with the specifications.
- Minority/ non-minority status.

80-02 Notice to proceed (NTP). Owners notice to proceed will state the date on which contract time commences. Contractor is expected to commence project operations within **ten (10)** days of the NTP date. Contractor shall notify the RPR at least 24 hours in advance of the time contract operations begins. Contractor shall not commence any actual operations prior to the date on which the notice to proceed is issued by Owner.

80-03 Execution and progress. Unless otherwise specified, Contractor shall submit their coordinated construction schedule showing all work activities for the RPR’s review and acceptance at least 10 days prior to the start of work. Contractor’s progress schedule, once accepted by the RPR, will represent Contractor's baseline plan to accomplish the project in accordance with the terms and conditions of the Contract. The RPR will compare actual Contractor progress against the baseline schedule to determine that status of Contractor's performance. Contractor shall provide sufficient materials, equipment, and labor to guarantee the completion of the project in accordance with the plans and specifications within the time set forth in the proposal.

If Contractor falls significantly behind the submitted schedule, Contractor shall, upon the RPR’s request, submit a revised schedule for completion of the work within the contract time and modify their operations to provide such additional materials, equipment, and labor necessary to meet the revised schedule. Should the execution of the work be discontinued for any reason, Contractor shall notify the RPR at least 24 hours in advance of resuming operations.

Contractor shall not commence any actual construction prior to the date on which the NTP is issued by Owner.

Contractor shall maintain the work schedule and provide an update and analysis of the progress schedule on a twice-monthly basis, or as otherwise specified in the contract. Submission of the work schedule shall not relieve Contractor of overall responsibility for scheduling, sequencing, and coordinating all work to comply with the requirements of the contract.

80-04 Limitation of operations. Contractor shall control their operations and the operations of their subcontractors and all suppliers to provide for the free and unobstructed movement of aircraft in the air operations areas (AOA) of the airport.

When the work requires Contractor to conduct their operations within an AOA of the airport, the work shall be coordinated with airport operations (through the RPR) at least 48 hours prior to commencement of such work. Contractor shall not close an AOA until so authorized by the RPR and until the necessary temporary marking, signage and associated lighting is in place as provided in Section 70, paragraph 70-08, *Construction Safety and Phasing Plan (CSPP)*.

When the contract work requires Contractor to work within an AOA of the airport on an intermittent basis (intermittent opening and closing of the AOA), Contractor shall maintain constant communications as specified; immediately obey all instructions to vacate the AOA; and immediately obey all instructions to resume work in such AOA. Failure to maintain the specified communications or to obey instructions shall be cause for suspension of Contractor's operations in the AOA until satisfactory conditions are provided. The areas of the AOA identified in the Construction Safety Phasing Plan (CSPP) and as listed below, cannot be closed to operating aircraft to permit Contractor's operations on a continuous basis and will therefore be closed to aircraft operations intermittently as follows: None.

Contractor shall be required to conform to safety standards contained in AC 150/5370-2, Operational Safety on Airports During Construction and the approved CSPP.

80-04.1 Operational safety on airport during construction. All Contractors' operations shall be conducted in accordance with the approved project Construction Safety and Phasing Plan (CSPP) and the Safety Plan Compliance Document (SPCD) and the provisions set forth within the current version of AC 150/5370-2, Operational Safety on Airports During Construction. The CSPP included within the contract documents conveys minimum requirements for operational safety on the airport during construction activities. Contractor shall prepare and submit a SPCD that details how it proposes to comply with the requirements presented within the CSPP.

Contractor shall implement all necessary safety plan measures prior to commencement of any work activity. Contractor shall conduct routine checks to assure compliance with the safety plan measures.

Contractor is responsible to Owner for the conduct of all subcontractors it employs on the project. Contractor shall assure that all subcontractors are made aware of the requirements of the CSPP and SPCD and that they implement and maintain all necessary measures.

No deviation or modifications may be made to the approved CSPP and SPCD unless approved in writing by Owner. The necessary coordination actions to review Contractor proposed modifications to an approved CSPP or approved SPCD can require a significant amount of time.

80-05 Character of workers, methods, and equipment. Contractor shall, at all times, employ sufficient labor and equipment for prosecuting the work to full completion in the manner and time required by the contract, plans, and specifications.

All workers shall have sufficient skill and experience to perform properly the work assigned to them. Workers engaged in special work or skilled work shall have sufficient experience in such work and in the operation of the equipment required to perform the work satisfactorily.

Any person employed by Contractor or by any subcontractor who violates any operational regulations or operational safety requirements and, in the opinion of the RPR, does not perform his work in a proper and skillful manner or is intemperate or disorderly shall, at the written request of the RPR, be removed immediately by Contractor or subcontractor employing such person, and shall not be employed again in any portion of the work without approval of the RPR.

Should Contractor fail to remove such person or persons, or fail to furnish suitable and sufficient personnel for the proper execution of the work, the RPR may suspend the work by written notice until compliance with such orders.

All equipment that is proposed to be used on the work shall be of sufficient size and in such mechanical condition as to meet requirements of the work and to produce a satisfactory quality of work. Equipment used on any portion of the work shall not cause injury to previously completed work, adjacent property, or existing airport facilities due to its use.

When the methods and equipment to be used by Contractor in accomplishing the work are not prescribed in the contract, Contractor is free to use any methods or equipment that will accomplish the work in conformity with the requirements of the contract, plans, and specifications.

When the contract specifies the use of certain methods and equipment, such methods and equipment shall be used unless otherwise authorized by the RPR. If Contractor desires to use a method or type of equipment other than specified in the contract, Contractor may request authority from the RPR to do so. The request shall be in writing and shall include a full description of the methods and equipment proposed and of the reasons for desiring to make the change. If approval is given, it will be on the condition that Contractor will be fully responsible for producing work in conformity with contract requirements. If, after trial use of the substituted methods or equipment, the RPR determines that the work produced does not meet contract requirements, Contractor shall discontinue the use of the substitute method or equipment and shall complete the remaining work with the specified methods and equipment. Contractor shall remove any deficient work and replace it with work of specified quality, or take such other corrective action as the RPR may direct. No change will be made in basis of payment for the contract items involved nor in contract time as a result of authorizing a change in methods or equipment under this paragraph.

80-06 Temporary suspension of the work. Owner shall have the authority to suspend the work wholly, or in part, for such period or periods Owner may deem necessary, due to unsuitable weather, or other conditions considered unfavorable for the execution of the work, or for such time necessary due to the failure on the part of Contractor to carry out orders given or perform any or all provisions of the contract.

In the event that Contractor is ordered by Owner, in writing, to suspend work for some unforeseen cause not otherwise provided for in the contract and over which Contractor has no control, Contractor may be reimbursed for actual money expended on the work during the period of shutdown. No allowance will be made for anticipated profits. The period of shutdown shall be computed from the effective date of the written order to suspend work to the effective date of the written order to resume the work. Claims for such compensation shall be filed with the RPR within the time period stated in the RPR's order to resume work. Contractor shall submit with their own claim information substantiating the amount shown on the claim. The RPR will forward Contractor's claim to Owner for consideration in accordance with local laws or ordinances. No provision of this article shall be construed as entitling Contractor to compensation for delays due to inclement weather or for any other delay provided for in the contract, plans, or specifications.

If it becomes necessary to suspend work for an indefinite period, Contractor shall store all materials in such manner that they will not become an obstruction nor become damaged in any way. Contractor shall take every precaution to prevent damage or deterioration of the work performed and provide for normal drainage of the work. Contractor shall erect temporary structures where necessary to provide for traffic on, to, or from the airport.

80-07 Determination and extension of contract time. The number of calendar days shall be stated in the proposal and contract and shall be known as the Contract Time.

If the contract time requires extension for reasons beyond Contractor's control, it shall be adjusted as follows:

80-07.1

Contract time based on calendar days. Contract Time based on calendar days shall consist of the number of calendar days stated in the contract counting from the effective date of the Notice to Proceed and including all Saturdays, Sundays, holidays, and non-work days. All calendar days elapsing between the effective dates of Owner's orders to suspend and resume all work, due to causes not the fault of Contractor, shall be excluded.

At the time of final payment, the contract time shall be increased in the same proportion as the cost of the actually completed quantities bears to the cost of the originally estimated quantities in the proposal. Such increase in the contract time shall not consider either cost of work or the extension of contract time that has been covered by a change order or supplemental agreement. Charges against the contract time will cease as of the date of final acceptance.

80-08 Failure to complete on time. For each calendar day or working day, as specified in the contract, that any work remains uncompleted after the contract time (including all extensions and adjustments as provided in paragraph 80-07, *Determination and Extension of Contract Time*) the sum specified in the contract and proposal as liquidated damages (LD) will be deducted from any money due or to become due Contractor or their own surety. Such deducted sums shall not be deducted as a penalty but shall be considered as liquidation of a reasonable portion of damages including but not limited to additional engineering services that will be incurred by Owner should Contractor fail to complete the work in the time provided in their contract.

Schedule	Liquidated Damages Cost	Allowed Construction Time
Base Bid	$1,000	90

80-09 Default and termination of contract**. Contractor shall be considered in default of their contract and such default will be considered as cause for Owner to terminate the contract for any of the following reasons, if Contractor:**

a. Fails to begin the work under the contract within the time specified in the Notice to Proceed, or

b. Fails to perform the work or fails to provide sufficient workers, equipment and/or materials to assure completion of work in accordance with the terms of the contract, or

c. Performs the work unsuitably or neglects or refuses to remove materials or to perform anew such work as may be rejected as unacceptable and unsuitable, or

d. Discontinues the execution of the work, or

e. Fails to resume work which has been discontinued within a reasonable time after notice to do so, or

f. Becomes insolvent or is declared bankrupt, or commits any act of bankruptcy or insolvency, or

g. Allows any final judgment to stand against Contractor unsatisfied for a period of 10 days, or

h. Makes an assignment for the benefit of creditors, or

i. For any other cause whatsoever, fails to carry on the work in an acceptable manner.

Should Owner consider Contractor in default of the contract for any reason above, Owner shall immediately give written notice to Contractor and Contractor's surety as to the reasons for considering Contractor in default and Owner's intentions to terminate the contract.

If Contractor or surety, within a period of 10 days after such notice, does not proceed in accordance therewith, then Owner will, upon written notification from the RPR of the facts of such delay, neglect, or default and Contractor's failure to comply with such notice, have full power and authority without violating the contract, to take the execution of the work out of the hands of Contractor. Owner may appropriate or use any or all materials and equipment that have been mobilized for use in the work and are acceptable and may enter into an agreement for the completion of said contract according to the terms and provisions thereof, or use such other methods as in the opinion of the RPR will be required for the completion of said contract in an acceptable manner.

All costs and charges incurred by Owner, together with the cost of completing the work under contract, will be deducted from any monies due or which may become due Contractor. If such expense exceeds the sum which would have been payable under the contract, then Contractor and the surety shall be liable and shall pay to Owner the amount of such excess.

80-10 Termination for national emergencies. Owner shall terminate the contract or portion thereof by written notice when Contractor is prevented from proceeding with the construction contract as a direct result of an Executive Order of the President with respect to the execution of war or in the interest of national defense.

When the contract, or any portion thereof, is terminated before completion of all items of work in the contract, payment will be made for the actual number of units or items of work completed at the contract price or as mutually agreed for items of work partially completed or not started. No claims or loss of anticipated profits shall be considered.

Reimbursement for organization of the work, and other overhead expenses, (when not otherwise included in the contract) and moving equipment and materials to and from the job will be considered, the intent being that an equitable settlement will be made with Contractor.

Acceptable materials, obtained or ordered by Contractor for the work and that are not incorporated in the work shall, at the option of Contractor, be purchased from Contractor at actual cost as shown by receipted bills and actual cost records at such points of delivery as may be designated by the RPR.

Termination of the contract or a portion thereof shall neither relieve Contractor of their responsibilities for the completed work nor shall it relieve their surety of its obligation for and concerning any just claim arising out of the work performed.

80-11 Work area, storage area and sequence of operations. Contractor shall obtain approval from the RPR prior to beginning any work in all areas of the airport. No operating runway, taxiway, or air operations area (AOA) shall be crossed, entered, or obstructed while it is operational. Contractor shall plan and coordinate work in accordance with the approved CSPP and SPCD.

END OF SECTION 80

Section 90 Measurement and Payment

90-01 Measurement of quantities. All work completed under the contract will be measured by the RPR, or their authorized representatives, using United States Customary Units of Measurement.

The method of measurement and computations to be used in determination of quantities of material furnished and of work performed under the contract will be those methods generally recognized as conforming to good engineering practice.

Unless otherwise specified, longitudinal measurements for area computations will be made horizontally, and no deductions will be made for individual fixtures (or leave-outs) having an area of 9 square feet or less. Unless otherwise specified, transverse measurements for area computations will be the neat dimensions shown on the plans or ordered in writing by the RPR.

Unless otherwise specified, all contract items which are measured by the linear foot such as electrical ducts, conduits, pipe culverts, underdrains, and similar items shall be measured parallel to the base or foundation upon which such items are placed.

The term "lump sum" when used as an item of payment will mean complete payment for the work described in the contract. When a complete structure or structural unit (in effect, "lump sum" work) is specified as the unit of measurement, the unit will be construed to include all necessary fittings and accessories.

When requested by Contractor and approved by the RPR in writing, material specified to be measured by the cubic yard may be weighed, and such weights will be converted to cubic yards for payment purposes. Factors for conversion from weight measurement to volume measurement will be determined by the RPR and shall be agreed to by Contractor before such method of measurement of pay quantities is used.

Measurement and Payment Terms

Term	Description
Excavation and Embankment Volume	In computing volumes of excavation, the average end area method will be used unless otherwise specified.
Measurement and Proportion by Weight	The term "ton" will mean the short ton consisting of 2,000 pounds avoirdupois. All materials that are measured or proportioned by weights shall be weighed on accurate, independently certified scales by competent, qualified personnel at locations designated by the RPR. If material is shipped by rail, the car weight may be accepted provided that only the actual weight of material is paid for. However, car weights will not be acceptable for material to be passed through mixing plants. Trucks used to haul material being paid for by weight shall be weighed empty daily at such times as the RPR directs, and each truck shall bear a plainly legible identification mark.
Measurement by Volume	Materials to be measured by volume in the hauling vehicle shall be hauled in approved vehicles and measured therein at the point of delivery. Vehicles for this purpose may be of any size or type acceptable for the materials hauled, provided that the body is of such shape that the actual contents may be readily and accurately determined. All vehicles shall be loaded to at least their water level capacity, and all loads shall be leveled when the vehicles arrive at the point of delivery.

Term	Description
Asphalt Material	Asphalt materials will be measured by the gallon or ton. When measured by volume, such volumes will be measured at 60°F or will be corrected to the volume at 60°F using ASTM D1250 for asphalts. Net certified scale weights or weights based on certified volumes in the case of rail shipments will be used as a basis of measurement, subject to correction when asphalt material has been lost from the car or the distributor, wasted, or otherwise not incorporated in the work. When asphalt materials are shipped by truck or transport, net certified weights by volume, subject to correction for loss or foaming, will be used for computing quantities.
Cement	Cement will be measured by the ton or hundredweight.
Structure	Structures will be measured according to neat lines shown on the plans or as altered to fit field conditions.
Timber	Timber will be measured by the thousand feet board measure (MFBM) actually incorporated in the structure. Measurement will be based on nominal widths and thicknesses and the extreme length of each piece.
Plates and Sheets	The thickness of plates and galvanized sheet used in the manufacture of corrugated metal pipe, metal plate pipe culverts and arches, and metal cribbing will be specified and measured in decimal fraction of inch.
Miscellaneous Items	When standard manufactured items are specified such as fence, wire, plates, rolled shapes, pipe conduit, etc., and these items are identified by gauge, unit weight, section dimensions, etc., such identification will be considered to be nominal weights or dimensions. Unless more stringently controlled by tolerances in cited specifications, manufacturing tolerances established by the industries involved will be accepted.
Scales	Scales must be tested for accuracy and serviced before use. Scales for weighing materials which are required to be proportioned or measured and paid for by weight shall be furnished, erected, and maintained by Contractor, or be certified permanently installed commercial scales. Platform scales shall be installed and maintained with the platform level and rigid bulkheads at each end. Scales shall be accurate within 0.5% of the correct weight throughout the range of use. Contractor shall have the scales checked under the observation of the RPR before beginning work and at such other times as requested. The intervals shall be uniform in spacing throughout the graduated or marked length of the beam or dial and shall not exceed 0.1% of the nominal rated capacity of the scale, but not less than 1 pound. The use of spring balances will not be permitted. In the event inspection reveals the scales have been "overweighing" (indicating more than correct weight) they will be immediately adjusted. All materials received subsequent to the last previous correct weighting-accuracy test will be reduced by the percentage of error in excess of 0.5%. In the event inspection reveals the scales have been under-weighing (indicating less than correct weight), they shall be immediately adjusted. No additional payment to Contractor will be allowed for materials previously weighed and recorded. Beams, dials, platforms, and other scale equipment shall be so arranged that the operator and the RPR can safely and conveniently view them. Scale installations shall have available ten standard 50-pound weights for testing the weighing equipment or suitable weights and devices for other approved equipment.

Term	Description
	All costs in connection with furnishing, installing, certifying, testing, and maintaining scales; for furnishing check weights and scale house; and for all other items specified in this subsection, for the weighing of materials for proportioning or payment, shall be included in the unit contract prices for the various items of the project.
Rental Equipment	Rental of equipment will be measured by time in hours of actual working time and necessary traveling time of the equipment within the limits of the work. Special equipment ordered in connection with extra work will be measured as agreed in the change order or supplemental agreement authorizing such work as provided in paragraph 90-05 *Payment for Extra Work*.
Pay Quantities	When the estimated quantities for a specific portion of the work are designated as the pay quantities in the contract, they shall be the final quantities for which payment for such specific portion of the work will be made, unless the dimensions of said portions of the work shown on the plans are revised by the RPR. If revised dimensions result in an increase or decrease in the quantities of such work, the final quantities for payment will be revised in the amount represented by the authorized changes in the dimensions.

90-02 Scope of payment. Contractor shall receive and accept compensation provided for in the contract as full payment for furnishing all materials, for performing all work under the contract in a complete and acceptable manner, and for all risk, loss, damage, or expense of whatever character arising out of the nature of the work or the execution thereof, subject to the provisions of Section 70, paragraph 70-18, *No Waiver of Legal Rights*.

When the "basis of payment" subsection of a technical specification requires that the contract price (price bid) include compensation for certain work or material essential to the item, this same work or material will not also be measured for payment under any other contract item which may appear elsewhere in the contract, plans, or specifications.

90-03 Compensation for altered quantities. When the accepted quantities of work vary from the quantities in the proposal, Contractor shall accept as payment in full, so far as contract items are concerned, payment at the original contract price for the accepted quantities of work actually completed and accepted. No allowance, except as provided for in Section 40, paragraph 40-02, *Alteration of Work and Quantities,* will be made for any increased expense, loss of expected reimbursement, or loss of anticipated profits suffered or claimed by Contractor which results directly from such alterations or indirectly from their own unbalanced allocation of overhead and profit among the contract items, or from any other cause.

90-04 Payment for omitted items. As specified in Section 40, paragraph 40-03, *Omitted Items,* the RPR shall have the right to omit from the work (order nonperformance) any contract item, except major contract items, in the best interest of Owner.

Should the RPR omit or order nonperformance of a contract item or portion of such item from the work, Contractor shall accept payment in full at the contract prices for any work actually completed and acceptable prior to the RPR’s order to omit or non-perform such contract item.

Acceptable materials ordered by Contractor or delivered on the work prior to the date of the RPR’s order will be paid for at the actual cost to Contractor and shall thereupon become the property of Owner.

In addition to the reimbursement hereinbefore provided, Contractor shall be reimbursed for all actual costs incurred for the purpose of performing the omitted contract item prior to the date of the RPR’s order. Such additional costs incurred by Contractor must be directly related to the deleted contract item and shall be supported by certified statements by Contractor as to the nature the amount of such costs.

90-05 Payment for extra work. Extra work, performed in accordance with Section 40, paragraph 40-04, *Extra Work*, will be paid for at the contract prices or agreed prices specified in the change order or supplemental agreement authorizing the extra work.

90-06 Partial payments. Partial payments will be made to Contractor at least once each month as the work progresses. Said payments will be based upon estimates, prepared by the RPR, of the value of the work performed and materials complete and in place, in accordance with the contract, plans, and specifications. Such partial payments may also include the delivered actual cost of those materials stockpiled and stored in accordance with paragraph 90-07, *Payment for Materials on Hand*. No partial payment will be made when the amount due to Contractor since the last estimate amounts to less than five hundred dollars.

Owner may hold retainage from prime Contractors and provide for prompt and regular incremental acceptances of portions of the prime contract, pay retainage to prime Contractors based on these acceptances, and require a contract clause obligating the prime Contractor to pay all retainage owed to the subcontractor for satisfactory completion of the accepted work within 30 days after Owner's payment to the prime Contractor. If Option 3 is selected, the percent withheld may range from 0% to 10% but in no case may it exceed 10%. When establishing a suitable retainage value that protects Owner's interests, give consideration that the performance and payment bonds also provide similar protection of Owner interests. Owner may elect to incrementally release retainage if owner is satisfied its interest with completion of the project are protected in an adequate manner. If Option 3 is selected, insert the following clause and specify a suitable value where indicated:

a. From the total of the amount determined to be payable on a partial payment, five (5%) percent of such total amount will be deducted and retained by Owner for protection of Owner's interests. Unless otherwise instructed by Owner, the amount retained by Owner will be in effect until the final payment is made except as follows:

(1) Contractor may request release of retainage on work that has been partially accepted by Owner in accordance with Section 50-03. Contractor must provide a certified invoice to the RPR that supports the value of retainage held by Owner for partially accepted work.

(2) In lieu of retainage, Contractor may exercise at its option the establishment of an escrow account per paragraph 90-08.

b. Contractor is required to pay all subcontractors for satisfactory performance of their contracts no later than 30 days after Contractor has received a partial payment. Contractor must provide Owner evidence of prompt and full payment of retainage held by the prime Contractor to the subcontractor within 30 days after the subcontractor's work is satisfactorily completed. A subcontractor's work is satisfactorily completed when all the tasks called for in the subcontract have been accomplished and documented as required by Owner. When Owner has made an incremental acceptance of a portion of a prime contract, the work of a subcontractor covered by that acceptance is deemed to be satisfactorily completed.

c. When at least 95% of the work has been completed to the satisfaction of the RPR, the RPR shall, at Owner's discretion and with the consent of the surety, prepare estimates of both the contract value and the cost of the remaining work to be done. Owner may retain an amount not less than twice the contract value or estimated cost, whichever is greater, of the work remaining to be done. The remainder, less all previous payments and deductions, will then be certified for payment to Contractor.

It is understood and agreed that Contractor shall not be entitled to demand or receive partial payment based on quantities of work in excess of those provided in the proposal or covered by approved change orders or

supplemental agreements, except when such excess quantities have been determined by the RPR to be a part of the final quantity for the item of work in question.

No partial payment shall bind Owner to the acceptance of any materials or work in place as to quality or quantity. All partial payments are subject to correction at the time of final payment as provided in paragraph 90-09, *Acceptance and Final Payment*.

Contractor shall deliver to Owner a complete release of all claims for labor and material arising out of this contract before the final payment is made. If any subcontractor or supplier fails to furnish such a release in full, Contractor may furnish a bond or other collateral satisfactory to Owner to indemnify Owner against any potential lien or other such claim. The bond or collateral shall include all costs, expenses, and attorney fees Owner may be compelled to pay in discharging any such lien or claim.

90-07 Payment for materials on hand. Partial payments may be made to the extent of the delivered cost of materials to be incorporated in the work, provided that such materials meet the requirements of the contract, plans, and specifications and are delivered to acceptable sites on the airport property or at other sites in the vicinity that are acceptable to Owner. Such delivered costs of stored or stockpiled materials may be included in the next partial payment after the following conditions are met:

a. The material has been stored or stockpiled in a manner acceptable to the RPR at or on an approved site.

b. Contractor has furnished the RPR with acceptable evidence of the quantity and quality of such stored or stockpiled materials.

c. Contractor has furnished the RPR with satisfactory evidence that the material and transportation costs have been paid.

d. Contractor has furnished Owner legal title (free of liens or encumbrances of any kind) to the material stored or stockpiled.

e. Contractor has furnished Owner evidence that the material stored or stockpiled is insured against loss by damage to or disappearance of such materials at any time prior to use in the work.

It is understood and agreed that the transfer of title and Owner's payment for such stored or stockpiled materials shall in no way relieve Contractor of their responsibility for furnishing and placing such materials in accordance with the requirements of the contract, plans, and specifications.

In no case will the amount of partial payments for materials on hand exceed the contract price for such materials or the contract price for the contract item in which the material is intended to be used.

No partial payment will be made for stored or stockpiled living or perishable plant materials.

Contractor shall bear all costs associated with the partial payment of stored or stockpiled materials in accordance with the provisions of this paragraph.

90-08 Payment of withheld funds. At Contractor's option, if an Owner withholds retainage in accordance with the methods described in paragraph 90-06 *Partial Payments*, Contractor may request that Owner deposit the retainage into an escrow account. Owner's deposit of retainage into an escrow account is subject to the following conditions:

a. Contractor shall bear all expenses of establishing and maintaining an escrow account and escrow agreement acceptable to Owner.

b. Contractor shall deposit to and maintain in such escrow only those securities or bank certificates of deposit as are acceptable to Owner and having a value not less than the retainage that would otherwise be withheld from partial payment.

c. Contractor shall enter into an escrow agreement satisfactory to Owner.

d. Contractor shall obtain the written consent of the surety to such agreement.

90-09 Acceptance and final payment. When the contract work has been accepted in accordance with the requirements of Section 50, paragraph 50-15, *Final Acceptance*, the RPR will prepare the final estimate of the items of work actually performed. Contractor shall approve the RPR's final estimate or advise the RPR of Contractor's objections to the final estimate which are based on disputes in measurements or computations of the final quantities to be paid under the contract as amended by change order or supplemental agreement. Contractor and the RPR shall resolve all disputes (if any) in the measurement and computation of final quantities to be paid within 30 calendar days of Contractor's receipt of the RPR's final estimate. If, after such 30-day period, a dispute still exists, Contractor may approve the RPR's estimate under protest of the quantities in dispute, and such disputed quantities shall be considered by Owner as a claim in accordance with Section 50, paragraph 50-16, *Claims for Adjustment and Disputes*.

After Contractor has approved, or approved under protest, the RPR's final estimate, and after the RPR's receipt of the project closeout documentation required in paragraph 90-11, *Contractor Final Project Documentation*, final payment will be processed based on the entire sum, or the undisputed sum in case of approval under protest, determined to be due Contractor less all previous payments and all amounts to be deducted under the provisions of the contract. All prior partial estimates and payments shall be subject to correction in the final estimate and payment.

If Contractor has filed a claim for additional compensation under the provisions of Section 50, paragraph 50-16, *Claims for Adjustments and Disputes,* or under the provisions of this paragraph, such claims will be considered by Owner in accordance with local laws or ordinances. Upon final adjudication of such claims, any additional payment determined to be due Contractor will be paid pursuant to a supplemental final estimate.

90-10 Construction warranty.

a. In addition to any other warranties in this contract, Contractor warrants that work performed under this contract conforms to the contract requirements and is free of any defect in equipment, material, workmanship, or design furnished, or performed by Contractor or any subcontractor or supplier at any tier.

b. This warranty shall continue for a period of one year from the date of final acceptance of the work, except as noted. If Owner takes possession of any part of the work before final acceptance, this warranty shall continue for a period of one year from the date Owner takes possession.

c. Contractor shall remedy at Contractor's expense any failure to conform, or any defect. In addition, Contractor shall remedy at Contractor's expense any damage to Owner real or personal property, when that damage is the result of Contractor's failure to conform to contract requirements; or any defect of equipment, material, workmanship, or design furnished by Contractor.

d. Contractor shall restore any work damaged in fulfilling the terms and conditions of this clause. Contractor's warranty with respect to work repaired or replaced will run for one year from the date of repair or replacement.

e. Owner will notify Contractor, in writing, within seven days after the discovery of any failure, defect, or damage.

f. If Contractor fails to remedy any failure, defect, or damage within 14 days after receipt of notice, Owner shall have the right to replace, repair, or otherwise remedy the failure, defect, or damage at Contractor's expense.

g. With respect to all warranties, express or implied, from subcontractors, manufacturers, or suppliers for work performed and materials furnished under this contract, Contractor shall: (1) obtain all warranties that would be given in normal commercial practice; (2) require all warranties to be executed, in writing, for the benefit of Owner, as directed by Owner, and (3) enforce all warranties for the benefit of Owner.

h. This warranty shall not limit Owner's rights with respect to latent defects, gross mistakes, or fraud.

90-11 Contractor Final Project Documentation. Approval of final payment to Contractor is contingent upon completion and submittal of the items listed below. The final payment will not be approved until the RPR approves Contractor's final submittal. Contractor shall:

a. Provide two copies of all manufacturers warranties specified for materials, equipment, and installations.

b. Provide weekly payroll records (not previously received) from the general Contractor and all subcontractors.

c. Complete final cleanup in accordance with Section 40, paragraph 40-08, *Final Cleanup*.

d. Complete all punch list items identified during the Final Inspection.

e. Provide complete release of all claims for labor and material arising out of the Contract.

f. Provide a certified statement signed by the subcontractors, indicating actual amounts paid to the Disadvantaged Business Enterprise (DBE) subcontractors and/or suppliers associated with the project.

g. When applicable per state requirements, return copies of sales tax completion forms.

h. Manufacturer's certifications for all items incorporated in the work.

i. All required record drawings, as-built drawings or as-constructed drawings.

j. Project Operation and Maintenance (O&M) Manual(s).

k. Security for Construction Warranty.

l. Equipment commissioning documentation submitted, if required.

END OF SECTION 90

Item C-100 Contractor Quality Control Program (CQCP)

100-1 General. Quality is more than test results. Quality is the combination of proper materials, testing, workmanship, equipment, inspection, and documentation of the Project. Establishing and maintaining a culture of quality is key to achieving a quality project. Contractor shall establish, provide, and maintain an effective Contractor Quality Control Program (CQCP) that details the methods and procedures that will be taken to assure that all materials and completed construction required by this contract conform to contract plans, technical specifications, and other requirements, whether manufactured by Contractor, or procured from subcontractors or vendors. Although guidelines are established and certain minimum requirements are specified here and elsewhere in the contract technical specifications, Contractor shall assume full responsibility for accomplishing the stated purpose.

Contractor shall establish a CQCP that will:

a. Provide qualified personnel to develop and implement the CQCP.

b. Provide for the production of acceptable quality materials.

c. Provide sufficient information to assure that the specification requirements can be met.

d. Document the CQCP process.

Contractor shall not begin any construction or production of materials to be incorporated into the completed work until the CQCP has been reviewed and approved by the Resident Project Representative (RPR). No partial payment will be made for materials subject to specific quality control (QC) requirements until the CQCP has been reviewed and approved.

The QC requirements contained in this section and elsewhere in the contract technical specifications are in addition to and separate from the quality assurance (QA) testing requirements. QA testing requirements are the responsibility of the RPR or Contractor as specified in the specifications.

A Quality Control (QC)/Quality Assurance (QA) workshop with Engineer, Resident Project Representative (RPR), Contractor, subcontractors, testing laboratories, and Owner's representative must be held prior to start of construction. The QC/QA workshop will be facilitated by Contractor. Contractor shall coordinate with the Airport and the RPR on time and location of the QC/QA workshop. Items to be addressed, at a minimum, will include:

a. Review of the CQCP including submittals, QC Testing, Action & Suspension Limits for Production, Corrective Action Plans, Distribution of QC reports, and Control Charts.

b. Discussion of the QA program.

c. Discussion of the QC and QA Organization and authority including coordination and information exchange between QC and QA.

d. Establish regular meetings to discuss control of materials, methods and testing.

e. Establishment of the overall QC culture.

100-2 Description of program.

a. General description. Contractor shall establish a CQCP to perform QC inspection and testing of all items of work required by the technical specifications, including those performed by subcontractors. The CQCP shall ensure conformance to applicable specifications and plans with respect to materials, off-site

fabrication, workmanship, construction, finish, and functional performance. The CQCP shall be effective for control of all construction work performed under this Contract and shall specifically include surveillance and tests required by the technical specifications, in addition to other requirements of this section and any other activities deemed necessary by Contractor to establish an effective level of QC.

b. Contractor Quality Control Program (CQCP). Contractor shall describe the CQCP in a written document that shall be reviewed and approved by the RPR prior to the start of any production, construction, or off-site fabrication. The written CQCP shall be submitted to the RPR for review and approval at least 10 calendar days before the CQCP Workshop. Contractor's CQCP and QC testing laboratory must be approved in writing by the RPR prior to the Notice to Proceed (NTP).

The CQCP shall be organized to address, as a minimum, the following:

1. QC organization and resumes of key staff
2. Project progress schedule
3. Submittals schedule
4. Inspection requirements
5. QC testing plan
6. Documentation of QC activities and distribution of QC reports
7. Requirements for corrective action when QC and/or QA acceptance criteria are not met
8. Material quality and construction means and methods. Address all elements applicable to the Project that affect the quality of the pavement structure including subgrade, subbase, base, and surface course. Some elements that must be addressed include, but is not limited to mix design, aggregate grading, stockpile management, mixing and transporting, placing and finishing, quality control testing and inspection, smoothness, laydown plan, equipment, and temperature management plan.

Contractor must add any additional elements to the CQCP that is necessary to adequately control all production and/or construction processes required by this contract.

100-3 CQCP organization. The CQCP shall be implemented by the establishment of a QC organization. An organizational chart shall be developed to show all QC personnel, their authority, and how these personnel integrate with other management/production and construction functions and personnel.

The organizational chart shall identify all QC staff by name and function, and shall indicate the total staff required to implement all elements of the CQCP, including inspection and testing for each item of work. If necessary, different technicians can be used for specific inspection and testing functions for different items of work. If an outside organization or independent testing laboratory is used for implementation of all or part of the CQCP, the personnel assigned shall be subject to the qualification requirements of paragraphs 100-03a and 100-03b. The organizational chart shall indicate which personnel are Contractor employees and which are provided by an outside organization.

The QC organization shall, as a minimum, consist of the following personnel:

a. Program Administrator. Contractor Quality Control Program Administrator (CQCPA) must be a full-time employee of Contractor, or a consultant engaged by Contractor. The CQCPA must have a minimum of five (5) years of experience in QC pavement construction with prior QC experience on a project of comparable size and scope as the contract.

Included in the five (5) years of paving/QC experience, the CQCPA must meet at least one of the following requirements:

(1) Professional Engineer with one (1) year of airport paving experience.

(2) Engineer-in-training with two (2) years of airport paving experience.

(3) National Institute for Certification in Engineering Technologies (NICET) Civil Engineering Technology Level IV with three (3) years of airport paving experience.

(4) An individual with four (4) years of airport paving experience, with a Bachelor of Science Degree in Civil Engineering, Civil Engineering Technology, or Construction.

The CQCPA must have full authority to institute any and all actions necessary for the successful implementation of the CQCP to ensure compliance with the contract plans and technical specifications. The CQCPA authority must include the ability to immediately stop production until materials and/or processes are in compliance with contract specifications. The CQCPA must report directly to a principal officer of the construction firm. The CQCPA may supervise the Quality Control Program on more than one project provided that person can be at the job site within two (2) hours after being notified of a problem.

b. QC technicians. A sufficient number of QC technicians necessary to adequately implement the CQCP must be provided. These personnel must be either Engineers, engineering technicians, or experienced craftsman with qualifications in the appropriate field equivalent to NICET Level II in Civil Engineering Technology or higher, and shall have a minimum of two (2) years of experience in their area of expertise.

The QC technicians must report directly to the CQCPA and shall perform the following functions:

(1) Inspection of all materials, construction, plant, and equipment for conformance to the technical specifications, and as required by Paragraph 100-6.

(2) Performance of all QC tests as required by the technical specifications and paragraph100-8.

(3) Performance of tests for the RPR when required by the technical specifications.

Certification at an equivalent level of qualification and experience by a state or nationally recognized organization will be acceptable in lieu of NICET certification.

c. Staffing levels. Contractor shall provide sufficient qualified QC personnel to monitor each work activity at all times. Where material is being produced in a plant for incorporation into the work, separate plant and field technicians shall be provided at each plant and field placement location. The scheduling and coordinating of all inspection and testing must match the type and pace of work activity. The CQCP shall state where different technicians will be required for different work elements.

100-4 Project progress schedule. Critical QC activities must be shown on the Project schedule as required by Section 80, Paragraph 80-03, Execution and Progress.

100-5 Submittals schedule. Contractor shall submit a detailed listing of all submittals (for example, mix designs, material certifications) and shop drawings required by the technical specifications. The listing can be developed in a spreadsheet format and shall include as a minimum:

a. Specification item number

b. Item description

c. Description of submittal

d. Specification paragraph requiring submittal

e. Scheduled date of submittal

100-6 Inspection requirements. QC inspection functions shall be organized to provide inspections for all definable features of work, as detailed below. All inspections shall be documented by Contractor as specified by Paragraph 100-9.

Inspections shall be performed as needed to ensure continuing compliance with contract requirements until completion of the particular feature of work. Inspections shall include the following minimum requirements:

a. During plant operation for material production, QC test results and periodic inspections shall be used to ensure the quality of aggregates and other mix components, and to adjust and control mix proportioning to meet the approved mix design and other requirements of the technical specifications. All equipment used in proportioning and mixing shall be inspected to ensure its proper operating condition. The CQCP shall detail how these and other QC functions will be accomplished and used.

b. During field operations, QC test results and periodic inspections shall be used to ensure the quality of all materials and workmanship. All equipment used in placing, finishing, and compacting shall be inspected to ensure its proper operating condition and to ensure that all such operations are in conformance to the technical specifications and are within the plan dimensions, lines, grades, and tolerances specified. The CQCP shall document how these and other QC functions will be accomplished and used.

100-7 Contractor QC testing facility.

a. For projects that include Item P-401, Item P-403, and Item P-404, Contractor shall ensure facilities, including all necessary equipment, materials, and current reference standards, are provided that meet requirements in the following paragraphs of ASTM D3666, Standard Specification for Minimum Requirements for Agencies Testing and Inspecting Road and Paving Materials:

- 8.1.3 Equipment Calibration and Checks;
- 8.1.9 Equipment Calibration, Standardization, and Check Records;
- 8.1.12 Test Methods and Procedures

b. For projects that include P-501, Contractor shall ensure facilities, including all necessary equipment, materials, and current reference standards, are provided that meet requirements in the following paragraphs of ASTM C1077, Standard Practice for Agencies Testing Concrete and Concrete Aggregates for Use in Construction and Criteria for Testing Agency Evaluation:

- 7 Test Methods and Procedures
- 8 Facilities, Equipment, and Supplemental Procedures

100-8 QC testing plan. As a part of the overall CQCP, Contractor shall implement a QC testing plan, as required by the technical specifications. The testing plan shall include the minimum tests and test frequencies required by each technical specification Item, as well as any additional QC tests that Contractor deems necessary to adequately control production and/or construction processes.

The QC testing plan can be developed in a spreadsheet fashion and shall, as a minimum, include the following:

a. Specification item number (e.g., P-401)

b. Item description (e.g., Hot Mix Asphalt Pavements)

c. Test type (e.g., gradation, grade, asphalt content)

d. Test standard (e.g., ASTM or American Association of State Highway and Transportation Officials (AASHTO) test number, as applicable)

e. Test frequency (e.g., as required by technical specifications or minimum frequency when requirements are not stated)

f. Responsibility (e.g., plant technician)

g. Control requirements (e.g., target, permissible deviations)

The QC testing plan shall contain a statistically-based procedure of random sampling for acquiring test samples in accordance with ASTM D3665. The RPR shall be provided the opportunity to witness QC sampling and testing.

All QC test results shall be documented by Contractor as required by Paragraph 100-9.

100-9 Documentation. Contractor shall maintain current QC records of all inspections and tests performed. These records shall include factual evidence that the required QC inspections or tests have been performed, including type and number of inspections or tests involved; results of inspections or tests; nature of defects, deviations, causes for rejection, etc.; proposed remedial action; and corrective actions taken.

These records must cover both conforming and defective or deficient features, and must include a statement that all supplies and materials incorporated in the work are in full compliance with the terms of the contract. Legible copies of these records shall be furnished to the RPR daily. The records shall cover all work placed subsequent to the previously furnished records and shall be verified and signed by the CQCPA.

Contractor QC records required for the contract shall include, but are not necessarily limited to, the following records:

a. Daily inspection reports. Each Contractor QC technician shall maintain a daily log of all inspections performed for both Contractor and subcontractor operations. These technician's daily reports shall provide factual evidence that continuous QC inspections have been performed and shall, as a minimum, include the following:

(1) Technical specification item number and description

(2) Compliance with approved submittals

(3) Proper storage of materials and equipment

(4) Proper operation of all equipment

(5) Adherence to plans and technical specifications

(6) Summary of any necessary corrective actions

(7) Safety inspection.

The daily inspection reports shall identify all QC inspections and QC tests conducted, results of inspections, location and nature of defects found, causes for rejection, and remedial or corrective actions taken or proposed.

The daily inspection reports shall be signed by the responsible QC technician and the CQCPA. The RPR shall be provided at least one copy of each daily inspection report on the work day following the day of record. When QC inspection and test results are recorded and transmitted electronically, the results must be archived.

b. Daily test reports. Contractor shall be responsible for establishing a system that will record all QC test results. Daily test reports shall document the following information:

(1) Technical specification item number and description

(2) Test designation

(3) Location

(4) Date of test

(5) Control requirements

(6) Test results

(7) Causes for rejection

(8) Recommended remedial actions

(9) Retests

Test results from each day's work period shall be submitted to the RPR prior to the start of the next day's work period. When required by the technical specifications, Contractor shall maintain statistical QC charts. When QC daily test results are recorded and transmitted electronically, the results must be archived.

100-10 Corrective action requirements. The CQCP shall indicate the appropriate action to be taken when a process is deemed, or believed, to be out of control (out of tolerance) and detail what action will be taken to bring the process into control. The requirements for corrective action shall include both general requirements for operation of the CQCP as a whole, and for individual items of work contained in the technical specifications.

The CQCP shall detail how the results of QC inspections and tests will be used for determining the need for corrective action and shall contain clear rules to gauge when a process is out of control and the type of correction to be taken to regain process control.

When applicable or required by the technical specifications, Contractor shall establish and use statistical QC charts for individual QC tests. The requirements for corrective action shall be linked to the control charts.

100-11 Inspection and/or observations by the RPR. All items of material and equipment are subject to inspection and/or observation by the RPR at the point of production, manufacture or shipment to determine if Contractor, producer, manufacturer or shipper maintains an adequate QC system in conformance with the requirements detailed here and the applicable technical specifications and plans. In addition, all items of materials, equipment and work in place shall be subject to inspection and/or observation by the RPR at the site for the same purpose.

Inspection and/or observations by the RPR does not relieve Contractor of performing QC inspections of either on-site or off-site Contractor's or subcontractor's work.

100-12 Noncompliance.

a. The Resident Project Representative (RPR) will provide written notice to Contractor of any noncompliance with their CQCP. After receipt of such notice, Contractor must take corrective action.

b. When QC activities do not comply with either the CQCP or the contract provisions or when Contractor fails to properly operate and maintain an effective CQCP, and no effective corrective actions have been taken after notification of non-compliance, the RPR will recommend Owner take the following actions:

(1) Order Contractor to replace ineffective or unqualified QC personnel or subcontractors and/or

(2) Order Contractor to stop operations until appropriate corrective actions are taken.

METHOD OF MEASUREMENT

100-13 Basis of measurement and payment. Contractor Quality Control Program (CQCP) is for the personnel, tests, facilities, and documentation required to implement the CQCP. The CQCP will be paid as a lump sum with the following schedule of partial payments:

a. With first pay request, 25 percent with approval of CQCP and completion of the Quality Control (QC)/Quality Assurance (QA) workshop.

b. When 25 percent or more of the original contract is earned, an additional 25 percent.

c. When 50 percent or more of the original contract is earned, an additional 20 percent.

d. When 75 percent or more of the original contract is earned, an additional 20 percent.

e. After final inspection and acceptance of Project, the final 10 percent.

BASIS OF PAYMENT

100-14 Payment will be made under:

Item C-100	Contractor Quality Control Program (CQCP

END OF ITEM C-100

Item C-102 Temporary Air and Water Pollution, Soil Erosion, and Siltation Control

DESCRIPTION

102-1. This item shall consist of temporary control measures as shown on the plans or as ordered by the Resident Project Representative (RPR) during the life of a contract to control pollution of air and water, soil erosion, and siltation through the use of silt fences, berms, dikes, dams, sediment basins, fiber mats, gravel, mulches, grasses, slope drains, and other erosion control devices or methods.

Temporary erosion control shall be in accordance with the approved erosion control plan; the approved Construction Safety and Phasing Plan (CSPP) and AC 150/5370-2, *Operational Safety on Airports During Construction*. The temporary erosion control measures contained herein shall be coordinated with the permanent erosion control measures specified as part of this contract to the extent practical to assure economical, effective, and continuous erosion control throughout the construction period.

Temporary control may include work outside the construction limits such as borrow pit operations, equipment and material storage sites, waste areas, and temporary plant sites.

Temporary control measures shall be designed, installed and maintained to minimize the creation of wildlife attractants that have the potential to attract hazardous wildlife on or near public-use airports.

MATERIALS

102-2.1 Grass. Grass that will not compete with the grasses sown later for permanent cover per Item T-901shall be a quick-growing species (such as ryegrass, Italian ryegrass, or cereal grasses) suitable to the area providing a temporary cover. Selected grass species shall not create a wildlife attractant.

102-2.2 Mulches. Mulches may be hay, straw, fiber mats, netting, bark, wood chips, or other suitable material reasonably clean and free of noxious weeds and deleterious materials per Item T-908. Mulches shall not create a wildlife attractant.

102-2.3 Fertilizer. Fertilizer shall be a standard commercial grade and shall conform to all federal and state regulations and to the standards of the Association of Official Agricultural Chemists.

102-2.4 Slope drains. Slope drains may be constructed of pipe, fiber mats, rubble, concrete, asphalt, or other materials that will adequately control erosion.

102-2.5 Silt fence. Silt fence shall consist of polymeric filaments which are formed into a stable network such that filaments retain their relative positions. Synthetic filter fabric shall contain ultraviolet ray inhibitors and stabilizers to provide a minimum of six months of expected usable construction life. Silt fence shall meet the requirements of ASTM D6461.

102-2.6 Other. All other materials shall meet commercial grade standards and shall be approved by RPR before being incorporated into the Project.

CONSTRUCTION REQUIREMENTS

102-3.1 General. In the event of conflict between these requirements and pollution control laws, rules, or regulations of other federal, state, or local agencies, the more restrictive laws, rules, or regulations shall apply.

RPR shall be responsible for assuring compliance to the extent that construction practices, construction operations, and construction work are involved.

102-3.2 Schedule. Prior to the start of construction, Contractor shall submit schedules in accordance with the approved Construction Safety and Phasing Plan (CSPP) and the plans for accomplishment of temporary and permanent erosion control work for clearing and grubbing; grading; construction; paving; and structures at watercourses. Contractor shall also submit a proposed method of erosion and dust control on haul roads and borrow pits and a plan for disposal of waste materials. Work shall not be started until the erosion control schedules and methods of operation for the applicable construction have been accepted by RPR.

102-3.3 Construction details. Contractor will be required to incorporate all permanent erosion control features into the Project at the earliest practicable time as outlined in the plans and approved CSPP. Except where future construction operations will damage slopes, Contractor shall perform the permanent seeding and mulching and other specified slope protection work in stages, as soon as substantial areas of exposed slopes can be made available. Temporary erosion and pollution control measures will be used to correct conditions that develop during construction that were not foreseen during the design stage; that are needed prior to installation of permanent control features; or that are needed temporarily to control erosion that develops during normal construction practices, but are not associated with permanent control features on the Project.

Where erosion may be a problem, schedule and perform clearing and grubbing operations so that grading operations and permanent erosion control features can follow immediately if project conditions permit. Temporary erosion control measures are required if permanent measures cannot immediately follow grading operations. RPR shall limit the area of clearing and grubbing, excavation, borrow, and embankment operations in progress, commensurate with Contractor's capability and progress in keeping the finish grading, mulching, seeding, and other such permanent control measures current with the accepted schedule. If seasonal limitations make such coordination unrealistic, temporary erosion control measures shall be taken immediately to the extent feasible and justified as directed by RPR.

Contractor shall provide immediate permanent or temporary pollution control measures to minimize contamination of adjacent streams or other watercourses, lakes, ponds, or other areas of water impoundment as directed by RPR. If temporary erosion and pollution control measures are required due to Contractor's negligence, carelessness, or failure to install permanent controls as a part of the work as scheduled or directed by RPR, the work shall be performed by Contractor and the cost shall be incidental to this item.

RPR may increase or decrease the area of erodible earth material that can be exposed at any time based on an analysis of project conditions.

The erosion control features installed by Contractor shall be maintained by Contractor during the construction period.

Provide temporary structures whenever construction equipment must cross watercourses at frequent intervals. Pollutants such as fuels, lubricants, bitumen, raw sewage, wash water from concrete mixing operations, and other harmful materials shall not be discharged into any waterways, impoundments or into natural or manmade channels.

102-3.4 Installation, maintenance and removal of silt fence. Silt fences shall extend minimum 16 inches and a maximum of 34 inches above the ground surface. Posts shall be set no more than 10 feet on center. Filter fabric shall be cut from a continuous roll to the length required minimizing joints where possible. When joints are necessary, the fabric shall be spliced at a support post with a minimum 12-inch overlap and securely sealed. A trench shall be excavated approximately 4 inches deep by 4 inches wide on the upslope side of the silt fence. The trench shall be backfilled and the soil compacted over the silt fence fabric. Contractor shall remove and dispose of silt that accumulates during construction and prior to establishment of permanent erosion control. The fence shall be maintained in good working condition until permanent erosion control is established. Silt fence shall be removed upon approval of RPR.

METHOD OF MEASUREMENT

102-4.1 Temporary erosion and pollution control work required will be performed as scheduled or directed by RPR. Completed and accepted work will be measured as follows:

a. Temporary seeding and mulching will be measured by the square yard.

b. Temporary slope drains will be measured by the linear foot.

c. Temporary benches, dikes, dams, and sediment basins will be measured by the cubic yard of excavation performed, including necessary cleaning of sediment basins, and the cubic yard of embankment placed as directed by RPR.

d. All fertilizing will be measured by the ton.

e. Installation and removal of silt fence will be measured by the linear foot.

102-4.2 Control work performed for protection of construction areas outside the construction limits, such as borrow and waste areas, haul roads, equipment and material storage sites, and temporary plant sites, will not be measured and paid for directly but shall be considered as a subsidiary obligation of Contractor.

BASIS OF PAYMENT

102-5.1 Accepted quantities of temporary water pollution, soil erosion, and siltation control work ordered by RPR and measured as provided in Paragraph 102-4.1 will be paid for under:

Item C-102-5.1a Installation and removal of silt fence per linear feet

Where other directed work falls within the specifications for a work item that has a contract price, the units of work shall be measured and paid for at the contract unit price bid for the various items.

Temporary control features not covered by contract items that are ordered by RPR will be paid for in accordance with Section 90, Paragraph 90-05 *Payment for Extra Work*.

END OF ITEM C-102

Item C-105 Mobilization

105-1 Description. This item of work shall consist of, but is not limited to, work and operations necessary for the movement of personnel, equipment, material, and supplies to and from the project site for work on the project except as provided in the contract as separate pay items.

105-2 Mobilization limit. Mobilization shall be limited to 10 percent of the total project cost.

105-3 Posted notices. Prior to commencement of construction activities, the Contractor must post the following documents in a prominent and accessible place where they may be easily viewed by all employees of the prime Contractor and by all employees of subcontractors engaged by the prime Contractor: Equal Employment Opportunity (EEO) Poster "Equal Employment Opportunity is the Law" in accordance with the Office of Federal Contract Compliance Programs Executive Order 11246, as amended; Davis Bacon Wage Poster (WH 1321) - DOL "Notice to All Employees" Poster; and Applicable Davis-Bacon Wage Rate Determination. These notices must remain posted until final acceptance of the work by the Owner.

105-4 Engineer/RPR field office. An Engineer/RPR field office is not required.

METHOD OF MEASUREMENT

105-5 Basis of measurement and payment. Based upon the contract lump sum price for "Mobilization" partial payments will be allowed as follows:

a. With first pay request, 25 percent.

b. When 25 percent or more of the original contract is earned, an additional 25 percent.

c. When 50 percent or more of the original contract is earned, an additional 40 percent.

d. After Final Inspection, Staging area clean-up and delivery of all Project Closeout materials as required by Section 90, Paragraph 90-11, Contractor Final Project Documentation, the final 10 percent.

BASIS OF PAYMENT

105-6 Payment will be made under:

Item C-105 Mobilization

END OF ITEM C-105

Item P-151 Clearing and Grubbing

DESCRIPTION

151-1.1 This item shall consist of clearing or clearing and grubbing, including the disposal of materials, for all areas within the limits designated on the plans or as required by the Resident Project Representative (RPR).

a. Clearing shall consist of the cutting and removal of all trees, stumps, brush, logs, hedges, the removal of fences and other loose or projecting material from the designated areas. The grubbing of stumps and roots will not be required.

b. Clearing and grubbing shall consist of clearing the surface of the ground of the designated areas of all trees, stumps, down timber, logs, snags, brush, undergrowth, hedges, heavy growth of grass or weeds, fences, structures, debris, and rubbish of any nature, natural obstructions or such material which in the opinion of RPR is unsuitable for the foundation of strips, pavements, or other required structures, including the grubbing of stumps, roots, matted roots, foundations, and the disposal from the project of all spoil materials resulting from clearing and grubbing.

c. Tree Removal. Tree Removal shall consist of the cutting and removal of isolated single trees or isolated groups of trees, and the grubbing of stumps and roots. The removal of all the trees of this classification shall be in accordance with the requirements for the particular area being cleared.

CONSTRUCTION METHODS

151-2.1 General. The areas denoted on the plans to be cleared and grubbed shall be staked on the ground by Contractor as indicated on the plans.

The removal of existing structures and utilities required to permit orderly progress of work shall be accomplished by local agencies, unless otherwise shown on the plans. Whenever a telephone pole, pipeline, conduit, sewer, roadway, or other utility is encountered and must be removed or relocated, Contractor shall advise RPR who will notify the proper local authority or owner to secure prompt action.

151-2.1.1 Disposal. All materials removed by clearing or by clearing and grubbing shall be disposed of outside the Airport's limits at Contractor's responsibility, except when otherwise directed by RPR. As far as practicable, waste concrete and masonry shall be placed on slopes of embankments or channels. When embankments are constructed of such material, this material shall be placed in accordance with requirements for formation of embankments. Any broken concrete or masonry that cannot be used in construction and all other materials not considered suitable for use elsewhere, shall be disposed of by Contractor. In no case, shall any discarded materials be left in windrows or piles adjacent to or within the airport limits. The manner and location of disposal of materials shall be subject to the approval of RPR and shall not create an unsightly or objectionable view. When Contractor is required to locate a disposal area outside the airport property limits, Contractor shall obtain and file with RPR permission in writing from the property owner for the use of private property for this purpose.

151-2.1.2 Blasting. Blasting shall not be allowed.

151-2.2 Clearing. Contractor shall clear the staked or indicated area of all materials as indicated on the plans. Trees unavoidably falling outside the specified clearing limits must be cut up, removed, and disposed of in a satisfactory manner. To minimize damage to trees that are to be left standing, trees shall be felled

toward the center of the area being cleared. Contractor shall preserve and protect from injury all trees not to be removed. The trees, stumps, and brush shall be cut flush with the original ground surface. The grubbing of stumps and roots will not be required.

Fences shall be removed and disposed of as directed by RPR. Fence wire shall be neatly rolled and the wire and posts stored on the airport if they are to be used again, or stored at a location designated by RPR if the fence is to remain the property of a local owner or authority.

151-2.3 Clearing and grubbing. In areas designated to be cleared and grubbed, all stumps, roots, buried logs, brush, grass, and other unsatisfactory materials as indicated on the plans, shall be removed, except where embankments exceeding 3-1/2 feet in depth will be constructed outside of paved areas. For embankments constructed outside of paved areas, all unsatisfactory materials shall be removed, but sound trees, stumps, and brush can be cut off flush with the original ground and allowed to remain. Tap roots and other projections over 1-1/2 inches in diameter shall be grubbed out to a depth of at least 18 inches below the finished subgrade or slope elevation.

Any buildings and miscellaneous structures that are shown on the plans to be removed shall be demolished or removed, and all materials shall be disposed of by removal from the site. The cost of removal is incidental to this item. The remaining or existing foundations, wells, cesspools, and like structures shall be destroyed by breaking down the materials of which the foundations, wells, cesspools, etc., are built to a depth at least 2 feet below the existing surrounding ground. Any broken concrete, blocks, or other objectionable material that cannot be used in backfill shall be removed and disposed of at Contractor's expense. The holes or openings shall be backfilled with acceptable material and properly compacted.

All holes in embankment areas remaining after the grubbing operation shall have the sides of the holes flattened to facilitate filling with acceptable material and compacting as required in Item P-152. The same procedure shall be applied to all holes remaining after grubbing in areas where the depth of holes exceeds the depth of the proposed excavation.

METHOD OF MEASUREMENT

151-3.1 The quantities of clearing and grubbing as shown by the limits on the plans shall be the number of square yards of land specifically cleared and grubbed. Any quantity of tree removal shall be considered subsidiary to this item.

BASIS OF PAYMENT

151-4.1 Payment shall be made at the contract unit price per square yard for clearing and grubbing. This price shall be full compensation for furnishing all materials and for all labor, equipment, tools, and incidentals necessary to complete the item.

Payment will be made under:

Item P-151-4.1 Clearing and grubbing - per square yards

END OF ITEM P-151

Item P-152 Excavation, Subgrade, and Embankment

DESCRIPTION

152-1.1 This item covers excavation, disposal, placement, and compaction of all materials within the limits of the work required to construct safety areas, runways, taxiways, aprons, and intermediate areas as well as other areas for drainage, building construction, parking, or other purposes in accordance with these Specifications and in conformity to the dimensions and typical sections shown on the plans.

152-1.2 Classification. All material excavated shall be classified as defined below:

a. Unclassified excavation. Unclassified excavation shall consist of the excavation and disposal of all material, regardless of its nature.

152-1.3 Unsuitable excavation. Unsuitable material shall be removed from Project site and disposed, at Contractor expense. Materials containing construction trash, vegetable or organic matter, such as muck, peat, organic silt, or sod shall be considered unsuitable for use in embankment construction. Material suitable for topsoil may be used on the embankment slope when approved by RPR.

CONSTRUCTION METHODS

152-2.1 General. Before beginning excavation, grading, and embankment operations in any area, the area shall be cleared or cleared and grubbed in accordance with Item P-151.

The suitability of material to be placed in embankments shall be subject to approval by RPR. All unsuitable material shall be disposed of in waste areas as shown on the plans. All waste areas shall be graded to allow positive drainage of the area and adjacent areas. The surface elevation of waste areas shall be specified on the plans or approved by RPR.

When Contractor's excavating operations encounter artifacts of historical or archaeological significance, the operations shall be temporarily discontinued and RPR notified per Section 70, Paragraph 70-20. At the direction of RPR, Contractor shall excavate the site in such a manner as to preserve the artifacts encountered and allow for their removal. Such excavation will be paid for as extra work.

Areas outside the limits of the pavement areas where the top layer of soil has become compacted by hauling or other Contractor activities shall be scarified and disked to a depth of 4 inches, to loosen and pulverize the soil. Stones or rock fragments larger than 4 inches in their greatest dimension will not be permitted in the top 6 inches of the subgrade.

If it is necessary to interrupt existing surface drainage, sewers or under-drainage, conduits, utilities, or similar underground structures, Contractor shall be responsible for and shall take all necessary precautions to preserve them or provide temporary services. When such facilities are encountered, Contractor shall notify RPR, who shall arrange for their removal if necessary. Contractor, at their own expense, shall satisfactorily repair or pay the cost of all damage to such facilities or structures that may result from any of Contractor's operations during the period of the contract.

a. Blasting. Blasting shall not be allowed.

152-2.2 Excavation. No excavation shall be started until the work has been staked out by Contractor and RPR has obtained from Contractor, the survey notes of the elevations and measurements of the ground

surface. Contractor and RPR shall agree that the original ground lines shown on the original topographic mapping are accurate, or agree to any adjustments made to the original ground lines.

Digital terrain model (DTM) files of the existing surfaces, finished surfaces and other various surfaces were used to develop the design plans.

Volumetric quantities were calculated by comparing DTM files of the applicable design surfaces and generating Triangle Volume Reports. Electronic copies of DTM files and a paper copy of the original topographic map will be issued to the successful bidder.

Existing grades on the design cross sections or DTM's, where they do not match the locations of actual spot elevations shown on the topographic map, were developed by computer interpolation from those spot elevations. Prior to disturbing original grade, Contractor shall verify the accuracy of the existing ground surface by verifying spot elevations at the same locations where original field survey data was obtained as indicated on the topographic map. Contractor shall recognize that, due to the interpolation process, the actual ground surface at any particular location may differ somewhat from the interpolated surface shown on the design cross sections or obtained from the DTM's. Contractor's verification of original ground surface, however, shall be limited to verification of spot elevations as indicated herein, and no adjustments will be made to the original ground surface unless Contractor demonstrates that spot elevations shown are incorrect. For this purpose, spot elevations which are within 0.1 foot of the stated elevations for ground surfaces, or within 0.04 foot for hard surfaces (pavements, buildings, foundations, structures, etc.) shall be considered "no change." Only deviations in excess of these will be considered for adjustment of the original ground surface. If Contractor's verification identifies discrepancies in the topographic map, Contractor shall notify RPR in writing at least two weeks before disturbance of existing grade to allow sufficient time to verify the submitted information and make adjustments to the design cross sections or DTM's. Disturbance of existing grade in any area shall constitute acceptance by Contractor of the accuracy of the original elevations shown on the topographic map for that area.

All areas to be excavated shall be stripped of vegetation and topsoil. Topsoil shall be stockpiled for future use in areas designated on the plans or by RPR. All suitable excavated material shall be used in the formation of embankment, subgrade, or other purposes as shown on the plans. All unsuitable material shall be disposed of as shown on the plans.

The grade shall be maintained so that the surface is well drained at all times.

When the volume of the excavation exceeds that required to construct the embankments to the grades as indicated on the plans, the excess shall be used to grade the areas of ultimate development or disposed as directed by RPR. When the volume of excavation is not sufficient for constructing the embankments to the grades indicated, the deficiency shall be obtained from borrow areas.

a. Selective grading. When selective grading is indicated on the plans, the more suitable material designated by RPR shall be used in constructing the embankment or in capping the pavement subgrade. If, at the time of excavation, it is not possible to place this material in its final location, it shall be stockpiled in approved areas until it can be placed. The more suitable material shall then be placed and compacted as specified. Selective grading shall be considered incidental to the work involved. The cost of stockpiling and placing the material shall be included in the various pay items of work involved.

b. Undercutting. Rock, shale, hardpan, loose rock, boulders, or other material unsatisfactory for safety areas, subgrades, roads, shoulders, or any areas intended for turf shall be excavated to a minimum depth of 12 inches (300 mm) below the subgrade or to the depth specified by RPR. Muck, peat, matted roots, or other yielding material, unsatisfactory for subgrade foundation, shall be removed to the depth specified. Unsuitable materials shall be disposed off the airport. The cost is incidental to this item. This excavated material shall be paid for at the contract unit price per square yard for unclassified excavation. The excavated area shall be backfilled with suitable material obtained from the grading operations or borrow areas and compacted to specified densities. The necessary backfill will constitute a part of the embankment.

Where rock cuts are made, backfill with select material. Any pockets created in the rock surface shall be drained in accordance with the details shown on the plans. Undercutting will be paid as unclassified excavation.

c. Over-break. Over-break, including slides, is that portion of any material displaced or loosened beyond the finished work as planned or authorized by RPR. All over-break shall be graded or removed by Contractor and disposed of as directed by RPR. RPR shall determine if the displacement of such material was unavoidable and their own decision shall be final. Payment will not be made for the removal and disposal of over-break that RPR determines as avoidable. Unavoidable over-break will be classified as "Unclassified Excavation."

d. Removal of utilities. The removal of existing structures and utilities required to permit the orderly progress of work will be accomplished by Contractor as indicated on the plans. All existing foundations shall be excavated at least 2 feet below the top of subgrade or as indicated on the plans, and the material disposed of as directed by RPR. All foundations thus excavated shall be backfilled with suitable material and compacted as specified for embankment or as shown on the plans.

152-2.3 Borrow excavation. Borrow areas are not required.

152-2.4 Drainage excavation. Drainage excavation shall consist of excavating drainage ditches including intercepting, inlet, or outlet ditches; or other types as shown on the plans. The work shall be performed in sequence with the other construction. Ditches shall be constructed prior to starting adjacent excavation operations. All satisfactory material shall be placed in embankment fills; unsuitable material shall be placed in designated waste areas or as directed by RPR. All necessary work shall be performed true to final line, elevation, and cross-section. Contractor shall maintain ditches constructed on the project to the required cross-section and shall keep them free of debris or obstructions until the project is accepted.

152-2.5 Preparation of cut areas or areas where existing pavement has been removed. In those areas on which a subbase or base course is to be placed, the top 6 inches of subgrade shall be compacted to not less than 100 percent of maximum density for non-cohesive soils, and 95 percent of maximum density for cohesive soils as determined by ASTM D698. As used in this Specification, "non-cohesive" shall mean those soils having a plasticity index (PI) of less than 3 as determined by ASTM D4318.

152-2.6 Preparation of embankment area. All sod and vegetative matter shall be removed from the surface upon which the embankment is to be placed. The cleared surface shall be broken up by plowing or scarifying to a minimum depth of 6 inches d shall then be compacted per Paragraph 152-2.10.

Sloped surfaces steeper than one (1) vertical to four (4) horizontal shall be plowed, stepped, benched, or broken up so that the fill material will bond with the existing material. When the subgrade is part fill and part excavation or natural ground, the excavated or natural ground portion shall be scarified to a depth of 12 inches and compacted as specified for the adjacent fill.

No direct payment shall be made for the work performed under this section. The necessary clearing and grubbing and the quantity of excavation removed will be paid for under the respective items of work.

152-2.7 Control Strip. The first half-day of construction of subgrade and/or embankment shall be considered as a control strip for Contractor to demonstrate, in the presence of RPR, that the materials, equipment, and construction processes meet the requirements of this Specification. The sequence and manner of rolling necessary to obtain specified density requirements shall be determined. The maximum compacted thickness may be increased to a maximum of 12 inches upon Contractor’s demonstration that approved equipment and operations will uniformly compact the lift to the specified density. RPR must witness this demonstration and approve the lift thickness prior to full production.

Control strips that do not meet specification requirements shall be reworked, re-compacted, or removed and replaced at Contractor’s expense. Full operations shall not begin until the control strip has been accepted

by RPR. Contractor shall use the same equipment, materials, and construction methods for the remainder of construction, unless adjustments made by Contractor are approved in advance by RPR.

152-2.8 Formation of embankments. The material shall be constructed in lifts as established in the control strip, but not less than 6 inches nor more than 12 inches of compacted thickness.

When more than one lift is required to establish the layer thickness shown on the plans, the construction procedure described here shall apply to each lift. No lift shall be covered by subsequent lifts until tests verify that compaction requirements have been met. Contractor shall rework, re-compact and retest any material placed which does not meet the specifications.

The lifts shall be placed, to produce a soil structure as shown on the typical cross-section or as directed by RPR. Materials such as brush, hedge, roots, stumps, grass and other organic matter, shall not be incorporated or buried in the embankment.

Earthwork operations shall be suspended at any time when satisfactory results cannot be obtained due to rain, freezing, or other unsatisfactory weather conditions in the field. Frozen material shall not be placed in the embankment nor shall embankment be placed upon frozen material. Material shall not be placed on surfaces that are muddy, frozen, or contain frost. Contractor shall drag, blade, or slope the embankment to provide surface drainage at all times.

The material in each lift shall be within ±2 percent of optimum moisture content before rolling to obtain the prescribed compaction. The material shall be moistened or aerated as necessary to achieve a uniform moisture content throughout the lift. Natural drying may be accelerated by blending in dry material or manipulation alone to increase the rate of evaporation.

Contractor shall make the necessary corrections and adjustments in methods, materials or moisture content to achieve the specified embankment density.

RPR will take samples of excavated materials which will be used in embankment for testing to obtain a Moisture-Density Relations of Soils Report (Proctor) in accordance with ASTM D698. A new Proctor shall be obtained for each soil type based on visual classification.

Density tests will be taken by RPR for every 3,000 square yards of compacted embankment for each lift which is required to be compacted, or other appropriate frequencies as determined by RPR.

If the material has greater than 30 percent retained on the 3/4-inch sieve, follow AASHTO T-180 Annex Correction of maximum dry density and optimum moisture for oversized particles.

Rolling operations shall be continued until the embankment is compacted to not less than 100 percent of maximum density for non-cohesive soils, and 95 percent of maximum density for cohesive soils as determined by ASTM D698. Under all areas to be paved, the embankments shall be compacted to a depth of 6 inches and to a density of not less than 90 percent of the maximum density as determined by ASTM D698. As used in this Specification, "non-cohesive" shall mean those soils having a plasticity index (PI) of less than 3 as determined by ASTM D4318.

On all areas outside of the pavement areas, no compaction will be required on the top 4 inches which shall be prepared for a seedbed in accordance with Item T-901.

The in-place field density shall be determined in accordance with ASTM 6938 using Procedure A, the direct transmission method, and ASTM D6938 shall be used to determine the moisture content of the material. The machine shall be calibrated in accordance with ASTM D6938. The RPR shall perform all density tests. If the specified density is not attained, the area represented by the test or as designated by RPR shall be reworked and/or re-compacted and additional random tests made. This procedure shall be followed until the specified density is reached.

Compaction areas shall be kept separate, and no lift shall be covered by another lift until the proper density is obtained.

During construction of the embankment, Contractor shall route all construction equipment evenly over the entire width of the embankment as each lift is placed. Lift placement shall begin in the deepest portion of the embankment fill. As placement progresses, the lifts shall be constructed approximately parallel to the finished pavement grade line.

When rock, concrete pavement, asphalt pavement, and other embankment material are excavated at approximately the same time as the subgrade, the material shall be incorporated into the outer portion of the embankment and the subgrade material shall be incorporated under the future paved areas. Stones, fragmentary rock, and recycled pavement larger than 4 inches in their greatest dimensions will not be allowed in the top 12 inches of the subgrade. Rockfill shall be brought up in lifts as specified or as directed by RPR and the finer material shall be used to fill the voids forming a dense, compact mass. Rock, cement concrete pavement, asphalt pavement, and other embankment material shall not be disposed of except at places and in the manner designated on the plans or by RPR.

When the excavated material consists predominantly of rock fragments of such size that the material cannot be placed in lifts of the prescribed thickness without crushing, pulverizing or further breaking down the pieces, such material may be placed in the embankment as directed in lifts not exceeding 2 feet in thickness. Each lift shall be leveled and smoothed with suitable equipment by distribution of spalls and finer fragments of rock. The lift shall not be constructed above an elevation 4 feet below the finished subgrade.

152-2.9 Proof rolling. The purpose of proof rolling the subgrade is to identify any weak areas in the subgrade and not for compaction of the subgrade. Before start of embankment, and after compaction is completed, the subgrade area shall be proof rolled with a 20-ton tandem axle dual-wheel dump truck loaded to the legal limit with tires inflated to 80/100/150 psi in the presence of RPR. Apply a minimum of 50 percent coverage, or as specified by RPR, under pavement areas. A coverage is defined as the application of one tire print over the designated area. Soft areas of subgrade that deflect more than 1 inch or show permanent deformation greater than 1 inch shall be removed and replaced with suitable material or reworked to conform to the moisture content and compaction requirements in accordance with these Specifications. Removal and replacement of soft areas is incidental to this item.

152-2.10 Compaction requirements. The subgrade under areas to be paved shall be compacted to a depth of 6 inches and to a density of not less than 95 percent of the maximum dry density as determined by ASTM D698. The subgrade in areas outside the limits of the pavement areas shall be compacted to a depth of 6 inches and to a density of not less than 90 percent of the maximum density as determined by ASTM D698.

The material to be compacted shall be within ±2 percent of optimum moisture content before being rolled to obtain the prescribed compaction (except for expansive soils). When the material has greater than 30 percent retained on the 3/4-inch sieve, follow methods in ASTM D698. Tests for moisture content and compaction will be taken at a minimum of 1,500 S.Y. of subgrade. All quality assurance testing shall be done by RPR.

The in-place field density shall be determined in accordance with ASTM D6938 using Procedure A, the direct transmission method, and ASTM D6938 shall be used to determine the moisture content of the material. The machine shall be calibrated in accordance with ASTM D6938 within 12 months prior to its use on this contract. The gage shall be field standardized daily.

Density tests will be taken by RPR for every 1,500 square yards of completed subgrade. If a nuclear gage is used for density determination, two random readings shall be made for each 5,000 square yards.

Maximum density refers to maximum dry density at optimum moisture content unless otherwise specified.

If the specified density is not attained, the entire lot shall be reworked/recompacted and additional random tests made. This procedure shall be followed until the specified density is reached.

All cut-and-fill slopes shall be uniformly dressed to the slope, cross-section, and alignment shown on the plans or as directed by RPR and the finished subgrade shall be maintained.

152-2.11 Finishing and protection of subgrade. Finishing and protection of the subgrade is incidental to this item. Grading and compacting of the subgrade shall be performed so that it will drain readily. All low areas, holes or depressions in the subgrade shall be brought to grade. Scarifying, blading, rolling and other methods shall be performed to provide a thoroughly compacted subgrade shaped to the lines and grades shown on the plans. All ruts or rough places that develop in the completed subgrade shall be graded, re-compacted, and retested. Contractor shall protect the subgrade from damage and limit hauling over the finished subgrade to only traffic essential for construction purposes.

Contractor shall maintain the completed course in satisfactory condition throughout placement of subsequent layers. No subbase, base, or surface course shall be placed on the subgrade until the subgrade has been accepted by RPR.

152-2.12 Haul. All hauling will be considered a necessary and incidental part of the work. Contractor shall include the cost in the contract unit price for the pay of items of work involved. No payment will be made separately or directly for hauling on any part of the work.

Contractor's equipment shall not cause damage to any excavated surface, compacted lift or to the subgrade as a result of hauling operations. Any damage caused as a result of Contractor's hauling operations shall be repaired at Contractor's expense.

Contractor shall be responsible for providing, maintaining and removing any haul roads or routes within or outside of the work area, and shall return the affected areas to their former condition, unless otherwise authorized in writing by Owner. No separate payment will be made for any work or materials associated with providing, maintaining and removing haul roads or routes.

152-2.13 Surface Tolerances. In those areas on which a subbase or base course is to be placed, the surface shall be tested for smoothness and accuracy of grade and crown. Any portion lacking the required smoothness or failing in accuracy of grade or crown shall be scarified to a depth of at least 3 inches, reshaped and recompacted to grade until the required smoothness and accuracy are obtained and approved by RPR. Contractor shall perform all final smoothness and grade checks in the presence of RPR. Any deviation in surface tolerances shall be corrected by Contractor at Contractor’s expense.

a. Smoothness. The finished surface shall not vary more than ±1/2-inch when tested with a 12-foot straightedge applied parallel with and at right angles to the centerline. The straightedge shall be moved continuously forward at half the length of the 12-foot straightedge for the full length of each line on a 50-foot grid.

b. Grade. The grade and crown shall be measured on a 50-foot grid and shall be within ±0.05 feet of the specified grade.

On safety areas, turfed areas and other designated areas within the grading limits where no subbase or base is to placed, grade shall not vary more than 0.10 feet from specified grade. Any deviation in excess of this amount shall be corrected by loosening, adding or removing materials, and reshaping.

152-2.14 Topsoil. When topsoil is specified or required as shown on the plans or under Item T-905, it shall be salvaged from stripping or other grading operations. The topsoil shall meet the requirements of Item T-905. If, at the time of excavation or stripping, the topsoil cannot be placed in its final section of finished construction, the material shall be stockpiled at approved locations. Stockpiles shall be located as shown on the plans and the approved CSPP, and shall not be placed on areas that subsequently will require any excavation or embankment fill. If, in the judgment of RPR, it is practical to place the salvaged topsoil at the time of excavation or stripping, the material shall be placed in its final position without stockpiling or further re-handling.

Upon completion of grading operations, stockpiled topsoil shall be handled and placed as shown on the plans and as required in Item T-905. Topsoil shall be paid for as provided in Item T-905. No direct payment will be made for topsoil under Item P-152.

METHOD OF MEASUREMENT

152-3.1 Measurement for payment specified by the square yard shall be computed by the comparison of digital terrain model (DTM) surfaces for computation of neat line design quantities. The end area is that bound by the original ground line established by field cross-sections and the final theoretical pay line established by cross-sections shown on the plans, subject to verification by RPR.

152-3.1 The quantity of unclassified excavation to be paid for shall be the number of square yards measured in its original position. Measurement shall not include the quantity of materials excavated without authorization beyond normal slope lines, or the quantity of material used for purposes other than those directed.

152-3.2 The quantity of embankment in place shall be the number of square yards measured in its final position.

BASIS OF PAYMENT

152-4.1 Unclassified excavation payment shall be made at the contract unit price per square yard (cubic meter). This price shall be full compensation for furnishing all materials, labor, equipment, tools, and incidentals necessary to complete the item.

152-4.2 For embankment in place, payment shall be made at the contract unit price per square yard. This price shall be full compensation for furnishing all materials, labor, equipment, tools, and incidentals necessary to complete the item.

Payment will be made under:

Item P-152-4.1	Unclassified - per square yard;
Item P-152-4.2	Embankment in place - per square yard;
Item P-152-4.3	Grading and subgrade preparations under concrete, 6-inch thickness, per square yard.

END OF ITEM P-152

Item P-605 Joint Sealants for Pavements

DESCRIPTION

605-1.1 This item shall consist of providing and installing a resilient and adhesive joint sealing material capable of effectively sealing joints in pavement; joints between different types of pavements; and cracks in existing pavement.

MATERIALS

605-2.1 Joint sealants. Joint sealant materials shall meet the requirements of ASTM D5893 Standard Specifications for Cold Applied, Single Component, and Chemically Curing Silicone Joint Sealant for Portland Cement Concrete Pavements.

Each lot or batch of sealant shall be delivered to the jobsite in the manufacturer's original sealed container. Each container shall be marked with the manufacturer's name, batch or lot number, the safe heating temperature, and shall be accompanied by the manufacturer's certification stating that the sealant meets the requirements of this Specification.

605-2.2 Backer rod. The material furnished shall be a compressible, non-shrinking, non-staining, non-absorbing material that is non-reactive with the joint sealant in accordance with ASTM D5249. The backer-rod material shall be 25 percent ± 5 percent larger in diameter than the nominal width of the joint.

605-2.3 Bond breaking tapes. Provide a bond-breaking tape or separating material that is flexible, non-shrinkable, non-absorbing, non-staining, and non-reacting adhesive-backed tape. The material shall have a melting point at least 5 degrees F greater than the pouring temperature of the sealant being used when tested in accordance with ASTM D789. The bond breaker tape shall be approximately 1/8-inch wider than the nominal width of the joint and shall not bond to the joint sealant.

CONSTRUCTION METHODS

605-3.1 Time of application. Joints shall be sealed as soon after completion of the curing period as feasible and before the pavement is opened to traffic, including construction equipment. The pavement temperature shall be 50 degrees F and rising at the time of application of the poured joint sealing material. Do not apply sealant if moisture is observed in the joint.

605-3.2 Equipment. Machines, tools, and equipment used in the performance of the work required by this section shall be approved before the work is started and maintained in satisfactory condition at all times. Submit a list of proposed equipment to be used in performance of construction work including descriptive data, 14 days prior to use on the Project.

a. Tractor-mounted routing tool. Provide a routing tool, used for removing old sealant from the joints, of such shape and dimensions and so mounted on the tractor so that it will not damage the sides of the joints. The tool shall be designed so that it can be adjusted to remove the old material to varying depths as required. The use of V-shaped tools or rotary impact routing devices will not be permitted. Hand-operated spindle routing devices may be used to clean and enlarge random cracks.

b. Concrete saw. Provide a self-propelled power saw, with water-cooled diamond or abrasive saw blades, for cutting joints to the depths and widths specified.

c. Waterblasting equipment. The Contractor must demonstrate waterblasting equipment including the pumps, hose, guide, and nozzle size, under job conditions, before approval in accordance with Paragraph 605-3.3. The Contractor shall demonstrate, in the presence of the RPR, that the method cleans the joint and does not damage the joint.

e. Hand tools. Hand tools may be used, when approved, for removing defective sealant from a crack and repairing or cleaning the crack faces. Hand tools should be carefully evaluated for potential spalling effects prior to approval for use.

g. Cold-applied, single-component sealing equipment. The equipment for installing ASTM D5893 single component joint sealants shall consist of an extrusion pump, air compressor, following plate, hoses, and nozzle for transferring the sealant from the storage container into the joint opening. The dimension of the nozzle shall be such that the tip of the nozzle will extend into the joint to allow sealing from the bottom of the joint to the top. Maintain the initially approved equipment in good working condition, serviced in accordance with the supplier's instructions, and unaltered in any way without obtaining prior approval. Small hand-held air-powered equipment (i.e., caulking guns) may be used for small applications.

605-3.3 Preparation of joints. Pavement joints for application of material in this Specification must be dry, clean of all scale, dirt, dust, curing compound, and other foreign matter. The Contractor shall demonstrate, in the presence of the RPR, that the method cleans the joint and does not damage the joint.

a. Sawing. All joints shall be sawed in accordance with specifications and plan details. Immediately after sawing the joint, the resulting slurry shall be completely removed from joint and adjacent area by flushing with a jet of water, and by use of other tools as necessary.

b. Sealing. Immediately before sealing, the joints shall be thoroughly cleaned of all remaining laitance, curing compound, filler, protrusions of hardened concrete, old sealant, and other foreign material from the sides and upper edges of the joint space to be sealed. Cleaning shall be accomplished by concrete saw water blaster as specified in Paragraph 605-3.2. The newly exposed concrete joint faces and the pavement surface extending a minimum of 1/2-inch from the joint edge shall be sandblasted clean. Sandblasting shall be accomplished in a minimum of two passes. One pass per joint face with the nozzle held at an angle directly toward the joint face and not more than 3 inches from it. After final cleaning and immediately prior to sealing, blow out the joints with compressed air and leave them completely free of debris and water. The joint faces shall be surface dry when the seal is applied.

c. Backer Rod. When the joint opening is of a greater depth than indicated for the sealant depth, plug or seal off the lower portion of the joint opening using a backer rod in accordance with Paragraph 605-2.2 to prevent the entrance of the sealant below the specified depth. Take care to ensure that the backer rod is placed at the specified depth and is not stretched or twisted during installation.

d. Bond-breaking tape. Where inserts or filler materials contain bitumen, or the depth of the joint opening does not allow for the use of backup material, insert a bond-separating tape breaker in accordance with Paragraph 605-2.3 to prevent incompatibility with the filler materials and three-sided adhesion of the sealant. Securely bond the tape to the bottom of the joint opening so it will not float up into the new sealant.

605-3.4 Installation of sealants. Joints shall be inspected for proper width, depth, alignment, and preparation, and shall be approved by the RPR before sealing is allowed. Sealants shall be installed in accordance with the following requirements:

Immediately preceding, but not more than 50 feet ahead of the joint sealing operations, perform a final cleaning with compressed air. Fill the joints from the bottom up to 1/8-inch ±1/16-inch below the top of pavement surface; or bottom of groove for grooved pavement. Remove and discard excess or spilled sealant from the pavement by approved methods. Install the sealant in such a manner as to prevent the formation of voids and entrapped air. In no case shall gravity methods or pouring pots be used to install the sealant material. Traffic shall not be permitted over newly sealed pavement until authorized by the RPR. When a

primer is recommended by the manufacturer, apply it evenly to the joint faces in accordance with the manufacturer's instructions. Check the joints frequently to ensure that the newly installed sealant is cured to a tack-free condition within the time specified.

605-3.5 Inspection. The Contractor shall inspect the joint sealant for proper rate of cure and set, bonding to the joint walls, cohesive separation within the sealant, reversion to liquid, entrapped air, and voids. Sealants exhibiting any of these deficiencies at any time prior to the final acceptance of the Project shall be removed from the joint, wasted, and replaced as specified at no additional cost to the airport.

605-3.6 Clean-up. Upon completion of the Project, remove all unused materials from the site and leave the pavement in a clean condition.

METHOD OF MEASUREMENT

605-4.1 Joint sealing material shall be considered subsidiary to the most appropriate Bid Item.

BASIS OF PAYMENT

605-5.1 Payment for joint sealing material shall be considered subsidiary to the most appropriate Bid Item.

END ITEM P-605

Item P-610 Concrete for Miscellaneous Structures

DESCRIPTION

610-1.1 This item shall consist of concrete and reinforcement, as shown on the plans, prepared and constructed in accordance with these Specifications. This Specification shall be used for all concrete other than airfield pavement which are cast-in-place.

MATERIALS

610-2.1 General. Only approved materials, conforming to the requirements of these Specifications, shall be used in the work. Materials may be subject to inspection and tests at any time during their preparation or use. The source of all materials shall be approved by the Resident Project Representative (RPR) before delivery or use in the work. Representative preliminary samples of the materials shall be submitted by Contractor, when required, for examination and test. Materials shall be stored and handled to ensure preservation of their quality and fitness for use and shall be located to facilitate prompt inspection. All equipment for handling and transporting materials and concrete must be clean before any material or concrete is placed in them.

The use of pit-run aggregates shall not be permitted unless the pit-run aggregate has been screened and washed, and all fine and coarse aggregates stored separately and kept clean. The mixing of different aggregates from different sources in one storage stockpile or alternating batches of different aggregates shall not be permitted.

a. Reactivity. Fine aggregate and coarse aggregates to be used in all concrete shall have been tested separately within six months of the project in accordance with ASTM C1260. Test results shall be submitted to RPR. The aggregate shall be considered innocuous if the expansion of test specimens, tested in accordance with ASTM C1260, does not exceed 0.08 percent at 14 days (16 days from casting). If the expansion either or both test specimen is greater than 0.08 percent at 14 days, but less than 0.20 percent, a minimum of 25 percent of Type F fly ash, or 40-55 percent of slag cement shall be used in the concrete mix.

If the expansion is greater than 0.20 percent the aggregates shall not be used, and test results for other aggregates must be submitted for evaluation.

Testing for Alkali-Silica Reaction (ASR) may be omitted if material supplier can certify in writing aggregates supplied for this Project have not exhibited any effects of ASR within the last three years.

Testing for Alkali-Silica Reaction (ASR) may be omitted if material supplier can certify in writing aggregates supplied for this Project have not exhibited any effects of ASR within the last three years.

610-2.2 Coarse aggregate. The coarse aggregate for concrete shall meet the requirements of ASTM C33 and the requirements of Table 4, Class Designation 5S; and the grading requirements shown below, as required for the project.

Coarse Aggregate Grading Requirements

Maximum Aggregate Size	ASTM C33, Table 3 Grading Requirements (Size No.)
1 1/2 inch	467 or 4 and 67
1 inch	57
3/4 inch	67
1/2 inch	7

610-2.2.1 Coarse Aggregate susceptibility to durability (D) cracking. Not used.

610-2.3 Fine aggregate. The fine aggregate for concrete shall meet all fine aggregate requirements of ASTM C33.

610-2.4 Cement. Cement shall conform to the requirements of ASTM C150 Type I/II or ASTM C595.

610-2.5 Cementitious materials.

a. Fly ash. Fly ash shall meet the requirements of ASTM C618, with the exception of loss of ignition, where the maximum shall be less than 6 percent. Fly ash shall have a Calcium Oxide (CaO) content of less than 15 percent and a total available alkali content less than 3 percent per ASTM C311. Fly ash produced in furnace operations using liming materials or soda ash (sodium carbonate) as an additive shall not be acceptable. Contractor shall furnish the previous three most recent, consecutive ASTM C618 reports for each source of fly ash proposed in the concrete mix, and shall furnish each additional report as they become available during the project. The reports can be used for acceptance or the material may be tested independently by RPR.

b. Slag cement (ground granulated blast furnace (GGBF)). Slag cement shall conform to ASTM C989, Grades 100 or 120. Slag cement shall be used only at 25- to 55-percent rate of the total cementitious material by mass.

610-2.6 Water. Water used in mixing or curing shall be from potable water sources. Other sources shall be tested in accordance with ASTM C1602 prior to use.

610-2.7 Admixtures. Contractor shall submit certificates indicating that the material to be furnished meets all of the requirements indicated below. In addition, RPR may require Contractor to submit complete test data from an approved laboratory showing that the material to be furnished meets all of the requirements of the cited specifications. Subsequent tests may be made of samples taken by RPR from the supply of the material being furnished or proposed for use on the work to determine whether the admixture is uniform in quality with that approved.

a. Air-entraining admixtures. Air-entraining admixtures shall meet the requirements of ASTM C260 and shall consistently entrain the air content in the specified ranges under field conditions. The air-entrainment agent and any water reducer admixture shall be compatible.

b. Water-reducing admixtures. Water-reducing admixture shall meet the requirements of ASTM C494, Types A, B, or D. ASTM C494, Types F and G high range water reducing admixtures and ASTM C1017 flowable admixtures shall not be used.

c. Other chemical admixtures. The use of set retarding, and set-accelerating admixtures shall be approved by RPR. Retarding shall meet the requirements of ASTM C494, Types A, B, or D and set-accelerating shall meet the requirements of ASTM C494, Type C. Calcium chloride and admixtures containing calcium chloride shall not be used.

610-2.8 Premolded joint material. Premolded joint material for expansion joints shall meet the requirements of ASTM D1751 and D1752.

610-2.9 Joint filler. The filler for joints shall meet the requirements of Item P-605, unless otherwise specified.

610-2.10 Steel reinforcement. Reinforcing shall consist of reinforcing steel conforming to the requirements of ASTM A615.

610-2.11 Materials for curing concrete. Curing materials shall conform to ASTM C309, White-Pigmented Liquid Membrane-Forming Compound, Type 2, Class B.

CONSTRUCTION METHODS

610-3.1 General. Contractor shall furnish all labor, materials, and services necessary for, and incidental to, the completion of all work as shown on the drawings and specified here. All machinery and equipment used by Contractor on the work, shall be of sufficient size to meet the requirements of the work. All work shall be subject to the inspection and approval of RPR.

610-3.2 Concrete Mixture. The concrete shall develop a compressive strength of 4,000 psi in 28 days as determined by test cylinders made in accordance with ASTM C31 and tested in accordance with ASTM C39. The concrete shall contain not less than 470 pounds of cementitious material per cubic yard. The water cementitious ratio shall not exceed 0.45 by weight. The air content of the concrete shall be 5 percent ±1.2 percent as determined by ASTM C231 and shall have a slump of not more than 4 inches as determined by ASTM C143.

610-3.3 Mixing. Concrete may be mixed at the construction site, at a central point, or wholly or in part in truck mixers. The concrete shall be mixed and delivered in accordance with the requirements of ASTM C94 or C685.

The concrete shall be mixed only in quantities required for immediate use. Concrete shall not be mixed while the air temperature is below 40 degrees F without RPRs approval. If approval is granted for mixing under such conditions, aggregates or water, or both, shall be heated and the concrete shall be placed at a temperature not less than 50 degrees F nor more than 100 degrees F. Contractor shall be held responsible for any defective work, resulting from freezing or injury in any manner during placing and curing, and shall replace such work at his expense.

Retempering of concrete by adding water or any other material is not permitted.

The rate of delivery of concrete to the job shall be sufficient to allow uninterrupted placement of the concrete.

610-3.4 Forms. Concrete shall not be placed until all the forms and reinforcements have been inspected and approved by RPR. Forms shall be of suitable material and shall be of the type, size, shape, quality, and strength to build the structure as shown on the plans. The forms shall be true to line and grade and shall be mortar-tight and sufficiently rigid to prevent displacement and sagging between supports. The surfaces of forms shall be smooth and free from irregularities, dents, sags, and holes. Contractor shall be responsible for their adequacy.

The internal form ties shall be arranged so no metal will show in the concrete surface or discolor the surface when exposed to weathering when the forms are removed. All forms shall be wetted with water or with a non-staining mineral oil, which shall be applied immediately before the concrete is placed. Forms shall be constructed so they can be removed without injuring the concrete or concrete surface.

610-3.5 Placing reinforcement. All reinforcement shall be accurately placed, as shown on the plans, and shall be firmly held in position during concrete placement. Bars shall be fastened together at intersections. The reinforcement shall be supported by approved metal chairs. Shop drawings, lists, and bending details shall be supplied by Contractor when required.

610-3.6 Embedded items. Before placing concrete, all embedded items shall be firmly and securely fastened in place as indicated. All embedded items shall be clean and free from coating, rust, scale, oil, or any foreign matter. The concrete shall be spaded and consolidated around and against embedded items. The embedding of wood shall not be allowed.

610-3.7 Concrete Consistency. Contractor shall monitor the consistency of the concrete delivered to the project site; collect each batch ticket; check temperature; and perform slump tests on each truck at the project site in accordance with ASTM C143.

610-3.8 Placing concrete. All concrete shall be placed during daylight hours, unless otherwise approved. The concrete shall not be placed until the depth and condition of foundations, the adequacy of forms and falsework, and the placing of the steel reinforcing have been approved by RPR. Concrete shall be placed as soon as practical after mixing, but in no case later than one hour after water has been added to the mix. The method and manner of placing shall avoid segregation and displacement of the reinforcement. Troughs, pipes, and chutes shall be used as an aid in placing concrete when necessary. The concrete shall not be dropped from a height of more than 5 feet. Concrete shall be deposited as nearly as practical in its final position to avoid segregation due to rehandling or flowing. Do not subject concrete to procedures which cause segregation. Concrete shall be placed on clean, damp surfaces, free from running water, or on a properly consolidated soil foundation.

610-3.9 Vibration. Vibration shall follow the guidelines in American Concrete Institute (ACI) Committee 309R, Guide for Consolidation of Concrete.

610-3.10 Joints. Joints shall be constructed as indicated on the plans.

610-3.11 Finishing. All exposed concrete surfaces shall be true, smooth, and free from open or rough areas, depressions, or projections. All concrete horizontal plane surfaces shall be brought flush to the proper elevation with the finished top surface struck-off with a straightedge and floated.

610-3.12 Curing and protection. All concrete shall be properly cured in accordance with the recommendations in American Concrete Institute (ACI) 308R, Guide to External Curing of Concrete. The concrete shall be protected from damage until project acceptance.

610-3.13 Cold weather placing. When concrete is placed at temperatures below 40 degrees F, follow the cold weather concreting recommendations found in ACI 306R, Cold Weather Concreting.

610-3.14 Hot weather placing. When concrete is placed in hot weather greater than 85 degrees F, follow the hot weather concreting recommendations found in ACI 305R, Hot Weather Concreting.

QUALITY ASSURANCE (QA)

610-4.1 Quality Assurance sampling and testing. Concrete for each day's placement will be accepted on the basis of the compressive strength specified in paragraph 610-3.2. RPR will sample the concrete in accordance with ASTM C172; test the slump in accordance with ASTM C143; test air content in accordance with ASTM C231; make and cure compressive strength specimens in accordance with ASTM C31; and test in accordance with ASTM C39. The QA testing agency will meet the requirements of ASTM C1077.

Contractor shall provide adequate facilities for the initial curing of cylinders.

610-4.2 Defective work. Any defective work that cannot be satisfactorily repaired as determined by RPR, shall be removed and replaced at Contractor's expense. Defective work includes, but is not limited to, uneven dimensions, honeycombing and other voids on the surface or edges of the concrete.

METHOD OF MEASUREMENT

610-5.1 Concrete shall be measured by the number of square yards based on the dimensions shown on the plans of concrete complete in place and accepted.

BASIS OF PAYMENT

610-6.1 Payment shall be made at the contract price by the number of square yards. This price shall be full compensation for furnishing all materials including reinforcement and embedded items and for all preparation, delivery, installation, and curing of these materials, and for all labor, equipment, tools, and incidentals necessary to complete the item.

Payment will be made under:

Item P-610-6.1	Concrete Drainage Flume, 4-inch thickness - per square yard;
Item P-610-6.2	Concrete Entrance Road, 6-inch thickness - per square yard.

END OF ITEM P-610

Item T-901 Seeding

DESCRIPTION

901-1.1 This item shall consist of soil preparation, seeding the areas shown on the plans or as directed by RPR in accordance with these Specifications.

MATERIALS

901-2.1 Seed. The species and application rates of grass, legume, and cover-crop seed furnished shall be those stipulated herein. Seed shall conform to the requirements of Federal Specification JJJ-S-181, Federal Specification, Seeds, Agricultural.

Seed shall be furnished separately or in mixtures in standard containers labeled in conformance with the Agricultural Marketing Service (AMS) Seed Act and applicable state seed laws with the seed name, lot number, net weight, percentages of purity and of germination and hard seed, and percentage of maximum weed seed content clearly marked for each kind of seed. Contractor shall furnish RPR duplicate signed copies of a statement by the vendor certifying that each lot of seed has been tested by a recognized laboratory for seed testing within six months of date of delivery. This statement shall include: name and address of laboratory, date of test, lot number for each kind of seed, and the results of tests as to name, percentages of purity and of germination, and percentage of weed content for each kind of seed furnished, and, in case of a mixture, the proportions of each kind of seed. Wet, moldy, or otherwise damaged seed will be rejected.

Seeds shall be applied as follows:

February 1 – May 15 for Odessa (District 6)

Seed	Rate of Application lb. PLS/acre
Green Sprangletop (Van Horn)	1.0
Sideoats Grama (South Texas)	1.0
Blue Grama (Hachita)	0.4
Galleta Grass (Viva)	0.6
Shortspike Windmillgrass (Welder)	0.2
Pink Pappusgrass (Maverick)	0.6
Alkali Sacaton (Saltalk)	0.2
Plains Bristlegrass (Catarina Blend)	0.2
False Rhodes Grass (Kinney)	0.1
Whiplash Pappusgrass (Webb)	0.6
Arizona Cottontop (La Salle)	0.2

September 1 – November 30 for Odessa (District 6)

Seed	Rate of Application lb. PLS/acre
Western Wheatgrass	8.4
Wheat (Red, Winter)	50

901-2.2 Lime. Not required.

901-2.3 Fertilizer. Fertilizer shall be standard commercial fertilizers supplied separately or in mixtures containing the percentages of total nitrogen, available phosphoric acid, and water-soluble potash. They shall be applied at the rate and to the depth specified, and shall meet the requirements of applicable state laws. They shall be furnished in standard containers with name, weight, and guaranteed analysis of contents clearly marked thereon. No cyanamide compounds or hydrated lime shall be permitted in mixed fertilizers.

The fertilizers may be supplied in one of the following forms:

a. A dry, free-flowing fertilizer suitable for application by a common fertilizer spreader;

b. A finely-ground fertilizer soluble in water, suitable for application by power sprayers; or

c. A granular or pellet form suitable for application by blower equipment.

Fertilizers shall be 2-2-0 commercial fertilizer and shall be spread as follows:

Soil Fertilizer Guidelines (lbs per 1,000 square feet)

N Nitrogen	P2Ø5 Phosphate	K20 Potassium	Mg Magnesium	S Sulfur	Zn Zinc	Mn Manganese	Fe Iron	Cu Copper	B Boron
2.0	2.0		0.50		0.50	0.50		0.50	

901-2.4 Soil for repairs. The soil for fill and topsoiling of areas to be repaired shall be at least of equal quality to that which exists in areas adjacent to the area to be repaired. The soil shall be relatively free from large stones, roots, stumps, or other materials that will interfere with subsequent sowing of seed, compacting, and establishing turf, and shall be approved by RPR before being placed.

CONSTRUCTION METHODS

901-3.1 Advance preparation and cleanup. After grading of areas has been completed and before applying fertilizer and ground limestone, areas to be seeded shall be raked or otherwise cleared of stones larger than 2 inches in any diameter, sticks, stumps, and other debris that might interfere with sowing of seed, growth of grasses, or subsequent maintenance of grass-covered areas. If any damage by erosion or other causes has occurred after the completion of grading and before beginning the application of fertilizer and ground limestone, Contractor shall repair such damage include filling gullies, smoothing irregularities, and repairing other incidental damage.

An area to be seeded shall be considered a satisfactory seedbed without additional treatment if it has recently been thoroughly loosened and worked to a depth of not less than 5 inches as a result of grading operations

and, if immediately prior to seeding, the top 3 inches of soil is loose, friable, reasonably free from large clods, rocks, large roots, or other undesirable matter, and if shaped to the required grade.

When the area to be seeded is sparsely sodded, weedy, barren and unworked, or packed and hard, any grass and weeds shall first be cut or otherwise satisfactorily disposed of, and the soil then scarified or otherwise loosened to a depth not less than 5 inches. Clods shall be broken and the top 3 inches of soil shall be worked into a satisfactory seedbed by discing, or by use of cultipackers, rollers, drags, harrows, or other appropriate means.

901-3.2 Dry application method.

a. Fertilizing. Following advance preparations and cleanup fertilizer shall be uniformly spread at the rate that will provide not less than the minimum quantity stated in Paragraph 901-2.3.

c. Seeding. Grass seed shall be sown at the rate specified in Paragraph 901-2.1 immediately after fertilizing. The fertilizer and seed shall be raked within the depth range stated in the special provisions. Seeds of legumes, either alone or in mixtures, shall be inoculated before mixing or sowing, in accordance with the instructions of the manufacturer of the inoculant. When seeding is required at other than the seasons shown on the plans or in the special provisions, a cover crop shall be sown by the same methods required for grass and legume seeding.

d. Rolling. After the seed has been properly covered, the seedbed shall be immediately compacted by means of an approved lawn roller, weighing 40 to 65 pounds per foot of width for clay soil (or any soil having a tendency to pack), and weighing 150 to 200 pounds per foot of width for sandy or light soils.

901-3.3 Wet application method.

a. General. Contractor may elect to apply seed and fertilizer (and lime, if required) by spraying them on the previously prepared seedbed in the form of an aqueous mixture and by using the methods and equipment described herein. The rates of application shall be as specified in the special provisions.

b. Spraying equipment. The spraying equipment shall have a container or water tank equipped with a liquid level gauge calibrated to read in increments not larger than 50 gallons over the entire range of the tank capacity, mounted so as to be visible to the nozzle operator. The container or tank shall also be equipped with a mechanical power-driven agitator capable of keeping all the solids in the mixture in complete suspension at all times until used.

The unit shall also be equipped with a pressure pump capable of delivering 100 gallons per minute at a pressure of 100 lbs / sq inches. The pump shall be mounted in a line that will recirculate the mixture through the tank whenever it is not being sprayed from the nozzle. All pump passages and pipe lines shall be capable of providing clearance for 5/8 inch solids. The power unit for the pump and agitator shall have controls mounted so as to be accessible to the nozzle operator. There shall be an indicating pressure gauge connected and mounted immediately at the back of the nozzle.

The nozzle pipe shall be mounted on an elevated supporting stand in such a manner that it can be rotated through 360 degrees horizontally and inclined vertically from at least 20 degrees below to at least 60 degrees above the horizontal. There shall be a quick-acting, three-way control valve connecting the recirculating line to the nozzle pipe and mounted so that the nozzle operator can control and regulate the amount of flow of mixture delivered to the nozzle. At least three different types of nozzles shall be supplied so that mixtures may be properly sprayed over distance varying from 20 to 100 feet. One shall be a close-range ribbon nozzle, one a medium-range ribbon nozzle, and one a long-range jet nozzle. For case of removal and cleaning, all nozzles shall be connected to the nozzle pipe by means of quick-release couplings.

In order to reach areas inaccessible to the regular equipment, an extension hose at least 50 feet in length shall be provided to which the nozzles may be connected.

c. Mixtures. Lime, if required, shall be applied separately, in the quantity specified, prior to the fertilizing and seeding operations. Not more than 220 pounds of lime shall be added to and mixed with each 100 gallons of water. Seed and fertilizer shall be mixed together in the relative proportions specified, but not more than a total of 220 pounds of these combined solids shall be added to and mixed with each 100 gallons of water.

All water used shall be obtained from fresh water sources and shall be free from injurious chemicals and other toxic substances harmful to plant life. Contractor shall identify to RPR all sources of water at least two weeks prior to use. RPR may take samples of the water at the source or from the tank at any time and have a laboratory test the samples for chemical and saline content. Contractor shall not use any water from any source that is disapproved by RPR following such tests.

All mixtures shall be constantly agitated from the time they are mixed until they are finally applied to the seedbed. All such mixtures shall be used within two hours from the time they were mixed or they shall be wasted and disposed of at approved locations.

d. Spraying. Lime, if required, shall be sprayed only upon previously prepared seedbeds. After the applied lime mixture has dried, the lime shall be worked into the top 3 inches, after which the seedbed shall again be properly graded and dressed to a smooth finish.

Mixtures of seed and fertilizer shall only be sprayed upon previously prepared seedbeds on which the lime, if required, shall already have been worked in. The mixtures shall be applied by means of a high-pressure spray that shall always be directed upward into the air so that the mixtures will fall to the ground like rain in a uniform spray. Nozzles or sprays shall never be directed toward the ground in such a manner as might produce erosion or runoff.

Particular care shall be exercised to ensure that the application is made uniformly and at the prescribed rate and to guard against misses and overlapped areas. Proper predetermined quantities of the mixture in accordance with specifications shall be used to cover specified sections of known area.

Checks on the rate and uniformity of application may be made by observing the degree of wetting of the ground or by distributing test sheets of paper or pans over the area at intervals and observing the quantity of material deposited thereon.

On surfaces that are to be mulched as indicated by the plans or designated by RPR, seed and fertilizer applied by the spray method need not be raked into the soil or rolled. However, on surfaces on which mulch is not to be used, the raking and rolling operations will be required after the soil has dried.

901-3.4 Maintenance of seeded areas. Contractor shall protect seeded areas against traffic or other use by warning signs or barricades, as approved by RPR. Surfaces gullied or otherwise damaged following seeding shall be repaired by regrading and reseeding as directed. Contractor shall mow, water as directed, and otherwise maintain seeded areas in a satisfactory condition until final inspection and acceptance of the work.

When either the dry or wet application method outlined above is used for work done out of season, it will be required that Contractor establish a good stand of grass of uniform color and density to the satisfaction of RPR. A grass stand shall be considered adequate when bare spots are 1 square foot or less, randomly dispersed, and do not exceed 3 percent of the area seeded.

METHOD OF MEASUREMENT

901-4.1 The quantity of seeding to be paid for shall be the number of units 1,000 square feet measured on the ground surface, completed and accepted.

BASIS OF PAYMENT

901-5.1 Payment shall be made at the contract unit price per acre, which price and payment shall be full compensation for furnishing and placing all material and for all labor, equipment, tools, and incidentals necessary to complete the work prescribed in this item.

Payment will be made under:

Item 901-5.1	Seeding by Wet Method - per acre.

END OF ITEM T-901

Item T-905 Topsoil

DESCRIPTION

905-1.1 This item shall consist of preparing the ground surface for topsoil application, removing topsoil from designated stockpiles or areas to be stripped on the site or from approved sources off the site, and placing and spreading the topsoil on prepared areas in accordance with this Specification at the locations shown on the plans or as directed by RPR.

MATERIALS

905-2.1 Topsoil. Topsoil shall be the surface layer of soil with no admixture of refuse or any material toxic to plant growth, and it shall be reasonably free from subsoil and stumps, roots, brush, stones (2 inches or more in diameter), and clay lumps or similar objects. Brush and other vegetation that will not be incorporated with the soil during handling operations shall be cut and removed. Ordinary sod and herbaceous growth such as grass and weeds are not to be removed, but shall be thoroughly broken up and intermixed with the soil during handling operations. Heavy sod or other cover, which cannot be incorporated into the topsoil by discing or other means, shall be removed. The topsoil or soil mixture, unless otherwise specified or approved, shall have a pH range of approximately 5.5-7.6 pH, when tested in accordance with the methods of testing of the Association of Official Agricultural Chemists in effect on the date of invitation of bids. The organic content shall be not less than 3 nor more than 20 percent as determined by the wet-combustion method (chromic acid reduction). There shall be not less than 20 nor more than 80 percent of the material passing the 200 mesh sieve as determined by the wash test in accordance with ASTM C117.

Natural topsoil may be amended by Contractor with approved materials and methods to meet the above specifications.

905-2.2 Inspection and tests. Within 10 days following acceptance of the bid, RPR shall be notified of the source of topsoil to be furnished by Contractor. The topsoil shall be inspected to determine if the selected soil meets the requirements specified and to determine the depth to which stripping will be permitted. At this time, Contractor may be required to take representative soil samples from several locations within the area under consideration and to the proposed stripping depths, for testing purposes as specified in Paragraph 905-2.1.

CONSTRUCTION METHODS

905-3.1 General. Areas to be topsoiled shall be shown on the plans. If topsoil is available on the site, the location of the stockpiles or areas to be stripped of topsoil and the stripping depths shall be shown on the plans.

Suitable equipment necessary for proper preparation and treatment of the ground surface, stripping of topsoil, and for the handling and placing of all required materials shall be on hand, in good condition, and approved by RPR before the various operations are started.

905-3.2 Preparing the ground surface. Immediately prior to dumping and spreading the topsoil on any area, the surface shall be loosened by discs or spike-tooth harrows, or by other means approved by RPR, to a minimum depth of 2 inches to facilitate bonding of the topsoil to the covered subgrade soil. The surface

of the area to be topsoiled shall be cleared of all stones larger than 2 inches in any diameter and all litter or other material which may be detrimental to proper bonding, the rise of capillary moisture, or the proper growth of the desired planting. Limited areas, as shown on the plans, which are too compact to respond to these operations shall receive special scarification.

Grades on the area to be topsoiled, which have been established by others as shown on the plans, shall be maintained in a true and even condition. Where grades have not been established, the areas shall be smooth-graded and the surface left at the prescribed grades in an even and compacted condition to prevent the formation of low places or pockets where water will stand.

905-3.3 Obtaining topsoil. Prior to the stripping of topsoil from designated areas, any vegetation, briars, stumps and large roots, rubbish or stones found on such areas, which may interfere with subsequent operations, shall be removed using methods approved by RPR. Heavy sod or other cover, which cannot be incorporated into the topsoil by discing or other means shall be removed.

When suitable topsoil is available on the site, Contractor shall remove this material from the designated areas and to the depth as directed by RPR. The topsoil shall be spread on areas already tilled and smooth-graded, or stockpiled in areas approved by RPR. Any topsoil stockpiled by Contractor shall be rehandled and placed without additional compensation. Any topsoil that has been stockpiled on the site by others, and is required for topsoil purposes, shall be removed and placed by Contractor. The sites of all stockpiles and areas adjacent thereto which have been disturbed by Contractor shall be graded if required and put into a condition acceptable for seeding.

When suitable topsoil is secured off the airport site, Contractor shall locate and obtain the supply, subject to the approval of RPR. Contractor shall notify RPR sufficiently in advance of operations in order that necessary measurements and tests can be made. Contractor shall remove the topsoil from approved areas and to the depth as directed. The topsoil shall be hauled to the site of the work and placed for spreading, or spread as required. Any topsoil hauled to the site of the work and stockpiled shall be rehandled and placed without additional compensation.

905-3.4 Placing topsoil. The topsoil shall be evenly spread on the prepared areas to a uniform depth of 2 inches after compaction, unless otherwise shown on the plans or stated in the special provisions. Spreading shall not be done when the ground or topsoil is frozen, excessively wet, or otherwise in a condition detrimental to the work. Spreading shall be carried on so that turfing operations can proceed with a minimum of soil preparation or tilling.

After spreading, any large, stiff clods and hard lumps shall be broken with a pulverizer or by other effective means, and all stones or rocks (2 inches or more in diameter), roots, litter, or any foreign matter shall be raked up and disposed of by Contractor. after spreading is completed, the topsoil shall be satisfactorily compacted by rolling with a cultipacker or by other means approved by RPR. The compacted topsoil surface shall conform to the required lines, grades, and cross-sections. Any topsoil or other dirt falling upon pavements as a result of hauling or handling of topsoil shall be promptly removed.

METHOD OF MEASUREMENT

905-4.1 Topsoil obtained on the site shall be measured by the number of cubic yards of topsoil measured in its original position and stripped or excavated. Topsoil stockpiled by others and removed for topsoil by Contractor shall be measured by the number of cubic yards of topsoil measured in the stockpile. Topsoil shall be measured by volume in cubic yards computed by the method of end areas.

905-4.2 Topsoil obtained off the site shall be measured by the number of cubic yards of topsoil measured in its original position and stripped or excavated. Topsoil shall be measured by volume in cubic yards computed by the method of end areas.

BASIS OF PAYMENT

905-5.1 Payment will be made at the contract unit price per cubic yard for topsoil (obtained on the site). This price shall be full compensation for furnishing all materials and for all preparation, placing, and spreading of the materials, and for all labor, equipment, tools, and incidentals necessary to complete the item.

905-5.2 Payment will be made at the contract unit price per cubic yard for topsoil (obtained off the site). This price shall be full compensation for furnishing all materials and for all preparation, placing, and spreading of the materials, and for all labor, equipment, tools, and incidentals necessary to complete the item.

Payment will be made under:

Item T-905-5.1	Topsoil (Furnished from Off the Site) - per cubic yard

ITEM MC - ROCK RIPRAP AND FILTER FABRIC

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes construction of loose rock riprap on a geotextile filter layer.

1.2 SUBMITTALS

A. Provide gradation curves for riprap to be used before any rock delivery.
B. Laboratory test results for bulk specific gravity, absorption, and sodium sulfate soundness at least 30 days before delivery of any rock.
C. Name and location of rock source.
D. Submit a sample of filter cloth and manufacturer certification it meets Specification requirements.

1.3 REFERENCES

A. ASTM A975-97 - Standard Specifications for Double-Twisted Hexagonal Mesh Gabions and Rivet Mattresses (Metallic-Coated Steel Wire or Metallic-Coated Steel Wire with Polyvinyl Chloride (PVC) Coating).
B. ASTM A370-979 - Text Methods and Definitions for Mechanical Testing of Steel Products.
C. ASTM B117-97 - Salt Spray Test.
D. ASTM C88 - Standard Test Method for Soundness of Aggregates by Use of Sodium Sulfate or Magnesium Sulfate.
E. ASTM C127 - Standard Test Method for Specific Gravity and Absorption of Course Aggregate (as modified in this specification section).
F. ASTM D1242-95A – Resistance of Plastic Materials to Abrasion.
G. ASTM D1499-99 – Standard Practice for Filtered Open-Flume Carbon Arc Exposures of Plastics.
H. ASTM D2240-04 – Standard Test Method for Rubber Property-Durometer Hardness.
I. ASTM D412-98a – Standard Test Methods for Vulcanized Rubber and Thermoplastic Elastomers – Tension.
J. ASTM D746-04 – Standard Test Method for Brittleness Temperature of Plactics and Elastomers by Impact.
K. ASTM D792-00 – Standard Test Methods for Density and Specific Gravity (Relative Density) of Plastics by Displacement.
L. ASTM G152-00 – Standard Practice for Operating Open Flume Carbon Arc Light Apparatus for Exposure of Non-Metallic Materials.

Q. ASTM D4533 - Trapezoid Tearing Strength of Geotextiles.
R. ASTM D4632 - Grab Breaking Load and Elongation of Geotextiles.
S. ASTM D4751 - Determining Apparent Opening Size of a Geotextile.
T. ASTM D4759 - Determining the Specification Conformance of Geosynthetics.

U. ASTM D4833 - Index Puncture Resistance of Geotextiles, Geomembranes, and Related Products.
V. ASTM D4873 - Identification, Storage, and Handling of Geosynthetic Rolls.
W. TEX 735-I - Sampling Construction Fabrics.
X. TEX 616-J - Testing Construction Fabrics.

PART 2 - PRODUCTS

2.1 MATERIALS

A. Rock:
1. Loose rock riprap shall be limestone or other hard, angular to round, non-erodible rock with a specific weight of 155 lbs. per cubic foot. Rock shall be well graded with diameters 4 to 8 inches.
2. Excavate, select, and handle rock from designated sources as necessary to meet quality and grading requirements herein. Rock shall conform to specified grading limits when installed.
3. Excavate, select, and handle rock riprap as necessary to meet quality and grading requirements specified. Individual rock fragments shall be dense, sound, and free from cracks, seams, and other defects conducive to accelerated weathering. Rock fragments shall be angular-to-subrounded in shape. Least dimension of individual rock fragments shall not be less than one-third greatest dimension of fragment.
4. Rock riprap shall have the following properties:
a. Bulk specific gravity (saturated surface-dry basis) not less than 2.5 when tested per ASTM C127.
b. Absorption not more than 2 percent when tested per ASTM C127.
c. Weight loss in five cycles not more than 10 percent when sodium sulfate used or 15 percent when magnesium sulfate used when tested per ASTM C88, modified as follows:
1) Test sample shall not be separated into fractions but consist of 5,000 ±300 grams of rock fragments, reasonably uniform in size and shape and weighing approximately 100 grams each, obtained by breaking rock and selecting fragments of required size.
2) After sample is dried and following completion of final test cycle and washing to remove sodium sulfate or magnesium sulfate, determine loss of weight by subtracting from original weight of sample the final weight of all fragments not broken into three or more pieces.
3) Report shall show percentage loss of weight, list sulfate solution used, and results of qualitative examination.

B. Geotextile:
1. Shall conform to Texas Department of Transportation Geotextile Performance Requirements (Type 2) and Typar 3601 non-woven, or approved equal, typical equivalent sieve opening equal to 140.
2. Fabric shall be constructed exclusively of manmade thermoplastic fibers, a nonwoven geotextile fabric, and form a mat of uniform quality.
3. Fabric fibers may be continuous and oriented in a random pattern throughout fabric.
4. Fabric shall be mildew-resistant, rot-proof, and satisfactory for use in wet soil and aggregate environment.

5. Packaging Requirements
    a. Package fabric in rolls of length and width specified.
    b. Fabric itself shall be uniformly wound onto suitable cylindrical forms or cores to aid in handling and unrolling.
    c. Each roll of fabric and form or core where rolled shall be packaged individually in a suitable sheath, wrapper or container to help protect geotextile from damage due to ultraviolet light and moisture during normal storage and handling.
6. Tagging or Labeling:
    a. Each roll shall be identified by a tag or label securely affixed outside of roll on one end. This tag or label must list the following required information (examples of each are shown in parentheses):
        1) Unique roll number, serially designated (Roll No. 31275).
        2) Manufacturer lot/control numbers, if any (Lot 290, Control 6750).
        3) Name of fabric manufacturer (Afghan Fabrics).
        4) Date of Manufacture (Jan 16, 1987).
        5) Brand name of the product (Fabriweld).
        6) Manufacturer style/catalog designation of fabric, if any (300-X).
        7) Roll width in inches (Width 150 inches).
        8) Roll length in yards (Length 100 yards).
        9) Gross weight in pounds of entire package to include fabric core, wrapping, and sheath or container identification tag, etc. (Gross 147 pounds).
        10) Tare weight in pounds of core, wrapping, sheath, or container identification tag, etc. (Tare 18 pounds).
        11) Net weight in pounds of fabric alone (Net Weight 129 pounds).

C. Obtain bedding from designated sources and select to meet quality and grading requirements herein.

D. At least 30 days before changing source of approved rock riprap, notify Engineer in writing of new sources to obtain material. Submit gradation, tests, source name, and location required and receive Engineer approval before delivery of any material from new source. Failure to obtain approval will result in rejection of source and any material delivered.

PART 3 - EXECUTION

3.1 SUBGRADE PREPARATION

A. Cut/fill and grade subgrade surfaces on which rock riprap and filter fabric are placed to lines and grades shown on Drawings. When fill to subgrade lines required, it shall consist of approved materials and conform to requirements of specified class of fill. Subgrade shall be compacted to 95-percent density, per ASTM D698, for a depth of 6 inches.

3.2 GEOTEXTILE

A. Where Drawings specify geotextile, spread filter material uniformly on prepared subgrade surfaces.

B. Sampling and Testing Requirements
   1. Take samples for testing purposes per Test Method "Tex-735-I, Sampling Construction Fabrics."
   2. Test per appropriate ASTM or Test Method "Tex-616-J, Testing Construction Fabrics."

C. Basis for Rejection:
   1. Should any individual sample selected at random from 100 rolls, or fraction thereof, fail to meet any specification requirement, reject that roll and take two additional samples, one from each of two other additional rolls selected at random from same 100-roll lot, or fraction thereof.
   2. If either two additional samples fail to comply with any portion of specification, reject entire quantity of rolls represented by that sample.

D. Installation:
   1. Subgrade Preparation: Surface underlying the geotextile shall be smooth and free of ruts or protrusions which could damage geotextile. Subgrade materials and compaction requirements shall be per Item P-152.
   2. Placement: Request presence of Engineer during handling and installation. Repair or replace geotextile rolls damaged or contain imperfections as directed. Lay geotextile flat and smooth so it is in direct contact with subgrade. Geotextile shall also be free of tensile stresses, folds, and wrinkles.
   3. Continuously overlap geotextile panels minimum 12 inches. Contractor has option of field sewing instead of overlapping.
   4. Extend filter fabric up edge of adjacent structure or excavation to anchor fabric and prevent undermining from occurring around concrete portions of structure.
   5. Protect geotextile during installation from clogging, tears, and other damage. shall Repair or replace damaged geotextile as directed. Use adequate ballast (sand bags) to prevent uplift by wind. DO NOT leave geotextile uncovered more than 14 days during installation.
   6. Repair geotextile damaged during installation by placing a patch of same type of geotextile extending 12 inches minimum beyond edge of damage/defect. Continuously fasten patches using sewn seam or other approved method. Align machine direction of patch with machine direction of geotextile repaired. Replace geotextile which cannot be repaired.
   7. DO NOT cover geotextile before Engineer approval. Request presence of Engineer during covering of geotextile.

3.3 MEASUREMENT

A. Measure loose rock riprap based on cubic yardage of rock placed. No separate measurement made for excavation or filter fabric, as both items are incidental to cost of rock.

3.4 PAVEMENT

A. Price for this item shall consist of all labor, equipment, materials, supplies, superintendence, and all incidentals necessary to fully construct loose rock riprap.

PART 4 - PAYMENT

A. Payment will be made under:
   1. Item MC – Rock Riprap and Filter Fabric, complete in place, per square foot.

END OF SECTION

PACKET 9.207 July 11, 2023

Item 247
Flexible Base

1. DESCRIPTION

Construct a foundation course composed of flexible base.

2. MATERIALS

Furnish uncontaminated materials of uniform quality that meet the requirements of the Plans and Specifications. Notify Engineer of the proposed material sources and of changes to material sources. Engineer may sample and test project materials at any time before compaction throughout the duration of the project to assure specification compliance. Use Tex-100-E material definitions.

2.1. Aggregate. Furnish aggregate of the type and grade shown on the plans and meeting the requirements of Table 1. Each source must meet Table 1 requirements for liquid limit, plasticity index, and wet ball mill for the grade specified. Do not use additives, such as but not limited to lime, cement, or fly ash to modify aggregates to meet the requirements of Table 1 unless shown on the plans.

Table 1
Material Requirements

Property	Test Method	Grade 1 2			
Sampling	Tex-400-A				
Master gradation sieve size (cumulative % retained)	Tex-110-E				
2-1/2"		0			
1-3/4"		0–10			
7/8"		10–35			
3/8"		30–65			
#4		45–75			
#40		65–90			
Liquid Limit, % Max	Tex-104-E	40			
Plasticity Index, Max[1]	Tex-106-E	10			
Plasticity index, Min[1]		As shown on the plans			
Wet ball mill, % Max	Tex-116-E	40			
Wet ball mill, % Max increase passing the #40 sieve		20			
Min compressive strength, psi	Tex-117-E				
lateral pressure 0 psi		35			
lateral pressure 3 psi		–			
lateral pressure 15 psi		175			

1. Determine plastic index in accordance with Tex-107-E (linear shrinkage) when liquid limit is unattainable as defined in Tex-104-E.

Quality Control. The following list will be a guideline for the number of tests required for a sequence of construction.
Engineer shall direct required tests and reserves the right to adjust, modify, or waive required test.
Base Material. Retest gradation, liquid limits, and plasticity index, for each 10,000 square yards of base material laid.

2.1.1. Material Tolerances. Engineer may accept material if no more than 1 of the 5 most recent gradation tests has an individual sieve outside the specified limits of the gradation.
When target grading is required by the plans, no single failing test may exceed the master grading by more than 5 percentage points on sieves No. 4 and larger or 3 percentage points on sieves smaller than No. 4.

Engineer may accept material if no more than 1 of the 5 most recent plasticity index tests is outside the specified limit. No single failing test may exceed the allowable limit by more than 2 points.

2.1.2. Material Types. Do not use fillers or binders unless approved. Furnish the type specified on the plans in accordance with the following:

2.1.2.1. Type A. Crushed stone produced and graded from oversize quarried aggregate that originates from a single, naturally occurring source. Do not use gravel or multiple sources.

2.1.2.2. Type B. Crushed or uncrushed gravel. Blending of 2 or more sources is allowed.

2.1.2.3. Type C. Crushed gravel with a minimum of 60 percent of the particles retained on a No. 4 sieve with 2 or more crushed faces as determined by Tex-460-A, Part I. Blending of 2 or more sources is allowed.

2.1.2.4. Type D. Type A material or crushed concrete. Crushed concrete containing gravel will be considered Type D material. Crushed concrete must meet the requirements in Section 247.2.1.3.2., "Recycled Material (Including Crushed Concrete) Requirements," and be managed in a way to provide for uniform quality.

2.1.2.5. Type E. Caliche, iron ore or as otherwise shown on the plans. Engineer may require separate dedicated stockpiles in order to verify compliance.

2.1.3. Recycled Material. Reclaimed asphalt pavement (RAP) and other recycled materials may be used when shown on the plans. Request approval to blend 2 or more sources of recycled materials.

2.1.3.1. Limits on Percentage. Do not exceed 20 percent RAP by weight, when RAP is allowed, unless otherwise shown on the plans. The percentage limitations for other recycled materials will be as shown on the plans.

2.1.3.2. Recycled Material (Including Crushed Concrete) Requirements.

2.1.3.2.1. Contractor-Furnished Recycled Materials. Provide recycled materials, other than RAP, that have a maximum sulfate content of 3,000 ppm when tested in accordance with Tex-145-E. When Contractor furnishes the recycled materials, including crushed concrete, the final product will be subject to the requirements of Table 1 for the grade specified. Certify compliance with DMS-11000, "Evaluating and Using Nonhazardous Recyclable Materials Guidelines," for Contractor furnished recycled materials. In addition, recycled materials must be free from reinforcing steel and other objectionable material and have at most 1.5% deleterious material.

2.1.3.2.2. Owner-Furnished Required Recycled Materials. When the Owner furnishes and requires the use of recycled materials, unless otherwise shown on the plans:

- Owner-required recycled material will not be subject to the requirements in Table 1, when tested in accordance with Tex-413-A. For RAP, do not exceed a maximum percent loss from decantation of 5.0% when tested in accordance with Tex-406-A. Test RAP without removing the asphalt.
- Contractor-furnished materials are subject to the requirements in Table 1 and this Item, the final product, blended, will be subject to the requirements in Table 1, and
- for final product, unblended (100 percent Owner-furnished required recycled material), the liquid limit, plasticity index, wet ball mill, and compressive strength is waived.

Crush Owner-furnished RAP so that 100 percent passes the 2 in. sieve. Contractor is responsible for uniformly blending to meet the percentage required.

2.1.3.2.3. Owner-Furnished and Allowed Recycled Materials. When Owner furnishes and allows the use of recycled materials or allows Contractor to furnish recycled materials, the final blended product is subject to the requirements of Table 1 and the plans.

2.1.3.3. Recycled Material Sources. Owner recycled material is available to Contractor only when shown on the plans.
Return unused Owner recycled materials to Owner stockpile location designated by Engineer unless otherwise shown on the plans.
The use of Contractor-owned recycled materials is allowed when shown on the plans. Contractor-owned surplus recycled materials remain the property of Contractor. Remove Contractor-owned recycled materials from the project and dispose of them in accordance with federal, state, and local regulations before project acceptance. Do not stockpile Contractor-owned recycled material with Owner-owned recycled material unless approved.

2.2. Water. Furnish water free of industrial wastes and other objectionable matter.

2.3. Material Sources. Expose the vertical faces of all strata of material proposed for use when non-commercial sources are used. Secure and process the material by successive vertical cuts extending through all exposed strata, when directed.

3. EQUIPMENT

Provide machinery, tools, and equipment necessary for proper execution of the work.

3.1. Provide rollers in accordance with Item 210, “Rolling.” Provide proof rollers in accordance with Item 216, “Proof Rolling,” when required.

3.2. When ride quality measurement is required, provide a high speed or lightweight inertial profiler certified at the Texas A&M Transportation Institute. Provide equipment certification documentation. Display a current decal on the equipment indicating the certification expiration date.

4. CONSTRUCTION

Construct each layer uniformly, free of loose or segregated areas, and with the required density and moisture content. Provide a smooth surface that conforms to the typical sections, lines, and grades shown on the plans
Stockpile base material temporarily at an approved location before delivery to the roadway. Build stockpiles in layers no greater than 2 ft. thick. Stockpiles must have a total height between 10 and 16 ft. unless otherwise approved. After construction and acceptance of the stockpile, loading from the stockpile for delivery is allowed.
Do not add or remove material from temporary stockpiles that require sampling and testing before delivery unless otherwise approved. Charges for additional sampling and testing required as a result of adding or removing material will be deducted from Contractor’s estimated quantity.
Haul approved flexible base in clean trucks. Deliver the required quantity to each 100-ft. station or designated stockpile site as shown on the plans. Prepare stockpile sites as directed. When delivery is to the 100-ft. station, manipulate to conform to the typical sections shown on the plans or as directed.

4.1. Preparation of Subgrade or Existing Base. Remove or scarify existing asphalt concrete pavement in accordance with Item P-101 “Surface Preparation” when shown on the plans or as directed. Shape the subgrade or existing base to conform to the typical sections shown on the plans or as directed.
When new base is required to be mixed with existing base, deliver, place, and spread the new flexible base in the required amount per station. Manipulate and thoroughly mix the new base with existing material to provide a uniform mixture to the specified depth before shaping.

Proof roll the roadbed in accordance with Item 216, “Proof Rolling,” before pulverizing or scarifying when shown
on the plans or directed. Correct soft spots as directed.

4.2. Placing. Spread and shape flexible base into a uniform layer with an approved spreader the same day as
delivered unless otherwise approved. Construct layers to the thickness shown on the plans. Maintain the shape
of the course. Control dust by sprinkling, as directed. Correct or replace segregated areas as directed at no
additional expense to the Owner.

Place successive base courses and finish courses using the same construction methods required for the first
course.

Upon completion, the finished base shall conform with the typical section shown on plans and established lines
and grades. Contractor should avoid overworking base course and working excess fines to the top of finished
surface. If this occurs, Contractor will be required to remove excess fines by power brooming or other
mechanical means before placing prime coat.

4.3. Compaction. Compact using density control unless otherwise shown on the plans. Multiple lifts are permitted
when shown on the plans or approved. Bring each layer to the moisture content directed. When necessary,
sprinkle the material in accordance with Item 204, “Sprinkling.”

Begin rolling longitudinally at the sides and progress toward the center, overlapping on successive trips by at
least 1/2 the width of the roller unit. Begin rolling at the low side and progress toward the high side on super-
elevated curves. Offset alternate trips of the roller. Operate rollers at a speed not to exceed 3 mph, or as
directed.

Before final acceptance, Engineer will select the location of tests and measure the flexible base depth in
accordance with Tex-140-E. Correct areas deficient by more than 1/2-inch in thickness by scarifying, adding
material as required, reshaping, recompacting, and refinishing at Contractor's expense.

4.3.1. Ordinary Compaction. Ordinary compaction is not intended for this project. If needed, roll with approved
compaction equipment as directed. Correct irregularities, depressions, and weak spots immediately by
scarifying the affected areas, adding or removing material as required, reshaping, and recompacting.

4.3.2. Density Control. Compact to at least 100 percent of the maximum dry density determined by Tex-113-E
unless otherwise shown on the plans. Maintain moisture during compaction within ±2 percentage points of the
optimum moisture content as determined by Tex-113-E. Measure the moisture content of the material in
accordance with Tex-115-E or Tex-103-E during compaction daily and report the results the same day to the
Engineer.

The Engineer will determine roadway density and moisture content of completed sections in accordance with
Tex-115-E or Tex-113-E. The Engineer may accept the section if no more than 1 of the 5 most recent density tests is below the specified density and the failing test is no more than 3 pcf below the specified density.

Density tests will be taken at one test per installation area in the patch areas and one test per 200 square
yards.

4.4. Finishing. After completing compaction, clip, skin, or tight-blade the surface with a maintainer or subgrade
trimmer to a depth of approximately 1/4-inch. Remove loosened material and dispose of it at an approved
location. Seal the clipped surface immediately by rolling with a pneumatic tire roller until a smooth surface is
attained. Add small increments of water as needed during rolling. Shape and maintain the course and surface
in conformity with the typical sections, lines, and grades as shown on the plans or as directed.

Correct grade deviations greater than 1/4-inch in 16 feet measured longitudinally or greater than 1/4-inch over
the entire width of the cross-section in areas where surfacing is to be placed. Correct by loosening and adding,
removing, replacing, and recompacting material, and shaping in accordance with Section 247.4.3, "Compaction."

4.5. Curing. Cure the finished section until the moisture content is at least 2 percentage points below optimum or
as directed before applying the next successive course or prime coat.

4.6. Ride Quality. This section applies to the final travel lanes that receive a 1 or 2 course surface treatment for
the final surface, unless otherwise shown on the plans. Measure ride quality of the base course after placement
of the prime coat and before placement of the surface treatment, unless otherwise approved. Use a certified
profilograph operated by the Owner's personnel. Provide profile measurements to Engineer in electronic data files within 3 days after placement of the prime
coat using the format specified in Tex-1001-S. Engineer will use Owner software to evaluate longitudinal
profiles to determine areas requiring corrective action. Correct 0.1-mi.sections having an average international
Roughness Index (IRI) value greater than 100.0 in. per mile or an individual IRI value of 100.0 in. per mile or less
for each wheel path, unless otherwise shown on the plans.

Correct re-profiled sections until specification requirements are met, as approved. Perform this work at no
additional expense to the Owner.

5. MEASUREMENT

Flexible base will be measured as follows:

Item 247-6.1 Flexible Base, Grade 1-2, Type A, B, C, D or E, 6-inch thickness, (Complete In Place) per
square yard.

Measurement is further defined for payment as follows.

5.1. Square Yard. By the square yard of surface area in the completed and accepted final position. The surface
area of the base course is based on the width of flexible base as shown on the plans. No measurement
will be made for thickness or width exceeding that shown on the typical section or provided on the plans for
the item unless otherwise shown on the plans.

5.2. Ton. By the ton of dry weight in trucks as delivered. The dry weight is determined by deducting the weight
of the moisture in the material at the time of weighing from the gross weight of the material. Engineer will
determine the moisture content in the material in accordance with Tex-103-E from samples taken at the time
of weighing.

When material is measured in trucks, the weight of the material will be determined on certified scales or
Contractor must provide a set of standard platform truck scales at a location approved by Engineer. Scales
must conform to the requirements of Item 520, "Weighing and Measuring Equipment."

6. PAYMENT

The work performed and materials furnished in accordance with this Item and measured as provided under
"Measurement" will be paid for at the unit price bid for the types of work shown below. No additional payment
will be made for thickness or width exceeding that shown on the typical section or provided on the plans for
the item unless otherwise shown on the plans.

Sprinkling and rolling, except proof rolling, will not be paid for directly but will be subsidiary to this item.

Tons delivered in the final position or square yard measurement.

Where subgrade is constructed under this Contract, correction of soft spots in the subgrade will be at
Contractor's expense. Where subgrade is not constructed under this Contract, correction of soft spots in the
subgrade will be paid in accordance with Item 4, Items not Listed in the Bid Schedule, or Article 4.4, "Changes in the Work."

6.1. Flexible Base (Grade 1-2, Type A, B, C, D or E). Payment shall be made at the Contract unit price per square
yard for 6-inch flexible base constructed in one 6-inch lift. Price shall be full compensation for securing and
furnishing all materials, including royalty and freight involved; furnishing scales and labor involved in weighing
material when required; loading all materials; all hauling, delivering, and manipulations; sprinkling; rolling;
sprinkling for dust control; shaping and fine grading; spreading, mining, blading, compacting, shaping, finishing;
and curing base material; labor, tools and incidentals necessary to complete Work.

Payment will be made under:

TxDOT Item 247-6.1, Flexible Base, Grade 1-2, Type A, B, C, D or E, installed in one 6-inch lift, furnished and installed, complete, per square yard.

1. COORDINATION

A. PROJECT MEETINGS

Predesign Conference. A Predesign Conference was held between Midland International Air & Space Port (MAF) staff and Parkhill personnel. Items discussed included Project scope, phasing, design, schedule, survey, unique Project elements/areas of potential concern, and utilities.

Prebid Conference. A Prebid Conference in accordance with FAA AC 150/5300-9B will be held for Consulting Engineer, MAF, and FAA to discuss Project details and allow contractors to ask Project-specific questions. Prebid Conference will be led by MAF with assistance from Parkhill.

Preconstruction Meeting. A Preconstruction Meeting, in accordance with FAA AC 150/5370-12B, will be held before issuance of Notice to Proceed. At minimum, required attendees will be MAF, Consulting Engineer, Resident Project Representative (RPR), Prime Contractor, and all subcontractors.

Construction Progress Meetings. Construction progress meetings will be held throughout Project duration, typically monthly. At minimum, required attendees will be Airport administrative staff, Consulting Engineer, RPR, Prime Contractor, and all subcontractors performing work during the current period. Construction phasing and safety will be a standing item at all construction progress meetings. Other ongoing agenda items will include:

- Project Schedule
- Safety/Security
- Project Coordination
- Construction Issues
- Submittals Review
- Request for Information (RFI) Review
- Change Orders Review

- Environmental Issues
- Quality Assurance (Test Reports)
- Record Drawings
- Pay Application Review
- General Discussion

Consulting Engineer will prepare and distribute meeting minutes for all meetings.

B. SCOPE

Regrading basin as shown on Plans, new concrete entrance road, and drainage structure improvements.

Any changes in Project Scope will require a revision to the CSPP, which must be approved by MAF and FAA.

C. FAA AIR TRAFFIC CONTROL TOWER (ATCT) COORDINATION

MAF Operations shall coordinate communication with MAF Air Traffic Control Tower (ATCT). FAA ATCT personnel will be invited to preconstruction and construction progress meetings to discuss construction schedule and Project phasing. Before any Project construction phase beginning or ending, a meeting to discuss pavement closure or ending shall be attended by MAF Operation staff, Consulting Engineer, FAA Regional ADO representative, FAA ATCT personnel, Contractor, etc.

2. PHASING

Refer to Phasing Plans included in Appendix A for limits of each phase.

A. BID PACKAGE (90 CALENDAR DAYS TOTAL)

- Phase 1 (90 Calendar Days)
- Construction Phasing Drawings may be reviewed in Appendix A.

B. PROJECT SCHEDULE

Contractor must submit a Project Schedule and Phasing Plan at/before preconstruction meeting. Any changes made to Project Schedule or Phasing will require a revision to CSPP which must be approved by MAF and FAA.

3. AREAS/OPERATIONS AFFECTED BY CONSTRUCTION

No protected surfaces will be affected by construction for this Project.

4. NAVIGATION AID (NAVAID) PROTECTION

A. NAVAIDS IN CLOSE PROXIMITY TO WORK AREA

No NAVAIDs are near work area; therefore, no physical impact to any NAVAIDs is anticipated.

5. CONTRACTOR ACCESS

A. GENERAL

Airport security is a vital part of Contractor responsibility during the Project. Contractor and employees, subcontractors, suppliers, and representatives shall always follow security guidelines, rules, and regulations of MAF and the Transportation Security Administration (TSA) during Project execution. Contractor is directly responsible for all fines or penalties levied against MAF as a result of any breach of security or safety caused by Contractor or employees, suppliers, subcontractors, or representatives.

B. AIRPORT OPERATIONS AREA (AOA)

Airport Operations Area (AOA) is any portion of the Airport property normally secured against unauthorized entry. AOA includes all areas specifically reserved for aircraft operations, support equipment, and personnel. Generally, AOA boundaries are Airport outer security fencing and any building that forms part of secured perimeter. When necessary to cross pavement surface on airfield, Contractor shall daily inspect all paved surfaces for Foreign Object Debris (FOD) and before reopening pavement surface to air traffic. Final inspection shall be by MAF Operations. Contractor shall never leave opening in secure fence.

C. MAF SECURITY BADGES

Contractor is responsible for obtaining a photo-identification security badge issued by MAF Operations for each supervisor or foreman of every work crew working within AOA. Contractor shall obtain MAF Operations security badges for at least one member of each work crew working in separate areas of AOA. All individuals responsible to the Contractor, including employees, subcontractors, suppliers, or representatives, obtain and display a MAF Operations security badge, or are directly escorted/supervised by an individual displaying a current MAF Operations security badge.

Contractor may obtain MAF security badges from MAF Operations Department. MAF Operations reserves the right to limit the number of security badges issued to Contractor. MAF Operations will charge Contractor for each security badge issued. Fingerprint verification will be an additional cost. Total cost is covered by Contractor and not refundable. An additional fee will be charged for lost or destroyed badges.

MAF Operations security badges shall always be worn and easily visible while working within the AOA. Badge holder shall be familiar with and obey all regulations, security, and safety rules. MAF Operations security badge may be confiscated, and all security rights revoked by MAF Operations upon breach of any security or safety regulations at Operation discretion. MAF Operations badge holder shall surrender badge at Project completion, transfer or termination of employment, or any time at MAF Operations request.

MAF shall conduct a background check of each applicant for an MAF Operations security badge. Contractor is responsible for completing required forms and submitting to MAF Operations for review as early in the Project as possible to avoid construction delays. Forms for completing required background checks are available through MAF Operations after Project award. MAF Operations shall be responsible for reviewing background checks. Only persons whose application is approved by MAF Operations, are issued security badges. MAF Operations reserves the right to bar anyone from the AOA found by background check to be, in the opinion of MAF Operations, a risk to AOA security or safety.

At Project completion, Contractor shall return all MAF Operations-issued security badges to MAF Operations. MAF Operations will charge an additional fee for each lost or destroyed MAF Operations-issued security badge. All MAF Operations-issued security badges must be accounted for and surrendered at Project completion. Failure to account for and surrender all MAF Operations-issued security badges will constitute grounds for withholding retainage from final pay estimate amount.

D. CONTRACTOR'S ENTRANCE GATE

Adjacent to Contractor entrance gate outside AOA, Contractor shall provide a parking area for employee's personal automobiles. Engineer directs limits of this parking/storage area. At Project completion, any damage done by Contractor to this area shall be repaired to Engineer satisfaction at no additional cost to Owner. Repairs shall include but not limited to regrading, reseeding, and/or repaving any damaged areas.

Contractor is responsible for and shall control all movement through Contractor entrance gate. Only authorized personnel and vehicles are allowed to enter AOA through this gate. Pedestrian walkthroughs are not allowed through vehicular gate. When not in immediate use, Contractor shall securely lock gate to prevent entrance by unauthorized persons or vehicles. Upon request, Contractor shall provide Director of Aviation and MAF Operations with duplicate keys (for key locks) or combinations (for combination locks) to lock(s) used to secure Contractor entrance gate to AOA.

If construction activities, such as hauling materials, require Contractor entrance gate to AOA remain open for long periods, Contractor may, upon MAF Operations approval, leave gate open and provide a full-time watchguard at the gate. Watchguard shall be approved for and possess an MAF Operations-issued security badge. If this security arrangement is desired and approved, gate shall be manned by a watchguard while gate remains open. Watchguard shall be a Contractor representative and responsible for all movement through gate. Again, only authorized persons and vehicles are allowed by Contractor's watchguard to enter AOA.

E. CONTRACTOR'S PLANT SITE, STORAGE, AND OFFICE AREA

Contractor is held completely responsible for any damage or deterioration in areas allowed for Contractor use as well as for maintenance and dust control for Project duration.

Direct negotiation may be conducted with Director of Aviation for any areas desired. Areas used by Contractor may be subject to rental rates and fees as Director of Aviation identifies.

Contractor shall completely restore, at own expense, areas occupied including but not limited to regrading disturbed areas, complete removal of debris, or any other material Contractor brings onto site, as well as complete replacement of topsoil, turf, asphalt pavement, concrete slabs, or drives, etc. that were worn, deteriorated, or damaged while Contractor and forces occupied area. All restoration shall be to Director of Aviation's satisfaction.

Prior to moving into an unpaved area, Contractor shall clear and grub as well as remove and stockpile a minimum 6 inches of existing topsoil. After Project completion and clearing site of materials, equipment, and debris, Contractor shall replace, spread, and grade salvaged topsoil, followed by seeding and fertilizing.

All restoration activities shall be accomplished per applicable Technical Specifications.

No direct payment will be made to Contractor for preparing or restoring plant site haul routes, storage, or office areas.

For all projects with an onsite concrete or hot-mix asphalt batch plant, and for projects involving pug-mill produced material, a concrete or asphalt paved material stockpile area is required. Stockpile all materials to incorporate into concrete, hot mix, cement-treated base (CTB), or other similar material on a specially prepared concrete or asphalt pad so stockpile contamination does not occur. Stockpile area shall be restored to pre-Project conditions

F. VEHICLE ESCORT

All vehicles responsible to Contractor entering AOA, (supplier vehicles, etc.), shall be escorted by an approved Contractor escort vehicle from point of AOA entry to construction site. Escort vehicle shall be clearly identified with standard FAA specified markings and/or flags ans well as marked with Contractor name.

Escort vehicle is responsible for leading supply, delivery, or other vehicles across active airfield. To facilitate safe movement of escort vehicle and escorted vehicles, driver of escort vehicle shall be approved for, issued, and display an MAF Operations security badge. Further, escort vehicle driver shall be familiar with MAF security and safety procedures.

G. CHALLENGING UNAUTHORIZED PERSONNEL OR VEHICLES:

Contractor and employees, subcontractors, suppliers, and representatives who are issued an MAF Operations security badge, are responsible for challenging any person/vehicle found on AOA or other non-public area who does not display, cannot produce a valid MAF Operations security badge, or is not under escort or direct supervision of a person possessing a valid MAF Operations security badge. Advise the person he/she is within a restricted area and inform of an appropriate exit route. Should unauthorized person refuse to exit restricted area, immediately notifiy MAF Operations for further action and keep unauthorized person under surveillance until MAF Operations arrives.

Any expired or altered badge or badge bearing a photograph not matching bearer shall be brought to the attention of MAF Operations and immediately confiscated by MAF Operations or Airport Police.

H. CONTRACTOR'S SAFETY PLAN (CSP)

Contractor is required to submit a Construction Safety Plan (CSP) as part of the submittal process before construction. Always adhere to CSP. MAF reserves the right to have Contractor amend CSP at any time if concerns arise.

Escort vehicle will be responsible for leading supply, delivery, or other vehicles across active airfield. To facilitate safe movement of escort and escorted vehicles, escort vehicle driver shall be approved for, issued, and display an MAF security badge. Further, escort vehicle driver shall be familiar with airport security and safety procedures. Escort vehicle shall be equipped with FAA radio (see Article 5.I - Two-Way Radio Communications). Driver of escort vehicle shall be familiar with FAA radio, operation, and obey all instructions from Air Traffic Control Tower.

I. TWO-WAY RADIO COMMUNICATIONS

MAF does not permit Contractor to contact ATCT; therefore, Contractor will not be required to have two-way radios. Communication will be through MAF Operations staff.

6. WILDLIFE MANAGEMENT

A. TRASH

Contractor must dispose all trash in a covered trash can or other method, not allowing trash to become a hazard or animal attractant.

B. STANDING WATER

Contractor shall minimize standing water.

C. TALL GRASS AND SEEDS

Contractor must maintain construction area grass to height required by MAF.

D. POORLY MAINTAINED FENCING AND GATES

Contractor shall maintain any fencing or gates in good condition, proper working order, and gap under fence or gate shall not exceed 3 inches.

E. DISRUPTION OF EXISTING WILDLIFE HABITAT

In event of wildlife habitat, Contractor will immediately notify MAF and Engineer.

7. FOREIGN OBJECT DEBRIS (FOD) MANAGEMENT

Contractor shall train and emphasize to construction site employees the need for continuous Foreign Object Debris (FOD) checks on or near active airfield pavement.

Contractor must conduct FOD checks before and after each construction shift at a minimum and monitor nearby active pavements throughout construction shift.

8. HAZARDOUS MATERIALS (HAZMAT) MANAGEMENT

Hazardous materials will be handled and stored per latest revision to FAA Advisory Circular 150/5370-2G - Operational Safety on Airports during Construction. Contractor must be prepared to immediately contain and clean spills resulting from fuel, oil, petroleum products, or hydraulic fluid leaks. Transportation and handling of other hazardous materials on Airport requires additional special procedures as addressed in latest revisions to FAA Advisory Circular 150/5320-15A - Management of Airport Industrial Waste. All spills must be immediately reported to MAF Operations.

9. CONSTRUCTION ACTIVITY NOTIFICATIONS

A. RESPONSIBLE REPRESENTATIVES / POINTS OF CONTACT

MAF

Name	Position	Phone
Aaron Easton	Deputy Director of Airports	432.560.2200 x3010
Nick Krakovec	Airport Operations Supervisor	432.560.2200 x3006

Parkhill, Engineer/Consultant

Name	Position	Phone
Danny Winchester, P.E.	Project Manager	432.697.1447
Michael Krusing, P.E.	Project Engineer	806.473.3671

TBD, Quality Assurance Testing

Name	Position/Trade	Phone

_____, Subcontractor

Name	Position/Trade	Phone

B. NOTICES TO AIRMEN (NOTAM)

MAF is responsible for issuing any Notice to Airmen (NOTAM) required before Project begins, as Project progresses, and will cancel NOTAMs at completion of intermediate construction phases of Project, as required. Contractor shall closely coordinate anticipated and required NOTAMs with MAF and provide MAF at least 72 hours' notice of necessary NOTAMs.

C. EMERGENCY NOTIFICATION PROCEDURES

In case of emergency, Contractor shall immediately call 911 first, then MAF Operations, then Engineer.

D. AIRCRAFT RESCUE AND FIREFIGHTING (ARFF) NOTIFICATIONS

During airport emergencies, all ARFF vehicles always have the immediate right of-way and may traverse any and all known roadways throughout airfield. Contractor, subcontractors, and suppliers shall immediately yield right-of-way to all Airport ARFF personnel and equipment.

Owner and Engineer shall be notified in writing at least 72 hours in advance if water lines or fire hydrants are out of service. 72-hour advance notification shall also be provided prior to performing any work that may close or affect an emergency rescue and firefighting route.

MAF Administration/Operations will communicate with MAF ARFF as needed to ensure MAF ARFF remain aware of construction activities.

E. FAA NOTIFICATION

Contractor will notify Consulting Engineer and MAF 72 hours in advance of any workaround NAVAIDs or shutdowns affecting NAVAIDs owned by FAA. Contractor shall notify NAVAIDs owned by a separate party 72 hours in advance of any workaround or shutdowns of NAVAIDs.

10. INSPECTION REQUIREMENTS

A. DAILY INSPECTIONS

Contractor shall perform daily safety, security, and phasing inspections to ensure CSPP compliance. Document inspections in Contractor's Daily Logs/Quality Control Logs.

Contractor is required to submit a Quality Control Plan (QCP) for Owner or designated representative review before any construction. QCP will address specific requirements for inspection of individual specification/pay items including test method, sampling point, testing frequency for each item, and proposed remediation action for each item if it does not meet Specification requirements. QCP will also provide direction on developing inspection reports and what to include. QCP will likely be developed in whole or in conjunction with selected Quality Control firm. QCP shall include and address Construction Management Plan (CMP) requirement.

B. FINAL INSPECTIONS

MAF will perform final safety inspection before opening any airfield pavement to aircraft.

11. UNDERGROUND UTILITIES

Contractor shall locate, mark, and protect all utilities and infrastructure during construction. Location of utilities shall include notification of Texas One Call system, as well as coordination with MAF.

12. PENALTIES

If Contractor is, at Engineer and MAF discretion, continuously negligent towards construction site safety, or refuses to comply with safety requirements, Contractor access to airfield may be suspended until Contractor complies. No reimbursement for delay will be granted under this circumstance. This would include negligence towards FOD control.

13. SPECIAL CONDITIONS

A. FAA FORM 7460-1

- Consulting Engineer will prepare and submit FAA Form 7460-1 for Project scope and proposed Construction Safety and Phasing Plan (CSPP).
- Contractor shall submit Form 7460-1 on all equipment over 20 feet high.

- A blank Form 7460-1 - Notice of Proposed Construction or Alteration, is included in Appendix B. Contractor shall submit supplemental FAA Form 7460-1 to FAA at least 45 days prior to utilization of equipment in excess of 20 feet in height.

B. ONSITE BURNING AND BLASTING

Onsite burning and blasting are prohibited.

C. GUN PROHIBITION ON AIRPORT PROPERTY

No firearms or guns are allowed on MAF property.

14. RUNWAY AND TAXIWAY VISUAL AIDS

Airport marking, lighting, signs, and visual NAVAIDs must be clearly visible to pilots, not misleading, confusing, or deceptive. All must be secured in place to prevent movement by prop wash, jet blast, wing vortices, or other wind currents and constructed of materials to minimize damage to an aircraft in the event of inadvertent contact.

Lighting, signs, and NAVAIDs located within object-free area must be frangible.

15. MARKING AND SIGNS

A. ACCESS ROUTE

Contractor required to mark access routes and haul routes with lathes and flag tape.

B. APPROVED WORK AREAS

Contractor must mark approved work areas with lathes and flag tape to ensure construction personnel and equipment remain in approved areas.

16. HAZARD MARKING AND LIGHTING

A. EQUIPMENT

- Contractor vehicles shall be clearly identified with Contractor name, standard FAA marking, lighting, and/or flags. Rotating amber beacons are required for all nighttime work.
- Contractor shall submit 7460s on all equipment over 20 feet in height.
- Any request to use nighttime lighting will be provided in writing two weeks prior to requested start time, from Contractor to Engineer and MAF for approval.

B. WORK AREAS

- Contractor shall provide temporary, low-profile barricades to delineate safe operating areas for aircrafts.
- Barricades shall have flashing red lights.
- Contractor must inspect lights each evening and immediately replace any lights not operating correctly.
- Contractor will be fined for non-working lights as indicated in Project Specifications.
- Line perimeter construction area with low-profile aviation barricades spaced at 5 feet.

17. WORK ZONE LIGHTING FOR NIGHT CONSTRUCTION

If accomplishing work at night, Contractor-provided lighting equipment must adequately illuminate work area. Present a Lighting Plan to MAF, Engineer, and FAA at least 14 days before commencing nighttime construction activities. Requirement for Lighting Plan are stated in Section 3.22 of FAA AC 150/5370-2G.

18. PROTECTION

A. RUNWAY SAFETY AREA (RSA)

No construction or material stockpile shall occur within an active RSA. Contractor shall mark out RSA before construction. RSA is 500 feet wide and extends 1,000 feet beyond runway end for al runways.

B. RUNWAY OBJECT FREE AREA (ROFA)

No material stockpile will occur within an active ROFA. ROFA is 800 feet wide and 1,000 feet beyond runway end for all runways.

C. TAXIWAY SAFETY AREA (TSA)

No construction or material stockpile shall occur within an active TSA. TSA is 171 feet wide.

D. TAXIWAY OBJECT FREE AREA (TOFA)

No material stockpile shall occur within an active TOFA. TOFA is 259 feet wide.

E. OBSTACLE FREE ZONE (OFZ)

No construction activity or material stockpile will penetrate OFZ.

F. RUNWAY APPROACH/DEPARTURE SURFACES

No construction activities will penetrate approach/departure surfaces.

G. OPEN TRENCHES

Open trenches are not permitted within RSA of an open runway or TSA of an open taxiway. Contractor shall prominently mark any open trench or excavation at construction site with lighted barricades.

H. SAFETY INFORMATION

Refer to Appendix A for safety information.

I. JET BLAST

Contractor shall take precautions to minimize effects of jet blast, particularly in areas near runway threshold.

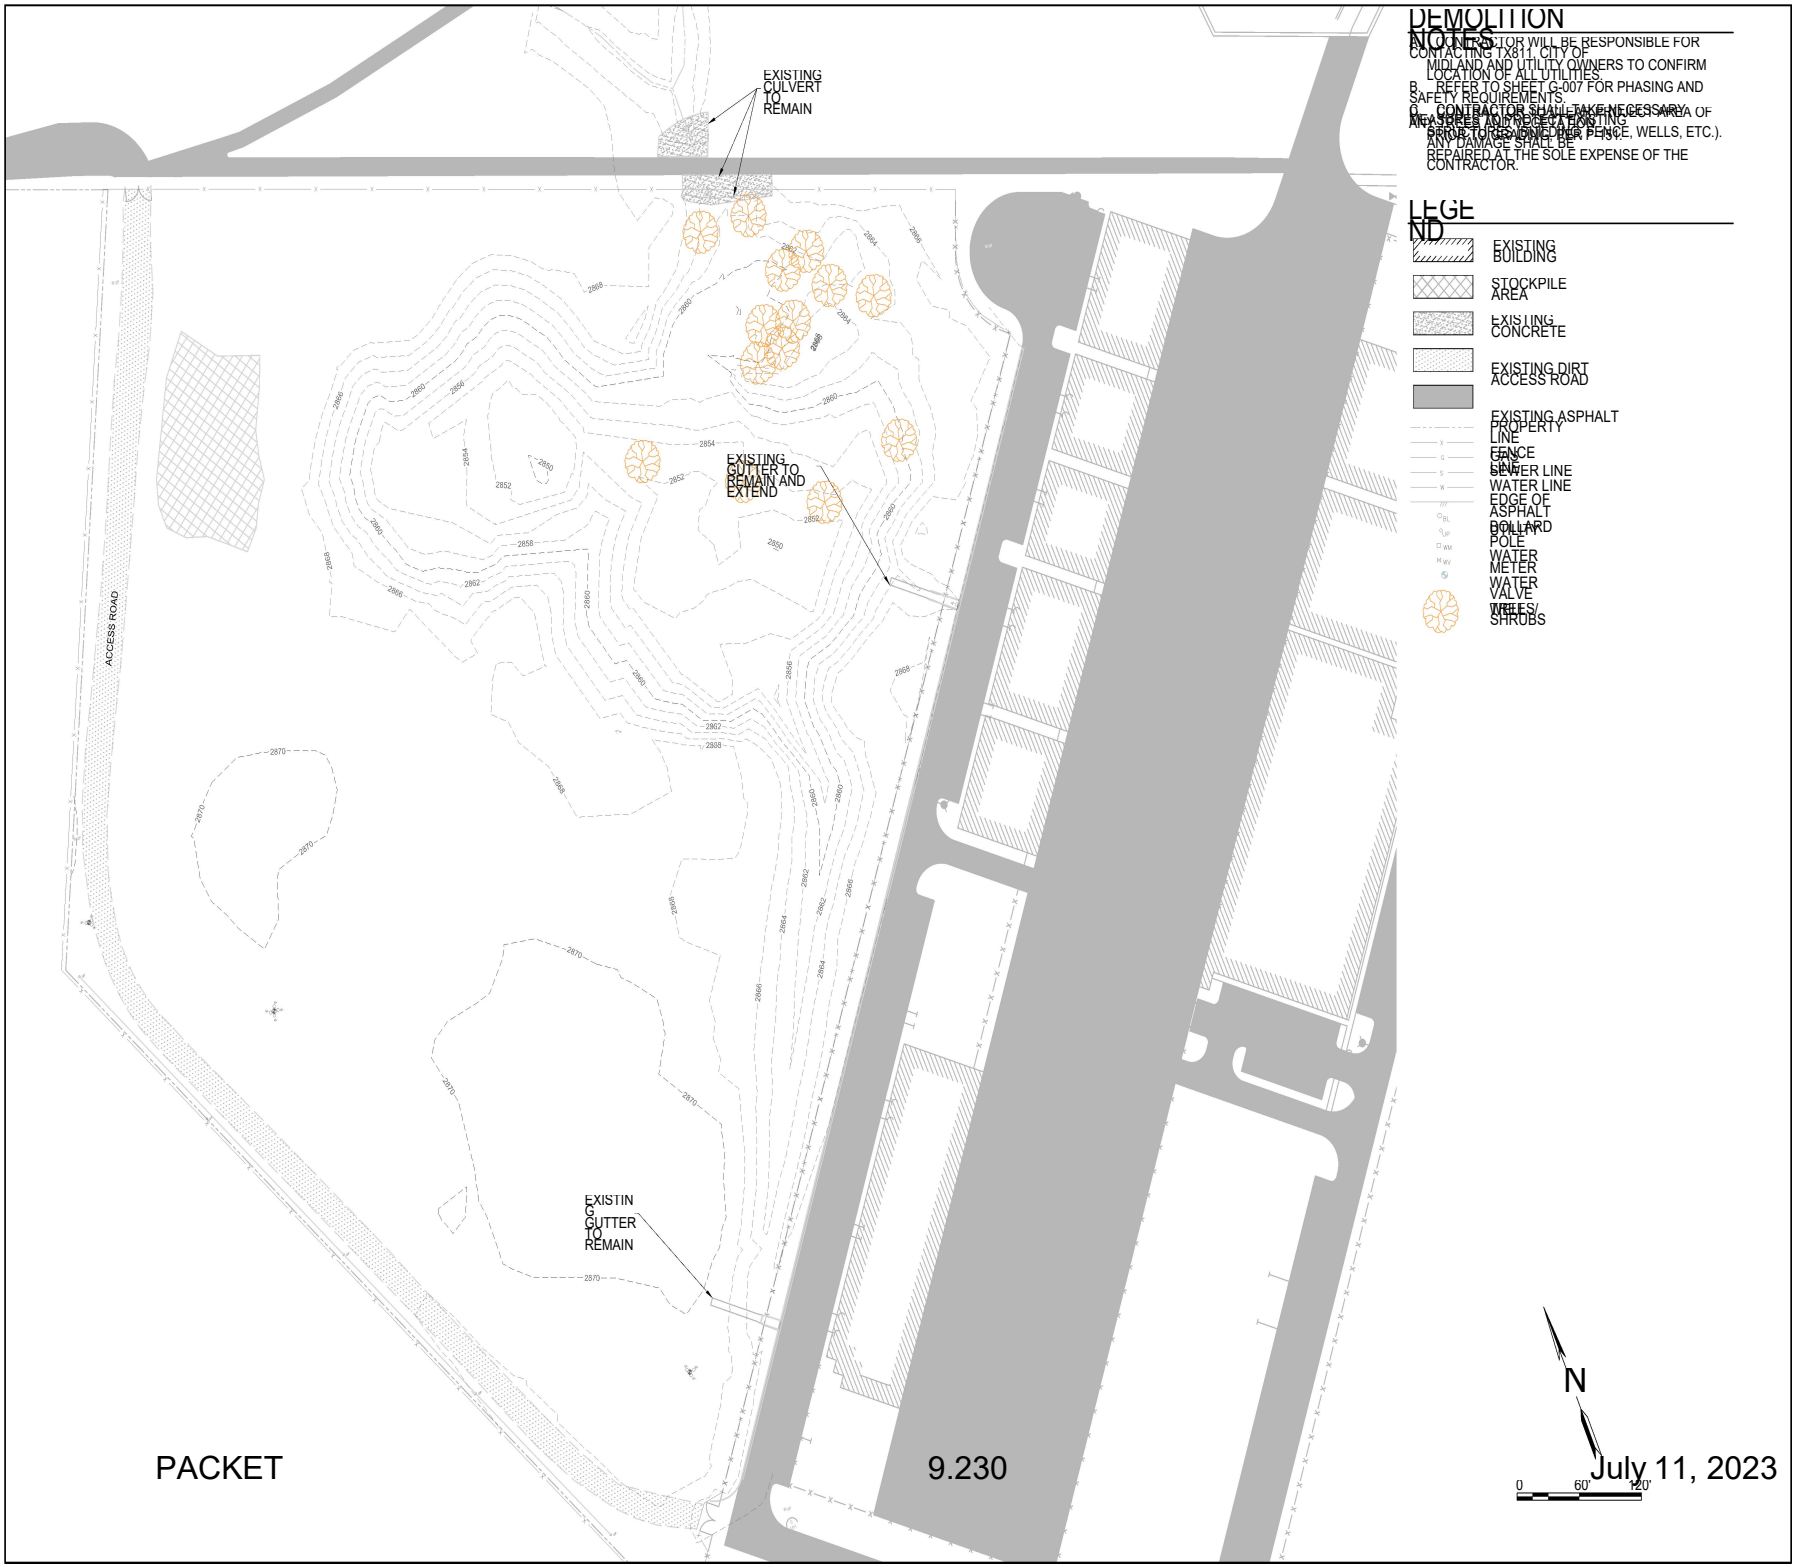
J. ELECTRICAL LOCK OUT/TAG OUT REQUIREMENTS

Contractor shall prepare lockout/tag out plan and communicate procedures to all staff.

K. UNUSED RUNWAY

Where shown on Construction/Safety Plan, Contractor shall denote unusable runway pavement using low-profile aviation barricades. Refer to Plans for details.

19. OTHER CONSTRUCTION LIMITATIONS



A. PROHIBITIONS

- No use of tall equipment over 20 feet unless a 7460-1 determination letter is issued for such equipment.
- No use of open-flame welding or torches.
- No use of electrical blasting caps.
- No use of flare pots.

B. RESTRICTIONS

- Any construction suspension required during specific airport operations will be coordinated by Engineer, Owner, and Contractor during construction.
- Areas that cannot be worked on simultaneously, will be coordinated by Engineer, Owner, and Contractor during construction.
- Refer to Article 16 – Hazard Marking and Lighting, for night construction requirements.
- Seasonal construction restrictions will be coordinated by Engineer, Owner, and Contractor during construction.

APPENDIX A: CONSTRUCTION SAFETY AND PHASING PLAN AND DETAILS

DEMOLITION NOTES

A. CONTRACTOR WILL BE RESPONSIBLE FOR CONTACTING TX811, CITY OF MIDLAND AND UTILITY OWNERS TO CONFIRM LOCATION OF ALL UTILITIES.

B. REFER TO SHEET G-007 FOR PHASING AND SAFETY REQUIREMENTS.

C. CONTRACTOR SHALL TAKE NECESSARY PRECAUTIONS TO PROTECT EXISTING AREAS (PAVEMENT, BUILDINGS, FENCE, WELLS, ETC.). ANY DAMAGE SHALL BE REPAIRED AT THE SOLE EXPENSE OF THE CONTRACTOR.

APPENDIX B: FAA FORM 7460-1, NOTICE OF PROPOSED CONSTRUCTION OR ALTERATION (BLANK)

NOTICE OF PROPOSED CONSTRUCTION OR ALTERATION

§ 77.9 Construction or alteration requiring notice.

If you are required to file notice under §77.9, you must submit to the FAA a completed FAA Form 7460–1, Notice of Proposed Construction or Alteration. You may submit a form by one of the following methods:

- Mail: Mail Processing Center, Federal Aviation Administration, Southwest Regional Operation Group, 10101 Hillwood Parkway, Fort Worth, TX 76177
- Fax: (817) 222-5920
- Website: https://oeaaa.faa.gov

(a) Each sponsor who proposes construction or alteration of an airport that is eligible for inclusion in the National Plan of Integrated Airport Systems (NPIAS) must notify the FAA in accordance with this section.

(b) Each person who proposes any of the following construction or alteration must notify the FAA in accordance with this section:

(1) Any construction or alteration that is more than 200 ft. AGL at its site.

(2) Any construction or alteration that exceeds an imaginary surface extending outward and upward at a slope of 100 to 1 for a horizontal distance of 20,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway more than 3,200 ft. in actual length, excluding heliports.

(3) Any construction or alteration that exceeds an imaginary surface extending outward and upward at a slope of 50 to 1 for a horizontal distance of 10,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway no more than 3,200 ft. in actual length, excluding heliports.

(4) Any construction or alteration that exceeds an imaginary surface extending outward and upward at a slope of 25 to 1 for a horizontal distance of 5,000 ft. from the nearest point of the nearest landing and takeoff area of each heliport described in paragraph (d) of this section which is available for public use and is either a visual flight rules or instrument flight rules landing area, which is constructed or altered after May 29, 2008.

(5) Any highway, railroad, or other traverse way for mobile objects, of a height which, if adjusted upward 17 feet for an Interstate Highway that is part of the National System of Military and Interstate Highways where overcrossings are designed for a minimum of 17 feet vertical distance, 15 feet for any other public roadway, 10 feet or the height of the highest mobile object that would normally traverse the road, whichever is greater, would exceed a height at the point of penetration of the horizontal surface of 0.5 nautical miles or the conical surface described in paragraph (d) of this section. An FAA determination under §77.23(a)(1) or §77.23(a)(2) is not required for any road, 23 feet or greater in height, for which there is no future use shown on any public road planning document I have access to.

(6) Any construction or alteration on any airport regardless of height or location. One engine inoperative takeoff and climbout surface areas are defined for each runway based upon the takeoff and climbout procedure specified for each runway. Unless otherwise specified, an amount equal to 152 feet per statute mile shall be used to calculate the one engine inoperative takeoff and climbout surface slope.

(7) Any construction or alteration on any airport listed in the Airport Directory, Alaska Supplement or Pacific Chart Supplement of the Government Flight Information Publication.

(8) Any construction or alteration on any airport under construction that will be available for public use;

(9) Any construction or alteration on an airport operated by the DOD.

(c) You need to file notice of construction or alteration of:

(1) Any object that will be shielded by existing structures of a permanent and substantial nature or by natural terrain or topographic features of equal or greater height, and will be located in the congested area of a city, town, or settlement where the shielded object would not adversely affect safety in air navigation;

(2) Any antenna structure of 20 feet or less in height, except one that would increase the height of another antenna structure.

(d) You need to file notice with the FAA if you propose construction or alteration that is within the following areas:

(1) Within 20,000 ft. of a public use airport or heliport which is listed in the Airport Directory, Alaska Supplement or Pacific Chart Supplement of the Government Flight Information Publication, and it is of greater height than an imaginary surface extending outward and upward from the airport at the slope of 100 to 1 for a horizontal distance of 20,000 ft. for each runway more than 3,200 ft. in actual length, and 10,000 ft. for all other runways. The distance is measured from the nearest point of the nearest runway of the airport with its longest runway more than 3,200 ft. in actual length, excluding heliports.

(2) Within 10,000 ft. of a military airport or heliport which is operated by the DOD, or within 10,000 ft. of an airport or heliport which is operated by the FAA or proposed in any form or manner known to the FAA, if it is of greater height than an imaginary surface extending outward and upward from the airport at the slope of 100 to 1 for a horizontal distance of 10,000 ft. for each runway of the airport with its longest runway more than 3,200 ft. in actual length, excluding heliports. The distance is measured from the nearest point of the nearest runway of the airport with its longest runway more than 3,200 ft. in actual length, excluding heliports.

(3) Within 5,000 ft. of a public use heliport which is listed in the Airport Directory, Alaska Supplement or Pacific Chart Supplement of the Government Flight Information Publication, and it is of greater height than an imaginary surface extending outward and upward from the heliport at the slope of 25 to 1 for a horizontal distance of 5,000 ft. from the nearest point of the nearest landing and takeoff area of each heliport described in paragraph (d) of this section which is available for public use and is either a visual flight rules or instrument flight rules landing area, which is constructed or altered after May 29, 2008.

(4) Within 5,000 ft. of a military or FAA-approved private use heliport which is not listed in the Airport Directory, Alaska Supplement or Pacific Chart Supplement of the Government Flight Information Publication, and it is of greater height than an imaginary surface extending outward and upward from the heliport at the slope of 25 to 1 for a horizontal distance of 5,000 ft. from the nearest point of the nearest landing and takeoff area of each heliport described in paragraph (d) of this section which is available for public use and is either a visual flight rules or instrument flight rules landing area, which is constructed or altered after May 29, 2008.

(5) Any highway, railroad, or other traverse way for mobile objects, of a height which, if adjusted upward 17 feet for an Interstate Highway that is part of the National System of Military and Interstate Highways where overcrossings are designed for a minimum of 17 feet vertical distance, 15 feet for any other public roadway, 10 feet or the height of the highest mobile object that would normally traverse the road, whichever is greater, would exceed a height at the point of penetration of the horizontal surface of 0.5 nautical miles or the conical surface described in paragraph (d) of this section. An FAA determination under §77.23(a)(1) or §77.23(a)(2) is not required for any road, 23 feet or greater in height, for which there is no future use shown on any public road planning document I have access to.

(6) Any construction or alteration on any airport regardless of height or location. One engine inoperative takeoff and climbout surface areas are defined for each runway based upon the takeoff and climbout procedure specified for each runway. Unless otherwise specified, an amount equal to 152 feet per statute mile shall be used to calculate the one engine inoperative takeoff and climbout surface slope.

(7) Any construction or alteration on any airport listed in the Airport Directory, Alaska Supplement or Pacific Chart Supplement of the Government Flight Information Publication.

(8) Any construction or alteration on any airport under construction that will be available for public use;

(9) Any construction or alteration on an airport operated by the DOD.

(c) You need to file notice of construction or alteration of:

(1) Any object that will be shielded by existing structures of a permanent and substantial nature or by natural terrain or topographic features of equal or greater height, and will be located in the congested area of a city, town, or settlement where the shielded object would not adversely affect safety in air navigation;

(2) Any antenna structure of 20 feet or less in height, except one that would increase the height of another antenna structure.

INSTRUCTIONS FOR COMPLETING FAA FORM 7460-1

PLEASE TYPE or PRINT

ITEM #1. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #2. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #3. New Construction would be a structure that has not yet been built. Alteration is a change to an existing structure such as the addition of a side mounted antenna, a change to the marking and lighting, a change to power and/or frequency, or a change to the height. The nature of the alteration shall be included in ITEM #21 "Complete Description of Proposal". Deconstruction is a correction to the latitude and/or longitude, a correction to the height, or filing on an existing structure which has never been studied by the FAA. The reason for the notice shall be included in ITEM #21 "Complete Description of Proposal".

ITEM #4. If Permanent, so indicate. If Temporary, such as a crane or drilling derrick, enters the estimated length of time the temporary structure will be up.

ITEM #5. Enter the date that construction is expected to start and the date that construction should be completed.

ITEM #6. Please indicate the type of structure. DO NOT LEAVE BLANK.

ITEM #7. In the event that obstruction marking and lighting is required, please indicate type desired. If no preference, check "other" and indicate "no preference" DO NOT LEAVE BLANK. NOTE: High Intensity lighting shall be used only for structures over 500' AGL. In the absence of high intensity lighting for structures over 500' AGL, marking is also required.

ITEM #8. If the structure has been registered with the FCC, enter the FCC Antenna Structure Registration number here.

ITEM #9 and #10. Latitude and longitude must be geographic coordinates, accurate to within the nearest second known. Latitude and longitude derived solely from a hand-held GPS is only accurate to within 100 meters (328 feet) 95 percent of the time. This data, when plotted, should match the site depiction submitted under ITEM #20.

ITEM #11. NAD 83 is preferred, however, latitude and longitude may be submitted in NAD 27. Also, in some geographic areas where NAD 27 and NAD 83 are not available other datum may be used. It is important to know which datum is used. DO NOT LEAVE BLANK.

ITEM #12. Enter the name of the nearest public use (not private use) airport or heliport, military airfield or heliport to the site. If the structure is or will be in a city, enter the name of that city and state.

ITEM #13. Enter the name of the nearest public use (not private use) airport or heliport, military airfield or heliport to the site. If the structure is or will be in a city, enter the name of that city and state.

ITEM #14. Enter the distance from the airport or heliport listed in #13 to the structure.

ITEM #15. Enter the direction from the airport or heliport listed in #13 to the structure.

ITEM #16. Enter the site elevation above mean sea level and expressed in whole feet rounded to the nearest foot (e.g. 17'3" rounds to 17'. 17'6" rounds to 18'). This data should match the ground contour elevations for site depiction submitted under ITEM #20.

ITEM #17. Enter the total structure height above ground level in whole feet rounded to the next highest foot (e.g. 17'3" rounds to 18'). The data entered in this block should match the overall height above mean sea level and expressed in whole feet as in ITEM #16. The total structure height includes appurtenances mounted on top of the structure, such as antennas, obstruction lights, lightning rods, etc.

ITEM #18. If an FAA aeronautical study was previously conducted, enter the previous study number.

ITEM #19. Enter the relationship of the structure to roads, airports, prominent terrain, existing structures, etc. Attach an 8-1/2" x 11" non-reduced copy of the appropriate 7.5 minute U.S. Geological Survey (USGS) Quadrangle Map MARKED WITH A PRECISE INDICATION OF THE SITE LOCATION. To obtain maps, contact USGS at 1-888-275-8747 or via Internet at "http://store.usgs.gov". If available, attach a copy of the sectional aeronautical chart showing the site location.

ITEM #20. For a new structure, provide a detailed site plan depicting the location of the structure with respect to the airport property and runways. For alterations and deconstruction, include any previously submitted site plan, if available. Site plans should be drawn to scale and should include the following:

- For antennas, include the type of antenna and center of radiation (AGL and AMSL) and all frequencies.
- For antennas, include the type of antenna and center of radiation (AGL and AMSL) and all frequencies.
- (Attach the antenna pattern, if available), include size and configuration of wires and their supporting structures (attach detail if available).
- For buildings/structures, include dimensions, and indicate orientation to true north.
- For each pole/support, include coordinates, site elevation, and structure height above ground level or water.
- For existing structures, thoroughly explain the reason for notifying the FAA (e.g. construction materials or previous study, etc.).
- Filing alterations may alert the FAA that you believe the sponsor of this construction or alteration from complying with any other federal, state or local rules or regulations. If you are not sure what other rules or regulations apply to your proposal, contact local/state aviation's and zoning authorities.

Paperwork Reduction Act Statement: This information is collected to evaluate the effect of proposed construction or alteration on air navigation and is not confidential. Providing this information is mandatory or anyone proposing construction or alteration that meets or exceeds the criteria contained in 14 CFR, part 77. We estimate that the burden of this collection is an average 19 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, completing and reviewing the collection of information. A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number. The OMB control number associated with this collection is 2120-0001. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave., S.W., Washington, DC 20591, Attn: Information Collection Clearance Officer, ASP-110.

Please Type or Print on Form

APPENDIX C: ADVISORY CIRCULAR 150/5370-2G, OPERATIONAL SAFETY ON AIRPORTS DURING CONSTRUCTION

All contractors and subcontractors responsible for implementation of this CSPP must review all relevant sections of the FAA AC 150/5370-2G, Operating Safety on Airports During Construction

Click here to link to the full Advisory Circular PDF:

https://www.faa.gov/documentLibrary/media/Advisory_Circular/150-5370-2G.pdf

APPENDIX D: FAA CSPP REVIEW CHECKLIST

Checklist for FAA CSPP Review

Airport Name: MIDLAND INTERNATIONAL AIR & SPACE PORT LOCID: MAF

Associate City: MIDLAND, TEXAS

Project No. 01.9768.18

Project Name: MAF NW BASIN WILDLIFE IMPROVEMENTS

F.1.1. AC 150/5370-2G

This checklist identifies the main elements and sub-elements established under Chapter 2 of Advisory Circular 150/5370-2G. Project Managers (PM) are encouraged to use this checklist as an aid when reviewing a Sponsor's CSPP for conformance to the safety standards. Because the PM's approval/disapproval letter in OE/AAA represents the official FAA action, a completed checklist is not a required record the PM must sign or archive in the grant file.

CSPP Element	Element Addressed?			Remarks
	Yes	No	N/A	
Coordination (Section 2.5)				
– Contractor Progress Meetings	✔			
– Addresses necessary actions when changes are proposed to CSPP	✔			
– Provisions for FAA ATO Coordination	✔			
Phasing (Section 2.6)				
– Phase Elements	✔			
– Construction Safety Drawings	✔			
Area and Operations Affected by Construction Activity (Section 2.7)				
– Identification of affected Areas	✔			No protected surfaces will be affected.
– Mitigation Affects	✔			
Navigation Aid Protection (Section 2.8)				
– Operational NAVAID Critical areas	✔			No NAVAIDs are near work area
Contractor Access (Section 2.9)				
– Location of Stockpiles Construction Material	✔			
– Vehicle and Pedestrian Operations	✔			
Wildlife Management (Section 2.10)				
– Trash	✔			
– Standing Water	✔			
– Tall Grass	✔			
– Fencing and Gates	✔			
– Disruption of Wildlife Habitat	✔			
Foreign Object Debris (Section 2.11)				
– FOD Control Measures	✔			
Hazardous Material Management (Section 2.12)				
– Hazardous Material Controls	✔			

CSPP Element	Element Addressed?			Remarks
	Yes	No	N/A	
Notification of Construction Activities (Section 2.13)				
– List of Responsible Representatives	✔			
– NOTAMs	✔			
– Emergency Notification Procedures	✔			
– Coordination with ARFF	✔			
– Notification to the FAA (Part 77, NAVAIDs….)	✔			
Inspection Requirements (Section 2.14)				
– Daily Inspections	✔			
– Final Inspections	✔			
Underground Utilities (Section 2.15)				
– Procedures for protecting underground utilities	✔			
Penalties (Section 2.16)				
– Penalty provisions for noncompliance with CSPP	✔			
Special Conditions (Section 2.17)				
– Conditions that may affect airport operations	✔			
Runway and Taxiway Visual Aids (Section 2.18)				
– General – Convey Clear Meaning; Secured from movement; Frangible	✔			
– Markings	✔			
– Lighting and Visual NAVAIDs	✔			
– Signage	✔			
Access Routes - Marking and Signage (Section 2.19)				
– Haul Road Demarcation	✔			
Hazard Marking, Lighting and Signage (Section 2.20)				
– Areas Impacted by Construction Operations	✔			
– Equipment	✔			
Work Zone Lighting for Nighttime Construction (Section 2.21)				
– Proper Illumination of Construction Area/Equipment	✔			
Protection Runway and Taxiway Areas, Zones and Surfaces (Section 2.22)				
– Runway Safety Area (RSA)	✔			
– Runway Object Free Area (ROFA)	✔			
– Taxiway Safety Area (TSA)	✔			
– Taxiway Object Free Area (TOFA)	✔			
– Obstacle Free Zone (OFZ)	✔			
– Approach and Departure Surfaces	✔			
Other Limitations on Construction (Section 2.23)				
– Prohibitions	✔			
– Restrictions	✔

A. INTRODUCTION

The Project accomplished under this program consists of regrading the Northwest Basin at the Midland International Air & Space Port (MAF). Other construction items include constructing concrete access road and drainage structures.

B. PERSONNEL AND RESPONSIBILITIES

- Sponsor:
  - Ms. Justine Ruff, Director of Airports, City of Midland, Texas, P.O. Box 60305, Midland Texas 79711, 432.560.2200 x3010
  - Mr. Aaron Easton, Deputy Director of Airports, City of Midland, Texas, P.O. Box 60305, Midland Texas 79711, 432.560.2200 x3010
- Federal Aviation Administration:
  - Michael Van Vliet, FAA, Southwest Region, Texas Airports Development Office ASW-650, 10101 Hillwood Parkway, Fort Worth, Texas 76177, michael.van.vliet@faa.gov, 817.222.5132
- Consulting Engineer and Staff
  - Danny Winchester, PE, Project Manager, Parkhill, 309 West Wall Street, Suite 100, Midland Texas 79701, 432.687.1447, dwinchester@parkhill.com
  - Michael Krusing, PE, Project Engineer, Parkhill, 4222 66th Street, Lubbock Texas 79423, mkrusing@parkhill.com, 806.473.2200
  - Lanell Pahe, Engineer, Parkhill, 3880 Rio Rancho Boulevard NE Suite 400, Rio Rancho, New Mexico 87124, lpahe@Parkhill.com, 505.473.3664
  - Debbie German, Project Coordinator, Parkhill, 4222 66th Street, Lubbock Texas 79423, 806.473.2200, dgerman@parkhill.com
- Project Manager/Engineer will oversee construction period services. Parkhill will also provide one, full-time Resident Project Representative (RPR) during Project construction. A second RPR will be provided if needed. RPR duties, responsibilities, and limitations of authority are described in the Professional Engineering Services Agreement. RPR will report directly to the Parkhill Project Manager. Parkhill will compile a copy of all test reports to be delivered to TxDOT Aviation. Key personnel and chain of communication are described as follows:

- Contractor (Updated upon award)
  - Contact Name, Title: _____
  - Address: _____
  - City State Zip: _____
  - Phone: _____
  - Email: _____
- Testing Laboratories
  - Sponsor's Quality Assurance Testing Lab (TBD)
    - Contact Name, Title: _____
    - Address: _____
    - City State Zip: _____
    - Phone: _____
    - Email: _____
  - Contractor's Quality Control Testing Lab (TBD)
    - Contact Name, Title: _____
    - Address: _____
    - City State Zip: _____
    - Phone: _____
    - Email: _____

As required, the Sponsor's Quality Assurance (QA) testing laboratory and Contractor's Quality Control (QC) testing laboratory must be certified according to ASTM D3666 and C1077.
Laboratory certificates may be found in Appendix B. Sponsor's QA laboratory is responsible for reporting all construction period and material compliant test results to Contractor, Sponsor, Sponsor's Agent, AA and Engineer. Contractor's QC laboratory is responsible for reporting all construction period and material compliant test results to Contractor, Engineer, Sponsor and Sponsor's Agent.

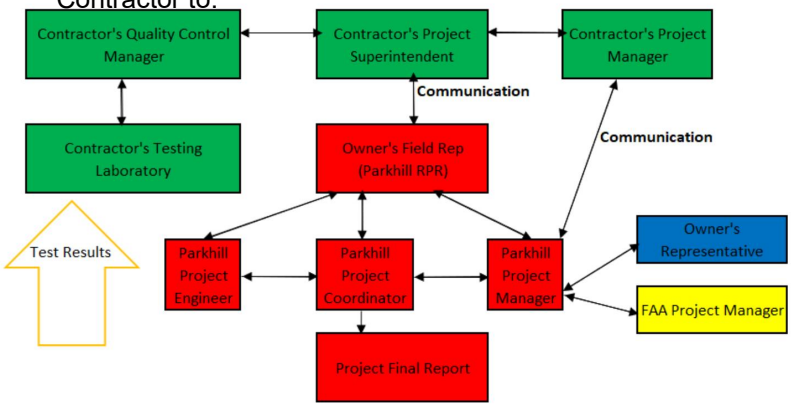
C. INSPECTION PROCEDURES AND FREQUENCIES

1. BY CONTRACTOR: Contractor is required to perform daily inspections of work in progress and to be performed. Inspection notes shall be captured in Contractor's daily reports and addressed and corrected as applicable. This will include isolated spot checks by Contractor and Contractor's QC testing laboratory. Contractor shall perform certain QC testing, where applicable, as defined in Project Specifications and Article I.E. Quality Control Testing (by Contractor) of Contractor's Quality Control Program.

2. BY ENGINEER: Engineer is required to visit the site at intervals appropriate to the various stages of construction as Engineer deems necessary to observe, as an experienced and qualified design professional, the progress and quality of the various aspects of Contractor's work. Based on information obtained during such visits and observations, Engineer will determine if Contractor's work is proceeding in accordance with the Contract Documents. Engineer will not be required to make exhaustive or continuous inspections to check the quality or quantity of Contractor's work. Engineer's efforts will be directed toward providing assurance to Owner that Contractor is completing the Work in accordance with the Contract Documents and that, based on Contractor's observations and an evaluation of the Contractor's Applications for Payment, the Schedule of Values is acceptable, and the conditions precedent to Contractor's being entitled to each payment have been met. Engineer will not supervise, direct, control, or have authority over or responsibility for Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with laws, rules, regulations, ordinances, codes, or orders applicable to Contractor's furnishing and performing the Work. Engineer will not have control over or charge of and will not be responsible for acts or omissions of Contractor, Subcontractors, or any of their agents or employees, or any other persons performing any of the Work, except as may otherwise be required of Engineer in the Contract Documents. Engineer will not be responsible for the failure of any Subcontractor to perform or furnish the Work in accordance with the Contract Documents.

3. BY ENGINEER'S REPRESENTATIVE (RPR): Parkhill will provide onsite full-time daily observation of Contractor's QC testing further in their role as Contractor Quality Control Program Reviewer (CQCPR) as per Agreement for Professional Services. RPR will check for "general conformance to plans and specifications." RPR will not "inspect" every detail of Contractor's Project nor direct Contractor operations. RPR will observe, document findings, and bring any concerns to Parkhill project manager. RPR will also coordinate Owner's QA testing laboratory. Tests will be performed as required by Technical Specifications and as directed by AA as per Agreement for Professional Services. RPR will maintain daily logs [in accordance with Quality Control Program] documenting daily activities, observations, and testing performed. Logs will be submitted to AA as part of Project Final Report, if applicable. RPR will perform periodic review of Contractor's QC testing, including test reports, and will prepare Daily Reports (Diaries) documenting RPR's observations and any corrective actions taken by Contractor. Include all photos in Daily Reports. Submit Daily Reports to AA Project Manager and carbon copy Sponsor. Final Report.

D. SUBMITTAL PROCESS



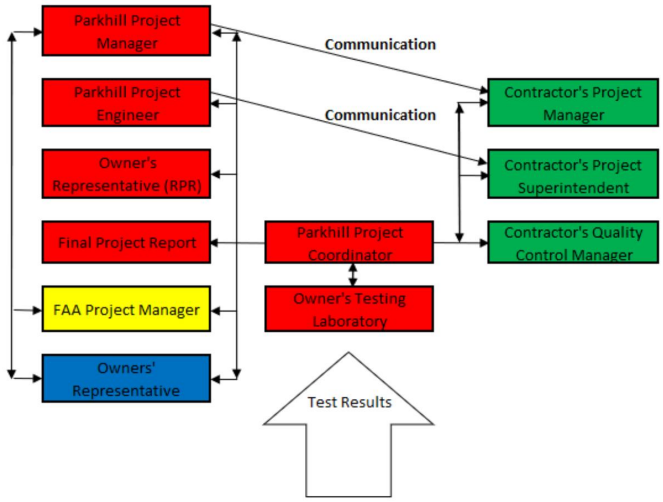
Contractor must prepare and submit a complete submittal list at Preconstruction Meeting to populate into Procore and maintain throughout Project duration. Engineer will also maintain a record of submittal status in Procore. All submittals shall address "Buy American" and FAA-required requirements by having Contractor submit a written certification statement indicating requirements are met. A preliminary list of submittals may be found in Appendix C. This list is not complete. Contractor to omit a submittal from list.

E. QUALITY CONTROL TESTING (BY CONTRACTOR)

Contractor must visually inspect all items used upon arrival and maintain control charts for applicable material production. Contractor shall perform and document all daily inspections and tests as determined in the Technical Specifications, FAA Item C-100 – Contractor Quality Control Program. Contractor shall make QC reports, test results, and inspection reports available to Engineer. Provide test results before start of the following day. Provide inspection reports on working day of record. All items of material and equipment are subject to Engineer surveillance. If Contractor determines to perform tests or sampling and testing in addition to the requirements of QC Program, Engineer may expect Contractor to:

- Perform adequate quality control measures.
- Furnish Engineer with required samples for independent quality assurance tests.
- Assist Engineer in obtaining samples.
- Cooperate with Engineer and laboratory personnel and furnish facilities required for the proper and convenient performance of their duties.

For a list of Parkhill tests, see Appendix D, Table 2 – Quality Control Testing by Contractor. All items of material and equipment are subject to Engineer surveillance. If Contractor determines to perform tests or sampling and testing in addition to the requirements of QC Program, Engineer may expect Contractor to:



Summary of Action: If/when deficiencies arise during construction, instigate immediate communication, discussion, and corrective action including but not limited to:

- Discussion of test results and potential implications
- Retest by Contractor to verify results.
- If retest confirms deficiency, Contractor shall rework deficiency or potentially replace
- Removal and replacement of defective material tested by Contractor's laboratory.
- Contractor shall develop a plan for avoiding same deficiency on future segments of Work.
- Differences in results addressed in Contractor's QC Plan.

F. ACCEPTANCE TESTING (BY OWNER'S REPRESENTATIVE)

For Testing Methods, see Appendix E, Table 3 - Quality Assurance (by Engineer).

Quality Assurance Testing Responsibility:

G. TEST RESULTS AND DOCUMENTATION

Daily Quality Control (QC) Tests: Contractor must document all QC test results performed on Project. Submit test results to RPR for review the day after testing is performed. If results are deficient, RPR will initiate dialogue with Contractor's Superintendent. If results are favorable, RPR will forward results to Parkhill Project Assistant to be compiled for Project Report.

Daily Quality Acceptance Tests: RPR will coordinate testing with Owner's Laboratory. RPR will record test results at point of testing, using this data to reconcile test reports received from Owner's Testing Laboratory. RPR will also note tests performed in failing. Deficient test results will be immediately communicated to Contractor's Project Superintendent.

- Retest: Whether passing or failing, RPR will obtain a copy of all QC test results performed by Contractor. Deficient results will result in immediate communication between Contractor and Engineer and subsequent retesting. Corresponding tests performed by Owner's Testing Laboratory will be documented.

H. FINAL TESTS AND QUALITY ASSURANCE REPORT

As part of the Project Report, Engineer, Contractor, and Owner's Testing Laboratory will coordinate preparation of a Final Test and Quality Control Report. Report will summarize number of tests performed versus number of tests required for each specification item. Failed tests and subsequent retests will be included. Where necessary, document acceptance of specification deficiencies.

APPENDIX A: CONSULTING ENGINEER STAFF RESUMES
(v b re est

Danny Winchester, PE

Civil Engineer | Principal

Danny Winchester, PE is a Principal and a Team Leader for Parkhill's Aviation Sector. His 35 years at Parkhill have been spent in aviation design and project management. Danny's aviation design has been mostly with FAA Certificated Airports (Part 139). He has been involved in aviation projects at Midland International Air & Space Port since he came to work for Parkhill. He has developed a strong expertise in FAA funding processes for Airport Improvement Project funding and Passenger Facility Charge funding. This expertise has allowed Danny to assist the City of Midland in acquiring over $150 million of funding from FAA for Capital Improvement Projects at the Midland International Airport over the past 35 years. Danny assisted Midland International Air & Space becoming the first Commercial Service Airport in Texas to receive an FAA Certified Space Launch Site Operator License.

Danny has served the engineering profession by serving in many roles at the local, regional, and state levels of the Texas Society of Professional Engineers. He was recognized by the Texas Society of Professional Engineers as both the Engineer of the Year and Young Engineer of the Year for the Permian Basin Chapter. He received the Distinguished Engineer Award from the Texas Engineering Foundation - 2004.

- MAF Terminal Building Equipment Replacement
- MAF Terminal Expansion - Gate 6

Michael Krusing, PE

Civil Engineer I Associate

Michael Krusing, PE is an Associate and Team Leader for Parkhill's Aviation Sector. After joining Parkhill in 2007, Michael worked with the infrastructure team in Amarillo, until 2010, when he joined Parkhill's Aviation team. In November 2014, Michael transferred from Parkhill's Amarillo office to the Lubbock office to better serve Parkhill's clients. Michael has gained experience by designing multiple projects for TxDOT Aviation and New Mexico Department of Transportation. He has also worked on projects benefiting Lubbock Preston Smith International Airport, Midland International Air and Space Port, and Laredo International Airport. Michael played a vital role in the designs of two projects that won Most Outstanding Airport in 2015 (Artesia Municipal) and 2016 (Eastside County).

Lanell Pahe

Engineering Technician

Lanell Pahe is a member of Parkhill's Aviation Sector. Her design experience includes pavement design, FAAR field pavement evaluation, airfield site layout, marking and electrical layouts, pavement rehabilitation, drainage, site grading, Stormwater Pollution Prevention Plan (SWPPP), and Construction Safety and Phasing Plan Layout. Lanell has worked on multiple Aviation Projects and Part 139 airports. She uses Civil 3D 2019, AutoCAD and G.I.S. for design and project cost estimating.

Debbie German

Project Assistant

Debbie is the Aviation Project Assistant (PASS) and has been with Parkhill since March 2015. She began with Parkhill in the Civil Clerical department, where she completed and reviewed FAA, TxDOT, and EJCDC specifications, reports, and more. She continues to work with those entities as well as assist in creating Parkhill's Civil Master Specifications to improve the firm's design communication and clarity. As a PASS, she provides project management support to the Aviation Sector with project documentation, internal and external communication, and project tracking. Debbie has a thorough understanding of TxDOT's eGrants, assisting clients in securing TxDOT funding for their projects, and Procore, Parkhill's go-to software for communicating Civil project information among the client, design team, and other stakeholders. In each capacity, Debbie serves as a liaison between her clients, the project managers, and the project superintendents to ensure clear communication among each party. She also is a member of the firm's Project Success Committee, which upholds its core values and motto of Building Community.

APPENDIX C: SUBMITTAL PROCESS SUMMARY

Table 1: SUMMARY OF SUBMITTALS

Specification	Spec Section	Submitted By	Material	Test Standard	Test Required	Sampling Locations	Minimum Test Frequency	Requirements	Notes
C-102 Temporary Air and Water Pollution, Erosion, Sedimentation and Control	102-3.2	C	Schedule						Contractor to prepare SWPPP and NOI, submit copies to Engineer/Owner.
C-105 Mobilization		C		None	None				
P-151 Clearing and Grubbing		C		None	None				
P-152 Excavation, Subgrade, and Embankment		C		None	Nonw				
P-605 Joint Sealants for Pavements	605-2.1	C	Joint Sealant	ASTM D6690					
	605-2.2	C	Backer Rod	ASTM D5249				25% +/- 5% larger in diameter than the nominal width of the joint	
	605-3.2	C	List of machines, equipment, and tools					X days prior to use on the project	
P-610 Concrete for Miscellaneous Structures	610-2.1a	C	Reactivity	ASTM C1260	Alkali Reactivity of Aggregates	Source	1 / 6 MO.	<0.08% at 14 days	Combine Fine and Coarse aggregate.
	610-2.2	C	Coarse Aggregate	ASTM C33	Gradation	Source	1 / Project	Requirements in Table 4, Class 5S	
	610-2.3	C	Fine Aggregate	ASTM C33		Source	1 / Project	Conform to test method.	
	610-2.4	C	cement	ASTM C595		Source	1 / Project	Type I, IP, IP-A, IS-A, IL	
	610-2.4	C	Cement	ASTM C114 or ASTM C1365	Alkalies	Source	1/ Project		
	610-2.5.a	C	Fly Ash	ASTM C618		Source	1/ Project	CaO Content <15%, total available alkali content <3% (ASTM C311)	
	610-2.6	C	Water	ASTM 1602		Source	1/Project	Potable water. Conform to test method.	
	610-2.7.a	C	Air-Entraining Admixture	ASTM C260	Air-Entraining Admixtures for Concrete	Source	1 / Project		
	610-2.7.b	C	Water-Reducing Admixture	ASTM C494		Source	1/Project	Type A, B, D	Type F & G high range water reducing admixtures and ASTM C1017 flowable admixtures shall NOT be used
	610-2.7.c	C	Chemical Admixture	ASTM C494	Set Retarding, Set Accelerating Admixture	Source	1 / Project	Retarding shall meet Type A, B, or D; Set accelerating shall meet Type C or E admixtures containing calcium chloride shall not be used.	Approved by RPR
	610-2.8	C	Premolded Joint Material	ASTM D1751 or ASTM D6690	Premolded Joint Seal	Source	1 / Project	Conform to test method.	
	610-2.9	C	Joint Filler	ASTM D6690		Source	1 / Project	Conform to test method	See P-605
	610-2.10	C	Reinforced Steel	See Steel Reinforcement Table	Steel Reinforcement	Source	1/Project	Conform to test method in table "Steel Reinforcement"	
	610-2.11	C	Curing Material	ASTM C309	See Table	Source	1 / Project	See Table "Material for Curing"	

Table 1: SUMMARY OF SUBMITTALS

Specification	Spec Section	Submitted By	Material	Test Standard	Test Required	Sampling Locations	Minimum Test Frequency	Requirements	Notes
P-610 Concrete for Miscellaneous Structures	610-3.2	C	Concrete Mixture	ASTM C39	Compressive Strength of Cylindrical Specimens Concrete	Source/Lab	1 / Project	Shall develop a compressive strength of 4000psi in 28 day.	Concrete shall contain no less than 470lbs cementitious material per cubic yd, water cementitious ratio shall not exceed .45 by weight.
	610-3.2	C	Concrete Mixture	ASTM C231	Air Content	Source	1/Project	Air content of concrete shall be 5% +/- 1.5%	
	610-3.2	C	Concrete Mixture	ASTM C143	Slump Test	Source	1 / Project	Slump not more than 4"	
	610-3.3	C	Mixing	ASTM C94 or ASTM C685	Air Temp	Source	1 / Structure	Concrete shall not be mixed while the air temp is <40 degrees F	
T-901 Seeding	901-2.1	C	Seed	Fed Spec JJJ-S-181	Type	Source	Project	AWIS Seed Act; Refer to Seed Properties and Rates Table	Seed blend/quantity of type seeds and application between 20%-80%
T-905 Topsoiling	905-2.1	C	Topsoil	ASTM C117	Wash Test	Source	Project	80% of material passing 200 mesh sieve.	
	905-2.2	C	Topsoil			Source	1/Project		Inspect Source Material (pH and organics)
T-908 Mulching	905-2.1	C	Mulch		Sample	Source	1/project, 30 days before delivery to project site	Sample to be approved by RPR

Item MC-5308 Woven Geotextile Interlayer		E		None	None				

City Council Meeting

Item Number: 10

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Justine Ruff, Director

Subject: **Motion approving the plans and specifications for the MAF Taxiway "E" Reconstruction Project, said plans and specifications being on file in the City Secretary's office referenced by the number and date of this motion, and authorizing the Interim City Manager or the Interim City Manager's designee to advertise for competitive bids for said project pursuant to the statutes of the State of Texas for accomplishing the work set forth in said plans and specifications (DISTRICT 4) (AIRPORTS)**

Purpose:

Motion approving the plans and specifications for the MAF Taxiway "E" Reconstruction Project, said plans and specifications being on file in the City Secretary's office referenced by the number and date of this Motion, and to authorize the Interim City Manager or the Interim City Manager's designee to advertise for competitive bids for said project pursuant to the statues of the State of Texas for accomplishing the work set forth in said plans and specifications.

Recommended City Council Action:

Approve

Fiscal Impact:

To Be Determined

Discussion:

In the Airport's 2021 Agreement with Parkhill, Smith & Cooper, the MAF Taxiway "E" Reconstruction Project (900412) was included. This project addresses the existing Taxiway "E" which was last rehabilitated in 1993 with a surface seal applied in 2013. Block cracking is occurring in several areas of the pavement that penetrate the base section below the asphalt

surface. Foreign Object Debris (FOD) has become an issue from the deteriorating asphalt surface breaking off at the edges of the cracks. This project will reconstruct Taxiway “E”, West of Taxiway “A” full depth with new subgrade course, base course and asphalt surface. This project will be included in FAA Grant #70, and the grant will cover 90% of the construction expenses of the project. The project is being bid at this time as the FAA has requested that we have “bids in hand” when the Grant is funded.

ADVERTISEMENT FOR BIDS
NOTICE TO BIDDERS

Sealed Proposals addressed to the City Secretary will be received at the office of the City Secretary, City Hall, Midland, Texas until 2pm, Wednesday, August 9, 2023, for furnishing all necessary materials, machinery, equipment, superintendence, and labor for constructing certain improvements at Midland International Air & Space Port (MAF), Midland, Texas. These improvements are contained in Plans and Specifications entitled, "Midland International Air & Space Port, Taxiway E Reconstruction," dated June 2023.

Immediately following the closing time for receipt of Bids/Proposals, Bids/Proposals will be publicly opened and read aloud. Any Bid received after closing time will be returned unopened.

Principal items of Work are set forth in specific detail in the Proposal Section of these Specifications; however, Work items may be generally described as reconstruction of existing asphalt taxiway, installation of new drainage pipe headwalls, overall drainage improvements including concrete drainage flumes, and relocation of existing taxiway guidance sign.

Work will also include other miscellaneous materials, equipment, machinery, superintendence, and labor for constructing these improvements for MAF, Midland, Texas.

A Bid Proposal guaranty is to accompany the Bid, thereby guaranteeing the good faith of the Bidder and that Bidder will enter the written Contract. The guaranty is to amount to 5 percent of the total Bid and must be in the form of cash or certified check, issued by a bank satisfactory to the City of Midland, or a Bid Bond.

Bidders are expected to inspect Site of Work and inform themselves regarding all local conditions.

In all areas of employment, women will be afforded equal opportunity for employment. Employment of women shall not diminish the standards or requirements for employment of minorities.

This Project is subject to Minority Business Enterprise Contract Provisions, Foreign Trade Restrictions, Federal Debarment and Suspension, Drug-free Workplace, and other requirements stated in the Instructions to Bidders and other Sections of Project Specifications and Contract Documents.

Policy. It is the policy of the Department of Transportation (DOT) that disadvantaged business enterprises as defined in 49 CFR Part 26 shall have maximum opportunity to participate in performance of Contracts financed in whole or in part with Federal funds.

Buy American Provision. Proposed Contract is subject to the Buy American Provision under Section 9129 of the Aviation Safety and Capacity Expansion Act of 1990. Details of such requirement are contained in Specifications.

MAF treats Bidder/Offer compliance with good faith effort requirements as a matter of responsiveness.

Requirements of 49 CFR Part 26, Regulations of the U.S. Department of Transportation, apply to this Contract. It is the policy of MAF to practice nondiscrimination based on race, color, sex, or national origin in Award or performance of this Contract. All firms qualifying under this solicitation are encouraged to submit Bids/Proposals. Award of this Contract will be conditioned upon satisfying requirements of this bid Specification. These requirements apply to all Bidders/Offerors, including those who qualify as a DBE.

DBE contract goal of 9.8 percent has been established for this Contract. Bidder/Offeror shall make good faith efforts, as defined in Appendix A, 49 CFR Part 26, to meet contract goal for DBE participation in performance of this contract.

Successful Bidder/Offeror will be required to submit the following information:

(1) names and addresses of DBE firms that will participate in Contract;
(2) description of Work each DBE firm will perform;
(3) dollar amount of participation of each DBE firm participating;
(4) written documentation of Bidder/Offeror commitment to use a DBE subcontractor whose participation submits to meet Contract goal;
(5) written confirmation from DBE of participation in Contract as provided in commitment made under (4); and
(6) if Contract goal is not met, evidence of good faith efforts.

Successful Bidder or Offeror must provide written confirmation of participation from each DBE firm the Bidder/Offeror lists in their commitment. Bidder/Offeror must submit DBE written confirmation of participation within five days of receiving Owner notice to successful Bidder.

Information for Bidders, Proposal forms, Specifications, and Plans are on file in the office of the Director of Airports, MAF.

Downloaded documents (PDF file extension format) can be obtained from the PSC Info Exchange web site after registering as a Plan Holder with Parkhill via https://parkhill.com/projects-for-bid/ or by contacting Debbie German, Project Coordinator, at dagerman@parkhill.com. No cost or deposit required for downloaded documents.

CITY OF MIDLAND, TEXAS
Marcia Bentley-German, City Secretary

INSTRUCTIONS TO BIDDERS

IB-1. BID FORMS

Bid shall be submitted on Proposal form in the bound Specifications.

In addition to the completed Proposals, Bid forms shall include Bid Security, Financial Statement, and other specified documents. Failure to submit a complete Bid as specified will be considered as sufficient cause for rejection of the Bid.

IB-2. PREPARATION OF PROPOSALS

All blanks in the forms shall be filled in or marked "N.A." (Not Applicable) and all required information shall be included with Proposals. Bid prices shall be written in ink. Receipt of all Addenda issued shall be acknowledged in the space provided on the Addendum. Each Addendum received and the Bid Security shall be enclosed with Proposal. Proposal and accompanying documents shall be enclosed in a sealed envelope, addressed to the City Secretary, 300 N. Loraine, Midland, Texas 79701, marked "MAF Taxiway E Reconstruction" with name and address of Bidder also shown thereon. **If Sealed Bid is sent in a mailing envelope, outside of mailing envelope must also have same marking visible.**

IB-3. EXPERIENCE RECORD AND FINANCIAL STATEMENT

Experience Record included herein, shall be filled in, showing completed jobs, of a similar nature to the one covered by Proposal, and work in progress with Contract and Bond amounts and percent complete.

A sworn statement of the current financial condition of Bidder shall also be enclosed with Proposal, to provide Owner with information relative to the responsibility of Bidders and their ability to finance and construct the Work. This statement shall be enclosed with Proposal in a separate envelope and will be returned to Bidder upon return of Bid Security.

TxDOT prequalification can be submitted in lieu of a financial statement with bids; however, financial information may be required of the apparent low Bidder.

IB-4. BID SECURITY

Each Proposal must be accompanied by a Bid Bond, Certified Check, or cash in the amount of not less than 5 percent of the maximum Bid submitted, payable without recourse to the City of Midland, Texas. If a Bid Bond is submitted as Bid Security, it shall be executed by an approved surety company authorized to do business in the State of Texas and accepted according to the latest list of companies holding certificates of authority from the Secretary of the Treasury of the United States of America. Such Bid Security shall be so conditioned if Bidder is awarded Contract and unable or fails to furnish Performance and Payment Bonds and execute Contract within 10 days after date of Award, Security shall revert to Owner as compensation for damages which Owner suffers because of such failure by Bidder.

IB-5. PERFORMANCE AND PAYMENT BONDS

With execution and delivery of the Contract Documents, Contractor shall furnish, on the forms provided herein, Bonds, as required by the General Conditions, of 100 percent of the total Contract price, executed by an approved surety company authorized to do business in the State of Texas, and accepted according to the latest list of companies holding certificates of authority from the Secretary of the Treasury of the United States of America. Performance and Payment Bonds submitted shall be in compliance with Chapter 2253 of the Texas Government Code.

IB-6. INTERPRETATION OF BIDS

No Bid will be considered which fails to supply all information indicated, or which has any limitation or provisions placed upon it by Bidder. In case of a difference between the written words and the figures in Proposal, amount stated in written words will be considered as Bid price, without recourse on the part of Contractor. In case of ambiguity or lack of clearness in Proposal, Owner will adopt the most advantageous construction thereof or reject the Bid. Owner reserves the right to accept or reject any or all Bids, if it is deemed to be in the best interest of the public. Further, Owner reserves the right to reject any Bids because of irregularity or to waive such irregularity if such action is in the public interest.

IB-7. DISPOSITION OF BIDS

Owner expects to make Award of the Contracts as soon as possible after the opening of Bids, but specifically reserves the right to hold all Proposals for a period not to exceed 90 days, before making an Award. No Proposal, having been opened, may be withdrawn prior to expiration of this 90-day period. Bid Security of all but the successful Bidder will be returned upon making an Award.

Contract will be awarded to the responsible Bidder submitting the lowest Bid complying with the conditions of the Advertisement for Bidders and the Instructions to Bidders.

IB-8. EXAMINATION OF SITE, PLANS, AND SPECIFICATIONS

Before submitting Proposal, each Bidder shall have made a thorough examination of the Site of Work and of the Plans and Specifications, and shall become informed as to the location and nature of the proposed construction, labor conditions, and all other matters that may affect the cost and time of completion of the Work upon which he bids. Bidders shall make such investigations of the nature of the Project as deemed necessary and shall assume all responsibility for fully informing themselves of the character of materials which will be encountered. Submission of a Proposal shall be prima facie evidence that Bidder has made such an examination. Contact Chris Welch, Airport Facilities Manager (432.560.2200), to schedule a site examination visit.

IB-9. PREBID CONFERENCE

A prebid conference will be held at 2:00 p.m., Tuesday, July 25, 2023, in the Conference Room at Midland International Air & Space Port (MAF). At this time, all interested Bidders will be requested to appear and present any questions they may have pertaining to this Project. All Bidders are urged to attend Prebid Conference because they will be charged with notice of the matters discussed therein. Attendance to the Prebid Conference is NOT mandatory.

IB-10. INTERPRETATION OF SPECIFICATIONS PRIOR TO BIDDING

Any questions arising during the advertising period as to the meaning or intent of the Specifications will be answered by an Addendum which will be sent to all who have placed a deposit and/or furnished plans and Contract documents issued by Parkhill. Engineer shall receive requests for clarifications to Specifications and Plans at least three days prior to the date for receipt of Bids.

Receipt of each Addendum shall be acknowledged by Bidder in the space provided and each Addendum shall be enclosed with Proposal when it is submitted. All Addenda shall become a part of these Contract Documents.

IB-11. AVAILABILITY OF PLANS

A. For Bidders

All parties with an interest in the type of Work included in the Project covered by these documents, shall be given a reasonable opportunity to examine the documents and prepare a Bid or Sub-Bid. Documents may be examined without charge as noted in the Notice to Bidders.

Downloadable documents (PDF file extension format) can be obtained from the PSC Info Exchange web site after registering as a Plan Holder with Parkhill via https://parkhill.com/projects-for-bid/ or through Debbie German, Project Coordinator, at dagerman@parkhill.com. No cost or deposit required for downloaded documents.

B. For Contractor

Contractor will be furnished five sets of Specifications and Plans for his use during construction. This shall include all Plans and Specifications furnished to material suppliers and subcontractors but does not include the executed contract copies. Plans and Specifications for use during construction will be furnished directly only to Contractor. Contractor shall then distribute copies of Plans and Specifications to suppliers, subcontractors, or others, as required for proper execution of the Work.

Should additional sets of documents be desired, they may be purchased, by Contractor only, at the following prices, exclusive of postage or freight charges:

Plans and Specifications are $150.00 per set.

IB-12. SPECIAL PROVISIONS

Attention of Bidders is directed to SPECIAL PROVISIONS included in these documents for requirements concerning Scope of Work, labor, insurance, and similar subjects.

IB-13. PLANT LOCATION AND STORAGE AREA

Contractors bidding on the Work included in this Contract who desire to locate a material storage area or other similar facility on the airport property may secure such site, buildings or areas by direct negotiation with the Director of Airports, MAF, Midland, Texas.

IB-14. WITHDRAWAL OF PROPOSALS

Any Bidder, upon his or his authorized representative's written request, will be given permission to withdraw his Proposal not later than the time set for opening thereof. At the time of opening of Proposals, when such Proposal is reached, it will be returned to him unread.

IB-15. DISQUALIFICATION OF BIDDERS

Any one or more of the following causes may be considered as sufficient for the disqualification of Bidder and the rejection of Bid or Bids:

More than one Proposal for the same Work from an individual firm, partnership, or corporation under the same or different name.

Evidence of collusion among Bidders. Participants in such collusion may not receive recognition as Bidders for any future Work.

Unbalanced Proposals in which the prices for some items are out of proportion to the prices for other items.

Failure to submit a unit price for each item of Work for which a Bid price is required by Proposal.

Lack of competency as revealed by the financial statement submitted.

Lack of responsibility as shown by past work judged from workmanship and progress standpoints.

Uncompleted Work which, in the judgment of Owner, might hinder or prevent the prompt completion of additional Work if awarded.

For being in arrears on existing Contracts, in litigation with Owner, or having defaulted on a previous contract.

IB-16. MATERIAL GUARANTY

Before any Contract is awarded, Bidder may be required to furnish a complete statement of origin, composition, or manufacture of any or all materials proposed to be used in the construction of the Work, together with samples, which may be subjected to the tests provided for in these Specifications to determine their quality and fitness for the Work.

IB-17. DISADVANTAGED BUSINESS ENTERPRISE CONTRACT PROVISIONS

It is the policy of the Department of Transportation (DOT) that disadvantaged business enterprises as defined in 49 CFR Part 26 shall have the maximum opportunity to participate in the performance of Contracts financed in whole or in part with Federal funds under this agreement. Consequently, Bidder will be required to conform to the DBE requirements of 49 CFR Part 26.

IB-18. WAIVER

BY SUBMITTING A BID, EACH BIDDER AGREES TO AND DOES HEREBY WAIVE ANY CLAIM BIDDER HAS OR MAY HAVE AGAINST THE CITY OF MIDLAND, TEXAS, AND CITY EMPLOYEES, AGENTS, AND OFFICERS ARISING OUT OF OR IN ANY WAY CONNECTED WITH THE FOLLOWING:

1. ADMINISTRATION, EVALUATION, OR RECOMMENDATION OF ANY BID;
2. WAIVER OR DELETION OF ANY REQUIREMENT UNDER BID DOCUMENTS OR CONTRACT DOCUMENTS;
3. ACCEPTANCE OR REJECTION OF ANY BIDS; AND
4. AWARD OF CONTRACT.

BY SUBMITTING A BID, BIDDER ACKNOWLEDGES AN UNDERSTANDING OF ALL BIDDING DOCUMENT TERMS AND CONSENTS TO BIDDING PROCESS AND THE POSSIBILITY OF A NEGATIVE ASSESSMENT. BY SUBMITTING A BID, BIDDER ACKNOWLEDGES AND AGREES THAT THERE WAS/IS NO DISPARITY OF BARGAINING POWER BETWEEN BIDDER AND THE CITY OF MIDLAND, TEXAS.

BIDDER AGREES THIS IS THE INTENTIONAL RELINQUISHMENT OF THE LISTED PRESENTLY EXISTING KNOWN RIGHTS.

IB-19. WAIVER OF ATTORNEY FEES

BY EXECUTING THIS CONTRACT, CONTRACTOR AGREES TO WAIVE AND DOES HEREBY KNOWINGLY, CONCLUSIVELY, VOLUNTARILY AND INTENTIONALLY WAIVE ANY CLAIM IT HAS/MAY HAVE IN THE FUTURE AGAINST OWNER, REGARDING AWARD OF ATTORNEY FEES, WHICH ARE IN ANY WAY RELATED TO CONTRACT, OR CONSTRUCTION, INTERPRETATION OR BREACH OF CONTRACT. CONTRACTOR SPECIFICALLY AGREES IF CONTRACTOR BRINGS/COMMENCES ANY LEGAL ACTION OR PROCEEDING RELATED TO THIS CONTRACT, CONSTRUCTION, INTERPRETATION, VALIDITY, OR BREACH OF CONTRACT, INCLUDING BUT NOT LIMITED TO ANY ACTION PURSUANT TO PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE SECTION 37.001, ET. SEQ., AS AMENDED), OR CHAPTER 271 OF THE TEXAS LOCAL GOVERNMENT CODE, CONTRACTOR AGREES TO ABANDON, WAIVE, AND RELINQUISH ANY AND ALL RIGHTS TO RECOVERY OF ATTORNEY FEES TO WHICH CONTRACTOR MIGHT OTHERWISE BE ENTITLED.

CONTRACTOR AGREES THIS IS VOLUNTARY AND INTENTIONAL RELINQUISHMENT AND ABANDONMENT OF A PRESENTLY EXISTING KNOWN RIGHT. CONTRACTOR ACKNOWLEDGES AN UNDERSTANDING OF ALL TERMS AND CONDITIONS OF CONTRACT. CONTRACTOR FURTHER ACKNOWLEDGES AND AGREES THAT WAS/IS NO DISPARITY OF BARGAINING POWER BETWEEN OWNER AND CONTRACTOR.

THIS SECTION SHALL NOT BE CONSTRUED OR INTERPRETED AS A WAIVER OF SOVEREIGN IMMUNITY.

CONTRACTOR AND OWNER ARE RELYING ON THEIR OWN JUDGMENT. EACH PARTY HAD THE OPPORTUNITY TO DISCUSS THIS CONTRACT WITH COMPETENT LEGAL COUNSEL PRIOR TO ITS EXECUTION.

BID BOND

THE STATE OF TEXAS)

SURETY'S NO._____

COUNTY OF MIDLAND)

KNOWN ALL MEN BY THESE PRESENTS, THAT_____

_____(hereinafter called "Principal"), as Principal, and_____

_____ (hereinafter called "Surety"), as Surety, are held and firmly bound unto the City of Midland, a home rule municipal corporation of Midland County (hereinafter called "Obligee"), in the amount of_____

_____DOLLARS ($____), for payment whereof said Principal and Surety bind themselves and their heirs, administrators, executors, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, Principal submitted a Bid or Proposal to enter a certain written contract with Obligee to perform all work associated with the MAF Taxiway E Reconstruction Project.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS SUCH, if said Principal shall faithfully, enter such written Contract, then this obligation shall be void; otherwise to remain in full force and effect.

IT IS EXPRESSLY UNDERSTOOD AND AGREED if said Principal should withdraw its Bid any time after such Bid is opened and before official rejection of such Bid or, if successful in securing the Award thereof, said Principal should fail to enter into the Contract and furnish satisfactory Performance Bond and Payment Bond, Obligee, in either of such events, shall be entitled and hereby given the right to collect this Bid Bond as liquidated damages.

PROVIDED further if any legal action be filed upon this Bond venue shall lie in Midland County, Texas.

IN WITNESS WHEREOF, the said Principal and Surety do sign and seal this instrument, this day of _____, 20___.

		TOTAL BID	

Bidder is required to separate cost of materials to be incorporated into this Project. Such material costs are separated from other costs, so Bidder is a seller of such materials to the City. Bidder shall be required to issue a resale certificate on such materials in lieu of paying sales tax on such materials at time of purchase. The City will provide successful Bidder with a sales tax exemption certificate for such materials. Labor and materials charge shall be separated as follows:

BID

MATERIALS $_____

LABOR $_____

TOTAL BID **$_____**

Undersigned Bidder hereby confirms he/she visited the Site of Work and carefully examined Plans, Specifications, and Contract Documents pertaining to Work covered by this Bid, and prices bid herein are based on minimum wage rates included in Specifications.

Bidder certifies, by submission of this Proposal or acceptance of this Contract, neither Bidder nor Bidder's principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntary excluded from participation in this transaction by any Federal department or agency. Bidder further agrees by submitting this Proposal, Bidder will include this clause without modification in all lower tier transactions, solicitations, Proposals, Contracts, and subcontracts. Where Bidder or any lower tier participant is unable to certify to this statement, it shall attach an explanation to this Proposal.

Contractor or subcontractor, by submission of offer/execution of a Contract, certifies it:

a. is not owned or controlled by one or more citizens or nationals of a foreign country included in the list of countries that discriminate against U.S. firms published by the Office of the United States Trade Representative (USTR);

b. has not knowingly entered into any contract or subcontract for this Project with a Contractor that is a citizen or national of a foreign country on said list or is owned or controlled directly or indirectly by one or more citizens or nationals of a foreign country on said list.

c. has not procured any product nor subcontracted for the supply of any product for use on the Project that is produced in a foreign country on said list.

Unless restrictions of this clause are waived by the Secretary of Transportation in accordance with 49 CFR 30.17, no Contract shall be awarded to Contractor or subcontractor who is unable to certify to the above. If Contractor knowingly procures or subcontracts for supply of any product or service of a foreign country on said list for use on Project, the Federal Aviation Administration may direct, through the sponsor, cancellation of Contract at no cost to the Government.

Further, Contractor agrees if awarded a Contract resulting from this solicitation, it will incorporate this provision for certification without modification in each Contract and in all lower tier subcontracts. Contractor may rely upon the certification of a prospective subcontractor unless it has knowledge that the certification is erroneous.

Contractor shall provide immediate written notice to sponsor if Contractor learns its certification or that of a subcontractor was erroneous when submitted or has become erroneous by reason of changed circumstances. Subcontractor agrees to provide immediate written notice to Contractor, if at any time it learns that its certification was erroneous by reason of changed circumstances.

This certification is a material representation of fact upon which reliance was placed when making the award. If later determined Contractor or subcontractor knowingly rendered an erroneous certification, the Federal Aviation Administration may direct, through the sponsor, cancellation of Contract or subcontract for default at no cost to the Government.

Nothing contained in the foregoing shall be construed to require establishment of a system of records to render, in good faith, certification required by this provision. Knowledge and information of a contractor is not required to exceed that normally possessed by a prudent person in the ordinary course of business dealings.

This certification concerns a matter within the jurisdiction of an agency of the United States of America and making of a false, fictitious, or fraudulent certification may render maker subject to prosecution under Title 18, United States Code, Section 1001.

Bidder hereby agrees to commence Work under this Contract within 10 days of a date specified in written "Notice to Proceed" and to complete Work within the consecutive calendar day framework noted in Contract. Bidder further agrees to pay as liquidated damages, the sum of $1,000.00 for each consecutive calendar day beyond each phase of days allowed as hereinafter provided in Article 32 of the General Conditions.

Bidder acknowledges receipt of the following addendum:_____

_____

Enclosed with this Proposal is a Cashier's or Certified Check for_____

_____ Dollars ($_____)

or, a Proposal Bond in the sum of 5 percent of Greatest Amount Bid Dollars ($5 percent of Greatest Bid), which it is agreed shall be collected and retained by Owner as liquidated damages in the event the Proposal is accepted by the Owner within 90 days after date advertised for the reception of Bids and undersigned fails to execute Contract or required bonds with Owner, under conditions hereof, within 10 days after date said Proposal is accepted; otherwise, said check or Bond shall be returned to undersigned upon demand.

CONTRACT

STATE OF TEXAS

COUNTY OF MIDLAND

THIS CONTRACT is made and entered into this _____ day of _____ 20___, by and between the **CITY OF MIDLAND, TEXAS**, a home rule municipal corporation ("***Owner***"), and _____ _____, ("***Contractor***").

WITNESS: That for and in consideration of payments and agreements hereinafter mentioned, to be made and performed by Owner, and under conditions expressed in the bond bearing even date herewith, Contractor hereby agrees to commence and complete construction of items of work included in this Project, described as reconstruction of existing asphalt taxiway, installation of new drainage pipe headwalls, overall drainage improvements including concrete drainage flumes, and relocation of an existing taxiway guidance sign.

Work will also include other miscellaneous materials, equipment, machinery, superintendence, and labor for constructing improvements for Midland International Air & Space Port (MAF).

These improvements are shown on Plans and Specifications entitled MAF Taxiway E Reconstruction" dated June 2023. Plans and Specifications are hereby incorporated herein by reference for all legal purposes and shall apply to this Contract as if fully set forth herein.

This Contract shall include all extra work in connection therewith. All work performed hereunder shall be in accordance with those certain General Conditions and Special Provisions, attached hereto, and hereby incorporated herein by referenced for all legal purposes and shall apply to this Contract as if fully set forth herein. Contractor shall, at own proper cost and expense, furnish all materials, supplies, machinery, equipment, tools, superintendence, labor, insurance, and other accessories and services necessary to complete said construction, in accordance with conditions and prices stated in Proposal attached hereto, and in accordance with all General Conditions, Special Provisions, and Plans, which includes all maps, plats, blueprints, and other drawings and printed or written explanatory matter thereof, and Specifications therefor, as prepared by Parkhill ("***Architect/Engineer***"), each of which has been identified by endorsement of Contractor and Engineer thereon, together with Contractor's written Proposal, General Conditions, Special Provisions, Performance Bond, and Payment Bond hereto attached; all of which are made a part hereof and collectively evidence and constitute the entire agreement between the parties hereof.

Contractor hereby agrees to commence work under this Contract within 10 days of a date specified in written "Notice to Proceed" and to complete work under Base Bid identified on plans within [number] calendar days from Notice to Proceed.

Contractor further agrees to pay as liquidated damages the sum of one thousand Dollars ($1,000) for each consecutive calendar day beyond days allowed as hereinafter provided in Article 32 of General Conditions.

Owner agrees to pay Contractor from current funds for performance of this Contract in accordance with Proposal submitted therefor, subject to additions and deductions, as provided in Specifications, and to make payments on account thereof as provided therein.

BY EXECUTING THIS CONTRACT, CONTRACTOR AGREES TO WAIVE AND DOES HEREBY WAIVE ANY CLAIM CONTRACTOR HAS/MAY HAVE AGAINST THE CITY OF MIDLAND, TEXAS, AND PARKHILL, REGARDING AWARD OF ATTORNEY FEES, WHICH ARE IN ANY WAY RELATED TO CONTRACT, OR CONSTRUCTION, INTERPRETATION OR BREACH OF CONTRACT. CONTRACTOR SPECIFICALLY AGREES IF CONTRACTOR BRINGS/COMMENCES ANY LEGAL ACTION OR PROCEEDING RELATED TO THIS CONTRACT, CONSTRUCTION, INTERPRETATION, VALIDITY, OR BREACH OF THIS CONTRACT, INCLUDING BUT NOT LIMITED TO ANY ACTION PURSUANT TO PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE SECTION 37.001, *ET SEQ*., AS AMENDED), CONTRACTOR AGREES TO WAIVE AND RELINQUISH ANY AND ALL RIGHTS TO RECOVERY OF ATTORNEY FEES TO WHICH CONTRACTOR MIGHT OTHERWISE BE ENTITLED.

CONTRACTOR AGREES THIS IS INTENTIONAL RELINQUISHMENT OF A PRESENTLY EXISTING KNOWN RIGHT. CONTRACTOR ACKNOWLEDGES AN UNDERSTANDING OF ALL TERMS AND CONDITIONS OF THIS CONTRACT.

By execution of this Contract, Contractor hereby represents and warrants to the City of Midland, Texas, that Contractor has read and understood the Contract.

This Contract shall be governed by laws of the State of Texas. Venue of any suit, right, or cause of action arising under or in connection with this Contract shall lie exclusively in Midland County, Texas. All payments and performance under or connected to this Contract shall be deemed to have occurred exclusively in Midland County, Texas.

IN WITNESS WHEREOF, the parties to these presents have executed this Agreement in the year and day first above written.

PERFORMANCE BOND
SUBMITTED IN COMPLIANCE WITH CHAPTER 2253 OF THE TEXAS GOVERNMENT CODE

STATE OF TEXAS §

COUNTY OF MIDLAND §

KNOW ALL MEN BY THESE PRESENTS: That we, _____of the City of _____, County of _____, and State of _____, as Principal, and _____ _____ hereinafter called "Surety," are held and firmly bound unto the City of Midland, Texas, a home rule municipal corporation of Midland County, Texas, (hereinafter called the City-Obligee), in the penal sum of _____ _____ DOLLARS, ($_____) lawful money of the United States, well and truly to be paid to the City of Midland, Texas, for payment whereof said Principal and Surety bind themselves and their heirs, administrators, executors, successors, and assigns, jointly and severally, firmly by these presents.

WHEREAS, Principal has entered a certain written Contract with the Owner-Obligee, dated the __ day of _____ 20___, to the MAF Taxiway E Reconstruction for the Midland Airpark, Midland, Texas specifically including in the Scope of this Work and Bond, additional maintenance guaranty provisions set forth in Contract conditions, which Contract is hereby referred to and made a part hereof as fully and to the same extent as if copied at length herein, as well as the Principal's primary obligation to perform according to Plans and Specifications.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS SUCH, if said Principal shall faithfully perform Work in accordance with Plans, Specifications, Instructions to Bidders, General and Special Conditions, and other Contract Documents, including any Addendums thereto, then this obligation shall be void; otherwise, to remain in full force and effect.

PROVIDED further if any legal action be filed upon this Bond venue shall lie in Midland County, State of Texas.

PROVIDED further this Performance Bond is submitted in compliance with Chapter 2253 of the Texas Government Code.

Surety, for value received, stipulates and agrees no change, extension of time, alteration, or addition to terms of the Contract, or to the Work performed thereunder, or Plans, Specifications or Drawings accompanying the same, or any assignment of the Contract as may be provided for in Instructions to Bidders, shall in any way affect its obligation on this Bond, and it does waive notice of any such change, extension of time, alteration, or addition to the terms of the Contract, assignment thereof, or to the Work to be performed thereunder.

IN WITNESS WHEREOF said Principal and Surety have signed and sealed this instrument, this ____ day of _____, 20__.

CONTRACT ASSURANCE

Contractor will ensure the following clause is placed in every DOT-assisted Contract and subcontract:

Contractor or subcontractor shall not discriminate based on race, color, national origin, or sex in performance of this Contract. Contractor shall carry out applicable requirements of 49 CFR Part 26 in Award and administration of DOT-assisted Contracts. Failure by Contractor to carry out requirements is a material breach of this Contract which may result in termination of this Contract or such other remedy as recipient deems appropriate. This may include, but is not limited to:

1. Withholding monthly progress payments;
2. Assessing sanctions;
3. Liquidated damages; and/or
4. Disqualifying Contractor from future bidding as non-responsible.

PROMPT PAYMENT

Prime Contractor agrees to pay each subcontractor under this Prime Contract for satisfactory performance of Contract no later than 30 working days from receipt of each payment Prime Contractor receives from the City of Midland. Prime Contractor agrees further to return retainage payments to each subcontractor within 30 working days after subcontractor's work is satisfactorily completed. Any delay or postponement of payment from above referenced time frame may occur only for good cause following written approval of the City of Midland. The clause applies to both DBE and non-DBE subcontractors.

For purposes of this Section, a subcontractor's work is satisfactorily completed when all tasks called for in subcontract have been accomplished and documented as required by the City of Midland. When the City of Midland makes an incremental acceptance of a portion of a prime contract, work of a subcontractor covered by that acceptance is deemed satisfactorily completed.

Contractor will not be reimbursed for Work performed by subcontractors unless and until Contractor ensures subcontractors are promptly paid for Work they have performed.

Contractor failure to comply with requirements of DBE Plan shall constitute a material breach of this Contract. In such a case, the City of Midland reserves the right to terminate Contract; to deduct amount of DBE goal not accomplished by DBE from money due or to become due Contractor, not as a penalty but as liquidated damages to the City of Midland or such other remedy/remedies as the City of Midland deems appropriate.

CITY OF MIDLAND DEPARTMENT OF AIRPORTS
DBE POLICY STATEMENT

Section 26.1, 26.23 Objectives/Policy Statement

The City of Midland, Owner, and Operator of Midland International Air & Space Port, herein referred to as MAF, established a Disadvantaged Business Enterprise (DBE) program in accordance with regulations of the U.S. Department of Transportation (DOT), 49 CFR Part 26. MAF received Federal financial assistance from the Department of Transportation and as a condition of receiving this assistance, MAF signed an assurance to comply with 49 CFR Part 26.

It is the MAF policy to ensure DBEs, as defined in Part 26, have an equal opportunity to receive and participate in DOT-assisted Contracts. It is also our policy to:

1. ensure nondiscrimination in Award and administration of DOT-assisted Contracts;
2. create a level playing field on which DBEs can compete fairly for DOT-assisted Contracts;
3. ensure DBE Program is narrowly tailored in accordance with applicable law;
4. ensure only firms who fully meet 49 CFR Part 26 eligibility standards are permitted to participate as DBEs;
5. help remove barriers to participation of DBEs in DOT-assisted Contracts; and
6. assist development of firms who can successfully compete in the marketplace outside the DBE program.

An MAF staff person has been delegated as the DBE Liaison Officer. In that capacity, appointed staff is responsible for implementing all DBE program aspects. Implementation of the DBE program is accorded the same priority as compliance with all other legal obligations incurred by MAF in financial assistance agreements with the Department of Transportation.

MAF disseminated this policy statement to the City Council of the City of Midland, Texas and all components of the organization. We distributed this statement to DBE and non-DBE business communities who perform Work for us on DOT-assisted Contracts. This is accomplished via inclusion in all our Bid Documents.

Justine Ruff, Director of Airports

MONITORING PAYMENTS TO DBEs AND NON-DBEs

MAF undertakes ongoing monitoring of prime payments to subcontractors over the course of any covered contract. Such monitoring activities will be accomplished as follows:

1. Prime Contractors must submit monthly proof of prompt payment to Airport.
2. DBELO will monitor prompt payment to subcontractors via review of cancelled checks and/or accounts payable ledgers submitted with monthly reports.
3. DBELO will verify checks payable to subcontractors are dated within prompt payment period.
4. DBELO may also contact DBE subcontractors by phone/email to confirm receipt of payment within prompt payment period.

Airport requires prime contractors to maintain records/documents of payment to subcontractors, including DBEs, for a minimum of three years unless otherwise provided by applicable record retention requirements for Airport financial assistance agreement, whichever is longer. These records will be made available for inspection upon request by any authorized representative of the MAF or DOT. This reporting requirement extends to all DBE and non-DBE subcontractors.

INFORMATION TO BE SUBMITTED (26.53(B)):

MAF treats Bidder/Offeror compliance with good faith effort requirements as a matter of responsiveness.

Requirements of 49 CFR Part 26, Regulations of the U.S. Department of Transportation, apply to this Contract. It is MAF policy to practice nondiscrimination based on race, color, sex, or national origin in award or performance of this Contract. All firms qualifying under this solicitation are encouraged to submit Bids/Proposals. Award of this Contract will be conditioned upon satisfying Bid Specification requirements applying to all Bidders/Offerors, including those who qualify as a DBE. A DBE Contract goal of 9.8 percent has been established for this Contract. Bidder/Offeror shall make good faith efforts, as defined in Appendix A, 49 CFR Part 26, to meet the Contract goal for DBE participation in performance of this Contract.

Types of actions to support good faith efforts at meeting Contract goal for DBE participation (not intended as an all-inclusive list and other methods by Bidder may be relevant in documenting good faith effort:

1. Have DBE subcontractors attend Prebid Meeting
2. Documentation of notices sent to potential DBE subcontractors requesting interest in bidding.
3. Documentation of emails sent to potential DBE subcontractors requesting interest in bidding.
4. Documentation (dates and times) of phone calls made to potential DBE subcontractors informing them of the Project and soliciting an interest in bidding. This should include follow-up calls to support aggressively attempting to obtain DBE participation.

Good faith effort documentation must be included with Proposal submitted.

INCLUDE WITH PROPOSAL:

1. Form 1: Disadvantaged Business Enterprise (DBE) Utilization, (signed by Bidder/Offeror);
2. Form 2: Letter of Intent (for each DBE firm). Note: *DBE firm signature not required at time of proposal submission*; and
3. Completed Bidder Information Sheet.

UPON AWARD OF CONTRACT:

Successful Bidder/Offeror will be required to submit the following information within five days of bid opening:

(1) names and addresses of DBE firms who will participate in the Contract;
(2) description of Work each DBE firm will perform;
(3) dollar amount of participation for each DBE firm participating;
(4) written documentation of Bidder/Offeror commitment to use a DBE subcontractor whose participation meets Contract goal;
(5) written confirmation from DBE of Contract participation as provided in commitment made under (4); and
(6) upon unmet Contract goal, evidence of good faith efforts. Successful Bidder/Offeror must submit DBE written confirmation of participation within five days after Bid Opening.

Midland International Air & Space Port

To all Bidders for AIP-funded projects for Midland International Air & Space (MAF):

Any company desiring to submit a bid on an AIP grant project for MAF, must complete a Bidder Information Sheet that includes:

- Name of Firm;
- Address of Firm;
- Age of Firm;
- If Firm is a certified Disadvantaged Business Enterprise (DBE); and
- Amount of annual gross receipts.

Before Contract is awarded, companies must also submit Demonstration of Good Faith Efforts, Form 1: DBE Utilization, and Form 2: Letter of Intent for each DBE subcontractor. If DBE goal percentage is met, complete one Form 1 and a separate Form 2 for each DBE subcontractor. If not met, complete Form 1 and submit documentation of Good Faith Efforts (see 49 CFR Part 26, Appendix A) to support percentage accomplished.

Upon Airport acceptance of Bid, submit the following information to MAF Disadvantage Business Enterprises Liaison Officer (DBELO) before Project starts:

- Commitments made to all subcontractors (DBE/non-DBE): MAF Form 2: Letter of Intent or TxDOT Form 4901; and
- Proof of DBE certification of all DBE subcontractors.

Once Project starts, submit monthly to the DBELO a Monthly Progress Report (MAF form or TxDOT Forms 4903 or 4904) of actual dollar amount paid to DBE subcontractors.

Call 432.560.2200 for questions. Thank you for your time and consideration regarding this matter.

Sincerely,

MAF Liaison Officer
Disadvantage Business Enterprise

Encl

FORMS 1 AND 2: DEMONSTRATION OF GOOD FAITH EFFORTS

Form 1: Disadvantaged Business Enterprise (DBE) Utilization

Undersigned Bidder/Offeror has satisfied bid specification requirements as follows:

☐ Bidder/Offeror met DBE contract goal:

Bidder/Offeror is committed to a minimum of 9.82% DBE utilization on this contract.

☐ Bidder/Offeror has not met DBE contract goal:

Bidder/Offeror is committed to a minimum of _____ % DBE utilization on this contract and submitted documentation demonstrating good faith efforts.

Legal name of Bidder/Offeror's firm: _____

Bidder/Offeror Representative: _____

Name/Title: _____

_____ _____

Signature Date

Form 2: Letter of Intent

Note: Authorized representative (AR) named herein must be a vested individual with authority to make contracting decisions on behalf of the firm.

Name of Bidder/Offeror's firm: _____

DAVIS BACON WAGE DETERMINATION

"General Decision Number: TX20230002 01/06/2023

Superseded General Decision Number: TX20220002

State: Texas

Construction Types: Heavy and Highway

Counties: Armstrong, Carson, Crosby, Ector, Irion, Lubbock, Midland, Potter, Randall, Taylor and Tom Green Counties in Texas.

HEAVY & HIGHWAY CONSTRUCTION PROJECTS

Note: Contracts subject to the Davis-Bacon Act are generally required to pay at least the applicable minimum wage rate required under Executive Order 14026 or Executive Order 13658. Please note that these Executive Orders apply to covered contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but do not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(2)-(60).

If the contract is entered into on or after January 30, 2022, or the contract is renewed or extended (e.g., an option is exercised) on or after January 30, 2022:	. Executive Order 14026 generally applies to the contract. . The contractor must pay all covered workers at least $16.20 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in 2023.
If the contract was awarded on or between January 1, 2015 and January 29, 2022, and the contract is not renewed or extended on or after January 30, 2022:	. Executive Order 13658 generally applies to the contract. . The contractor must pay all covered workers at least $12.15 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on that contract in 2023.

The applicable Executive Order minimum wage rate will be adjusted annually. If this contract is covered by one of the Executive Orders and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must still submit a conformance request.

Additional information on contractor requirements and worker protections under the Executive Orders is available at http://www.dol.gov/whd/govcontracts.

** Workers in this classification may be entitled to a higher
minimum wage under Executive Order 14026 ($16.20) or 13658
($12.15).  Please see the Note at the top of the wage
determination for more information.

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave
for Federal Contractors applies to all contracts subject to the
Davis-Bacon Act for which the contract is awarded (and any
solicitation was issued) on or after January 1, 2017.  If this
contract is covered by the EO, the contractor must provide
employees with 1 hour of paid sick leave for every 30 hours
they work, up to 56 hours of paid sick leave each year.
Employees must be permitted to use paid sick leave for their
own illness, injury or other health-related needs, including
preventive care; to assist a family member (or person who is
like family to the employee) who is ill, injured, or has other
health-related needs, including preventive care; or for reasons
resulting from, or to assist a family member (or person who is
like family to the employee) who is a victim of, domestic
violence, sexual assault, or stalking.  Additional information
on contractor requirements and worker protections under the EO
is available at
```

https://www.dol.gov/agencies/whd/government-contracts.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average

calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

* an existing published wage determination
* a survey underlying a wage determination
* a Wage and Hour Division letter setting forth a position on a wage determination matter
* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal

process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

==========

END OF GENERAL DECISIO"

SPECIAL PROVISIONS

SP-1 SCOPE OF WORK

Work to be accomplished under these Specifications including Plans shall consist of:

1.1 Principal items of Work are set forth in specific detail in the Proposal Section of these Specifications; however, Work may be generally described as reconstruction of existing asphalt taxiway, installation of new drainage pipe headwalls, overall drainage improvements including concrete drainage flumes, and relocation of existing taxiway guidance sign.

1.2 Work will also include other miscellaneous materials, equipment, machinery, superintendence, and labor for constructing these improvements for the Midland International Air & Space Port (MAF), Midland, Texas.

1.3 Contractor shall furnish all labor, materials, and equipment necessary to complete Work called for in these Specifications and shown on the Plans.

1.4 Payment for various items of Work will be made as specified under various payment articles of Technical Sections.

SP-2 CONTRACT DOCUMENTS

All Work covered by this Contract shall be done in accordance with Contract Documents described in the General Conditions. Drawings included in documents consist of the plans entitled ”MAF Taxiway E Reconstruction,” dated June 2023.

Bidders shall be thoroughly familiar with all Drawings and Specifications. Contractor shall be responsible for satisfactory completion of all Work shown on Drawings or specified.

Intent of Plans and Specifications is to prescribe a complete Work or improvement which Contractor undertakes to do in full compliance with Plans, Specifications, Special Provisions, Proposal, and Contract. Contractor shall do all Work including such additional, extra, and incidental Work considered necessary to complete the Project in a satisfactory and acceptable manner, as provided in Plans, Proposal, and Contract. Unless otherwise provided in Specifications, Special Provisions, or Contract, Contractor shall furnish all materials, equipment, tools, labor, and incidentals necessary to prosecute completion of Work.

Contract Documents are complementary and that called for by any one entity shall be as binding as if called for by all. In case of conflict between Contract Documents, priority of interpretation shall be in the following order:

- Signed Contract,
- Performance Bond,
- Special Bonds (if any),
- Proposal,
- Special Provisions,
- Notice to Bidders,
- Instructions to Bidders,
- Technical Specifications,
- Plans, and
- General Conditions of Contract.

PACKET 10.54 July 11, 2023

SP-3 TIME AND ORDER OF COMPLETION

Contractor is permitted to prosecute certain portions of Work in order and manner of own choosing to the best interest of the Project; however, Work shall be conducted in such manner and with such materials, equipment, and labor as required to ensure completion in accordance with Plans and Specifications within time stated in Proposal and Contract. Contractor shall furnish Parkhill with proposed progress schedule and Parkhill shall approved schedule before Work is commenced on Project.

Contractor is reminded approved material submittals are required before incorporation of materials into this Project. To avoid delays in Work progress, provide complete information to Parkhill as early as possible for review and approval.

Contractor will be required to execute various portions of the Project in phases to maintain usage of airport facilities as well as safety during the entire Project. Contractor will be allowed to develop own phasing plan which will meet phasing intent shown on Plans. Contractor phasing plan will be subject to Parkhill approval.

Other Contractors may perform Work for Owner in the same general area as that covered under this Contract. Contractor shall be expected to coordinate his Work with Work of other Contractors as required to ensure all Work can be carried out with the least possible interference with operation of other contractors or Owner. Contractor coordination with other contractors shall require Parkhill approval. Owner reserves the right to control and direct sequence of operations in areas others will be working. Provision shall be made for other contractors to have suitable space to Work, store materials, as well as access to these areas.

Contractor shall schedule Work well in advance of actual operations and keep Parkhill advised of this schedule so close coordination can be maintained with Director of Airports and other contractors. Portions of taxiways and runways will be closed as required for proper execution of Work, but at least three days' notice will be required before closing any portion of a taxiway or runway. Director of Airports will file Notice to Airmen (NOTAMs) required for various construction operations.

When closing portions of airfield for construction, keep time closed to a minimum. Contractor is required to provide, install, and maintain approved closed runway/taxiway markings in accordance with the latest FAA Advisory Circular 150/5370 and other applicable FAA regulations. No separate measurement or payment shall be made for closed runway or taxiway marking. Coordinate all operations through Parkhill and Director of Airports.

SP-4 LIMITATION OF OPERATION

Complete each item of Work without delay. In no instance shall Contractor be permitted to transfer forces from uncompleted Work to new Work without Parkhill permission. Contractor is required to submit a schedule of operations to Parkhill for approval. Contractor shall not commence new Work to the prejudice of Work already started.

Contractor shall take all necessary precautions to ensure operating aircraft and passenger safety as well as that of Contractor equipment and personnel. Give special considerations to flight schedules and routes taken by equipment traveling within Airport area. Contractor shall provide all such equipment with a flag on a staff attached to equipment, so flag is readily visible. Flag shall be not less than 3 feet square, checkered pattern of international orange-and-white squares, not less than 1-foot on each side. Contractor shall estimate all difficulties to be encountered. Keep equipment not actually in operation clear of landing areas. Personnel shall not enter areas of Airport where aircraft are operating without specific permission.

Nighttime construction activities are not permitted without prior approval of Parkhill and Director of Airports. If required and permitted, nighttime construction activities shall be as noted on Plans and coordinated, through Parkhill, with Director of Airports. During nighttime construction, Contractor shall provide all equipment traveling within Airport area with a flashing light that is always visible and operational.

Coordinate all operations through Parkhill and Director of Airports, so no interference with aircraft traffic on active runways, taxiways, or aprons will result from Contractor operations. Construction activities are not allowed within safety areas of any active runway/taxiway unless approved by Parkhill and Director of Airports.

- Taxiway safety area is the area within 90 feet of the centerline of any taxiway/taxilane.
- Runway safety area is the area within 250 feet of the centerline of any runway when aircraft are operating under Visual Flight Rule (VFR, clear weather) conditions, or within 570 feet of the centerline of any runway when aircraft are operating under Instrument Flight Rule (IFR, inclement weather) conditions.

As required, Contractor shall maintain flagpersons to direct construction traffic to cross or travel along any active taxiway, apron, or runway. Direct traffic away from these facilities when possible and never allow traffic to cross an active runway, taxiway, or apron without proper clearance.

Contractor shall schedule Work well in advance of actual operations and keep Parkhill advised of this schedule so close coordination can be maintained with Director of Airports. Aprons, runways, and taxiways will be closed as required for proper execution of Work as provided in previous Articles.

Contractor shall exert every effort to maintain safety of aircraft traffic and be acquainted with rules and regulations concerning aircraft traffic safety. Maintain FAA Advisory Circular 150/5370-2G, "Operational Safety on Airports during Construction," requirements. Violations of safety rules by Contractor workers shall result in discharge of such workers in accordance with General Conditions. Continued violations of safety rules and regulations by Contractor, after Parkhill or MAF notify Contractor of such violations, shall constitute grounds for suspending Contractor operations until steps are taken to insure a safe operation.

Contractor's field office and material storage area may be located inside secure area of Airport but outside safety areas of taxiways/runways near construction. Contractor shall provide an area for parking all equipment not used for construction purposes, as well as for parking employee vehicles. This area shall be located away from the Airport operational area (AOA) in an area approved by Parkhill and Director of Airports. No employee or other unauthorized vehicles will be allowed within the AOA. If Contractor needs field office outside of secure area, Contractor can install temporary security fencing around office site. Airport must approve security fence.

Contractor shall utilize existing vehicle gates for employees and subcontractors. Contractor shall be responsible for allowing only authorized personnel to enter the AOA through this gate. Contractor shall always control entrance through the gate by employees or subcontractors entering/exiting the gate.

Hauling routes shall not be along/across any paved airport street, road, apron, taxiway, or runway without specific written authorization from Parkhill and Director of Airports. Any damage incurred by Contractor equipment shall be repaired by and at Contractor expense and as required by Parkhill and Director of Airports.

Contractor shall maintain pavement surfaces of runways, taxiways, and aprons, allowed to be used as hauling routes, in a clean condition, suitable for use by aircraft, as determined by Director of Airports.

Successful Bidder is subject to a pre-award review by Office of Compliance and Security, Equal Opportunity Division, Federal Aviation Administration, to determine Contractor's previous compliance status.

Contractor is subject to a preconstruction conference to discuss phasing and Project safety control after award of Contract.

SP-5 CONSTRUCTION ACTIVITY

When construction activity is performed on/adjacent to AOA, the following rules and regulations apply unless otherwise authorized by Airport Operations. **Contractor must have all picture-badged supervisors fingerprinted. Fingerprinting cost is $70.00 per person, paid by Contractor**.

5-1 AOA Badge: At least one supervisor with an AOA picture badge must always be present with any group of unbadged personnel.

5-2 Escorts: All escorts performed by Contractor within AOA must be accomplished by picture-badged personnel operating a vehicle marked by a 3- by 3-foot orange-and-white checkered flag. Traffic must always adhere to haul routes (see Subarticle 5-3). Only authorized airport personnel are to perform escorts off established haul routes.

5-3 Haul Routes: Establishment of AOA haul routes must be authorized through Airport Operations. Contractor shall furnish, erect, maintain, and remove flags for delineation of haul routes. Criteria of establishing perimeter of a haul route and restricted areas will be as follows:

A. Green flags will prominently mark either side of haul route at intervals to easily define route.
B. Yellow flags will prominently mark a boundary 500 feet adjacent to a runway centerline to delineate restricted areas during poor visibility as determined by Airport Operations.
C. Red flags will prominently mark a boundary 250 feet adjacent to a runway centerline to indicate entry is prohibited unless specifically authorized by Airport Operations.
D. Haul Routes that cross/come within 153 feet of a taxiway must have a flagperson present to control vehicular traffic.
E. No haul route may come within 1,000 feet from end of a runway unless specifically authorized by Airport Operations.

5-4 Cranes: Any construction activity utilizing a crane or other hoisting device shall have prior written approval of FAA. Contractor shall be responsible for filing prescribed forms for airspace clearance in accordance with Part 77 of Federal Aviation Regulations. Applications for airspace clearance must be submitted at least 30 days before construction activities. To avoid construction delays, Contractor is urged to timely file prescribed forms. Airspace clearance from FAA must be approved before erection of crane or other hoisting device. The following information is required:

A. Location of equipment.
B. Maximum extendable height.
C. Duration of use.
D. Daily hours of operation.

Top of crane must be marked by a 3- by 3-foot orange-and-white checkered flag and lowered at night and during periods of poor visibility as directed by Airport Operations. Cranes which exceed a height of 149 feet must be approved in writing by the FAA (FAA Form 7460-1). Contractor shall notify Parkhill at least 48 hours before erecting crane.

5-5 Restricted Areas: Construction prohibited in these areas unless authorized by Airport Operations:

A. Within 90 feet of a taxiway or apron taxiway centerline.
B. Within 250 feet parallel to runway centerline. (500 feet during poor visibility as determined by Airport Operations.)
C. Within 1,000 feet of end of the runway.
D. Within certain areas about runway to cause interference with navigational equipment.

5-6 Trenches and Excavations: No trenches or excavations allowed within these areas:

A. Within 250 feet parallel to runway centerline.
B. Within 90 feet parallel to taxiway or apron taxiway centerline.
C. Within 1,000 feet of end of runway.

EXCEPTION: Authorization considered on a case-by-case basis by Airport Operations.

5-7 Stockpiles of Material: No stockpiled material allowed within these areas:

A. Within 500 feet parallel to runway centerline.
B. Within 90 feet parallel to taxiway or apron taxiway centerline.
C. Within 1,000 feet of end of runway.

EXCEPTION: Authorization considered on a case-by-case basis by Airport Operations.

5-8 Escorts, Badges, and Permits: When construction activity is performed on/adjacent to AOA and access onto apron required, the following rules will apply unless otherwise authorized by Airport Operations:

A. Escorts: Airport Operations must escort Contractor vehicles and equipment. Contractor must observe all rules and regulations.

EXCEPTION: Vehicles displaying a Permanent AOA Access decal do not require an escort while operating on ramps.

B. AOA Badges: Contractor personnel will display AOA Identification Badge.
C. AOA Access Permit: Contractor vehicles will display AOA Access Permit or Temporary AOA Access Permit.

EXCEPTION: Construction equipment (tractors, dump trucks, cranes, etc.) are not required to display an AOA Access Permit.

5-9 Protection of Airfield Areas: Utilize these procedures to prevent inadvertent entry by aircraft or vehicles into closed sections of taxiways, runways, or aprons. Contractor shall provide all materials and labor to furnish, erect, maintain, and remove these items as subsidiary to other items in Project.

A. When any taxiway or other AOA is closed, area will be protected by cones and flashing lights set up at entrances to closed areas.
B. Appropriate NOTAMs will be issued on closure and associated maintenance or construction activity.
C. Centerline and edge lights will be turned off, removed, obliterated, or disconnected as dictated by circumstances requiring closure.
D. All excavations in existing pavement areas (e.g. mudjacking repairs) must have hole protected by cones and flashing lights, in addition to cones and lights marking closed area.
E. Major excavations (constructing new taxiways, ramps, other construction activity) or major repairs of existing taxiway/runway will be protected by 10-inch-wide by 8-foot-long plastic, FAA-approved barricades (striped orange and white) with at least two red-flashing lights on top of each barricade.

F. In some cases, taxiway centerline striping will be obliterated, and a temporary displaced centerline provided.
G. All airfield activities must be continually coordinated through Airport Operations Supervisor.

SP-6 AFFIDAVIT OF BILLS PAID

Before Owner's Final Acceptance of this Project, Contractor shall execute an Affidavit that all bills for labor, materials, and incidentals incurred in construction of these improvements, are paid in full, including any retainage, and no claims are pending, of which Contractor is notified.

SP-7 CALENDAR DAY

Time for Project completion and liquidated damages shall be in accordance with provisions of General Conditions, Article GC-32 - Time for Completion and Liquidated Damages. A calendar day is every day shown on the calendar.

SP-8 PROTECTION OF PROPERTY

Contractor shall exercise care to prevent damage to all structures, above or below ground, including buildings, fences, pipelines, utilities, roads, etc., publicly or privately owned, and including Work performed by others. Contractor is responsible for locating all underground facilities damaged by proposed construction.

Contractor shall be responsible for all damage done to either public or private property during construction except as specifically provided otherwise in these Specifications.

Known existing underground utilities and structures are shown on Plans. Locations are believed reasonably accurate but not guaranteed.

Contractor shall take all steps necessary to protect existing facilities during construction to assure continuous operation of lights for runways and taxiways which will be open for night operations.

SP-9 ELECTRIC POWER AND NATURAL GAS

Contractor shall provide electrical, natural gas, and other fuel requirements and pay for electricity, gas, or fuel consumed during Project construction. Contractor shall construct own service lines and such construction shall be in strict accordance with all applicable codes and laws.

SP-10 LINES AND GRADES

Parkhill will provide Contractor with horizontal control points and a benchmark for vertical control. Contractor shall do all construction staking. References to lines and grades as established by Parkhill shall reference these control points.

Parkhill will provide Contractor with all necessary information relating to control points set by Parkhill. Contractor will be responsible for laying out Work. Parkhill will check Contractor's grade control and major layouts at Parkhill's discretion, but this check will not relieve Contractor of responsibility of correctly locating line and grade in accordance with Plans and Specifications.

Parkhill will take all measurements necessary to determine amount of Work performed under various items payment is provided. When necessary, Work will be suspended to permit this Work, but such suspension will be as brief as practicable, and Contractor shall be allowed no extra compensation.

Contractor shall be certain as to accuracy of all measurements before constructing any permanent structure and not take advantage of any errors made in laying out Work. Contractor shall scrupulously preserve such stakes/markings as Parkhill may set for either Parkhill or Contractor guidance. In case of Contractor or employee negligence resulting in destruction of such stakes/markings, an amount equal to the cost of replacing same may be deducted from subsequent estimates due Contractor, at Parkhill discretion.

SP-11 WATER FOR CONSTRUCTION

Contractor shall provide for water requirements and pay for all water consumed during Project construction. Contractor shall arrange and pay for connections to existing water mains, fire hydrants, and piping/hauling water to the point where water is required.

SP-12 MATERIAL TESTS

Specifications require various tests on construction materials. In general, Contractor shall bear the cost of all material tests required before approval of material, source, or mix design. City will bear the cost of all passing commercial laboratory tests required for acceptance during construction of improvements and Contractor shall bear the cost of all failing construction tests.

Where only small amounts of material are used or where compliance with Specifications determined by visual inspection, no tests are required. Certificates of compliance required on all materials not tested.

All materials proposed used may be tested any time during preparation and use. If, after trial, sources of supply approved do not furnish a product of uniform quality or product from any source proves unacceptable any time, Contractor shall furnish approved material from another source.

SP-13 BARRICADES, SIGNS, AND HAZARD MARKINGS

Contractor shall provide, erect, and maintain all necessary barricades, signs, danger signals, and lights for protection of Work and the safety of the public for passengers and aircraft. Before closing existing apron, runways, or taxiways, place warning signs for air traffic at such locations, visible day and night. Any movement of Contractor vehicles or equipment on/across aprons or taxiways shall carry FAA standard markings or flags. Movement of other vehicles responsible to Contractor shall be under escort, as specified in Article SP-5-2.

Barricades for runways, taxiways, and aprons closed to traffic shall consist of 10-inch-wide by 8-foot-long plastic, FAA-approved barricades. Each barricade shall have reflective striping and a red flashing light on each end. Barricades shall be spaced with no more than 10-foot clearance between flashing lights attached to successive barricades. Obstructions shall be illuminated at night. Proper illumination of obstructions is critical to safe operation of aircraft on the Airport. All warning lights shall be equipped with photocell controls to automatically turn on lights at night and off at daytime. Contractor shall check lights daily (and each night) to assure batteries/power cells are working. Immediately replace or repair any lights found out-of-order, flashing weakly, or in otherwise less than acceptable operating condition. Parkhill may suspend Work on Project if Contractor's warning lights are not maintained. A $25.00/day charge will be assessed Contractor for each light found inoperative by Owner's personnel or representatives.

SP-14 PREVENTION OF AIR AND WATER POLLUTION

Contractor shall use suitable precaution to minimize air and water pollution during Work progress. Contractor shall meet all EPA requirements concerning air and water pollution. Contractor shall implement a Stormwater Pollution Prevention Plan (SWPPP) as required by Plans and Specifications.

SP-15 PUBLIC CONVENIENCE AND SAFETY

Materials stored on the Airport shall be placed and Work always conducted to cause no greater obstruction to air and ground traffic than Parkhill consider necessary. In protecting operational areas, minimum clearances maintained for runways shall agree with Part 77 of Federal Aviation Regulations. During Project construction, Contractor shall also maintain operational safety on Airport in accordance with the FAA Advisory Circular 150/5370-2G, "Operational Safety on Airports during Construction" and SW5200.5B, "Airport Safety during FAA-funded Airport Construction and FAA Facilities Maintenance." No runway, taxiway, apron, or roadway shall be closed or opened except by express permission from Parkhill and Director of Airports.

Contractor shall be responsible for maintaining pavement free of all rocks, gravel, dirt, and other debris where hauling is permitted on/across any active roadway, apron, runway, taxiway, or areas temporarily closed subject to opening on short notice. Contractor shall immediately remove all rocks, gravel, dirt, or other debris.

SP-16 FINAL CLEANING

As each intermediate phase of Work is completed and before opening any portion of any airfield apron, roadway, runway, or taxiway, Contractor shall be responsible for cleaning construction site and adjacent pavement as specified.

Upon completion of Work and before Acceptance and Final Payment is made, Contractor shall remove from the site all machinery, equipment, surplus and discarded materials, rubbish, and temporary structures. Material cleared from site and deposited on adjacent property will not be considered satisfactorily disposed. Cleanup cost shall be included as a part of cost of various items of Work involved with no direct compensation made for this Work.

SP-17 INSURANCE

Contractor shall not begin Work under this Contract until all insurance is obtained as required in General Conditions of Contract, proof of same is furnished to Owner, and Owner approves. All insurance required for this Project shall name the City of Midland and Parkhill as additional insureds.

Contractor shall obtain and deliver to Owner, an Owner's Protective or Contingent Public Liability Insurance Policy naming the City of Midland and Parkhill as additional insureds and amount of policy shall be as follows:

- $1,000,000 for injuries, including accidental death, to one or more persons and subject to noted limit for each person;
- $1,000,000 total limit for all damages arising out of bodily injuries to or death of two or more persons in any one accident;
- limit not less than $1,000,000 for all damages arising out of injury to or destruction of property in any one accident, and subject to that limit per accident; and
- $2,000,000 total (or aggregate) limit for all damages arising out of injury to or destruction of property during policy period.

Before Work on any Contract or subcontract begins, Contractor(s) and subcontractor(s) shall submit seven certificates to Owner for approval covering each insurance policy carried and offered as evidence of compliance with noted requirements, signed by an authorized representative of insurance company, setting forth:

- name and address of insured;
- location of operations to which insurance applies,
- number of policy and type(s) of insurance in force thereunder on date borne by such certificate;
- policy expiration date and limit(s) of liability thereunder on date borne by such certificate;
- statement insurance of type afforded by policy applies to all operations of whatever character, undertaken by insured during performance of Contract, provided such operations are required in performance of Contract and
- provision the policy may be canceled only by mailing written notice to named insured at address shown in this policy stating when, not less than 10 days thereafter, and cancellation of such policy shall be effective, with copy to Owner of letter of intent.

These certificates will become a part of Contract Documents and must be included with Contract Documents before execution by the City of Midland. Coverages specified herein apply to all Contractor operations in connection with this Work, including automobile and other vehicles.

Contractor's insurance shall cover self, all subcontractors, and sub-subcontractors. All other sublevels of Contractors shall provide copies of proof of insurance if not covered by the general Contractor.

Contractor shall provide a Waiver of Subrogation in favor of the City of Midland and Parkhill on Worker's Compensation and Employee Liability Insurance, Contractor's Public Liability and Property Damage Liability Insurance, and Automobile Insurance.

SP-18 REMOVAL AND DISPOSAL OF STRUCTURES, UTILITIES, AND OBSTRUCTIONS

All materials and debris specified to be disposed by Contractor shall become Contractor's property and Contractor shall properly dispose off Airport property.

SP-19 CONFORMITY WITH PLANS AND ALLOWABLE DEVIATIONS

Finished surfaces shall conform to lines, grades, cross sections, and dimensions. Any deviation from Plans required by exigencies of construction shall be determined and authorized by Parkhill in writing.

SP-20 REMOVAL OF DEFECTIVE AND UNAUTHORIZED WORK

All Work rejected or condemned shall be repaired or, if not satisfactorily repaired, removed and replaced at Contractor expense. Contractor shall immediately remove materials not conforming to Specification requirements from site of Work and replaced with satisfactory material at Contractor expense.

Work done beyond that shown on Plans, or as given, except as herein provided, without proper inspection, or any extra or unclassified Work done without written authority and prior agreement in writing as to prices, will be done at Contractor risk and considered unauthorized and, at Parkhill option, may not be measured, paid for, and may be ordered removed and replaced at Contractor expense.

Upon Contractor failure to repair satisfactorily or remove and replace, if so directed, rejected, unauthorized, or condemned Work or materials immediately after receiving formal notice from Parkhill, Owner may recover for such defective Work or materials on Contractor bond, or by action in court having proper jurisdiction over such matters, or may employ labor, equipment, and satisfactorily repair or remove and replace such Work and charge cost of same to Contractor, which will be deducted from any money due.

SP-21 DISPUTED CLAIMS FOR EXTRA WORK

In case Contractor deems extra compensation is due for Work on materials not clearly covered in Contract nor ordered by Parkhill as an extra, Contractor shall notify Parkhill in writing of intention to make a claim for such extra compensation before beginning Work on which claim is based and shall afford Parkhill every facility for keeping actual cost of Work. Contractor's failure to give such notification or afford Parkhill proper facilities for keeping strict account of actual costs, shall constitute a waiver of claim for such extra compensation. Contractor's filing of such notice and keeping of costs by Parkhill shall not in any way be construed to prove claim validity. When Work is completed, Contractor shall, within 10 days, file a claim for extra compensation with Parkhill, who will present it to Owner for consideration.

SP-22 FEDERAL PARTICIPATION

Pursuant to provisions of the Act of Congress known as the Airport Improvement Program of 1982 as amended, the United States Government may pay a portion of improvement cost. This Act of Congress provides construction Work and labor in each state shall be in accordance with laws of that state subject to FAA inspection and approval and in accordance with rules and regulations made pursuant to said Act. Construction Work, therefore, will be subject to such inspection by FAA Administrator or agents as deemed necessary to meet with requirements when Federal funds are used, but such inspection will in no sense make the Federal Government a party to this Contract nor interfere with rights of either party to Contract.

SP-23 INDEMNIFICATION

CONTRACTOR SHALL INDEMNIFY AND HOLD HARMLESS AND DEFEND OWNER, PARKHILL, AND ALL OFFICERS, AGENTS, AND EMPLOYEES FROM ALL SUITS, ACTIONS, CLAIMS, DAMAGES, PERSONAL INJURIES, ACCIDENTAL DEATH, LOSSES, PROPERTY DAMAGE, AND EXPENSES OF ANY CHARACTER WHATSOEVER, INCLUDING REASONABLE ATTORNEY FEES, BROUGHT FOR/ON ACCOUNT OF ANY INJURIES/DAMAGES RECEIVED/SUSTAINED BY ANY PERSON(S)/PROPERTY, ON ACCOUNT OF ANY NEGLIGENT ACT OF CONTRACTOR, AGENTS, EMPLOYEES, OR ANY SUBCONTRACTOR, IN EXECUTION, SUPERVISION, AND OPERATIONS GROWING OUT OF OR IN ANY WAY CONNECTED WITH PERFORMANCE OF THIS CONTRACT, AND CONTRACTOR IS REQUIRED TO PAY ANY JUDGMENT WITH COSTS OBTAINED AGAINST OWNER, PARKHILL, OR ANY OFFICERS, AGENTS, OR EMPLOYEES, INCLUDING REASONABLE ATTORNEY FEES.

CONTRACTOR SHALL INDEMNIFY AND HOLD HARMLESS AND DEFEND OWNER AND ALL OWNER'S OFFICERS, AGENTS, AND EMPLOYEES AND PARKHILL AND OFFICERS, AGENTS, AND EMPLOYEES OF PARKHILL FROM ALL SUITS, ACTIONS, CLAIMS, DAMAGES, PERSONAL INJURIES, ACCIDENTAL DEATH, PROPERTY DAMAGE, LOSSES, AND EXPENSES OF ANY CHARACTER WHATSOEVER, INCLUDING ATTORNEY FEES, BROUGHT FOR/ON ACCOUNT OF ANY INJURIES/DAMAGES RECEIVED OR SUSTAINED BY ANY PERSON(S)/PROPERTY, ON ACCOUNT OF ANY NEGLIGENT ACT OF OWNER, OWNER'S OFFICERS, AGENTS, AND EMPLOYEES, OR ON ACCOUNT OF ANY NEGLIGENT ACT OF PARKHILL, OR OFFICERS, AGENTS, AND EMPLOYEES OF PARKHILL WHETHER SUCH NEGLIGENT ACTS WERE SOLE PROXIMATE CAUSE OF

INJURY/DAMAGE OR A PROXIMATE CAUSE JOINTLY AND CONCURRENTLY WITH CONTRACTOR OR CONTRACTOR'S EMPLOYEES, AGENTS, OR SUBCONTRACTORS NEGLIGENCE, IN EXECUTION, SUPERVISION, AND OPERATIONS GROWING OUT OF/IN ANY WAY CONNECTED WITH PERFORMANCE OF THIS CONTRACT, AND CONTRACTOR IS REQUIRED TO PAY ANY JUDGMENT WITH COSTS WHICH MAY BE OBTAINED AGAINST OWNER OR ANY OFFICERS, AGENTS, OR EMPLOYEES, INCLUDING REASONABLE ATTORNEY FEES.

CONTRACTOR AGREES TO INDEMNIFY AND SAVE OWNER AND PARKHILL HARMLESS FROM ALL CLAIMS GROWING OUT OF ANY DEMANDS OF SUBCONTRACTORS, LABORERS, WORKMEN, MECHANICS, MATERIALMEN, AND FURNISHERS OF MACHINERY AND PARTS THEREOF, EQUIPMENT, POWER TOOLS, ALL SUPPLIES, INCLUDING COMMISSARY INCURRED IN FURTHERING PERFORMANCE OF THIS CONTRACT. WHEN OWNER SO DESIRES, CONTRACTOR SHALL FURNISH SATISFACTORY EVIDENCE ALL OBLIGATIONS OF NATURE HEREINABOVE DESIGNATED HAVE BEEN PAID, DISCHARGED, OR WAIVED.

CONTRACTOR HEREBY WAIVES ALL RIGHTS TO ANY ATTORNEY FEES AWARDED AS RESULT OF ANY ACTION BROUGHT UNDER THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT RELATING TO THIS CONTRACT.

SP-24 CONTRACTOR RESPONSIBILITY FOR WORK

Until acceptance by Parkhill of any part or all construction, as provided for in these Specifications, it shall be under charge and care of Contractor who shall take every necessary precaution against injury or damage to any part of Work by action of elements or from any other cause whatsoever, whether arising from execution/non-execution of Work. Contractor shall rebuild, repair, restore, and make good, at own expense, all injuries or damage to any portion of Work occasioned by any noted cause before completion and acceptance.

SP-25 CORRECTION OF FAULTY WORK AFTER FINAL PAYMENT

Making Final Payment by Owner to Contractor shall not relieve Contractor of responsibility for faulty materials or workmanship. Contractor shall promptly replace any such defects discovered within one year from date of written acceptance of Work.

Performance Bond shall remain in effect until one year after date of written acceptance of Work to insure compliance by Contractor with requirements of this Article.

SP-26 TEXAS STATE SALES TAX

Work under this Contract is for an entity which qualifies for exemption pursuant to provisions of Article 151.309 of the Texas Tax Code.

Contractor performing this Contract may purchase, rent, or lease all materials, supplies, and equipment incorporated into Project by issuing an exemption certificate to supplier in lieu of tax, said exemption certificate complying with State Comptroller rulings. However, equipment and parts for equipment purchased used on Project but not incorporated into Project do not qualify for said tax exemption.

Contractor shall issue a resale certificate in lieu of paying such sales tax for all materials incorporated into Project. Further, Contractor shall separate charges for materials incorporated into Project from charges for labor. Any such exemption certificate issued by Contractor in lieu of tax shall be subject to provisions of State Comptroller rulings.

SP-27 SEPARATE CONTRACTS

Owner reserves the right to let other contracts about/near Project. Contractor shall afford other contractors a reasonable opportunity for introduction and storage of materials, execution of Work, and coordinate Work with theirs. Contractor coordination with other contractors shall require Parkhill approval. See Article SP-3 for additional requirements concerning separate Contracts.

SP-28 TRENCH SAFETY

Contractor shall strictly comply with all requirements of Occupational Safety and Health Administration (OSHA) Manual, Chapter XVII, Subpart P - Excavation, Trenching and Shoring, for all trenching and excavation operations.

If depths of trenches are encountered over 5 feet, Contractor shall cut trench walls to angle of repose of soils encountered or submit alternate shoring details to Parkhill for approval.

SP-29 LOAD RESTRICTIONS

Contractor shall comply with all legal load restrictions in hauling materials on public roads beyond limits of Work. A special permit will not relieve Contractor of liability for damage which may result from moving material or equipment.

Equipment operations of such weight or so loaded to cause damage to structures or any other type of construction will not be permitted. Hauling materials over base course is not permitted. Hauling materials over base or surface course under construction shall be limited as directed. No loads will be permitted on a concrete pavement, base, or structure before curing period expiration. Contractor shall be responsible for all damage done by hauling equipment and shall correct such damage at own expense.

SP-30 NOTICE TO PROCEED

Notice to proceed shall state the date on which it is expected Contractor will begin construction and from which date Contract time will be charged. Contractor shall begin Work to be performed under Contract within 10 days of date set by Parkhill in written Notice to Proceed, but in any event, Contractor shall notify Parkhill at least 24 hours in advance of time actual construction operations will begin.

SP-31 PAYMENT FOR MATERIALS ON HAND

Partial payments may be made to extent of delivered cost of materials to incorporate in Work, if such materials meet requirements of Contract, Plans, and Specifications and are delivered to acceptable sites on Airport property or other sites in the vicinity acceptable to Owner. Such delivered costs of stored or stockpiled materials may be included in next partial payment after these conditions are met:

A. Material is stored/stockpiled in a manner acceptable to Parkhill at/on an approved site.
B. Contractor furnished Parkhill with acceptable evidence of quantity and quality of such stored/stockpiled materials.
C. Contractor furnished Parkhill with satisfactory evidence material and transportation costs have been paid. Contractor is to provide copies of invoices paid (listing the cost of each item) for materials on hand requested on partial payment request.

D. Contractor furnished Owner legal title (free of liens/encumbrances of any kind) to material so stored/stockpiled.
E. Contractor furnished Owner evidence material stored/stockpiled is insured against loss by damage to or disappearance of such materials any time before use in Work.

Transfer of title and Owner's payment for such stored/stockpiled materials shall in no way relieve Contractor of responsibility for furnishing and placing such materials in accordance with requirements of Contract, Plans, and Specifications.

In no case will amount of partial payments for materials on hand exceed Contract price for such materials or Contract price for Contract item in which material is intended for use.

No partial payment made for stored/stockpiled living or perishable plant materials.

Contractor bears all costs associated with partial payment of stored/stockpiled materials in accordance with provisions of this subsection. See also Articles SP-52 "Partial Payments" and GC-46 "Partial Payments."

SP-32 WEIGHING AND MEASURING EQUIPMENT

Except as modified herein, all scales and scale installations shall meet requirements of the National Institute of Standards and Technology Handbooks 44 and 112 (published by U.S. Department of Commerce and available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.D. 20402-9325), except required accuracy shall be 0.4 percent of load weighed or one graduation on the scale dial. Contractor shall provide personnel, facilities, and equipment for checking scales to Parkhill satisfaction.

Check all scales before beginning operations, after each move, at times when, in Parkhill opinion, there is a question as to accuracy/adequacy, and at least once each six months. Contractor shall furnish a report of calibration from a scale mechanic licensed by the Texas Department of Agriculture using certified weights and approved by Parkhill, certifying scales meet requirements of this item. Plant operations shall cease during checking operation. When inaccuracy/inadequacy is discovered, do not resume scale use until corrective measures are complete and/or scales calibrated. When equipment is adjusted, modify to bring performance errors as close as practicable to zero value.

SP-33 PROGRESS SCHEDULE

Within 15 working days after Award of Contract (or at Preconstruction Meeting), Contractor shall submit a Project Progress Schedule. Progress Schedule shall be prepared in a form suitable to Parkhill and show proposed starting and completion dates for each phase of construction as well as each item of Work within each phase. Progress schedule shall include a "Percent Complete Curve" with monthly amount, cumulative amount, and cumulative percent. Progress Schedule, if suitable and indicates certain Project completion within the specified time, will be approved in writing by Parkhill. Revisions/changes in approved progress schedule may only be made with Parkhill approval.

SP-34 AVERAGE CLIMATIC RANGE

Time allowed for completion of entire Project shall include number of calendar days for anticipated delays due to normal weather conditions. No time extension for delays due to weather allowed until and unless such delays exceed claims for extension of time because of abnormal inclement weather. Such extension of time shall be granted only because such abnormal inclement weather prevented execution of major items of Work on normal working days. Weather conditions on a particular day may affect Work on days following the normal weather day. This subsequent delay shall not be considered abnormal, and no extension of time will be considered.

The following Weather Table reflects meteorological data from Midland-Odessa area and will be used to determine Contract time extensions due to abnormally inclement weather. For purposes of this Contract, "abnormally inclement weather" is interpreted as number of days more than normal number of days on which rainfall exceeds 0.01-inch, or snow/ice pellets exceed 1.0-inch. Extensions of time to complete Work will be based on calendar days and granted by monthly account. No "rain days" unused for previous months may be carried over or accountable for future periods of time.

WEATHER TABLE		
MONTH	**MEAN NO. OF RAIN DAYS[1]**	**MEAN NO. OF SNOW/ICE PELLETS DAYS[2]**
January	3	0
February	3	0
March	4	0
April	3	0
May	5	0
June	5	0
July	4	0
August	5	0
September	7	0
October	3	0
November	3	0
December	3	0
TOTAL	**48**	**0**

[1] Mean number of days' rainfall, 0.01 inch or more.
[2] Mean number of days' 1.0 inch or more.
* Less than 0.5 inch.

Table based on information reported from MAF, Midland, Texas.
Latitude 31 degrees, 56 minutes N Longitude, 102 degrees 12 minutes W, elevation (ground) 2,862 feet.
Means are based on records covering 10 years from 2012-2021.

SP-35 SUBSTANTIALLY COMPLETE

In various Specifications "Substantially Complete" is used. Definition shall be:

> "Substantially complete shall occur at time Work to be completed is complete as specified and Owner accepts/occupies facility/improvement. All equipment shall have been completely installed, tested, ready for Owner acceptance and use, and accepted by Owner before Work is defined as substantially complete."

SP-36 SUBMITTALS

Transmit each submittal with Contractor-standard transmittal letter including Contractor name, address, and phone number. Identify Project, Contractor, subcontractor, or supplier, pertinent Drawing sheet and detail number(s), and Specification Section number, as appropriate. Apply Contractor stamp, signed/initialed certifying review, verification of Products required, field dimensions, adjacent construction Work, and coordination of information, are in accordance with requirements of Work and Contract Documents. Schedule submittals to expedite Project and deliver to Parkhill via the Procore website (except for product samples mailed to Parkhill's physical address). Coordinate submission of related items. Identify variations from Contract Documents and product/system limitations detrimental to successful performance of completed Work. Parkhill Project Coordinator (PC) shall distribute reviewed submittals to concerned parties via the Procore website instructing parties to promptly report any inability to comply with provisions. Process/format as follows:

- Digitally upload all submittals using PDF file extension. Each submittal shall be a single PDF file including transmittal letter. Multiple files for the same submittal will not be accepted.
- Submittals in any other format, including ZIP files, will be rejected.
- Hard copies will not be accepted.
- To ensure each page is legible, PDF pages of Drawings shall be same size/scale as a hard copy. Where applicable, provide scale symbols to indicate scale. Illegible submittals will be rejected.
- Upload submittals to the Parkhill Procore website.

Submittal procedures described herein apply to Construction Progress Schedule, Products List, Shop Drawings, Product Data, Samples (actual samples to submit, not digital files), Design Data, Test Reports, Certificates, Manufacturer Instructions and Field Reports, and other types of submittals submitted to Parkhill. Submittals shall include but not necessarily limited to:

- Preliminary CPM Contractor's Construction Schedule.
- Detailed lighting plan for night Work (if applicable).
- Contractor's list of emergency names and phone number.
- Video and/or written report of existing facilities conditions documenting inspection results performed before start of Work.
- List of subcontractors and material suppliers with experience statement.
- Certified payroll reports and statement of compliance from Contractor and all subcontractors (submitted directly to Airport Accountant).
- Disadvantaged Business Enterprise (DBE) utilization reports (submitted with monthly pay applications).
- Three-week lookahead Project schedule (at weekly construction meetings).
- Contractor Quality Control Plan (submitted by preconstruction meeting).
- Other submittals noted in Appendix C of Construction Management Plan (CMP).
- Contractor affidavit regarding settlement of claims (closeout request).
- Original affidavit acknowledging all subcontractors, material suppliers, payrolls, bill for materials and equipment, and other indebtedness connected with Contract have been paid or otherwise satisfied (closeout request).
- Original with notary signature, full and final release and waiver on liens from Contractor, each subcontractor, and material suppler that documents that are been paid in full (closeout request).
- Warranty (due at Final Completion).
- Maintenance and operating instructions of new equipment.

SP-37 GEOTECHNICAL INFORMATION

Geotechnical Investigation for Midland International Air and Space Port, Midland, Texas, dated February 15, 2023, 41 pages, from Jose Melendez, P.E. with Rodriguez Engineering Laboratories.

SP-38 SOVEREIGN IMMUNITY

By executing this Contract, Owner is not waiving its right to sovereign immunity. Owner is retaining immunity from suit. Owner is not granting consent to be sued by legislative resolution or action.

THERE IS NO WAIVER OF SOVEREIGN IMMUNITY.

SP-39 GOVERNING LAW AND VENUE

This Contract shall be governed by laws of the State of Texas. All performance and payment made pursuant to this Contract shall be deemed to have occurred in Midland County, Texas. Exclusive venue for any claims, suits, or other action arising from or connected in any way to this Contract or performance of this Contract shall be in Midland County, Texas. Obligations and undertakings of each party to this Contract shall be deemed to have occurred in Midland County, Texas. This Contract shall be governed by, interpreted, enforced, and construed under the law of the State of Texas. Laws of the State of Texas shall govern, construe, and enforce all rights and duties of parties, including but not limited to tort claims and all Contractual claims or disputes, arising from or relating in any way that would direct application of laws of another jurisdiction.

SP-40 THIRD-PARTY BENEFICIARY

This Contract does not create a third-party beneficiary nor is there a third-party beneficiary to this Contract. No person/entity not a party to this Contract shall have any third-party beneficiary or other rights hereunder.

SP-41 RELEASES

NOTWITHSTANDING ANY OTHER PROVISIONS, Contractor hereby releases, acquits, RELINQUISHES, and forever discharges OWNER, Owner's employees and officers, and PARKHILL, and its employees and officers, from any and all demands, claims, DAMAGES, or causes of action of any kind whatsoever which Contractor has/might have including but not limited to BREACH OF CONTRACT, QUANTUM MERUIT, CLAIMS UNDER DUE PROCESS AND TAKINGS CLAUSES OF THE TEXAS AND UNITED STATES CONSTITUTIONS, TORT CLAIMS, OR OWNER NEGLIGENCE.

SP-42 INDEPENDENT CONTRACTOR

It is expressly understood and agreed Contractor shall perform all Work and services described herein as an independent Contractor and not an officer, agent, servant, or employee of Owner; Contractor shall have exclusive control of and exclusive right to control details of services and Work performed hereunder, and all persons performing the same; and solely responsible for acts and omissions of its officers, agents, employees, Contractors, and subcontractors; that the doctrine of respondent superior shall not apply as between Owner and Contractor, its officers, agents, employees, Contractors, and subcontractors; and that nothing herein shall be construed as creating a partnership or joint enterprise between Owner and Contractor. No person performing any Work and services described hereunder by Contractor shall be considered an officer, agent, servant, or employee of Owner. Further, it is specifically understood and agreed that nothing in this Contract is intended or shall be construed as creating a "Community of Pecuniary Interest" or "An Equal Right of Control" which would give rise to vicarious liability. Contractor shall be an independent Contractor under this Contract and shall assume all rights, obligations, and liabilities applicable to it as such independent Contractor. Owner does not have the power to direct the order Work is done. Owner shall not have the right to control means, methods, or details of Contractor's work. Contractor shall assume exclusive responsibility for Work. Contractor is entirely free to do Work in its own way.

SP-43 NOTICE OF ALLEGED BREACH, STATUTORY PREREQUISITES

As a condition precedent to filing suit for alleged damages incurred by an alleged breach of an express or implied provision of this Contract, Contractor or legal representative shall give City Manager, or other reasonable official of Owner, notice in writing (consisting of one original and seven copies of notice attached to Contract) of such damages, duly verified, within 150 days after same has been sustained. Discovery rule does not apply to giving this notice. Notice shall include when, where, and how damages occurred, apparent extent thereof, amount of damages sustained, amount for which Contractor will settle, physical and mailing addresses of Contractor at time and date claim was presented as well as physical and mailing addresses of Contractor for six months immediately preceding occurrence of such damages, and names and addresses of witnesses upon whom Contractor relies on to establish claim. Failure to notify City Manager within time and manner provided herein shall exonerate, excuse, and except Owner from any liability whatsoever. Owner is under no obligation to provide notice to Contractor that Contractor's notice is insufficient. Owner reserves the right to request reasonable, additional information regarding claim. Said additional information shall be supplied within 30 days after receipt of notice.

Statutory prerequisites outlined herein constitute jurisdictional requirements pursuant to Section 271.154 of the Texas Local Government Code and Section 311.034 of the Texas Government Code. Notwithstanding another provision, Contractor failure to comply with requirements herein shall perpetually bar Contractor's claim for damages under Chapter 271 of the Texas Local Government Code, and Section 311.034 of the Texas Government Code, regardless of if Owner has actual/constructive notice/knowledge of said claim or alleged damages. Contractor agrees requirements of this entire Contract are reasonable.

SP-44 ASSIGNMENT

Contractor shall not directly/indirectly assign all/any part of this Contract or any interest, right, or privilege herein, without prior written consent of Owner. Owner has the sole discretion on whether to grant consent to an assignment.

SP-45 WAIVER OF ATTORNEY FEES

BY EXECUTING THIS CONTRACT, CONTRACTOR AGREES TO WAIVE AND DOES HEREBY KNOWINGLY, CONCLUSIVELY, VOLUNTARILY, AND INTENTIONALLY WAIVE ANY CLAIM IT HAS OR MAY HAVE IN THE FUTURE AGAINST OWNER, REGARDING AWARD OF ATTORNEY FEES, WHICH ARE IN ANY WAY RELATED TO CONTRACT OR CONSTRUCTION, INTERPRETATION, OR BREACH OF CONTRACT. CONTRACTOR SPECIFICALLY AGREES IF CONTRACTOR BRINGS/COMMENCES ANY LEGAL ACTION/PROCEEDING RELATED TO THIS CONTRACT, CONSTRUCTION, INTERPRETATION, VALIDITY, OR BREACH OF CONTRACT INCLUDING BUT NOT LIMITED TO ANY ACTION PURSUANT TO PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE SECTION 37.001, ET. SEQ., AS AMENDED), OR CHAPTER 271 OF THE TEXAS LOCAL GOVERNMENT CODE, CONTRACTOR AGREES TO ABANDON, WAIVE, AND RELINQUISH ALL RIGHTS TO RECOVERY OF ATTORNEY FEES TO WHICH CONTRACTOR MIGHT OTHERWISE BE ENTITLED.

CONTRACTOR AGREES THIS IS A VOLUNTARY AND INTENTIONAL RELINQUISHMENT AND ABANDONMENT OF A PRESENTLY EXISTING KNOWN RIGHT. CONTRACTOR ACKNOWLEDGES AN UNDERSTANDING OF ALL TERMS AND CONDITIONS OF CONTRACT. CONTRACTOR FURTHER ACKNOWLEDGES AND AGREES THERE WAS AND IS NO DISPARITY OF BARGAINING POWER BETWEEN OWNER AND CONTRACTOR. THIS SECTION SHALL NOT BE CONSTRUED/INTERPRETED AS A WAIVER OF SOVEREIGN IMMUNITY.

CONTRACTOR AND OWNER ARE RELYING ON THEIR OWN JUDGMENT. EACH PARTY HAD THE OPPORTUNITY TO DISCUSS THIS CONTRACT WITH COMPETENT LEGAL COUNSEL PRIOR TO EXECUTION.

SP-46 PROMPT PAY ACT

Owner and Contractor agree Texas Government Code, Chapter 2251, Payment for Goods and Services (the "Prompt Pay Act") does not waive governmental immunity.

SP-47 PAYMENT

After Contractor completes all Work including all Change Orders altering original Scope, amount of said Contract are completed, and Owner inspected and approved that Work is completed and in compliance with Contract and all subsequent Change Orders, Owner may thereafter issue payment to Contractor in amount of Contract and all Change Orders. Owner shall be the final judge of when Contractor completes Work. Owner, at sole discretion, shall determine if Work under Contract and under any Change Orders was done to Owner requirements. Owner may make periodic payments to Contractor; however, such periodic payments may only be made pursuant to this Article and only after all Work and Change Orders are completed by Contractor and approved by Owner.

SP-48 PROJECT CLOSEOUT

Approval of Final Payment to Contractor is contingent upon completion and submittal of items listed below. Final payment not approved until Parkhill approves Contractor's final submittal. Contractor shall:

- provide two copies of all manufacturer warranties specified for materials, equipment, and installations.
- provide weekly payroll records (not previously received) from General Contractor and all subcontractors.
- complete final cleanup. Upon completion of Work and before Acceptance and Final Payment is made, Contractor shall remove from Site all machinery, equipment, surplus and discarded materials, rubbish, temporary structures, and stumps or portions of trees. Contractor shall cut all brush and woods within limits indicated and leave site neat and presentable. Material cleared from site and deposited on adjacent property will not be considered as having been disposed satisfactorily unless Contractor obtained written permission of such property owner.
- complete all punch list items identified during Final Inspection.
- provide complete release of all claims for labor and material arising out of Contract.
- provide a certified statement signed by subcontractors indicating actual amounts paid to Disadvantaged Business Enterprise (DBE) subcontractors and/or suppliers associated with Project.
- return copies of sales tax completion forms when applicable per state requirements.
- provide manufacturer certifications for all items incorporated in Work.
- make all required Record, As-Built, or As-Constructed Drawings available.
- deliver Project Operation and Maintenance (O&M) Manual(s).
- provide Security for Construction Warranty.
- submit equipment commissioning documentation, if required.

SP-49 DISCLOSURE OF INTERESTED PARTIES

Successful Proposer will be required to complete Texas Ethics Commission Form 1295 - Certificate of Interested Parties and submit completed form with executed Contracts for Project. Complete Form 1295 online at the Texas Ethics website: https://www.ethics.state.tx.us/filinginfo/1295/.

Parkhill will email links to Contractor with an explanation once Contract is awarded. Contractor is responsible for completing form, printing, and submitting along with all other required Contract documents.

SP-50 PARKHILL/RPR AUTHORITY AND DUTY

Parkhill nor RPR shall supervise, direct, or have control over Contractor's Work nor have any responsibility for construction means, methods, techniques, sequences, or procedures selected by Contractor nor for Contractor's safety precautions or programs in connection with Work. These rights and responsibilities are solely those of Contractor in accordance with Contract Documents.

Parkhill nor RPR shall be responsible for any acts/omissions of Contractor, subcontractor, entity performing any portions of Work, or agents or employees of any of them. Parkhill nor RPR guarantee Contractor performance nor are responsible for Contractor's failure to perform Work in accordance with Contract Documents or any applicable laws, codes, rules, or regulations.

SP-51 ANTI-BOYCOTT STATUTES

To the extent that Sections 2271.002 and 2274.002 of the Texas Government Code (collectively, the "Anti-Boycott Statutes") apply to this Contract, Contractor hereby verifies:

- that Contractor does not boycott Israel and will not boycott Israel during the term of this Contract;
- that Contractor does not boycott energy companies and will not boycott energy companies during the term of this Contract; and
- that Contractor does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association and will not discriminate during the term of this Contract against a firearm entity or firearm trade association.

To the extent that the Anti-Boycott Statutes do not apply to this Contract, such verification is not required, and Contractor shall be deemed to have not made such verification.

SP-52 PARTIAL PAYMENTS

Partial Payments will be made to Contractor at least once each month as work progresses. Said payments will be based upon estimates, prepared by Contractor for Architect/Engineer review, of the value of work performed and materials complete and in place, in accordance with Contract, Plans, and Specifications. Such partial payments may also include delivered actual cost of those materials stockpiled and stored in accordance with Construction Contract requirements. No partial payment will be made when amount due to Contractor since last estimate is less than $500.

1) From the total amount determined payable on a partial payment, Owner shall deduct and retain 5% of such total amount to protect Owner interests. Unless Owner instructs otherwise, amount Owner retains will be in effect until final payment is made except:
    a. Contractor may request release of retainage on work partially accepted by Owner in accordance with Construction Contract requirements. Contractor must provide a certified invoice to Owner to support retainage value held by Owner for partially accepted work.
2) Contractor is required to pay all subcontractors for satisfactory performance of their contracts no later than 30 days after Contractor received partial payment. Contractor must provide Owner evidence of prompt and full retainage payment held by prime Contractor to subcontractor within 30 days after subcontractor work is satisfactorily

completed. Subcontractor work is satisfactorily completed when all tasks called for in subcontract are accomplished and documented as Owner requires. When Owner incrementally accepts a portion of a prime contract, subcontractor work covered by that acceptance is deemed satisfactorily completed.

3) When at least 95% of work is completed to Owner satisfaction, Contractor shall, at Owner discretion and with consent of surety, prepare estimates of both contract value and cost of remaining work to be done. Owner may retain an amount not less than twice the contract value or estimated cost, whichever is greater, of work remaining to be done. Remainder, less all previous payments and deductions, will then be certified for payment to Contractor.

It is understood and agreed that Contractor shall not be entitled to demand or receive partial payment based on quantities of work in excess of those provided in proposal or covered by approved change orders or supplemental agreements, except when Architect/Engineer determines such excess quantities are to be part of the final quantity for item of work in question.

No partial payment shall bind Owner to acceptance of any materials or work in place as to quality or quantity. All partial payments are subject to correction at time of final payment in accordance with Construction Contract requirements.

Contractor shall deliver Owner a complete release of all claims for labor and material arising out of this contract before final payment is made. If any subcontractor or supplier fails to furnish such a release in full, Contractor may furnish a bond or other collateral satisfactory to Owner to indemnify Owner against any potential lien or other such claim. Bond or collateral shall include all costs, expenses, and attorney fees Owner may be compelled to pay in discharging any such lien or claim.

END OF DOCUMENT

GENERAL CONDITIONS OF CONTRACT

GC-01. OWNER

When "Owner," "Party of the First Part," or "First Party" are used in Contract Documents, it shall refer to Owner as described in Contract.

GC-02. CONTRACTOR

When "Contractor," "Party of the Second Part," or "Second Party," are used, it shall mean person(s), co-partnership, or corporation so defined in Contract who agreed to perform Work embraced in this Contract, or to legal representatives.

GC-03. ARCHITECT/ENGINEER

When "Architect/Engineer" is used in this Contract, it shall refer to Parkhill, Architect/Engineer of Owner, or such other Architect/Engineer, supervisor, or inspector, as authorized by said Owner, to act as Owner's representative with respect to services performed or furnished by Architect/Engineer.

GC-04. CONTRACT DOCUMENTS

Contract Documents shall consist of Notice to Bidders (Advertisement), Instructions to Bidders, Proposal, signed Contract, Performance Bond, Payment Bond, General Conditions of the Contract, Special Provisions, Technical Specifications, Plans, and all modifications thereof incorporated in any documents before execution of Contract.

Contract Documents are complementary and called for by any one person/entity shall be as binding as if called for by all. In case of conflict between Contract Documents, priority of interpretation shall be in the following order:

1. Signed Contract,
2. Performance Bond,
3. Special Bonds (if any),
4. Proposal,
5. Special Provisions,
6. Notice to Bidders,
7. Instructions to Bidders,
8. Technical Specifications,
9. Plans, and
10. General Conditions of the Contract.

GC-05. SUBCONTRACTOR

"Subcontractor," as employed herein, includes only those with a direct contract with Contractor and includes one who furnished material worked to a special design according to plans or Specifications of this Work but does not include one who merely furnished material not so worked.

GC-06. WRITTEN NOTICE

Written notice shall be deemed to be duly served if delivered in person to individual, member of firm, or officer of corporation intended, or if delivered/sent by registered mail to last business address known.

GC-07. WORK

Unless otherwise stipulated, Contractor shall provide and pay for all materials, supplies, machinery, equipment, tools, superintendence, labor, insurance, water, light, power, fuel, transportation, and other facilities necessary for execution and completion of Work covered by Contract Documents. Unless otherwise specified, all materials shall be new and both workmanship and materials of good quality. Contractor shall, if required, furnish satisfactory evidence as to kind and quality of materials. Materials or Work described in words shall have a well-known technical or trade meaning and held to refer to such recognized standards.

GC-08. DELETED

GC-09. DELETED

GC-10. LAYOUT OF WORK

Except as specifically provided herein, Contractor shall be responsible for laying out all Work and accomplish Work as acceptable to Architect/Engineer. Architect/Engineer will check Contractor's layout of all major structures and other layout work done by Contractor at Contractor request, but this check does not relieve Contractor of responsibility of correctly locating all Work in accordance with Plans and Specifications.

GC-11. ARCHITECT/ENGINEER AUTHORITY AND DUTY

Unless otherwise specified, it is mutually agreed between parties to this Contract that Architect/Engineer will observe quality and progress of Work at various times. To prevent delays, disputes, and discourage litigation, it is further agreed Architect/Engineer shall, in all cases, determine amounts and quantities of several kinds of Work paid under this Contract. He shall determine all questions in relation to said Work and construction thereof, and in all cases, decide every question which may arise relative to execution of this Contract on part of said Contractor. Architect/Engineer estimates and findings shall be conditions precedent to right of parties hereto to any action of Contract, and any rights of Contractor to receive any money under this Contract; provided, however, should Architect/Engineer render any decision or give any direction, which in the opinion of either party hereto, is not in accordance with meaning and intent of this Contract, either party may file with said Architect/Engineer within 30 days, written objection to decision/direction so rendered. Contract intent is for there to be no delay in execution of Work; therefore, written decisions/directions of Architect/Engineer as rendered shall be promptly carried out and any claim arising therefrom shall be thereafter adjusted as hereinafter provided.

Architect/Engineer shall, within a reasonable time, render and deliver to both Owner and Contractor, a written decision on all claims of parties hereto and all questions which may arise relative to execution of Work or interpretation of Contract, Specifications, and Plans. Should Architect/Engineer fail to make such decision within a reasonable time, an appeal may be taken as if decision was rendered against party appealing.

When "directed," "required," "permitted," "designated," "considered necessary," "prescribed," "approval," "acceptable," "satisfactory," or words of like import are used, it is understood direction, requirement, permission, order, designation, prescription, approved by, acceptable, or satisfactory of Architect/Engineer is intended.

In Specifications or Drawings accompanying this Contract, terms of description of various qualities relative to finish, workmanship, or other qualities of similar kind which cannot, from their nature, be specifically and clearly described and specified, but necessarily described in general terms, fulfillment of which must depend on individual judgment, in all such cases, any question of fulfillment of said Specifications shall be decided by Architect/Engineer, and said work done in accordance with interpretations of meaning of words, terms, or clauses defining character of Work.

GC-12. SUPERINTENDENCE AND PROJECT REPRESENTATION

It is agreed by Contractor that Architect/Engineer may appoint such subordinate engineers, supervisors, or project representatives as Architect/Engineer may deem proper to inspect material furnished and Work done under this Contract, see said material is furnished and done in accordance with Specifications therefor. Contractor shall furnish all reasonable aid and assistance required by subordinate engineers, supervisors, or project representatives for proper inspection and examination of Work. Contractor shall regard and obey directions and instructions of any subordinate engineers, supervisors, or project representatives so appointed when such directions and instructions are consistent with obligations of this Contract and accompanying Plans and Specifications, provided; however, should Contractor object to any orders by any subordinate engineer, supervisor, or project representative, Contractor may, within six days, make written appeal to Architect/Engineer for his decision.

GC-13. CONTRACTOR DUTY AND SUPERINTENDENCE

Contractor shall give personal attention to faithful prosecution and completion of this Contract and keep on Work, during progress, competent superintendent, and any necessary assistants all satisfactory to Architect/Engineer. Superintendent shall represent Contractor when absent and all directions given shall be as binding as if given to Contractor. Adequate supervision by competent and responsible Contractor representatives is essential to proper performance of Work and lack of such supervision shall be grounds for suspending Contractor operations. Confirm important directions in writing to Contractor. Confirm other directions on written request in each case.

GC-14. CONTRACTOR UNDERSTANDING

It is understood and agreed that Contractor is, by careful examination, satisfied as to nature and location of Work, confirmation of ground, character, quality, and quantity of materials to be encountered, character of equipment and facilities needed preliminary to and during prosecution of Work, general and local conditions, and all other matters which can in any way affect Work under this Contract. No verbal agreement or conversation with any officer, agent, or employee of Owner, either before or after execution of this Contract, shall affect or modify any terms or obligations herein contained.

GC-15. CHARACTER OF WORKERS

Contractor agrees to employ orderly and competent employees, skillful in performance of work required under this Contract, to do Work; and agrees whenever informed by Architect/Engineer in writing, any employee(s) on Work are, in Architect/Engineer opinion, incompetent, unfaithful, or disorderly, such employee(s) shall be discharged from Work and not again employed on Work without Architect/Engineer's written consent.

GC-16. CONTRACTOR BUILDINGS

Building structures for housing employees, erecting tents, or other forms of protection will be permitted only at such places as Architect/Engineer shall direct, and sanitary conditions of grounds in or about such structures shall always be maintained as satisfactory to Architect/Engineer.

GC-17. SANITATION

Contractor shall construct and maintain necessary sanitary conveniences for use of laborers on work, properly secluded from public observation, approved by Architect/Engineer, and use strictly enforced.

GC-18. SHOP DRAWINGS

Contractor shall submit to Architect/Engineer with such promptness as to cause no delay in work of any Contractor, Shop/Setting Drawings and schedules required for Work of various trades, and Architect/Engineer shall pass upon them with reasonable promptness, making required corrections. Architect/Engineer approval of such Drawings or schedules, shall not relieve Contractor from responsibility for deviations from Drawings or Specifications, unless Architect/Engineer called attention to, in writing,

such deviations at time of submission nor relieve Contractor from responsibility for errors of any sort in Shop Drawings or schedules.

GC-19. PRELIMINARY APPROVAL

Architect/Engineer shall not have power to waive obligations of this Contract for furnishing by Contractor of good material, and performing good work as herein described, and full accordance with Plans and Specifications. No failure or omission of Architect/Engineer to condemn any defective work or material shall relieve Contractor from obligations to tear out, remove, and properly replace same at any time prior to final acceptance upon discovery of said defective work or material, provided; however, Architect/Engineer shall, upon request of Contractor, inspect, accept, and/or reject any material furnished, and in event material was once accepted by Architect/Engineer, such acceptance shall be binding on Owner, unless clearly shown such material furnished does not meet specifications for this work. Any questioned work may be ordered taken up or removed for Architect/Engineer to re-examine, prior to final acceptance, and, if found not in accordance with Specifications for said work, all expense of removing, re-examination, and replacement shall be borne by Contractor, otherwise expense thus incurred shall be allowed as Extra Work and paid for by Owner, provided, where inspection or approval is specifically required by Specifications prior to performance of certain work, should Contractor proceed with such work without requesting prior inspection or approval, Contractor shall bear all expense of taking up, removing, and replacing work if so directed by Architect/Engineer.

GC-20. DEFECTS AND REMEDIES

It is further agreed if Work or any part thereof, or any material brought on site of Work for use in Work or selected for same, shall be deemed by Architect/Engineer as unsuitable or not in conformity with Specifications, Contractor shall, after receipt of written notice thereof from Architect/Engineer, forthwith remove such material and rebuild or otherwise remedy such work for full accordance with this Contract.

GC-21. CHANGES AND ALTERATIONS

Contractor further agrees Owner may make such changes and alterations as Owner sees fit, in line, grade, form, dimensions, plans, or materials for Work herein contemplated, or any part thereof, before or after beginning construction without affecting validity of this Contract and accompanying performance bond.

If such changes or alterations diminish quantity of Work to do, they shall not constitute basis for a claim for damages, or anticipated profits on Work that may be dispensed with, except as provided for unit price items under "Estimated Quantities." If amount of Work is increased or decreased, and Work can fairly be classified under Specifications, price adjustment for such increase or decrease shall be made according to quantity actually done and at unit price, if any, established for such work under this Contract, except as provided for unit price items under "Estimated Quantities;" otherwise, price adjustment for such changed work shall be made as provided under Extra Work. In case Owner shall make such changes or alterations as useless any material already done or material already furnished or used, Owner shall recompense Contractor for any material or labor so used, and any actual loss occasioned by such change, due to actual expense incurred in preparation as originally planned.

GC-22. RIGHT OF ARCHITECT/ENGINEER TO MODIFY METHODS AND EQUIPMENT

If at any time, methods or equipment used by Contractor are found inadequate to secure quality of Work or rate of progress required under this Contract, Architect/Engineer may order Contractor, in writing, to increase safety or improve character and efficiency, and Contractor shall comply with such order.

If at any time, Working force of Contractor is inadequate for securing progress herein specified, Contractor shall, if so ordered in writing, increase his force or equipment, or both, to such an extent as to give reasonable assurance of compliance with schedule of progress.

GC-23. KEEPING PLANS AND SPECIFICATIONS ACCESSIBLE

Architect/Engineer shall furnish Contractor with an adequate and reasonable number of copies of all Specifications without additional expense, and Contractor shall keep one copy of same constantly accessible on Work, with latest revisions noted thereon.

GC-24. OWNERSHIP OF DRAWINGS

All Drawings, Specifications, and copies thereof furnished by Architect/Engineer shall not be reused on other work, and with exception of signed contract sets, are returned to him on request, at completion of Work. All models are property of Owner.

GC-25. ADEQUACY OF DESIGN

It is understood Owner employed competent engineers and designers. It is, therefore, agreed Owner shall be responsible for adequacy of design, sufficiency of Contract Documents, safety of structure, and practicability of operations of completed Project, provided Contractor complied with requirements of said Contract Documents, all approved modifications thereof, additions, and alterations thereto approved in writing by Owner. Burden of proof of such compliance shall be upon Contractor to show compliance with said requirements of Contract Documents, approved modifications thereof, and all approved additions and alterations thereto.

GC-26. RIGHT OF ENTRY

Owner reserves the right to enter property or location on which Work herein contracted for are to be constructed or installed, by such agent(s) as elected, to supervise and inspect Work, or construct or install such collateral work as said Owner may desire.

GC-27. COLLATERAL CONTRACTS

Owner agrees to provide by separate contract or otherwise, all labor and material essential to completion of Work specifically excluded from this Contract, not delaying progress of Work, or damage said Contractor, except where such delays are specifically mentioned elsewhere in Contract Documents.

GC-28. DISCREPANCIES AND OMISSIONS

It is further agreed the intent of this Contract is all work must be done and material furnished in accordance with generally accepted practice, and in the event of any discrepancies between separate Contract Documents, priority of interpretation defined under "Contract Documents" shall govern. In the event of a remaining doubt as to meaning and intent of any portion of Contract, Specifications, or Drawings, Architect/Engineer shall define which is intended to apply to Work.

GC-29. DELETED

GC-30. PROTECTION AGAINST ACCIDENT TO EMPLOYEES AND THE PUBLIC

Contractor shall take out and procure a policy of worker compensation with an insurance company licensed to transact business in the State of Texas, which policy shall comply with Workman's Compensation Law of the State of Texas. Contractor shall always exercise reasonable precautions for the safety of employees and others on/near Work and comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes. All machinery, equipment, and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America except where incompatible with Federal, State, or Municipal laws or regulations. Contractor, sureties, and insurance carriers shall defend, indemnify, and save harmless Owner and all officers, agents, employees, Architect/Engineer, agents, and employees from all suits, actions, or claims of any character, name, and description brought for or on account of any injuries or damages received or sustained by any persons/property, on account of any negligent act or fault of Contractor or any subcontractor, agents, or employees, in execution and supervision of said Contract and Project of this Contract or on account of Contractor or any subcontractor failure to provide necessary

barricades, warning lights, or signs, and will be required to pay any judgment with costs obtained against Owner or any officers, agents, or employees, and/or Architect/Engineer, agents, and/or employees.

Safety precautions taken shall be sole responsibility and discretion of Contractor, as an independent contractor; inclusion of this paragraph in Contract, as well as any notice given by Owner, Architect/Engineer, or representatives concerning omissions under this article as Work progresses, are intended only as reminders to Contractor of duty and not construed as any assumption of duty to supervise safety precautions by Owner or Architect/Engineer.

GC-31. CONTRACTOR INSURANCE

Contractor shall procure and carry, at sole cost and expense, throughout life of Contract, insurance protection as hereinafter specified. All Insurance shall name Owner and Architect/Engineer as additional insureds except Worker's Compensation and Employer Liability Insurance. Such insurance shall be carried with an insurance company licensed to transact business in the State of Texas and cover all operations in connection with this Contract. Contractor insurance shall cover self and, at minimum, all subcontractors and sub-subcontractors. All other sublevels of contractors shall provide copies of proof of insurance if not covered by General Contractor.

Contractor shall provide a Waiver of Subrogation in favor of City of Midland and Parkhill on Worker's Compensation, Employer Liability Insurance, Contractor's Public Liability, Property Damage Liability Insurance, and Automobile Insurance.

a. Worker's Compensation and Employer Liability Insurance: As required by statute, covering all employees employed on Work whether employed by Contractor or subcontractor.
b. Contractor's Public Liability and Property Damage Liability Insurance: Providing for a limit not less than $1,000,000.00 for all damages arising out of bodily injuries to or death of one person, and subject to that limit for each person, a total limit of $1,000,000.00 for all damages arising out of bodily injuries to or death of two or more persons in any one accident, and regular Contractor's Property Damage Liability Insurance providing for a limit of not less than $1,000,000.00 for all damages arising out of injury to or destruction of property in any one accident, and subject to that limit per accident, a total (or aggregate) limit of $2,000,000.00 for all damages arising out of injury to or destruction of property during policy period.
c. Automobile Insurance: Providing a limit not less than $1,000,000.00 for injuries, including accidental death, to any one person and, subject to same limit for each person a total limit of $2,000,000.00 on account of one accident, and automobile property damage insurance in an amount not less than $500,000.00.
d. Proof of Insurance Carriage: Before work on any contract or subcontract, each Contractor and subcontractor shall submit to Owner for approval, six certificates covering each insurance policy carried and offered as evidence of compliance with requirements, signed by an authorized representative of the insurance company, setting forth:
    1. Name and address of insured;
    2. Location of operations to which insurance applies;
    3. Number of policy and type(s) of insurance in force thereunder on date borne by such certificate;
    4. Expiration date of policy and limit(s) of liability thereunder on date borne by such certificate;
    5. Statement that insurance of type afforded by policy, applied to all operations of whatever character, undertaken by insured during performance of this Contract, provided such operations are required in performance of Contract; and

6. Provision that policy may be cancelled only by mailing written notice to named insured at address shown in this policy stating when, not less than 10 days thereafter, cancellation of such policy shall be effective, with copy to Owner of letter of intent.

GC-32. TIME FOR COMPLETION AND LIQUIDATED DAMAGES

It is hereby understood and mutually agreed by and between Contractor and Owner, date of beginning and time for completion as specified in Contract of Work to be done hereunder, are ESSENTIAL CONDITIONS of this Contract; and further mutually understood and agreed Work embraced in this Contract shall be commenced on a date to be specified in "Notice to Proceed."

Contractor agrees said Work shall be prosecuted regularly, diligently, and uninterruptedly at such rate of progress as will ensure full completion thereof within time specified. It is expressly understood and agreed, by and between Contractor and Owner, time for completion of Work described herein is a reasonable time for completion of same, taking into consideration average climatic range and usual industrial conditions prevailing in this locality.

If said Contractor shall neglect, fail, or refuse to complete Work within time herein specified, or any proper extension thereof granted by Owner, Contractor does hereby agree, as a part consideration for awarding this Contract, to pay to Owner amount specified in Contract, not as a penalty but as liquidated damages for such breach of contract as hereinafter set forth, for each calendar day Contractor shall be in default after time stipulated in Contract for completing Work.

Said amount is fixed and agreed upon by and between Contractor and Owner because of impracticability and extreme difficulty of fixing and ascertaining actual damages Owner would in such event sustain, and said amount is agreed to be amount of damages Owner would sustain and said amount retained as necessary by Owner from current periodical estimates.

It is further agreed time is of the essence of every portion of this Contract and Specifications wherein a definite and certain length of time is fixed for performance of any act whatsoever; and where under Contract an additional time is allowed for completion of any work, new time limit fixed by such extension shall be of the essence of this Contract. Provided, Contractor shall not be charged with liquidated damages or any excess cost when Owner determines Contractor is without fault and Contractor's reasons for time extension are acceptable to Owner; Provided, further, Contractor shall not be charged with liquidated damages of any excess cost when delay in completion of Work is due:

a. To any preference, priority, or allocation order duly issued by the Government;
b. To unforeseeable cause beyond Contractor control and without fault or negligence including but not restricted to acts of God or public enemy, acts of Owner, acts of another Contractor in performance of contract with Owner, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and severe weather; and
c. To any delays of subcontractors/suppliers occasioned by any cause specified in (a) and (b) of this article:

Provided further, Contractor shall, within 10 days from beginning of such delay, unless Owner shall grant a further time prior to date of final settlement of Contract, notify Owner in writing of causes of delay, who shall ascertain facts and extent of delay and notify Contractor within a reasonable time of decision in the matter.

GC-33. PRICE FOR WORK

In consideration of furnishing all necessary labor, equipment, and material and completion of all Work by Contractor, and on delivery of all material embraced in this Contract in full conformity with Specifications and stipulations herein contained, Owner agrees to pay Contractor prices set forth in Proposal hereto attached, made a part of this Contract, and Contractor hereby agrees to receive such prices in full for furnishing all material and labor required for aforesaid Work, also for all expenses incurred, and well and truly performing same and whole thereof in the manner and according to this Contract, Specifications, Drawings, and requirements of Architect/Engineer.

GC-34. BONDS

It is further agreed by parties to this Contract that Contractor will execute bonds in sum of 100 percent of total contract price for satisfactory performance of Work and payment of all labor, materials, and equipment in accordance with this Contract on forms provided for this purpose, executed by an approved surety company authorized to do business in the State of Texas, and agreed this Contract shall not be in effect until such bonds are furnished and approved by Owner. Performance and Payment Bonds shall comply with Chapter 2253 of the Texas Government Code.

GC-35. LOSSES FROM NATURAL CAUSES

Unless otherwise specified, all loss or damage to Contractor arising out of the nature of Work to be done, action of elements, any unforeseen circumstances in prosecution of same, or unusual obstructions/difficulties encountered in prosecution of Work, shall be sustained and borne by Contractor at own expense.

GC-36. PROTECTION OF ADJOINING PROPERTY

Said Contractor shall take proper means to protect adjacent/adjoining property/properties, in any way encountered, which might be injured/seriously affected by any process of construction undertaken under this Contract, from any damage/injury by reason of said process of construction; and shall be liable for any/all claims for such damage on account of failure to fully protect all adjoining property. Contractor agrees to indemnify, save, and hold harmless Owner against any claim(s) for damages due to any injury to any adjacent or adjoining property, arising/growing out of performance of Contract, but any such indemnity shall not apply to any claim of any kind arising out of existence or character of Work.

GC-37. PROTECTION AGAINST SUBCONTRACTOR, LABORER, MATERIALMEN AND FURNISHER OF MACHINERY, EQUIPMENT, AND SUPPLY CLAIMS

Contractor agrees to indemnify and save Owner harmless from all claims growing out of lawful demands of subcontractors, laborers, workmen, mechanics, materialmen, and furnishers of machinery and parts thereof, equipment, power tools, and all supplies, including commissary, incurred in furthering the performance of this Contract. When so desired by Owner, Contractor shall furnish satisfactory evidence that all obligations of nature herein designated, have been paid, discharged, or waived. If Contractor fails, Owner may, at Contractor option, pay directly any unpaid bills, of which Owner has written notice, or withhold from Contractor's unpaid compensation a sum of money deemed reasonably sufficient to liquidate any/all such lawful claims until satisfactory evidence is furnished that all liabilities were fully discharged, whereupon payments to Contractor shall be resumed in full, in accordance with terms of this Contract, but in no event shall provisions of this article be construed to impose any obligations upon Owner by either Contractor or surety.

GC-38. PROTECTION AGAINST ROYALTIES OR PATENTED INVENTION

Contractor shall pay all royalties and license fees and provide use of any design, device, material, or process covered by letters patent or copyright by suitable legal contract with patentee/owner. Contractor shall defend all suits/claims for infringement of any patent/copyrights and indemnify and save Owner harmless from any loss on account thereof, except Owner shall defend all such suits and claims and be responsible for all such loss when a particular design, device, material, or process/product of a particular

manufacturer is specified/required by Owner provided; however, if choice of alternate design, device, material, or process is allowed, Contractor shall indemnify and save Owner harmless from any loss on account of thereof. If material/process specified/required by Owner is an infringement, Contractor shall be responsible for such loss unless promptly giving such information to Owner.

GC-39. LAWS AND ORDINANCES

Contractor shall always observe and comply with all Federal, State, and local laws, ordinances, and regulations, which affect Contractor Work, and indemnify and save harmless Owner against any claims arising from violation of any such laws, ordinances, and regulations by Contractor or employees, except where such violations are called for by provisions of Contract Documents. If Plans and Specifications are at variance therewith, Contractor shall promptly notify Architect/Engineer in writing, and any necessary changes be adjusted as provided in Contract for changes in Work. If Contractor performs any work knowing it to be contrary to such laws, ordinances, rules, regulations, and without such notice to Architect/Engineer, Contractor shall bear all costs arising therefrom. In case Owner is a body politic and corporate law deriving powers, insofar as same regulates objects for which, in manner in which, or conditions under which Owner may enter into contract, shall be controlling, and considered as part of this Contract, to same effect as though embodied herein.

GC-40. ASSIGNMENT AND SUBLETTING

Contractor further agrees to retain personal control and give personal attention to fulfillment of Contract and not assign by Power of Attorney, or otherwise, or sublet said Contract without written consent of Owner, and no part or feature of Work will be sublet to anyone objectionable to Architect/Engineer or Owner. Contractor further agrees subletting of any portion/feature of Work or materials required in performance of this Contract, shall not relieve Contractor from full obligations to Owner, as provided by this Contract.

GC-41. TIME AND ORDER OF COMPLETION

It is the meaning and intent of this Contract, unless otherwise herein specifically provided, Contractor be allowed to prosecute Work at such times and sessions, in such order of precedence and manner most conducive to economy of construction provided; however, order and time of prosecution shall be such that Work shall be substantially completed as a whole or in part, in accordance with this Contract, Plans, and Specifications, and within time of completion designated in proposal; provided also, when Owner is having other work done, by Contract or his own force, Architect/Engineer may direct time and manner of constructing Work done under this Contract so conflict will be avoided and construction of various works done for Owner shall be harmonized.

Contractor shall submit, at such times reasonably requested by Architect/Engineer, schedules to show order in which Contractor proposes to carry on Work, with dates at which Contractor will start several parts of Work and estimated dates of completion of several parts.

GC-42. EXTENSION OF TIME

Should Contractor be delayed in completion of Work by any act/neglect of Owner, Architect/Engineer, any employee of either, other contractors employed by Owner, changes ordered in Work, strikes, lockouts, fires, and unusual delays by common carriers, unavoidable cause(s) beyond Contractor's control, or any cause which Architect/Engineer decides justifies delay, an extension of time shall be allowed for completing Work, sufficient to compensate for delay, amount of extension determined by Architect/Engineer, provided, however, Contractor shall give Architect/Engineer prompt notice in writing of cause of such delay.

GC-43. HINDRANCES AND DELAYS

No claims shall be made by Contractor for damages resulting from hindrances/delays from any cause (except where Work is stopped by order of Owner for own convenience) during progress of any portion of Work embraced in this Contract. In case said Work shall be stopped by act of Owner, such expense as in judgment of Architect/Engineer is caused by such stoppage of said Work shall be paid by Owner to Contractor.

GC-44. QUANTITIES AND MEASUREMENTS

No extra or customary measurements of any kind allowed, but actual measured and/or computed length, area, solid contents, number, and weight only considered, unless otherwise specifically provided.

GC-45. ESTIMATED QUANTITIES

This Contract, including Specifications, Plans, and estimate, is intended to clearly show all Work to be done and material furnished hereunder. Where estimated quantities are shown for various classes of work to be done and material furnished under this Contract, they are approximate, used only as a basis for estimating probable cost of Work, and comparing proposals offered for Work. It is understood and agreed the actual amount of Work to be done and material furnished under this Contract may differ somewhat from these estimates, and where basis for payment under this Contract is unit price method, payment shall be for actual amount of such work done and material furnished.

Where payment is based on unit price method, Contractor agrees to make no claim for damages, anticipated profits, or otherwise on account of any differences found between quantities of Work actually done, material actually furnished under this Contract, and estimated quantities contemplated and contained in proposal; provided, however, where actual quantity of any major item in this Contract is an estimated quantity and actual quantity of such "major item" varies more than 25 percent above or below estimated quantity stated in this Contract, an equitable adjustment in Contract price shall be made upon demand of either party. Equitable adjustment shall be based upon any increase/decrease in costs due solely to variation above 125 percent or below 75 percent of estimated quantity.

"Major Item" shall be any individual bid item included in proposal with a total cost equal to or greater than 10 percent of total Contract cost, computed on basis of original bid proposal, quantities, and Contract unit prices.

Any revised consideration is to be determined by agreement between parties, otherwise by terms of this Contract, as provided under "Extra Work."

GC-46. PARTIAL PAYMENTS

On/before the last day of each month, Contractor shall prepare for Architect/Engineer review, a statement showing, as completely as practicable, total value of Work done by Contractor for prior month/period. Statement shall also include value of all sound materials delivered on site of Work to be fabricated into Work. Architect/Engineer, after approval, shall submit Contractor's partial pay application to Owner.

Owner shall then pay Contractor total amount of Architect/Engineer's statement, less 5 percent of amount thereof, which 5 percent shall be retained until final payment, and further less all previous payments and all further sums may be retained by Owner under terms of this Contract. It is understood; however, in case whole Work be near to completion and some unexpected and unusual delay occurs due to no fault or neglect on part of Contractor, Owner may, upon Architect/Engineer written recommendation, pay a reasonable and equitable portion of retained percentage to Contractor; or Contractor, at Owner's option, may be relieved of obligation to fully complete Work, and thereupon, Contractor shall receive payment of balance due under Contract subject only to conditions stated under "Final Payment."

GC-47. USE OF COMPLETED PORTIONS

Owner shall have the right to take possession of and use any completed/partially completed portions of Work, notwithstanding time for completing entire work or such portions may not have expired but such taking possession and use shall not be deemed an acceptance of any work not completed in accordance with Contract Documents. If such prior use increases cost of or delays Work, Contractor shall be entitled to such extra compensation, or extension of time, or both, as Architect/Engineer determines.

GC-48. FINAL COMPLETION AND ACCEPTANCE

Within 20 days after Contractor gives Architect/Engineer written notice that Work is complete, Architect/Engineer and Owner shall inspect Work and within said time, if Work is completed in accordance with Contract Documents, Architect/Engineer shall issue to Owner and Contractor a Certificate of Completion, and thereupon it shall be duty of Owner, within 10 days, to issue a Certificate of Acceptance of Work to Contractor.

GC-49. FINAL PAYMENT

Upon issuance of Certificate of Completion, Architect/Engineer shall proceed to make final measurements and prepare final statement of value of all Work performed and materials furnished under terms of Contract and certify same to Owner, who shall pay Contractor on/before the 20th day after date of Certificate of Completion, or if governmental financial assistance is involved, within 30 working days of receipt of Final Payment from applicable governmental authority, balance due Contractor under terms of this Contract, provided full performance of contractual obligations under terms of this Contract; and said payment shall become due in any event upon said performance by Contractor. Neither Certificate of Acceptance, final payment, nor any provision in Contract Documents, shall relieve Contractor of obligation for fulfillment of any warranty required in Special Provisions of Specifications.

GC-50. PAYMENT WITHHELD

Owner may, on account of subsequently discovered evidence, withhold/nullify whole/part of any certificate to such extent as necessary for protection from loss on account of:

a. Defective work not remedied;
b. Claims filed or reasonable evidence indicating possible filing of claims;
c. Contractor failure to make payments properly to subcontractors, for material, or labor; and/or
d. Damage to another contractor.

When grounds removed or Contractor provides a Surety Bond satisfactory to Owner to protect Owner in amount withheld, payment shall be made for amounts withheld because of them.

GC-51. DELAYED PAYMENTS

Should Owner fail to pay Contractor of sum named in any partial/final statement, when payment is due, or Architect/Engineer fails to issue any statement on/before date provided, Owner shall pay Contractor, in addition to sum shown as due by such statement, interest thereon at the rate of 6 percent per annum, unless otherwise specified, from date due as provided under "Partial Payments" and "Final Payments," until fully paid, fully liquidating any injury to Contractor growing out of such delay in payment, but right is expressly reserved to Contractor in the event payments not promptly made as provided under "Partial Payments," to at any time thereafter treat Contract as abandoned by Owner and recover compensation, as provided under "Abandonment of Contract," unless such payments are withheld in accordance with provisions of "Payments Withheld."

GC-52. EXTRA WORK

"Extra Work," as used in this Contract, shall mean/include all Work required by Architect/Engineer or Owner done by Contractor to accomplish any change, alteration, or addition to Work

shown upon Plans, or reasonably implied by Specifications, and not covered by Contractor's Proposal, except as provided under "Changes and Alterations" herein.

It is agreed Contractor shall perform all Extra Work under Architect/Engineer direction when presented with a written Extra Work Order signed by Architect/Engineer, subject, however, to right of Contractor to require a written confirmation of such Extra Work Order by Owner. It is also agreed compensation to be paid Contractor for performing said Extra Work shall be determined by one or more of the following methods:

Method A - By agreed unit prices; or
Method B - By agreed lump sum; or
Method C - If neither Methods A nor B are agreed upon before Extra Work is commenced, Contractor shall be paid "actual field cost" of Work, plus 15 percent.

In the event said Extra Work be performed and paid for under Method C, provisions of this Article shall apply and "actual field cost" defined to include cost of all workmen such as foremen, timekeepers, mechanics, and laborers, and materials, supplies, teams, trucks, rentals on machinery and equipment, for time actually employed/used on such Extra Work, plus actual transportation charges necessarily incurred, together with all expenses incurred directly on account of such Extra Work, including Social Security, Old Age Benefits, Maintenance Bonds, Public Liability and Property Damage, Workmen's Compensation, and all other insurance as required by any law/ordinance, or directed by Architect/Engineer or Owner, or by them agreed to. Architect/Engineer may direct form in which accounts of "actual field cost" shall be kept and records of these accounts made available to Architect/Engineer. Architect/Engineer may also specify in writing, before Work commences, method of doing Work as well as type and kind of machinery and equipment to be used; otherwise, these matters determined by Contractor. Unless otherwise agreed upon, prices for use of machinery and equipment shall be determined by using 100 percent, unless otherwise specified, of the latest schedule of Equipment Ownership Expense adopted by the Associated General Contractors of America. Where practicable, terms and prices for use of machinery and equipment shall be incorporated in Written Extra Work Order. The 15 percent of "actual field cost" paid Contractor, shall cover and compensate profit, overhead, general superintendence and field office expense, and all other elements of cost and expense not embraced within "actual field cost" as herein defined, save that where Contractor's Camp or Field Office must be maintained primarily on account of such Extra Work, then cost to maintain and operate same shall be included in "actual field cost."

No claim for Extra Work of any kind allowed unless Architect/Engineer orders in writing. In case any oral/written orders/instructions appear to Contractor to involve Extra Work for which compensation or adjustment in construction time should be received, Contractor shall make written request to Architect/Engineer for written order authorizing such Extra Work. Should a difference of opinion arise as to what does/does not constitute Extra Work, or as to payment therefor, and Architect/Engineer insists upon performance, Contractor shall proceed with Work after making written request for written order and keep an accurate account of "actual field cost" thereof, as provided under Method C. Contractor will thereby preserve right to submit matter of payment by filing a claim as herein provided.

GC-53. TIME OF FILING CLAIMS

It is further agreed by both parties hereto, all questions of dispute/adjustment presented by Contractor shall be in writing and filed with Architect/Engineer within 15 days after Architect/Engineer gives any directions, order, or instruction to which Contractor desires to take exception. Architect/Engineer shall reply to such written exceptions by Contractor and render a final decision in writing. In case Contractor should appeal from Architect/Engineer's decision, appeal shall be filed with Architect/Engineer and Owner in writing within 10 days after date of delivery to Contractor of Architect/Engineer's final decision. It is further agreed Final Acceptance of Work by Owner and acceptance by Contractor of Final Payment, shall be a bar to any claim by either party, except as noted otherwise in Contract Documents.

GC-54. DELETED

GC-55. ABANDONMENT BY CONTRACTOR

In case Contractor should abandon and fail/refuse to resume work within 10 days after written notification from Owner or Architect/Engineer, or Contractor fails to comply with Architect/Engineer orders, when such orders are consistent with Contract Documents, then if where a Performance Bond exists, Surety on Bond shall be notified in writing and directed to complete Work, and a copy of said notice be delivered to Contractor.

After receiving said notice of abandonment, Contractor shall not remove from Work any machinery, equipment, tools, materials, or supplies on the job, but same, together with any materials and equipment under contract for Work, may be held for use on Work by Owner or Surety on construction bond, or another contractor in completion of Work; and Contractor shall not receive any rental/credit therefor (except when used in connection with Extra Work, where credit allowed as provided for under "Extra Work"), it understood use of such equipment and materials will ultimately reduce cost to complete Work and reflected in final settlement.

If no Performance Bond provided or Surety should fail to commence compliance with notice for completion herein provided for, within 10 days after service of such notice, Owner may provide for completion of Work in either of the following elective manners:

a. Owner may thereupon employ such force of men and use such machinery, equipment, tools, materials, and supplies as Owner deems necessary to complete Work and charge expense of such labor, machinery, equipment, tools, materials, and supplies to Contractor, and expense charged shall be deducted and paid by Owner out of such moneys due or may thereafter any time become due to Contractor under and by virtue of this Contract. In case such expense is less than sum payable under this Contract, if same had been completed by Contractor, then Contractor shall receive the difference. In case such expense is greater than sum payable under this Contract, if same completed by said Contractor, then Contractor and/or Surety shall pay amount of such excess to Owner; or

b. Owner under sealed bids, after five days' notice, published one or more times in a newspaper having general circulation in county of location of Work, may let Contract for completion of Work under substantially same terms and conditions provided in this Contract. In case of any increase in cost to Owner under new contract as compared to what would have been cost under this Contract, such increase shall be charged to Contractor and Surety shall remain bound therefor. However, should cost to complete any such new contract prove less than cost to complete under this Contract, Contractor and/or Surety shall be credited therewith.

When Work shall have been Substantially Completed, Contractor and Surety shall be so notified and Certificates of Completion and Acceptance, as provided herein, issued. Complete itemized statement of Contract accounts, certified to by Architect/Engineer as correct, shall then be prepared and delivered to Contractor and Surety, whereupon Contractor and/or Surety, or Owner as case may be, shall pay balance due as reflected by said statement, within 15 days after date of such Certificate of Completion.

In the event statement of accounts shows cost to complete Work is less cost to Owner, had Work been completed by Contractor under terms of this Contract; or when Contractor and/or Surety shall pay balance shown due by them to Owner, then all machinery, equipment, tools, materials, or supplies left on site of Work shall be turned over to Contractor and/or Surety. Should cost to complete Work exceed Contract price and Contractor and/or his Surety fail to pay amount due Owner within time designated herein, and there remains any machinery, equipment, tools, materials, or supplies on site of Work, notice thereof, together with an itemized list of such equipment and materials shall be mailed to Contractor and Surety at respective addresses designated in this Contract, provided; however, actual written notice given

in any manner will satisfy this condition. After mailing or other giving of such notice, such property shall be held at risk of Contractor and Surety subject only to duty of Owner to exercise ordinary care to protect such property. After 15 days from date of said notice, Owner may sell such machinery, equipment, tools, materials, or supplies and apply net sum derived from such sale to credit of Contractor and Surety. Such sale may be made at public/private sale, with/without notice, as Owner elects. Owner shall release any machinery, equipment, tools, materials, or supplies, which remain on Work, and belong to persons other than Contractor or Surety, to proper owners. Books on all operations provided herein shall be open to Contractor and Surety.

GC-56. ABANDONMENT BY OWNER

In case Owner shall fail to comply with Contract terms and fail/refuse to comply with said terms within 10 days after written notification by Contractor, Contractor may suspend/wholly abandon Work and remove therefrom all machinery, tools, equipment, and all materials on site of work not included in payments to Contractor and have not been wrought into Work. And thereupon Architect/Engineer shall make an estimate of total amount earned by Contractor, which estimate shall include value of all Work actually completed by said Contractor (at prices stated in attached proposal where unit prices are used), value of all partially completed Work at a fair and equitable price, and amount of all Extra Work performed at prices agreed upon, or provided for by terms of this Contract, and a reasonable sum to cover cost of any provisions made by Contractor to carry whole work to completion and which cannot be utilized. Architect/Engineer shall then make a final statement of balance due Contractor by deducting from estimates all previous payments by Owner and other sums retained by Owner under terms of this Contract and certify same to Owner who shall pay to Contractor on or before 30 days after date of notification by Contractor, balance shown by said final statement as due Contractor, under terms of this Agreement.

PACKET 10.87 July 11, 2023

FEDERAL CONTRACT PROVISIONS

FAA
Airports

Contract Provision Guidelines for Obligated Sponsors and Airport Improvement Program Projects

(Issued on January 20, 2023)

ACCESS TO RECORDS AND REPORTS

Contractor must maintain an acceptable cost accounting system. Contractor agrees to provide Owner, the Federal Aviation Administration (FAA) and the Comptroller General of the United States or any of their duly authorized representatives access to any books, documents, papers and records of Contractor which are directly pertinent to the specific contract for the purpose of making audit, examination, excerpts and transcriptions. Contractor agrees to maintain all books, records and reports required under this contract for a period of not less than three years after final payment is made and all pending matters are closed.

NOTICE OF REQUIREMENT FOR AFFIRMATIVE ACTION TO ENSURE EQUAL EMPLOYMENT OPPORTUNITY

1. Offeror's or Bidder's attention is called to the "Equal Opportunity Clause" and "Standard Federal Equal Employment Opportunity Construction Contract Specifications" set forth herein.

2. Goals and timetables for minority and female participation, expressed in percentage terms for Contractor's aggregate workforce in each trade on all construction work in covered area, are as follows:

Timetables

Goals for minority participation for each trade:	19.1%
Goals for female participation in each trade:	6.9%

These goals are applicable to all of Contractor's construction work (whether or not it is Federal or federally assisted) performed in the covered area. If Contractor performs construction work in a geographical area located outside of the covered area, it shall apply the goals established for such geographical area where the work is actually performed. With regard to this second area, Contractor also is subject to the goals for both its federally involved and nonfederally involved construction.

Contractor's compliance with the Executive Order and the regulations in 41 CFR Part 60-4 shall be based on its implementation of the Equal Opportunity Clause, specific affirmative action obligations required by the specifications set forth in 41 CFR 60-4.3(a) and its efforts to meet the goals. The hours of minority and female employment and training must be substantially uniform throughout the length of the contract, and in each trade, and Contractor shall make a good faith effort to employ minorities and women evenly on each of its projects. The transfer of minority or female employees or trainees from Contractor to Contractor or from project to project for the sole purpose of meeting Contractor's goals shall be a violation

of the contract, the Executive Order and the regulations in 41 CFR Part 60-4. Compliance with the goals will be measured against the total work hours performed.

3. Contractor shall provide written notification to the Director of the Office of Federal Contract Compliance Programs (OFCCP) within 10 working days of award of any construction subcontract in excess of $10,000 at any tier for construction work under the contract resulting from this solicitation. The notification shall list the name, address, and telephone number of the subcontractor; employer identification number of the subcontractor; estimated dollar amount of the subcontract; estimated starting and completion dates of the subcontract; and the geographical area in which the subcontract is to be performed.

4. As used in this notice and in the contract resulting from this solicitation, the "covered area" is Midland County and the City of Midland, Texas.

BREACH OF CONTRACT TERMS

Any violation or breach of terms of this contract on the part of Contractor or its subcontractors may result in the suspension or termination of this contract or such other action that may be necessary to enforce the rights of the parties of this agreement.

Owner will provide *Contractor* written notice that describes the nature of the breach and corrective actions Contractor must undertake in order to avoid termination of the contract. Owner reserves the right to withhold payments to Contractor until such time Contractor corrects the breach or Owner elects to terminate the contract. Owner's notice will identify a specific date by which Contractor must correct the breach. Owner may proceed with termination of the contract if Contractor fails to correct the breach by the deadline indicated in Owner's notice.

The duties and obligations imposed by the Contract Documents and the rights and remedies available thereunder are in addition to, and not a limitation of, any duties, obligations, rights and remedies otherwise imposed or available by law.

BUY AMERICAN PREFERENCE

SOURCE

Title 49 USC § 50101

Executive Order 14005, *Ensuring the Future is Made in All of America by All of America's Workers*

Bipartisan Infrastructure Law (Pub. L. No. 117-58), Build America, Buy America (BABA)

APPLICABILITY

Buy American Preference incorporates statutory requirements and policies outlined in the in 49 USC §50101, Executive Order 14005, and BABA.

Section 50101 of 49 USC requires that all steel and manufactured goods used on AIP projects be produced in the United States. This section also gives FAA the ability to issue a waiver to a Sponsor to use non-domestic material on an AIP funded project subject to meeting certain conditions. A Sponsor may request that FAA issue a waiver from the Buy American Preference requirements if FAA finds that:

1) Applying the provision is not in the public interest.
2) Steel or manufactured goods are not available in sufficient quantity or quality in the United States.
3) Cost of components and subcomponents produced in the United States is more than 60 % of the total components of a facility or equipment, and final assembly has taken place in the United States. Items that have an FAA standard specification item number (such as specific airport lighting equipment) are considered the equipment.
4) Applying this provision would increase the cost of the overall project by more than 25 %.

Executive Order 14005 advances the Administration's priority to use terms and conditions of Federal financial assistance awards to maximize the use of goods, products, and materials produced in, and services offered in, the United States. The Order directs, to the extent appropriate and consistent with applicable law, agencies shall partner with the Hollings Manufacturing Extension Partnership (MEP) to conduct supplier scouting to identify American companies that are able to produce goods, products, and materials in the United States that meet Federal procurement needs, prior to consideration of using non-domestic products.

The Bipartisan Infrastructure Law, Build America, Buy America (BABA) Act strengthens Made in America Laws and bolsters America's industrial base, protects national security, and supports high-paying jobs. Under BABA, iron, steel, and certain construction materials are required to be 100% produced in the United States.

Under the Bipartisan Infrastructure Law (Pub. L. No. 117-58) BABA three waivers are available for iron and steel, manufactured products, and construction materials when a Federal agency finds that –

1) Applying the domestic content procurement preference would be inconsistent with the public interest (a "public interest waiver");
2) Types of iron, steel, manufactured products, or construction materials are not produced in the United States in sufficient and reasonably available quantities or of a satisfactory quality (a "nonavailability waiver"); or
3) Inclusion of iron, steel, manufactured products, or construction materials produced in the United States will increase the cost of the overall project by more than 25 % (an "unreasonable cost waiver").

BABA defines construction materials, items that are or consists primarily of non-ferrous metals, plastic and polymer-based products (including polyvinylchloride, composite building materials, and polymers used in fiber optic cables), glass (including optic glass), lumber or drywall.

Items that consist of two or more of the aforementioned materials that have been combined together through a manufacturing process, and items that include at least one of the listed materials combined with a material that is not listed through a manufacturing process, should be treated as manufactured products, rather than as construction materials. For example, a plastic framed sliding window should be treated as a manufactured product while plate glass should be treated as a construction material**.**

Buy America Preference requirements flow down from Sponsor to first tier contractors, who are responsible for ensuring that lower tier contractors and subcontractors are also in compliance.

Note: Buy American Preference does not apply to temporary equipment a contractor uses as a tool of its trade and which does not remain as part of the project.

Required Documentation

FAA Buy American Requests. All applications (requests) for an FAA Buy American Preference Waiver includes, at minimum, a completed Content Percentage Worksheet and Final Assembly Questionnaire. Additional information may be requested from Applicant by FAA. Airport Sponsors, consultants, construction contractors, or equipment manufacturers are responsible for completing and submitting waiver applications. FAA is unable to make a determination on waiver requests with incomplete information. Sponsors must confirm with Bidder or offeror to assess the adequacy of the waiver request and associated information prior to forwarding a waiver request to FAA for action. All FAA waivers forms are available from FAA Buy American Requirements webpage.

Proprietary Confidentiality. Exemption 4 of the Freedom of Information Act protects "trade secrets and commercial or financial information obtained from a person that is privileged or confidential. Proprietary manufacturing and design information submitted to FAA for the purposes of receiving a Buy American Waiver shall not be disclosed outside FAA. FAA will provide a written notification to the Airport Sponsor, manufacturer(s), contractor(s) or supplier(s) when a waiver determination is complete.

Timing of Waiver Requests. Sponsors desiring a Type 2 waiver should submit their waiver request, with justification, *before* issuing a solicitation for bids or a request for proposal for a project.

Sponsor must submit a Type 2, Type 3, or Type 4 waiver request *prior* to executing the contract. FAA will generally not consider waiver requests after execution of the contract except where extraordinary and extenuating circumstances exist.

Buy American Notice of Determination (NOD) Process. FAA Reauthorization Act of 2018 requires that all approved waivers must be posted to FAA's website and remain posted for public comment for 10 days, before becoming effective. All FAA waivers must complete the NOD process. Sponsors are encouraged to wait until approved waivers become effective before executing AIP projects.

Buy American Conformance Lists. FAA Office of Airports maintains listings of projects and products that have received a waiver from the Buy American Preference requirements for project specific and nationwide use. Each of these conformance lists is available online at www.faa.gov/airports/aip/buy_american/. Products listed on FAA Nationwide Buy American Conformance list do not require additional submittal of domestic content information. Nationwide waivers expire five years from the date issued, unless revoked earlier by FAA.

Facility Waiver Requests. For construction of a facility, Sponsor may submit the waiver request after bid opening, but prior to contract execution. Examples of facility construction include terminal buildings, terminal renovation, and snow removal equipment buildings.

Contract Types –

Construction and Equipment – Sponsor must meet the Buy American Preference requirements of 49 USC § 50101 and BABA for all AIP funded projects that require materials that are or consists primarily of iron, steel or manufactured goods and construction materials.

Professional Services – Professional service agreements (PSAs) do not normally result in a deliverable that meets the definition of a manufactured product. However, the emergence of various project delivery methods has created situations where task deliverables under a PSA may include a manufactured product. If a PSA includes providing a manufactured good as a deliverable under the contract, Sponsor must include the Buy American Preference provision in the agreement.

Property – Most land transactions do not involve acquiring a manufactured product. However, under certain circumstances, a property acquisition project could result in the installation of a manufactured product. For example, the installation of property fencing, gates, doors and locks, etc. represent manufactured products acquired under an AIP funded land project that must comply with Buy American Preferences.

Use of Provisions – No mandatory language provided. The following language is acceptable to FAA and meets the intent of this requirement. If Sponsor uses different language, Sponsor's revised language must fully comply with 49 USC § 50101 and BABA.

There are two types of FAA Buy American certifications. Sponsor must incorporate the appropriate certifications of compliance with FAA Buy American Preference in the solicitation:

- **Construction Projects** involving the replacement, rehabilitation, reconstruction of airfield surfaces such as on runways, taxiways, taxilanes, aprons, roadways, parking lots, etc. – Insert the Certificate of compliance to FAA Buy American Preference based on Construction Projects.
- **Equipment and Buildings Projects** involving and including the acquisition of equipment such as snow removal equipment, navigational aids, wind cones, and the construction of buildings such as hangars, terminal development, lighting vaults, aircraft rescue & firefighting buildings, etc. - Insert the Certificate of Compliance with FAA Buy American Preference Based on Equipment/Building Projects.

MODEL SOLICITATION CLAUSES

Certification of Compliance with FAA Buy American Preference Statement

FAA BUY AMERICAN PREFERENCE

Contractor certifies that its bid/offer is in compliance with 49 USC § 50101, BABA and other related Made in America Laws,[1] U.S. statutes, guidance, and FAA policies, which provide that Federal funds may not be obligated unless all iron, steel and manufactured goods used in AIP funded projects are produced in the United States, unless FAA has issued a waiver for the product; the product is listed as an Excepted Article, Material Or Supply in Federal Acquisition Regulation subpart 25.108; or is included in FAA Nationwide Buy American Waivers Issued list.

Bidder or offeror must complete and submit the certification of compliance with FAA's Buy American Preference, BABA and Made in America laws included herein with their bid or offer. The Airport Sponsor/Owner will reject as nonresponsive any bid or offer that does not include a completed certification of compliance with FAA's Buy American Preference and BABA.

Bidder or offeror certifies that all constructions materials, defined to mean an article, material, or supply other than an item of primarily iron or steel; a manufactured product; cement and cementitious materials; aggregates such as stone, sand, or gravel; or aggregate binding agents or additives that are or consist primarily of: non-ferrous metals; plastic and polymer-based products (including polyvinylchloride, composite building materials, and polymers used in fiber optic cables); glass (including optic glass); lumber; or drywall used in the project are manufactured in the U.S.

[1] Per Executive Order 14005 "Made in America Laws" means all statutes, regulations, rules, and Executive Orders relating to federal financial assistance awards or federal procurement, including those that refer to "Buy America" or "Buy American," that require, or provide a preference for, the purchase or acquisition of goods, products, or materials produced in the United States, including iron, steel, and manufactured products offered in the United States.

Certification of Compliance with FAA Buy American Preference – Construction Projects

As a matter of bid responsiveness, bidder/offeror must complete, sign, date, and submit this certification statement with its proposal. Bidder/offeror must indicate how it intends to comply with 49 USC § 50101, BABA and other related Made in America Laws, U.S. statutes, guidance, and FAA policies, by selecting one of the following certification statements. These statements are mutually exclusive. Bidder must select one or the other (i.e., not both) by inserting a checkmark (✓) or "X."

☐ Bidder or offeror hereby certifies to comply with 49 USC § 50101, BABA and other related U.S. statutes, guidance, and policies of FAA by:

a) Only installing iron, steel and manufactured products produced in the United States;
b) Only installing construction materials defined as: an article, material, or supply – other than item of primarily iron or steel; manufactured product; cement and cementitious materials; aggregates such as stone, sand, or gravel; or aggregate binding agents or additives that are or consist primarily of non-ferrous metals; plastic and polymer-based products (including polyvinylchloride, composite building materials, and polymers used in fiber optic cables); glass (including optic glass); lumber or drywall manufactured in the United States.
c) Installing manufactured products for which FAA issued a waiver as indicated by inclusion on the current FAA Nationwide Buy American Waivers Issued listing; or
d) Installing products listed as an Excepted Article, Material or Supply in Federal Acquisition Regulation Subpart 25.108.

By selecting this certification statement, Bidder or offeror agrees:

a) To provide Airport Sponsor or FAA evidence to document source and origin of iron, steel, and/or manufactured product.
b) To faithfully comply with providing U.S. domestic products.
c) To refrain from seeking a waiver request after establishment of contract, unless extenuating circumstances emerge that FAA determines justified.
d) Certify that all construction materials used in the project are manufactured in the U.S.

☐ Bidder or offeror hereby certifies it cannot comply with 100% Buy American Preferences of 49 USC § 50101(a) but may qualify for a Type 3 or 4 waiver under 49 USC § 50101(b). By selecting this certification statement, apparent bidder or offeror with apparent low bid agrees:

a) To submit to Airport Sponsor or FAA within 15 calendar days of being selected as responsive bidder, a formal waiver request and required documentation that supports type of waiver requested.
b) Failure to submit the required documentation within the specified timeframe is cause for a non-responsive determination that may result in rejection of the proposal.
c) To faithfully comply with providing U.S. domestic products at or above the approved U.S. domestic content percentage as approved by FAA.
d) To furnish U.S. domestic product for any waiver request that FAA rejects.
e) To refrain from seeking a waiver request after establishment of the contract, unless extenuating circumstances emerge that FAA determines justified.

Required Documentation

Type 2 Waiver (Nonavailability) - Iron, steel, manufactured goods or construction materials or manufactured goods are not available in sufficient quantity or quality in the United States. The required documentation for the Nonavailability waiver is:

a) Completed Content Percentage Worksheet and Final Assembly Questionnaire
b) Record of thorough market research, consideration where appropriate of qualifying alternate items, products, or materials including;
c) A description of the market research activities and methods used to identify domestically manufactured items capable of satisfying the requirement, including the timing of the research and conclusions reached on the availability of sources.

Type 3 Waiver –Cost of components and subcomponents produced in the United States is more than 60% of cost of all components and subcomponents of "facility/project." Required documentation for a Type 3 waiver is:

a) Completed Content Percentage Worksheet and Final Assembly Questionnaire including;
b) Listing of all manufactured products that are not comprised of 100% U.S. domestic content (excludes products listed on FAA Nationwide Buy American Waivers Issued listing and products excluded by Federal Acquisition Regulation Subpart 25.108; products of unknown origin must be considered as non-domestic products in their entirety).
c) Cost of non-domestic components and subcomponents, excluding labor costs associated with final assembly and installation at project location.
d) Percentage of non-domestic component and subcomponent cost as compared to total "facility" component and subcomponent costs, excluding labor costs associated with final assembly and installation at project location.

Type 4 Waiver (Unreasonable Costs) - Applying this provision for iron, steel, manufactured goods or construction materials would increase the cost of the overall project by more than 25%. The required documentation for this waiver is:

a) A completed Content Percentage Worksheet and Final Assembly Questionnaire from
b) At minimum two comparable equal bids and/or offers;
c) Receipt or record that demonstrates that supplier scouting called for in Executive Order 14005, indicates that no domestic source exists for the project and/or component;
d) Completed waiver applications for each comparable bid and/or offer.

False Statements: Per 49 USC § 47126, this certification concerns a matter within the jurisdiction of FAA and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under Title 18, United States Code.

GENERAL CIVIL RIGHTS PROVISIONS

In all its activities within the scope of its airport program, Contractor agrees to comply with pertinent statutes, Executive Orders, and such rules as identified in Title VI List of Pertinent Nondiscrimination Acts and Authorities to ensure that no person shall, on the grounds of race, color, national origin (including limited English proficiency), creed, sex (including sexual orientation and gender identity), age, or disability be excluded from participating in any activity conducted with or benefiting from Federal assistance.

This provision is in addition to that required by Title VI of the Civil Rights Act of 1964.

Specific Clause that is used for General Contract Agreements

The above provision binds Contractor and subcontractors from the bid solicitation period through the completion of the contract.

Title VI Solicitation Notice:

Midland Air & Space Port (MAF), in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252, 42 USC §§ 2000d to 2000d-4) and the Regulations, hereby notifies all bidders or offerors that it will affirmatively ensure that for any contract entered into pursuant to this advertisement, [select businesses, or disadvantaged business enterprises or airport concession disadvantaged business enterprises] will be afforded full and fair opportunity to submit bids in response to this invitation and no businesses will be discriminated against on the grounds of race, color, national origin (including limited English proficiency), creed, sex (including sexual orientation and gender identity), age, or disability in consideration for an award.

Title VI List of Pertinent Nondiscrimination Acts and Authorities

Title VI List of Pertinent Nondiscrimination Acts and Authorities

During the performance of this contract, Contractor, for itself, its assignees, and successors in interest (hereinafter referred to as the "Contractor") agrees to comply with the following non-discrimination statutes and authorities; including but not limited to:

- Title VI of the Civil Rights Act of 1964 (42 USC § 2000d *et seq*., 78 stat. 252) (prohibits discrimination on the basis of race, color, national origin);
- 49 CFR part 21 (Non-discrimination in Federally-Assisted programs of the Department of Transportation—Effectuation of Title VI of the Civil Rights Act of 1964);
- The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, (42 USC § 4601) (prohibits unfair treatment of persons displaced or whose property has been acquired because of Federal or Federal-aid programs and projects);
- Section 504 of the Rehabilitation Act of 1973 (29 USC § 794 *et seq*.), as amended (prohibits discrimination on the basis of disability); and 49 CFR part 27 (Nondiscrimination on the Basis of Disability in Programs or Activities Receiving Federal Financial Assistance);
- Age Discrimination Act of 1975, as amended (42 USC § 6101 *et seq*.) (prohibits discrimination on the basis of age);
- Airport and Airway Improvement Act of 1982 (49 USC § 47123), as amended (prohibits discrimination based on race, creed, color, national origin, or sex);

- Civil Rights Restoration Act of 1987 (PL 100-259) (broadened the scope, coverage and applicability of Title VI of the Civil Rights Act of 1964, the Age Discrimination Act of 1975 and Section 504 of the Rehabilitation Act of 1973, by expanding the definition of the terms "programs or activities" to include all of the programs or activities of the Federal-aid recipients, sub-recipients and contractors, whether such programs or activities are Federally funded or not);
- Titles II and III of the Americans with Disabilities Act of 1990 (42 USC § 12101, et seq) (prohibit discrimination on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing entities) as implemented by U.S. Department of Transportation regulations at 49 CFR parts 37 and 38;
- FAA's Nondiscrimination statute (49 USC § 47123) (prohibits discrimination on the basis of race, color, national origin, and sex);
- Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations (ensures nondiscrimination against minority populations by discouraging programs, policies, and activities with disproportionately high and adverse human health or environmental effects on minority and low-income populations);
- Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency, and resulting agency guidance, national origin discrimination includes discrimination because of limited English proficiency (LEP). To ensure compliance with Title VI, you must take reasonable steps to ensure that LEP persons have meaningful access to your programs (70 Fed. Reg. 74087 (2005));
- Title IX of the Education Amendments of 1972, as amended, which prohibits you from discriminating because of sex in education programs or activities (20 USC § 1681, et seq).

Nondiscrimination Requirements/Title VI Clauses for Compliance

Compliance with Nondiscrimination Requirements:

During performance of this contract, Contractor, for itself, its assignees, and successors in interest (hereinafter referred to as the "Contractor"), agrees as follows:

1. **Compliance with Regulations:** Contractor (hereinafter includes consultants) will comply with the Title VI List of Pertinent Nondiscrimination Acts and Authorities, as they may be amended from time to time, which are herein incorporated by reference and made a part of this contract.
2. **Nondiscrimination:** Contractor, with regard to the work performed by it during the contract, will not discriminate on the grounds of race, color, national origin (including limited English proficiency), creed, sex (including sexual orientation and gender identity), age, or disability in the selection and retention of subcontractors, including procurements of materials and leases of equipment. Contractor will not participate directly or indirectly in the discrimination prohibited by the Nondiscrimination Acts and Authorities, including employment practices when the contract covers any activity, project, or program set forth in Appendix B of 49 CFR part 21.
3. **Solicitations for Subcontracts, including Procurements of Materials and Equipment:** In all solicitations, either by competitive bidding or negotiation made by Contractor for work to be performed under a subcontract, including procurements of materials, or leases of equipment, each potential subcontractor or supplier will be notified by Contractor of Contractor's obligations under this contract and the Nondiscrimination Acts and Authorities on the grounds of race, color, or national origin.

4. **Information and Reports:** Contractor will provide all information and reports required by the Acts, the Regulations, and directives issued pursuant thereto and will permit access to its books, records, accounts, other sources of information, and its facilities as may be determined by Sponsor or FAA to be pertinent to ascertain compliance with such Nondiscrimination Acts and Authorities and instructions. Where any information required of a contractor is in the exclusive possession of another who fails or refuses to furnish the information, Contractor will so certify to Sponsor or FAA, as appropriate, and will set forth what efforts it has made to obtain the information.
5. **Sanctions for Noncompliance:** In the event of a Contractor noncompliance with non-discrimination provisions of this contract, Sponsor will impose such contract sanctions as it or FAA may determine to be appropriate, including, but not limited to:
    a. Withholding payments to Contractor under the contract until Contractor complies; and/or
    b. Cancelling, terminating, or suspending a contract, in whole or in part.
6. **Incorporation of Provisions:** Contractor will include the provisions of paragraphs one through six in every subcontract, including procurements of materials and leases of equipment, unless exempt by the Acts, the Regulations, and directives issued pursuant thereto. Contractor will take action with respect to any subcontract or procurement as Sponsor or FAA may direct as a means of enforcing such provisions including sanctions for noncompliance. Provided, that if Contractor becomes involved in, or is threatened with litigation by a subcontractor, or supplier because of such direction, Contractor may request Sponsor to enter into any litigation to protect the interests of Sponsor. In addition, Contractor may request the United States to enter into litigation to protect interests of the United States.

CLEAN AIR AND WATER POLLUTION CONTROL

Contractor agrees to comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act (42 USC §§ 7401-7671q) and the Federal Water Pollution Control Act as amended (33 USC §§ 1251-1387). Contractor agrees to report any violation to Owner immediately upon discovery. Owner assumes responsibility for notifying the Environmental Protection Agency (EPA) and FAA.

Contractor must include this requirement in all subcontracts that exceed $150,000.

CONTRACT WORKHOURS AND SAFETY STANDARDS ACT REQUIREMENTS

1. Overtime Requirements.

No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic, including watchmen and guards, in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.

2. Violation; Liability for Unpaid Wages; Liquidated Damages.

In the event of any violation of the clause set forth in paragraph (1) of this clause, Contractor and any subcontractor responsible therefor shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in paragraph (1) of this clause, in the sum of $29 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in paragraph (1) of this clause.

3. Withholding for Unpaid Wages and Liquidated Damages.

FAA or Owner shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by Contractor or subcontractor under any such contract or any other Federal contract with the same prime contractor, or any other federally-assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime contractor, such sums as may be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in paragraph (2) of this clause.

4. Subcontractors.

Contractor or subcontractor shall insert in any subcontracts the clauses set forth in paragraphs (1) through (4) and also a clause requiring the subcontractor to include these clauses in any lower tier subcontracts. Prime Contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in paragraphs (1) through (4) of this clause.

COPELAND "ANTI-KICKBACK" ACT

Contractor must comply with the requirements of the Copeland "Anti-Kickback" Act (18 USC 874 and 40 USC 3145), as supplemented by Department of Labor regulation 29 CFR part 3. Contractor and subcontractors are prohibited from inducing, by any means, any person employed on the project to give up any part of the compensation to which the employee is entitled. Contractor and each Subcontractor must submit to Owner, a weekly statement on the wages paid to each employee performing on covered work during the prior week. Owner must report any violations of the Act to FAA.

DAVIS-BACON REQUIREMENTS

1. Minimum Wages.

(i) All laborers and mechanics employed or working upon the site of the work will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account (except such payroll deductions as are permitted by the Secretary of Labor under the Copeland Act (29 CFR Part 3)), the full amount of wages and bona fide fringe benefits (or cash equivalent thereof) due at time of payment computed at rates not less than those contained in the wage determination of the Secretary of

Labor which is attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between Contractor and such laborers and mechanics.

Contributions made or costs reasonably anticipated for bona fide fringe benefits under section 1(b)(2) of the Davis-Bacon Act on behalf of laborers or mechanics are considered wages paid to such laborers or mechanics, subject to the provisions of paragraph (1)(iv) of this section; also, regular contributions made or costs incurred for more than a weekly period (but not less often than quarterly) under plans, funds, or programs which cover the particular weekly period, are deemed to be constructively made or incurred during such weekly period. Such laborers and mechanics shall be paid the appropriate wage rate and fringe benefits on the wage determination for the classification of work actually performed, without regard to skill, except as provided in 29 CFR § 5.5(a)(4). Laborers or mechanics performing work in more than one classification may be compensated at the rate specified for each classification for the time actually worked therein: *Provided,* that the employer's payroll records accurately set forth the time spent in each classification in which work is performed. The wage determination (including any additional classification and wage rates conformed under (1)(ii) of this section) and the Davis-Bacon poster (WH-1321) shall be posted at all times by Contractor and its subcontractors at the site of the work in a prominent and accessible place where it can easily be seen by the workers.

(ii)(A) The contracting officer shall require that any class of laborers or mechanics, including helpers, which is not listed in the wage determination and which is to be employed under the contract shall be classified in conformance with the wage determination. The contracting officer shall approve an additional classification and wage rate and fringe benefits therefore only when the following criteria have been met:

(1) The work to be performed by the classification requested is not performed by a classification in the wage determination;

(2) The classification is utilized in the area by the construction industry; and

(3) The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage determination.

(B) If Contractor and the laborers and mechanics to be employed in the classification (if known), or their representatives, and the contracting officer agree on the classification and wage rate (including the amount designated for fringe benefits where appropriate), a report of the action taken shall be sent by the contracting officer to the Administrator of the Wage and Hour Division, U.S. Department of Labor, Washington, DC 20210. The Administrator, or an authorized representative, will approve, modify, or disapprove every additional classification action within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30-day period that additional time is necessary.

(C) In the event Contractor, the laborers, or mechanics to be employed in the classification, or their representatives, and the contracting officer do not agree on the proposed classification and wage rate (including the amount designated for fringe benefits, where appropriate), the contracting officer shall refer the questions, including the views of all interested parties and the recommendation of the contracting officer, to the Administrator for determination. The Administrator, or an authorized representative, will issue a determination within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30-day period that additional time is necessary.

(D) The wage rate (including fringe benefits where appropriate) determined pursuant to subparagraphs (1)(ii) (B) or (C) of this paragraph, shall be paid to all workers performing work in the classification under this contract from the first day on which work is performed in the classification.

(iii) Whenever the minimum wage rate prescribed in the contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly rate, Contractor shall either pay the benefit as stated in the wage determination or shall pay another bona fide fringe benefit or an hourly cash equivalent thereof.

(iv) If Contractor does not make payments to a trustee or other third person, Contractor may consider as part of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing bona fide fringe benefits under a plan or program, *Provided,* that the Secretary of Labor has found, upon the written request of Contractor, that the applicable standards of the Davis-Bacon Act have been met. The Secretary of Labor may require Contractor to set aside in a separate account assets for the meeting of obligations under the plan or program.

2. Withholding. FAA or Sponsor shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld from Contractor under this contract or any other Federal contract with the same prime contractor, or any other federally-assisted contract subject to Davis-Bacon prevailing wage requirements, which is held by the same prime contractor, so much of the accrued payments or advances as may be considered necessary to pay laborers and mechanics, including apprentices, trainees, and helpers, employed by Contractor or any subcontractor the full amount of wages required by the contract. In the event of failure to pay any laborer or mechanic, including any apprentice, trainee, or helper, employed or working on the site of the work, all or part of the wages required by the contract, FAA may, after written notice to Contractor, Sponsor, Applicant, or Owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds until such violations have ceased.

3. Payrolls and Basic Records.

(i) Payrolls and basic records relating thereto shall be maintained by Contractor during the course of the work and preserved for a period of three years thereafter for all laborers and mechanics working at the site of the work. Such records shall contain the name, address, and social security number of each such worker; his or her correct classification; hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in 1(b)(2)(B) of the Davis-Bacon Act); daily and weekly number of hours worked; deductions made; and actual wages paid. Whenever the Secretary of Labor has found under 29 CFR 5.5(a)(1)(iv) that the wages of any laborer or mechanic include the amount of any costs reasonably anticipated in providing benefits under a plan or program described in section 1(b)(2)(B) of the Davis-Bacon Act, Contractor shall maintain records that show that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, and that the plan or program has been communicated in writing to the laborers or mechanics affected, and records which show the costs anticipated or the actual costs incurred in providing such benefits. Contractors employing apprentices or trainees under approved programs shall maintain written evidence of the registration of apprenticeship programs and certification of trainee programs, the registration of the apprentices and trainees, and the ratios and wage rates prescribed in the applicable programs.

(ii)(A) Contractor shall submit weekly for each week in which any contract work is performed a copy of all payrolls to FAA if the agency is a party to the contract, but if the agency is not such a party, Contractor will submit the payrolls to Applicant, Sponsor, or Owner, as the case may be, for transmission to FAA. The payrolls submitted shall set out accurately and completely all of the information required to be maintained under 29 CFR § 5.5(a)(3)(i), except that full social security numbers and home addresses shall not be included on weekly transmittals. Instead the payrolls shall only need to include an individually identifying number for each employee (*e.g.,* the last four digits of the employee's social security number). The required weekly payroll information may be submitted in any form desired. Optional Form WH–347 is available for this purpose from the Wage and Hour Division Web site at *http://www.dol.gov/esa/whd/forms/wh347instr.htm* or its successor site. Prime Contractor is responsible for the submission of copies of payrolls by all subcontractors. Contractors and subcontractors shall maintain the full social security number and current address of each covered worker and shall provide them upon request to FAA if the agency is a party to the contract, but if the agency is not such a party, Contractor will submit them to Applicant, Sponsor, or Owner, as the case may be, for transmission to FAA, Contractor, or the Wage and Hour Division of the Department of Labor for purposes of an investigation or audit of compliance with prevailing wage requirements. It is not a violation of this section for a prime contractor to require a subcontractor to provide addresses and social security numbers to Prime Contractor for its own records, without weekly submission to Sponsoring government agency (or Applicant, Sponsor, or Owner).

(B) Each payroll submitted shall be accompanied by a "Statement of Compliance," signed by Contractor or subcontractor or his or her agent who pays or supervises the payment of the persons employed under the contract and shall certify the following:

(1) That the payroll for the payroll period contains the information required to be provided under 29 CFR § 5.5(a)(3)(ii), the appropriate information is being maintained under 29 CFR § 5.5 (a)(3)(i), and that such information is correct and complete;

(2) That each laborer and mechanic (including each helper, apprentice, and trainee) employed on the contract during the payroll period has been paid the full weekly wages earned, without rebate, either directly or indirectly, and that no deductions have been made either directly or indirectly from the full wages earned, other than permissible deductions as set forth in Regulations, 29 CFR Part 3;

(3) That each laborer or mechanic has been paid not less than the applicable wage rates and fringe benefits or cash equivalents for the classification of work performed, as specified in the applicable wage determination incorporated into the contract.

(C) The weekly submission of a properly executed certification set forth on the reverse side of Optional Form WH-347 shall satisfy the requirement for submission of the "Statement of Compliance" required by paragraph (3)(ii)(B) of this section.

(D) The falsification of any of the above certifications may subject Contractor or subcontractor to civil or criminal prosecution under Section 1001 of Title 18 and Section 231 of Title 31 of the United States Code.

(iii) Contractor or subcontractor shall make the records required under paragraph (3)(i) of this section available for inspection, copying, or transcription by authorized representatives of Sponsor, FAA, or the Department of Labor and shall permit such representatives to interview employees during working hours on the job. If Contractor or subcontractor fails to submit the required records or to make them available,

the Federal agency may, after written notice to Contractor, Sponsor, applicant, or Owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds. Furthermore, failure to submit the required records upon request or to make such records available may be grounds for debarment action pursuant to 29 CFR § 5.12.

4. Apprentices and Trainees.

(i) Apprentices. Apprentices will be permitted to work at less than the predetermined rate for the work they performed when they are employed pursuant to and individually registered in a bona fide apprenticeship program registered with the U.S. Department of Labor, Employment and Training Administration, Office of Apprenticeship Training, Employer and Labor Services, or with a State Apprenticeship Agency recognized by the Office, or if a person is employed in his or her first 90 days of probationary employment as an apprentice in such an apprenticeship program, who is not individually registered in the program, but who has been certified by the Office of Apprenticeship Training, Employer and Labor Services or a State Apprenticeship Agency (where appropriate) to be eligible for probationary employment as an apprentice. The allowable ratio of apprentices to journeymen on the job site in any craft classification shall not be greater than the ratio permitted to Contractor as to the entire work force under the registered program. Any worker listed on a payroll at an apprentice wage rate, who is not registered or otherwise employed as stated above, shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any apprentice performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. Where a contractor is performing construction on a project in a locality other than that in which its program is registered, the ratios and wage rates (expressed in percentages of the journeyman's hourly rate) specified in Contractor's or subcontractor's registered program shall be observed. Every apprentice must be paid at not less than the rate specified in the registered program for the apprentice's level of progress, expressed as a percentage of the journeymen hourly rate specified in the applicable wage determination. Apprentices shall be paid fringe benefits in accordance with the provisions of the apprenticeship program. If the apprenticeship program does not specify fringe benefits, apprentices must be paid the full amount of fringe benefits listed on the wage determination for the applicable classification. If the Administrator determines that a different practice prevails for the applicable apprentice classification, fringes shall be paid in accordance with that determination. In the event the Office of Apprenticeship Training, Employer and Labor Services, or a State Apprenticeship Agency recognized by the Office, withdraws approval of an apprenticeship program, Contractor will no longer be permitted to utilize apprentices at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(ii) Trainees. Except as provided in 29 CFR § 5.16, trainees will not be permitted to work at less than the predetermined rate for the work performed unless they are employed pursuant to and individually registered in a program which has received prior approval, evidenced by formal certification by the U.S. Department of Labor, Employment and Training Administration. The ratio of trainees to journeymen on the job site shall not be greater than permitted under the plan approved by the Employment and Training Administration. Every trainee must be paid at not less than the rate specified in the approved program for the trainee's level of progress, expressed as a percentage of the journeyman hourly rate specified in the applicable wage determination. Trainees shall be paid fringe benefits in accordance with the provisions of the trainee program. If the trainee program does not mention fringe benefits, trainees shall be paid the

full amount of fringe benefits listed on the wage determination unless the Administrator of the Wage and Hour Division determines that there is an apprenticeship program associated with the corresponding journeyman wage rate on the wage determination that provides for less than full fringe benefits for apprentices. Any employee listed on the payroll at a trainee rate that is not registered and participating in a training plan approved by the Employment and Training Administration shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any trainee performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. In the event the Employment and Training Administration withdraws approval of a training program, Contractor will no longer be permitted to utilize trainees at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(iii) Equal Employment Opportunity. The utilization of apprentices, trainees, and journeymen under this part shall be in conformity with the equal employment opportunity requirements of Executive Order 11246, as amended, and 29 CFR Part 30.

5. Compliance with Copeland Act Requirements.

Contractor shall comply with the requirements of 29 CFR Part 3, which are incorporated by reference in this contract.

6. Subcontracts.

Contractor or subcontractor shall insert in any subcontracts the clauses contained in 29 CFR §§ 5.5(a)(1) through (10) and such other clauses as FAA may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. Prime Contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all the contract clauses in 29 CFR § 5.5.

7. Contract Termination: Debarment.

A breach of the contract clauses in paragraph 1 through 10 of this section may be grounds for termination of the contract, and for debarment as a contractor and a subcontractor as provided in 29 CFR § 5.12.

8. Compliance with Davis-Bacon and Related Act Requirements.

All rulings and interpretations of the Davis-Bacon and Related Acts contained in 29 CFR Parts 1, 3, and 5 are herein incorporated by reference in this contract.

9. Disputes Concerning Labor Standards.

Disputes arising out of the labor standards provisions of this contract shall not be subject to the general disputes clause of this contract. Such disputes shall be resolved in accordance with the procedures of the Department of Labor set forth in 29 CFR Parts 5, 6, and 7. Disputes within the meaning of this clause include disputes between Contractor (or any of its subcontractors) and the contracting agency, the U.S. Department of Labor, or the employees or their representatives.

10. Certification of Eligibility.

(i) By entering into this contract, Contractor certifies that neither it (nor he or she) nor any person or firm who has an interest in Contractor's firm is a person or firm ineligible to be awarded Government contracts by virtue of section 3(a) of the Davis-Bacon Act or 29 CFR § 5.12(a)(1).

(ii) No part of this contract shall be subcontracted to any person or firm ineligible for award of a Government contract by virtue of section 3(a) of the Davis-Bacon Act or 29 CFR § 5.12(a)(1).

(iii) The penalty for making false statements is prescribed in the U.S. Criminal Code, 18 USC § 1001.

CERTIFICATION OF OFFEROR/BIDDER REGARDING DEBARMENT

By submitting a bid/proposal under this solicitation, Bidder or offeror certifies that neither it nor its principals are presently debarred or suspended by any Federal department or agency from participation in this transaction.

CERTIFICATION OF LOWER TIER CONTRACTORS REGARDING DEBARMENT

Successful bidder, by administering each lower tier subcontract that exceeds $25,000 as a "covered transaction", must confirm each lower tier participant of a "covered transaction" under the project is not presently debarred or otherwise disqualified from participation in this federally-assisted project. The successful bidder will accomplish this by:

1. Checking the System for Award Management at website: http://www.sam.gov.
2. Collecting a certification statement similar to Certification of Offeror /Bidder Regarding Debarment.
3. Inserting a clause or condition in the covered transaction with the lower tier contract.

If FAA later determines that a lower tier participant failed to disclose to a higher tier participant that it was excluded or disqualified at the time it entered the covered transaction, FAA may pursue any available remedies, including suspension and debarment of the non-compliant participant.

DISADVANTAGED BUSINESS ENTERPRISE

Bid Information Submitted as a matter of **responsiveness**:

Owner's award of this contract is conditioned upon Bidder or Offeror satisfying the good faith effort requirements of 49 CFR § 26.53.

As a condition of responsiveness, Bidder or Offeror must submit the following information with its proposal on the forms provided herein:

1) Names and addresses of Disadvantaged Business Enterprise (DBE) firms that will participate in the contract;
2) A description of the work that each DBE firm will perform;
3) The dollar amount of the participation of each DBE firm listed under (1);
4) Written statement from Bidder or Offeror that attests their commitment to use the DBE firm(s) listed under (1) to meet Owner's project goal

5) Written confirmation from each listed DBE firm that it is participating in the contract in the kind and amount of work provided in Prime Contractor's commitment; and
6) If Bidder or Offeror cannot meet the advertised project DBE goal, evidence of good faith efforts undertaken by Bidder or Offeror as described in appendix A to 49 CFR part 26. The documentation of good faith efforts must include copies of each DBE and non-DBE subcontractor quote submitted to Bidder when a non-DBE subcontractor was selected over a DBE for work on the contract.

Bid Information submitted as a matter of **responsibility**:

Owner's award of this contract is conditioned upon Bidder or Offeror satisfying the good faith effort requirements of 49 CFR § 26.53.

As a condition of responsibility, every Bidder or Offeror must submit the following information on the forms provided herein within five days after bid opening.

1) The names and addresses of Disadvantaged Business Enterprise (DBE) firms that will participate in the contract;
2) A description of the work that each DBE firm will perform;
3) The dollar amount of the participation of each DBE firm listed under (1);
4) Written statement from Bidder or Offeror that attests their commitment to use the DBE firm(s) listed under (1) to meet Owner's project goal;
5) Written confirmation from each listed DBE firm that it is participating in the contract in the kind and amount of work provided in Prime Contractor's commitment; and
6) If Bidder or Offeror cannot meet the advertised project DBE goal, evidence of good faith efforts undertaken by Bidder or Offeror as described in appendix A to 49 CFR part 26. The documentation of good faith efforts must include copies of each DBE and non-DBE subcontractor quote submitted to Bidder when a non-DBE subcontractor was selected over a DBE for work on the contract.

Contract Assurance (49 CFR § 26.13)

Contractor, subrecipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. Contractor shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted contracts. Failure by Contractor to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as the recipient deems appropriate, which may include, but is not limited to:

1) Withholding monthly progress payments;
2) Assessing sanctions;
3) Liquidated damages; and/or
4) Disqualifying Contractor from future bidding as non-responsible.

Prompt Payment (49 CFR § 26.29)

Prime contractor agrees to pay each subcontractor under this prime contract for satisfactory performance of its contract no later than 30 days from the receipt of each payment Prime Contractor receives from City of Midland, Texas. Prime Contractor agrees further to return retainage payments to each subcontractor within 30 days after the subcontractor's work is satisfactorily completed. Any delay or postponement of

payment from the above referenced time frame may occur only for good cause following written approval of the City of Midland, Texas. This clause applies to both DBE and non-DBE subcontractors.

Termination of DBE Subcontracts (49 CFR § 26.53(f))

Prime Contractor must not terminate a DBE subcontractor listed in response to Bid Proposal (or an approved substitute DBE firm) without prior written consent of City of Midland, Texas. This includes, but is not limited to, instances in which Prime Contractor seeks to perform work originally designated for a DBE subcontractor with its own forces or those of an affiliate, a non-DBE firm, or with another DBE firm.

Prime Contractor shall utilize the specific DBEs listed to perform the work and supply the materials for which each is listed unless Contractor obtains written consent City of Midland, Texas. Unless City of Midland, Texas consent is provided, Prime Contractor shall not be entitled to any payment for work or material unless it is performed or supplied by the listed DBE.

City of Midland, Texas may provide such written consent only if City of Midland, Texas agrees, for reasons stated in the concurrence document, that Prime Contractor has good cause to terminate the DBE firm. For purposes of this paragraph, good cause includes the circumstances listed in 49 CFR §26.53.

Before transmitting to City of Midland, Texas its request to terminate and/or substitute a DBE subcontractor, Prime Contractor must give notice in writing to the DBE subcontractor, with a copy to City of Midland, Texas, of its intent to request to terminate and/or substitute, and the reason for the request.

Prime Contractor must give the DBE five days to respond to Prime Contractor's notice and advise City of Midland, Texas and Contractor of the reasons, if any, why it objects to the proposed termination of its subcontract and why City of Midland, Texas should not approve Prime Contractor's action. If required in a particular case as a matter of public necessity (e.g., safety), City of Midland, Texas may provide a response period shorter than five days.

In addition to post-award terminations, the provisions of this section apply to preaward deletions of or substitutions for DBE firms put forward by offerors in negotiated procurements.

TEXTING WHEN DRIVING

In accordance with Executive Order 13513, “Federal Leadership on Reducing Text Messaging While Driving”, (10/1/2009) and DOT Order 3902.10, “Text Messaging While Driving”, (12/30/2009), FAA encourages recipients of Federal grant funds to adopt and enforce safety policies that decrease crashes by distracted drivers, including policies to ban text messaging while driving when performing work related to a grant or subgrant.

In support of this initiative, Owner encourages Contractor to promote policies and initiatives for its employees and other work personnel that decrease crashes by distracted drivers, including policies that ban text messaging while driving motor vehicles while performing work activities associated with the project. Contractor must include the substance of this clause in all sub-tier contracts exceeding $10,000 that involve driving a motor vehicle in performance of work activities associated with the project.

PROHIBITION ON CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE SERVICES OR EQUIPMENT

Contractor and Subcontractor agree to comply with mandatory standards and policies relating to use and procurement of certain telecommunications and video surveillance services or equipment in compliance with the National Defense Authorization Act.

EQUAL OPPORTUNITY CLAUSE

During the performance of this contract, Contractor agrees as follows:

(1) Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, sexual orientation, gender identify, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff, or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) Contractor will, in all solicitations or advertisements for employees placed by or on behalf of Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

(3) Contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with Contractor's legal duty to furnish information.

(4) Contractor will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided by the agency contracting officer, advising the labor union or workers' representative of Contractor's commitments under this section 202 of Executive Order 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(5) Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(6) Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will

permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(7) In the event of Contractor's noncompliance with the nondiscrimination clauses of this contract or with any such rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and Contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(8) Contractor will include the provisions of paragraphs (1) through (8) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. Contractor will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a means of enforcing such provisions, including sanctions for noncompliance*: Provided,* however, that in the event Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction, Contractor may request the United States to enter into such litigation to protect the interests of the United States.

STANDARD FEDERAL EQUAL EMPLOYMENT OPPORTUNITY
CONSTRUCTION CONTRACT SPECIFICATIONS

1. As used in these specifications:

a. "Covered area" means the geographical area described in the solicitation from which this contract resulted;

b. "Director" means Director, Office of Federal Contract Compliance Programs (OFCCP), U.S. Department of Labor, or any person to whom the Director delegates authority;

c. "Employer identification number" means the Federal social security number used on the Employer's Quarterly Federal Tax Return, U.S. Treasury Department Form 941;

d. "Minority" includes:

(1) Black (all persons having origins in any of the Black African racial groups not of Hispanic origin);

(2) Hispanic (all persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race);

(3) Asian and Pacific Islander (all persons having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands); and

(4) American Indian or Alaskan native (all persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation or community identification).

2. Whenever Contractor, or any subcontractor at any tier, subcontracts a portion of the work involving any construction trade, it shall physically include in each subcontract in excess of $10,000 the provisions

of these specifications and the Notice which contains the applicable goals for minority and female participation and which is set forth in the solicitations from which this contract resulted.

3. If Contractor is participating (pursuant to 41 CFR part 60-4.5) in a Hometown Plan approved by the U.S. Department of Labor in the covered area either individually or through an association, its affirmative action obligations on all work in the Plan area (including goals and timetables) shall be in accordance with that Plan for those trades which have unions participating in the Plan. Contractors must be able to demonstrate their participation in and compliance with the provisions of any such Hometown Plan. Each contractor or subcontractor participating in an approved plan is individually required to comply with its obligations under the EEO clause and to make a good faith effort to achieve each goal under the Plan in each trade in which it has employees. The overall good faith performance by other contractors or subcontractors toward a goal in an approved Plan does not excuse any covered contractor's or subcontractor's failure to take good faith efforts to achieve the Plan goals and timetables.

4. Contractor shall implement the specific affirmative action standards provided in paragraphs 7a through 7p of these specifications. The goals set forth in the solicitation from which this contract resulted are expressed as percentages of the total hours of employment and training of minority and female utilization Contractor should reasonably be able to achieve in each construction trade in which it has employees in the covered area. Covered construction contractors performing construction work in a geographical areas where they do not have a Federal or federally assisted construction contract shall apply the minority and female goals established for the geographical area where the work is being performed. Goals are published periodically in the Federal Register in notice form, and such notices may be obtained from any Office of Federal Contract Compliance Programs office or from Federal procurement contracting officers. Contractor is expected to make substantially uniform progress in meeting its goals in each craft during the period specified.

5. Neither the provisions of any collective bargaining agreement, nor the failure by a union with whom Contractor has a collective bargaining agreement, to refer either minorities or women shall excuse Contractor's obligations under these specifications, Executive Order 11246, or the regulations promulgated pursuant thereto.

6. In order for the nonworking training hours of apprentices and trainees to be counted in meeting the goals, such apprentices and trainees must be employed by Contractor during the training period, and Contractor must have made a commitment to employ the apprentices and trainees at the completion of their training, subject to the availability of employment opportunities. Trainees must be trained pursuant to training programs approved by the U.S. Department of Labor.

7. Contractor shall take specific affirmative actions to ensure equal employment opportunity. The evaluation of Contractor's compliance with these specifications shall be based upon its effort to achieve maximum results from its actions. Contractor shall document these efforts fully, and shall implement affirmative action steps at least as extensive as the following:

a. Ensure and maintain a working environment free of harassment, intimidation, and coercion at all sites, and in all facilities at which Contractor's employees are assigned to work. Contractor, where possible, will assign two or more women to each construction project. Contractor shall specifically ensure that all foremen, superintendents, and other onsite supervisory personnel are aware of and

carry out Contractor's obligation to maintain such a working environment, with specific attention to minority or female individuals working at such sites or in such facilities.

b. Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when Contractor or its unions have employment opportunities available, and maintain a record of the organizations' responses.

c. Maintain a current file of the names, addresses, and telephone numbers of each minority and female off-the-street applicant and minority or female referral from a union, a recruitment source, or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to Contractor by the union or, if referred, not employed by Contractor, this shall be documented in the file with the reason therefor, along with whatever additional actions Contractor may have taken.

d. Provide immediate written notification to the Director when the union or unions with which Contractor has a collective bargaining agreement has not referred to Contractor a minority person or woman sent by Contractor, or when Contractor has other information that the union referral process has impeded Contractor's efforts to meet its obligations.

e. Develop on-the-job training opportunities and/or participate in training programs for the area which expressly include minorities and women, including upgrading programs and apprenticeship and trainee programs relevant to Contractor's employment needs, especially those programs funded or approved by the Department of Labor. Contractor shall provide notice of these programs to the sources compiled under 7b above.

f. Disseminate Contractor's EEO policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting Contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.

g. Review, at least annually, the company's EEO policy and affirmative action obligations under these specifications with all employees having any responsibility for hiring, assignment, layoff, termination, or other employment decisions including specific review of these items with onsite supervisory personnel such superintendents, general foremen, etc., prior to the initiation of construction work at any job site. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.

h. Disseminate Contractor's EEO policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to and discussing Contractor's EEO policy with other contractors and subcontractors with whom Contractor does or anticipates doing business.

i. Direct its recruitment efforts, both oral and written, to minority, female, and community organizations, to schools with minority and female students and to minority and female recruitment and training organizations serving Contractor's recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, Contractor shall send written notification to organizations such as the above, describing the openings, screening procedures, and tests to be used in the selection process.

j. Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer, and vacation employment to minority and female youth both on the site and in other areas of a contractor's work force.

k. Validate all tests and other selection requirements where there is an obligation to do so under 41 CFR part 60-3.

l. Conduct, at least annually, an inventory and evaluation at least of all minority and female personnel, for promotional opportunities and encourage these employees to seek or to prepare for, through appropriate training, etc., such opportunities.

m. Ensure that seniority practices, job classifications, work assignments, and other personnel practices do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the EEO policy and Contractor's obligations under these specifications are being carried out.

n. Ensure that all facilities and company activities are nonsegregated except that separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.

o. Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.

p. Conduct a review, at least annually, of all supervisor's adherence to and performance under Contractor's EEO policies and affirmative action obligations.

8. Contractors are encouraged to participate in voluntary associations, which assist in fulfilling one or more of their affirmative action obligations (7a through 7p). The efforts of a contractor association, joint contractor-union, contractor-community, or other similar group of which Contractor is a member and participant may be asserted as fulfilling any one or more of its obligations under 7a through 7p of these specifications provided that Contractor actively participates in the group, makes every effort to assure that the group has a positive impact on the employment of minorities and women in the industry, ensures that the concrete benefits of the program are reflected in Contractor's minority and female workforce participation, makes a good faith effort to meet its individual goals and timetables, and can provide access to documentation which demonstrates the effectiveness of actions taken on behalf of Contractor. The obligation to comply, however, is Contractor's and failure of such a group to fulfill an obligation shall not be a defense for Contractor's noncompliance.

9. A single goal for minorities and a separate single goal for women have been established. Contractor, however, is required to provide equal employment opportunity and to take affirmative action for all minority groups, both male and female, and all women, both minority and non-minority. Consequently, Contractor may be in violation of the Executive Order if a particular group is employed in a substantially

disparate manner (for example, even though Contractor has achieved its goals for women generally, Contractor may be in violation of the Executive Order if a specific minority group of women is underutilized).

10. Contractor shall not use the goals and timetables or affirmative action standards to discriminate against any person because of race, color, religion, sex, sexual orientation, gender identity, or national origin.

11. Contractor shall not enter into any subcontract with any person or firm debarred from Government contracts pursuant to Executive Order 11246.

12. Contractor shall carry out such sanctions and penalties for violation of these specifications and of the Equal Opportunity Clause, including suspension, termination, and cancellation of existing subcontracts as may be imposed or ordered pursuant to Executive Order 11246, as amended, and its implementing regulations, by the Office of Federal Contract Compliance Programs. Any contractor who fails to carry out such sanctions and penalties shall be in violation of these specifications and Executive Order 11246, as amended.

13. Contractor, in fulfilling its obligations under these specifications, shall implement specific affirmative action steps, at least as extensive as those standards prescribed in paragraph 7 of these specifications, so as to achieve maximum results from its efforts to ensure equal employment opportunity. If Contractor fails to comply with the requirements of the Executive Order, the implementing regulations, or these specifications, the Director shall proceed in accordance with 41 CFR part 60-4.8.

14. Contractor shall designate a responsible official to monitor all employment related activity to ensure that the company EEO policy is being carried out, to submit reports relating to the provisions hereof as may be required by the Government, and to keep records. Records shall at least include for each employee, the name, address, telephone numbers, construction trade, union affiliation if any, employee identification number when assigned, social security number, race, sex, status (e.g., mechanic, apprentice, trainee, helper, or laborer), dates of changes in status, hours worked per week in the indicated trade, rate of pay, and locations at which the work was performed. Records shall be maintained in an easily understandable and retrievable form; however, to the degree that existing records satisfy this requirement, contractors shall not be required to maintain separate records.

15. Nothing herein provided shall be construed as a limitation upon the application of other laws which establish different standards of compliance or upon the application of requirements for the hiring of local or other area residents (e.g. those under the Public Works Employment Act of 1977 and the Community Development Block Grant Program).

FEDERAL FAIR LABOR STANDARDS ACT (FEDERAL MINIMUM WAGE)

All contracts and subcontracts that result from this solicitation incorporate by reference the provisions of 29 CFR part 201, et seq, the Federal Fair Labor Standards Act (FLSA), with the same force and effect as if given in full text. The FLSA sets minimum wage, overtime pay, recordkeeping, and child labor standards for full and part-time workers.

Contractor has full responsibility to monitor compliance to the referenced statute or regulation. Contractor must address any claims or disputes that arise from this requirement directly with the U.S. Department of Labor – Wage and Hour Division.

CERTIFICATION REGARDING LOBBYING

Bidder or Offeror certifies by signing and submitting this bid or proposal, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of Bidder or Offeror, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all sub-awards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all sub-recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

PROHIBITION OF SEGREGATED FACILITIES

(a) Contractor agrees that it does not and will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not and will not permit its employees to perform their services at any location under its control where segregated facilities are maintained. Contractor agrees that a breach of this clause is a violation of the Equal Employment Opportunity clause in this contract.

(b) "Segregated facilities," as used in this clause, means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing

facilities provided for employees that are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, sex, sexual orientation, gender identity, or national origin because of written or oral policies or employee custom. The term does not include separate or single-user rest rooms or necessary dressing or sleeping areas provided to assure privacy between the sexes.

(c) Contractor shall include this clause in every subcontract and purchase order that is subject to the Equal Employment Opportunity clause of this contract.

OCCUPATIONAL SAFETY AND HEALTH ACT OF 1970

All contracts and subcontracts that result from this solicitation incorporate by reference the requirements of 29 CFR Part 1910 with the same force and effect as if given in full text. The employer must provide a work environment that is free from recognized hazards that may cause death or serious physical harm to the employee. The employer retains full responsibility to monitor its compliance and their subcontractor's compliance with the applicable requirements of the Occupational Safety and Health Act of 1970 (29 CFR Part 1910). The employer must address any claims or disputes that pertain to a referenced requirement directly with the U.S. Department of Labor – Occupational Safety and Health Administration.

PROCUREMENT OF RECOVERED MATERIALS

Contractor and subcontractor agree to comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, and the regulatory provisions of 40 CFR Part 247. In the performance of this contract and to the extent practicable, Contractor and subcontractors are to use products containing the highest percentage of recovered materials for items designated by the Environmental Protection Agency (EPA) under 40 CFR Part 247 whenever:

1) Contract requires procurement of $10,000 or more of a designated item during the fiscal year; or
2) Contractor has procured $10,000 or more of a designated item using Federal funding during the previous fiscal year.

List of EPA-designated items is available at www.epa.gov/smm/comprehensive-procurement-guidelines-construction-products.

Section 6002(c) establishes exceptions to the preference for recovery of EPA-designated products if Contractor can demonstrate the item is:

a) Not reasonably available within a timeframe providing for compliance with the contract performance schedule;
b) Fails to meet reasonable contract performance requirements; or
c) Is only available at an unreasonable price.

CERTIFICATION OF OFFEROR/BIDDER REGARDING TAX DELINQUENCY AND FELONY CONVICTIONS

Applicant must complete the following two certification statements. Applicant must indicate its current status as it relates to tax delinquency and felony conviction by inserting a checkmark (✓) in the space

following the applicable response. Applicant agrees that, if awarded a contract resulting from this solicitation, it will incorporate this provision for certification in all lower tier subcontracts.

Certifications

1) Applicant represents that it is (✓) is not (**X**) a corporation that has any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability.
2) Applicant represents that it is (✓) is not (**X**) a corporation that was convicted of a criminal violation under any Federal law within the preceding 24 months.

Note

If an applicant responds in the affirmative to either of the above representations, Applicant is ineligible to receive an award unless Sponsor has received notification from the agency suspension and debarment official (SDO) that the SDO has considered suspension or debarment and determined that further action is not required to protect the Government's interests. Applicant therefore must provide information to Owner about its tax liability or conviction to Owner, who will then notify FAA Airports District Office, which will then notify the agency's SDO to facilitate completion of the required considerations before award decisions are made.

Term Definitions

> **Felony conviction:** Felony conviction means a conviction within the preceding 24 months of a felony criminal violation under any Federal law and includes conviction of an offense defined in a section of the U.S. Code that specifically classifies the offense as a felony and conviction of an offense that is classified as a felony under 18 USC § 3559.
>
> **Tax Delinquency**: A tax delinquency is any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted, or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability.

TERMINATION FOR CONVENIENCE (CONSTRUCTION & EQUIPMENT CONTRACTS)

Owner may terminate this contract in whole or in part at any time by providing written notice to Contractor. Such action may be without cause and without prejudice to any other right or remedy of Owner. Upon receipt of a written notice of termination, except as explicitly directed by Owner, Contractor shall immediately proceed with the following obligations regardless of any delay in determining or adjusting amounts due under this clause:

1. Contractor must immediately discontinue work as specified in the written notice.
2. Terminate all subcontracts to the extent they relate to the work terminated under the notice.
3. Discontinue orders for materials and services except as directed by the written notice.
4. Deliver to Owner all fabricated and partially fabricated parts, completed and partially completed work, supplies, equipment and materials acquired prior to termination of the work, and as directed in the written notice.
5. Complete performance of the work not terminated by the notice.

6. Take action as directed by Owner to protect and preserve property and work related to this contract that Owner will take possession.

Owner agrees to pay Contractor for:

1. Completed and acceptable work executed in accordance with the contract documents prior to the effective date of termination;
2. Documented expenses sustained prior to the effective date of termination in performing work and furnishing labor, materials, or equipment as required by the contract documents in connection with uncompleted work;
3. Reasonable and substantiated claims, costs, and damages incurred in settlement of terminated contracts with Subcontractors and Suppliers; and
4. Reasonable and substantiated expenses to Contractor directly attributable to Owner's termination action.

Owner will not pay Contractor for loss of anticipated profits or revenue or other economic loss arising out of or resulting from Owner's termination action.

The rights and remedies this clause provides are in addition to any other rights and remedies provided by law or under this contract.

TERMINATION FOR CAUSE (CONSTRUCTION)

Section 80-09 of FAA Advisory Circular 150/5370-10 establishes standard language for conditions, rights, and remedies associated with Owner termination of this contract for cause due to default of Contractor.

TRADE RESTRICTION CERTIFICATION

By submission of an offer, Offeror certifies that with respect to this solicitation and any resultant contract, Offeror –

1) is not owned or controlled by one or more citizens of a foreign country included in the list of countries that discriminate against U.S. firms as published by the Office of the United States Trade Representative (USTR);

2) has not knowingly entered into any contract or subcontract for this project with a person that is a citizen or national of a foreign country included on the list of countries that discriminate against U.S. firms as published by the USTR; and

3) has not entered into any subcontract for any product to be used on the Federal project that is produced in a foreign country included on the list of countries that discriminate against U.S. firms published by the USTR.

This certification concerns a matter within the jurisdiction of an agency of the United States of America and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under Title 18 USC § 1001.

Offeror/Contractor must provide immediate written notice to Owner if Offeror/Contractor learns that its certification or that of a subcontractor was erroneous when submitted or has become erroneous by reason

of changed circumstances. Contractor must require subcontractors provide immediate written notice to Contractor if at any time it learns that its certification was erroneous by reason of changed circumstances.

Unless the restrictions of this clause are waived by the Secretary of Transportation in accordance with 49 CFR § 30.17, no contract shall be awarded to an Offeror or subcontractor:

1) who is owned or controlled by one or more citizens or nationals of a foreign country included on the list of countries that discriminate against U.S. firms published by the USTR; or
2) whose subcontractors are owned or controlled by one or more citizens or nationals of a foreign country on such USTR list; or
3) who incorporates in the public works project any product of a foreign country on such USTR list.

Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by this provision. The knowledge and information of a contractor is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

Offeror agrees that, if awarded a contract resulting from this solicitation, it will incorporate this provision for certification without modification in all lower tier subcontracts. Contractor may rely on the certification of a prospective subcontractor that it is not a firm from a foreign country included on the list of countries that discriminate against U.S. firms as published by USTR, unless Offeror has knowledge that the certification is erroneous.

This certification is a material representation of fact upon which reliance was placed when making an award. If it is later determined that Contractor or subcontractor knowingly rendered an erroneous certification, FAA (FAA) may direct through Owner cancellation of the contract or subcontract for default at no cost to Owner or FAA.

VETERAN'S PREFERENCE

In the employment of labor (excluding executive, administrative, and supervisory positions), Contractor and all sub-tier contractors must give preference to covered veterans as defined within Title 49 United States Code Section 47112. Covered veterans include Vietnam-era veterans, Persian Gulf veterans, Afghanistan-Iraq war veterans, disabled veterans, and small business concerns (as defined by 15 USC § 632) owned and controlled by disabled veterans. This preference only applies when there are covered veterans readily available and qualified to perform the work to which the employment relates.

CERTIFICATION REGARDING DOMESTIC PREFERENCES FOR PROCUREMENTS

Bidder or Offeror certifies by signing and submitting this bid or proposal that, to the greatest extent practicable, Bidder or Offeror has provided a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including, but not limited to, iron, aluminum, steel, cement, and other manufactured products) in compliance with 2 CFR § 200.322.

Part 1 – General Contract Provisions

Section 10 Definition of Terms

When the following terms are used in these specifications, in the contract, or in any documents or other instruments pertaining to construction where these specifications govern, the intent and meaning shall be defined as follows:

Paragraph Number	Term	Definition
10-01	**AASHTO**	American Association of State Highway and Transportation Officials.
10-02	**Access Road**	Right-of-way, roadway, and all improvements constructed thereon connecting the airport to a public roadway.
10-03	**Advertisement**	A public announcement, as required by local law, inviting bids for work to be performed and materials to be furnished.
10-04	**Airport**	Airport means an area of land or water which is used or intended to be used for the landing and takeoff of aircraft; an appurtenant area used or intended to be used for airport buildings or other airport facilities or rights of way; airport buildings and facilities located in any of these areas, and a heliport.
10-05	**Airport Improvement Program (AIP)**	A grant-in-aid program, administered by the Federal Aviation Administration (FAA).
10-06	**Air Operations Area (AOA)**	Any area of the airport used or intended to be used for the landing, takeoff, or surface maneuvering of aircraft. An air operation area shall include such paved or unpaved areas that are used or intended to be used for the unobstructed movement of aircraft in addition to its associated runway, taxiway, or apron.
10-07	**Apron**	Area where aircraft are parked, unloaded or loaded, fueled and/or serviced.
10-08	**ASTM International (ASTM)**	Formerly known as the American Society for Testing and Materials (ASTM).
10-09	**Award**	Owner's notice to the successful bidder of the acceptance of the submitted bid.
10-10	**Bidder**	Any individual, partnership, firm, or corporation, acting directly or through a duly authorized representative, who submits a proposal for the work contemplated.
10-11	**Building Area**	An area on the airport to be used, considered, or intended to be used for airport buildings or other airport facilities or rights-of-way together with all airport buildings and facilities located thereon.
10-12	**Calendar Day**	Every day shown on the calendar.
10-13	**Certificate of Analysis (COA)**	The COA is the manufacturer's Certificate of Compliance (COC) including all applicable test results required by the specifications.
10-14	**Certificate of Compliance (COC)**	The manufacturer's certification stating that materials or assemblies furnished fully comply with the requirements of the contract. The certificate shall be signed by the manufacturer's authorized representative.
10-15	**Change Order**	A written order to Contractor covering changes in the plans, specifications, or proposal quantities and establishing the basis of

Paragraph Number	Term	Definition
		payment and contract time adjustment, if any, for work within the scope of the contract and necessary to complete the project.
10-16	**Contract**	A written agreement between Owner and Contractor that establishes the obligations of the parties including but not limited to performance of work, furnishing of labor, equipment and materials and the basis of payment. The awarded contract includes but may not be limited to: Advertisement, Contract form, Proposal, Performance bond, payment bond, General provisions, certifications and representations, Technical Specifications, Plans, Supplemental Provisions, standards incorporated by reference and issued addenda.
10-17	**Contract Item (Pay Item)**	A specific unit of work for which a price is provided in the contract.
10-18	**Contract Time**	The number of calendar days or working days, stated in the proposal, allowed for completion of the contract, including authorized time extensions. If a calendar date of completion is stated in the proposal, in lieu of a number of calendar or working days, the contract shall be completed by that date.
10-19	**Contractor**	The individual, partnership, firm, or corporation primarily liable for the acceptable performance of the work contracted and for the payment of all legal debts pertaining to the work who acts directly or through lawful agents or employees to complete the contract work.
10-20	**Contractors Quality Control (QC) Facilities**	Contractor's QC facilities in accordance with Contractor Quality Control Program (CQCP).
10-21	**Contractor Quality Control Program (CQCP)**	Details the methods and procedures that will be taken to assure that all materials and completed construction required by the contract conform to contract plans, technical specifications and other requirements, whether manufactured by Contractor, or procured from subcontractors or vendors.
10-22	**Control Strip**	A demonstration by Contractor that the materials, equipment, and construction processes results in a product meeting the requirements of the specification.
10-23	**Construction Safety and Phasing Plan (CSPP)**	The overall plan for safety and phasing of a construction project developed by the airport operator, or developed by the airport operator's consultant and approved by the airport operator. It is included in the invitation for bids and becomes part of the project specifications.
10-24	**Drainage System**	The system of pipes, ditches, and structures by which surface or subsurface waters are collected and conducted from the airport area.
10-25	**Engineer**	The individual, partnership, firm, or corporation duly authorized by Owner to be responsible for engineering, inspection, and/or observation of the contract work and acting directly or through an authorized representative.
10-26	**Equipment**	All machinery, together with the necessary supplies for upkeep and maintenance; and all tools and apparatus necessary for the proper construction and acceptable completion of the work.
10-27	**Extra Work**	An item of work not provided for in the awarded contract as previously modified by change order or supplemental agreement, but which is found by Owner's Engineer or Resident Project

Paragraph Number	Term	Definition
		Representative (RPR) to be necessary to complete the work within the intended scope of the contract as previously modified.
10-28	**FAA**	The Federal Aviation Administration. When used to designate a person, FAA shall mean the Administrator or their duly authorized representative.
10-29	**Federal Specifications**	The federal specifications and standards, commercial item descriptions, and supplements, amendments, and indices prepared and issued by the General Services Administration.
10-30	**Force Account**	**a.** Contract Force Account - A method of payment that addresses extra work performed by Contractor on a time and material basis. **b.** Owner Force Account - Work performed for the project by Owner's employees.
10-31	**Intention of Terms**	Whenever, in these specifications or on the plans, the words "directed," "required," "permitted," "ordered," "designated," "prescribed," or words of like import are used, it shall be understood that the direction, requirement, permission, order, designation, or prescription of Engineer and/or Resident Project Representative (RPR) is intended; and similarly, the words "approved," "acceptable," "satisfactory," or words of like import, shall mean approved by, or acceptable to, or satisfactory to Engineer and/or RPR, subject in each case to the final determination of Owner. Any reference to a specific requirement of a numbered paragraph of the contract specifications or a cited standard shall be interpreted to include all general requirements of the entire section, specification item, or cited standard that may be pertinent to such specific reference.
10-32	**Lighting**	A system of fixtures providing or controlling the light sources used on or near the airport or within the airport buildings. The field lighting includes all luminous signals, markers, floodlights, and illuminating devices used on or near the airport or to aid in the operation of aircraft landing at, taking off from, or taxiing on the airport surface.
10-33	**Major and Minor Contract Items**	A major contract item shall be any item that is listed in the proposal, the total cost of which is equal to or greater than 20% of the total amount of the award contract. All other items shall be considered minor contract items.
10-34	**Materials**	Any substance specified for use in the construction of the contract work.
10-35	**Modification of Standards (MOS)**	Any deviation from standard specifications applicable to material and construction methods in accordance with FAA Order 5300.1.
10-36	**Notice to Proceed (NTP)**	A written notice to Contractor to begin the actual contract work on a previously agreed to date. If applicable, the Notice to Proceed shall state the date on which the contract time begins.
10-37	**Owner**	The term "Owner" shall mean the party of the first part or the contracting agency signatory to the contract. Where the term "Owner" is capitalized in this document, it shall mean airport Sponsor only. Owner for this project is **City of Midland**.
10-38	Passenger Facility Charge (PFC)	Per 14 Code of Federal Regulations (CFR) Part 158 and 49 United States Code (USC) § 40117, a PFC is a charge imposed by a public agency on passengers enplaned at a commercial service airport it controls.

Paragraph Number	Term	Definition
10-39	**Pavement Structure**	The combined surface course, base course(s), and subbase course(s), if any, considered as a single unit.
10-40	**Payment bond**	The approved form of security furnished by Contractor and their own surety as a guaranty that Contractor will pay in full all bills and accounts for materials and labor used in the construction of the work.
10-41	**Performance bond**	The approved form of security furnished by Contractor and their own surety as a guaranty that Contractor will complete the work in accordance with the terms of the contract.
10-42	**Plans**	The official drawings or exact reproductions which show the location, character, dimensions and details of the airport and the work to be done and which are to be considered as a part of the contract, supplementary to the specifications. Plans may also be referred to as 'contract drawings.'
10-43	**Project**	The agreed scope of work for accomplishing specific airport development with respect to a particular airport.
10-44	**Proposal**	The written offer of the bidder (when submitted on the approved proposal form) to perform the contemplated work and furnish the necessary materials in accordance with the provisions of the plans and specifications.
10-45	**Proposal guaranty**	The security furnished with a proposal to guarantee that the bidder will enter into a contract if their own proposal is accepted by Owner.
10-46	**Quality Assurance (QA)**	Owner's responsibility to assure that construction work completed complies with specifications for payment.
10-47	**Quality Control (QC)**	Contractor's responsibility to control material(s) and construction processes to complete construction in accordance with project specifications.
10-48	**Quality Assurance (QA) Inspector**	An authorized representative of Engineer and/or Resident Project Representative (RPR) assigned to make all necessary inspections, observations, tests, and/or observation of tests of the work performed or being performed, or of the materials furnished or being furnished by Contractor.
10-49	**Quality Assurance (QA) Laboratory**	The official quality assurance testing laboratories of Owner or such other laboratories as may be designated by Engineer or RPR. May also be referred to as Engineer's, Owner's, or QA Laboratory.
10-50	**Resident Project Representative (RPR)**	The individual, partnership, firm, or corporation duly authorized by Owner to be responsible for all necessary inspections, observations, tests, and/or observations of tests of the contract work performed or being performed, or of the materials furnished or being furnished by Contractor, and acting directly or through an authorized representative.
10-51	**Runway**	The area on the airport prepared for the landing and takeoff of aircraft.
10-52	**Runway Safety Area (RSA)**	A defined surface surrounding the runway prepared or suitable for reducing the risk of damage to aircraft. See the construction safety and phasing plan (CSPP) for limits of the RSA.
10-53	**Safety Plan Compliance Document (SPCD)**	Details how Contractor will comply with the CSPP.
10-54	**Specifications**	A part of the contract containing the written directions and requirements for completing the contract work. Standards for specifying materials or testing which are cited in the contract

Paragraph Number	Term	Definition
		specifications by reference shall have the same force and effect as if included in the contract physically.
10-55	**Sponsor**	A Sponsor is defined in 49 USC § 47102(24) as a public agency that submits to the FAA for an AIP grant; or a private Owner of a public-use airport that submits to the FAA an application for an AIP grant for the airport.
10-56	**Structures**	Airport facilities such as bridges; culverts; catch basins, inlets, retaining walls, cribbing; storm and sanitary sewer lines; water lines; underdrains; electrical ducts, manholes, handholes, lighting fixtures and bases; transformers; navigational aids; buildings; vaults; and, other manmade features of the airport that may be encountered in the work and not otherwise classified herein.
10-57	**Subgrade**	The soil that forms the pavement foundation.
10-58	**Superintendent**	Contractor's executive representative who is present on the work during progress, authorized to receive and fulfill instructions from RPR, and who shall supervise and direct the construction.
10-59	**Supplemental Agreement**	A written agreement between Contractor and Owner that establishes the basis of payment and contract time adjustment, if any, for the work affected by the supplemental agreement. A supplemental agreement is required if: (1) in scope work would increase or decrease the total amount of the awarded contract by more than 25%: (2) in scope work would increase or decrease the total of any major contract item by more than 25%; (3) work that is not within the scope of the originally awarded contract; or (4) adding or deleting of a major contract item.
10-60	**Surety**	The corporation, partnership, or individual, other than Contractor, executing payment or performance bonds that are furnished to Owner by Contractor.
10-61	**Taxilane**	A taxiway designed for low speed movement of aircraft between aircraft parking areas and terminal areas.
10-62	**Taxiway**	The portion of the air operations area of an airport that has been designated by competent airport authority for movement of aircraft to and from the airport's runways, aircraft parking areas, and terminal areas.
10-63	**Taxiway/Taxilane Safety Area (TSA)**	A defined surface alongside the taxiway prepared or suitable for reducing the risk of damage to an aircraft. See the construction safety and phasing plan (CSPP) for limits of the TSA.
10-64	**Work**	The furnishing of all labor, materials, tools, equipment, and incidentals necessary or convenient to Contractor's performance of all duties and obligations imposed by the contract, plans, and specifications.
10-65	**Working day**	A working day shall be any day other than a legal holiday, Saturday, or Sunday on which the normal working forces of Contractor may proceed with regular work for at least six (6) hours toward completion of the contract. When work is suspended for causes beyond Contractor's control, it will not be counted as a working day. Saturdays, Sundays and holidays on which Contractor's forces engage in regular work will be considered as working days.
10-66	**Owner Defined terms**	None

END OF SECTION 10

Section 20 Proposal Requirements and Conditions

20-01 Advertisement (Notice to Bidders). See Section A – Advertisement for Bids (Notice to Bidders).

20-02 Qualification of bidders. Each bidder shall submit evidence of competency and evidence of financial responsibility to perform the work to Owner at the time of bid opening.

Evidence of competency, unless otherwise specified, shall consist of statements covering the bidder's past experience on similar work, and a list of equipment and a list of key personnel that would be available for the work.

Each bidder shall furnish Owner satisfactory evidence of their financial responsibility. Evidence of financial responsibility, unless otherwise specified, shall consist of a confidential statement or report of the bidder's financial resources and liabilities as of the last calendar year or the bidder's last fiscal year. Such statements or reports shall be certified by a public accountant. At the time of submitting such financial statements or reports, the bidder shall further certify whether their financial responsibility is approximately the same as stated or reported by the public accountant. If the bidder's financial responsibility has changed, the bidder shall qualify the public accountant's statement or report to reflect the bidder's true financial condition at the time such qualified statement or report is submitted to Owner.

Unless otherwise specified, a bidder may submit evidence that they are prequalified with the State Highway Division and are on the current "bidder's list" of the state in which the proposed work is located. Evidence of State Highway Division prequalification may be submitted as evidence of financial responsibility in lieu of the certified statements or reports specified above.

20-03 Contents of proposal forms. Owner's proposal forms state the location and description of the proposed construction; the place, date, and time of opening of the proposals; and the estimated quantities of the various items of work to be performed and materials to be furnished for which unit bid prices are asked. The proposal form states the time in which the work must be completed, and the amount of the proposal guaranty that must accompany the proposal. Owner will accept only those Proposals properly executed on physical forms or electronic forms provided by Owner. Bidder actions that may cause Owner to deem a proposal irregular are given in paragraph 20-09 *Irregular proposals*.

Mobilization is limited to 10 percent of the total project cost.

A prebid conference is required on this project to discuss as a minimum, the following items: material requirements; submittals; Quality Control/Quality Assurance requirements; the construction safety and phasing plan including airport access and staging areas; and unique airfield paving construction requirements. Meeting time, date, and place described in Section A – Advertisement for Bids (Notice to Bidders).

20-04 Issuance of proposal forms. Owner reserves the right to refuse to issue a proposal form to a prospective bidder if the bidder is in default for any of the following reasons:

a. Failure to comply with any prequalification regulations of Owner, if such regulations are cited, or otherwise included, in the proposal as a requirement for bidding.

b. Failure to pay, or satisfactorily settle, all bills due for labor and materials on former contracts in force with Owner at the time Owner issues the proposal to a prospective bidder.

c. Documented record of Contractor default under previous contracts with Owner.

d. Documented record of unsatisfactory work on previous contracts with Owner.

20-05 Interpretation of estimated proposal quantities. An estimate of quantities of work to be done and materials to be furnished under these specifications is given in the proposal. It is the result of careful calculations and is believed to be correct. It is given only as a basis for comparison of proposals and the award of the contract. Owner does not expressly, or by implication, agree that the actual quantities involved will correspond exactly therewith; nor shall the bidder plead misunderstanding or deception because of such estimates of quantities, or of the character, location, or other conditions pertaining to the work. Payment to Contractor will be made only for the actual quantities of work performed or materials furnished in accordance with the plans and specifications. It is understood that the quantities may be increased or decreased as provided in the Section 40, paragraph 40-02, Alteration of Work and Quantities, without in any way invalidating the unit bid prices.

20-06 Examination of plans, specifications, and site. The bidder is expected to carefully examine the site of the proposed work, the proposal, plans, specifications, and contract forms. Bidders shall satisfy themselves to the character, quality, and quantities of work to be performed, materials to be furnished, and to the requirements of the proposed contract. The submission of a proposal shall be prima facie evidence that the bidder has made such examination and is satisfied to the conditions to be encountered in performing the work and the requirements of the proposed contract, plans, and specifications.

Boring logs and other records of subsurface investigations and tests are available for inspection of bidders. It is understood and agreed that such subsurface information, whether included in the plans, specifications, or otherwise made available to the bidder, was obtained and is intended for Owner's design and estimating purposes only. Such information has been made available for the convenience of all bidders. It is further understood and agreed that each bidder is solely responsible for all assumptions, deductions, or conclusions which the bidder may make or obtain from their own examination of the boring logs and other records of subsurface investigations and tests that are furnished by Owner.

20-07 Preparation of proposal. The bidder shall submit their proposal on the forms furnished by Owner. All blank spaces in the proposal forms, unless explicitly stated otherwise, must be correctly filled in where indicated for each and every item for which a quantity is given. The bidder shall state the price (written in ink or typed) both in words and numerals which they propose for each pay item furnished in the proposal. In case of conflict between words and numerals, the words, unless obviously incorrect, shall govern.

The bidder shall correctly sign the proposal in ink. If the proposal is made by an individual, their name and post office address must be shown. If made by a partnership, the name and post office address of each member of the partnership must be shown. If made by a corporation, the person signing the proposal shall give the name of the state where the corporation was chartered and the name, titles, and business address of the president, secretary, and the treasurer. Anyone signing a proposal as an agent shall file evidence of their authority to do so and that the signature is binding upon the firm or corporation.

20-08 Responsive and responsible bidder. A responsive bid conforms to all significant terms and conditions contained in Owner's invitation for bid. It is Owner's responsibility to decide if the exceptions taken by a bidder to the solicitation are material or not and the extent of deviation it is willing to accept.

A responsible bidder has the ability to perform successfully under the terms and conditions of a proposed procurement, as defined in 2 CFR § 200.318(h). This includes such matters as Contractor integrity, compliance with public policy, record of past performance, and financial and technical resources.

20-09 Irregular proposals. Proposals shall be considered irregular for the following reasons:

a. If the proposal is on a form other than that furnished by Owner, or if Owner's form is altered, or if any part of the proposal form is detached.

b. If there are unauthorized additions, conditional or alternate pay items, or irregularities of any kind that make the proposal incomplete, indefinite, or otherwise ambiguous.

c. If the proposal does not contain a unit price for each pay item listed in the proposal, except in the case of authorized alternate pay items, for which the bidder is not required to furnish a unit price.

d. If the proposal contains unit prices that are obviously unbalanced.

e. If the proposal is not accompanied by the proposal guaranty specified by Owner.

f. If the applicable Disadvantaged Business Enterprise information is incomplete.

Owner reserves the right to reject any irregular proposal and the right to waive technicalities if such waiver is in the best interest of Owner and conforms to local laws and ordinances pertaining to the letting of construction contracts.

20-10 Bid guarantee. Each separate proposal shall be accompanied by a bid bond, certified check, or other specified acceptable collateral, in the amount specified in the proposal form. Such bond, check, or collateral, shall be made payable to Owner.

20-11 Delivery of proposal. Each proposal submitted shall be placed in a sealed envelope plainly marked with the project number, location of airport, and name and business address of the bidder on the outside. When sent by mail, preferably registered, the sealed proposal, marked as indicated above, should be enclosed in an additional envelope. No proposal will be considered unless received at the place specified in the advertisement or as modified by Addendum before the time specified for opening all bids. Proposals received after the bid opening time shall be returned to the bidder unopened.

20-12 Withdrawal or revision of proposals. A bidder may withdraw or revise (by withdrawal of one proposal and submission of another) a proposal provided that the bidder's request for withdrawal is received by Owner in writing or by email before the time specified for opening bids. Revised proposals must be received at the place specified in the advertisement before the time specified for opening all bids.

20-13 Public opening of proposals. Proposals shall be opened, and read, publicly at the time and place specified in the advertisement. Bidders, their authorized agents, and other interested persons are invited to attend. Proposals that have been withdrawn (by written or telegraphic request) or received after the time specified for opening bids shall be returned to the bidder unopened.

20-14 Disqualification of bidders. A bidder shall be considered disqualified for any of the following reasons:

a. Submitting more than one proposal from the same partnership, firm, or corporation under the same or different name.

b. Evidence of collusion among bidders. Bidders participating in such collusion shall be disqualified as bidders for any future work of Owner until any such participating bidder has been reinstated by Owner as a qualified bidder.

c. If the bidder is considered to be in "default" for any reason specified in paragraph 20-04, *Issuance of Proposal Forms,* of this section.

20-15 Discrepancies and Omissions. A Bidder who discovers discrepancies or omissions with the project bid documents shall immediately notify Owner's Engineer of the matter. A bidder that has doubt as to the true meaning of a project requirement may submit to Owner's Engineer a written request for interpretation no later than 14 days prior to bid opening.

Any interpretation of the project bid documents by Owner's Engineer will be by written addendum issued by Owner. Owner will not consider any instructions, clarifications, or interpretations of the bidding documents in any manner other than written addendum.

END OF SECTION 20

Section 30 Award and Execution of Contract

30-01 Consideration of proposals. After the proposals are publicly opened and read, they will be compared on the basis of the summation of the products obtained by multiplying the estimated quantities shown in the proposal by the unit bid prices. If a bidder's proposal contains a discrepancy between unit bid prices written in words and unit bid prices written in numbers, the unit bid price written in words shall govern.

Until the award of a contract is made, Owner reserves the right to reject a bidder's proposal for any of the following reasons:

a. If the proposal is irregular as specified in Section 20, paragraph 20-09, *Irregular Proposals*.

b. If the bidder is disqualified for any of the reasons specified Section 20, paragraph 20-14, *Disqualification of Bidders*.

In addition, until the award of a contract is made, Owner reserves the right to reject any or all proposals, waive technicalities, if such waiver is in the best interest of Owner and is in conformance with applicable state and local laws or regulations pertaining to the letting of construction contracts; advertise for new proposals; or proceed with the work otherwise. All such actions shall promote Owner's best interests.

30-02 Award of contract. The award of a contract, if it is to be awarded, shall be made within 30 calendar days of the date specified for publicly opening proposals, unless otherwise specified herein.

If Owner elects to proceed with an award of contract, Owner will make award to the responsible bidder whose bid, conforming with all the material terms and conditions of the bid documents, is the lowest in price.

30-03 Cancellation of award. Owner reserves the right to cancel the award without liability to the bidder, except return of proposal guaranty, at any time before a contract has been fully executed by all parties and is approved by Owner in accordance with paragraph 30-07 *Approval of Contract*.

30-04 Return of proposal guaranty. All proposal guaranties, except those of the two lowest bidders, will be returned immediately after Owner has made a comparison of bids as specified in the paragraph 30-01, *Consideration of Proposals.* Proposal guaranties of the two lowest bidders will be retained by Owner until such time as an award is made, at which time, the unsuccessful bidder's proposal guaranty will be returned. The successful bidder's proposal guaranty will be returned as soon as Owner receives the contract bonds as specified in paragraph 30-05, *Requirements of Contract Bonds.*

30-05 Requirements of contract bonds. At the time of the execution of the contract, the successful bidder shall furnish Owner a surety bond or bonds that have been fully executed by the bidder and the surety guaranteeing the performance of the work and the payment of all legal debts that may be incurred by reason of Contractor's performance of the work. The surety and the form of the bond or bonds shall be acceptable to Owner. Unless otherwise specified in this subsection, the surety bond or bonds shall be in a sum equal to the full amount of the contract.

30-06 Execution of contract. The successful bidder shall sign (execute) the necessary agreements for entering into the contract and return the signed contract to Owner, along with the fully executed surety bond or bonds specified in paragraph 30-05, *Requirements of Contract Bonds,* of this section, within 15 calendar days from the date mailed or otherwise delivered to the successful bidder.

30-07 Approval of contract. Upon receipt of the contract and contract bond or bonds that have been executed by the successful bidder, Owner shall complete the execution of the contract in accordance with

local laws or ordinances, and return the fully executed contract to Contractor. Delivery of the fully executed contract to Contractor shall constitute Owner's approval to be bound by the successful bidder's proposal and the terms of the contract.

30-08 Failure to execute contract. Failure of the successful bidder to execute the contract and furnish an acceptable surety bond or bonds within the period specified in paragraph 30-06, *Execution of Contract,* of this section shall be just cause for cancellation of the award and forfeiture of the proposal guaranty, not as a penalty, but as liquidated damages to Owner.

END OF SECTION 30

Section 40 Scope of Work

40-01 Intent of contract. The intent of the contract is to provide for construction and completion, in every detail, of the work described. It is further intended that Contractor shall furnish all labor, materials, equipment, tools, transportation, and supplies required to complete the work in accordance with the plans, specifications, and terms of the contract.

40-02 Alteration of work and quantities. Owner reserves the right to make such changes in quantities and work as may be necessary or desirable to complete, in a satisfactory manner, the original intended work. Unless otherwise specified in the Contract, Owner's Engineer or RPR shall be and is hereby authorized to make, in writing, such in-scope alterations in the work and variation of quantities as may be necessary to complete the work, provided such action does not represent a significant change in the character of the work.

For purpose of this section, a significant change in character of work means: any change that is outside the current contract scope of work; any change (increase or decrease) in the total contract cost by more than 25%; or any change in the total cost of a major contract item by more than 25%.

Work alterations and quantity variances that do not meet the definition of significant change in character of work shall not invalidate the contract nor release the surety. Contractor agrees to accept payment for such work alterations and quantity variances in accordance with Section 90, paragraph 90-03, *Compensation for Altered Quantities*.

Should the value of altered work or quantity variance meet the criteria for significant change in character of work, such altered work and quantity variance shall be covered by a supplemental agreement. Supplemental agreements shall also require consent of Contractor's surety and separate performance and payment bonds. If Owner and Contractor are unable to agree on a unit adjustment for any contract item that requires a supplemental agreement, Owner reserves the right to terminate the contract with respect to the item and make other arrangements for its completion.

40-03 Omitted items. Owner, Owner's Engineer or RPR may provide written notice to Contractor to omit from the work any contract item that does not meet the definition of major contract item. Major contract items may be omitted by a supplemental agreement. Such omission of contract items shall not invalidate any other contract provision or requirement.

Should a contract item be omitted or otherwise ordered to be non-performed, Contractor shall be paid for all work performed toward completion of such item prior to the date of the order to omit such item. Payment for work performed shall be in accordance with Section 90, paragraph 90-04, *Payment for Omitted Items*.

40-04 Extra work. Should acceptable completion of the contract require Contractor to perform an item of work not provided for in the awarded contract as previously modified by change order or supplemental agreement, Owner may issue a Change Order to cover the necessary extra work. Change orders for extra work shall contain agreed unit prices for performing the change order work in accordance with the requirements specified in the order, and shall contain any adjustment to the contract time that, in RPR's opinion, is necessary for completion of the extra work.

When determined by RPR to be in Owner's best interest, RPR may order Contractor to proceed with extra work as provided in Section 90, paragraph 90-05, *Payment for Extra Work*. Extra work that is necessary for acceptable completion of the project, but is not within the general scope of the work covered by the

original contract shall be covered by a supplemental agreement as defined in Section 10, paragraph 10-59, *Supplemental Agreement*.

If extra work is essential to maintaining the project critical path, RPR may order Contractor to commence the extra work under a Time and Material contract method. Once sufficient detail is available to establish the level of effort necessary for the extra work, Owner shall initiate a change order or supplemental agreement to cover the extra work.

Any claim for payment of extra work that is not covered by written agreement (change order or supplemental agreement) shall be rejected by Owner.

40-05 Maintenance of traffic. It is the explicit intention of the contract that the safety of aircraft, as well as Contractor's equipment and personnel, is the most important consideration. Contractor shall maintain traffic in the manner detailed in the Construction Safety and Phasing Plan (CSPP).

a. It is understood and agreed that Contractor shall provide for the free and unobstructed movement of aircraft in the air operations areas (AOAs) of the airport with respect to their own operations and the operations of all subcontractors as specified in Section 80, paragraph 80-04, *Limitation of Operations*. It is further understood and agreed that Contractor shall provide for the uninterrupted operation of visual and electronic signals (including power supplies thereto) used in the guidance of aircraft while operating to, from, and upon the airport as specified in Section 70, paragraph 70-15, *Contractor's Responsibility for Utility Service and Facilities of Others*.

b. With respect to their own operations and the operations of all subcontractors, Contractor shall provide marking, lighting, and other acceptable means of identifying personnel, equipment, vehicles, storage areas, and any work area or condition that may be hazardous to the operation of aircraft, fire-rescue equipment, or maintenance vehicles at the airport in accordance with the construction safety and phasing plan (CSPP) and the safety plan compliance document (SPCD).

c. When the contract requires the maintenance of an existing road, street, or highway during Contractor's performance of work that is otherwise provided for in the contract, plans, and specifications, Contractor shall keep the road, street, or highway open to all traffic and shall provide maintenance as may be required to accommodate traffic. Contractor, at their expense, shall be responsible for the repair to equal or better than preconstruction conditions of any damage caused by Contractor's equipment and personnel. Contractor shall furnish, erect, and maintain barricades, warning signs, flag person, and other traffic control devices in reasonable conformity with the Manual on Uniform Traffic Control Devices (MUTCD) (http://mutcd.fhwa.dot.gov/), unless otherwise specified. Contractor shall also construct and maintain in a safe condition any temporary connections necessary for ingress to and egress from abutting property or intersecting roads, streets, or highways. Unless otherwise specified herein, Contractor will not be required to furnish snow removal for such existing road, street, or highway**.**

40-06 Removal of existing structures. All existing structures encountered within the established lines, grades, or grading sections shall be removed by Contractor, unless such existing structures are otherwise specified to be relocated, adjusted up or down, salvaged, abandoned in place, reused in the work or to remain in place. The cost of removing such existing structures shall not be measured or paid for directly, but shall be included in the various contract items.

Should Contractor encounter an existing structure (above or below ground) in the work for which the disposition is not indicated on the plans, the Resident Project Representative (RPR) shall be notified prior to disturbing such structure. The disposition of existing structures so encountered shall be immediately determined by RPR in accordance with the provisions of the contract.

Except as provided in Section 40, paragraph 40-07, *Rights in and Use of Materials Found in the Work*, it is intended that all existing materials or structures that may be encountered (within the lines, grades, or grading

sections established for completion of the work) shall be used in the work as otherwise provided for in the contract and shall remain the property of Owner when so used in the work.

40-07 Rights in and use of materials found in the work. Should Contractor encounter any material such as (but not restricted to) sand, stone, gravel, slag, or concrete slabs within the established lines, grades, or grading sections, the use of which is intended by the terms of the contract to be embankment, Contractor may at their own option either:

a. Use such material in another contract item, providing such use is approved by RPR and is in conformance with the contract specifications applicable to such use; or,

b. Remove such material from the site, upon written approval of RPR; or

c. Use such material for Contractor's own temporary construction on site; or,

d. Use such material as intended by the terms of the contract.

Should Contractor wish to exercise option a., b., or c., Contractor shall request RPR's approval in advance of such use.

Should RPR approve Contractor's request to exercise option a., b., or c., Contractor shall be paid for the excavation or removal of such material at the applicable contract price. Contractor shall replace, at their expense, such removed or excavated material with an agreed equal volume of material that is acceptable for use in constructing embankment, backfills, or otherwise to the extent that such replacement material is needed to complete the contract work. Contractor shall not be charged for use of such material used in the work or removed from the site.

Should RPR approve Contractor's exercise of option a., Contractor shall be paid, at the applicable contract price, for furnishing and installing such material in accordance with requirements of the contract item in which the material is used.

It is understood and agreed that Contractor shall make no claim for delays by reason of their own exercise of option a., b., or c.

Contractor shall not excavate, remove, or otherwise disturb any material, structure, or part of a structure which is located outside the lines, grades, or grading sections established for the work, except where such excavation or removal is provided for in the contract, plans, or specifications.

40-08 Final cleanup. Upon completion of the work and before acceptance and final payment will be made, Contractor shall remove from the site all machinery, equipment, surplus and discarded materials, rubbish, temporary structures, and stumps or portions of trees. Contractor shall cut all brush and woods within the limits indicated and shall leave the site in a neat and presentable condition. Material cleared from the site and deposited on adjacent property will not be considered as having been disposed of satisfactorily, unless Contractor has obtained the written permission of the property Owner.

END OF SECTION 40

Section 50 Control of Work

50-01 Authority of the Resident Project Representative (RPR). RPR has final authority regarding the interpretation of project specification requirements. RPR shall determine acceptability of the quality of materials furnished, method of performance of work performed, and the manner and rate of performance of the work. RPR does not have the authority to accept work that does not conform to specification requirements.

50-02 Conformity with plans and specifications. All work and all materials furnished shall be in reasonably close conformity with the lines, grades, grading sections, cross-sections, dimensions, material requirements, and testing requirements that are specified (including specified tolerances) in the contract, plans, or specifications.

If RPR finds the materials furnished, work performed, or the finished product not within reasonably close conformity with the plans and specifications, but that the portion of the work affected will, in their opinion, result in a finished product having a level of safety, economy, durability, and workmanship acceptable to Owner, RPR will advise Owner of their determination that the affected work be accepted and remain in place. RPR will document the determination and recommend to Owner a basis of acceptance that will provide for an adjustment in the contract price for the affected portion of the work. Changes in the contract price must be covered by contract change order or supplemental agreement as applicable.

If RPR finds the materials furnished, work performed, or the finished product are not in reasonably close conformity with the plans and specifications and have resulted in an unacceptable finished product, the affected work or materials shall be removed and replaced or otherwise corrected by and at the expense of Contractor in accordance with RPR's written orders.

The term "reasonably close conformity" shall not be construed as waiving Contractor's responsibility to complete the work in accordance with the contract, plans, and specifications. The term shall not be construed as waiving RPR's responsibility to insist on strict compliance with the requirements of the contract, plans, and specifications during Contractor's execution of the work, when, in RPR's opinion, such compliance is essential to provide an acceptable finished portion of the work.

The term "reasonably close conformity" is also intended to provide RPR with the authority, after consultation with the Sponsor and FAA, to use sound engineering judgment in their determinations to accept work that is not in strict conformity, but will provide a finished product equal to or better than that required by the requirements of the contract, plans and specifications.

RPR will not be responsible for Contractor's means, methods, techniques, sequences, or procedures of construction or the safety precautions incident thereto.

50-03 Coordination of contract, plans, and specifications. The contract, plans, specifications, and all referenced standards cited are essential parts of the contract requirements. If electronic files are provided and used on the project and there is a conflict between the electronic files and hard copy plans, the hard copy plans shall govern. A requirement occurring in one is as binding as though occurring in all. They are intended to be complementary and to describe and provide for a complete work. In case of discrepancy, calculated dimensions will govern over scaled dimensions; contract technical specifications shall govern over contract general provisions, plans, cited standards for materials or testing, and cited advisory circulars (ACs); contract general provisions shall govern over plans, cited standards for materials or testing, and cited ACs; plans shall govern over cited standards for materials or testing and cited ACs. If any paragraphs

contained in the Special Provisions conflict with General Provisions or Technical Specifications, the Special Provisions shall govern.

From time to time, discrepancies within cited testing standards occur due to the timing of the change, edits, and/or replacement of the standards. If Contractor discovers any apparent discrepancy within standard test methods, Contractor shall immediately ask RPR for an interpretation and decision, and such decision shall be final.

Contractor shall not take advantage of any apparent error or omission on the plans or specifications. In the event Contractor discovers any apparent error or discrepancy, Contractor shall immediately notify Owner or the designated representative in writing requesting their written interpretation and decision.

50-04 List of Special Provisions.

SP-1 Scope of Work
SP-2 Contract Documents
SP-3 Time and Order of Completion
SP-4 Limitation of Operation
SP-5 Construction Activity
SP-6 Affidavit of Bills Paid
SP-7 Calendar Day
SP-8 Protection of Property
SP-9 Electric Power and Natural Gas
SP-10 Lines and Grades
SP-11 Water for Construction
SP-12 Material Tests
SP-13 Barricades, Signs, and Hazard Markings
SP-14 Prevention of Air and Water Pollution
SP-15 Public Convenience and Safety
SP-16 Final Cleaning
SP-17 Insurance
SP-18 Removal and Disposal of Structures, Utilities and Obstructions
SP-19 Conformity with Plans and Allowable Deviations
SP-20 Removal of Defective and Unauthorized Work
SP-21 Disputed Claims for Extra Work
SP-22 Federal Participation
SP-23 Indemnification
SP-24 Contractor Responsibility for Work
SP-25 Correction of Faulty Work after Final Payment
SP-26 Texas State Sales Tax
SP-27 Separate Contracts
SP-28 Trench Safety
SP-29 Load Restrictions
SP-30 Notice to Proceed
SP-31 Payment for Materials on Hand
SP-32 Weighing and Measuring Equipment
SP-33 Progress Schedule
SP-34 Average Climatic Range
SP-35 Substantially Complete
SP-36 Submittals
SP-37 Geotechnical Information
SP-38 Sovereign Immunity

SP-39 Governing Law and Venue
SP-40 Third-Party Beneficiary
SP-41 Releases
SP-42 Independent Contractor
SP-43 Notice of Alleged Breach; Statutory Prerequisites
SP-44 Assignment
SP-45 Waiver of Attorney's Fees
SP-46 Prompt Pay Act
SP-47 Payment
SP-48 Project Closeout
SP-49 Disclosure of Interested Parties
SP-50 Parkhill/RPR Authority and Duty
SP-51 Anti-Boycott Statutes

50-05 Cooperation of Contractor. Contractor shall be supplied with five hard copies or an electronic PDF of the plans and specifications. Contractor shall have available on the construction site at all times one hardcopy each of the plans and specifications. Additional hard copies of plans and specifications may be obtained by Contractor for the cost of reproduction.

Contractor shall give constant attention to the work to facilitate the progress thereof, and shall cooperate with RPR and their inspectors and with other Contractors in every way possible. Contractor shall have a competent superintendent on the work at all times who is fully authorized as their agent on the work. The superintendent shall be capable of reading and thoroughly understanding the plans and specifications and shall receive and fulfill instructions from RPR or their authorized representative.

50-06 Cooperation between Contractors. Owner reserves the right to contract for and perform other or additional work on or near the work covered by this contract.

When separate contracts are let within the limits of any one project, each Contractor shall conduct the work not to interfere with or hinder the progress of completion of the work being performed by other Contractors. Contractors working on the same project shall cooperate with each other as directed.

Each Contractor involved shall assume all liability, financial or otherwise, in connection with their own contract and shall protect and hold harmless Owner from any and all damages or claims that may arise because of inconvenience, delays, or loss experienced because of the presence and operations of other Contractors working within the limits of the same project.

Contractor shall arrange their work and shall place and dispose of the materials being used to not interfere with the operations of the other Contractors within the limits of the same project. Contractor shall join their work with that of the others in an acceptable manner and shall perform it in proper sequence to that of the others.

50-07 Construction layout and stakes. Engineer/RPR shall establish necessary horizontal and vertical control. The establishment of Survey Control and/or reestablishment of survey control shall be by a State Licensed Land Surveyor. Contractor is responsible for preserving integrity of horizontal and vertical controls established by Engineer/RPR. In case of negligence on the part of Contractor or their employees, resulting in the destruction of any horizontal and vertical control, the resulting costs will be deducted as a liquidated damage against Contractor.

Prior to the start of construction, Contractor will check all control points for horizontal and vertical accuracy and certify in writing to RPR that Contractor concurs with survey control established for the project. All lines, grades and measurements from control points necessary for the proper execution and control of the work on this project will be provided to RPR. Contractor is responsible to establish all layout required for the construction of the project.

Copies of survey notes will be provided to RPR for each area of construction and for each placement of material as specified to allow RPR to make periodic checks for conformance with plan grades, alignments and grade tolerances required by the applicable material specifications. Surveys will be provided to RPR prior to commencing work items that cover or disturb the survey staking. Survey(s) and notes shall be provided in DWG and PDF.

Laser, GPS, String line, or other automatic control shall be checked with temporary control as necessary. In the case of error, on the part of Contractor, their surveyor, employees or subcontractors, resulting in established grades, alignment or grade tolerances that do not concur with those specified or shown on the plans, Contractor is solely responsible for correction, removal, replacement and all associated costs at no additional cost to Owner.

No direct payment will be made, unless otherwise specified in contract documents, for this labor, materials, or other expenses. The cost shall be included in the price of the bid for the various items of the Contract.

50-08 Authority and duties of Quality Assurance (QA) inspectors. QA inspectors shall be authorized to inspect all work done and all material furnished. Such QA inspection may extend to all or any part of the work and to the preparation, fabrication, or manufacture of the materials to be used. QA inspectors are not authorized to revoke, alter, or waive any provision of the contract. QA inspectors are not authorized to issue instructions contrary to the plans and specifications or to act as foreman for Contractor.

QA Inspectors are authorized to notify Contractor or their representatives of any failure of the work or materials to conform to the requirements of the contract, plans, or specifications and to reject such nonconforming materials in question until such issues can be referred to RPR for a decision.

50-09 Inspection of the work. All materials and each part or detail of the work shall be subject to inspection. RPR shall be allowed access to all parts of the work and shall be furnished with such information and assistance by Contractor as is required to make a complete and detailed inspection.

If RPR requests it, Contractor, at any time before acceptance of the work, shall remove or uncover such portions of the finished work as may be directed. After examination, Contractor shall restore said portions of the work to the standard required by the specifications. Should the work thus exposed or examined prove acceptable, the uncovering, or removing, and the replacing of the covering or making good of the parts removed will be paid for as extra work; but should the work so exposed or examined prove unacceptable, the uncovering, or removing, and the replacing of the covering or making good of the parts removed will be at Contractor's expense.

Provide advance written notice to RPR of work Contractor plans to perform each week and each day. Any work done or materials used without written notice and allowing opportunity for inspection by RPR may be ordered removed and replaced at Contractor's expense.

Should the contract work include relocation, adjustment, or any other modification to existing facilities, not the property of the (contract) Owner, authorized representatives of Owners of such facilities shall have the right to inspect such work. Such inspection shall in no sense make any facility owner a party to the contract, and shall in no way interfere with the rights of the parties to this contract.

50-10 Removal of unacceptable and unauthorized work. All work that does not conform to the requirements of the contract, plans, and specifications will be considered unacceptable, unless otherwise determined acceptable by RPR as provided in paragraph 50-02, *Conformity with Plans and Specifications*.

Unacceptable work, whether the result of poor workmanship, use of defective materials, damage through carelessness, or any other cause found to exist prior to the final acceptance of the work, shall be removed immediately and replaced in an acceptable manner in accordance with the provisions of Section 70, paragraph 70-14, *Contractor's Responsibility for Work*.

No removal work made under provision of this paragraph shall be done without lines and grades having been established by RPR. Work done contrary to the instructions of RPR, work done beyond the lines shown on the plans or as established by RPR, except as herein specified, or any extra work done without authority, will be considered as unauthorized and will not be paid for under the provisions of the contract. Work so done may be ordered removed or replaced at Contractor's expense.

Upon failure on the part of Contractor to comply with any order of RPR made under the provisions of this subsection, RPR will have authority to cause unacceptable work to be remedied or removed and replaced; and unauthorized work to be removed and recover the resulting costs as a liquidated damage against Contractor.

50-11 Load restrictions. Contractor shall comply with all legal load restrictions in the hauling of materials on public roads beyond the limits of the work. A special permit will not relieve Contractor of liability for damage that may result from the moving of material or equipment.

The operation of equipment of such weight or so loaded as to cause damage to structures or to any other type of construction will not be permitted. Hauling of materials over the base course or surface course under construction shall be limited as directed. No loads will be permitted on a concrete pavement, base, or structure before the expiration of the curing period. Contractor, at their own expense, shall be responsible for the repair to equal or better than preconstruction conditions of any damage caused by Contractor's equipment and personnel.

50-12 Maintenance during construction. Contractor shall maintain the work during construction and until the work is accepted. Maintenance shall constitute continuous and effective work prosecuted day by day, with adequate equipment and forces so that the work is maintained in satisfactory condition at all times.

In the case of a contract for the placing of a course upon a course or subgrade previously constructed, Contractor shall maintain the previous course or subgrade during all construction operations.

All costs of maintenance work during construction and before the project is accepted shall be included in the unit prices bid on the various contract items, and Contractor will not be paid an additional amount for such work.

50-13 Failure to maintain the work. Should Contractor at any time fail to maintain the work as provided in paragraph 50-12, *Maintenance during Construction*, RPR shall immediately notify Contractor of such noncompliance. Such notification shall specify a reasonable time within which Contractor shall be required to remedy such unsatisfactory maintenance condition. The time specified will give due consideration to the exigency that exists.

Should Contractor fail to respond to RPR's notification, Owner may suspend any work necessary for Owner to correct such unsatisfactory maintenance condition, depending on the exigency that exists. Any maintenance cost incurred by Owner, shall be recovered as a liquidated damage against Contractor.

50-14 Partial acceptance. If at any time during the execution of the project Contractor substantially completes a usable unit or portion of the work, the occupancy of which will benefit Owner, Contractor may request RPR to make final inspection of that unit. If RPR finds upon inspection that the unit has been satisfactorily completed in compliance with the contract, RPR may accept it as being complete, and Contractor may be relieved of further responsibility for that unit. Such partial acceptance and beneficial occupancy by Owner shall not void or alter any provision of the contract.

50-15 Final acceptance. Upon due notice from Contractor of presumptive completion of the entire project, RPR and Owner will make an inspection. If all construction provided for and contemplated by the contract is found to be complete in accordance with the contract, plans, and specifications, such inspection shall constitute the final inspection. RPR shall notify Contractor in writing of final acceptance as of the date of the final inspection.

If, however, the inspection discloses any work, in whole or in part, as being unsatisfactory, RPR will notify Contractor and Contractor shall correct the unsatisfactory work. Upon correction of the work, another inspection will be made which shall constitute the final inspection, provided the work has been satisfactorily completed. In such event, RPR will make the final acceptance and notify Contractor in writing of this acceptance as of the date of final inspection.

50-16 Claims for adjustment and disputes. If for any reason Contractor deems that additional compensation is due for work or materials not clearly provided for in the contract, plans, or specifications or previously authorized as extra work, Contractor shall notify RPR in writing of their intention to claim such additional compensation before Contractor begins the work on which Contractor bases the claim. If such notification is not given or RPR is not afforded proper opportunity by Contractor for keeping strict account of actual cost as required, then Contractor hereby agrees to waive any claim for such additional compensation. Such notice by Contractor and the fact that RPR has kept account of the cost of the work shall not in any way be construed as proving or substantiating the validity of the claim. When the work on which the claim for additional compensation is based has been completed, Contractor shall, within 10 calendar days, submit a written claim to RPR who will present it to Owner for consideration in accordance with local laws or ordinances.

Nothing in this subsection shall be construed as a waiver of Contractor's right to dispute final payment based on differences in measurements or computations.

END OF SECTION 50

Section 60 Control of Materials

60-01 Source of supply and quality requirements. The materials used in the work shall conform to the requirements of the contract, plans, and specifications. Unless otherwise specified, such materials that are manufactured or processed shall be new (as compared to used or reprocessed).

In order to expedite the inspection and testing of materials, Contractor shall furnish documentation to RPR as to the origin, composition, and manufacture of all materials to be used in the work. Documentation shall be furnished promptly after execution of the contract but, in all cases, prior to delivery of such materials.

At RPR's option, materials may be approved at the source of supply before delivery. If it is found after trial that sources of supply for previously approved materials do not produce specified products, Contractor shall furnish materials from other sources.

Contractor shall furnish airport lighting equipment that meets the requirements of the specifications; and is listed in AC 150/5345-53, *Airport Lighting Equipment Certification Program* and *Addendum*, that is in effect on the date of advertisement.

60-02 Samples, tests, and cited specifications. All materials used in the work shall be inspected, tested, and approved by RPR before incorporation in the work unless otherwise designated. Any work in which untested materials are used without approval or written permission of RPR shall be performed at Contractor's risk. Materials found to be unacceptable and unauthorized will not be paid for and, if directed by RPR, shall be removed at Contractor's expense.

Unless otherwise designated, quality assurance tests will be made by and at the expense of Owner in accordance with the cited standard methods of ASTM, American Association of State Highway and Transportation Officials (AASHTO), federal specifications, Commercial Item Descriptions, and all other cited methods, which are current on the date of advertisement for bids.

The testing organizations performing on-site quality assurance field tests shall have copies of all referenced standards on the construction site for use by all technicians and other personnel. Unless otherwise designated, samples for quality assurance will be taken by a qualified representative of RPR. All materials being used are subject to inspection, test, or rejection at any time prior to or during incorporation into the work. Copies of all tests will be furnished to Contractor's representative at their request after review and approval of RPR.

A copy of all Contractor QC test data shall be provided to RPR daily, along with printed reports, in an approved format, on a weekly basis. After completion of the project, and prior to final payment, Contractor shall submit a final report to RPR showing all test data reports, plus an analysis of all results showing ranges, averages, and corrective action taken on all failing tests.

Contractor shall employ a Quality Control (QC) testing organization to perform all Contractor required QC tests in accordance with Item C-100 Contractor Quality Control Program (CQCP).

60-03 Certification of compliance/analysis (COC/COA). RPR may permit the use, prior to sampling and testing, of certain materials or assemblies when accompanied by manufacturer's COC stating that such materials or assemblies fully comply with the requirements of the contract. The certificate shall be signed by the manufacturer. Each lot of such materials or assemblies delivered to the work must be accompanied by a certificate of compliance in which the lot is clearly identified. The COA is the manufacturer's COC and includes all applicable test results.

Materials or assemblies used on the basis of certificates of compliance may be sampled and tested at any time and if found not to be in conformity with contract requirements will be subject to rejection whether in place or not.

The form and distribution of certificates of compliance shall be as approved by RPR.

When a material or assembly is specified by "brand name or equal" and Contractor elects to furnish the specified "or equal," Contractor shall be required to furnish the manufacturer's certificate of compliance for each lot of such material or assembly delivered to the work. Such certificate of compliance shall clearly identify each lot delivered and shall certify as to:

a. Conformance to the specified performance, testing, quality or dimensional requirements; and,

b. Suitability of the material or assembly for the use intended in the contract work.

RPR shall be the sole judge as to whether the proposed "or equal" is suitable for use in the work.

RPR reserves the right to refuse permission for use of materials or assemblies on the basis of certificates of compliance.

60-04 Plant inspection. RPR or their authorized representative may inspect, at its source, any specified material or assembly to be used in the work. Manufacturing plants may be inspected from time to time for the purpose of determining compliance with specified manufacturing methods or materials to be used in the work and to obtain samples required for acceptance of the material or assembly.

Should RPR conduct plant inspections, the following conditions shall exist:

a. RPR shall have the cooperation and assistance of Contractor and the producer with whom Contractor has contracted for materials.

b. RPR shall have full entry at all reasonable times to such parts of the plant that concern the manufacture or production of the materials being furnished.

c. If required by RPR, Contractor shall arrange for adequate office or working space that may be reasonably needed for conducting plant inspections. Place office or working space in a convenient location with respect to the plant.

It is understood and agreed that Owner shall have the right to retest any material that has been tested and approved at the source of supply after it has been delivered to the site. RPR shall have the right to reject only material which, when retested, does not meet the requirements of the contract, plans, or specifications.

60-05 Engineer/ Resident Project Representative (RPR) field office. Contractor shall provide dedicated space for the use of Engineer, RPR, and inspectors, as a field office for the duration of the project. This space shall be located conveniently near the construction and shall be separate from any space used by Contractor. Contractor shall furnish water, sanitary facilities, heat, air conditioning, and electricity.

60-06 Storage of materials. Materials shall be stored to assure the preservation of their quality and fitness for the work. Stored materials, even though approved before storage, may again be inspected prior to their use in the work. Stored materials shall be located to facilitate their prompt inspection. Contractor shall coordinate the storage of all materials with RPR. Materials to be stored on airport property shall not create an obstruction to air navigation nor shall they interfere with the free and unobstructed movement of aircraft. Unless otherwise shown on the plans and/or CSPP, the storage of materials and the location of Contractor's plant and parked equipment or vehicles shall be as directed by RPR. Private property shall not be used for storage purposes without written permission of Owner or lessee of such property. Contractor shall make all arrangements and bear all expenses for the storage of materials on private property. Upon request, Contractor shall furnish RPR a copy of the property Owner's permission.

All storage sites on private or airport property shall be restored to their original condition by Contractor at their expense, except as otherwise agreed to (in writing) by Owner or lessee of the property.

60-07 Unacceptable materials. Any material or assembly that does not conform to the requirements of the contract, plans, or specifications shall be considered unacceptable and shall be rejected. Contractor shall remove any rejected material or assembly from the site of the work, unless otherwise instructed by RPR.

Rejected material or assembly, the defects of which have been corrected by Contractor, shall not be returned to the site of the work until such time as RPR has approved its use in the work.

60-08 Owner furnished materials. Contractor shall furnish all materials required to complete the work, except those specified, if any, to be furnished by Owner. Owner-furnished materials shall be made available to Contractor at the location specified.

All costs of handling, transportation from the specified location to the site of work, storage, and installing Owner-furnished materials shall be included in the unit price bid for the contract item in which such Owner-furnished material is used.

After any Owner-furnished material has been delivered to the location specified, Contractor shall be responsible for any demurrage, damage, loss, or other deficiencies that may occur during Contractor's handling, storage, or use of such Owner-furnished material. Owner will deduct from any monies due or to become due Contractor any cost incurred by Owner in making good such loss due to Contractor's handling, storage, or use of Owner-furnished materials.

END OF SECTION 60

Section 70 Legal Regulations and Responsibility to Public

70-01 Laws to be observed. Contractor shall keep fully informed of all federal and state laws, all local laws, ordinances, and regulations and all orders and decrees of bodies or tribunals having any jurisdiction or authority, which in any manner affect those engaged or employed on the work, or which in any way affect the conduct of the work. Contractor shall at all times observe and comply with all such laws, ordinances, regulations, orders, and decrees; and shall protect and indemnify Owner and all their officers, agents, or servants against any claim or liability arising from or based on the violation of any such law, ordinance, regulation, order, or decree, whether by Contractor or Contractor's employees.

70-02 Permits, licenses, and taxes. Contractor shall procure all permits and licenses, pay all charges, fees, and taxes, and give all notices necessary and incidental to the due and lawful execution of the work.

70-03 Patented devices, materials, and processes. If Contractor is required or desires to use any design, device, material, or process covered by letters of patent or copyright, Contractor shall provide for such use by suitable legal agreement with the Patentee or Owner. Contractor and the surety shall indemnify and hold harmless Owner, any third party, or political subdivision from any and all claims for infringement by reason of the use of any such patented design, device, material or process, or any trademark or copyright, and shall indemnify Owner for any costs, expenses, and damages which it may be obliged to pay by reason of an infringement, at any time during the execution or after the completion of the work.

70-04 Restoration of surfaces disturbed by others. Owner reserves the right to authorize the construction, reconstruction, or maintenance of any public or private utility service, FAA or National Oceanic and Atmospheric Administration (NOAA) facility, or a utility service of another government agency at any time during the progress of the work. To the extent that such construction, reconstruction, or maintenance has been coordinated with Owner, such authorized work (by others) must be shown on plans and indicated.

Except as listed above, Contractor shall not permit any individual, firm, or corporation to excavate or otherwise disturb such utility services or facilities located within the limits of the work without the written permission of RPR.

Should Owner of public or private utility service, FAA, or NOAA facility, or a utility service of another government agency be authorized to construct, reconstruct, or maintain such utility service or facility during the progress of the work, Contractor shall cooperate with such Owners by arranging and performing the work in this contract to facilitate such construction, reconstruction or maintenance by others whether or not such work by others is listed above. When ordered as extra work by RPR, Contractor shall make all necessary repairs to the work which are due to such authorized work by others, unless otherwise provided for in the contract, plans, or specifications. It is understood and agreed that Contractor shall not be entitled to make any claim for damages due to such authorized work by others or for any delay to the work resulting from such authorized work.

70-05 Federal Participation. The United States Government has agreed to reimburse Owner for some portion of the contract costs. The contract work is subject to the inspection and approval of duly authorized representatives of the FAA Administrator. No requirement of this contract shall be construed as making the United States a party to the contract nor will any such requirement interfere, in any way, with the rights of either party to the contract.

70-06 Sanitary, health, and safety provisions. Contractor's worksite and facilities shall comply with applicable federal, state, and local requirements for health, safety, and sanitary provisions.

70-07 Public convenience and safety. Contractor shall control their operations and those of their subcontractors and all suppliers, to assure the least inconvenience to the traveling public. Under all circumstances, safety shall be the most important consideration.

Contractor shall maintain the free and unobstructed movement of aircraft and vehicular traffic with respect to their own operations and those of their own subcontractors and all suppliers in accordance with Section 40, paragraph 40-05, *Maintenance of Traffic,* and shall limit such operations for the convenience and safety of the traveling public as specified in Section 80, paragraph 80-04, *Limitation of Operations*.

Contractor shall remove or control debris and rubbish resulting from its work operations at frequent intervals, and upon the order of RPR. If RPR determines the existence of Contractor debris in the work site represents a hazard to airport operations and Contractor is unable to respond in a prompt and reasonable manner, RPR reserves the right to assign the task of debris removal to a third party and recover the resulting costs as a liquidated damage against Contractor.

70-08 Construction Safety and Phasing Plan (CSPP). Contractor shall complete the work in accordance with the approved Construction Safety and Phasing Plan (CSPP) developed in accordance with AC 150/5370-2, Operational Safety on Airports During Construction. CSPP is included on Project plans.

70-09 Use of explosives. The use of explosives is not permitted on this project.

70-10 Protection and restoration of property and landscape. Contractor shall be responsible for the preservation of all public and private property, and shall protect carefully from disturbance or damage all land monuments and property markers until Engineer/RPR has witnessed or otherwise referenced their location and shall not move them until directed.

Contractor shall be responsible for all damage or injury to property of any character, during the execution of the work, resulting from any act, omission, neglect, or misconduct in manner or method of executing the work, or at any time due to defective work or materials, and said responsibility shall not be released until the project has been completed and accepted.

When or where any direct or indirect damage or injury is done to public or private property by or on account of any act, omission, neglect, or misconduct in the execution of the work, or in consequence of the non-execution thereof by Contractor, Contractor shall restore, at their expense, such property to a condition similar or equal to that existing before such damage or injury was done, by repairing, or otherwise restoring as may be directed, or Contractor shall make good such damage or injury in an acceptable manner.

70-11 Responsibility for damage claims. Contractor shall indemnify and hold harmless Engineer/RPR and Owner and their officers, agents, and employees from all suits, actions, or claims, of any character, brought because of any injuries or damage received or sustained by any person, persons, or property on account of the operations of Contractor; or on account of or in consequence of any neglect in safeguarding the work; or through use of unacceptable materials in constructing the work; or because of any act or omission, neglect, or misconduct of said Contractor; or because of any claims or amounts recovered from any infringements of patent, trademark, or copyright; or from any claims or amounts arising or recovered under the "Workmen's Compensation Act," or any other law, ordinance, order, or decree. Money due Contractor under and by virtue of their own contract considered necessary by Owner for such purpose may be retained for the use of Owner or, in case no money is due, their own surety may be held until such suits, actions, or claims for injuries or damages shall have been settled and suitable evidence to that effect furnished to Owner, except that money due Contractor will not be withheld when Contractor produces satisfactory evidence that he or she is adequately protected by public liability and property damage insurance.

70-12 Third party beneficiary clause. It is specifically agreed between the parties executing the contract that it is not intended by any of the provisions of any part of the contract to create for the public or any

member thereof, a third-party beneficiary or to authorize anyone not a party to the contract to maintain a suit for personal injuries or property damage pursuant to the terms or provisions of the contract.

70-13 Opening sections of the work to traffic. If it is necessary for Contractor to complete portions of the contract work for the beneficial occupancy of Owner prior to completion of the entire contract, such "phasing" of the work must be specified below and indicated on the approved Construction Safety and Phasing Plan (CSPP) and the project plans. When so specified, Contractor shall complete such portions of the work on or before the date specified or as otherwise specified in the CSPP.

Upon completion of any portion of work listed above, such portion shall be accepted by Owner in accordance with Section 50, paragraph 50-14, *Partial Acceptance*.

No portion of the work may be opened by Contractor until directed by Owner in writing. Should it become necessary to open a portion of the work to traffic on a temporary or intermittent basis, such openings shall be made when, in the opinion of RPR, such portion of the work is in an acceptable condition to support the intended traffic. Temporary or intermittent openings are considered to be inherent in the work and shall not constitute either acceptance of the portion of the work so opened or a waiver of any provision of the contract. Any damage to the portion of the work so opened that is not attributable to traffic which is permitted by Owner shall be repaired by Contractor at their expense.

Contractor shall make their own estimate of the inherent difficulties involved in completing the work under the conditions herein described and shall not claim any added compensation by reason of delay or increased cost due to opening a portion of the contract work.

Contractor must conform to safety standards contained AC 150/5370-2 and the approved CSPP.

Contractor shall refer to the plans, specifications, and the approved CSPP to identify barricade requirements, temporary and/or permanent markings, airfield lighting, guidance signs and other safety requirements prior to opening up sections of work to traffic.

70-14 Contractor's responsibility for work. Until RPR's final written acceptance of the entire completed work, excepting only those portions of the work accepted in accordance with Section 50, paragraph 50-14, *Partial Acceptance*, Contractor shall have the charge and care thereof and shall take every precaution against injury or damage to any part due to the action of the elements or from any other cause, whether arising from the execution or from the non-execution of the work. Contractor shall rebuild, repair, restore, and make good all injuries or damages to any portion of the work occasioned by any of the above causes before final acceptance and shall bear the expense thereof except damage to the work due to unforeseeable causes beyond the control of and without the fault or negligence of Contractor, including but not restricted to acts of God such as earthquake, tidal wave, tornado, hurricane or other cataclysmic phenomenon of nature, or acts of the public enemy or of government authorities.

If the work is suspended for any cause whatever, Contractor shall be responsible for the work and shall take such precautions necessary to prevent damage to the work. Contractor shall provide for normal drainage and shall erect necessary temporary structures, signs, or other facilities at their own expense. During such period of suspension of work, Contractor shall properly and continuously maintain in an acceptable growing condition all living material in newly established planting, seeding, and sodding furnished under the contract, and shall take adequate precautions to protect new tree growth and other important vegetative growth against injury.

70-15 Contractor's responsibility for utility service and facilities of others. As provided in paragraph 70-04, *Restoration of Surfaces Disturbed by Others*, Contractor shall cooperate with Owner of any public or private utility service, FAA or NOAA, or a utility service of another government agency that may be authorized by Owner to construct, reconstruct or maintain such utility services or facilities during the progress of the work. In addition, Contractor shall control their operations to prevent the unscheduled interruption of such utility services and facilities.

To the extent that such public or private utility services, FAA, or NOAA facilities, or utility services of another governmental agency are known to exist within the limits of the contract work, the approximate locations have been indicated on the plans and/or in the contract documents.

It is understood and agreed that Owner does not guarantee the accuracy or the completeness of the location information relating to existing utility services, facilities, or structures that may be shown on the plans or encountered in the work. Any inaccuracy or omission in such information shall not relieve Contractor of the responsibility to protect such existing features from damage or unscheduled interruption of service.

It is further understood and agreed that Contractor shall, upon execution of the contract, notify Owners of all utility services or other facilities of their plan of operations. Such notification shall be in writing addressed to "The Person to Contact" as provided in this paragraph and paragraph 70-04, *Restoration of Surfaces Disturbed By Others*. A copy of each notification shall be given to RPR.

In addition to the general written notification provided, it shall be the responsibility of Contractor to keep such individual Owners advised of changes in their plan of operations that would affect such Owners.

Prior to beginning the work in the general vicinity of an existing utility service or facility, Contractor shall again notify each such Owner of their plan of operation. If, in Contractor's opinion, Owner's assistance is needed to locate the utility service or facility or the presence of a representative of Owner is desirable to observe the work, such advice should be included in the notification. Such notification shall be given by the most expeditious means to reach the utility owner's "Person to Contact" no later than two normal business days prior to Contractor's commencement of operations in such general vicinity. Contractor shall furnish a written summary of the notification to RPR.

Contractor's failure to give the two days' notice shall be cause for Owner to suspend Contractor's operations in the general vicinity of a utility service or facility.

Where the outside limits of an underground utility service have been located and staked on the ground, Contractor shall be required to use hand excavation methods within 3 feet (1 m) of such outside limits at such points as may be required to ensure protection from damage due to Contractor's operations.

Should Contractor damage or interrupt the operation of a utility service or facility by accident or otherwise, Contractor shall immediately notify the proper authority and RPR and shall take all reasonable measures to prevent further damage or interruption of service. Contractor, in such events, shall cooperate with the utility service or facility owner and RPR continuously until such damage has been repaired and service restored to the satisfaction of the utility or facility owner.

Contractor shall bear all costs of damage and restoration of service to any utility service or facility due to their operations whether due to negligence or accident. Owner reserves the right to deduct such costs from any monies due or which may become due Contractor, or their own surety.

70-15.1 FAA facilities and cable runs. Contractor is hereby advised that the construction limits of the project include existing facilities and buried cable runs that are owned, operated, and maintained by the FAA. Contractor, during the execution of the project work, shall comply with the following:

a. Contractor shall permit FAA maintenance personnel the right of access to the project work site for purposes of inspecting and maintaining all existing FAA owned facilities.

b. Contractor shall provide notice to the FAA Air Traffic Organization (ATO)/Technical Operations/System Support Center (SSC) Point-of-Contact through the airport a minimum of seven (calendar days prior to commencement of construction activities in order to permit sufficient time to locate and mark existing buried cables and to schedule any required facility outages.

c. If execution of the project work requires a facility outage, Contractor shall contact the FAA Point-of-Contact a minimum of 72 hours prior to the time of the required outage.

d. Any damage to FAA cables, access roads, or FAA facilities during construction caused by Contractor's equipment or personnel whether by negligence or accident will require Contractor to repair or replace the damaged cables, access road, or FAA facilities to FAA requirements. Contractor shall not bear the cost to repair damage to underground facilities or utilities improperly located by the FAA.

e. If the project work requires the cutting or splicing of FAA owned cables, the FAA Point-of-Contact shall be contacted a minimum of 72 hours prior to the time the cable work commences. The FAA reserves the right to have a FAA representative on site to observe the splicing of the cables as a condition of acceptance. All cable splices are to be accomplished in accordance with FAA specifications and require approval by the FAA Point-of-Contact as a condition of acceptance by Owner. Contractor is hereby advised that FAA restricts the location of where splices may be installed. If a cable splice is required in a location that is not permitted by FAA, Contractor shall furnish and install a sufficient length of new cable that eliminates the need for any splice.

70-16 Furnishing rights-of-way. Owner will be responsible for furnishing all rights-of-way upon which the work is to be constructed in advance of Contractor's operations.

70-17 Personal liability of public officials. In carrying out any of the contract provisions or in exercising any power or authority granted by this contract, there shall be no liability upon Engineer, RPR, their authorized representatives, or any officials of Owner either personally or as an official of Owner. It is understood that in such matters they act solely as agents and representatives of Owner.

70-18 No waiver of legal rights. Upon completion of the work, Owner will expeditiously make final inspection and notify Contractor of final acceptance. Such final acceptance, however, shall not preclude or stop Owner from correcting any measurement, estimate, or certificate made before or after completion of the work, nor shall Owner be precluded or stopped from recovering from Contractor or their surety, or both, such overpayment as may be sustained, or by failure on the part of Contractor to fulfill their obligations under the contract. A waiver on the part of Owner of any breach of any part of the contract shall not be held to be a waiver of any other or subsequent breach.

Contractor, without prejudice to the terms of the contract, shall be liable to Owner for latent defects, fraud, or such gross mistakes as may amount to fraud, or as regards Owner's rights under any warranty or guaranty.

70-19 Environmental protection. Contractor shall comply with all federal, state, and local laws and regulations controlling pollution of the environment. Contractor shall take necessary precautions to prevent pollution of streams, lakes, ponds, and reservoirs with fuels, oils, asphalts, chemicals, or other harmful materials and to prevent pollution of the atmosphere from particulate and gaseous matter.

70-20 Archaeological and historical findings. Unless otherwise specified in this subsection, Contractor is advised that the site of the work is not within any property, district, or site, and does not contain any building, structure, or object listed in the current National Register of Historic Places published by the United States Department of Interior.

Should Contractor encounter, during their operations, any building, part of a building, structure, or object that is incongruous with its surroundings, Contractor shall immediately cease operations in that location and notify RPR. RPR will immediately investigate Contractor's finding and Owner will direct Contractor to either resume operations or to suspend operations as directed.

Should Owner order suspension of Contractor's operations in order to protect an archaeological or historical finding, or order Contractor to perform extra work, such shall be covered by an appropriate contract change order or supplemental agreement as provided in Section 40, paragraph 40-04, *Extra Work,* and Section 90, paragraph 90-05, *Payment for Extra Work*. If appropriate, the contract change order or supplemental agreement shall include an extension of contract time in accordance with Section 80, paragraph 80-07, *Determination and Extension of Contract Time*.

70-21 Insurance Requirements. See Section GC-31, Contractor Insurance.

END OF SECTION 70

Section 80 Execution and Progress

80-01 Subletting of contract. Owner will not recognize any subcontractor on the work. Contractor shall at all times when work is in progress be represented either in person, by a qualified superintendent, or by other designated, qualified representative who is duly authorized to receive and execute orders of the Resident Project Representative (RPR).

Contractor shall perform, with his organization, an amount of work equal to at least 25 percent of the total contract cost.

Should Contractor elect to assign their contract, said assignment shall be concurred in by the surety, shall be presented for the consideration and approval of Owner, and shall be consummated only on the written approval of Owner.

Contractor shall provide copies of all subcontracts to RPR 14 days prior to being utilized on the project. As a minimum, the information shall include the following:

- Subcontractor's legal company name.
- Subcontractor's legal company address, including County name.
- Principal contact person's name, phone, and fax number.
- Complete narrative description, and dollar value of work to be performed by the subcontractor.
- Copies of required insurance certificates in accordance with the specifications.
- Minority/ non-minority status.

80-02 Notice to proceed (NTP). Owners notice to proceed will state the date on which contract time commences. Contractor is expected to commence project operations within 10 days of the NTP date. Contractor shall notify RPR at least 24 hours in advance of the time contract operations begins. Contractor shall not commence any actual operations prior to the date on which the notice to proceed is issued by Owner.

80-03 Execution and progress. Unless otherwise specified, Contractor shall submit their coordinated construction schedule showing all work activities for RPR’s review and acceptance at least 10 days prior to the start of work. Contractor’s progress schedule, once accepted by RPR, will represent Contractor's baseline plan to accomplish the project in accordance with the terms and conditions of the Contract. RPR will compare actual Contractor progress against the baseline schedule to determine that status of Contractor's performance. Contractor shall provide sufficient materials, equipment, and labor to guarantee the completion of the project in accordance with the plans and specifications within the time set forth in the proposal.

If Contractor falls significantly behind the submitted schedule, Contractor shall, upon RPR’s request, submit a revised schedule for completion of the work within the contract time and modify their operations to provide such additional materials, equipment, and labor necessary to meet the revised schedule. Should the execution of the work be discontinued for any reason, Contractor shall notify RPR at least 24 hours in advance of resuming operations.

Contractor shall not commence any actual construction prior to the date on which the NTP is issued by Owner.

Project schedule shall be prepared as a network diagram in Critical Path Method (CPM), Program Evaluation and Review Technique (PERT), or other format, or as otherwise specified. It shall include information on the sequence of work activities, milestone dates, and activity duration. The schedule shall show all work items identified in the project proposal for each work area and shall include the project start date and end date.

Contractor shall maintain the work schedule and provide an update and analysis of the progress schedule on a twice monthly basis, or as otherwise specified in the contract. Submission of the work schedule shall not relieve Contractor of overall responsibility for scheduling, sequencing, and coordinating all work to comply with the requirements of the contract.

80-04 Limitation of operations. Contractor shall control their operations and the operations of their subcontractors and all suppliers to provide for the free and unobstructed movement of aircraft in the air operations areas (AOA) of the airport.

When the work requires Contractor to conduct their operations within an AOA of the airport, the work shall be coordinated with airport operations (through RPR) at least 48 hours prior to commencement of such work. Contractor shall not close an AOA until so authorized by RPR and until the necessary temporary marking, signage and associated lighting is in place as provided in Section 70, paragraph 70-08, *Construction Safety and Phasing Plan (CSPP)*.

When the contract work requires Contractor to work within an AOA of the airport on an intermittent basis (intermittent opening and closing of the AOA), Contractor shall maintain constant communications as specified; immediately obey all instructions to vacate the AOA; and immediately obey all instructions to resume work in such AOA. Failure to maintain the specified communications or to obey instructions shall be cause for suspension of Contractor's operations in the AOA until satisfactory conditions are provided. The areas of the AOA identified in the Construction Safety Phasing Plan (CSPP) and as listed below, cannot be closed to operating aircraft to permit Contractor's operations on a continuous basis and will therefore be closed to aircraft operations intermittently as shown in the CSPP.

Contractor shall be required to conform to safety standards contained in AC 150/5370-2, Operational Safety on Airports During Construction and the approved CSPP.

80-04.1 Operational safety on airport during construction. All Contractors' operations shall be conducted in accordance with the approved project Construction Safety and Phasing Plan (CSPP) and the Safety Plan Compliance Document (SPCD) and the provisions set forth within the current version of AC 150/5370-2, Operational Safety on Airports During Construction. The CSPP included within the contract documents conveys minimum requirements for operational safety on the airport during construction activities. Contractor shall prepare and submit a SPCD that details how it proposes to comply with the requirements presented within the CSPP.

Contractor shall implement all necessary safety plan measures prior to commencement of any work activity. Contractor shall conduct routine checks to assure compliance with the safety plan measures.

Contractor is responsible to Owner for the conduct of all subcontractors it employs on the project. Contractor shall assure that all subcontractors are made aware of the requirements of the CSPP and SPCD and that they implement and maintain all necessary measures.

No deviation or modifications may be made to the approved CSPP and SPCD unless approved in writing by Owner. The necessary coordination actions to review Contractor proposed modifications to an approved CSPP or approved SPCD can require a significant amount of time.

80-05 Character of workers, methods, and equipment. Contractor shall, at all times, employ sufficient labor and equipment for prosecuting the work to full completion in the manner and time required by the contract, plans, and specifications.

All workers shall have sufficient skill and experience to perform properly the work assigned to them. Workers engaged in special work or skilled work shall have sufficient experience in such work and in the operation of the equipment required to perform the work satisfactorily.

Any person employed by Contractor or by any subcontractor who violates any operational regulations or operational safety requirements and, in the opinion of RPR, does not perform his work in a proper and skillful manner or is intemperate or disorderly shall, at the written request of RPR, be removed immediately by Contractor or subcontractor employing such person, and shall not be employed again in any portion of the work without approval of RPR.

Should Contractor fail to remove such person or persons, or fail to furnish suitable and sufficient personnel for the proper execution of the work, RPR may suspend the work by written notice until compliance with such orders.

All equipment that is proposed to be used on the work shall be of sufficient size and in such mechanical condition as to meet requirements of the work and to produce a satisfactory quality of work. Equipment used on any portion of the work shall not cause injury to previously completed work, adjacent property, or existing airport facilities due to its use.

When the methods and equipment to be used by Contractor in accomplishing the work are not prescribed in the contract, Contractor is free to use any methods or equipment that will accomplish the work in conformity with the requirements of the contract, plans, and specifications.

When the contract specifies the use of certain methods and equipment, such methods and equipment shall be used unless otherwise authorized by RPR. If Contractor desires to use a method or type of equipment other than specified in the contract, Contractor may request authority from RPR to do so. The request shall be in writing and shall include a full description of the methods and equipment proposed and of the reasons for desiring to make the change. If approval is given, it will be on the condition that Contractor will be fully responsible for producing work in conformity with contract requirements. If, after trial use of the substituted methods or equipment, RPR determines that the work produced does not meet contract requirements, Contractor shall discontinue the use of the substitute method or equipment and shall complete the remaining work with the specified methods and equipment. Contractor shall remove any deficient work and replace it with work of specified quality, or take such other corrective action as RPR may direct. No change will be made in basis of payment for the contract items involved nor in contract time as a result of authorizing a change in methods or equipment under this paragraph.

80-06 Temporary suspension of the work. Owner shall have the authority to suspend the work wholly, or in part, for such period or periods Owner may deem necessary, due to unsuitable weather, or other conditions considered unfavorable for the execution of the work, or for such time necessary due to the failure on the part of Contractor to carry out orders given or perform any or all provisions of the contract.

In the event that Contractor is ordered by Owner, in writing, to suspend work for some unforeseen cause not otherwise provided for in the contract and over which Contractor has no control, Contractor may be reimbursed for actual money expended on the work during the period of shutdown. No allowance will be made for anticipated profits. The period of shutdown shall be computed from the effective date of the written order to suspend work to the effective date of the written order to resume the work. Claims for such compensation shall be filed with RPR within the time period stated in RPR's order to resume work. Contractor shall submit with their own claim information substantiating the amount shown on the claim. RPR will forward Contractor's claim to Owner for consideration in accordance with local laws or ordinances. No provision of this article shall be construed as entitling Contractor to compensation for delays due to inclement weather or for any other delay provided for in the contract, plans, or specifications.

If it becomes necessary to suspend work for an indefinite period, Contractor shall store all materials in such manner that they will not become an obstruction nor become damaged in any way. Contractor shall take

every precaution to prevent damage or deterioration of the work performed and provide for normal drainage of the work. Contractor shall erect temporary structures where necessary to provide for traffic on, to, or from the airport.

80-07 Determination and extension of contract time. The number of calendar days shall be stated in the proposal and contract and shall be known as the Contract Time.

If the contract time requires extension for reasons beyond Contractor's control, it shall be adjusted as follows:

80-07.1 **Contract time based on calendar days.** Contract Time based on calendar days shall consist of the number of calendar days stated in the contract counting from the effective date of the Notice to Proceed and including all Saturdays, Sundays, holidays, and non-workdays. All calendar days elapsing between the effective dates of Owner's orders to suspend and resume all work, due to causes not the fault of Contractor, shall be excluded.

At the time of final payment, the contract time shall be increased in the same proportion as the cost of the actually completed quantities bears to the cost of the originally estimated quantities in the proposal. Such increase in the contract time shall not consider either cost of work or the extension of contract time that has been covered by a change order or supplemental agreement. Charges against the contract time will cease as of the date of final acceptance. **]**

80-08 Failure to complete on time. For each calendar day or working day, as specified in the contract, that any work remains uncompleted after the contract time (including all extensions and adjustments as provided in paragraph 80-07, *Determination and Extension of Contract Time*) the sum specified in the contract and proposal as liquidated damages (LD) will be deducted from any money due or to become due Contractor or their own surety. Such deducted sums shall not be deducted as a penalty but shall be considered as liquidation of a reasonable portion of damages including but not limited to additional engineering services that will be incurred by Owner should Contractor fail to complete the work in the time provided in their contract.

Schedule	Liquidated Damages Cost	Allowed Construction Time
1	$1,000	90 days

The maximum construction time allowed is indicated in the plans. Permitting Contractor to continue and finish the work or any part of it after the time fixed for its completion, or after the date to which the time for completion may have been extended, will in no way operate as a wavier on the part of Owner of any of its rights under the contract.

80-09 Default and termination of contract. Contractor shall be considered in default of their contract and such default will be considered as cause for Owner to terminate the contract for any of the following reasons, if Contractor:

a. Fails to begin the work under the contract within the time specified in the Notice to Proceed, or

b. Fails to perform the work or fails to provide sufficient workers, equipment and/or materials to assure completion of work in accordance with the terms of the contract, or

c. Performs the work unsuitably or neglects or refuses to remove materials or to perform anew such work as may be rejected as unacceptable and unsuitable, or

d. Discontinues the execution of the work, or

e. Fails to resume work which has been discontinued within a reasonable time after notice to do so, or

f. Becomes insolvent or is declared bankrupt, or commits any act of bankruptcy or insolvency, or

g. Allows any final judgment to stand against Contractor unsatisfied for a period of 10 days, or

h. Makes an assignment for the benefit of creditors, or

i. For any other cause whatsoever, fails to carry on the work in an acceptable manner.

Should Owner consider Contractor in default of the contract for any reason above, Owner shall immediately give written notice to Contractor and Contractor's surety as to the reasons for considering Contractor in default and Owner's intentions to terminate the contract.

If Contractor or surety, within a period of 10 days after such notice, does not proceed in accordance therewith, then Owner will, upon written notification from RPR of the facts of such delay, neglect, or default and Contractor's failure to comply with such notice, have full power and authority without violating the contract, to take the execution of the work out of the hands of Contractor. Owner may appropriate or use any or all materials and equipment that have been mobilized for use in the work and are acceptable and may enter into an agreement for the completion of said contract according to the terms and provisions thereof, or use such other methods as in the opinion of RPR will be required for the completion of said contract in an acceptable manner.

All costs and charges incurred by Owner, together with the cost of completing the work under contract, will be deducted from any monies due or which may become due Contractor. If such expense exceeds the sum which would have been payable under the contract, then Contractor and the surety shall be liable and shall pay to Owner the amount of such excess.

80-10 Termination for national emergencies. Owner shall terminate the contract or portion thereof by written notice when Contractor is prevented from proceeding with the construction contract as a direct result of an Executive Order of the President with respect to the execution of war or in the interest of national defense.

When the contract, or any portion thereof, is terminated before completion of all items of work in the contract, payment will be made for the actual number of units or items of work completed at the contract price or as mutually agreed for items of work partially completed or not started. No claims or loss of anticipated profits shall be considered.

Reimbursement for organization of the work, and other overhead expenses, (when not otherwise included in the contract) and moving equipment and materials to and from the job will be considered, the intent being that an equitable settlement will be made with Contractor.

Acceptable materials, obtained or ordered by Contractor for the work and that are not incorporated in the work shall, at the option of Contractor, be purchased from Contractor at actual cost as shown by receipted bills and actual cost records at such points of delivery as may be designated by RPR.

Termination of the contract or a portion thereof shall neither relieve Contractor of their responsibilities for the completed work nor shall it relieve their surety of its obligation for and concerning any just claim arising out of the work performed.

80-11 Work area, storage area and sequence of operations. Contractor shall obtain approval from RPR prior to beginning any work in all areas of the airport. No operating runway, taxiway, or air operations area (AOA) shall be crossed, entered, or obstructed while it is operational. Contractor shall plan and coordinate work in accordance with the approved CSPP and SPCD.

END OF SECTION 80

Section 90 Measurement and Payment

90-01 Measurement of quantities. All work completed under the contract will be measured by RPR, or their authorized representatives, using United States Customary Units of Measurement.

The method of measurement and computations to be used in determination of quantities of material furnished and of work performed under the contract will be those methods generally recognized as conforming to good engineering practice.

Unless otherwise specified, longitudinal measurements for area computations will be made horizontally, and no deductions will be made for individual fixtures (or leave-outs) having an area of 9 square feet or less. Unless otherwise specified, transverse measurements for area computations will be the neat dimensions shown on the plans or ordered in writing by RPR.

Unless otherwise specified, all contract items which are measured by the linear foot such as electrical ducts, conduits, pipe culverts, underdrains, and similar items shall be measured parallel to the base or foundation upon which such items are placed.

The term "lump sum" when used as an item of payment will mean complete payment for the work described in the contract. When a complete structure or structural unit (in effect, "lump sum" work) is specified as the unit of measurement, the unit will be construed to include all necessary fittings and accessories.

When requested by Contractor and approved by RPR in writing, material specified to be measured by the cubic yard (cubic meter) may be weighed, and such weights will be converted to cubic yards (cubic meters) for payment purposes. Factors for conversion from weight measurement to volume measurement will be determined by RPR and shall be agreed to by Contractor before such method of measurement of pay quantities is used.

Measurement and Payment Terms

Term	Description
Excavation and Embankment Volume	In computing volumes of excavation, the average end area method will be used unless otherwise specified.
Measurement and Proportion by Weight	"Ton" will mean the short ton consisting of 2,000 pounds avoirdupois. All materials that are measured or proportioned by weights shall be weighed on accurate, independently certified scales by competent, qualified personnel at locations designated by RPR. If material is shipped by rail, the car weight may be accepted provided that only the actual weight of material is paid for. However, car weights will not be acceptable for material to be passed through mixing plants. Trucks used to haul material being paid for by weight shall be weighed empty daily at such times as RPR directs, and each truck shall bear a plainly legible identification mark.
Measurement by Volume	Materials to be measured by volume in the hauling vehicle shall be hauled in approved vehicles and measured therein at the point of delivery. Vehicles for this purpose may be of any size or type acceptable for the materials hauled, provided that the body is of such shape that the actual contents may be readily and accurately determined. All vehicles shall be loaded to at least their water level capacity, and all loads shall be leveled when the vehicles arrive at the point of delivery.

Term	Description
Asphalt Material	Asphalt materials will be measured by the gallon or ton. When measured by volume, such volumes will be measured at 60°F or will be corrected to the volume at 60°F using ASTM D1250 for asphalts. Net certified scale weights or weights based on certified volumes in the case of rail shipments will be used as a basis of measurement, subject to correction when asphalt material has been lost from the car or the distributor, wasted, or otherwise not incorporated in the work. When asphalt materials are shipped by truck or transport, net certified weights by volume, subject to correction for loss or foaming, will be used for computing quantities.
Cement	Cement will be measured by the ton or hundredweight.
Structure	Structures will be measured according to neat lines shown on the plans or as altered to fit field conditions.
Timber	Timber will be measured by the thousand feet board measure (MFBM) actually incorporated in the structure. Measurement will be based on nominal widths and thicknesses and the extreme length of each piece.
Plates and Sheets	The thickness of plates and galvanized sheet used in the manufacture of corrugated metal pipe, metal plate pipe culverts and arches, and metal cribbing will be specified and measured in decimal fraction of inch.
Miscellaneous Items	When standard manufactured items are specified such as fence, wire, plates, rolled shapes, pipe conduit, etc., and these items are identified by gauge, unit weight, section dimensions, etc., such identification will be nominal weights or dimensions. Unless more stringently controlled by tolerances in cited specifications, manufacturing tolerances established by the industries involved will be accepted.
Scales	Scales must be tested for accuracy and serviced before use. Scales for weighing materials which are required to be proportioned or measured and paid for by weight shall be furnished, erected, and maintained by Contractor, or be certified permanently installed commercial scales. Platform scales shall be installed and maintained with the platform level and rigid bulkheads at each end. Scales shall be accurate within 0.5% of the correct weight throughout the range of use. Contractor shall have the scales checked under the observation of RPR before beginning work and at such other times as requested. The intervals shall be uniform in spacing throughout the graduated or marked length of the beam or dial and shall not exceed 0.1% of the nominal rated capacity of the scale, but not less than one pound (454 grams). The use of spring balances will not be permitted. In the event inspection reveals the scales have been “overweighing” (indicating more than correct weight) they will be immediately adjusted. All materials received subsequent to the last previous correct weighting-accuracy test will be reduced by the percentage of error in excess of 0.5%. In the event inspection reveals the scales have been under-weighing (indicating less than correct weight), they shall be immediately adjusted. No additional payment to Contractor will be allowed for materials previously weighed and recorded. Beams, dials, platforms, and other scale equipment shall be so arranged that the operator and RPR can safely and conveniently view them. Scale installations shall have available ten standard 50-pound (2.3 km) weights for testing the weighing equipment or suitable weights and devices for other approved equipment. All costs in connection with furnishing, installing, certifying, testing, and maintaining scales; for furnishing check weights and scale house; and for all other items specified in this subsection, for the weighing of materials for proportioning or payment, shall be included in the unit contract prices for the various items of the project.

Term	Description
Rental Equipment	Rental of equipment will be measured by time in hours of actual working time and necessary traveling time of the equipment within the limits of the work. Special equipment ordered in connection with extra work will be measured as agreed in the change order or supplemental agreement authorizing such work as provided in paragraph 90-05 *Payment for Extra Work*.
Pay Quantities	When the estimated quantities for a specific portion of the work are designated as the pay quantities in the contract, they shall be the final quantities for which payment for such specific portion of the work will be made, unless the dimensions of said portions of the work shown on the plans are revised by RPR. If revised dimensions result in an increase or decrease in the quantities of such work, the final quantities for payment will be revised in the amount represented by the authorized changes in the dimensions.

90-02 Scope of payment. Contractor shall receive and accept compensation provided for in the contract as full payment for furnishing all materials, for performing all work under the contract in a complete and acceptable manner, and for all risk, loss, damage, or expense of whatever character arising out of the nature of the work or the execution thereof, subject to the provisions of Section 70, paragraph 70-18, *No Waiver of Legal Rights*.

When the "basis of payment" subsection of a technical specification requires that the contract price (price bid) include compensation for certain work or material essential to the item, this same work or material will not also be measured for payment under any other contract item which may appear elsewhere in the contract, plans, or specifications.

90-03 Compensation for altered quantities. When the accepted quantities of work vary from the quantities in the proposal, Contractor shall accept as payment in full, so far as contract items are concerned, payment at the original contract price for the accepted quantities of work actually completed and accepted. No allowance, except as provided for in Section 40, paragraph 40-02, *Alteration of Work and Quantities,* will be made for any increased expense, loss of expected reimbursement, or loss of anticipated profits suffered or claimed by Contractor which results directly from such alterations or indirectly from their own unbalanced allocation of overhead and profit among the contract items, or from any other cause.

90-04 Payment for omitted items. As specified in Section 40, paragraph 40-03, *Omitted Items,* RPR shall have the right to omit from the work (order nonperformance) any contract item, except major contract items, in the best interest of Owner.

Should RPR omit or order nonperformance of a contract item or portion of such item from the work, Contractor shall accept payment in full at the contract prices for any work actually completed and acceptable prior to RPR's order to omit or non-perform such contract item.

Acceptable materials ordered by Contractor or delivered on the work prior to the date of RPR's order will be paid for at the actual cost to Contractor and shall thereupon become the property of Owner.

In addition to the reimbursement hereinbefore provided, Contractor shall be reimbursed for all actual costs incurred for the purpose of performing the omitted contract item prior to the date of RPR's order. Such additional costs incurred by Contractor must be directly related to the deleted contract item and shall be supported by certified statements by Contractor as to the nature the amount of such costs.

90-05 Payment for extra work. Extra work, performed in accordance with Section 40, paragraph 40-04, *Extra Work*, will be paid for at the contract prices or agreed prices specified in the change order or supplemental agreement authorizing the extra work.

90-06 Partial payments. Partial payments will be made to Contractor at least once each month as the work progresses. Said payments will be based upon estimates, prepared by RPR, of the value of the work performed and materials complete and in place, in accordance with the contract, plans, and specifications.

Such partial payments may also include the delivered actual cost of those materials stockpiled and stored in accordance with paragraph 90-07, *Payment for Materials on Hand*. No partial payment will be made when the amount due to Contractor since the last estimate amounts to less than five hundred dollars.

a. From the total of the amount determined to be payable on a partial payment, 5% of such total amount will be deducted and retained by the Owner for protection of the Owner's interests. Unless otherwise instructed by Owner, amount retained by Owner will be in effect until the final payment is made except as follows:
   (1) Contractor may request release of retainage on work that has been partially accepted by Owner in accordance with Section 50-03. Contractor must provide a certified invoice to RPR that supports the value of retainage held by the Owner for partially accepted work.
   (2) In lieu of retainage, Contractor may exercise at its option the establishment of an escrow account per paragraph 90-08.

b. Contractor is required to pay all subcontractors for satisfactory performance of their contracts no later than 30 days after the Contractor has received a partial payment. Contractor must provide the Owner evidence of prompt and full payment of retainage held by prime Contractor to the subcontractor within 30 days after the subcontractor's work is satisfactorily completed. A subcontractor's work is satisfactorily completed when all the tasks called for in the subcontract have been accomplished and documented as required by the Owner. When the Owner has made an incremental acceptance of a portion of a prime contract, the work of a subcontractor covered by that acceptance is deemed to be satisfactorily completed.

c. When at least 95% of the work has been completed to the satisfaction of RPR, RPR shall, at Owner's discretion and with the consent of the surety, prepare estimates of both the contract value and the cost of the remaining work to be done. Owner may retain an amount not less than twice the contract value or estimated cost, whichever is greater, of the work remaining to be done. The remainder, less all previous payments and deductions, will then be certified for payment to the Contractor.

It is understood and agreed that Contractor shall not be entitled to demand or receive partial payment based on quantities of work in excess of those provided in the proposal or covered by approved change orders or supplemental agreements, except when such excess quantities have been determined by RPR to be a part of the final quantity for the item of work in question.

No partial payment shall bind Owner to the acceptance of any materials or work in place as to quality or quantity. All partial payments are subject to correction at the time of final payment as provided in paragraph 90-09, *Acceptance and Final Payment*.

Contractor shall deliver to Owner a complete release of all claims for labor and material arising out of this contract before the final payment is made. If any subcontractor or supplier fails to furnish such a release in full, Contractor may furnish a bond or other collateral satisfactory to Owner to indemnify Owner against any potential lien or other such claim. The bond or collateral shall include all costs, expenses, and attorney fees Owner may be compelled to pay in discharging any such lien or claim.

90-07 Payment for materials on hand. Partial payments may be made to the extent of the delivered cost of materials to be incorporated in the work, provided that such materials meet the requirements of the contract, plans, and specifications and are delivered to acceptable sites on the airport property or at other sites in the vicinity that are acceptable to Owner. Such delivered costs of stored or stockpiled materials may be included in the next partial payment after the following conditions are met:

a. The material has been stored or stockpiled in a manner acceptable to RPR at or on an approved site.

b. Contractor has furnished RPR with acceptable evidence of the quantity and quality of such stored or stockpiled materials.

c. Contractor has furnished RPR with satisfactory evidence that the material and transportation costs have been paid.

d. Contractor has furnished Owner legal title (free of liens or encumbrances of any kind) to the material stored or stockpiled.

e. Contractor has furnished Owner evidence that the material stored or stockpiled is insured against loss by damage to or disappearance of such materials at any time prior to use in the work.

It is understood and agreed that the transfer of title and Owner's payment for such stored or stockpiled materials shall in no way relieve Contractor of their responsibility for furnishing and placing such materials in accordance with the requirements of the contract, plans, and specifications.

In no case will the amount of partial payments for materials on hand exceed the contract price for such materials or the contract price for the contract item in which the material is intended to be used.

No partial payment will be made for stored or stockpiled living or perishable plant materials.

Contractor shall bear all costs associated with the partial payment of stored or stockpiled materials in accordance with the provisions of this paragraph.

90-08 Payment of withheld funds. At Contractor's option, if an Owner withholds retainage in accordance with the methods described in paragraph 90-06 *Partial Payments*, Contractor may request that Owner deposit the retainage into an escrow account. Owner's deposit of retainage into an escrow account is subject to the following conditions:

a. Contractor shall bear all expenses of establishing and maintaining an escrow account and escrow agreement acceptable to Owner.

b. Contractor shall deposit to and maintain in such escrow only those securities or bank certificates of deposit as are acceptable to Owner and having a value not less than the retainage that would otherwise be withheld from partial payment.

c. Contractor shall enter into an escrow agreement satisfactory to Owner.

d. Contractor shall obtain the written consent of the surety to such agreement.

90-09 Acceptance and final payment. When the contract work has been accepted in accordance with the requirements of Section 50, paragraph 50-15, *Final Acceptance*, RPR will prepare the final estimate of the items of work actually performed. Contractor shall approve RPR's final estimate or advise RPR of Contractor's objections to the final estimate which are based on disputes in measurements or computations of the final quantities to be paid under the contract as amended by change order or supplemental agreement. Contractor and RPR shall resolve all disputes (if any) in the measurement and computation of final quantities to be paid within 30 calendar days of Contractor's receipt of RPR's final estimate. If, after such 30-day period, a dispute still exists, Contractor may approve RPR's estimate under protest of the quantities in dispute, and such disputed quantities shall be considered by Owner as a claim in accordance with Section 50, paragraph 50-16, *Claims for Adjustment and Disputes*.

After Contractor has approved, or approved under protest, RPR's final estimate, and after RPR's receipt of the project closeout documentation required in paragraph 90-11, *Contractor Final Project Documentation*, final payment will be processed based on the entire sum, or the undisputed sum in case of approval under protest, determined to be due Contractor less all previous payments and all amounts to be deducted under the provisions of the contract. All prior partial estimates and payments shall be subject to correction in the final estimate and payment.

If Contractor has filed a claim for additional compensation under the provisions of Section 50, paragraph 50-16, *Claims for Adjustments and Disputes,* or under the provisions of this paragraph, such claims will be considered by Owner in accordance with local laws or ordinances. Upon final adjudication of such claims,

any additional payment determined to be due Contractor will be paid pursuant to a supplemental final estimate.

90-10 Construction warranty.

a. In addition to any other warranties in this contract, Contractor warrants that work performed under this contract conforms to the contract requirements and is free of any defect in equipment, material, workmanship, or design furnished, or performed by Contractor or any subcontractor or supplier at any tier.

b. This warranty shall continue for a period of one year from the date of final acceptance of the work, except as noted. If Owner takes possession of any part of the work before final acceptance, this warranty shall continue for a period of one year from the date Owner takes possession.

c. Contractor shall remedy at Contractor's expense any failure to conform, or any defect. In addition, Contractor shall remedy at Contractor's expense any damage to Owner real or personal property, when that damage is the result of Contractor's failure to conform to contract requirements; or any defect of equipment, material, workmanship, or design furnished by Contractor.

d. Contractor shall restore any work damaged in fulfilling the terms and conditions of this clause. Contractor's warranty with respect to work repaired or replaced will run for one year from the date of repair or replacement.

e. Owner will notify Contractor, in writing, within seven days after the discovery of any failure, defect, or damage.

f. If Contractor fails to remedy any failure, defect, or damage within 14 days after receipt of notice, Owner shall have the right to replace, repair, or otherwise remedy the failure, defect, or damage at Contractor's expense.

g. With respect to all warranties, express or implied, from subcontractors, manufacturers, or suppliers for work performed and materials furnished under this contract, Contractor shall: (1) Obtain all warranties that would be given in normal commercial practice; (2) Require all warranties to be executed, in writing, for the benefit of Owner, as directed by Owner, and (3) Enforce all warranties for the benefit of Owner.

h. This warranty shall not limit Owner's rights with respect to latent defects, gross mistakes, or fraud.

90-11 Contractor Final Project Documentation. Approval of final payment to Contractor is contingent upon completion and submittal of the items listed below. The final payment will not be approved until RPR approves Contractor's final submittal. Contractor shall:

a. Provide two copies of all manufacturer warranties specified for materials, equipment, and installations.

b. Provide weekly payroll records (not previously received) from the general Contractor and all subcontractors.

c. Complete final cleanup in accordance with Section 40, paragraph 40-08, *Final Cleanup*.

d. Complete all punch list items identified during the Final Inspection.

e. Provide complete release of all claims for labor and material arising out of the Contract.

f. Provide a certified statement signed by the subcontractors, indicating actual amounts paid to the Disadvantaged Business Enterprise (DBE) subcontractors and/or suppliers associated with the project.

g. When applicable per state requirements, return copies of sales tax completion forms.

h. Manufacturer's certifications for all items incorporated in the work.

i. All required record drawings, as-built drawings or as-constructed drawings.

j. Project Operation and Maintenance (O&M) Manual(s).

k. Security for Construction Warranty.

l. Equipment commissioning documentation submitted, if required.

END OF SECTION 90

Item C-100 Contractor Quality Control Program (CQCP)

100-1 General. Quality is more than test results. Quality is the combination of proper materials, testing, workmanship, equipment, inspection, and documentation of the project. Establishing and maintaining a culture of quality is key to achieving a quality project. Contractor shall establish, provide, and maintain an effective Contractor Quality Control Program (CQCP) that details the methods and procedures that will be taken to assure that all materials and completed construction required by this contract conform to contract plans, technical specifications, and other requirements, whether manufactured by Contractor, or procured from subcontractors or vendors. Although guidelines are established and certain minimum requirements are specified here and elsewhere in the contract technical specifications, Contractor shall assume full responsibility for accomplishing the stated purpose.

Contractor shall establish a CQCP that will:

a. Provide qualified personnel to develop and implement the CQCP.

b. Provide to produce acceptable quality materials.

c. Provide sufficient information to assure that the specification requirements can be met.

d. Document the CQCP process.

Contractor shall not begin any construction or production of materials to be incorporated into the completed work until CQCP is reviewed and approved by Engineer and until Preconstruction Conference is complete. If CQCP is not submitted and approved by Preconstruction Conference, Notice to Proceed (NTP) will still be issued at the Preconstruction Conference and contract time will commence. Contractor will be able to begin construction on items not pertaining to CQCP. No partial payment will be made for materials subject to specific quality control (QC) requirements if installed before CQCP has been reviewed and approved.

QC requirements contained in this section and elsewhere in the contract technical specifications are in addition to and separate from the quality assurance (QA) testing requirements. QA testing requirements are the responsibility of Engineer or Contractor as specified in the specifications.

A Quality Control (QC)/Quality Assurance (QA) workshop with Engineer, RPR, Contractor, subcontractors, testing laboratories, and Owner's representative will be held–in conjunction with Preconstruction Conference. QC/QA workshop will be facilitated by Contractor with participation by all required CQCP personnel. Items to be addressed, at a minimum, will include:

a. Review of CQCP including submittals, QC Testing, Action & Suspension Limits for Production, Corrective Action Plans, Distribution of QC reports, and Control Charts.

b. Discussion of QA program.

c. Discussion of QC and QA Organization and authority including coordination and information exchange between QC and QA.

d. Establish regular meetings to discuss control of materials, methods, and testing.

e. Establishment of the overall QC culture.

100-2 Description of program.

a. General description. Contractor shall establish a CQCP to perform QC inspection and testing of all items of work required by the technical specifications, including those performed by subcontractors. CQCP shall ensure conformance to applicable specifications and plans with respect to materials, off-site

fabrication, workmanship, construction, finish, and functional performance. CQCP shall be effective for control of all construction work performed under this Contract and shall specifically include surveillance and tests required by the technical specifications, in addition to other requirements of this section and any other activities deemed necessary by Contractor to establish an effective level of QC.

b. Contractor Quality Control Program (CQCP). Contractor shall describe CQCP in a written document that shall be reviewed and approved by Engineer prior to Preconstruction Conference~~,~~. The written CQCP shall be submitted to the Engineer for review and approval at least 14 calendar days before the Preconstruction Conference. Contractor's CQCP and QC testing laboratory must be approved in writing by Engineer prior to the Notice to Proceed (NTP).

CQCP shall be organized to address, as a minimum, the following:

1. QC organization and resumes of key staff
2. Project progress schedule
3. Submittal schedule
4. Inspection requirements
5. QC testing plan
6. Documentation of QC activities and distribution of QC reports
7. Requirements for corrective action when QC and/or QA acceptance criteria are not met
8. Material quality and construction means and methods. Address all elements applicable to the project that affect the quality of the pavement structure including subgrade, subbase, base, and surface course. Some elements that must be addressed include, but is not limited to mix design, aggregate grading, stockpile management, mixing and transporting, placing, and finishing, quality control testing and inspection, smoothness, laydown plan, equipment, and temperature management plan.

Contractor must add any additional elements to CQCP necessary to adequately control all production/construction processes required by this contract.

100-3 CQCP organization. CQCP shall be implemented by the establishment of a QC organization. An organizational chart shall be developed to show all QC personnel, their authority, and how these personnel integrate with other management/production and construction functions and personnel.

The organizational chart shall identify all QC staff by name and function and shall indicate the total staff required to implement all elements of CQCP, including inspection and testing for each item of work. If necessary, different technicians can be used for specific inspection and testing functions for different items of work. If an outside organization or independent testing laboratory is used for implementation of all or part of CQCP, the personnel assigned shall be subject to the qualification requirements of paragraphs 100-03a and 100-03b. The organizational chart shall indicate which personnel are Contractor employees and which are provided by an outside organization.

QC organization shall, as a minimum, consist of the following personnel:

a. Program Administrator. Contractor Quality Control Program Administrator (CQCPA) must be a full-time employee of Contractor, or a consultant engaged by Contractor. CQCPA must have a minimum five years of experience in QC pavement construction with prior QC experience on a project of comparable size and scope as the contract.

Included in the five years of paving/QC experience, CQCPA must meet at least one of the following requirements:

(1) Professional Engineer with one year of airport paving experience.

(2) Engineer-in-training with two years of airport paving experience.

(3) National Institute for Certification in Engineering Technologies (NICET) Civil Engineering Technology Level IV with three years of airport paving experience.

(4) Individual with four years of airport paving experience, with a Bachelor of Science Degree in Civil Engineering, Civil Engineering Technology or Construction.

CQCPA must have full authority to institute any actions necessary for the successful implementation of the CQCP to ensure compliance with the contract plans and technical specifications. CQCPA authority must include the ability to immediately stop production until materials and/or processes are in compliance with contract specifications. CQCPA must report directly to a principal officer of the construction firm. CQCPA may supervise the Quality Control Program on more than one project if person can be at the job site within two hours after being notified of a problem.

b. QC technicians. Enough QC technicians necessary to adequately implement the CQCP must be provided. These personnel must be Engineers, engineering technicians, or experienced craftsman with qualifications in the appropriate field equivalent to NICET Level II in Civil Engineering Technology or higher and have a minimum two years of experience in their area of expertise.

QC technicians must report directly to CQCPA and perform the following functions:

(1) Inspection of all materials, construction, plant, and equipment for conformance to the technical specifications, and as required by paragraph 100-6.

(2) Performance of all QC tests as required by the technical specifications and paragraph100-8.

(3) Performance of tests for Engineer when required by the technical specifications.

Certification at an equivalent level of qualification and experience by a state or nationally recognized organization will be acceptable in lieu of NICET certification.

c. Staffing levels. Contractor shall provide sufficient qualified QC personnel to always monitor each work activity. Where material is being produced in a plant for incorporation into the work, separate plant and field technicians shall be provided at each plant and field placement location. The scheduling and coordinating of all inspection and testing must match the type and pace of work activity. CQCP shall state where different technicians will be required for different work elements.

100-4 Project progress schedule. Critical QC activities must be shown on the project schedule as required by Section 80, paragraph 80-03, *Execution and Progress*.

100-5 Submittals schedule. Contractor shall submit a detailed listing of all submittals (for example, mix designs, material certifications) and shop drawings required by the technical specifications. The listing can be developed in a spreadsheet format and shall include as a minimum:

a. Specification item number

b. Item description

c. Description of submittal

d. Specification paragraph requiring submittal

e. Scheduled date of submittal

100-6 Inspection requirements. QC inspection functions shall be organized to provide inspections for all definable features of work, as detailed herein. All inspections shall be documented by Contractor as specified by paragraph 100-9.

Inspections shall be performed as needed to ensure continuing compliance with contract requirements until completion of the particular feature of work. Inspections shall include the following minimum requirements:

a. During plant operation for material production, QC test results and periodic inspections shall be used to ensure the quality of aggregates and other mix components, and to adjust and control mix proportioning to meet the approved mix design and other requirements of the technical specifications. All equipment used in proportioning and mixing shall be inspected to ensure its proper operating condition. CQCP shall detail how these and other QC functions will be accomplished and used.

b. During field operations, QC test results and periodic inspections shall be used to ensure the quality of all materials and workmanship. All equipment used in placing, finishing, and compacting shall be inspected to ensure its proper operating condition and to ensure that all such operations are in conformance to the technical specifications and are within the plan dimensions, lines, grades, and tolerances specified. CQCP shall document how these and other QC functions will be accomplished and used.

100-7 Contractor QC testing facility.

a. For projects that include Items P-401, P-403, and P-404, Contractor shall ensure facilities, including all necessary equipment, materials, and current reference standards, are provided that meet requirements in the following paragraphs of ASTM D3666, *Standard Specification for Minimum Requirements for Agencies Testing and Inspecting Road and Paving Materials*:

- 8.1.3 Equipment Calibration and Checks;
- 8.1.9 Equipment Calibration, Standardization, and Check Records;
- 8.1.12 Test Methods and Procedures

b. For projects that include P-501, Contractor shall ensure facilities, including all necessary equipment, materials, and current reference standards, are provided that meet requirements in the following paragraphs of ASTM C1077, Standard Practice for Agencies Testing Concrete and Concrete Aggregates for Use in Construction and Criteria for Testing Agency Evaluation:

- 7 Test Methods and Procedures
- 8 Facilities, Equipment, and Supplemental Procedures

100-8 QC testing plan. As a part of the overall CQCP, Contractor shall implement a QC testing plan, as required by the technical specifications. Testing plan shall include the minimum tests and test frequencies required by each technical specification Item, as well as any additional QC tests that Contractor deems necessary to adequately control production and/or construction processes.

QC testing plan can be developed in a spreadsheet fashion and shall, as a minimum, include the following:

a. Specification item number (e.g., P-401)

b. Item description (e.g., Hot Mix Asphalt Pavements)

c. Test type (e.g., gradation, grade, asphalt content)

d. Test standard (e.g., ASTM or American Association of State Highway and Transportation Officials (AASHTO) test number, as applicable)

e. Test frequency (e.g., as required by technical specifications or minimum frequency when requirements are not stated)

f. Responsibility (e.g., plant technician)

g. Control requirements (e.g., target, permissible deviations)

QC testing plan shall contain a statistically based procedure of random sampling for acquiring test samples in accordance with ASTM D3665. RPR shall be provided the opportunity to witness QC sampling and testing.

All QC test results shall be documented by Contractor as required by paragraph 100-9.

100-9 Documentation. Contractor shall maintain current QC records of all inspections and tests performed. These records shall include factual evidence that the required QC inspections or tests have been performed, including type and number of inspections or tests involved; results of inspections or tests; nature of defects, deviations, causes for rejection, etc.; proposed remedial action; and corrective actions taken.

These records must cover both conforming and defective or deficient features and must include a statement that all supplies and materials incorporated in the work are in full compliance with the terms of the contract. Legible copies of these records shall be furnished to RPR daily. The records shall cover all work placed after the previously furnished records and shall be verified and signed by the CQCPA.

Contractor QC records required for contract shall include but not necessarily limited to:

a. Daily inspection reports. Each Contractor QC technician shall maintain a daily log of all inspections performed for both Contractor and subcontractor operations. These technician's daily reports shall provide factual evidence that continuous QC inspections have been performed and shall, as a minimum, include:

(1) Technical specification item number and description

(2) Compliance with approved submittals

(3) Proper storage of materials and equipment

(4) Proper operation of all equipment

(5) Adherence to plans and technical specifications

(6) Summary of any necessary corrective actions

(7) Safety inspection.

(8) Photographs.

Daily inspection reports shall identify all QC inspections and QC tests conducted, results of inspections, location and nature of defects found, causes for rejection, and remedial or corrective actions taken or proposed.

Daily inspection reports shall be signed by the responsible QC technician and the CQCPA. RPR shall be provided at least one copy of each daily inspection report on the workday following the day of record. When QC inspection and test results are recorded and transmitted electronically, the results must be archived.

b. Daily test reports. Contractor shall be responsible for establishing a system that will record all QC test results. Daily test reports shall document the following information:

(1) Technical specification item number and description

(2) Test designation

(3) Location

(4) Date of test

(5) Control requirements

(6) Test results

(7) Causes for rejection

(8) Recommended remedial actions

(9) Retests

Test results from each day's work period shall be submitted to RPR prior to the start of the next day's work period. When required by the technical specifications, Contractor shall maintain statistical QC charts. When QC daily test results are recorded and transmitted electronically, the results must be archived.

100-10 Corrective action requirements. CQCP shall indicate the appropriate action to be taken when a process is deemed, or believed, to be out of control (out of tolerance) and detail what action will be taken

PACKET 10.164 July 11, 2023

to bring the process into control. Requirements for corrective action shall include both general requirements for operation of the CQCP, and for individual items of work contained in the technical specifications.

CQCP shall detail how the results of QC inspections and tests will be used for determining the need for corrective action and shall contain clear rules to gauge when a process is out of control and the type of correction to be taken to regain process control.

When applicable or required by technical specifications, Contractor shall establish and use statistical QC charts for individual QC tests. Requirements for corrective action shall be linked to the control charts.

100-11 Inspection/observations by RPR. All items of material and equipment are subject to inspection/observation by RPR at the point of production, manufacture, or shipment to determine if Contractor, producer, manufacturer, or shipper maintains an adequate QC system in conformance with the requirements detailed here and the applicable technical specifications and plans. In addition, all items of materials, equipment and work in place shall be subject to inspection and/or observation by RPR at the site for the same purpose.

Inspection/observations by RPR does not relieve Contractor of performing QC inspections of either on-site or off-site Contractor's or subcontractor's work.

100-12 Noncompliance.

a. Engineer will provide written notice to Contractor of any noncompliance with their CQCP. After receipt of such notice, Contractor must take corrective action.

b. When QC activities do not comply with either CQCP or contract provisions or when Contractor fails to properly operate and maintain an effective CQCP, and no effective corrective actions have been taken after notification of non-compliance, Engineer will recommend Owner take the following actions:

(1) Order Contractor to replace ineffective or unqualified QC personnel or subcontractors and/or

(2) Order Contractor to stop operations until appropriate corrective actions are taken.

METHOD OF MEASUREMENT

100-13 Basis of measurement and payment. Contractor Quality Control Program (CQCP) is for the personnel, tests, facilities, and documentation required to implement the CQCP. CQCP will be paid as a lump sum with the following schedule of partial payments:

a. With first pay request, 25% with approval of CQCP and completion of the Quality Control (QC)/Quality Assurance (QA) workshop.

b. When 25% or more of the original contract is earned, an additional 25%.

c. When 50% or more of the original contract is earned, an additional 20%.

d. When 75% or more of the original contract is earned, an additional 20%

e. After final inspection and acceptance of project, the final 10%.

BASIS OF PAYMENT

100-14 Payment will be made under:

Item C-100 Contractor Quality Control Program (CQCP), per lump sum

PACKET 10.165 July 11, 2023

END OF ITEM C-100

Item C-102 Temporary Air and Water Pollution, Soil Erosion, and Siltation Control

DESCRIPTION

102-1. This item shall consist of temporary control measures as shown on the plans or as ordered by Resident Project Representative (RPR) during the life of a contract to control pollution of air and water, soil erosion, and siltation using silt fences, berms, dikes, dams, sediment basins, fiber mats, gravel, mulches, grasses, slope drains, and other erosion control devices or methods.

Temporary erosion control shall be in accordance with the approved erosion control plan; the approved Construction Safety and Phasing Plan (CSPP) and, AC 150/5370-2, *Operational Safety on Airports During Construction*. The temporary erosion control measures contained herein shall be coordinated with the permanent erosion control measures specified as part of this contract to the extent practical to assure economical, effective, and continuous erosion control throughout the construction period.

Temporary control may include work outside the construction limits such as borrow pit operations, equipment and material storage sites, waste areas, and temporary plant sites.

Temporary control measures shall be designed, installed, and maintained to minimize the creation of wildlife attractants that have the potential to attract hazardous wildlife on or near public-use airports.

MATERIALS

102-2.1 Grass. Grass that will not compete with the grasses sown later for permanent cover per Item T-901shall be a quick-growing species (such as ryegrass, Italian ryegrass, or cereal grasses) suitable to the area providing a temporary cover. Selected grass species shall not create a wildlife attractant.

102-2.2 Mulches. Mulches may be hay, straw, fiber mats, netting, bark, wood chips, or other suitable material reasonably clean and free of noxious weeds and deleterious materials per Item T-908. Mulches shall not create a wildlife attractant.

102-2.3 Fertilizer. Fertilizer shall be a standard commercial grade and shall conform to all federal and state regulations and to the standards of the Association of Official Agricultural Chemists.

102-2.4 Slope drains. Slope drains may be constructed of pipe, fiber mats, rubble, concrete, asphalt, or other materials that will adequately control erosion.

102-2.5 Silt fence. Silt fence shall consist of polymeric filaments which are formed into a stable network such that filaments retain their relative positions. Synthetic filter fabric shall contain ultraviolet ray inhibitors and stabilizers to provide a minimum of six months of expected usable construction life. Silt fence shall meet the requirements of ASTM D6461.

102-2.6 Other. All other materials shall meet commercial grade standards and shall be approved by Engineer before being incorporated into the project.

CONSTRUCTION REQUIREMENTS

102-3.1 General. In the event of conflict between these requirements and pollution control laws, rules, or regulations of other federal, state, or local agencies, the more restrictive laws, rules, or regulations shall apply.

Contractor shall be responsible for assuring compliance to the extent that construction practices, construction operations, and construction work are involved.

102-3.2 Schedule. Prior to the start of construction, Contractor shall submit schedules in accordance with the approved Construction Safety and Phasing Plan (CSPP) and the plans for accomplishment of temporary and permanent erosion control work for clearing and grubbing; grading; construction; paving; and structures at watercourses. Contractor shall also submit a proposed method of erosion and dust control on haul roads and borrow pits and a plan for disposal of waste materials. Work shall not be started until the erosion control schedules and methods of operation for the applicable construction have been accepted by Engineer.

102-3.3 Construction details. Contractor will be required to incorporate all permanent erosion control features into the project at the earliest practicable time as outlined in the plans and approved CSPP. Except where future construction operations will damage slopes, Contractor shall perform permanent seeding, mulching, and other specified slope protection work in stages as soon as substantial areas of exposed slopes can be made available. Temporary erosion and pollution control measures will be used to correct conditions that develop during construction that were not foreseen during the design stage; that are needed prior to installation of permanent control features; or that are needed temporarily to control erosion that develops during normal construction practices but are not associated with permanent control features on the project.

Where erosion may be a problem, schedule and perform clearing and grubbing operations so that grading operations and permanent erosion control features can follow immediately if project conditions permit. Temporary erosion control measures are required if permanent measures cannot immediately follow grading operations. Engineer shall limit the area of clearing and grubbing, excavation, borrow, and embankment operations in progress, commensurate with Contractor's capability and progress in keeping the finish grading, mulching, seeding, and other such permanent control measures current with the accepted schedule. If seasonal limitations make such coordination unrealistic, temporary erosion control measures shall be taken immediately to the extent feasible and justified as directed by Engineer.

Contractor shall provide immediate permanent or temporary pollution control measures to minimize contamination of adjacent streams or other watercourses, lakes, ponds, or other areas of water impoundment as directed by Engineer. If temporary erosion and pollution control measures are required due to Contractor's negligence, carelessness, or failure to install permanent controls as a part of the work as scheduled or directed by Engineer, the work shall be performed by Contractor and the cost shall be incidental to this item.

Engineer may increase or decrease the area of erodible earth material that can be exposed at any time based on an analysis of project conditions.

Erosion control features installed by Contractor shall be maintained by Contractor during construction.

Provide temporary structures whenever construction equipment must cross watercourses at frequent intervals. Pollutants such as fuels, lubricants, bitumen, raw sewage, wash water from concrete mixing operations, and other harmful materials shall not be discharged into any waterways, impoundments or into natural or manmade channels.

102-3.4 Installation, maintenance, and removal of silt fence. Silt fences shall extend a minimum of 16 inches and a maximum of 34 inches above the ground surface. Posts shall be set no more than 10 feet center. Filter fabric shall be cut from a continuous roll to the length required minimizing joints where possible. When joints are necessary, the fabric shall be spliced at a support post with a minimum 12-inch overlap and securely sealed. A trench shall be excavated approximately 4 inches deep by 4 inches wide on the upslope side of the silt fence. Trench shall be backfilled, and the soil compacted over the silt fence fabric. Contractor shall remove and dispose of silt that accumulates during construction and prior to establishment of permanent erosion control. The fence shall be maintained in good working condition until permanent erosion control is established. Silt fence shall be removed upon approval of Engineer.

METHOD OF MEASUREMENT

102-4.1 Temporary erosion and pollution control work required will be performed as scheduled or directed by RPR. Completed and accepted work will be measured per lump sum. This price shall be full compensation for costs associated with preparation, administration, and superintendence of the SWPPP, furnishing all materials, labor, tools, and equipment, and for any fees required by the regulating agency

102-4.2 Control work performed for protection of construction areas outside the construction limits, such as borrow and waste areas, haul roads, equipment and material storage sites, and temporary plant sites, will not be measured and paid for directly but shall be considered as a subsidiary obligation of Contractor.

BASIS OF PAYMENT

102-5.1 Accepted quantities of temporary water pollution, soil erosion, and siltation control work ordered by RPR and measured as provided in paragraph 102-4.1 will be paid for under:

Item C-102	Temporary Air and Water Pollution, Soil Erosion, and Siltation Control per lump sum under progress payments by dividing total lump sum price by number of months to final completion.

END OF ITEM C-102

Item C-105 Mobilization

105-1 Description. This item of work shall consist of, but is not limited to, work and operations necessary for the movement of personnel, equipment, material, and supplies to and from the project site for work on the project except as provided in the contract as separate pay items.

105-2 Mobilization limit. Mobilization shall be limited to 10 percent of the total project cost.

105-3 Posted notices. Prior to commencement of construction activities, the Contractor must post the following documents in a prominent and accessible place where they may be easily viewed by all employees of the prime Contractor and by all employees of subcontractors engaged by the prime Contractor: Equal Employment Opportunity (EEO) Poster "Equal Employment Opportunity is the Law" in accordance with the Office of Federal Contract Compliance Programs Executive Order 11246, as amended; Davis Bacon Wage Poster (WH 1321) - DOL "Notice to All Employees" Poster; and Applicable Davis-Bacon Wage Rate Determination. These notices must remain posted until final acceptance of the work by the Owner.

105-4 Engineer/RPR field office. Not required.

METHOD OF MEASUREMENT

105-5 Basis of measurement and payment. Based upon the contract lump sum price for "Mobilization" partial payments will be allowed as follows:

a. With first pay request, 25%.
b. When 25% or more of original contract is earned, an additional 25%.
c. When 50% or more of original contract is earned, an additional 40%.
d. After Final Inspection, staging area clean-up and delivery of all Project Closeout materials as required by Section 90, paragraph 90-11, *Contractor Final Project Documentation,* the final 10%.

BASIS OF PAYMENT

105-6 Payment will be made under:

Item C-105 Mobilization, per lump sum

END OF ITEM C-105

Item P-101 Preparation/Removal of Existing Pavements

DESCRIPTION

101-1 This item shall consist of new pavement construction, removal of existing pavement, existing drainage pipe, culvert, drainage Safety End Treatment (SET), and other miscellaneous items. The work shall be accomplished in accordance with these specifications and the applicable plans.

EQUIPMENT AND MATERIALS

101-2 All equipment and materials shall be specified here and in the following paragraphs or approved by Engineer. Equipment shall not cause damage to the pavement to remain in place.

CONSTRUCTION

101-3.1 Removal of existing pavement.

Contractor's removal operation shall be controlled to not damage adjacent pavement structure, and base material, cables, utility ducts, pipelines, or drainage structures which are to remain under the pavement.

a. Concrete pavement removal. Full depth saw cuts shall be made perpendicular to the slab surface. Contractor shall saw through the full depth of the slab including any dowels at the joint, removing the pavement and installing new dowels as shown on the plans and per the specifications. Where the perimeter of the removal limits is not located on the joint and there are no dowels present, the perimeter shall be saw cut the full depth of the pavement. The pavement inside the saw cut shall be removed by methods which will not cause distress in the pavement which is to remain in place. If the material is to be wasted on the airport site, it shall be reduced to a maximum size of 2 inches. Concrete slabs that are damaged by under breaking shall be repaired or removed and replaced as directed by Engineer.

The edge of existing concrete pavement against which new pavement abuts shall always be protected from damage. Spall and underbreak repair shall be in accordance with the plans. Any underlaying material that is to remain in place, shall be recompacted and/or replaced as shown on the plans. Adjacent areas damaged during repair shall be repaired or replaced at Contractor's expense.

b. Asphalt pavement removal and reuse. Existing asphalt surface and granular base shall be pulverized and removed to limits shown on Drawings or as directed by Engineer. Pulverized materials shall be mixed, salvaged, and reused as a subbase course under Item P-154. Existing asphalt and base may be stockpiled separately to mix in proportions to best meet P-154 gradation requirements.

c. Repair or removal of Base, Subbase, and/or Subgrade. Not used.

101-3.2 Preparation of joints and cracks prior to overlay/surface treatment. Not used.

101-3.3 Removal of Foreign Substances/contaminates. Not used.

101-3.4 Concrete spall or failed asphaltic concrete pavement repair. Not used.

101-3.5 Cold milling. Milling shall be performed with a power-operated milling machine or grinder, capable of producing a uniform finished surface. The milling machine or grinder shall operate without tearing or gouging the underlaying surface. The milling machine or grinder shall be equipped with grade and slope controls, and a positive means of dust control. All access millings shall be removed and disposed

in areas designated on Plans or as directed by Engineer. If Contractor mills or grinds deeper or wider than the plans specify, Contractor shall replace the material removed with new material at Contractor's Expense.

a. Patching. The milling machine shall be capable of cutting a vertical edge without chipping or spalling the edges of the remaining pavement and it shall have a positive method of controlling the depth of cut. RPR shall layout the area to be milled with a straightedge in increments of 1-foot widths. The area to be milled shall cover only the failed area. Any excessive area that is milled because Contractor doesn't have the appropriate milling machine, or areas that are damaged because of his negligence, shall be repaired by Contractor at Contractor's Expense.

b. Profiling, grade correction, or surface correction. The milling machine shall have a minimum width of 7 feet and it shall be equipped with electronic grade control devices that will cut the surface to the grade specified. The tolerances shall be maintained within +0 inch and -1/4 inch of the specified grade. The machine must cut vertical edges and have a positive method of dust control. The machine must have the ability to remove the millings or cuttings from the pavement and load them into a truck. All access millings shall be removed and disposed in areas designated on the plans or as directed by Engineer.

c. Clean-up. Contractor shall sweep the milled surface daily and immediately after the milling until all residual materials are removed from the pavement surface. Prior to paving, Contractor shall wet down the milled pavement and thoroughly sweep/blow the surface to remove loose residual material. Waste materials shall be collected and removed from the pavement surface and adjacent areas by sweeping or vacuuming. Waste materials shall be removed and disposed in areas designated on the plans or as directed by Engineer.

101-3.6. Preparation of asphalt pavement surfaces prior to surface treatment. Not used.

101-3.7 Maintenance. Contractor shall perform all maintenance work necessary to keep the pavement in a satisfactory condition until the full section is complete and accepted by Engineer. The surface shall be kept clean and free from foreign material. The pavement shall always be properly drained. If cleaning is necessary or if the pavement becomes disturbed, any work repairs necessary shall be performed at Contractor's expense.

101-3.8 Preparation of Joints in Rigid Pavement prior to resealing. Prior to application of sealant material, clean and dry the joints of all scale, dirt, dust, old sealant, curing compound, moisture, and other foreign matter. Contractor shall demonstrate, in the presence of Engineer, that the method used cleans the joint and does not damage the joint.

101-3.8.1 Removal of Existing Joint Sealant. All existing joint sealants will be removed by plowing or use of hand tools. Any remaining sealant and or debris will be removed by use of wire brushes or other tools as necessary. Resaw joints removing no more than 1/16 inch from each joint face. Immediately after sawing, flush out joint with water and other tools as necessary to completely remove the slurry.

101-3.8.2 Cleaning prior to sealing. Immediately before sealing, joints shall be cleaned by removing any remaining laitance and other foreign material. Allow sufficient time to dry out joints prior to sealing. Joint surfaces will be surface-dry prior to installation of sealant.

101-3.8.3 Joint sealant. Joint material and installation will be in accordance with Item P-605.

101-3.9 Preparation of Cracks in Flexible Pavement prior to sealing. Not used.

101-3.9.1 Preparation of Crack. Not used.

101-3.9.2 Removal of Existing Crack Sealant. Not used.

101-3.9.3 Crack Sealant. Crack sealant material and installation will be in accordance with Item P-605.

101-3.9.4 Removal of Pipe and other Buried Structures.

a. Removal of Existing Pipe Material. Remove the types of pipe as indicated on the plans. The pipe material shall be legally disposed of off-site in a timely manner following removal. Trenches shall be

backfilled with material equal to or better in quality than adjacent embankment. Trenches under paved areas must be compacted to 95% of ASTM D698.

b. Removal of Inlets/Manholes. Where indicated on the plans or as directed by Engineer, inlets/manholes shall be removed and legally disposed of off-site in a timely fashion after removal. Excavations after removal shall be backfilled with material equal or better in quality than adjacent embankment. When under paved areas must be compacted to 95% of ASTM D698, when outside of paved areas must be compacted to 95% of ASTM D698.

c. Removal of Safety End Treatments. Where indicated on plans or as directed by Engineer, drainage pipes/culverts and safety end treatments shall be removed and legally disposed off-site in a timely fashion after removal. Excavations after removal shall be backfilled with material equal or better in quality than adjacent embankment. When under paved areas must be compacted to 95% of ASTM D698, when outside of paved areas must be compacted to 95% of ASTM D698.

METHOD OF MEASUREMENT

101-4.1 Pavement removal for reuse. The unit of measurement for pavement removal shall be the number of square yards removed by Contractor. Any pavement removed outside the limits of removal because the pavement was damaged by negligence on the part of Contractor shall not be included in the measurement for payment. No direct measurement or payment shall be made for saw cutting. Saw cutting shall be incidental to pavement removal.

101-4.7 Removal of Pipe and other Buried Structures. No separate measurement for payment will be made. The work covered by this section shall be considered as a subsidiary obligation of Contractor and covered under the other contract items.

BASIS OF PAYMENT

101-5.1 Payment. Payment shall be made at contract unit price for the unit of measurement as specified above. This price shall be full compensation for furnishing all materials and for all preparation, hauling, and placing of the material and for all labor, equipment, tools, and incidentals necessary to complete this item.

Item P 101-5.1	Pavement Removal for Reuse, per square yard (no payment for saw cutting along existing pavement as it is incidental to other work items)

Advisory Circulars (AC)

AC 150/5380-6	Guidelines and Procedures for Maintenance of Airport Pavements.

END OF ITEM P-101

Item P-152 Excavation, Subgrade, and Embankment

DESCRIPTION

152-1.1 This item covers excavation, disposal, placement, and compaction of all materials within the limits of the work required to construct safety areas, runways, taxiways, aprons, and intermediate areas as well as other areas for drainage, building construction, parking, or other purposes in accordance with these specifications and in conformity to the dimensions and typical sections shown on the plans.

152-1.2 Classification. All material excavated shall be classified as defined below:

a. Unclassified excavation. Unclassified excavation shall consist of the excavation and disposal of all material, regardless of its nature which is not otherwise classified and paid for under one of the following items. Stockpiles of any material must not be placed in a manner to penetrate any approach surfaces. Coordinate with RPR for the allowable location and height of all stockpiles.

Rock excavation. Rock excavation shall include all solid rock in ledges, in bedded deposits, in unstratified masses, and conglomerate deposits which are so firmly cemented they cannot be removed without blasting or using rippers. All boulders containing a volume of more than 1/2 cubic yard will be classified as "rock excavation."

Muck excavation. Muck excavation shall consist of the removal and disposal of deposits or mixtures of soils and organic matter not suitable for foundation material. Muck shall include materials that will decay or produce subsidence in the embankment. It may consist of decaying stumps, roots, logs, humus, or other material not satisfactory for incorporation in the embankment.

Drainage excavation. Drainage excavation shall consist of all excavation made for the primary purpose of drainage and includes drainage ditches, such as intercepting, inlet or outlet ditches; temporary levee construction; or any other type as shown on the plans.

Borrow excavation. Borrow excavation shall consist of approved material required for the construction of embankments or for other portions of the work in excess of the quantity of usable material available from required excavations. Borrow material shall be obtained from areas designated by Engineer within the limits of the airport property but outside the normal limits of necessary grading, or from areas outside the airport boundaries.

152-1.3 Unsuitable excavation. Unsuitable material shall be disposed in designated waste areas as shown on the Plans or as directed by Engineer. Owner reserves the right to modify the stockpile location, as appropriate, without penalty or modification to Contract unit price, as necessary during the Project. Materials containing vegetable or organic matter, such as muck, peat, organic silt, or sod shall be considered unsuitable for use in embankment construction. Material suitable for topsoil may be used on the embankment slope when approved by Engineer.

CONSTRUCTION METHODS

152-2.1 General. Before beginning excavation, grading, and embankment operations in any area, the area shall be cleared or cleared and grubbed in accordance with Item P-151.

The suitability of material to be placed in embankments shall be subject to approval by Engineer. No such material shall be placed prior to obtaining Engineer approval. All unsuitable material shall become

Contractor property, unless specifically directed otherwise by Owner/Engineer, and disposed outside Airport property at Contractor expense. All waste areas shall be graded to allow positive drainage of the area and adjacent areas. The surface elevation of waste areas shall be specified on the plans or approved by Engineer.

When Contractor's excavating operations encounter artifacts of historical or archaeological significance, the operations shall be temporarily discontinued and Engineer notified per Section 70, paragraph 70-20. At the direction of Engineer, Contractor shall excavate the site in such a manner as to preserve the artifacts encountered and allow for their removal. Such excavation will be paid for as extra work.

Areas outside the limits of the pavement areas where the top layer of soil has become compacted by hauling or other Contractor activities shall be scarified and disked to a depth of 4 inches, to loosen and pulverize the soil. Stones or rock fragments larger than 4 inches in their greatest dimension will not be permitted in the top 6 inches of the subgrade.

If it is necessary to interrupt existing surface drainage, sewers or under-drainage, conduits, utilities, or similar underground structures, Contractor shall be responsible for and shall take all necessary precautions to preserve them or provide temporary services. When such facilities are encountered, Contractor shall notify Engineer, who shall arrange for their removal if necessary. Contractor, at their own expense, shall satisfactorily repair or pay the cost of all damage to such facilities or structures that may result from any of Contractor's operations during the period of the contract.

a. Blasting. Not allowed.

152-2.2 Excavation. No excavation shall be started until the work has been staked out by Contractor and Engineer has obtained from Contractor, the survey notes of the elevations and measurements of the ground surface. Contractor and Engineer shall agree that the original ground lines shown on the original topographic mapping are accurate or agree to any adjustments made to the original ground lines.

Volumetric quantities were calculated by comparing DTM files of the applicable design surfaces and generating Triangle Volume Reports. Electronic copies of DTM files and a paper copy of the original topographic map will be issued to the successful bidder.

Existing grades on the design cross sections or DTMs, where they do not match the locations of actual spot elevations shown on the topographic map, were developed by computer interpolation from those spot elevations. Prior to disturbing original grade, Contractor shall verify the accuracy of the existing ground surface by verifying spot elevations at the same locations where original field survey data was obtained as indicated on the topographic map. Contractor shall recognize that, due to the interpolation process, the actual ground surface at any particular location may differ somewhat from the interpolated surface shown on the design cross sections or obtained from the DTM's. Contractor's verification of original ground surface, however, shall be limited to verification of spot elevations as indicated herein, and no adjustments will be made to the original ground surface unless Contractor demonstrates that spot elevations shown are incorrect. For this purpose, spot elevations which are within 0.1 foot of the stated elevations for ground surfaces, or within 0.04 foot for hard surfaces (pavements, buildings, foundations, structures, etc.) shall be considered "no change". Only deviations in excess of these will be considered for adjustment of the original ground surface. If Contractor's verification identifies discrepancies in the topographic map, Contractor shall notify Engineer in writing at least two weeks before disturbance of existing grade to allow sufficient time to verify the submitted information and adjust the design cross sections or DTMs. Disturbance of existing grade in any area shall constitute acceptance by Contractor of the accuracy of the original elevations shown on the topographic map for that area.

All areas to be excavated shall be stripped of vegetation and topsoil. Topsoil shall be stockpiled for future use in areas designated on the plans or by Engineer. All suitable excavated material shall be used in the formation of embankment, subgrade, or other purposes as shown on the plans. All unsuitable material shall be disposed outside Airport property at Contractor expense.

The grade shall be maintained so that the surface is well drained at all times.

When the volume of the excavation exceeds that required to construct the embankments to the grades as indicated on the plans, or excavated material is deemed unsuitable, material shall become Contractor property. Contractor shall dispose such materials off Airport property at Contractor expense. When the volume of excavation is not sufficient for constructing the embankments to the grades indicated, the deficiency shall be obtained from areas of Project with excess excavation or borrow areas located on Airport property as designated by Owner/Engineer. In either case, any additional hauling or disposal expenses shall be Contractor responsibility.

a. Selective grading. When selective grading is indicated on the plans, the more suitable material designated by Engineer shall be used in constructing the embankment or in capping the pavement subgrade. If, at the time of excavation, it is not possible to place this material in its final location, it shall be stockpiled in approved areas until it can be placed. The more suitable material shall then be placed and compacted as specified. Selective grading shall be considered incidental to the work involved. The cost of stockpiling and placing the material shall be included in the various pay items of work involved.

b. Undercutting. Rock, shale, hardpan, loose rock, boulders, or other material unsatisfactory for safety areas, subgrades, roads, shoulders, or any areas intended for turf shall be excavated to a minimum depth of 12 inches below the subgrade or to the depth specified by Engineer. Muck, peat, matted roots, or other yielding material, unsatisfactory for subgrade foundation, shall be removed to the depth specified. Unsuitable materials shall be disposed off the airport. The cost is incidental to this item. This excavated material shall be paid for at the contract unit price per cubic yard for unclassified excavation. The excavated area shall be backfilled with suitable material obtained from the grading operations or borrow areas and compacted to specified densities. The necessary backfill will constitute a part of the embankment. Where rock cuts are made, backfill with select material. Any pockets created in the rock surface shall be drained in accordance with the details shown on the plans. Undercutting will be paid as unclassified excavation.

c. Over-break. Over-break, including slides, is that portion of any material displaced or loosened beyond the finished work as planned or authorized by Engineer. All over-break shall be graded or removed by Contractor and disposed of as directed by Engineer. Engineer shall determine if the displacement of such material was unavoidable and their own decision shall be final. Payment will not be made for the removal and disposal of over-break that RPR determines as avoidable. Unavoidable over-break will be classified as "Unclassified Excavation."

d. Removal of utilities. The removal of existing structures and utilities required to permit the orderly progress of work will be accomplished by Contractor unless shown otherwise on the plans. If during work, an active utility is encountered, or any utility not provided for on plans, Engineer shall be notified immediately, and no work shall proceed in that area without Engineer approval. All existing foundations shall be excavated at least 2 feet below the top of subgrade or as indicated on the plans, and the material disposed of as directed by Engineer. All foundations thus excavated shall be backfilled with suitable material and compacted as specified for embankment or as shown on the plans.

152-2.3 Borrow excavation. Not required. –There are no borrow sources within the boundaries of the airport property.

152-2.4 Drainage excavation. Drainage excavation shall consist of excavating drainage ditches including intercepting, inlet, or outlet ditches; or other types as shown on the plans. The work shall be performed in sequence with the other construction. Ditches shall be constructed prior to starting adjacent excavation operations. All satisfactory material shall be placed in embankment fills; unsuitable material shall be placed in designated waste areas or as directed by Engineer. All necessary work shall be performed true to final line, elevation, and cross-section. Contractor shall maintain ditches constructed on the project to the required cross-section and shall keep them free of debris or obstructions until the project is accepted.

152-2.5 Preparation of cut areas or areas where existing pavement has been removed. In those areas on which a subbase or base course is to be placed, the top 12 inches of subgrade shall be compacted to not less than 100% of maximum density for non-cohesive soils, and 95% of maximum density for cohesive soils as determined by ASTM D698. As used in this specification, "non-cohesive" shall mean those soils having a plasticity index (PI) of less than 3 as determined by ASTM D4318.

152-2.6 Preparation of embankment area. All sod and vegetative matter shall be removed from the surface upon which the embankment is to be placed. The cleared surface shall be broken up by plowing or scarifying to a minimum depth of 6 inches and shall then be compacted per paragraph 152-2.10.

Sloped surfaces steeper than one (1) vertical to four (4) horizontal shall be plowed, stepped, benched, or broken up so that the fill material will bond with the existing material. When the subgrade is part fill and part excavation or natural ground, the excavated or natural ground portion shall be scarified to a depth of 12 inches and compacted as specified for the adjacent fill.

No direct payment shall be made for the work performed under this section. The necessary clearing and grubbing and the quantity of excavation removed will be paid for under the respective items of work.

152-2.7 Control Strip. The first half-day of construction of subgrade/embankment shall be considered as a control strip for Contractor to demonstrate, in the presence of Engineer, that the materials, equipment, and construction processes meet the requirements of this specification. The sequence and manner of rolling necessary to obtain specified density requirements shall be determined. The maximum compacted thickness may be increased to a maximum of 12 inches upon Contractor’s demonstration that approved equipment and operations will uniformly compact the lift to the specified density. Engineer must witness this demonstration and approve the lift thickness prior to full production.

Control strips that do not meet specification requirements shall be reworked, recompacted, or removed and replaced at Contractor’s expense. Full operations shall not begin until the control strip has been accepted by Engineer. Contractor shall use the same equipment, materials, and construction methods for the remainder of construction, unless adjustments made by Contractor are approved in advance by Engineer.

152-2.8 Formation of embankments. The material shall be constructed in lifts as established in the control strip, but not less than 6 inches nor more than 12 inches of compacted thickness.

When more than one lift is required to establish the layer thickness shown on the plans, the construction procedure described here shall apply to each lift. No lift shall be covered by subsequent lifts until tests verify that compaction requirements have been met. Contractor shall rework, recompact and retest any material placed which does not meet the specifications.

The lifts shall be placed, to produce a soil structure as shown on the typical cross-section or as directed by Engineer. Materials such as brush, hedge, roots, stumps, grass, and other organic matter, shall not be incorporated or buried in the embankment.

Earthwork operations shall be suspended at any time when satisfactory results cannot be obtained due to rain, freezing, or other unsatisfactory weather conditions in the field. Frozen material shall not be placed in the embankment, nor shall embankment be placed upon frozen material. Material shall not be placed on surfaces that are muddy, frozen, or contain frost. Contractor shall drag, blade, or slope the embankment to provide surface drainage at all times.

The material in each lift shall be within ±2% of optimum moisture content before rolling to obtain the prescribed compaction. The material shall be moistened or aerated as necessary to achieve a uniform moisture content throughout the lift. Natural drying may be accelerated by blending in dry material or manipulation alone to increase the rate of evaporation.

Contractor shall make the necessary corrections and adjustments in methods, materials, or moisture content to achieve the specified embankment density.

Engineer will take samples of excavated materials which will be used in embankment for testing to obtain a Moisture-Density Relations of Soils Report (Proctor) in accordance with ASTM D698. A new Proctor shall be obtained for each soil type based on visual classification. Proctor shall be ordered on Engineer discretion.

Density tests will be taken by Engineer for every 3,000 square yards of compacted embankment for each lift which is required to be compacted, or other appropriate frequencies as determined by Engineer.

If the material has greater than 30% retained on the 3/4-inch sieve, follow AASHTO T-180 Annex Correction of maximum dry density and optimum moisture for oversized particles.

Rolling operations shall be continued until the embankment is compacted to not less than 100% of maximum density for non-cohesive soils, and 95% of maximum density for cohesive soils as determined by ASTM D698. Under all areas to be paved, the embankments shall be compacted to a depth of 6 inches and to a density of not less than 95% of the maximum density as determined by ASTM D698. As used in this specification, "non-cohesive" shall mean those soils having a plasticity index (PI) of less than 3 as determined by ASTM D4318.

On all areas outside of the pavement areas, no compaction will be required on the top 4 inches which shall be prepared for a seedbed in accordance with Item T-901.

The in-place field density shall be determined in accordance with ASTM 6938 using Procedure A, the direct transmission method, and ASTM D6938 shall be used to determine the moisture content of the material. The machine shall be calibrated in accordance with ASTM D6938. Engineer shall perform all density tests.. If the specified density is not attained, the area represented by the test or as designated by Engineer shall be reworked and/or re-compacted and additional random tests made. This procedure shall be followed until the specified density is reached.

Compaction areas shall be kept separate, and no lift shall be covered by another lift until the proper density is obtained.

During construction of the embankment, Contractor shall route all construction equipment evenly over the entire width of the embankment as each lift is placed. Lift placement shall begin in the deepest portion of the embankment fill. As placement progresses, the lifts shall be constructed approximately parallel to the finished pavement grade line.

When rock, concrete pavement, asphalt pavement, and other embankment material are excavated at approximately the same time as the subgrade, the material shall be incorporated into the outer portion of the embankment and the subgrade material shall be incorporated under the future paved areas. Stones, fragmentary rock, and recycled pavement larger than 4 inches in their greatest dimensions will not be allowed in the top 12 inches of the subgrade. Rockfill shall be brought up in lifts as specified or as directed by Engineer and the finer material shall be used to fill the voids forming a dense, compact mass. Rock, cement concrete pavement, asphalt pavement, and other embankment material shall not be disposed of except at places and in the manner designated on the plans or by Engineer.

When the excavated material consists predominantly of rock fragments of such size that the material cannot be placed in lifts of the prescribed thickness without crushing, pulverizing, or further breaking down the pieces, such material may be placed in the embankment as directed in lifts not exceeding 2 feet in thickness. Each lift shall be leveled and smoothed with suitable equipment by distribution of spalls and finer fragments of rock. The lift shall not be constructed above an elevation 4 feet below the finished subgrade.

Payment for compacted embankment will be made under embankment in-place and no payment will be made for excavation, borrow, or other items.

152-2.9 Proof rolling. The purpose of proof rolling the subgrade is to identify any weak areas in the subgrade and not for compaction of the subgrade. Before start of embankment, and after compaction is completed, the subgrade area shall be proof rolled with a 25- ton proof roller with tires spaced not more

than 32 inches on-center with tires inflated to 125 psi in the presence of Engineer. Apply a minimum of 2 rolling coverage, or as specified by Engineer, under pavement areas. A coverage is defined as the application of one tire print over the designated area. Soft areas of subgrade that deflect more than 1 inch or show permanent deformation greater than 1 inch shall be removed and replaced with suitable material or reworked to conform to the moisture content and compaction requirements in accordance with these specifications. Removal and replacement of soft areas is incidental to this item.

152-2.10 Compaction requirements. The subgrade under areas to be paved shall be compacted to a depth of 12 inches and to a density of not less than 100% of the maximum dry density as determined by ASTM D698. The subgrade in areas outside the limits of the pavement areas shall be compacted to a depth of 12 inches and to a density of not less than 95% of the maximum density as determined by ASTM D698.

The material to be compacted shall be within ±2% of optimum moisture content before being rolled to obtain the prescribed compaction (except for expansive soils). When the material has greater than 30% retained on the 3/4-inch sieve, follow the methods in ASTM D698. Tests for moisture content and compaction will be taken at a minimum of 500 S.Y. of subgrade. All quality assurance testing shall be done by Engineer.

The in-place field density shall be determined in accordance with ASTM D6938 using Procedure A, the direct transmission method, and ASTM D6938 shall be used to determine the moisture content of the material. The machine shall be calibrated in accordance with ASTM D6938 within 12 months prior to its use on this contract. The gage shall be field standardized daily.

Density tests will be taken by Engineer for every 500 square yards of completed subgrade. If a nuclear gage is used for density determination, two random readings shall be made for each 500 square yards.

Maximum density refers to maximum dry density at optimum moisture content unless otherwise specified.

If the specified density is not attained, the entire lot shall be reworked and/or re-compacted and additional random tests made. This procedure shall be followed until the specified density is reached.

All cut-and-fill slopes shall be uniformly dressed to the slope, cross-section, and alignment shown on the plans or as directed by Engineer and the finished subgrade shall be maintained.

152-2.11 Finishing and protection of subgrade. Finishing and protection of the subgrade is incidental to this item. Grading and compacting of the subgrade shall be performed so that it will drain readily. All low areas, holes or depressions in the subgrade shall be brought to grade. Scarifying, blading, rolling and other methods shall be performed to provide a thoroughly compacted subgrade shaped to the lines and grades shown on the plans. All ruts or rough places that develop in the completed subgrade shall be graded, recompacted, and retested. Contractor shall protect the subgrade from damage and limit hauling over the finished subgrade to only traffic essential for construction purposes.

Contractor shall maintain the completed course in satisfactory condition throughout placement of subsequent layers. No subbase, base, or surface course shall be placed on the subgrade until the subgrade has been accepted by Engineer.

152-2.12 Haul. All hauling will be considered a necessary and incidental part of the work. Contractor shall include the cost in the contract unit price for the pay of items of work involved. No payment will be made separately or directly for hauling on any part of the work.

Contractor's equipment shall not cause damage to any excavated surface, compacted lift or to the subgrade as a result of hauling operations. Any damage caused as a result of Contractor's hauling operations shall be repaired at Contractor's expense.

Contractor shall be responsible for providing, maintaining, and removing any haul roads or routes within or outside of the work area, and shall return the affected areas to their former condition, unless otherwise authorized in writing by Owner. No separate payment will be made for any work or materials associated

with providing, maintaining, and removing haul roads or routes.

152-2.13 Surface Tolerances. In those areas on which a subbase or base course is to be placed, the surface shall be tested for smoothness and accuracy of grade and crown. Any portion lacking the required smoothness or failing in accuracy of grade or crown shall be scarified to a depth of at least 3 inches, reshaped and recompacted to grade until the required smoothness and accuracy are obtained and approved by Engineer. Contractor shall perform all final smoothness and grade checks in the presence of Engineer. Any deviation in surface tolerances shall be corrected by Contractor at Contractor's expense.

- **a. Smoothness.** The finished surface shall not vary more than ±1/2 inch when tested with a 12-foot straightedge applied parallel with and at right angles to the centerline. The straightedge shall be moved continuously forward at half the length of the 12-foot straightedge for the full length of each line on a 50-foot grid.
- **b. Grade.** The grade and crown shall be measured on a 50-foot grid and shall be within ±0.05 feet of the specified grade.

On safety areas, turfed areas and other designated areas within the grading limits where no subbase or base is to placed, grade shall not vary more than 0.10 feet from specified grade. Any deviation in excess of this amount shall be corrected by loosening, adding or removing materials, and reshaping.

152-2.14 Topsoil. When topsoil is specified or required as shown on the plans or under Item T-905, it shall be salvaged from stripping or other grading operations. The topsoil shall meet the requirements of Item T-905. If, at the time of excavation or stripping, the topsoil cannot be placed in its final section of finished construction, the material shall be stockpiled at approved locations. Stockpiles shall be located as shown on the plans and the approved CSPP and shall not be placed on areas that subsequently will require any excavation or embankment fill. If, in the judgment of Engineer, it is practical to place the salvaged topsoil at the time of excavation or stripping, the material shall be placed in its final position without stockpiling or further rehandling.

Upon completion of grading operations, stockpiled topsoil shall be handled and placed as shown on the plans and as required in Item T-905. Topsoil shall be paid for as provided in Item T-905. No direct payment will be made for topsoil under Item P-152.

METHOD OF MEASUREMENT

152-3.1 Measurement for payment specified by the cubic yard shall be computed by the comparison of digital terrain model (DTM) surfaces for computation of neat line design quantities. The end area is that bound by the original ground line established by field cross-sections and the final theoretical pay line established by cross-sections shown on the plans, subject to verification by Engineer.

152-3.1 Quantity of unclassified drainage excavation to be paid for shall be number of cubic yards measured in original position. Measurement shall not include quantity of materials excavated without authorization beyond normal slope lines or quantity of material used for purposes other than those directed.

152-3.2 Not used.

152-3.3 Not used.

152-3.4 Quantity of grading and subgrade preparation under pavement area and unpaved area to be paid for shall be the number of cubic yards.

BASIS OF PAYMENT

152-4.1 Unclassified drainage excavation payment shall be made at the contract unit price per cubic yard. This price shall be full compensation for furnishing all materials, labor, equipment, tools, and incidentals necessary to complete the item.

152-4.2 Not used.

152-4.3 Not used.

152-4.4 For grading and subgrade preparation, pavement shall be made at Contract unit price per cubic yard. This price shall be full compensation for furnishing all materials, labor, equipment, tools, and incidentals necessary to complete the item.

Payment will be made under:

Item P-152-4.1	Drainage Excavation and Trenching, per cubic yard
Item P-152-4.2	Not used.
Item P-152-4.3	Not used.
Item P-152-4.4	Excavation, Grading, and Subgrade Preparation, per cubic yard
Item P-152-4.5	Grading in Unpaved Areas, per square yard

END OF ITEM P-152

Item P-154 Subbase Course

DESCRIPTION

154-1.1 This item shall consist of a subbase course composed of existing asphalt surfacing and granular base materials salvaged under Item P-101, constructed on a prepared subgrade or underlying course in accordance with these specifications, and in conformity with the dimensions and typical cross-section shown on the plans.

MATERIALS

154-2.1 Materials. The subbase material shall consist of hard durable particles or fragments of granular aggregates, recycled asphalt pavement (RAP), and salvaged granular base. The material may be obtained from gravel pits, stockpiles, or may be produced from a crushing and screening plant with proper blending. The materials from these sources shall meet the requirements for gradation, quality, and consistency. The material shall be free from vegetative matter, excessive amounts of clay, and other objectionable substances; uniformly blended; and be capable of being compacted into a dense, stable subbase.

The subbase material shall exhibit a California Bearing Ratio (CBR) value of at least 20 when tested in accordance with ASTM D1883. The subbase material shall meet the gradation specified in the table below.

Subbase Gradation Requirements

Sieve designation	Percentage by weight passing sieves		Contractor's Final Gradation	Job Control Grading Band Tolerances[1] (Percent)
	Subbase Aggregate	Recycled pavement (RAP or RCO)		
3 inches	100			0
1 1/2 inches		100		0
3/4 inch	70-100	70-100		±10
No. 10	20-100	20-100		±10
No. 40	5-60	5-60		±5
No. 200	0-15	0-15		±5

[1]"Job Control Grading Band Tolerances" shall be applied to "Contractor's Final Gradation" to establish the job control grading band.

The portion of the material passing the No. 40 sieve shall have a liquid limit of not more than 25 and a plasticity index of not more than 6 when tested in accordance with ASTM D4318.

154-2.2 Sampling and testing.

a. Aggregate base materials. Samples shall be taken by Contractor per ASTM D75 for initial aggregate subbase requirements and gradation. Material shall meet the requirements in paragraphs 154-2.1. Contractor shall submit to Resident Project Representative (RPR) certified test results showing that the aggregate meets the Material requirements of this section. Tests shall be representative of the material to be used for the project.

b. Gradation requirements. Contractor shall take at least one aggregate subbase sample per day in the presence of RPR to check the final gradation. Samples shall be taken from the in-place, un-compacted

material at sampling locations determined by RPR on a random basis per ASTM D3665. Sampling shall be per ASTM D75 and tested per ASTM C136 and C117. Results shall be furnished to RPR by Contractor each day during construction. Material shall meet the requirements in paragraph 154-2.1.

154-2.3 Separation Geotextile. Not used.

154-2.4 Geogrid. Not used.

CONSTRUCTION METHODS

154-3.1 General. The subbase course shall be placed where designated on the plans or as directed by RPR. The material shall be shaped and thoroughly compacted within the tolerances specified.

Granular subbases which, due to grain sizes or shapes, are not sufficiently stable to support the construction equipment without movement, shall be mechanically modified to the depth necessary to provide stability as directed by RPR. The mechanical modification shall include the addition of a fine-grained medium to bind the particles of the subbase material sufficiently to furnish a bearing strength, so the course will not deform under construction equipment traffic.

154-3.2 Preparing underlying course. Prior to constructing the subbase course, clean the underlying course or subgrade of all foreign substances. The surface of the underlying course or subgrade shall meet specified compaction and surface tolerances in accordance with Item P-152. Correct ruts, soft yielding spots in the underlying courses, and subgrade areas having inadequate compaction and/or deviations of the surface from the specified requirements, by loosening and removing soft or unsatisfactory material, adding approved material, reshaping to line and grade, and recompacting to specified density requirements. For cohesionless underlying courses or subgrades containing sands or gravels, as defined in ASTM D2487, the surface shall be stabilized prior to placement of the overlying course by mixing the overlying course material into the underlying course and compacting by approved methods. Stabilized material shall be considered as part of the underlying course and shall meet all requirements for the underlying course. The finished underlying course shall not be disturbed by traffic or other operations and shall be maintained in a satisfactory condition until the overlying course is placed. The underlying course shall be checked and accepted by RPR before placing and spreading operations are started.

To protect the subgrade and to ensure proper drainage, spreading of the subbase shall begin along the centerline of the pavement on a crowned section or on the high side of pavements with a one-way slope.

154-3.3 Control Strip. The first half-day of subbase construction shall be considered as a control strip for Contractor to demonstrate, in the presence of RPR, that the materials, equipment, and construction processes meet the requirements of this specification. The sequence and manner of rolling necessary to obtain specified density requirements shall be determined. The maximum compacted thickness may be increased to a maximum of 12 inches upon Contractor’s demonstration that approved equipment and operations will uniformly compact the lift to the specified density. RPR must witness this demonstration and approve the lift thickness prior to full production.

Control strips that do not meet specification requirements shall be reworked, re-compacted, or removed and replaced at Contractor expense. Full operations shall not begin until the control strip has been accepted by RPR. Contractor shall use the same equipment, materials, and construction methods for the remainder of construction, unless adjustments made by Contractor are approved in advance by RPR.

154-3.4 Placement. The material shall be placed and spread on the prepared underlying layer by spreader boxes or other devices as approved by RPR, to a uniform thickness and width. The equipment shall have positive thickness controls to minimize the need for additional manipulation of the material. Dumping from vehicles that require re-handling shall not be permitted. Hauling over the uncompacted base course shall not be permitted. The material shall not be placed when the underlying course is soft or yielding.

Material shall meet gradation and moisture requirements prior to compaction. Material may be free-draining and the minimum moisture content shall be established for placement and compaction of the material.

The material shall be constructed in lifts as established in the control strip, but not less than 4 nor more than 12 inches of compacted thickness.

When more than one lift is required to establish the layer thickness shown on the plans, the construction procedure described here shall apply to each lift. No lift shall be covered by subsequent lifts until tests verify that compaction requirements have been met. Contractor shall rework, recompact, and retest any material placed which does not meet the specifications.

154-3.5 Compaction. The subbase material shall be compacted, adjusting moisture as necessary, to be within ±2% of optimum moisture. The field density of the compacted material shall be at least 100% of the maximum density as specified in paragraph 154-3.9a. If the specified density is not attained, the area of the lift represented by the test shall be reworked and/or re-compacted and additional random tests made. This procedure shall be followed until the specified density is reached. Maximum density refers to maximum dry density at optimum moisture content unless otherwise specified.

154-3.6 Weather limitation. Material shall not be placed unless the ambient air temperature is at least 40°F and rising. Work on subbase course shall not be conducted when the subgrade is wet, frozen, or subbase material contains frozen material.

154-3.7 Maintenance. No base or surface course shall be placed on subbase until subbase RPR accepts. Contractor shall maintain completed course in satisfactory condition throughout placement of subsequent layers. When material has been exposed to excessive rain, snow, or freeze-thaw conditions, Contractor shall verify that materials still meet all specification requirements before placement of additional material. Equipment may be routed over completed sections of subbase course, provided equipment does not damage the subbase course and the equipment is routed over the full width of the completed subbase course. Any damage to subbase course from routing equipment over the subbase course shall be repaired by Contractor at their expense.

154-3.8 Surface tolerance. In those areas on which a subbase or base course is to be placed, the surface shall be tested for smoothness and accuracy of grade and crown. Any portion lacking the required smoothness or failing in accuracy of grade or crown shall be scarified to a depth of at least 3 inches, reshaped and recompacted to grade until the required smoothness and accuracy are obtained and approved by RPR. Contractor shall perform all final smoothness and grade checks in the presence of RPR. Any deviation in surface tolerances shall be corrected by Contractor at Contractor expense.

a. Smoothness. Finished surface shall not vary more than ±1/2 inch when tested with a 12-foot straightedge applied parallel with and at right angles to centerline. Straightedge shall be moved continuously forward at half the length of 12-foot straightedge for full length of each line on a 50-foot grid.

b. Grade. The grade and crown shall be measured on a 50-foot grid and shall be within ±0.05 feet of the specified grade.

154-3.9 Acceptance sampling and testing. Aggregate base course shall be accepted for density and thickness on an area basis. Two test shall be made for density and thickness for each 1,200 square yards. Sampling locations will be determined on a random basis per ASTM D3665.

a. Density. Engineer's QA laboratory shall perform all density tests.

Each area shall be accepted for density when the field density is at least 100% of the maximum density of laboratory specimens compacted and tested per ASTM D698. The in-place field density shall be determined per ASTM D6938 using Procedure A, direct transmission method, and ASTM D6938 shall be used to determine the moisture content of the material. Machine shall be calibrated in accordance with ASTM D6938. If the specified density is not attained, the area represented by the failed test shall be reworked and/or recompacted and two additional random tests made. This procedure shall be followed until

the specified density is reached. Maximum density refers to maximum dry density at optimum moisture content unless otherwise specified.

When material has greater than 30 percent retained on the 3/4-inch sieve, use methods in ASTM D1557 and the procedures in AASHTO T180 Annex for correction of maximum dry density and optimum moisture for oversized particles.

b. Thickness. Thickness of the subbase course shall be within +0 and -1/2 inch of specified thickness as determined by depth tests taken by Contractor in the presence of RPR for each area. Where thickness is deficient by more than 1/2-inch, Contractor shall correct such areas at no additional cost by scarifying to a depth of at least 3 inches, adding new material of proper gradation, and the material shall be blended and recompacted to grade. Contractor shall replace, at his expense, base material where depth tests have been taken.

METHOD OF MEASUREMENT

154-4.1 Subbase course shall be measured by the number of `square yards`of subbase course material placed and compacted to specified density and plan thickness requirements in the completed course. On individual depth measurements, thicknesses more than 1/2 inch in excess of that shown on the plans shall be considered as the specified thickness plus 1/2 inch in computing the yardage for payment. Subbase materials shall not be included in any other excavation quantities.

BASIS OF PAYMENT

154-5.1 Payment shall be made at the contract unit price per square yard for subbase course. This price shall be full compensation for furnishing all materials; for all preparation, hauling, and placing of these materials; and for all labor, equipment, tools, and incidentals necessary to complete the item.

Payment will be made under:

Item P-154-5.1	Subbase Course, per square yard

END OF ITEM P-154

Item P-209 Crushed Aggregate Base Course

DESCRIPTION

209-1.1 This item consists of a base course composed of crushed aggregate base constructed on a prepared course in accordance with these specifications and in conformity to the dimensions and typical cross-sections shown on the plans.

MATERIALS

209-2.1 Crushed aggregate base. Crushed aggregate shall consist of clean, sound, durable particles of crushed stone, crushed gravel, and shall be free from coatings of clay, silt, organic material, clay lumps or balls or other deleterious materials or coatings. The method used to produce the crushed gravel shall result in the fractured particles in the finished product as consistent and uniform as practicable. Fine aggregate portion, defined as the portion passing the No. 4 sieve shall consist of fines from the coarse aggregate crushing operation. The fine aggregate shall be produced by crushing stone, gravel, that meet the coarse aggregate requirements for wear and soundness. Aggregate base material requirements are listed in the following table.

Crushed Aggregate Base Material Requirements

Material Test	Requirement	Standard
Coarse Aggregate		
Resistance to Degradation	Loss: 45% maximum	ASTM C131
Soundness of Aggregates by Use of Sodium Sulfate **or** Magnesium Sulfate	Loss after 5 cycles: 12% maximum using Sodium sulfate - or - 18% maximum using magnesium sulfate	ASTM C88
Percentage of Fractured Particles	Minimum 90% by weight of particles with at least two fractured faces and 100% with at least one fractured face[1]	ASTM D5821
Flat Particles, Elongated Particles, or Flat and Elongated Particles	10% maximum, by weight, of flat, elongated, or flat and elongated particles [2]	ASTM D4791
Clay lumps and friable particles	Less than or equal to 3 percent	ASTM C142
Fine Aggregate		
Liquid limit	Less than or equal to 25	ASTM D4318
Plasticity Index	Not more than five (5)	ASTM D4318

[1] The area of each face shall be equal to at least 75% of the smallest mid-sectional area of the piece. When two fractured faces are contiguous, the angle between the planes of fractures shall be at least 30 degrees to count as two fractured faces.

[2] A flat particle is one having a ratio of width to thickness greater than five (5); an elongated particle is one having a ratio of length to width greater than five (5).

209-2.2 Gradation requirements. The gradation of the aggregate base material shall meet the requirements of the gradation given in the following table when tested per ASTM C117 and ASTM C136. The gradation shall be well graded from coarse to fine and shall not vary from the lower limit on one sieve to the high limit on an adjacent sieve or vice versa.

Gradation of Aggregate Base

Sieve Size	Design Range Percentage by Weight passing	Contractor's Final Gradation	Job Control Grading Band Tolerances[1](Percent)
2 inch	100		0
1-1/2 inch	95-100		±5
1 inch	70-95		±8
3/4 inch	55-85		±8
No. 4	30-60		±8
No. 40[2]	10-30		±5
No. 200[2]	0-10		±3

[1] Job Control Grading Band Tolerances for Contractor's Final Gradation" in the table shall be applied to "Contractor's Final Gradation" to establish a job control grading band. Full tolerance still applies if application of the tolerances results in a job control grading band outside the design range.

[2] The fraction of material passing the No 200 sieve shall not exceed two-thirds the fraction passing the No 40 sieve.

209-2.3 Sampling and Testing.

a. Aggregate base materials. Contractor shall take samples of the aggregate base in accordance with ASTM D75 to verify initial aggregate base requirements and gradation. Material shall meet the requirements in paragraph 209-2.1. This sampling and testing will be the basis for approval of the aggregate base quality requirements.

b. Gradation requirements. Contractor shall take at least two aggregate base samples per day in the presence of the Resident Project Representative (RPR) to check the final gradation. Sampling shall be per ASTM D75. Material shall meet the requirements in paragraph 209-2.2. The samples shall be taken from the in-place, un-compacted material at sampling points and intervals designated by RPR.

209-2.4 Separation Geotextile. Not used.

CONSTRUCTION METHODS

209-3.1 Control strip. The first half-day of construction shall be considered the control strip. Contractor shall demonstrate, in the presence of Engineer, that the materials, equipment, and construction processes meet the requirements of the specification. The sequence and manner of rolling necessary to obtain specified density requirements shall be determined. The maximum compacted thickness may be increased to a maximum of 12 inches upon Contractor's demonstration that approved equipment and operations will uniformly compact the lift to the specified density. Engineer must witness this demonstration and approve the lift thickness prior to full production.

Control strips that do not meet specification requirements shall be reworked, recompacted, or removed and replaced at Contractor expense. Full operations shall not continue until the control strip has been accepted by Engineer. Contractor shall use the same equipment, materials, and construction methods for the remainder of construction, unless adjustments made by Contractor are approved by Engineer.

209-3.2 Preparing underlying subgrade and/or subbase. The underlying subgrade and/or subbase shall be checked and accepted by Engineer before base course placing and spreading operations begin. Re-proof rolling of the subgrade or proof rolling of the subbase in accordance with Item P-152, at Contractor expense, may be required by Engineer if Contractor fails to ensure proper drainage or protect the subgrade and/or

subbase. Any ruts or soft, yielding areas due to improper drainage conditions, hauling, or any other cause, shall be corrected before the base course is placed. To ensure proper drainage, the spreading of the base shall begin along the centerline of the pavement on a crowned section or on the high side of the pavement with a one-way slope.

209-3.3 Production. The aggregate shall be uniformly blended and, when at a satisfactory moisture content per paragraph 209-3.5, the approved material may be transported directly to the placement.

209-3.4 Placement. The aggregate shall be placed and spread on the prepared underlying layer by spreader boxes or other devices as approved by Engineer, to a uniform thickness and width. The equipment shall have positive thickness controls to minimize the need for additional manipulation of the material. Dumping from vehicles that require re-handling shall not be permitted. Hauling over the uncompacted base course shall not be permitted.

The aggregate shall meet gradation and moisture requirements prior to compaction. The base course shall be constructed in lifts as established in the control strip, but not less than 4 inches nor more than 12 inches of compacted thickness.

When more than one lift is required to establish the layer thickness shown on the plans, the construction procedure described here shall apply to each lift. No lift shall be covered by subsequent lifts until tests verify that compaction requirements have been met. Contractor shall rework, re-compact and retest any material placed which does not meet the specifications at Contractor's expense.

209-3.5 Compaction. Immediately after completion of the spreading operations, compact each layer of the base course, as specified, with approved compaction equipment. The number, type, and weight of rollers shall be sufficient to compact the material to the required density within the same day that the aggregate is placed on the subgrade.

The field density of each compacted lift of material shall be at least 100% of the maximum density of laboratory specimens prepared from samples of the subbase material delivered to the jobsite. The laboratory specimens shall be compacted and tested in accordance with ASTM D1557. The moisture content of the material during placing operations shall be within ±2 percentage points of the optimum moisture content as determined by ASTM D1557. Maximum density refers to maximum dry density at optimum moisture content unless otherwise specified.

209-3.6 Weather limitations. Material shall not be placed unless the ambient air temperature is at least 40°F and rising. Work on base course shall not be conducted when the subgrade or subbase is wet or frozen or the base material contains frozen material.

209-3.7 Maintenance. The base course shall be maintained in a condition that will meet all specification requirements. When material has been exposed to excessive rain, snow, or freeze-thaw conditions, prior to placement of additional material, Contractor shall verify that materials still meet all specification requirements. Equipment may be routed over completed sections of base course, provided that no damage results and the equipment is routed over the full width of the completed base course. Any damage resulting to the base course from routing equipment over the base course shall be repaired by Contractor at Contractor's expense.

209-3.8 Surface tolerances. After the course has been compacted, the surface shall be tested for smoothness and accuracy of grade and crown. Any portion lacking the required smoothness or failing in accuracy of grade or crown shall be scarified to a depth of at least 3 inches, reshaped and recompacted to grade until the required smoothness and accuracy are obtained and approved by RPR. Any deviation in surface tolerances shall be corrected by Contractor at Contractor's expense. The smoothness and accuracy requirements specified here apply only to the top layer when base course is constructed in more than one layer.

a. Smoothness. The finished surface shall not vary more than 3/8-inch when tested with a 12-foot straightedge applied parallel with and at right angles to the centerline. Straightedge shall be moved continuously forward at half the length of the 12-foot straightedge for the full length of each line on a 50-foot grid.

b. Grade. The grade and crown shall be measured on a 50-foot grid and shall be within +0 and -1/2 inch of the specified grade.

209-3.9 Acceptance sampling and testing. Crushed aggregate base course shall be accepted for density and thickness on an area basis. Two tests shall be made for density and thickness for each 1,200 square yards. Sampling locations will be determined on a random basis per ASTM D3665

a. Density. Engineer shall perform all density tests.

Each area shall be accepted for density when the field density is at least 100% of the maximum density of laboratory specimens compacted and tested per ASTM D1557. The in-place field density shall be determined per ASTM D1556. If the specified density is not attained, the area represented by the failed test must be reworked and/or recompacted and two additional random tests made. This procedure shall be followed until the specified density is reached. Maximum density refers to maximum dry density at optimum moisture content unless otherwise specified.

b. Thickness. Depth tests shall be made by test holes at least 3 inches in diameter that extend through the base. The thickness of the base course shall be within +0 and -1/2 inch of the specified thickness as determined by depth tests taken by Contractor in the presence of RPR for each area. Where the thickness is deficient by more than 1/2-inch, Contractor shall correct such areas at no additional cost by scarifying to a depth of at least 3 inches, adding new material of proper gradation, and the material shall be blended and recompacted to grade. Contractor shall replace, at his expense, base material where depth tests have been taken.

METHOD OF MEASUREMENT

209-4.1 The quantity of crushed aggregate base course will be determined by measurement of the number of square yards of material actually constructed and accepted by Engineer as complying with the plans and specifications. Base materials shall not be included in any other excavation quantities.

BASIS OF PAYMENT

209-5.1 Payment shall be made at the contract unit price per square yard for crushed aggregate base course. This price shall be full compensation for furnishing all materials, for preparing and placing these materials, and for all labor, equipment tools, and incidentals necessary to complete the item.

Payment will be made under:

Item P-209-5.1	Crushed Aggregate Base Course (14 inches thick), per square yard

END OF ITEM P-209

Item P-401 Asphalt Mix Pavement

DESCRIPTION

401-1.1 This item shall consist of pavement courses composed of mineral aggregate and asphalt binder mixed in a central mixing plant and placed on a prepared base or stabilized course in accordance with these specifications and shall conform to the lines, grades, thicknesses, and typical cross-sections shown on the plans. Each course shall be constructed to the depth, typical section, and elevation required by the plans and shall be rolled, finished, and approved before the placement of the next course.

MATERIALS

401-2.1 Aggregate. Aggregates shall consist of crushed stone, crushed gravel, screenings, natural sand, and mineral filler, as required. The aggregates should have no known history of detrimental pavement staining due to ferrous sulfides, such as pyrite. Coarse aggregate is the material retained on the No. 4 sieve. Fine aggregate is the material passing the No. 4 sieve.

a. Coarse aggregate. Coarse aggregate shall consist of sound, tough, durable particles, free from films of matter that would prevent thorough coating and bonding with the asphalt material and free from organic matter and other deleterious substances. Coarse aggregate material requirements are given in this table:

Coarse Aggregate Material Requirements

Material Test	Requirement	Standard
Resistance to Degradation	Loss: 40% maximum	ASTM C131
Soundness of Aggregates by Use of Sodium Sulfate **or** Magnesium Sulfate	Loss after 5 cycles: 12% maximum using Sodium sulfate - or - 18% maximum using magnesium sulfate	ASTM C88
Clay lumps and friable particles	0.3% maximum	ASTM C142
Percentage of Fractured Particles	For pavements designed for aircraft gross weights of 60,000 pounds or more: Minimum 75% by weight of particles with at least two fractured faces and 85% with at least one fractured face[1]	ASTM D5821
Flat, Elongated, or Flat and Elongated Particles	8% maximum, by weight, of flat, elongated, or flat and elongated particles at 5:1 [2]	ASTM D4791

[1] The area of each face shall be equal to at least 75% of the smallest mid-sectional area of the piece. When two fractured faces are contiguous, the angle between the planes of fractures shall be at least 30 degrees to count as two fractured faces.

[2] A flat particle is one having a ratio of width to thickness greater than 5; an elongated particle is one having a ratio of length to width greater than 5.

b. Fine aggregate. Fine aggregate shall consist of clean, sound, tough, durable, angular-shaped particles produced by crushing stone or gravel and shall be free from coatings of clay, silt, or other objectionable matter. Natural (non-manufactured) sand may be used to obtain the gradation of the fine aggregate blend or to improve the workability of the mix. Fine aggregate material requirements are listed in the table:

Fine Aggregate Material Requirements

Material Test	Requirement	Standard
Liquid limit	25 maximum	ASTM D4318
Plasticity Index	4 maximum	ASTM D4318
Soundness of Aggregates by Use of Sodium Sulfate **or** Magnesium Sulfate	Loss after 5 cycles: 10% maximum using Sodium sulfate - or - 15% maximum using magnesium sulfate	ASTM C88
Clay lumps and friable particles	0.3% maximum	ASTM C142
Sand equivalent	45 minimum	ASTM D2419
Natural Sand	0% to 8% maximum by weight of total aggregate	ASTM D1073

c. Sampling. ASTM D75 shall be used in sampling coarse and fine aggregate.

401-2.2 Mineral filler. Mineral filler (baghouse fines) may be added in addition to material naturally present in the aggregate. Mineral filler shall meet requirements of ASTM D242.

Mineral Filler Requirements

Material Test	Requirement	Standard
Plasticity Index	4 maximum	ASTM D4318

401-2.3 Asphalt binder. Asphalt binder shall conform to ASTM D6373 Performance Grade (PG) 76-22.

Asphalt Binder PG Plus Test Requirements

Material Test	Requirement	Standard
Elastic Recovery	75% minimum	ASTM D6084[1]

[1] Follow procedure B on RTFO aged binder.

401-2.4 Anti-stripping agent. Any anti-stripping agent or additive (anti-strip) shall be heat stable and shall not change the asphalt binder grade beyond specifications. Anti-strip shall be an approved material of the Department of Transportation of the State in which the project is located.

COMPOSITION

401-3.1 Composition of mixture(s). Asphalt mix shall be composed of a mixture of aggregates, filler and anti-strip agent if required, and asphalt binder. The aggregate fractions shall be sized, handled in separate size groups, and combined in such proportions that the resulting mixture meets the grading requirements of job mix formula (JMF).

401-3.2 Job mix formula (JMF) laboratory. Laboratory used to develop JMF shall possess a current certificate of accreditation, listing D3666 from a national accrediting authority and all test methods required for developing JMF; and be listed on the accrediting authority's website. A copy of the laboratory's current accreditation and accredited test methods shall be submitted to Engineer prior to start of construction.

401-3.3 Job mix formula (JMF). No asphalt mixture shall be placed until an acceptable mix design has been submitted to Engineer for review and accepted in writing. Engineer review shall not relieve Contractor of the responsibility to select and proportion the materials to comply with this section.

When the project requires asphalt mixtures of differing aggregate gradations and/or binders, a separate JMF shall be submitted for each mix. Add anti-stripping agent to meet tensile strength requirements.

JMF shall be prepared by an accredited laboratory that meets the requirements of paragraph 401-3.2. Asphalt mixture shall be designed using procedures contained in Asphalt Institute MS-2 Mix Design

Manual, 7th Edition. Samples shall be prepared and compacted using gyratory compactor in accordance with ASTM D6925.

Should a change in sources of materials be made, a new JMF must be submitted to Engineer for review and accepted in writing before the new material is used. After initial production JMF has been approved by Engineer and a new or modified JMF is required for whatever reason, the subsequent cost of the new or modified JMF, including a new control strip when required by Engineer, will be borne by Contractor.

Engineer may request samples at any time for testing, prior to and during production, to verify material quality and ensure conformance with applicable specifications.

JMF shall be submitted in writing by Contractor at least 30 days prior to the start of paving operations. JMF shall be developed within the same construction season using aggregates proposed for project use.

JMF shall be dated, and stamped or sealed by the responsible professional Engineer of the laboratory and shall include the following items as a minimum:

- Manufacturer's Certificate of Analysis (COA) for the asphalt binder used in JMF in accordance with paragraph 401-2.3. Certificate of asphalt performance grade is with modifier already added, if used and must indicate compliance with ASTM D6373. For plant modified asphalt binder, certified test report indicating grade certification of modified asphalt binder.
- Manufacturer's Certificate of Analysis (COA) for the anti-stripping agent if used in JMF in accordance with paragraph 401-2.4.
- Certified material test reports for the course and fine aggregate and mineral filler in accordance with paragraphs 401-2.1.
- Percent passing each sieve size for individual gradation of each aggregate cold feed and/or hot bin; percent by weight of each cold feed and/or hot bin used; and the total combined gradation in JMF.
- Specific Gravity and absorption of each coarse and fine aggregate.
- Percent natural sand.
- Percent fractured faces.
- Percent by weight of flat particles, elongated particles, as well as flat and elongated particles (and criteria).
- Percent of asphalt.
- Number of blows or gyrations
- Laboratory mixing and compaction temperatures.
- Supplier-recommended field mixing and compaction temperatures.
- Plot of the combined gradation on a 0.45 power gradation curve.
- Graphical plots of air voids, voids in the mineral aggregate (VMA), and unit weight versus asphalt content. To achieve minimum VMA during production, the mix design needs to account for material breakdown during production.
- Tensile Strength Ratio (TSR).
- Type and amount of Anti-strip agent when used.
- Asphalt Pavement Analyzer (APA) results.
- Date the JMF was developed. Mix designs that are not dated or which are from a prior construction season shall not be accepted.

Table 1. Asphalt Design Criteria

Test Property	Value	Test Method
Number of blows or gyrations	75	
Air voids (%)	3.5	ASTM D3203
Percent voids in mineral aggregate (VMA), minimum	See Table 2	ASTM D6995
Tensile Strength Ratio (TSR)[1]	not less than 80 at a saturation of 70-80%	ASTM D4867
Asphalt Pavement Analyzer (APA)[2]	Less than 10 mm @ 4000 passes	AASHTO T340 at 250 psi hose pressure at 64°C test temperature

[1] Test specimens for TSR shall be compacted at 7 ±1.0 % air voids. In areas subject to freeze-thaw, use freeze-thaw conditioning in lieu of moisture conditioning per ASTM D4867.

[2] AASHTO T340 at 100 psi hose pressure at 64°C test temperature may be used in the interim. If this method is used the required Value shall be less than 5 mm @ 8000 passes

Mineral aggregate shall be sized so percentage composition by weight, as determined by laboratory sieves, will conform to gradation(s) specified in Table 2 when tested in accordance with ASTM C136 and C117.

Table 2 gradations represent limits that shall determine the suitability of aggregate for use from sources of supply; be well graded from coarse to fine and shall not vary from the low limit on one sieve to the high limit on the adjacent sieve, or vice versa.

Table 2. Aggregate - Asphalt Pavements

Sieve Size	Percentage by Weight Passing Sieve
1 inch	
3/4 inch	100
1/2 inch	90-100
3/8 inch	72-88
No. 4	53-73
No. 8	38-60
No. 16	26-48
No. 30	18-38
No. 50	11-27
No. 100	6-18
No. 200	3-6
Minimum Voids in Mineral Aggregate (VMA)[1]	15
Asphalt Percent:	
Stone or gravel	5.0-7.5
Recommended Minimum Construction Lift Thickness	2 inches

[1]To achieve minimum VMA during production, the mix design needs to account for material breakdown during production.

Aggregate gradations shown are based on aggregates of uniform specific gravity. Percentages passing various sieves shall be corrected when aggregates of varying specific gravities are used, as indicated in Asphalt Institute MS-2 Mix Design Manual, 7th Edition.

401-3.4 Reclaimed **Asphalt Pavement** (RAP). Not used.

401-3.5 Control Strip. Full production shall not begin until an acceptable control strip has been constructed and accepted in writing by Engineer. Contractor shall prepare and place a quantity of asphalt according to

JMF. The underlying grade or pavement structure upon which the control strip is to be constructed shall be the same as the remainder of the course represented by the control strip.

Contractor will not be allowed to place control strip until Contractor quality control program (CQCP), showing conformance with requirements of paragraph 401-5.1, has been accepted, in writing, by Engineer.

Control strip will consist of at least 250 tons or 1/2 sublot, whichever is greater. Control strip shall be placed in two lanes of the same width and depth to be used in production with a longitudinal cold joint. Cold joint must be cut back in accordance with paragraph 401-4.14 using the same procedure used during production. Cold joint for the control strip will be an exposed construction joint at least four hours old or when mat cools to less than 160°F. Equipment used in construction of the control strip shall be same type, configuration, and weight to be used on Project.

Control strip will be considered acceptable by Engineer if gradation, asphalt content, and VMA are within action limits specified in paragraph 401-5.5a; and Mat density, air voids, and joint density meet requirements specified in paragraphs 401-6.2.

If control strip is unacceptable, necessary adjustments to JMF, plant operation, placing procedures, and/or rolling procedures shall be made and another control strip shall be placed. Unacceptable control strips shall be removed at Contractor expense.

Control strip will be considered one lot for payment based upon average of three, at minimum, samples (no sublots required for control strip). Payment will only be made for an acceptable control strip in accordance with paragraph 401-8.1 using a lot pay factor equal to 100.

CONSTRUCTION METHODS

401-4.1 Weather limitations. Asphalt shall not be placed upon a wet surface or when surface temperature of underlying course is less than specified in Table 4. Temperature requirements may be waived by Engineer, if requested; however, all other requirements including compaction shall be met.

Table 4. Surface Temperature Limitations of Underlying Course

Mat Thickness	Base Temperature (Minimum)	
	°F	°C
3 inches or greater	40 [1]	4
Greater than 2 inches but less than 3 inches	45	7

401-4.2 Asphalt plant. Plants used for the preparation of asphalt shall conform to requirements of American Association of State Highway and Transportation Officials (AASHTO) M156 including:

a. Inspection of plant. RPR and Engineer, (or authorized representative), shall have access, at all times, to all areas of plant for checking adequacy of equipment; inspecting operation of plant: verifying weights, proportions, and material properties; and checking temperatures maintained in preparation of mixtures.

b. Storage bins and surge bins. Asphalt mixture stored in storage/surge bins shall meet same requirements as asphalt mixture loaded directly into trucks. Asphalt mixture shall not be stored in storage/surge bins for greater than 12 hours. If RPR/Engineer determines there is an excessive heat loss, segregation, or oxidation of asphalt mixture due to temporary storage, temporary storage shall not be allowed.

401-4.3 Aggregate stockpile management. Aggregate stockpiles shall be constructed in a manner that prevents segregation and intermixing of deleterious materials. Aggregates from different sources shall be stockpiled, weighed, and batched separately at the asphalt batch plant. Aggregates that have become segregated or mixed with earth or foreign material shall not be used.

A continuous supply of materials shall be provided to the work to ensure continuous placement.

401-4.4 Hauling equipment. Trucks used for hauling asphalt shall have tight, clean, and smooth metal beds. To prevent the asphalt from sticking to the truck beds, the truck beds shall be lightly coated with a minimum amount of paraffin oil, lime solution, or other material approved by Engineer. Petroleum products shall not be used for coating truck beds. Each truck shall have a suitable cover to protect the mixture from adverse weather. When necessary, to ensure that the mixture will be delivered to the site at the specified temperature, truck beds shall be insulated or heated and covers shall be securely fastened.

401-4.4.1 Material transfer vehicle (MTV). Material transfer vehicles used to transfer the material from the hauling equipment to the paver, shall use a self-propelled, material transfer vehicle with a swing conveyor that can deliver material to the paver without making contact with the paver. MTV shall be able to move back and forth between the hauling equipment and the paver providing material transfer to the paver, while allowing the paver to operate at a constant speed. MTV will have remixing and storage capability to prevent physical and thermal segregation.

401-4.5 Asphalt pavers. Asphalt pavers shall be self-propelled with an activated heated screed, capable of spreading and finishing courses of asphalt that will meet specified thickness, smoothness, and grade. Paver shall have sufficient power to propel itself and hauling equipment without adversely affecting finished surface. Asphalt paver shall be equipped with a control system capable of automatically maintaining specified screed grade and elevation.

If spreading and finishing equipment in use leaves tracks or indented areas or produces other blemishes in pavement not satisfactorily corrected by scheduled operations, use of such equipment shall be discontinued.

Paver shall be capable of paving to a minimum width specified in paragraph 401-4.12.

401-4.6 Rollers. Number, type, and weight of rollers shall be sufficient to compact the asphalt to the required density while it is still in a workable condition without crushing of the aggregate, depressions, or other damage to the pavement surface. Rollers shall be in good condition, clean, and capable of operating at slow speeds to avoid displacement of the asphalt. All rollers shall be specifically designed and suitable for compacting asphalt concrete and shall be properly used. Rollers that impair the stability of any layer of a pavement structure or underlying soils shall not be used.

401-4.7 Density device. Contractor shall have on site a density gauge during all paving operations in order to assist in the determination of the optimum rolling pattern, type of roller, and frequencies, as well as to monitor the effect of the rolling operations during production paving. Contractor shall supply a qualified technician during all paving operations to calibrate the gauge and obtain accurate density readings for all new asphalt. These densities shall be supplied to RPR upon request at any time during construction. No separate payment will be made for supplying the density gauge and technician.

401-4.8 Preparation of asphalt binder. Asphalt binder shall be heated in a manner that will avoid local overheating and provide a continuous supply of the asphalt binder to the mixer at a uniform temperature. Temperature of unmodified asphalt binder delivered to the mixer shall be sufficient to provide a suitable viscosity for adequate coating of the aggregate particles but shall not exceed 325°F when added to aggregate. Temperature of modified asphalt binder shall be no more than 350°F when added to aggregate.

401-4.9 Preparation of mineral aggregate. Aggregate for the asphalt shall be heated and dried. Maximum temperature and rate of heating shall be such that no damage occurs to the aggregates. Temperature of the aggregate and mineral filler shall not exceed 350°F when the asphalt binder is added. Take care so aggregates high in calcium or magnesium content are not damaged by overheating. Temperature shall not be lower than is required to obtain complete coating and uniform distribution on the aggregate particles and to provide a mixture of satisfactory workability.

401-4.10 Preparation of Asphalt mixture. Aggregates and the asphalt binder shall be weighed or metered and mixed in the amount specified by JMF. Combined materials shall be mixed until the aggregate obtains

a uniform coating of asphalt binder and is thoroughly distributed throughout the mixture. Wet mixing time shall be the shortest time that will produce a satisfactory mixture, but not less than 25 seconds for batch plants. Wet mixing time for all plants shall be established by Contractor, based on the procedure for determining the percentage of coated particles described in ASTM D2489, for each individual plant and for each type of aggregate used. Wet mixing time will be set to achieve 95% of coated particles. For continuous mix plants, the minimum mixing time shall be determined by dividing the weight of its contents at operating level by the weight of the mixture delivered per second by the mixer. Moisture content of all asphalt upon discharge shall not exceed 0.5%.

401-4.11 Application of Prime and Tack Coat. Immediately before placing asphalt mixture, clean underlying course of all dust and debris.

Apply prime coat in accordance with Item P-602 to aggregate base prior to placing asphalt mixture.

Apply tack coat in accordance with Item P-603 to all vertical and horizontal asphalt and concrete surfaces prior to placement of the first and each subsequent lift of asphalt mixture.

401-4.12 Laydown plan, transporting, placing, and finishing. Prior to asphalt placement, Contractor shall prepare a laydown plan with the sequence of paving lanes and width to minimize the number of cold joints; the location of any temporary ramps; laydown temperature; and estimated time of completion for each portion of the work (milling, paving, rolling, cooling, etc.). The laydown plan and any modifications shall be approved by RPR and Engineer.

Deliveries shall be scheduled so that placing and compacting of asphalt is uniform with minimum stopping and starting of the paver. Hauling over freshly placed material shall not be permitted until the material has been compacted, as specified, and allowed to cool to approximately ambient temperature. Contractor, at their expense, shall be responsible for repair of any damage to the pavement caused by hauling operations.

Contractor shall survey each lift of asphalt surface course and certify to RPR/Engineer that every lot of each lift meets the grade tolerances of paragraph 401-6.2d before the next lift can be placed.

Edges of existing asphalt pavement abutting new work shall be saw cut and the cut off material and laitance removed. Apply a tack coat in accordance with P-603 before new asphalt material is placed against it.

Speed of the paver shall be regulated to eliminate pulling and tearing asphalt mat. Placement of asphalt mix shall begin along centerline of a crowned section or on the high side of areas with a one-way slope unless shown otherwise on the laydown plan as accepted by RPR and Engineer. Asphalt mix shall be placed in consecutive adjacent lanes having a minimum width of 10 feet except where edge lanes require less width to complete area. Additional screed sections attached to widen the paver to meet the minimum lane width requirements must include additional auger sections to move the asphalt mixture uniformly along screed extension.

Longitudinal joint in one course shall offset the longitudinal joint in the course immediately below by at least 1 foot; however, joint in surface top course shall be at the centerline of crowned pavements. Transverse joints in one course shall be offset by at least 10 feet from transverse joints in the previous course. Transverse joints in adjacent lanes shall be offset a minimum of 10 feet. On areas where irregularities or unavoidable obstacles make the use of mechanical spreading and finishing equipment impractical, the asphalt may be spread and luted by hand tools.

RPR may at any time, reject any batch of asphalt, on the truck or placed in the mat, which is rendered unfit for use due to contamination, segregation, incomplete coating of aggregate, or overheated asphalt mixture. Such rejection may be based on only visual inspection or temperature measurements. In the event of such rejection, Contractor may take a representative sample of the rejected material in the presence of RPR, and if it can be demonstrated in the laboratory, in the presence of RPR, that such material was erroneously rejected, payment will be made for the material at the contract unit price.

Areas of segregation in the surface course, as determined by RPR, shall be removed and replaced at Contractor's expense. Area shall be removed by saw cutting and milling a minimum of the construction lift thickness as specified in paragraph 401-3.3, Table 2 for the approved mix design. Area to be removed and replaced shall be a minimum width of the paver and a minimum of 10 feet long.

401-4.13 Compaction of asphalt mixture. After placing, asphalt mixture shall be thoroughly and uniformly compacted by self-propelled rollers. Surface shall be compacted as soon as possible when asphalt has attained sufficient stability so rolling does not cause undue displacement, cracking or shoving. Sequence of rolling operations and the type of rollers used shall be at the discretion of Contractor. Speed of roller shall, at all times, be sufficiently slow to avoid displacement of the hot mixture and be effective in compaction. Any surface defects/displacement occurring as a result of roller, or another cause, shall be corrected at Contractor expense.

Sufficient rollers shall be furnished to handle output of plant. Rolling shall continue until the surface is of uniform texture, true to grade and cross-section, and required field density is obtained. To prevent adhesion of asphalt to roller, the wheels shall be equipped with a scraper and kept moistened with water as necessary.

In areas not accessible to roller, mixture shall be thoroughly compacted with approved power tampers.

Any asphalt that becomes loose and broken, mixed with dirt, contains check-cracking, or in any way defective shall be removed and replaced with fresh hot mixture and immediately compacted to conform to the surrounding area. This work shall be done at Contractor's expense. Skin patching shall not be allowed.

401-4.14 Joints. The formation of all joints shall be made to ensure a continuous bond between the courses and obtain the required density. All joints shall have the same texture as other sections of the course and meet the requirements for smoothness and grade.

The roller shall not pass over the unprotected end of the freshly laid asphalt except when necessary to form a transverse joint. When necessary to form a transverse joint, it shall be made by means of placing a bulkhead or by tapering the course. Tapered edge shall be cut back to its full depth and width on a straight line to expose a vertical face prior to placing the adjacent lane. In both methods, all contact surfaces shall be coated with an asphalt tack coat before placing any fresh asphalt against the joint.

Longitudinal joints which have been left exposed for more than four hours; the surface temperature has cooled to less than 175°F; or are irregular, damaged, uncompacted or otherwise defective shall be cut back with a cutting wheel or pavement saw a maximum of 3 inches to expose a clean, sound, uniform vertical surface for the full depth of the course. All cutback material and any laitance produced from cutting joints shall be removed from the project. Asphalt tack coat in accordance with P-603 shall be applied to the clean, dry joint prior to placing any additional fresh asphalt against the joint. The cost of this work shall be considered incidental to the cost of the asphalt.

401-4.15 Saw-cut grooving. Not required.

401-4.16 Diamond grinding. Diamond grinding shall be completed prior to pavement grooving. Diamond grinding shall be accomplished by sawing with saw blades impregnated with industrial diamond abrasive.

Diamond grinding shall be performed with a machine designed specifically for diamond grinding capable of cutting a path at least 3 feet wide. The saw blades shall be 1/8-inch wide with a sufficient number of blades to create grooves 0.090-0.130 inch wide; and peaks and ridges approximately 1/32 inch higher than the bottom of the grinding cut. The actual number of blades will be determined by Contractor and depend on the hardness of the aggregate. Equipment or grinding procedures that cause ravels, aggregate fractures, spalls or disturbance to the pavement will not be permitted. Contractor shall demonstrate to RPR that the grinding equipment will produce satisfactory results prior to making corrections to surfaces. Grinding will be tapered in all directions to provide smooth transitions to areas not requiring grinding. Slurry resulting from the grinding operation shall be continuously removed and the pavement left in a clean condition. Contractor shall apply a surface treatment per P-608 to all areas that have been subject to grinding.

401-4.17 Nighttime paving requirements. Contractor shall provide adequate lighting during any nighttime construction. A lighting plan shall be submitted by Contractor and approved by Construction Manager before start of any nighttime work. All work shall be in accordance with approved CSPP and lighting plan.

CONTRACTOR QUALITY CONTROL (CQC)

401-5.1 General. Contractor shall develop a Contractor Quality Control Program (CQCP) in accordance with Item C-100. No partial payment will be made for materials without an approved CQCP.

401-5.2 Contractor quality control (QC) facilities. Contractor shall provide or contract for testing facilities in accordance with Item C-100. Permit RPR unrestricted access to inspect Contractor's QC facilities and witness QC activities. RPR will advise Contractor in writing of any noted deficiencies concerning the QC facility, equipment, supplies, or testing personnel and procedures. When the deficiencies are serious enough to be adversely affecting the test results, the incorporation of materials into work shall be suspended immediately and not permitted to resume until the deficiencies are satisfactorily corrected.

401-5.3 Contractor QC testing. Contractor shall perform all QC tests necessary to control the production and construction processes applicable to these specifications and as set forth in the approved CQCP. Testing program shall include, but not necessarily be limited to, tests for the control of asphalt content, aggregate gradation, temperatures, aggregate moisture, field compaction, and surface smoothness. QC Testing Plan shall be developed as part of CQCP.

a. Asphalt content. A minimum two tests shall be performed per day in accordance with ASTM D6307 or D2172 for determination of asphalt content. When using ASTM D6307, correction factor shall be determined as part of the first test performed at the beginning of plant production; and as part of every tenth test performed thereafter. Asphalt content for the day will be determined by averaging test results.

b. Gradation. Aggregate gradations shall be determined a minimum of twice per day from mechanical analysis of extracted aggregate in accordance with ASTM D5444, C136, and C117.

c. Moisture content of aggregate. Moisture content of aggregate used for production shall be determined a minimum of once per day in accordance with ASTM C566.

d. Moisture content of asphalt. Moisture content shall be determined once per day in accordance with AASHTO T329 or ASTM D1461.

e. Temperatures. Temperatures shall be checked, at least four times per day, at necessary locations to determine the temperatures of the dryer, the asphalt binder in the storage tank, the asphalt at the plant, and the asphalt at the job site.

f. In-place density monitoring. Contractor shall conduct any necessary testing to ensure specified density is being achieved. A nuclear gauge may be used to monitor the pavement density in accordance with ASTM D2950.

g. Smoothness for Contractor Quality Control.

Contractor shall perform smoothness testing in transverse and longitudinal directions daily to verify construction processes are producing pavement with variances less than 1/4 inch in 12 feet, identifying areas that may pond water which could lead to hydroplaning of aircraft. If smoothness criteria is not met, appropriate changes and corrections to the construction process shall be made by Contractor before construction continues

Contractor may use a 12-foot straightedge, rolling inclinometer meeting requirements of ASTM E2133 or rolling external reference device that can simulate a 12-foot straightedge approved by RPR. Straight-edge testing shall start with half the length of straightedge at edge of pavement section tested then moved

ahead half the length of straightedge for each successive measurement. Testing shall be continuous across all joints. Surface irregularity shall be determined by placing the freestanding (unleveled) straightedge on the pavement surface and allowing it to rest upon the two highest spots covered by its length and measuring the maximum gap between the straightedge and the pavement surface in the area between the two high points. If rolling inclinometer or external reference device is used, the data may be evaluated using either FAA profile program, ProFAA, or FHWA ProVal, using 12-foot straightedge simulation function.

Smoothness readings shall not be made across grade changes or cross slope transitions. Transition between new and existing pavement shall be evaluated separately for conformance with the plans.

(1) Transverse measurements. Transverse measurements shall be taken for each day's production placed. Transverse measurements shall be taken perpendicular to the pavement centerline each 50 feet or more often as determined by RPR. Joint between lanes shall be tested separately to facilitate smoothness between lanes.

(2) Longitudinal measurements. Longitudinal measurements shall be taken for each day's production placed. Longitudinal tests shall be parallel to the centerline of paving; at the center of paving lanes when widths of paving lanes are less than 20 feet; and at the third points of paving lanes when widths of paving lanes are 20 feet or greater.

Deviations on the final surface course in either the transverse or longitudinal direction that will trap water greater than 1/4 inch shall be corrected with diamond grinding per paragraph 401-4.16 or by removing and replacing the surface course to full depth. Grinding shall be tapered in all directions to provide smooth transitions to areas not requiring grinding. All areas in which diamond grinding has been performed shall be subject to the final pavement thickness tolerances specified in paragraph 401-6.1d(3). Areas that have been ground shall be sealed with a surface treatment in accordance with Item P-608. To avoid the surface treatment creating any conflict with runway or taxiway markings, it may be necessary to seal a larger area.

Control charts shall be kept to show area of each day's placement and the percentage of corrective grinding required. Corrections to production and placement shall be initiated when corrective grinding is required. If Contractor's machines and/or methods produce significant areas that need corrective actions in excess of 10 percent of a day's production, production shall be stopped until corrective measures are implemented by Contractor.

h. Grade. Grade shall be evaluated daily to allow adjustments to paving operations when grade measurements do not meet specifications. As a minimum, grade shall be evaluated prior to and after the placement of the first lift and after placement of the surface lift.

Measurements will be taken at appropriate gradelines (as a minimum at center and edges of paving lane) and longitudinal spacing as shown on cross-sections and plans. The final surface of the pavement will not vary from the gradeline elevations and cross-sections shown on the plans by more than 1/2 inch vertically and 0.1 feet laterally. Contractor will provide documentation to RPR by the end of the following working day.

Areas with humps or depressions that exceed grade or smoothness criteria and that retain water on the surface must be ground off provided the course thickness after grinding is not more than 1/2 inch less than the thickness specified on the plans. Grinding shall be in accordance with paragraph 401-4.16.

Contractor shall repair low areas or areas that cannot be corrected by grinding by removal of deficient areas to depth of final course plus 0.5 inch and replacing with new material. Skin patching is not allowed.

401-5.4 Sampling. When directed by Engineer, Contractor shall sample and test any material that appears inconsistent with similar material being sampled, unless such material is voluntarily removed and replaced or deficiencies corrected by Contractor. All sampling shall be in accordance with standard procedures specified.

401-5.5 Control charts. Contractor shall maintain linear control charts for both individual measurements and range (i.e. difference between highest and lowest measurements) for aggregate gradation, asphalt content, and VMA. VMA for each day will be calculated and monitored by the QC laboratory.

Control charts shall be posted in a location satisfactory to RPR and kept current. At minimum, control charts shall identify project number, contract item number, test number, each test parameter, Action and Suspension Limits applicable to each test parameter, and Contractor's test results. Contractor shall use the control charts as part of a process control system for identifying potential problems and assignable causes before they occur. If Contractor's projected data during production indicates a problem and Contractor is not taking satisfactory corrective action, RPR may suspend production or acceptance of the material.

a. Individual measurements. Control charts for individual measurements shall be established to maintain process control within tolerance for aggregate gradation, asphalt content, and VMA. Control charts shall use the job mix formula target values as indicators of central tendency for the following test parameters with associated Action and Suspension Limits:

Control Chart Limits for Individual Measurements

Sieve	Action Limit	Suspension Limit
3/4 inch	±6%	±9%
1/2 inch	±6%	±9%
3/8 inch	±6%	±9%
No. 4	±6%	±9%
No. 16	±5%	±7.5%
No. 50	±3%	±4.5%
No. 200	±2%	±3%
Asphalt Content	±0.45%	±0.70%
Minimum VMA	-0.5%	-1.0%

b. Range. Control charts shall be established to control gradation process variability. Range shall be plotted as difference between two test results for each control parameter. Suspension Limits specified are based on a sample size of n = 2. Should Contractor elect to perform more than two tests per lot, Suspension Limits shall be adjusted by multiplying the Suspension Limit by 1.18 for n = 3 and by 1.27 for n = 4.

Control Chart Limits Based on Range

Sieve	Suspension Limit
1/2 inch	11%
3/8 inch	11%
No. 4	11%
No. 16	9%
No. 50	6%
No. 200	3.5%
Asphalt Content	0.8%

c. Corrective Action. CQCP shall indicate that appropriate action shall be taken when the process is believed to be out of tolerance. Plan shall contain rules to gauge when a process is out of control and detail what action will be taken to bring the process into control. As a minimum, a process shall be deemed out of control and production stopped and corrective action taken, if:

(1) One point falls outside the Suspension Limit line for individual measurements or range; or
(2) Two points in a row fall outside the Action Limit line for individual measurements.

401-5.6 QC reports. Contractor shall maintain records and shall submit reports of QC activities daily in accordance with Item C-100.

MATERIAL ACCEPTANCE

401-6.1 Acceptance sampling and testing. Unless otherwise specified, all acceptance sampling and testing necessary to determine conformance with requirements specified herein will be performed by Engineer at no cost to Contractor except coring as required shall be completed and paid for by Contractor.

a. Quality assurance (QA) testing laboratory. QA testing laboratory performing these acceptance tests will be accredited in accordance with ASTM D3666. QA laboratory accreditation will be current and listed on the accrediting authority's website. All test methods required for acceptance sampling and testing will be listed on the lab accreditation.

b. Lot size. A standard lot will be equal to one day's production divided into approximately equal sublots of between 400-600 tons. When only one or two sublots are produced in a day's production, the sublots will be combined with the production lot from the previous or next day.

Where more than one plant is simultaneously producing asphalt for the job, lot sizes will apply separately for each plant.

c. Asphalt air voids. Plant-produced asphalt will be tested for air voids on a sublot basis.

(1) Sampling. Material from each sublot shall be sampled in accordance with ASTM D3665. Samples shall be taken from material deposited into trucks at the plant or at the job site in accordance with ASTM D979. Sample of asphalt may be put in a covered metal tin and placed in an oven for not less than 30 nor more than 60 minutes to maintain material at or above compaction temperature as specified in JMF.

(2) Testing. Air voids will be determined for each sublot in accordance with ASTM D3203 for a set of compacted specimens prepared in accordance with ASTM D6925.

d. In-place asphalt mat and joint density. Each sublot will be tested for in-place mat and joint density as a percentage of the theoretical maximum density (TMD).

(1) Sampling. Contractor will cut minimum 4- or 6-inch-diameter samples in accordance with ASTM D5361. Contractor shall furnish all tools, labor, and materials for cleaning, and filling the cored pavement. Laitance produced by the coring operation shall be removed immediately after coring, and core holes shall be filled within one day after sampling in a manner acceptable to RPR.

(2) Bond. Each lift of asphalt shall be bonded to the underlying layer. If cores reveal that the surface is not bonded, additional cores shall be taken as directed by RPR/Engineer to determine the extent of unbonded areas. Unbonded areas shall be removed by milling and replaced at no additional cost as directed by Engineer.

(3) Thickness. Thickness of each lift of surface course will be evaluated by Engineer for compliance to the requirements shown on the plans after any necessary corrections for grade. Measurements of thickness will be made using the cores extracted for each sublot for density measurement. The maximum allowable deficiency at any point will not be more than 1/4 inch less than the thickness indicated for the lift. Average thickness of lift, or combined lifts, will not be less than the indicated thickness. Where the thickness tolerances are not met, the lot or sublot shall be corrected by Contractor at his expense by removing the deficient area and replacing with new pavement. Contractor, at his expense, may take additional cores as approved by Engineer to circumscribe the deficient area.

(4) Mat density. One core shall be taken from each sublot. Core locations will be determined by RPR in accordance with ASTM D3665. Cores for mat density shall not be taken closer than 1 foot from a transverse or longitudinal joint. Bulk specific gravity of each cored sample will be determined in accordance with ASTM D2726. Percent compaction (density) of each sample will be determined by dividing the bulk specific gravity of each sublot sample by TMD for that sublot.

(5) Joint density. One core centered over the longitudinal joint shall be taken for each sublot that has a longitudinal joint. Core locations will be determined by RPR in accordance with ASTM D3665. Bulk specific gravity of each core sample will be determined in accordance with ASTM D2726. Percent

compaction (density) of each sample will be determined by dividing the bulk specific gravity of each joint density sample by average TMD for the lot. TMD used to determine joint density at joints formed between lots will be lower of average TMD values from adjacent lots.

401-6.2 Acceptance criteria.

a. General. Acceptance will be based on implementation of Contractor Quality Control Program (CQCP) and the following characteristics of the asphalt and completed pavements: air voids, mat density, joint density, and grade and Profilograph roughness**.**

b. Air Voids and Mat density. Acceptance of each lot of plant produced material for mat density and air voids will be based on the percentage of material within specification limits (PWL). If PWL of lot equals or exceeds 90%, lot will be acceptable. Acceptance and payment will be determined in accordance with paragraph 401-8.1.

c. Joint density. Acceptance of each lot of plant produced asphalt for joint density will be based on the PWL. If the PWL of the lot is equal to or exceeds 90%, the lot will be considered acceptable. If PWL is less than 90%, Contractor shall evaluate the reason and act accordingly. If PWL is less than 80%, Contractor shall cease operations and until the reason for poor compaction has been determined. If PWL is less than 71%, the pay factor for the lot used to complete the joint will be reduced by 5 percentage points. This lot pay factor reduction will be incorporated and evaluated in accordance with paragraph 401-8.1.

d. Grade. Final finished surface of the pavement shall be surveyed to verify that the grade elevations and cross-sections shown on the plans do not deviate more than 1/2 inch vertically or 0.1 feet laterally.

Cross-sections of pavement shall be taken at a minimum 50-footlongitudinal spacing and at all longitudinal grade breaks. Minimum cross-section grade points shall include grade at centerline, ±10 feet of centerline, edge of taxiway pavement, TSA boundary, and TOFA boundary.

The survey and documentation shall be stamped and signed by a licensed surveyor. Payment for sublots that do not meet grade for over 25% of the sublot shall not be more than 95%.

e. Profilograph roughness for QA Acceptance. Final profilograph shall be full length of project to facilitate testing of roughness between lots. Contractor, in the presence of RPR, shall perform a profilograph roughness test on the completed project with a profilograph meeting the requirements of ASTM E1274 or a Class I inertial profiler meeting ASTM E950. Data and results shall be provided within 48 hours of profilograph roughness tests.

The pavement shall have an average profile index less than 15 inches per mile per 1/10 mile. The equipment shall utilize electronic recording and automatic computerized reduction of data to indicate “must grind” bumps and the Profile Index for the pavement using a 0.2-inch blanking band. The bump template must span 1 inch with an offset of 0.4 inches. The profilograph must be calibrated prior to use and operated by a factory or State DOT approved, trained operator. Profilograms shall be recorded on a longitudinal scale of 1 inch equals 25 feet and a vertical scale of 1 inch equals 1 inch. Profilograph shall be performed 1 foot right and left of project centerline and 15 feet right and left of project centerline. Any areas that indicate “must grind” shall be corrected with diamond grinding per paragraph 401-4.16 or by removing and replacing full depth of surface course. as directed by RPR. Where corrections are necessary, a second profilograph run shall be performed to verify that the corrections produced an average profile index of 15 inches per mile per 1/10 mile or less.

401-6.3 Percentage of material within specification limits (PWL). PWL will be determined in accordance with procedures specified in Item C-110. Specification tolerance limits (L) for lower and (U) for upper are contained in Table 5.

Table 5. Acceptance Limits for Air Voids and Density

Test Property	Pavements Specification Tolerance Limits	
	L	U
Air Voids Total Mix (%)	2.0	5.0
Surface Course Mat Density (%)	92.8	-
Base Course Mat Density (%)	92.0	-
Joint density (%)	90.5	--

a. Outliers. All individual tests for mat density and air voids will be checked for outliers (test criterion) in accordance with ASTM E178, at a significance level of 5%. Outliers will be discarded, and the PWL will be determined using the remaining test values. The criteria in Table 5 is based on production processes which have a variability with the following standard deviations: Surface Course Mat Density (%), 1.20; Base Course Mat Density (%), 1.55; Joint Density (%), 1.8

Contractor should note 90 PWL is achieved when consistently producing: (1) a surface course with average mat density of at least 94% with 1.20% or less variability, (2) 90 PWL is achieved when consistently producing a base course with an average mat density of at least 93.5% with 1.8% or less variability, and (3) 90 PWL is achieved when consistently producing joints with an average joint density of at least 91% with 1.8% or less variability.

401-6.4 Resampling pavement for mat density.

a. General. Resampling of a lot of pavement will only be allowed for mat density, and then, only if Contractor requests same, in writing, within 48 hours after receiving the written test results from RPR. A retest will consist of all the sampling and testing procedures contained in paragraphs 401-6.1d and 401-6.2b. Only one resampling per lot will be permitted.

(1) Redefined PWL will be calculated for resampled lot. Number of tests used to calculate redefined PWL will include initial tests made for that lot plus retests.

(2) Cost for resampling and retesting shall be borne by Contractor.

b. Payment for resampled lots. Redefined PWL for a resampled lot will be used to calculate payment for that lot in accordance with Table 6.

c. Outliers. Check for outliers in accordance with ASTM E178, at a significance level of 5%.

METHOD OF MEASUREMENT

401-7.1 Measurement. Asphalt shall be measured by the number of tons of asphalt used in the accepted work. Batch weights or truck scale weights will be used to determine the basis for the tonnage.

BASIS OF PAYMENT

401-8.1 Payment. Payment for a lot of asphalt meeting all acceptance criteria as specified in paragraph 401-6.2 shall be made based on results of tests for mat density and air voids. Payment for acceptable lots shall be adjusted according to paragraph 401-8.1c for mat density and air voids; and paragraph 401-6.2c for joint density, subject to limitation that:

a. Total project payment for plant mix asphalt pavement shall not exceed 100% of the product of the contract unit price and the total number of tons of asphalt used in the accepted work.

b. Price shall be compensation for furnishing all materials, for all preparation, mixing, and placing of these materials, and for all labor, equipment, tools, and incidentals necessary to complete the item.

c. Basis of adjusted payment. Pay factor for each individual lot shall be calculated in accordance with Table 6. Pay factor shall be calculated for both mat density and air voids. Lot pay factor shall be the higher of the two values when calculations for both mat density and air voids are 100% or higher. Lot pay factor shall be the product of the two values when only one of the calculations for either mat density or air voids is 100% or higher. Lot pay factor shall be the lower of the two values when calculations for both mat density and air voids are less than 100%. If PWL for joint density is less than 71%, then lot pay factor shall be reduced by 5% but be no higher than 95%.

For each lot accepted, the adjusted contract unit price shall be the product of the lot pay factor for the lot and the contract unit price. Payment shall be subject to the total project payment limitation specified in paragraph 401-8.1a. Payment in excess of 100% for accepted lots of asphalt shall be used to offset payment for accepted lots of asphalt pavement that achieve a lot pay factor less than 100%.

Payment for sublots which do not meet grade in accordance with paragraph 401-6.2d after correction for over 25% of the sublot shall be reduced by 5%.

Table 6. Price adjustment schedule[1]

Percentage of material within specification limits (PWL)	Lot pay factor (percent of contract unit price)
96 – 100	103
90 – 95	PWL + 10
75 – 89	0.5 PWL + 55
55 – 74	1.4 PWL – 12
Below 55	Reject [2]

[1] Although theoretically possible to achieve a pay factor of 103% for each lot, actual payment above 100% shall be subject to the total project payment limitation specified in paragraph 401-8.1a.

[2] The lot shall be removed and replaced. However, Engineer may decide to allow the rejected lot to remain. In that case, if Engineer and Contractor agree in writing that the lot shall not be removed, it shall be paid for at 50% of the contract unit price and the total project payment shall be reduced by the amount withheld for the rejected lot.

d. Profilograph Roughness. Contractor will receive full payment when the profilograph average profile index is in accordance with paragraph 401-6.2e. When the final average profile index for the entire length of pavement does not exceed 15 inches per mile per 1/10 mile, payment will be made at the contract unit price for the completed pavement.

401-8.1 Payment.

Payment will be made under:

Item P-401-8.1a	Asphalt Surface Course Including Binder, 4-inch thickness, 2 lifts, complete per ton

END OF ITEM P-401

Item P-608-R Rapid Cure Seal Coat

DESCRIPTION

608-R-1.1 This item shall consist of the application of an asphalt surface treatment composed of natural and refined asphalt materials, additives, and light oils, for taxiways and runways with the application of a suitable aggregate to maintain adequate surface friction; and airfield secondary and tertiary pavements including aprons, shoulders, overruns, roads, parking areas, and other general applications with or without aggregate applied as designated on the plans.

Seal coat, asphalt sealer, and asphalt material are interchangeable throughout this specification. Asphalt means natural and refined asphalt materials in this specification.

MATERIALS

608-R-2.1 Aggregate. The fine-aggregate material shall be a dry, clean, sound, durable, angular shaped, with highly textured surfaces, manufactured specialty abrasive aggregate. It shall have 100% fractured faces, SiO2 content of 55% minimum, CaO of **3**% max, with a sand equivalent greater than 85 and a Mohs hardness of 7 or greater. Additional characteristics as outlined in the following table(s). Contractor shall submit specialty aggregate manufacturer's technical data and the specialty aggregate manufacturer's certification indicating that the specialty aggregate meets the requirements of the specification to RPR prior to start of construction. The aggregate must be approved for use by RPR and shall meet the following gradation limits when tested in accordance with ASTM C136:

Aggregate Material Gradation Requirements

Sieve Designation	Percentage by Weight Passing Sieves
No. 8	100
No. 14	98-100
No. 16	85-100
No. 30	15-45
No. 50	0-8
No. 70	0-2

Aggregate Characteristics

Test	Standard	Range
Micro-Deval	ASTM D7428	15% max
Magnesium Sulfate Soundness	ASTM C88	2% max
Aggregate Angularity	ASTM C1252 – Test Method A	45% min
Moisture Content (%)	ASTM C566	2% max
Bulk Dry Specific Gravity	ASTM C128	2.6 – 3.0
Absorption (%)	ASTM D2216	3% max
Mohs Hardness	Mohs Scale	7 min

Contractor shall provide a certification of analysis (COA) showing analysis and properties of the material delivered for use on the project. Contractor's certification may be subject to verification by testing the material delivered for use on the project.

608-R-2.2 Asphalt material. The asphalt material base residue shall contain not less than 40% gilsonite, or uintaite, and shall not contain any tall oil pitch or coal tar material. The material shall be compatible with asphalt pavement, and have a 5-year minimum proven aviation performance record at airports with similar climatic conditions. The solvent-based rapid cure material shall meet the following properties:

Properties for Asphalt Sealing Material

Properties	Specification	Limits
Kinematic Viscosity at 140°F	ASTM D4402	10-30 cSt
Percent Residue by Distillation	ASTM D402	30-45%

Tests on Residue from Distillation

Properties	Specification	Limits
Penetration at 77°F	ASTM D5	2-12 dmm
Softening Point	ASTM D36	180-200
Solubility in 1,1,1 Trichloroethylene	ASTM D2042	99% min.
HCI Precipitation Value		18-25

Contractor shall provide a copy of the manufacturer's Certificate of Analysis (COA) for the asphalt sealer delivered to the project. If the asphalt sealer is diluted at other than the manufacturer's facility, Contractor shall provide a supplemental COA from an independent laboratory verifying the asphalt sealer properties. The COA shall be provided to and approved by RPR before the asphalt material is applied. The furnishing of the vendor's certified test report for the asphalt material shall not be interpreted as a basis for final acceptance. The manufacturer's COA may be subject to verification by testing the material delivered for use on the project.

The asphalt sealing material must be applied in an undiluted form. The material may be stored at ambient temperature for long periods of time if necessary. Storage will follow industry standard recommendations due to the flammability of the material; avoid sparks and open flames to come into contact with the material or any gasses that might be escaping the storage vessel.

Contractor shall provide a list of airport pavement projects, exposed to similar climate conditions, where this product has been successfully applied within at least 5 years of the project.

608-R-2.3 Seal Coat with Aggregate. Contractor shall submit friction test data from at least two airport projects identified under 608-R-2.2. Test data must be from the same project and include technical details on application rates, aggregate rates, and point of contact at the airport to confirm use and success of sealer with aggregate.

Friction test data in accordance with AC 150/5320-12, at 40 or 60 mph wet, must include as a minimum; the friction value prior to sealant application; two values, between 24 and 96 hours after application, with a minimum of 24 hours between tests; and one value between 180 days and 360 days after the application. The results of the tests between 24 and 96 hours shall indicate friction is increasing at a rate to obtain similar friction value of the pavement surface prior to application, and the long-term test shall indicate no apparent adverse effect with time relative to friction values and existing pavement surface.

Seal coat material submittal without required friction performance will not be approved. Friction tests performed on this project cannot be used as a substitute of this requirement.

COMPOSITION AND APPLICATION RATE

608-R-3.1 Application Rate. The approximate amounts of materials per square yard (square meter) for the asphalt surface treatment shall be as provided in the table for the treatment area(s) at the specified rate(s) as noted on the plans. The actual application rates will vary within the range specified to suit field conditions and will be recommended by the manufacturer's representative for control strip evaluations and approved by Engineer from the test area/sections evaluation.

	Application Rate	
Dilution Rate	**Quantity of Sealer gal/yd^2**	**Quantity of Aggregate lb/yd^2**
N/A	0.08-0.15	0.40-0.50

608-R-3.2 Control areas and control strips. A qualified manufacturer's representative shall be present in the field to assist Contractor in applying control areas and/or control strips to determine the appropriate application rate of both sealer and aggregate to be evaluated and approved by Engineer.

A test area and/or section shall be applied for each differing asphalt pavement surface identified in the project. The control area(s) and/or control strip(s) shall be used to determine the material application rate(s) of both sealer and aggregate prior to full production. The same equipment and method of operation shall be utilized on the control area(s) and/or control strip(s) as will be utilized on the remainder of the work.

a. For taxiway, taxilane and apron surfaces. Prior to full application, Contractor shall place test areas at varying application rates as recommended by Contractor's manufacturer's representative to determine appropriate application rate(s). Test areas will be located on representative section(s) of the pavement to receive the asphalt surface treatment designated by RPR.

b. For runway and high-speed exit taxiway surfaces. Prior to full application, Contractor shall place a series of control strips a minimum of 300 feet long by 12 feet wide, or width of anticipated application, whichever is greater, at varying application rates as recommended by the manufacturer's representative and acceptable to RPR to determine appropriate application rate(s). The control strips should be separated by a minimum of 200 feet between control strips. The area to be tested will be located on a representative section of the pavement to receive the asphalt surface treatment designated by Engineer. The control strips should be placed under similar field conditions as anticipated for the actual application. Before beginning the control strip(s), the skid resistance of the existing pavement shall be determined for each control strip with a continuous friction measuring equipment (CFME). The skid resistance of existing pavement can be immediately adjacent to the control strip or at the same location as the control strip if testing prior to application.

Contractor may begin testing the skid resistance of runway and high-speed exit taxiway control strips after application of the asphalt surface treatment has fully cured, generally 2 to 4 hours after application of the control strips depending on site conditions. Aircraft shall not be permitted on the runway or high-speed exit taxiway control strips until such time as Contractor validates that its surface friction meets the maintenance planning friction levels in AC 150/5320-12, Table 3-2 when tested at speeds of 40 and 60 mph wet with approved CFME.

c. Control strip. If the control strip should prove to be unsatisfactory, necessary adjustments to the application rate, placement operations, and equipment shall be made. Additional control strips shall be placed and additional skid resistance tests performed and evaluated. Full production shall not begin without RPR's approval of an appropriate application rate(s). Acceptable control strips shall be paid for in accordance with paragraph 608-R-8.1.

CONSTRUCTION METHODS

608-R-4.1 Worker safety. Contractor shall obtain a Safety Data Sheet (SDS) for both the asphalt sealer product and aggregate and require workmen to follow the manufacturer's recommended safety precautions. All additional industry standard safety precautions regarding the storage and applications of solvent based asphalts should be understood and followed by Contractor.

608-R-4.2 Weather limitations. The asphalt sealer shall be applied only when the existing pavement surface is dry and when the weather is not foggy, rainy, or when the wind velocity will prevent the uniform application of the material. No material shall be applied when dust or aggregate is blowing or when rain is anticipated within four hours of application completion. The atmospheric temperature and the pavement surface temperature shall both be at, or above 55°F and rising. The sealer will shall not be applied when pavement temperatures are expected to exceed 160F within the subsequent 72 hours if traffic will be opened on pavement within those 72 hours. During application, account for wind drift. Cover existing buildings, structures, runway edge lights, taxiway edge lights, informational signs, retro-reflective marking and in-pavement duct markers as necessary to protect against overspray before applying the sealer. Should sealer get on any light or marker fixture, promptly clean the fixture. If cleaning is not satisfactory to RPR, Contractor shall replace any light, sign or marker with equivalent equipment at no cost to Owner.

608-R-4.3 Equipment and tools. Contractor shall furnish all equipment, tools, and machinery necessary for the performance of the work.

a. Pressure distributor. The sealer shall be applied with a manufacturer-approved computer rate-controlled asphalt distributor. The equipment shall be in good working order and contain no contaminants or diluents in the tank. Spray bar tips must be clean, free of burrs, and of a size to maintain an even distribution of the sealer. Any type of tip or pressure source is suitable that will maintain predetermined flow rates and constant pressure during the application process with application speeds under eight miles per hour or 700 feet per minute. Contractor will provide verification of truck set-up (via a test-shot area), including but not limited to, nozzle tip size appropriate for application per nozzle manufacturer, spray-bar height and pressure and pump speed appropriate for the viscosity and temperature of sealer material, evidence of triple-overlap spray pattern, lack of leaks, and any other factors relevant to ensure the truck is in good working order before use. The distributor truck shall be equipped with a 12-foot, minimum, spray bar with individual nozzle control. The distributor truck shall be capable of specific application rates in the range of 0.05 to 0.25 gallons per square yard. These rates shall be computer-controlled rather than mechanical. The distributor truck shall have an easily accessible thermometer that constantly monitors the temperature of the sealer, and have an operable mechanical tank gauge that can be used to cross-check the computer accuracy.

Distributor truck shall effectively mix material prior to application. Distributor shall be equipped with a hand sprayer to spray the sealer in areas not accessible to distributor truck.

b. Aggregate spreader. The asphalt distributor truck will be equipped with an aggregate spreader mounted to the distributor truck that can apply aggregate to the sealer in a single pass operation without driving through wet sealer. The aggregate spreader shall be equipped with a variable control system capable of uniformly distributing the aggregate at the specified rate at varying application widths and speeds. The aggregate spreader must be adjusted to produce an even and accurate application of specified aggregate. Prior to any seal coat application, the aggregate spreader will be calibrated onsite to ensure acceptable uniformity of spread. RPR will observe the calibration and verify the results. The aggregate spreader will be re-calibrated each time the aggregate rate is changed either during the application of test strips or production. Contractor may consult the seal coat manufacturer representative for procedure and guidance. The aggregate spreader shall have a minimum hopper capacity of 3,000 pounds of aggregate. Push-type hand spreaders will be allowed for use around lights, signs and other obstructions, if necessary.

c. Power broom/blower. A power broom and/or blower shall be provided for removing loose material from the surface to be treated.

d. Equipment calibration. Asphalt distributors must be calibrated within the same construction season in accordance with ASTM D2995. Contractor must furnish a current calibration certification for the asphalt distributor truck from any State or other agency as approved by Engineer.

608-R-4.4 Preparation of asphalt pavement surfaces. Clean pavement surface immediately prior to placing the seal coat so that it is free of dust, dirt, grease, vegetation, oil or any type of objectionable surface film. Remove oil or grease from the asphalt pavement by scrubbing with a detergent, washing thoroughly with clean water, and treating these areas with the oil spot primer. Any additional surface preparation, such as crack repair, shall be in accordance with Item P-101, paragraph 101-3.6.

608-R-4.5 Application of asphalt sealer. The asphalt sealer shall be applied using a pressure distributor upon the properly prepared, clean, and dry surface at the application rate recommended by the manufacturer's representative and approved by Engineer from the test area/sections evaluation for each designated treatment area. Recommended material temperature for application is 70-90°F, but depending on the application equipment used, good material dispersion and pavement coverage may be achieved at lower material temperatures. The material should not be heated above 100°F.

Pavement surfaces which have excessive runoff of seal coat due to excessive amount of material being applied or excessive surface grade shall be treated in two or more applications, if feasible, to the specified application rate at no additional cost to Owner. Each additional application shall be performed after the prior application of material has penetrated into the pavement.

If low spots and depressions greater than 1/2 inch in depth in the pavement surface cause ponding or puddling of the applied materials, the pavement surface shall be lightly broomed with a broom or brush type squeegee. Brooming shall continue until the pavement surface is free of any pools of excess material. Ponding and/or puddling shall not cause excessive pavement tackiness and/or additional distress.

During all applications, the surfaces of adjacent structures shall be protected to prevent their being spattered or marred. Asphalt materials shall not be discharged into borrow pits or gutters or on the airport area.

Caution. *Heating asphalt binders of any kind always constitutes some degree of hazard. The most hazardous of these are cutback asphalts because of the highly volatile solvents used. Care must be taken not to allow any spark or open flame to come in contact with the cutback asphalt or the gases from cutback asphalt due to the low flash point. It is Contractor's responsibility to understand and adhere to these standards in regards to staying within the recommended application temperatures of this material and at all times during production.*

608-R-4.6 Application of aggregate material. Immediately following the application of the asphalt sealer, aggregate at the rate recommended by the manufacturer's representative and approved by RPR from the test area/sections evaluation for each designated application area, shall be spread uniformly over the asphalt sealer in a single-pass operation simultaneous with the sealer application. The sealer material and aggregate shall be applied simultaneously in a single pass operation, so as to not drive through the applied fresh sealer. The aggregate shall be spread to the same width of application as the asphalt material and shall not be applied in such thickness as to cause blanketing.

Sprinkling of additional aggregate material, and spraying additional asphalt material over areas that show up having insufficient cover or bitumen, shall be done by hand whenever necessary. In areas where hand work is necessitated, the aggregate shall be applied before the sealant begins to break.

Minimize aggregate from being broadcast and accumulating on the untreated pavement adjacent to an application pass. Prior to the next application pass, Contractor shall clean areas of excess or loose aggregate and remove from project site.

QUALITY CONTROL (QC)

608-R-5.1 Manufacturer's representation. The manufacturer's representative knowledgeable of the material, procedures, and equipment described in the specification is responsible to assist Contractor and RPR in determining the appropriate application rates of the emulsion and aggregate, as well as recommendations for proper preparation and start-up of seal coat application. Documentation of the manufacturer representative's experience and knowledge for applying the seal coat product shall be furnished to Engineer a minimum of 10 workdays prior to placement of the control strips. The cost of the manufacturer's representative shall be included in Contractor's bid price.

608-R-5.2 Contractor qualifications. Contractor shall provide Engineer with the seal coat Contractor's qualifications for applicators, personnel and equipment. Contractor shall also provide documentation that the seal coat Contractor is qualified to apply the seal coat and has made at least three applications similar to this project in the past two years.

MATERIAL ACCEPTANCE

608-R-6.1 Application rate. The rate of application of the asphalt emulsion shall be verified at least twice per day.

608-R-6.2 Friction tests. Friction tests in accordance with AC 150/5320-12, Measurement, Construction, and Maintenance of Skid-Resistant Airport Pavement Surfaces, shall be accomplished on all runway and high-speed taxiways that have received a seal coat. Each test includes performing friction tests at 40 mph and 60 mph both wet, 15 feet to each side of runway centerline. Contractor shall coordinate testing with RPR.and provide RPR a written report of friction test results. RPR shall be present for testing.

METHOD OF MEASUREMENT

608-R-7.1 Asphalt surface treatment. The quantity of asphalt surface treatment shall be measured by the square yards of material applied in accordance with the plans and specifications and accepted by Engineer.

Contractor must furnish Engineer with the certified weigh bills when materials are received for the asphalt material used under this contract. Contractor must not remove material from the tank car or storage tank until initial amounts and temperature measurements have been verified.

BASIS OF PAYMENT

608-R-8.1 Payment shall be made at the contract unit price per square yard for the asphalt surface treatment applied and accepted by RPR, and the contract unit price per lump sum for runway friction testing. This price shall be full compensation for all surface preparation, furnishing all materials, delivery, and application of these materials, for all labor, equipment, tools, and incidentals necessary to complete the item, including the friction testing and all work required to meet AC 150/5320-12, and any costs associated with furnishing a qualified manufacturer's representative to assist with control strips.

Payment will be made under:

Item P-608-R-8.1 Asphalt Surface Treatment – per square yard

END OF ITEM P-608-R

Item P-602 Emulsified Asphalt Prime Coat

DESCRIPTION

602-1.1 This item shall consist of an application of emulsified asphalt material on the prepared base course in accordance with these specifications and in reasonably close conformity to the lines shown on the plans.

MATERIALS

602-2.1 Emulsified Asphalt material. The emulsified asphalt material shall be as specified in ASTM D3628 for use as a prime coat appropriate to local conditions. Contractor shall provide a copy of the manufacturer's Certificate of Analysis (COA) for the emulsified asphalt material. The COA shall be provided to and approved by Engineer before the emulsified asphalt material is applied. The furnishing of the COA for the emulsified asphalt material shall not be interpreted as a basis for final acceptance. The manufacturer's COA may be subject to verification by testing the material delivered for use on the project.

CONSTRUCTION METHODS

602-3.1 Weather limitations. The emulsified asphalt prime coat shall be applied only when the existing surface is dry; the atmospheric temperature is 50°F or above, and the temperature has not been below 35°F for the 12 hours prior to application; and when the weather is not foggy or rainy. The temperature requirements may be waived when directed by Engineer.

602-3.2 Equipment. The equipment shall include a self-powered pressure asphalt material distributor and equipment for heating asphalt material.

Provide a distributor with pneumatic tires of such size and number that the load produced on the base surface does not exceed 65.0 psi of tire width to prevent rutting, shoving or otherwise damaging the base, surface, or other layers in the pavement structure. Design and equip the distributor to spray the asphalt material in a uniform coverage at the specified temperature, at readily determined and controlled rates 0.05-1.0 gallon per square yard with a pressure range of 25-75 psi and with an allowable variation from the specified rate of not more than ±5%, and at variable widths. Include with the distributor equipment a separate power unit for the bitumen pump, full-circulation spray bars, tachometer, pressure gauges, volume-measuring devices, adequate heaters for heating of materials to the proper application temperature, a thermometer for reading the temperature of tank contents, and a hand hose attachment suitable for applying asphalt material manually to areas inaccessible to the distributor. Equip the distributor to circulate and agitate the asphalt material during the heating process. If the distributor is not equipped with an operable quick shutoff valve, the prime operations shall be started and stopped on building paper.

A power broom and power blower suitable for cleaning the surfaces to which the asphalt coat is to be applied shall be provided.

Asphalt distributors must be calibrated annually in accordance with ASTM D2995. Contractor must furnish a current calibration certification for the asphalt distributor truck from any State or other agency as approved by Engineer.

602-3.3 Application of emulsified asphalt material. Immediately before applying the prime coat, the full width of the surface to be primed shall be swept with a power broom to remove all loose dirt and other objectionable material.

The asphalt emulsion material shall be uniformly applied with an asphalt distributor at 0.15-0.30 gallons per square yard depending on the base course surface texture. The type of asphalt material and application rate shall be approved by Engineer prior to application.

Following application of the emulsified asphalt material and prior to application of the succeeding layer of pavement, allow the asphalt coat to cure and to obtain evaporation of any volatiles or moisture. Maintain the coated surface until the succeeding layer of pavement is placed, by protecting the surface against damage and by repairing and recoating deficient areas. Allow the prime coat to cure without being disturbed for a period of at least 48 hours or longer, as may be necessary to attain penetration into the treated course. Furnish and spread sand to effectively blot up and cure excess asphalt material. Contractor shall remove blotting sand prior to asphalt concrete lay down operations at no additional expense to Owner. Keep traffic off surfaces freshly treated with asphalt material. Provide sufficient warning signs and barricades so that traffic will not travel over freshly treated surfaces.

602-3.4 Trial application rates. Contractor shall apply a minimum of three lengths of at least 100 feet for the full width of the distributor bar to evaluate the amount of emulsified asphalt material that can be satisfactorily applied with the equipment. Apply three different application rates of emulsified asphalt materials within the application range specified in paragraph 602-3.3. Other trial applications can be made using various amounts of material as directed by Engineer. The trial application is to demonstrate the equipment can uniformly apply the emulsified asphalt material within the rates specified and determine the application rate for the project.

602-3.5 Freight and waybills. Contractor shall submit waybills and delivery tickets during the progress of the work. Before the final estimate is allowed, file with Engineer certified waybills and certified delivery tickets for all emulsified asphalt materials used in the construction of the pavement covered by the contract. Do not remove emulsified asphalt material from storage until the initial outage and temperature measurements have been taken. The delivery or storage units will not be released until the final outage has been taken.

METHOD OF MEASUREMENT

602-4.1 The emulsified asphalt material for prime coat shall be measured by the gallon. Volume shall be corrected to the volume at 60°F in accordance with ASTM D4311. The emulsified asphalt material paid for will be the measured quantities used in the accepted work, provided that the measured quantities are not 10% over the specified application rate. Any amount of emulsified asphalt material more than 10% over the specified application rate for each application will be deducted from the measured quantities, except for irregular areas where hand spraying of the emulsified asphalt material is necessary. Water added to emulsified asphalt will not be measured for payment.

BASIS OF PAYMENT

602-5.1 Payment shall be made at the contract unit price per gallon for emulsified asphalt prime coat. This price shall be full compensation for furnishing all materials and for all preparation, delivering, and applying the materials, and for all labor, equipment, tools, and incidentals necessary to complete this item.

Payment will be made under:

Item P-602-5.1 Emulsified Asphalt Prime Coat, complete, per gallon.

END OF ITEM P-602

Item P-603 Emulsified Asphalt Tack Coat

DESCRIPTION

603-1.1 This item shall consist of preparing and treating an asphalt or concrete surface with asphalt material in accordance with these specifications and in reasonably close conformity to the lines shown on the plans.

MATERIALS

603-2.1 Asphalt materials. The asphalt material shall be an emulsified asphalt as specified in ASTM D3628 as an asphalt application for tack coat appropriate to local conditions. The emulsified asphalt shall not be diluted. Contractor shall provide a copy of the manufacturer's Certificate of Analysis (COA) for the asphalt material to Engineer before the asphalt material is applied for review and acceptance. The furnishing of COA for the asphalt material shall not be interpreted as a basis for final acceptance. The manufacturer's COA may be subject to verification by testing the material delivered for use on the project.

CONSTRUCTION METHODS

603-3.1 Weather limitations. Tack coat shall be applied only when the existing surface is dry and atmospheric temperature is 50°F or above; temperature has not been below 35°F for 12 hours prior to application; and when the weather is not foggy or rainy. The temperature requirements may be waived when directed by Engineer.

603-3.2 Equipment. Contractor shall provide equipment for heating and applying the emulsified asphalt material. The emulsion shall be applied with a manufacturer-approved computer rate-controlled asphalt distributor. The equipment shall be in good working order and contain no contaminants or diluents in the tank. Spray bar tips must be clean, free of burrs, and of a size to maintain an even distribution of the emulsion. Any type of tip or pressure source is suitable that will maintain predetermined flow rates and constant pressure during the application process with application speeds under eight miles per hour or 700 feet per minute .

The equipment will be tested under pressure for leaks and to ensure proper set-up before use to verify truck set-up (via a test-shot area), including but not limited to, nozzle tip size appropriate for application, spray-bar height and pressure and pump speed, evidence of triple-overlap spray pattern, lack of leaks, and any other factors relevant to ensure the truck is in good working order before use.

The distributor truck shall be equipped with a minimum 12-foot spreader spray bar with individual nozzle control with computer-controlled application rates. The distributor truck shall have an easily accessible thermometer that constantly monitors the temperature of the emulsion and have an operable mechanical tank gauge that can be used to cross-check the computer accuracy. If the distributor is not equipped with an operable quick shutoff valve, the prime operations shall be started and stopped on building paper.

The distributor truck shall be equipped to effectively heat and mix the material to the required temperature prior to application as required. Heating and mixing shall be done in accordance with the manufacturer's recommendations. Do not overheat or over mix the material.

The distributor shall be equipped with a hand sprayer.

Asphalt distributors must be calibrated annually in accordance with ASTM D2995. Contractor must furnish a current calibration certification for the asphalt distributor truck from any State or other agency as approved by Engineer.

Power broom/blower suitable for cleaning the surfaces to which the asphalt tack coat is to be applied shall be provided.

603-3.3 Application of emulsified asphalt material. The emulsified asphalt shall not be diluted. Immediately before applying the emulsified asphalt tack coat, the full width of surface to be treated shall be swept with a power broom and/or power blower to remove all loose dirt and other objectionable material.

The emulsified asphalt material shall be uniformly applied with an asphalt distributor at rates appropriate for conditions and surface specified in the table. Type of asphalt material and application rate shall be approved by Engineer prior to application.

Emulsified Asphalt

Surface Type	Residual Rate, gal/SY	Emulsion Application Bar Rate, gal/SY
New asphalt	0.02-0.05	0.03-0.07
Existing asphalt	0.04-0.07	0.06-0.11
Milled Surface	0.04-0.08	.0.06-0.12
Concrete	0.03-0.05	0.05-0.08

After application of the tack coat, the surface shall be allowed to cure without being disturbed for time necessary to permit drying and setting of tack coat. This period shall be determined by Engineer. Contractor shall protect tack coat and maintain the surface until the next course has been placed. When tack coat has been disturbed by Contractor, tack coat shall be reapplied at Contractor expense.

603-3.4 Freight and waybills Contractor shall submit waybills and delivery tickets, during progress of the work. Before the final statement is allowed, file with Engineer certified waybills and certified delivery tickets for all emulsified asphalt materials used in the construction of the pavement covered by the contract. Do not remove emulsified asphalt material from storage until the initial outage and temperature measurements have been taken. The delivery or storage units will not be released until the final outage has been taken.

METHOD OF MEASUREMENT

603-4.1 The emulsified asphalt material for tack coat shall be measured by the gallon. Volume shall be corrected to the volume at 60°F in accordance with ASTM D1250. The emulsified asphalt material paid for will be the measured quantities used in the accepted work, provided that the measured quantities are not 10% over the specified application rate. Any amount of emulsified asphalt material more than 10% over the specified application rate for each application will be deducted from the measured quantities, except for irregular areas where hand spraying of the emulsified asphalt material is necessary. Water added to emulsified asphalt will not be measured for payment.

BASIS OF PAYMENT

603.5-1 Payment shall be made at the contract unit price per gallon of emulsified asphalt material. This price shall be full compensation for furnishing all materials, for all preparation, delivery, and application of these materials, and for all labor, equipment, tools, and incidentals necessary to complete the item.

Payment will be made under:

Item P-610 Concrete for Miscellaneous Structures

DESCRIPTION

610-1.1 This item shall consist of concrete and reinforcement, as shown on the plans, prepared and constructed in accordance with these specifications. This specification shall be used for all concrete other than airfield pavement which are cast-in-place.

MATERIALS

610-2.1 General. Only approved materials, conforming to the requirements of these specifications, shall be used in the work. Materials may be subject to inspection and tests at any time during their preparation or use. The source of all materials shall be approved by Engineer before delivery or use in the work. Representative preliminary samples of the materials shall be submitted by Contractor, when required, for examination and test. Materials shall be stored and handled to ensure preservation of their quality and fitness for use and shall be located to facilitate prompt inspection. All equipment for handling and transporting materials and concrete must be clean before any material or concrete is placed in them.

The use of pit-run aggregates shall not be permitted unless the pit-run aggregate has been screened and washed, and all fine and coarse aggregates stored separately and kept clean. The mixing of different aggregates from different sources in one storage stockpile or alternating batches of different aggregates shall not be permitted.

a. Reactivity. Fine aggregate and coarse aggregates to be used in all concrete shall have been tested separately within six months of the project in accordance with ASTM C1260. Test results shall be submitted to Engineer. The aggregate shall be considered innocuous if the expansion of test specimens, tested in accordance with ASTM C1260, does not exceed 0.08% at 14 days (16 days from casting). If the expansion either or both test specimen is greater than 0.08% at 14 days, but less than 0.20%, a minimum of 25% of Type F fly ash, or between 40% and 55% of slag cement shall be used in the concrete mix.

If the expansion is greater than 0.20%, the aggregates shall not be used, and test results for other aggregates must be submitted for evaluation; or aggregates that meet P-501 reactivity test requirements may be utilized.

610-2.2 Coarse aggregate. The coarse aggregate for concrete shall meet the requirements of ASTM C33 and the requirements of Table 4, Class Designation 5S; and the grading requirements shown, as required for the project.

Coarse Aggregate Grading Requirements

Maximum Aggregate Size	ASTM C33, Table 3 Grading Requirements (Size No.)
1 1/2 inch	467 or 4 and 67
1 inch	57
¾ inch	67
½ inch	7

610-2.2.1 Coarse Aggregate susceptibility to durability (D) cracking. Coarse aggregate may only be accepted from sources that have a 20-year service history for the same gradation to be supplied with no history of D-Cracking. Aggregates that do not have a 20-year record of service free from major repairs (less than 5% of slabs replaced) in similar conditions without D-cracking shall not be used unless the material currently being produced has a durability factor greater than or equal to 95% per ASTM C666. Contractor shall submit a current certification and test results to verify aggregate acceptability. Test results will only be accepted from a State Department of Transportation (DOT) materials laboratory or accredited laboratory. Certification and test results which are not dated, over one year old, or for different gradations will not be accepted.

610-2.3 Fine aggregate. The fine aggregate for concrete shall meet all fine aggregate requirements of ASTM C33. Blending will be permitted, if necessary, to meet the gradation requirements for fine aggregate.

610-2.4 Cement. Cement shall conform to the requirements of ASTM C150 Type I or II.

610-2.5 Cementitious materials.

a. Fly ash. Not allowed.

b. Slag cement (ground granulated blast furnace (GGBF)). Not allowed.

610-2.6 Water. Water used in mixing or curing shall be from potable water sources. Other sources shall be tested in accordance with ASTM C1602 prior to use.

610-2.7 Admixtures. Contractor shall submit certificates indicating that the material to be furnished meets all of the requirements indicated below. In addition, Engineer may require Contractor to submit complete test data from an approved laboratory showing that the material to be furnished meets all of the requirements of the cited specifications. Subsequent tests may be made of samples taken by Engineer from the supply of the material being furnished or proposed for use on the work to determine whether the admixture is uniform in quality with that approved.

a. Air-entraining admixtures. Air-entraining admixtures shall meet the requirements of ASTM C260 and shall consistently entrain the air content in the specified ranges under field conditions. The air-entrainment agent and any water reducer admixture shall be compatible.

b. Water-reducing admixtures. Water-reducing admixture shall meet the requirements of ASTM C494, Type A, B, or D. ASTM C494, Type F and G high range water reducing admixtures and ASTM C1017 flowable admixtures shall not be used.

c. Other chemical admixtures. The use of set retarding, and set-accelerating admixtures shall be approved by Engineer. Retarding shall meet the requirements of ASTM C494, Type A, B, or D and set-accelerating shall meet the requirements of ASTM C494, Type C. Calcium chloride and admixtures containing calcium chloride shall not be used.

610-2.8 Premolded joint material. Premolded joint material for expansion joints shall meet the requirements of ASTM D1751.

610-2.9 Joint filler. The filler for joints shall meet the requirements of Item P-605, unless otherwise specified.

610-2.10 Steel reinforcement. Reinforcing shall consist of deformed bars conforming to the requirements of ASTM A615, Grade 60**.**

610-2.11 Materials for curing concrete. Curing materials shall conform to White-pigmented Liquid Membrane-Forming Compound, Type 2, Class B in accordance to ASTM C309.

CONSTRUCTION METHODS

610-3.1 General. The Contractor shall furnish all labor, materials, and services necessary for, and incidental to, the completion of all work as shown on the drawings and specified here. All machinery and equipment used by the Contractor on the work, shall be of sufficient size to meet the requirements of the work. All work shall be subject to the inspection and approval of the Engineer.

610-3.2 Concrete Mixture. The concrete shall develop a compressive strength of 3,500 psi in 28 days as determined by test cylinders made in accordance with ASTM C31 and tested in accordance with ASTM C39. The concrete shall contain not less than 470 pounds of cementitious material per cubic yard. The water cementitious ratio shall not exceed 0.45 by weight. The air content of the concrete shall be 5% ±1.2% as determined by ASTM C231 and have a slump not more than 4 inches as determined by ASTM C143.

610-3.3 Mixing. Concrete may be mixed at the construction site, at a central point, or wholly or in part in truck mixers. The concrete shall be mixed and delivered in accordance with the requirements of ASTM C94 or C685.

The concrete shall be mixed only in quantities required for immediate use. Concrete shall not be mixed while the air temperature is below 40°F without Engineer approval. If approval is granted for mixing under such conditions, aggregates or water, or both, shall be heated and the concrete shall be placed at a temperature not less than 50°F nor more than 100°F. Contractor shall be held responsible for any defective work, resulting from freezing or injury in any manner during placing and curing, and shall replace such work at his expense.

Retempering of concrete by adding water or any other material is not permitted.

Rate of delivery of concrete to the job shall be sufficient to allow uninterrupted placement of the concrete.

610-3.4 Forms. Concrete shall not be placed until all the forms and reinforcements have been inspected and approved by Engineer. Forms shall be of suitable material and shall be of the type, size, shape, quality, and strength to build the structure as shown on the plans. The forms shall be true to line and grade and shall be mortar-tight and sufficiently rigid to prevent displacement and sagging between supports. The surfaces of forms shall be smooth and free from irregularities, dents, sags, and holes. Contractor shall be responsible for their adequacy.

The internal form ties shall be arranged so no metal will show in the concrete surface or discolor the surface when exposed to weathering when the forms are removed. All forms shall be wetted with water or with a non-staining mineral oil, which shall be applied immediately before the concrete is placed. Forms shall be constructed so they can be removed without injuring the concrete or concrete surface.

610-3.5 Placing reinforcement. All reinforcement shall be accurately placed, as shown on the plans, and shall be firmly held in position during concrete placement. Bars shall be fastened together at intersections. The reinforcement shall be supported by approved metal chairs. Shop drawings, lists, and bending details shall be supplied by the Contractor when required.

610-3.6 Embedded items. Before placing concrete, all embedded items shall be firmly and securely fastened in place as indicated. All embedded items shall be clean and free from coating, rust, scale, oil, or any foreign matter. The concrete shall be spaded and consolidated around and against embedded items. The embedding of wood shall not be allowed.

610-3.7 Concrete Consistency. Contractor shall monitor the consistency of the concrete delivered to the project site; collect each batch ticket; check temperature; and perform slump tests on each truck at the project site in accordance with ASTM C143.

610-3.8 Placing concrete. All concrete shall be placed during daylight hours, unless otherwise approved. The concrete shall not be placed until the depth and condition of foundations, the adequacy of forms and

falsework, and the placing of the steel reinforcing have been approved by Engineer. Concrete shall be placed as soon as practical after mixing, but in no case later than one hour after water has been added to the mix. The method and manner of placing shall avoid segregation and displacement of the reinforcement. Troughs, pipes, and chutes shall be used as an aid in placing concrete when necessary. The concrete shall not be dropped from a height of more than 5 feet. Concrete shall be deposited as nearly as practical in its final position to avoid segregation due to rehandling or flowing. Do not subject concrete to procedures which cause segregation. Concrete shall be placed on clean, damp surfaces, free from running water, or on a properly consolidated soil foundation.

610-3.9 Vibration. Vibration shall follow the guidelines in American Concrete Institute (ACI) Committee 309R, Guide for Consolidation of Concrete.

610-3.10 Joints. Joints shall be constructed as indicated on the plans.

610-3.11 Finishing. All exposed concrete surfaces shall be true, smooth, and free from open or rough areas, depressions, or projections. All concrete horizontal plane surfaces shall be brought flush to the proper elevation with the finished top surface struck-off with a straightedge and floated.

610-3.12 Curing and protection. All concrete shall be properly cured in accordance with the recommendations in American Concrete Institute (ACI) 308R, Guide to External Curing of Concrete. The concrete shall be protected from damage until project acceptance.

610-3.13 Cold-weather placing. When concrete is placed at temperatures below 40°F, follow the cold weather concreting recommendations found in ACI 306R, Cold Weather Concreting.

610-3.14 Hot-weather placing. When concrete is placed in hot weather greater than 85ºF, follow the hot weather concreting recommendations found in ACI 305R, Hot Weather Concreting.

QUALITY ASSURANCE (QA)

610-4.1 Quality Assurance sampling and testing. Concrete for each day's placement will be accepted on the basis of the compressive strength specified in paragraph 610-3.2. Engineer will sample the concrete in accordance with ASTM C172; test the slump in accordance with ASTM C143; test air content in accordance with ASTM C231; make and cure compressive strength specimens in accordance with ASTM C31; and test in accordance with ASTM C39. QA testing agency will meet the requirements of ASTM C1077.

Contractor shall provide adequate facilities for the initial curing of cylinders.

610-4.2 Defective work. Any defective work that cannot be satisfactorily repaired as determined by ENGINEER, shall be removed and replaced at the Contractor's expense. Defective work includes, but is not limited to, uneven dimensions, honeycombing and other voids on the surface or edges of the concrete.

METHOD OF MEASUREMENT

610-5.1 Concrete shall be measured by number of square yards for drainage valley gutters construction for payment in place, accepted based on dimensions shown on plans. Concrete considered incidental for all other work items, and no separate measurement shall be made of concrete complete in place and accepted.

BASIS OF PAYMENT

610-6.1 Payment shall be made at the contract price by the number of square yard for drainage valley gutters construction. Concrete considered incidental for all other work items, and no separate payment shall be made. This price shall be full compensation for furnishing all materials including reinforcement and

embedded items and for all preparation, delivery, installation, and curing of these materials, and for all labor, equipment, tools, and incidentals necessary to complete the item.

Payment will be made under:

Item P-610-6.1 Concrete, per square yards (drainage valley gutters construction only) is incidental for all other work items.

END OF ITEM P-610

Item P-620 Runway and Taxiway Marking

DESCRIPTION

620-1.1 This item shall consist of the preparation and painting of numbers, markings, and stripes on the surface of runways, taxiways, and aprons, in accordance with these specifications and at the locations shown on the plans, or as directed by Engineer. “Paint,” “marking material,” “painting,” and “application of markings” are interchangeable throughout this specification.

MATERIALS

620-2.1 Materials acceptance. Contractor shall furnish manufacturer’s certified test reports, for materials shipped to the project. Certified test reports shall include a statement that the materials meet the specification requirements. This certification along with a copy of the paint manufacturer’s surface preparation; marking materials, including adhesion, flow promoting/floatation additive; and application requirements must be submitted and approved by Engineer prior to the initial application of markings. Reports can be used for material acceptance or Engineer may perform verification testing. Reports shall not be interpreted as a basis for payment. Contractor shall notify RPR and Engineer upon arrival of a shipment of materials to the site. All material shall arrive in sealed containers that are easily quantifiable for inspection by Engineer.

620-2.2 Marking materials.

Table 1. Marking Materials

Paint[1]				Glass Beads[2]	
Type	**Color**	**Fed Std. 595 Number**	**Application Rate Maximum**	**Type**	**Application Rate Minimum**
Waterborne Types I	White	37,925	115 ft2/gal	I / Grade A	7lbs / gal
	Yellow	33,538 or 33,655	115 ft2/gal	I / Grade A	
	Black	37,038	115 sq ft./gal	N/A	N/A

[1] See paragraph 620-2.2a
[2] See paragraph 620-2.2b

a. Paint. Paint shall be waterborne in accordance with requirements of this paragraph. Paint colors shall comply with Federal Standard No. 595.

Waterborne. Paint shall meet requirements of Federal Specification TT-P-1952F, Type I. The non-volatile portion of the vehicle for all paint types shall be composed of a 100% acrylic polymer as determined by infrared spectral analysis.

Epoxy. Not used.

Solvent-Base. Not used.

b. Reflective media. Glass beads for white and yellow paint shall meet the requirements for Federal Specification TT-B-1325D Type I, Gradation A.

Glass beads shall be treated with all compatible coupling agents recommended by the manufacturers of the paint and reflective media to ensure adhesion and embedment.

Glass beads shall not be used in black and green paint.

Type III glass beads shall not be used in red and pink paint.

CONSTRUCTION METHODS

620-3.1 Weather limitations. Painting shall only be performed when the surface is dry, and the ambient temperature and the pavement surface temperature meet the manufacturer's recommendations in accordance with paragraph 620-2.1. Painting operations shall be discontinued when the ambient or surface temperatures does not meet the manufacturer's recommendations. Markings shall not be applied when the wind speed exceeds 10 mph unless windscreens are used to shroud the material guns. Markings shall not be applied when weather conditions are forecasts to not be within the manufacturers' recommendations for application and dry time.

620-3.2 Equipment. Equipment shall include the apparatus necessary to properly clean the existing surface, a mechanical marking machine, a bead dispensing machine, and such auxiliary hand-painting equipment as may be necessary to satisfactorily complete the job.

The mechanical marker shall be an atomizing spray-type or airless type marking machine with automatic glass bead dispensers suitable for application of traffic paint. It shall produce an even and uniform film thickness and appearance of both paint and glass beads at the required coverage and shall apply markings of uniform cross-sections and clear-cut edges without running or spattering and without over spray. The marking equipment for both paint and beads shall be calibrated daily.

620-3.3 Preparation of surfaces. Immediately before application of the paint, the surface shall be dry and free from dirt, grease, oil, laitance, or other contaminates that would reduce the bond between the paint and the pavement. Use of any chemicals or impact abrasives during surface preparation shall be approved in advance by Engineer. After the cleaning operations, sweeping, blowing, or rinsing with pressurized water shall be performed to ensure the surface is clean and free of grit or other debris left from the cleaning process.

a. Preparation of new pavement surfaces. The area to be painted shall be cleaned by broom, blower, water blasting, or by other methods approved by Engineer to remove all contaminants, including PCC curing compounds, minimizing damage to the pavement surface.

b. Preparation of pavement to remove existing markings. Existing pavement markings shall be removed by rotary grinding, water blasting, or by other methods approved by Engineer minimizing damage to pavement surface. Removal area may need to be larger than area of markings to eliminate ghost markings. After removal of markings on asphalt pavements, apply a fog seal or seal coat to 'block out' the removal area to eliminate 'ghost' markings.

c. Preparation of pavement markings prior to remarking. Prior to remarking existing markings, loose existing markings must be removed minimizing damage to the pavement surface, with a method approved by Engineer. After removal, the surface shall be cleaned of all residue or debris.

Prior to the marking application, Contractor shall certify in writing surface is dry and free from dirt, grease, oil, laitance, or other foreign material that would prevent bond of paint to the pavement or existing markings. This certification along with a copy of the paint manufactures application and surface preparation requirements must be submitted to RPR and Engineer prior to the initial application of markings.

620-3.4 Layout of markings. The proposed markings shall be laid out in advance of the paint application. The locations of markings to receive glass beads shall be shown on the plans.

620-3.5 Application. A period of 30 days shall elapse between placement of surface course or seal coat and application of the permanent paint markings. Paint shall be applied in two opposite directions at the rate of 30/70 at the locations and to the dimensions and spacing shown on the plans. Paint shall not be applied until the layout and condition of the surface has been approved by Engineer.

The edges of the markings shall not vary from a straight line more than 1/2 inch in 50 feet, and marking dimensions and spacing shall be within the following tolerances:

Marking Dimensions and Spacing Tolerance

Dimension and Spacing	Tolerance
36 inches or less	±1/2 inch
greater than 36 inches to 6 feet	±1 inch
greater than 6 feet to 60 feet	±2 inch
greater than 60 feet	±3 inch

The paint shall be mixed in accordance with the manufacturer's instructions and applied to the pavement with a marking machine at the rate shown in Table 1. The addition of thinner will not be permitted.

Glass beads shall be distributed upon the marked areas at the locations shown on the plans to receive glass beads immediately after the second and final application of the paint. A dispenser shall be furnished that is properly designed for attachment to the marking machine and suitable for dispensing glass beads. Glass beads shall be applied at the rate shown in Table 1. Glass beads shall not be applied to black paint or green paint. Glass beads shall adhere to the cured paint or all marking operations shall cease until corrections are made. Different bead types shall not be mixed. Regular monitoring of glass bead embedment and distribution should be performed.

620-3.6 Application--preformed thermoplastic airport pavement markings. Preformed thermoplastic pavement markings not used.

620-3.7 Control strip. Prior to the full application of airfield markings, Contractor shall prepare a control strip in the presence of Engineer. Contractor shall demonstrate the surface preparation method and all striping equipment to be used on the project. The marking equipment must achieve the prescribed application rate of paint and population of glass beads (per Table 1) that are properly embedded and evenly distributed across the full width of the marking. Prior to acceptance of the control strip, markings must be evaluated during darkness to ensure a uniform appearance.

620-3.8 Retro-reflectance. Reflectance shall be measured with a portable retro-reflectometer meeting ASTM E1710 (or equivalent). A total of six reading shall be taken over a 6-square-foot area with three readings taken from each direction. The average shall be equal to or above the minimum levels of all readings which are within 30% of each other.

Minimum Retro-Reflectance Values

Material	Retro-reflectance mcd/m²/lux		
	White	Yellow	Red
Initial Type I	300	175	35
Initial Type III	600	300	35
Initial Thermoplastic	225	100	35
All materials, remark when less than[1]	100	75	10

[1] 'Prior to remarking determine if removal of contaminants on markings will restore retro-reflectance

620-3.9 Protection and cleanup. After application of the markings, all markings shall be protected from damage until dry. All surfaces shall be protected from excess moisture/rain and from disfiguration by spatter, splashes, spillage, or drippings. Contractor shall remove from the work area all debris, waste, loose reflective media, and by-products generated by the surface preparation and application operations to the satisfaction of Engineer. Contractor shall dispose of these wastes in strict compliance with all applicable state, local, and federal environmental statutes and regulations.

METHOD OF MEASUREMENT

620-4.1a Not used.

620-4.1b Quantity of markings shall be paid for shall be measured by the number of square feet of painting**.**

620-4.1c Not used.

620-4.1d Not used.

620-4.1e Not used.

BASIS OF PAYMENT

620-5.1 This price shall be full compensation for furnishing all materials and for all labor, equipment, tools, and incidentals necessary to complete the item complete in place and accepted by Engineer in accordance with these specifications.

620-5.2 Payment for markings shall be made at the contract price for the number of square feet of painting including reflective media (beads).

Payment will be made under:

Item P-620-5.2	Marking including reflective media (beads), per square foot

END OF ITEM P-620

Item D-701 Pipe for Storm Drains and Culverts

DESCRIPTION

701-1.1 This item shall consist of the construction of pipe culverts and storm drains in accordance with these specifications and in reasonably close conformity with the lines and grades shown on the plans.

MATERIALS

701-2.1 Materials shall meet the requirements shown on the plans and specified below. Underground piping and components used in drainage systems for terminal and aircraft fueling ramp drainage shall be noncombustible and inert to fuel in accordance with National Fire Protection Association (NFPA) 415.

701-2.2 Pipe. The pipe shall be of the type called for on the plans or in the proposal and shall be in accordance with the following appropriate requirements:

ASTM C76	Standard Specification for Reinforced Concrete Culvert, Storm Drain, and Sewer Pipe

701-2.3 Concrete. Concrete for pipe cradles shall have a minimum compressive strength of 3,500 psi at 28 days and conform to the requirements of ASTM C94.

701-2.4 Rubber gaskets. Not used.

701-2.5 Joint mortar. Pipe joint mortar shall consist of one part Portland cement and two parts sand. Portland cement shall conform to the requirements of ASTM C150, Type I. The sand shall conform to the requirements of ASTM C144.

701-2.6 Joint fillers. Poured filler for joints shall conform to the requirements of ASTM D6690.

701-2.7 Plastic gaskets. Not used.

701-2.8. Controlled low-strength material (CLSM). Controlled low-strength material shall conform to the requirements of Item P-153. When CLSM is used, all joints shall have gaskets.

701-2.9 Precast box culverts. Not used.

701-2.10 Precast concrete pipe. Precast concrete structures shall be furnished by a plant meeting National Precast Concrete Association Plant Certification Program or American Concrete Pipe Association QCast Plant Certification program.

CONSTRUCTION METHODS

701-3.1 Excavation. The width of pipe trench shall be sufficient to permit satisfactory jointing of pipe and thorough tamping of the bedding material under and around the pipe, but it shall not be less than the external diameter of the pipe plus 12 inches on each side. Trench walls shall be approximately vertical.

Contractor shall comply with all current federal, state, and local rules and regulations governing the safety of men and materials during excavation, installation, and backfilling operations. Specifically, Contractor shall observe that all requirements of the Occupational Safety and Health Administration (OSHA) relating to excavations, trenching and shoring are strictly adhered to. Trench width shall be sufficient to permit

satisfactorily jointing of the pipe and thorough compaction of the bedding material under the pipe and backfill material around the pipe, but it shall not be greater than the widths shown on the plans trench detail.

Where rock, hardpan, or other unyielding material is encountered, Contractor shall remove it from below the foundation grade for a depth of at least 8 inches or 1/2 inch for each foot of fill over the top of the pipe (whichever is greater) but for no more than three-quarters of the nominal diameter of the pipe. The excavation below grade should be filled with granular material to form a uniform foundation.

Where a firm foundation is not encountered at the grade established, due to soft, spongy, or other unstable soil, the unstable soil shall be removed and replaced with approved granular material for the full trench width. Engineer shall determine the depth of removal necessary. The granular material shall be compacted to provide adequate support for the pipe.

The excavation for pipes placed in embankment fill shall not be made until the embankment has been completed to a height above the top of the pipe as shown on the plans.

701-3.2 Bedding. The bedding surface for the pipe shall provide a foundation of uniform density to support the pipe throughout its entire length.

a. Rigid pipe. The pipe bedding shall be constructed uniformly for the full length of the pipe barrel, as required on the plans. The maximum aggregate size shall be 1 in when the bedding thickness is less than 6 inches, and 1-1/2 in when the bedding thickness is greater than 6 inches. Bedding shall be loosely placed uncompacted material under the middle third of the pipe prior to placement of the pipe.

701-3.3 Laying pipe. The pipe laying shall begin at the lowest point of the trench and proceed upgrade. The lower segment of the pipe shall be in contact with the bedding throughout its full length. Bell or groove ends of rigid pipes and outside circumferential laps of flexible pipes shall be placed facing upgrade.

Paved or partially lined pipe shall be placed so that the longitudinal center line of the paved segment coincides with the flow line.

Elliptical and elliptically reinforced concrete pipes shall be placed with the manufacturer's reference lines designating the top of the pipe within five degrees of a vertical plane through the longitudinal axis of the pipe.

701-3.4 Joining pipe. Joints shall be made with cement mortar or cement grout.

Mortar joints shall be made with an excess of mortar to form a continuous bead around the outside of the pipe and shall be finished smooth on the inside. Molds or runners shall be used for grouted joints to retain the poured grout. Rubber ring gaskets shall be installed to form a flexible watertight seal.

a. Concrete pipe. Concrete pipe may be either bell and spigot or tongue and groove. Pipe sections at joints shall be fully seated and the inner surfaces flush and even. Concrete pipe joints shall be sealed with butyl mastic meeting ASTM C990 or mortar when soil tight joints are required. Joints shall be thoroughly wetted before applying mortar or grout.

701-3.5 Embedment and Overfill. Pipes shall be inspected before any fill material is placed; any pipes found to be out of alignment, unduly settled, or damaged shall be removed and re-laid or replaced at Contractor's expense.

701-3.5-1 Embedment Material Requirements

a. Concrete Pipe. Embedment material and compaction requirements shall be in accordance with the applicable Type of Standard Installation (Types 1, 2, 3, or 4) per ASTM C1479. If a concrete cradle or CLSM embedment material is used, it shall conform to the plan details.

701-3.5-2 Placement of Embedment Material

The embedment material shall be compacted in layers not exceeding 6 inches on each side of the pipe and shall be brought up 1 foot above the top of the pipe or to natural ground level, whichever is greater. Thoroughly compact the embedment material under the haunches of the pipe without displacing the pipe. Material shall be brought up evenly on each side of the pipe for the full length of the pipe.

When the top of the pipe is above the top of the trench, the embedment material shall be compacted in layers not exceeding 6 inches and shall be brought up evenly on each side of the pipe to 1 foot above the top of the pipe. All embedment material shall be compacted to a density required under Item P-152.

Concrete cradles and flowable fills, such as controlled low strength material (CLSM) or controlled density fill (CDF), may be used for embedment provided adequate flotation resistance can be achieved by restraints, weighing, or placement technique.

It shall be Contractor's responsibility to protect installed pipes and culverts from damage due to construction equipment operations. Contractor shall be responsible for installation of any extra strutting or backfill required to protect pipes from the construction equipment.

701-3.6 Overfill

Pipes shall be inspected before any overfill is in place. Any pipes found to be out of alignment, unduly settled, or damaged shall be removed and relaid or replaced at Contractor expense. Evaluation of any damage to RCP shall be evaluated based on AASHTO R73.

Overfill material shall be place and compacted in layers as required to achieve compaction to at least 95% standard proctor per ASTM D698. The soil shall contain no debris, organic matter, frozen material, or stones with a diameter greater than one half the thickness of the compacted layers being placed.

701-3.7 Inspection Requirements

An initial post installation inspection shall be performed by RPR no sooner than 30 days after completion of installation and final backfill. Clean or flush all lines prior to inspection.

Use a camera with lighting suitable to allow a clear picture of the entire periphery of the pipe interior. Center the camera in the pipe both vertically and horizontally and be able to pan and tilt to a 90-degree angle with the axis of the pipe rotating 360 degrees. Use equipment to move the camera through the pipe that will not obstruct the camera's view or interfere with proper documentation of the pipe's condition. The video image shall be clear, focused, and relatively free from roll, static, or other image distortion qualities that would prevent the reviewer from evaluating the condition of the pipe.

For pipe sizes larger than 48 inches, a walk-through visual inspection shall be performed.

Incorporate specific inspection requirements for the various types of pipes beneath the general inspection requirements.

Reinforced concrete pipe shall be inspected, evaluated, and reported on in accordance with ASTM C1840, "Standard Practice for Inspection and Acceptance of Installed Reinforced Concrete Culvert, Storm Drain, and Storm Sewer Pipe." Any issues reported shall include still photo and video documentation. The zoom ratio shall be provided for all still or video images that document any issues of concern by the inspection firm.

METHOD OF MEASUREMENT

701-4.1 The length of pipe shall be measured in linear feet of pipe in place, completed, and accepted. It shall be measured along the centerline of the pipe from end or inside face of structure to the end or inside

face of structure, whichever is applicable. 42-inch or 27-inch RCP shall be measured separately. All fittings shall be included in the footage as typical pipe sections in the pipe being measured.

701-4.2. Not used.

701-4.3 Not used. Incidental to other work items.

701-4.4 Not used. Incidental to other work items.

BASIS OF PAYMENT

701-5.0 These prices shall fully compensate Contractor for furnishing all materials and for all preparation, excavation, and installation of these materials; and for all labor, equipment, tools, and incidentals necessary to complete the item.

701-5.1 Payment will be made at the contract unit price per linear foot for 42-inch or 27-inch RCP.

Payment will be made under:

Item 701-5.1	27-inch Reinforced Concrete Pipe, per linear foot, complete in place
Item 701-5.2	42-inch Reinforced Concrete Pipe, per linear foot, complete in place

END ITEM D-701

Item D-752 Concrete Culverts, Headwalls, and Miscellaneous Drainage Structures

DESCRIPTION

752-1.1 This item shall consist of reinforced concrete culverts, headwalls, and miscellaneous drainage structures constructed in accordance with these specifications, at the specified locations and conforming to the lines, grades, and dimensions shown on the plans or required by Engineer.

MATERIALS

752-2.1 Concrete. Reinforced concrete shall meet the requirements of Item P-610.

CONSTRUCTION METHODS

752-3.1 Unclassified excavation.

a. Trenches and foundation pits for structures or structure footings shall be excavated to the lines and grades and elevations shown on the plans. The excavation shall be of sufficient size to permit the placing of the full width and length of the structure or structure footings shown. The elevations of the bottoms of footings, as shown on the plans, shall be considered as approximate only; and Engineer may approve, in writing, changes in dimensions or elevations of footings necessary to secure a satisfactory foundation.

b. Boulders, logs, or any other objectionable material encountered in excavation shall be removed. All rock or other hard foundation material shall be cleaned of all loose material and cut to a firm surface either level, stepped, or serrated, as directed by Engineer. All seams or crevices shall be cleaned out and grouted. All loose and disintegrated rock and thin strata shall be removed. When concrete will rest on a surface other than rock, the bottom of the excavation shall not be disturbed and excavation to final grade shall not be made until immediately before the concrete or reinforcing steel is placed.

c. Contractor shall do all bracing, sheathing, or shoring necessary to perform and protect the excavation and the structure as required for safety or conformance to governing laws. The cost of bracing, sheathing, or shoring shall be included in the unit price bid for excavation.

d. All bracing, sheathing, or shoring shall be removed by Contractor after the completion of the structure. Removal shall not disturb or damage the finished concrete. The cost of removal shall be included in the unit price bid for excavation.

e. After each excavation is completed, Contractor shall notify Engineer. No concrete or reinforcing steel shall be placed until Engineer has approved the depth of the excavation and the character of the foundation material.

752-3.2 Backfilling.

a. After a structure has been completed, backfilling with approved material shall be accomplished by applying the fill in horizontal layers not to exceed 8 inches in loose depth, and compacted. The field density of the compacted material shall be at least 90% of the maximum density for cohesive soils and 95% of the maximum density for noncohesive soils. The maximum density shall be determined in accordance with ASTM D698. The field density shall be determined in accordance with ASTM D1556.

b. No backfilling shall be placed against any structure until approved by Engineer. For concrete, approval shall not be given until the concrete has been in place seven days, or until tests establish that the concrete has attained sufficient strength to withstand any pressure created by the backfill or the placement methods.

c. Fill placed around concrete culverts shall be deposited on each side at the same time and to approximately the same elevation. All slopes bounding or within the areas to be backfilled shall be stepped or serrated to prevent wedge action against the structure.

d. Backfill will not be measured for direct payment. Performance of this work shall be considered as a subsidiary obligation of Contractor, covered under the contract unit price for "unclassified excavation for structures."

752-3.3 Weep holes. Weep holes shall be constructed as shown on the plans.

752-3.4 Cleaning and restoration of site. After the backfill is completed, Contractor shall dispose of all surplus material, dirt, and rubbish from the site. Surplus dirt may be deposited in embankment, shoulders, or as approved by RPR. Contractor shall restore all disturbed areas to their original condition. Contractor shall remove all tools and equipment, leaving the entire site free, clear, and in good condition.

METHOD OF MEASUREMENT

752-4.1 The quantity of unclassified excavation for structures is measured and paid under Item P-152. Quantity of reinforced concrete culvert end-treatment headwalls shall be the number of end-treatments shown on Plans, complete in place, and accepted.

BASIS OF PAYMENT

752-5.1 Payment will be made at the contract unit price per each for 27-inch or 42-inch reinforced concrete culvert end-treatment headwall, complete in place.

These prices shall be full compensation for furnishing all materials and for all preparation, excavation, and placing the materials, and for all labor, equipment, tools, and incidentals necessary to complete the structure.

Payment will be made under:

Item D-752-5.1	27-inch Concrete-Reinforced Safety End Treatment, per each, complete in place
Item D-752-5.2	42-inch Concrete-Reinforced Safety End Treatment, per each, complete in place

ASTM D698	Standard Test Methods for Laboratory Compaction Characteristics of Soil Using Standard Effort (12,400 ft-lb/ft^3 (600 kN-m/m^3))
ASTM D1556	Standard Test Method for Density and Unit Weight of Soil in Place by the Sand-Cone Method

END OF ITEM D-752

Item T-901 Seeding

DESCRIPTION

901-1.1 This item shall consist of soil preparation, seeding, fertilizing, and watering areas shown on the plans or as directed by Engineer in accordance with these specifications.

MATERIALS

901-2.1 Seed. The species and application rates of grass, legume, and cover-crop seed furnished shall be those stipulated herein. Seed shall conform to the requirements of Federal Specification JJJ-S-181, Federal Specification, Seeds, Agricultural or Project's local TxDOT District Seed Mix Design.

Seed shall be furnished separately or in mixtures in standard containers labeled in conformance with the Agricultural Marketing Service (AMS) Seed Act and applicable state seed laws with the seed name, lot number, net weight, percentages of purity and of germination and hard seed, and percentage of maximum weed seed content clearly marked for each kind of seed. Contractor shall furnish Engineer duplicate signed copies of a statement by the vendor certifying that each lot of seed has been tested by a recognized laboratory for seed testing within six months of date of delivery. This statement shall include name and address of laboratory, date of test, lot number for each kind of seed, and the results of tests as to name, percentages of purity and of germination, and percentage of weed content for each kind of seed furnished, and, in case of a mixture, the proportions of each kind of seed. Wet, moldy, or otherwise damaged seed will be rejected. Seeds shall be applied as follows:

Seed Properties and Rate of Application

Seed	Minimum Seed Purity (Percent)	Minimum Germination (Percent)	Rate of Application lb/acre (or lb/1,000 S.F.)
*	*	*	*
*	*	*	*

Quantity of Pure Live Seed (PLS)[1] (Option 1)

Seed Common Name	Mixture Quantity, PLS/acre
Green Sprangletop (Van Horn)	1.0
Sideoats Grama (Haskel)	1.0
Texas Grama (Atascosa)	1.0
Hairy Grama (Chaparral)	0.4
Shortspike Windmillgrass (Welder)	0.2
Little Bluestem (OK Select)	0.8
Purple Prairie Cover (Cuero)	0.6
Engelmann Daisy (Eldorado)	0.75
Illinois Bundleflower	1.3
Awnless Bushsunflower (Plateau)	0.2

[1]Payment not made for soil preparation, seeding, and fertilizing prior to planting and establishing stand of grass covering a minimum of 70% of the seeded area in comparison to the surrounding grassed area.

Seeding shall be performed during such periods as recommended by local County Extension Agent or USDA Soil Conservation Services and shall be compatible with local climate and soil conditions.

If construction completion does not coincide with a recommended planting period, Contractor shall be responsible for maintaining the areas to be seeded in accordance Item C-102 Temporary Air and Water Pollution, Soil Erosion, and Siltation Control, until the accepted stand of grass is produced. Contractor attention is also directed to the 70% vegetative cover requirement indicated by the definition of Final Stabilization in TPDES Construction General Permit (TXR 150000).

901-2.2 Lime. Not required.

901-2.3 Fertilizer. Fertilizer shall be standard commercial fertilizers supplied separately or in mixtures containing percentages of total nitrogen, available phosphoric acid, and water-soluble potash. They shall be applied at rate and depth specified and meet requirements of applicable state laws. They shall be furnished in standard containers with name, weight, and guaranteed analysis of contents clearly marked thereon. No cyanamide compounds or hydrated lime shall be permitted in mixed fertilizers. The fertilizers may be supplied in one of the following forms:

a. A dry, free-flowing fertilizer suitable for application by a common fertilizer spreader;

b. A finely-ground fertilizer soluble in water, suitable for application by power sprayers; or

c. A granular or pellet form suitable for application by blower equipment.

Fertilizers shall be slow-release containing minimum N:10 - P:10 - K:10 commercial fertilizer and shall be spread at the rate of 350 lb/acre.

901-2.4 Soil for repairs. The soil for fill and topsoiling of areas to be repaired shall be at least of equal quality to that which exists in areas adjacent to the area to be repaired. The soil shall be relatively free from large stones, roots, stumps, or other materials that will interfere with subsequent sowing of seed, compacting, and establishing turf, and shall be approved by RPR before being placed.

CONSTRUCTION METHODS

901-3.1 Advance preparation and cleanup. After grading of areas has been completed and before applying fertilizer and ground limestone, areas to be seeded shall be raked or otherwise cleared of stones larger than 2 inches in any diameter, sticks, stumps, and other debris that might interfere with sowing of seed, growth of grasses, or subsequent maintenance of grass-covered areas. If any damage by erosion or other causes has occurred after the completion of grading and before beginning the application of fertilizer and ground limestone, Contractor shall repair such damage include filling gullies, smoothing irregularities, and repairing other incidental damage.

An area to be seeded shall be considered a satisfactory seedbed without additional treatment if it has recently been thoroughly loosened and worked to a depth of not less than 5 inches as a result of grading operations and, if immediately prior to seeding, the top 3 inches of soil is loose, friable, reasonably free from large clods, rocks, large roots, or other undesirable matter, and if shaped to the required grade.

When the area to be seeded is sparsely sodded, weedy, barren, and unworked, or packed and hard, any grass and weeds shall first be cut or otherwise satisfactorily disposed of, and the soil then scarified or otherwise loosened to a depth not less than 5 inches. Clods shall be broken and the top 3 inches of soil shall be worked into a satisfactory seedbed by discing, or by use of cultipackers, rollers, drags, harrows, or other appropriate means.

901-3.2 Dry application method.

a. Liming. Not required.

b. Fertilizing. Following advance preparations and cleanup fertilizer shall be uniformly spread at rate to provide not less than minimum quantity stated in paragraph 901-2.3.

c. Seeding. Grass seed shall be sown at the rate specified in paragraph 901-2.1 immediately after fertilizing. The fertilizer and seed shall be raked within the depth range stated in the special provisions. Seeds of legumes, either alone or in mixtures, shall be inoculated before mixing or sowing, in accordance with the instructions of the manufacturer of the inoculant. When seeding is required at other than the seasons shown on the plans or in the special provisions, a cover crop shall be sown by the same methods required for grass and legume seeding.

d. Rolling. After the seed has been properly covered, the seedbed shall be immediately compacted by means of an approved lawn roller, weighing 40-65 pounds per foot of width for clay soil (or any soil having a tendency to pack), and weighing 150-200 pounds per foot of width for sandy or light soils.

901-3.3 Wet application method.

a. General. Contractor may elect to apply seed and fertilizer (and lime, if required) by spraying them on the previously prepared seedbed in the form of an aqueous mixture and by using the methods and equipment described herein. The rates of application shall be as specified in the special provisions.

b. Spraying equipment. The spraying equipment shall have a container or water tank equipped with a liquid level gauge calibrated to read in increments not larger than 50 gallons over the entire range of the tank capacity, mounted to be visible to the nozzle operator. The container or tank shall also be equipped with a mechanical power-driven agitator capable to always keep all solids in mixture in complete suspension until used.

The unit shall also be equipped with a pressure pump capable of delivering 100 gallons (380 liters) per minute at a pressure of 100 lb/sq inches. The pump shall be mounted in a line that will recirculate the mixture through the tank whenever it is not being sprayed from the nozzle. All pump passages and pipelines shall be capable of providing clearance for 5/8 inch solids. The power unit for the pump and agitator shall have controls mounted to be accessible to the nozzle operator. There shall be an indicating pressure gauge connected and mounted immediately at the back of the nozzle.

The nozzle pipe shall be mounted on an elevated supporting stand in such a manner that it can be rotated through 360 degrees horizontally and inclined vertically from at least 20 degrees below to at least 60 degrees above the horizontal. There shall be a quick-acting, three-way control valve connecting the recirculating line to the nozzle pipe and mounted so that the nozzle operator can control and regulate the amount of flow of mixture delivered to the nozzle. At least three different types of nozzles shall be supplied so that mixtures may be properly sprayed over distance varying from 20 to 100 feet. One shall be a close-range ribbon nozzle, one a medium-range ribbon nozzle, and one a long-range jet nozzle. For case of removal and cleaning, all nozzles shall be connected to the nozzle pipe by means of quick-release couplings.

To reach areas inaccessible to the regular equipment, an extension hose at least 50 feet in length shall be provided to which the nozzles may be connected.

c. Mixtures. Lime, if required, shall be applied separately, in the quantity specified, prior to the fertilizing and seeding operations. Not more than 220 pounds of lime shall be added to and mixed with each 100 gallons of water. Seed and fertilizer shall be mixed in the relative proportions specified, but not more than a total of 220 pounds of these combined solids shall be added to and mixed with each 100 gallons of water.

All water used shall be obtained from fresh water sources and shall be free from injurious chemicals and other toxic substances harmful to plant life. Contractor shall identify to Engineer all sources of water at least two weeks prior to use. RPR may take samples of the water at the source or from the tank at any time and have a laboratory test the samples for chemical and saline content. Contractor shall not use any water from any source that is disapproved by RPR following such tests.

All mixtures shall be constantly agitated from the time they are mixed until they are finally applied to the seedbed. All such mixtures shall be used within two hours from time they were mixed or waste and dispose at approved locations.

d. Spraying. Lime, if required, shall be sprayed only upon previously prepared seedbeds. After the applied lime mixture has dried, the lime shall be worked into the top 3 inches, after which the seedbed shall again be properly graded and dressed to a smooth finish.

Mixtures of seed and fertilizer shall only be sprayed upon previously prepared seedbeds on which the lime, if required, shall already have been worked in. The mixtures shall be applied by means of a high-pressure spray that shall always be directed upward into the air so that the mixtures will fall to the ground like rain in a uniform spray. Nozzles or sprays shall never be directed toward the ground in such a manner as might produce erosion or runoff.

Exercise care to ensure application is made uniformly and at the prescribed rate and to guard against misses and overlapped areas. Proper predetermined quantities of the mixture in accordance with specifications shall be used to cover specified sections of known area.

Checks on the rate and uniformity of application may be made by observing the degree of wetting of the ground or by distributing test sheets of paper or pans over the area at intervals and observing the quantity of material deposited thereon.

On surfaces that are to be mulched as indicated by the plans or designated by Engineer, seed and fertilizer applied by the spray method need not be raked into the soil or rolled. However, on surfaces on which mulch is not to be used, the raking and rolling operations will be required after the soil has dried.

901-3.4 Maintenance of seeded areas. Contractor shall protect seeded areas against traffic or other use by warning signs or barricades, as approved by Engineer. Surfaces gullied or otherwise damaged following seeding shall be repaired by regrading and reseeding as directed. Contractor shall mow, water as directed, and otherwise maintain seeded areas in a satisfactory condition until final inspection and acceptance of the work.

When either the dry or wet application method outlined above is used for work done out of season, it will be required that Contractor establish a good stand of grass of uniform color and density to the satisfaction of RPR. A grass stand shall be considered adequate when bare spots are 1 square foot or less, randomly dispersed, and do not exceed 3% of the area seeded.

METHOD OF MEASUREMENT

901-4.1 The quantity of soil preparation, seeding, fertilizing, and watering to be paid for shall be the number of acre measured on the ground surface within limits shown on drawings or as directed by Engineer, completed and accepted.

BASIS OF PAYMENT

901-5.1 Payment shall be made at the contract unit price per acre for soil preparation, seeding, fertilizing, and watering, which price and payment shall be full compensation for furnishing and placing all material and for all labor, equipment, tools, and incidentals necessary to complete the work prescribed in this item. Payment for this item will not be made prior to planting and establishing a 70% stand of grass in comparison to the surrounding grassed area. The quantity of T-901 shown in the proposal coincides with the limits of grading outside of the pavement areas.

Payment will be made under:

Item 901-5.1	Seeding, Fertilizing, and Watering, complete, per acre.

END OF ITEM T-901

Item T-905 Topsoil

DESCRIPTION

905-1.1 This item shall consist of preparing the ground surface for topsoil application, removing topsoil from designated stockpiles or areas to be stripped on the site or from approved sources off the site, and placing and spreading the topsoil on prepared areas in accordance with this specification at the locations shown on the plans or as directed by ENGINEER.

MATERIALS

905-2.1 Topsoil. Topsoil shall be the surface layer of soil with no admixture of refuse or any material toxic to plant growth, and it shall be reasonably free from subsoil and stumps, roots, brush, stones (2 inches or more in diameter), and clay lumps or similar objects. Brush and other vegetation that will not be incorporated with the soil during handling operations shall be cut and removed. Ordinary sod and herbaceous growth such as grass and weeds are not to be removed but shall be thoroughly broken up and intermixed with the soil during handling operations. Heavy sod or other cover, which cannot be incorporated into the topsoil by discing or other means, shall be removed. The topsoil or soil mixture, unless otherwise specified or approved, shall have a pH range of approximately 5.5 pH to 7.6 pH, when tested in accordance with the methods of testing of the Association of Official Agricultural Chemists in effect on the date of invitation of bids. The organic content shall be not less than 3% nor more than 20% as determined by the wet-combustion method (chromic acid reduction). There shall be not less than 20% nor more than 80% of the material passing the 200 mesh sieve as determined by the wash test in accordance with ASTM C117.

Topsoil (onsite or imported) shall be amended by Contractor with approved high-organic-material compost at a rate of 5 cubic yards per 1,000 square feet to meet specifications. Compost shall not be a wildlife attractant nor FOD producing. Natural topsoil may be amended by Contractor with approved materials and methods to meet the above specifications.

905-2.2 Inspection and tests. Within 10 days following acceptance of the bid, ENGINEER shall be notified of the source of topsoil to be furnished by Contractor. The topsoil shall be inspected to determine if the selected soil meets the requirements specified and to determine the depth to which stripping will be permitted. At this time, Contractor may be required to take representative soil samples from several locations within the area under consideration and to the proposed stripping depths, for testing purposes as specified in paragraph 905-2.1.

CONSTRUCTION METHODS

905-3.1 General. Areas to be topsoiled shall be shown on the plans. If topsoil is available on the site, the location of the stockpiles or areas to be stripped of topsoil and the stripping depths shall be shown on the plans.

Suitable equipment necessary for proper preparation and treatment of the ground surface, stripping of topsoil, and for the handling and placing of all required materials shall be on hand, in good condition, and approved by ENGINEER before the various operations are started.

905-3.2 Preparing the ground surface. Immediately prior to dumping and spreading the topsoil on any area, the surface shall be loosened by discs or spike-tooth harrows, or by other means approved by ENGINEER, to a minimum depth of 2 inches to facilitate bonding of the topsoil to the covered subgrade soil. The surface of the area to be topsoiled shall be cleared of all stones larger than 2 inches in any diameter and all litter or other material which may be detrimental to proper bonding, the rise of capillary moisture, or the proper growth of the desired planting. Limited areas, as shown on the plans, which are too compact to respond to these operations shall receive special scarification.

Grades on the area to be topsoiled, which have been established by others as shown on the plans, shall be maintained in a true and even condition. Where grades have not been established, the areas shall be smooth-graded and the surface left at the prescribed grades in an even and compacted condition to prevent the formation of low places or pockets where water will stand.

905-3.3 Obtaining topsoil. Prior to the stripping of topsoil from designated areas, any vegetation, briars, stumps and large roots, rubbish or stones found on such areas, which may interfere with subsequent operations, shall be removed using methods approved by ENGINEER. Heavy sod or other cover, which cannot be incorporated into the topsoil by discing or other means shall be removed.

When suitable topsoil is available on the site, Contractor shall remove this material from the designated areas and to the depth as directed by ENGINEER. The topsoil shall be spread on areas already tilled and smooth-graded or stockpiled in areas approved by ENGINEER. Any topsoil stockpiled by Contractor shall be rehandled and placed without additional compensation. Any topsoil that has been stockpiled on the site by others, and is required for topsoil purposes, shall be removed and placed by Contractor. The sites of all stockpiles and areas adjacent thereto which have been disturbed by Contractor shall be graded if required and put into a condition acceptable for seeding.

When suitable topsoil is secured off the airport site, Contractor shall locate and obtain the supply, subject to the approval of ENGINEER. Contractor shall notify ENGINEER sufficiently in advance of operations in order that necessary measurements and tests can be made. Contractor shall remove the topsoil from approved areas and to the depth as directed. The topsoil shall be hauled to the site of the work and placed for spreading or spread as required. Any topsoil hauled to the site of the work and stockpiled shall be rehandled and placed without additional compensation.

905-3.4 Placing topsoil. The topsoil shall be evenly spread on the prepared areas to a uniform depth of 2 inches after compaction, unless otherwise shown on the plans or stated in the special provisions. Spreading shall not be done when the ground or topsoil is frozen, excessively wet, or otherwise in a condition detrimental to the work. Spreading shall be carried on so that turfing operations can proceed with a minimum of soil preparation or tilling.

After spreading, any large, stiff clods and hard lumps shall be broken with a pulverizer or by other effective means, and all stones or rocks (2 inches or more in diameter), roots, litter, or any foreign matter shall be raked up and disposed of by Contractor. after spreading is completed, the topsoil shall be satisfactorily compacted by rolling with a cultipacker or by other means approved by ENGINEER. The compacted topsoil surface shall conform to the required lines, grades, and cross-sections. Any topsoil or other dirt falling upon pavements as a result of hauling or handling of topsoil shall be promptly removed.

METHOD OF MEASUREMENT

905-4.1 Topsoil obtained on the site shall be measured by the number of square yards of topsoil measured in its original position and stripped or excavated. Topsoil stockpiled and then placed by Contractor shall be measured by the number of cubic yards of topsoil measured based on footprint of area to receive topsoil times the specified thickness of topsoil.

BASIS OF PAYMENT

905-5.1 Payment will be made at the contract unit price per square yard for topsoil (obtained on the site). This price shall be full compensation for furnishing all materials and for all preparation, placing, and spreading of the materials, and for all labor, equipment, tools, and incidentals necessary to complete the item. Specified soil amendment is considered incidental.

Payment will be made under:

Item T-905-5.1	Topsoil (obtained on site, stockpiled, then placed including amendment), per square yard

END OF ITEM T-905

Item L-108 Underground Power Cable for Airports

DESCRIPTION

108-1.1 This item shall consist of furnishing and installing power cables that are direct buried and furnishing and/or installing power cables within conduit or duct banks per these specifications at the locations shown on the plans. It includes excavation and backfill of trench for direct-buried cables only. Also included are the installation of counterpoise wires, ground wires, ground rods and connections, cable splicing, cable marking, cable testing, and all incidentals necessary to place the cable in operating condition as a completed unit to the satisfaction of Engineer. This item shall not include the installation of duct banks or conduit, trenching and backfilling for duct banks or conduit, or furnishing or installation of cable for FAA owned/operated facilities.

EQUIPMENT AND MATERIALS

108-2.1 General.

a. Airport lighting equipment and materials covered by advisory circulars (AC) shall be approved under the Airport Lighting Equipment Certification Program per AC 150/5345-53, current version.

b. All other equipment and materials covered by other referenced specifications shall be subject to acceptance through manufacturer's certification of compliance with the applicable specification, when requested by Engineer.

c. Manufacturer's certifications shall not relieve Contractor of the responsibility to provide materials per these specifications. Materials supplied and/or installed that do not comply with these specifications shall be removed (when directed by Engineer) and replaced with materials that comply with these specifications at Contractor's cost.

d. All materials and equipment used to construct this item shall be submitted to Engineer for approval prior to ordering the equipment. Submittals consisting of marked catalog sheets or shop drawings shall be provided. Submittal data shall be presented in a clear, precise and thorough manner. Original catalog sheets are preferred. Photocopies are acceptable provided they are as good a quality as the original. Clearly and boldly mark each copy to identify products or models applicable to this project. Indicate all optional equipment and delete any non-pertinent data. Submittals for components of electrical equipment and systems shall identify the equipment to which they apply on each submittal sheet. Markings shall be made bold and clear with arrows or circles (highlighting is not acceptable). Contractor is solely responsible for delays in the project that may accrue directly or indirectly from late submissions or resubmissions of submittals.

e. The data submitted shall be sufficient, in the opinion of Engineer, to determine compliance with the plans and specifications. Contractor submittals shall be electronically submitted in pdf format. Engineer reserves the right to reject any and all equipment, materials, or procedures that do not meet the system design and the standards and codes, specified in this document.

f. All equipment and materials furnished and installed under this section shall be guaranteed against defects in materials and workmanship for at least 12 months from the date of final acceptance by Owner. The defective materials and/or equipment shall be repaired or replaced, at Owner's discretion, with no additional cost to Owner. Contractor shall maintain a minimum insulation resistance in accordance with

paragraph 108-3.10e with isolation transformers connected in new circuits and new segments of existing circuits through the end of the contract warranty period when tested in accordance with AC 150/5340-26, *Maintenance Airport Visual Aid Facilities*, paragraph 5.1.3.1, Insulation Resistance Test.

108-2.2 Cable. Underground cable for airfield lighting facilities (runway and taxiway lights and signs) shall conform to the requirements of AC 150/5345-7, Specification for L-824 Underground Electrical Cable for Airport Lighting Circuits latest edition. Conductors for use on 6.6 ampere primary airfield lighting series circuits shall be single conductor, seven strand, #8 American wire gauge (AWG), L-824 Type C, 5,000 volts, non-shielded, with cross-linked polyethylene insulation. L-824 conductors for use on the L-830 secondary of airfield lighting series circuits shall be sized in accordance with the manufacturer's recommendations. All other conductors shall comply with FAA and National Electric Code (NEC) requirements. Conductor sizes noted above shall not apply to leads furnished by manufacturers on airfield lighting transformers and fixtures.

Wire for electrical circuits up to 600 volts shall comply with Specification L-824 and/or Commercial Item Description A-A-59544A and shall be type THWN-2, 75°C for installation in conduit and RHW-2, 75°C for direct burial installations. Conductors for parallel (voltage) circuits shall be type and size and installed in accordance with NFPA-70, National Electrical Code.

Unless noted otherwise, all 600-volt and less non-airfield lighting conductor sizes are based on a 75°C, THWN-2, 600-volt insulation, copper conductors, not more than three single insulated conductors, in raceway, in free air. The conduit/duct sizes are based on the use of THWN-2, 600-volt insulated conductors. Contractor shall make the necessary increase in conduit/duct sizes for other types of wire insulation. In no case shall the conduit/duct size be reduced. The minimum power circuit wire size shall be #12 AWG.

Conductor sizes may have been adjusted due to voltage drop or other engineering considerations. Equipment provided by Contractor shall be capable of accepting the quantity and sizes of conductors shown in the Contract Documents. All conductors, pigtails, cable step-down adapters, cable step-up adapters, terminal blocks, and splicing materials necessary to complete the cable termination/splice shall be considered incidental to the respective pay items provided.

Cable type, size, number of conductors, strand and service voltage shall be as specified in the Contract Document.

108-2.3 Bare copper wire (counterpoise, bare copper wire ground and ground rods). Wire for counterpoise or ground installations for airfield lighting systems shall be No. 6 AWG bare solid copper wire for counterpoise and/or No. 6 AWG insulated stranded for grounding bond wire per ASTM B3 and ASTM B8 and shall be bare copper wire. For voltage powered circuits, the equipment grounding conductor shall comply with NEC Article 250.

Ground rods shall be copper-clad steel. The ground rods shall be of the length and diameter specified on the plans, but in no case be less than 10 feet long and 3/4 inch in diameter.

108-2.4 Cable connections. In-line connections or splices of underground primary cables shall be of the type called for on the plans and shall be one of the types listed below. No separate payment will be made for cable connections.

a. The cast splice. A cast splice, employing a plastic mold and using epoxy resin equivalent to that manufactured by 3M™ Company, "Scotchcast" Kit No. 82-B, or an approved equivalent, used for potting the splice is acceptable.

b. The field-attached plug-in splice. Field attached plug-in splices shall be installed as shown on the plans. Contractor shall determine the outside diameter of the cable to be spliced and furnish appropriately sized connector kits and/or adapters. Primary Connector Kits manufactured by Amerace, "Super Kit", Integro "Complete Kit", or approved equal is acceptable. The use of heat shrink tubing is prohibited.

c. The factory-molded plug-in splice. Specification for L-823 Connectors, Factory-Molded to Individual Conductors, is acceptable. The use of heat shrink tubing is prohibited.

d. The taped or heat-shrink splice. Not used.

All connections of counterpoise, grounding conductors and ground rods shall be made by the exothermic process or approved equivalent, except that a light base ground clamp connector shall be used for attachment to the light base. All exothermic connections shall be made per the manufacturer's recommendations and listings.

108-2.5 Splicer qualifications. Every airfield lighting cable splicer shall be qualified in making airport cable splices and terminations on cables rated at or above 5,000 volts AC. Contractor shall submit to Engineer proof of the qualifications of each proposed cable splicer for the airport cable type and voltage level to be worked on. Cable splicing/terminating personnel shall have a minimum of three years' continuous experience in terminating/splicing medium voltage cable. [*Proof of each splicer's qualification shall include a brief resume of their qualifications, certificates from splice kit manufacturer's training program, photo identification, and a sample splice. These items shall be included with the cable splice kit submittal. Each splicer shall submit a sample splice to Engineer (ship direct to electrical engineer in a rigid container.) Each sample splice shall be tagged and signed by its splicer. Each splice shall consist of a completed L823, Type I, Class B, Style 3 and Style 10 primary connector (super) kit having three feet of submitted and approved L-824 cable attached to each end of the connected splices. Plug and receptacle shall be connected by the splicer as they intend their work to be found in the field. Engineer shall review the materials and test submitted samples. Sample tests will be conducted at 1000-vdc after the connected splice has been submerged under water for 24 hours. An insulation resistance of greater than 500 Meg-ohms is required. Each splicer's sample must pass the insulation test to be qualified. Samples remain the property of Engineer and will not be returned. Only qualified splicers shall be allowed to terminate L-824 cable*].

108-2.6 Concrete. Concrete shall be proportioned, placed, and cured per Item P-610, Concrete for Miscellaneous Structures.

108-2.7 Flowable backfill. Flowable material used to backfill trenches for power cable trenches shall conform to the requirements of Item P-153, Controlled Low Strength Material.

108-2.8 Cable identification tags. Cable identification tags shall be made from a non-corrosive material with the circuit identification stamped or etched onto the tag. The tags shall be of the type as detailed on the plans.

108-2.9 Tape. Electrical tapes shall be Scotch™ Electrical Tapes –Scotch™ 88 (1-1/2 inch wide) and Scotch™ 130C® linerless rubber splicing tape (2-inch wide), as manufactured by the Minnesota Mining and Manufacturing Company (3M™), or an approved equivalent.

108-2.10 Electrical coating. Electrical coating shall be Scotchkote™ as manufactured by 3M™, or an approved equivalent.

108-2.11 Existing circuits. Whenever the scope of work requires connection to an existing circuit, the existing circuit's insulation resistance shall be tested, in the presence of Engineer. The test shall be performed per this item and prior to any activity that will affect the respective circuit. Contractor shall record the results on forms acceptable to Engineer. When the work affecting the circuit is complete, the circuit's insulation resistance shall be checked again, in the presence of Engineer. Contractor shall record the results on forms acceptable to Engineer. The second reading shall be equal to or greater than the first reading or Contractor shall make the necessary repairs to the existing circuit to bring the second reading above the first reading. All repair costs including a complete replacement of the L-823 connectors, L-830

transformers and L-824 cable, if necessary, shall be borne by Contractor. All test results shall be submitted in the Operation and Maintenance (O&M) Manual.

108-2.12 Detectable warning tape. Plastic, detectable, American Public Works Association (APWA) Red (electrical power lines, cables, conduit, and lighting cable) with continuous legend tape shall be polyethylene film with a metalized foil core and shall be 3-6 inches wide. Detectable tape is incidental to the respective bid item. Detectable warning tape for communication cables shall be orange. Detectable warning tape color code shall comply with the APWA Uniform Color Code.

CONSTRUCTION METHODS

108-3.1 General. Contractor shall install the specified cable at the approximate locations indicated on the plans. Unless otherwise shown on the plans, all cable required to cross under pavements expected to carry aircraft loads shall be installed in concrete encased duct banks. Cable shall be run without splices, from fixture to fixture.

Cable connections between lights will be permitted only at the light locations for connecting the underground cable to the primary leads of the individual isolation transformers. Contractor shall be responsible for providing cable in continuous lengths for home runs or other long cable runs without connections unless otherwise authorized in writing by Engineer or shown on the plans.

In addition to connectors being installed at individual isolation transformers, L-823 cable connectors for maintenance and test points shall be installed at locations shown on the plans. Cable circuit identification markers shall be installed on both sides of the L-823 connectors installed and on both sides of slack loops where a future connector would be installed.

Provide not less than 3 feet of cable slack on each side of all connections, isolation transformers, light units, and at points where cable is connected to field equipment. Where provisions must be made for testing or for future above grade connections, provide enough slack to allow the cable to be extended at least 1 foot vertically above the top of the access structure. This requirement also applies where primary cable passes through empty light bases, junction boxes, and access structures to allow for future connections, or as designated by Engineer.

Primary airfield lighting cables installed shall have cable circuit identification markers attached on both sides of each L-823 connector and on each airport lighting cable entering or leaving cable access points, such as manholes, hand holes, pull boxes, junction boxes, etc. Markers shall be of sufficient length for imprinting the cable circuit identification legend on one line, using letters not less than 1/4 inch in size. The cable circuit identification shall match the circuits noted on the construction plans.

108-3.2 Installation in duct banks or conduits. This item includes the installation of the cable in duct banks or conduit per the following paragraphs. The maximum number and voltage ratings of cables installed in each single duct or conduit, and the current-carrying capacity of each cable shall be per the latest version of the National Electric Code, or the code of the local agency or authority having jurisdiction.

Contractor shall make no connections or splices of any kind in cables installed in conduits or duct banks.

Unless otherwise designated in the plans, where ducts are in tiers, use the lowest ducts to receive the cable first, with spare ducts left in the upper levels. Check duct routes prior to construction to obtain assurance that the shortest routes are selected ,and that any potential interference is avoided.

Duct banks or conduits shall be installed as a separate item per Item L-110, Airport Underground Electrical Duct Banks and Conduit. Contractor shall run a mandrel through duct banks or conduit prior to installation of cable to ensure that the duct bank or conduit is open, continuous, and clear of debris. The mandrel size shall be compatible with the conduit size. Contractor shall swab out all conduits/ducts and

clean light bases, manholes, etc., interiors immediately prior to pulling cable. Once cleaned and swabbed, the light bases and all accessible points of entry to the duct/conduit system shall be kept closed except when installing cables. Cleaning of ducts, light bases, manholes, etc., is incidental to the pay item of the item being cleaned. All raceway systems left open, after initial cleaning, for any reason shall be recleaned at Contractor's expense. Contractor shall verify existing ducts proposed for use in this project as clear and open. Contractor shall notify Engineer of any blockage in the existing ducts.

The cable shall be installed in a manner that prevents harmful stretching of the conductor, damage to the insulation, or damage to the outer protective covering. The ends of all cables shall be sealed with moisture-seal tape providing moisture-tight mechanical protection with minimum bulk, or alternately, heat shrinkable tubing before pulling into the conduit and it shall be left sealed until connections are made. Where more than one cable is to be installed in a conduit, all cable shall be pulled in the conduit at the same time. The pulling of a cable through duct banks or conduits may be accomplished by hand winch or power winch with the use of cable grips or pulling eyes. Maximum pulling tensions shall not exceed the cable manufacturer's recommendations. A non-hardening cable-pulling lubricant recommended for the type of cable being installed shall be used where required.

Contractor shall submit the recommended pulling tension values to Engineer prior to any cable installation. If required by Engineer, pulling tension values for cable pulls shall be monitored by a dynamometer in the presence of Engineer. Cable pull tensions shall be recorded by Contractor and reviewed by Engineer. Cables exceeding the maximum allowable pulling tension values shall be removed and replaced by Contractor at Contractor's expense.

The manufacturer's minimum bend radius or NEC requirements (whichever is more restrictive) shall apply. Cable installation, handling and storage shall be per manufacturer's recommendations. During cold weather, particular attention shall be paid to the manufacturer's minimum installation temperature. Cable shall not be installed when the temperature is at or below the manufacturer's minimum installation temperature. At Contractor's option, Contractor may submit a plan, for review by Engineer, for heated storage of the cable and maintenance of an acceptable cable temperature during installation when temperatures are below the manufacturer's minimum cable installation temperature.

Cable shall not be dragged across base can or manhole edges, pavement, or earth. When cable must be coiled, lay cable out on a canvas tarp or use other appropriate means to prevent abrasion to the cable jacket.

108-3.3 Installation of direct-buried cable in trenches. Not used.

a. Trenching. Where turf is well established and the sod can be removed, it shall be carefully stripped and properly stored. Trenches for cables may be excavated manually or with mechanical trenching equipment. Walls of trenches shall be essentially vertical so that a minimum of surface is disturbed. Graders shall not be used to excavate the trench with their blades. The bottom surface of trenches shall be essentially smooth and free from coarse aggregate. Unless otherwise specified, cable trenches shall be excavated to a minimum depth of 18 inches below finished grade per NEC Table 300.5, except as follows:

- When off the airport or crossing under a roadway or driveway, minimum depth shall be 36 inches unless otherwise specified.
- Minimum cable depth when crossing under a railroad track, shall be 42 inches unless otherwise specified.

Contractor shall excavate all cable trenches to a width not less than 6 inches. Unless otherwise specified on the plans, all cables in the same location and running in the same general direction shall be installed in the same trench.

When rock is encountered, the rock shall be removed to a depth of at least 3 inches below the required cable depth and it shall be replaced with bedding material of earth or sand containing no mineral aggregate particles that would be retained on a 1/4-inch sieve. Flowable backfill material may alternatively be used.

Duct bank or conduit markers temporarily removed for trench excavations shall be replaced as required.

It is Contractor's responsibility to locate existing utilities within the work area prior to excavation. Where existing active cables cross proposed installations, Contractor shall ensure that these cables are adequately protected. Where crossings are unavoidable, no splices will be allowed in the existing cables, except as specified on the plans. Installation of new cable where such crossings must occur shall proceed as follows:

(1) Existing cables shall be located manually. Unearthed cables shall be inspected to assure absolutely no damage has occurred.

(2) Trenching, etc., in cable areas shall then proceed, with approval of Engineer, with care taken to minimize possible damage or disruption of existing cable, including careful backfilling in area of cable.

If any previously identified cable is damaged during construction, Contractor shall be responsible for the complete repair or replacement.

b. Backfilling. After the cable has been installed, the trench shall be backfilled. The first layer of backfill in the trench shall encompass all cables; be 3 inches deep, loose measurement; and shall be either earth or sand containing no mineral aggregate particles that would be retained on a 1/4-inch sieve. This layer shall not be compacted. The second layer shall be 5 inches deep, loose measurement, and shall contain no particles that would be retained on a 1-inch sieve. The remaining third and subsequent layers of backfill shall not exceed 8 inches of loose measurement and be excavated or imported material and shall not contain stone or aggregate larger than 4 inches maximum diameter.

The second and subsequent layers shall be thoroughly tamped and compacted to at least the density of the adjacent material. If the cable is to be installed in locations or areas where other compaction requirements are specified (under pavements, embankments, etc.) the backfill compaction shall be to a minimum of 100 percent of ASTM D1557.

Trenches shall not contain pools of water during backfilling operations. The trench shall be completely backfilled and tamped level with the adjacent surface, except that when turf is to be established over the trench, the backfilling shall be stopped at an appropriate depth consistent with the type of turfing operation to be accommodated. A proper allowance for settlement shall also be provided. Any excess excavated material shall be removed and disposed of per the plans and specifications.

Underground electrical warning (caution) tape shall be installed in the trench above all direct-buried cable. Contractor shall submit a sample of the proposed warning tape for acceptance by Engineer. If not shown on the plans, the warning tape shall be located 6 inches above the direct-buried cable or the counterpoise wire if present. A 3- to 6-inch-wide polyethylene film detectable tape, with a metalized foil core, shall be installed above all direct buried cable or counterpoise. The tape shall be of the color and have a continuous legend as indicated on the plans. The tape shall be installed 8 inches minimum below finished grade.

c. Restoration. Following restoration of all trenching near airport movement surfaces, Contractor shall visually inspect the area for foreign object debris (FOD) and remove any that is found. Where soil and sod has been removed, it shall be replaced as soon as possible after the backfilling is completed. All areas disturbed by work shall be restored to its original condition. The restoration shall include existing material removed or excavated as shown on the plans. Contractor shall be held responsible for maintaining all disturbed surfaces and replacements until final acceptance. When trenching is through

paved areas, restoration shall be equal to existing conditions. If the cable is to be installed in locations or areas where other compaction requirements are specified (under pavements, embankments, etc.) the backfill compaction shall be to a minimum of 100% of ASTM D1557. Restoration shall be considered incidental to the pay item of which it is a component part.

108-3.4 Cable markers for direct-buried cable. Not used.

108-3.5 Splicing. Connections of the type shown on the plans shall be made by experienced personnel regularly engaged in this type of work and shall be made as follows:

a. Cast splices. These shall be made by using crimp connectors for jointing conductors. Molds shall be assembled, and the compound shall be mixed and poured per the manufacturer's instructions and to the satisfaction of Engineer.

b. Field-attached plug-in splices. These shall be assembled per the manufacturer's instructions. These splices shall be made by plugging directly into mating connectors. The joint where the connectors come together shall be finished by one of the following methods: (1) wrapped with at least one layer of rubber or synthetic rubber tape and one layer of plastic tape, one-half lapped, extending at least 1 1/2 inches on each side of the joint; (2) covered with heat shrinkable tubing with integral sealant extending at least 1-1/2 inches on each side of the joint; or (3) on connector kits equipped with water seal flap; roll-over water seal flap to sealing position on mating connector.

c. Factory-molded plug-in splices. These shall be made by plugging directly into mating connectors. The joint where the connectors come together shall be finished by one of the following methods: (1) wrapped with at least one layer of rubber or synthetic rubber tape and one layer of plastic tape, half lapped, extending at least 1-1/2 inches on each side of the joint; (2) covered with heat shrinkable tubing with integral sealant extending at least 1-1/2 inches on each side of the joint; or (3) on connector kits so equipped with water seal flap; roll-over water seal flap to sealing position on mating connector.

108-3.6 Bare counterpoise wire installation for lightning protection and grounding. If shown on the plans or included in the job specifications, bare solid #6 AWG copper counterpoise wire shall be installed for lightning protection of the underground cables. Engineer shall select one of two methods of lightning protection for the airfield lighting circuit based upon sound engineering practice and lightning strike density.

a. Equipotential. May be used by Engineer for areas that have high rates of lightning strikes. The counterpoise size is determined by Engineer. The equipotential method is applicable to all airfield lighting systems (i.e. runway, taxiway, apron – touchdown zone, centerline, edge, threshold and approach lighting systems). The equipotential method is also successfully applied to provide lightning protection for power, signal, and communication systems. The light bases, counterpoise, etc (all components) are bonded together and bonded to the vault power system ground loop/electrode.

Counterpoise wire shall be installed in the same trench for the entire length of buried cable, conduits and duct banks that are installed to contain airfield cables. The counterpoise is centered over the cable/conduit/duct to be protected.

The counterpoise conductor shall be installed no less than 8 inches minimum or 12 inches maximum above the raceway or cable to be protected, except as permitted below:

(1) The minimum counterpoise conductor height above the raceway or cable to be protected shall be permitted to be adjusted subject to coordination with the airfield lighting and pavement designs.

(2) The counterpoise conductor height above the protected raceway(s) or cable(s) shall be calculated to ensure that the raceway or cable is within a 45-degree area of protection, (45 degrees on each side of vertical creating a 90-degree angle).

The counterpoise conductor shall be bonded to each metallic light base, mounting stake, and metallic airfield lighting component.

All metallic airfield lighting components in the field circuit on the output side of the constant current regulator (CCR) or other power source shall be bonded to the airfield lighting counterpoise system.

All components rise and fall at the same potential with no potential difference, no damaging arcing and no damaging current flow.

See AC 150/5340-30, Design and Installation Details for Airport Visual Aids and NFPA 780, Standard for the Installation of Lightning Protection Systems, Chapter 11, for a detailed description of the Equipotential Method of lightning protection.

Reference FAA STD-019E, Lightning and Surge Protection, Grounding Bonding and Shielding Requirements for Facilities and Electronic Equipment, Part 4.1.1.7.

b. Common Installation requirements. When a metallic light base is used, the grounding electrode shall be bonded to the metallic light base or mounting stake with a No. 6 AWG bare, annealed or soft drawn, solid copper conductor.

Grounding electrodes may be rods, ground dissipation plates, radials, or other electrodes listed in the NFPA 70 (NEC) or NFPA 780.

Where raceway is installed by the directional bore, jack and bore, or other drilling method, the counterpoise conductor shall be permitted to be installed concurrently with the directional bore, jack and bore, or other drilling method raceway, external to the raceway or sleeve.

The counterpoise wire shall also be exothermically welded to ground rods installed as shown on the plans but not more than 500 feet apart around the entire circuit. The counterpoise system shall be continuous and terminate at the transformer vault or at the power source. It shall be securely attached to the vault or equipment external ground ring or other made electrode-grounding system. The connections shall be made as shown on the plans and in the specifications.

Where an existing airfield lighting system is being extended or modified, the new counterpoise conductors shall be interconnected to existing counterpoise conductors at each intersection of the new and existing airfield lighting counterpoise systems.

108-3.7 Counterpoise installation above multiple conduits and duct banks. Counterpoise wires shall be installed above multiple conduits/duct banks for airfield lighting cables, with the intent being to provide a complete area of protection over the airfield lighting cables. When multiple conduits and/or duct banks for airfield cable are installed in the same trench, the number and location of counterpoise wires above the conduits shall be adequate to provide a complete area of protection measured 45 degrees each side of vertical.

Where duct banks pass under pavement to be constructed in the project, the counterpoise shall be placed above the duct bank. Reference details on the construction plans.

108-3.8 Counterpoise installation at existing duct banks. When airfield lighting cables are indicated on the plans to be routed through existing duct banks, the new counterpoise wiring shall be terminated at ground rods at each end of the existing duct bank where the cables being protected enter and exit the duct bank. The new counterpoise conductor shall be bonded to the existing counterpoise system.

108-3.9 Exothermic bonding. Bonding of counterpoise wire shall be by the exothermic welding process or equivalent method accepted by Engineer. Only personnel experienced in and regularly engaged in this type of work shall make these connections.

Contractor shall demonstrate to the satisfaction of Engineer, the welding kits, materials and procedures to be used for welded connections prior to any installations in the field. The installations shall comply with the manufacturer's recommendations and the following:

a. All slag shall be removed from welds.

b. Using an exothermic weld to bond the counterpoise to a lug on a galvanized light base is not recommended unless the base has been specially modified. Consult the manufacturer's installation directions for proper methods of bonding copper wire to the light base. See AC 150/5340-30 for galvanized light base exception.

c. If called for in the plans, all buried copper and weld material at weld connections shall be thoroughly coated with 6 mm of 3M™ Scotchkote™, or approved equivalent, or coated with coal tar Bitumastic® material to prevent surface exposure to corrosive soil or moisture.

108-3.10 Testing. Contractor shall furnish all necessary equipment and appliances for testing the airport electrical systems and underground cable circuits before and after installation. Contractor shall perform all tests in the presence of Engineer. Contractor shall demonstrate the electrical characteristics to the satisfaction of Engineer. All costs for testing are incidental to the respective item being tested. For phased projects, the tests must be completed by phase. Contractor must maintain the test results throughout the entire project as well as during the warranty period that meet the following:

a. Should the counterpoise or ground grid conductors be damaged or suspected of being damaged by construction activities Contractor shall test the conductors for continuity with a low resistance ohmmeter. The conductors shall be isolated such that no parallel path exists and tested for continuity. Engineer shall approve of the test method selected. All such testing shall be at the sole expense of Contractor.

After installation, Contractor shall test and demonstrate to the satisfaction of Engineer the following:

b. That all affected lighting power and control circuits (existing and new) are continuous and free from short circuits.

c. That all affected circuits (existing and new) are free from unspecified grounds.

d. That the insulation resistance to ground of all new non-grounded high voltage series circuits or cable segments is not less than 500 megohms at 1000 VDC. Verify continuity of all series airfield lighting circuits prior to energization.

e. That the insulation resistance to ground of all new non-grounded conductors of new multiple circuits or circuit segments is not less than 100 megohms.

f. That all affected circuits (existing and new) are properly connected per applicable wiring diagrams.

g. That all affected circuits (existing and new) are operable. Tests shall be conducted that include operating each control not less than 10 times and the continuous operation of each lighting and power circuit for not less than 1/2 hour.

Two copies of tabulated results of all cable tests performed shall be supplied by Contractor to Engineer. Where connecting new cable to existing cable, insulation resistance tests shall be performed on the new cable prior to connection to the existing circuit.

There are no approved "repair" procedures for items that have failed testing other than complete replacement.

METHOD OF MEASUREMENT

108-4.1 Trenching shall be measured by the linear feet of trench, including the excavation, backfill, and restoration, completed, measured as excavated, and accepted as satisfactory. When specified, separate measurement shall be made for trenches of various specified widths. The cost of all excavation, backfill, dewatering and restoration regardless of the type of material encountered shall be included in the unit price bid for the work.

108-4.2 Cable or counterpoise wire installed in trench, duct bank or conduit shall be measured by the number of linear feet installed and grounding connectors, and trench marking tape ready for operation, and accepted as satisfactory. Separate measurement shall be made for each cable or counterpoise wire installed in trench, duct bank or conduit. The measurement for this item shall include additional quantities required for slack.

108-4.3 No separate payment will be made for ground rods**.**

BASIS OF PAYMENT

108-5.1 Payment will be made at the contract unit price for trenching, cable and bare counterpoise wire installed in trench (direct buried), or cable and equipment ground installed in duct bank or conduit, in place by Contractor and accepted by Engineer. This price shall be full compensation for furnishing all materials and for all preparation and installation of these materials, and for all labor, equipment, tools, and incidentals, including ground rods and ground connectors and trench marking tape, necessary to complete this item.

Payment will be made under:

Item L-108-5.1	Trenching, Backfill, and Compact for PVC Conduit, 24-inch minimum depth, per linear foot
Item L-108-5.2	Trenching, Backfill, and Compact for PVC Conduit, 40-inch minimum depth, per linear foot
Item L-108-5.3	No. 8 AWG, 5kV, L-824, Type C Cable, Installed in Trench, Duct Bank or Conduit, per liner foot
Item L-108-5.4	No. 6 AWG, Solid, Bare Copper Ground Wire, Installed, Above the Duct Bank or Conduit, Including Connections/Terminations, per linear foot
Item L-108-5.5	No. 6 AWG, Insulated, Stranded Equipment bonding, Installed in Duct Bank or Conduit, per linear foot

FAA STD-019E	Lightning and Surge Protection, Grounding Bonding and Shielding Requirements for Facilities and Electronic Equipment

END OF ITEM L-108

Item L-110 Airport Underground Electrical Duct Banks and Conduits

DESCRIPTION

110-1.1 This item shall consist of underground electrical conduits and duct banks (single or multiple conduits encased in concrete or buried in sand) installed per this specification at the locations and per the dimensions, designs, and details shown on the plans. This item shall include furnishing and installing of all underground electrical duct banks and individual and multiple underground conduits and removal of existing duct banks. It shall also include all turfing trenching, backfilling, removal, and restoration of any paved or turfed areas; concrete encasement, mandrelling, pulling lines, duct markers, plugging of conduits, and the testing of the installation as a completed system ready for installation of cables per the plans and specifications. This item shall also include furnishing and installing conduits and all incidentals for providing positive drainage of the system. Verification of existing ducts is incidental to the pay items provided in this specification.

EQUIPMENT AND MATERIALS

110-2.1 General.

a. All equipment and materials covered by referenced specifications shall be subject to acceptance through manufacturer's certification of compliance with the applicable specification when requested by Engineer.

b. Manufacturer's certifications shall not relieve Contractor of the responsibility to provide materials per these specifications and acceptable to Engineer. Materials supplied and/or installed that do not comply with these specifications shall be removed, when directed by Engineer and replaced with materials, that comply with these specifications, at Contractor's cost.

c. All materials and equipment used to construct this item shall be submitted to Engineer for approval prior to ordering the equipment. Submittals consisting of marked catalog sheets or shop drawings shall be provided. Submittal data shall be presented in a clear, precise, and thorough manner. Original catalog sheets are preferred. Photocopies are acceptable provided they are as good a quality as the original. Clearly and boldly mark each copy to identify products or models applicable to this project. Indicate all optional equipment and delete non-pertinent data. Submittals for components of electrical equipment and systems shall identify the equipment for which they apply on each submittal sheet. Markings shall be made bold and clear with arrows or circles (highlighting is not acceptable). Contractor is solely responsible for delays in project that accrue directly or indirectly from late submissions or resubmissions of submittals.

d. The data submitted shall be sufficient, in the opinion of Engineer, to determine compliance with the plans and specifications. Contractor's submittals shall be electronically submitted in pdf format, tabbed by specification section. Engineer reserves the right to reject any equipment, materials or procedures that do not meet the system design and the standards and codes specified in this document.

e. All equipment and materials furnished and installed under this section shall be guaranteed against defects in materials and workmanship for a period of at least 12 months from final acceptance by Owner. The defective materials and/or equipment shall be repaired or replaced, at Owner's discretion, with no additional cost to Owner.

110-2.2 Steel conduit. Rigid galvanized steel (RGS) conduit and fittings shall be hot dipped galvanized inside and out and conform to the requirements of Underwriters Laboratories Standards 6, 514B, and 1242. All RGS conduits or RGS elbows installed below grade, in concrete, permanently wet locations or other similar environments shall be painted with a 10-mil thick coat of asphaltum sealer or shall have a factory-bonded polyvinyl chloride (PVC) cover. Any exposed galvanizing or steel shall be coated with 10 mils of asphaltum sealer. When using PVC coated RGS conduit, care shall be exercised not to damage the factory PVC coating. Damaged PVC coating shall be repaired per the manufacturer's written instructions. In lieu of PVC coated RGS, corrosion wrap tape shall be permitted to be used where RGS is in contact with direct earth."

110-2.3 Plastic conduit. Plastic conduit and fittings-shall conform to the following requirements:

- UL 514B covers W-C-1094-Conduit fittings all types, classes 1 thru 3 and 6 thru 10.
- UL 514C covers W-C-1094- all types, Class 5 junction box and cover in plastic (PVC).
- UL 651 covers W-C-1094-Rigid PVC Conduit, types I and II, Class 4.
- UL 651A covers W-C-1094-Rigid PVC Conduit and high-density polyethylene (HDPE) Conduit type III and Class 4.

UL Standards UL-651 and Article 352 of the current National Electrical Code shall be one of the following, as shown on the plans:

a. Type I – Schedule 40 and Schedule 80 PVC suitable for underground use either direct-buried or encased in concrete.

b. Type II – Schedule 40 PVC suitable for either above ground or underground use.

c. Type III – Schedule 80 PVC suitable for either above ground or underground use either direct-buried or encased in concrete.

d. Type III – HDPE pipe, minimum standard dimensional ratio (SDR) 11, suitable for placement with directional boring under pavement.

The type of solvent cement shall be as recommended by the conduit/fitting manufacturer.

110-2.4 Split conduit. Split conduit shall be pre-manufactured for the intended purpose and shall be made of steel or plastic.

110-2.5 Conduit spacers. Conduit spacers shall be prefabricated interlocking units manufactured for the intended purpose. They shall be of double wall construction made of high-grade, high-density polyethylene complete with interlocking cap and base pads. They shall be designed to accept No. 4 reinforcing bars installed vertically.

110-2.6 Concrete. Concrete shall be proportioned, placed, and cured per Item P-610, Concrete for Miscellaneous Structures.

110-2.7 Precast concrete structures. Precast concrete structures shall be furnished by a plant meeting National Precast Concrete Association Plant Certification Program or another Engineer approved third party certification program. Precast concrete structures shall conform to ASTM C478.

110-2.8 Flowable backfill. Flowable material used to back fill conduit and duct bank trenches shall conform to the requirements of Item P-153, Controlled Low Strength Material.

110-2.9 Detectable warning tape. Plastic, detectable, American Public Works Association (APWA) red (electrical power lines, cables, conduit, and lighting cable), orange (phone/fiber optic cabling) with continuous legend magnetic tape shall be polyethylene film with a metallized foil core and shall be 3-6 inches wide. Detectable tape is incidental to the respective bid item.

Color and legend: Red and ELECTRIC.

CONSTRUCTION METHODS

110-3.1 General. Contractor shall install underground duct banks and conduits at the approximate locations indicated on the plans. Engineer shall indicate specific locations as the work progresses, if required to differ from the plans. Duct banks and conduits shall be of the size, material, and type indicated on the plans or specifications. Where no size is indicated on the plans or in the specifications, conduits shall be not less than 2 inches inside diameter or comply with the National Electrical Code based on cable to be installed, whichever is larger. All duct bank and conduit lines shall be laid to grade toward access points and duct or conduit ends for drainage. Unless shown otherwise on the plans, grades shall be at least 3 inches per 100 feet. On runs where it is not practicable to maintain the grade all one way, the duct bank and conduit lines shall be graded from the center in both directions toward access points or conduit ends, with a drain into the storm drainage system. Pockets or traps where moisture may accumulate shall be avoided. Under pavement, the top of the duct bank shall not be less than 18 inches below the subgrade; in other locations, the top of the duct bank or underground conduit shall be not less than 18 inches below finished grade.

Contractor shall mandrel each individual conduit whether the conduit is direct-buried or part of a duct bank. An iron-shod mandrel, not more than 1/4 inch smaller than the bore of the conduit shall be pulled or pushed through each conduit. The mandrel shall have a leather or rubber gasket slightly larger than the conduit hole.

Contractor shall swab out all conduits/ducts and clean base can, manhole, pull boxes, etc., interiors immediately prior to pulling cable. Once cleaned and swabbed the light bases, manholes, pull boxes, etc., and all accessible points of entry to the duct/conduit system shall be kept closed except when installing cables. Cleaning of ducts, base cans, manholes, etc., is incidental to the pay item of the item being cleaned. All raceway systems left open, after initial cleaning, for any reason shall be recleaned at Contractor’s expense. All accessible points shall be kept closed when not installing cable. Contractor shall verify existing ducts proposed for use in this project as clear and open. Contractor shall notify Engineer of any blockage in the existing ducts.

For pulling the permanent wiring, each individual conduit, whether the conduit is direct-buried or part of a duct bank, shall be provided with a 200-pound test polypropylene pull rope. Ends shall be secured with sufficient length shall be left in access points to prevent it from slipping back into the conduit. Where spare conduits are installed, as indicated on the plans, the open ends shall be plugged with removable tapered plugs, designed for this purpose.

All conduits shall be securely fastened in place during construction and shall be plugged to prevent contaminants from entering the conduits. Any conduit section having a defective joint shall not be installed. Ducts shall be supported and spaced apart using approved spacers at intervals not to exceed 5 feet.

Unless otherwise shown on the plans, concrete encased duct banks shall be used when crossing under pavements expected to carry aircraft loads, such as runways, taxiways, taxilanes, ramps and aprons. When under paved shoulders and other paved areas, conduit and duct banks shall be encased using flowable fill for protection.

All conduits within concrete encasement of the duct banks shall terminate with female ends for ease in current and future use. Install factory plugs in all unused ends. Do not cover the ends or plugs with concrete.

Where turf is well established and the sod can be removed, it shall be carefully stripped and properly stored.

Trenches for conduits and duct banks may be excavated manually or with mechanical trenching equipment unless in pavement, in which case they shall be excavated with mechanical trenching equipment. Walls of trenches shall be essentially vertical so that a minimum of shoulder surface is disturbed. Blades of graders shall not be used to excavate the trench.

When rock is encountered, the rock shall be removed to a depth of at least 3 inches below the required conduit or duct bank depth and it shall be replaced with bedding material of earth or sand containing no mineral aggregate particles that would be retained on a 1/4-inch sieve. Flowable backfill may alternatively be used

Underground electrical warning (CAUTION) tape shall be installed in the trench above all underground duct banks and conduits in unpaved areas. Contractor shall submit a sample of the proposed warning tape for approval by Engineer. If not shown on the plans, the warning tape shall be located 6 inches above the duct/conduit or the counterpoise wire if present.

Joints in plastic conduit shall be prepared per manufacturer recommendations for the type of conduit. Plastic conduit shall be prepared by application of a plastic cleaner and brushing a plastic solvent on the outside of the conduit ends and on the inside of the couplings. The conduit fitting shall then be slipped together with a quick one-quarter turn twist to set the joint tightly. Where more than one conduit is placed in a single trench, or in duct banks, joints in the conduit shall be staggered a minimum of 2 feet.

Changes in direction of runs exceeding 10 degrees, either vertical or horizontal, shall be accomplished using manufactured sweep bends.

Whether or not specifically indicated on the drawings, where the soil encountered at established duct bank grade is an unsuitable material, as determined by Engineer, the unsuitable material shall be removed per Item P-152 and replaced with suitable material. Additional duct bank supports shall be installed, as approved by Engineer.

All excavation shall be unclassified and shall be considered incidental to Item L-110. Dewatering necessary for duct installation, and erosion per federal, state, and local requirements is incidental to Item L-110.

Unless otherwise specified, excavated materials that are deemed by Engineer to be unsuitable for use in backfill or embankments shall be removed and disposed of offsite.

Any excess excavation shall be filled with suitable material approved by Engineer and compacted per Item P-152.

It is Contractor’s responsibility to locate existing utilities within the work area prior to excavation. Where existing active cables) cross proposed installations, Contractor shall ensure that these cables are adequately protected. Where crossings are unavoidable, no splices will be allowed in the existing cables, except as specified on the plans. Installation of new cable where such crossings must occur shall proceed as follows:

a. Existing cables shall be located manually. Unearthed cables shall be inspected to assure absolutely no damage has occurred

b. Trenching, etc., in cable areas shall then proceed with approval of Engineer, with care taken to minimize possible damage or disruption of existing cable, including careful backfilling in area of cable.

If any previously identified cable is damaged during construction, Contractor shall be responsible for the complete repair.

110-3.2 Duct banks. Unless otherwise shown in the plans, new duct banks shall be installed so top of the concrete envelope is not less than 18 inches below the bottom of the base or stabilized base course layers where installed under runways, taxiways, aprons, or other paved areas, and not less than 18 inches below finished grade where installed in unpaved areas.

Unless otherwise shown on the plans, duct banks under paved areas shall extend at least 3 feet beyond the edges of the pavement or 3 feet beyond any under drains that may be installed alongside the paved area. Trenches for duct banks shall be opened the complete length before concrete is placed so that if any obstructions are encountered, provisions can be made to avoid them. Unless otherwise shown on the plans, all duct banks shall be placed on a layer of concrete not less than 3 inches thick prior to its initial set. Contractor shall space the conduits not less than 3 inches apart (measured from outside wall to outside wall). All such multiple conduits shall be placed using conduit spacers applicable to the type of conduit. As the conduit laying progresses, concrete shall be placed around and on top of the conduits not less than 3 inches thick unless otherwise shown on the plans. All conduits shall terminate with female ends for ease of access in current and future use. Install factory plugs in all unused ends. Do not cover the ends or plugs with concrete.

Conduits forming the duct bank shall be installed using conduit spacers. No. 4 reinforcing bars shall be driven vertically into the soil a minimum of 6 inches to anchor the assembly into the earth prior to placing the concrete encasement. For this purpose, the spacers shall be fastened down with locking collars attached to the vertical bars. Spacers shall be installed at 5-foot intervals. Spacers shall be in the proper sizes and configurations to fit the conduits. Locking collars and spacers shall be submitted to Engineer for review prior to use.

When specified, Contractor shall reinforce the bottom side and top of encasements with steel reinforcing mesh or fabric or other approved metal reinforcement. When directed, Contractor shall supply additional supports where the ground is soft and boggy, where ducts cross under roadways, or where shown on the plans. Under such conditions, the complete duct structure shall be supported on reinforced concrete footings, piers, or piles located at approximately 5-foot intervals.

All pavement surfaces that are to have ducts installed therein shall be neatly saw cut to form a vertical face. All excavation shall be included in the contract with price for the duct.

Install a plastic, detectable, color as noted, 3- to 6-inch-wide tape, 8 inches minimum below grade above all underground conduit or duct lines not installed under pavement. Utilize the 3-inch-wide tape only for single conduit runs. Utilize the 6-inch-wide tape for multiple conduits and duct banks. For duct banks equal to or greater than 24 inches in width, utilize more than one tape for sufficient coverage and identification of the duct bank as required.

When existing cables are to be placed in split duct, encased in concrete, the cable shall be carefully located and exposed by hand tools. Prior to being placed in duct, Engineer shall be notified so that he may inspect the cable and determine that it is in good condition. Where required, split duct shall be installed as shown on the drawings or as required byEngineer**110-3.3 Conduits without concrete encasement**. Trenches for single-conduit lines shall be not less than 6 inches nor more than 12 inches wide. The trench for 2 or more conduits installed at the same level shall be proportionately wider. Trench bottoms for conduits without concrete encasement shall be made to conform accurately to grade to provide uniform support for the conduit along its entire length.

Unless otherwise shown on the plans, a layer of fine earth material, at least 4 inches thick (loose measurement) shall be placed in the bottom of the trench as bedding for the conduit. The bedding material shall consist of soft dirt, sand, or other fine fill, and it shall contain no particles that would be retained on a 1/4-inch sieve. The bedding material shall be tamped until firm. Flowable backfill may alternatively be used.

Unless otherwise shown on plans, conduits shall be installed so that the tops of all conduits within the Airport’s secured area where trespassing is prohibited are at least 18 inches below the finished grade. Conduits outside the Airport’s secured area shall be installed so that the tops of the conduits are at least 24 inches below the finished grade per National Electric Code (NEC), Table 300.5.

When two or more individual conduits intended to carry conductors of equivalent voltage insulation rating are installed in the same trench without concrete encasement, space not less than 3 inches apart (measured from outside wall to outside wall) in a horizontal direction nor less than 6 inches apart in a vertical direction. Where two or more individual conduits intended to carry conductors of differing voltage insulation rating are installed in the same trench without concrete encasement, place not less than 3 inches apart (measured from outside wall to outside wall) in a horizontal direction nor less than 6 inches apart in a vertical direction.

Trenches shall be opened the complete length between normal termination points before conduit is installed so that if any unforeseen obstructions are encountered, proper provisions can be made to avoid them.

Conduits shall be installed using conduit spacers. No. 4 reinforcing bars shall be driven vertically into the soil a minimum of 6 inches to anchor the assembly into the earth while backfilling. For this purpose, the spacers shall be fastened down with locking collars attached to the vertical bars. Spacers shall be installed at 5-foot intervals. Spacers shall be in the proper sizes and configurations to fit the conduits. Locking collars and spacers shall be submitted to Engineer for review prior to use.

110-3.4 Markers. The location of each end and of each change of direction of conduits and duct banks shall be marked by a concrete slab marker 2 feet square and 4 - 6 inches thick extending approximately one inch above the surface. The markers shall also be located directly above the ends of all conduits or duct banks, except where they terminate in a junction/access structure or building. Each cable or duct run from a line of lights and signs to the equipment vault must be marked at approximately every 200 feet along the cable or duct run, with an additional marker at each change of direction of cable or duct run.

Contractor shall impress the word “DUCT” or “CONDUIT” on each marker slab. Impression of letters shall be done in a manner, approved by Engineer, for a neat, professional appearance. All letters and words must be neatly stenciled. After placement, all markers shall be given one coat of high-visibility orange paint, as approved by Engineer. Contractor shall also impress on the slab the number and size of conduits beneath the marker along with all other necessary information as determined by Engineer. The letters shall be 4 inches high and 3 inches wide with width of stroke 1/2 inch and 1/4 inch deep or as large as the available space permits. Furnishing and installation of duct markers is incidental to the respective duct pay item.

110-3.5 Backfilling for conduits. For conduits, 8 inches of sand, soft earth, or other fine fill (loose measurement) shall be placed around the conduits ducts and carefully tamped around and over them with hand tampers. The remaining trench shall then be backfilled and compacted per Item P-152 except that material used for back fill shall be select material not larger than 4 inches in diameter.

Flowable backfill may alternatively be used.

Trenches shall not contain pools of water during back filling operations.

The trench shall be completely backfilled and tamped level with the adjacent surface; except that, where sod is to be placed over the trench, the backfilling shall be stopped at a depth equal to the thickness of the sod to be used, with proper allowance for settlement.

Any excess excavated material shall be removed and disposed of per instructions issued by Engineer.

110-3.6 Backfilling for duct banks. After the concrete has cured, the remaining trench shall be backfilled and compacted per Item P-152 “Excavation and Embankment” except that the material used for backfill shall be select material not larger than 4 inches in diameter. In addition to the requirements of Item P-152, where duct banks are installed under pavement, one moisture/density test per lift shall be made for each 250 linear feet of duct bank or one work period’s construction, whichever is less.

Flowable backfill may alternatively be used.

Trenches shall not contain pools of water during backfilling operations. The trench shall be completely backfilled and tamped level with the adjacent surface; except that, where sod is to be placed over the trench, the backfilling shall be stopped at a depth equal to the thickness of the sod to be used, with proper allowance for settlement.

Any excess excavated material shall be removed and disposed of per instructions issued by

110-3.7 Restoration. Where sod has been removed, it shall be replaced as soon as possible after the backfilling is completed. All areas disturbed by the work shall be restored to its original condition. The restoration shall include topsoiling, fertilizing, and seeding shown on the plans. Contractor shall be held responsible for maintaining all disturbed surfaces and replacements until final acceptance. All restoration shall be considered incidental to the respective L-110 pay item. Following restoration of all trenching near airport movement surfaces, Contractor shall thoroughly visually inspect the area for foreign object debris (FOD) and remove any such FOD that is found. This FOD inspection and removal shall be considered incidental to the pay item of which it is a component part.

110-3.8 Ownership of removed cable. Contractor.

METHOD OF MEASUREMENT

110-4.1 Underground conduits and duct banks shall be measured by the linear feet of conduits and duct banks installed, including encasement, locator tape, trenching and backfill with designated material, and restoration, and for drain lines, the termination at the drainage structure, all measured in place, completed, and accepted. Separate measurement shall be made for the various types and sizes.

BASIS OF PAYMENT

110-5.1 Payment will be made at the contract unit price per linear foot for each type and size of conduit and duct bank completed and accepted, including trench and backfill with the designated material, and, for drain lines, the termination at the drainage structure. This price shall be full compensation for removal and disposal of existing duct banks and conduits as shown on the plans, furnishing all materials and for all preparation, assembly, and installation of these materials, and for all labor, equipment, tools, and incidentals necessary to complete this item per the provisions and intent of the plans and specifications.

Payment will be made under:

Item L-110-5.1	Non-Encased Electrical Conduit, 2-inch SCH 40, per linear foot
Item L-110-5.2	Concrete-Encased Electrical Conduit, two 4-inch SCH 40, including Duct Markers, per linear foot
Item L-110-5.3	Furnish and Install Concrete-Encased L867 Junction Box, per each

END OF ITEM L-110

Item L-125 Installation of Airport Lighting Systems

DESCRIPTION

125-1.1 This item shall consist of airport lighting systems furnished and installed in accordance with this specification, the referenced specifications, and the applicable advisory circulars (ACs). The systems shall be installed at the locations and in accordance with the dimensions, design, and details shown in the plans. This item shall include the furnishing of all equipment, materials, services, and incidentals necessary to place the systems in operation as completed units to the satisfaction of Engineer.

EQUIPMENT AND MATERIALS

125-2.1 General.

a. Airport lighting equipment and materials covered by Federal Aviation Administration (FAA) specifications shall be certified under the Airport Lighting Equipment Certification Program in accordance with AC 150/5345-53, current version. FAA certified airfield lighting shall be compatible with each other to perform in compliance with FAA criteria and the intended operation. If Contractor provides equipment that does not performs as intended because of incompatibility with the system, Contractor assumes all costs to correct the system for to operate properly.

b. Manufacturer's certifications shall not relieve Contractor of their responsibility to provide materials in accordance with these specifications and acceptable to Engineer. Materials supplied and/or installed that do not comply with these specifications shall be removed, when directed by Engineer and replaced with materials, which do comply with these specifications, at the sole cost of Contractor.

c. All materials and equipment used shall be submitted to Engineer for approval prior to ordering the equipment. Submittals consisting of marked catalog sheets or shop drawings shall be provided. Clearly mark each copy to identify pertinent products or models applicable to this project. Indicate all optional equipment and delete non-pertinent data. Submittals for components of electrical equipment and systems shall identify the equipment for which they apply on each submittal sheet. Markings shall be clearly made with arrows or circles (highlighting is not acceptable). Contractor shall be responsible for delays in the project accruing directly or indirectly from late submissions or resubmissions of submittals.

d. The data submitted shall be sufficient, in the opinion of Engineer, to determine compliance with the plans and specifications. Contractor's submittals shall be submitted in electronic PDF format, tabbed by specification section. Engineer reserves the right to reject any or all equipment, materials, or procedures, which, in Engineer opinion, does not meet the system design and the standards and codes, specified herein.

e. All equipment and materials furnished and installed under this section shall be guaranteed against defects in materials and workmanship for a period of at least 12 months from final acceptance by Owner. The defective materials and/or equipment shall be repaired or replaced, at Owner's discretion, with no additional cost to Owner.

EQUIPMENT AND MATERIALS

125-2.2 Conduit/Duct. Conduit shall conform to Specification Item L-110 Airport Underground Electrical Duct Banks and Conduits.

125-2.3 Cable and Counterpoise. Cable and Counterpoise shall conform to Item L-108 Underground Power Cable for Airports.

125-2.4 Tape. Rubber and plastic electrical tapes shall be Scotch Electrical Tape Numbers 23 and 88 respectively, as manufactured by 3M Company or an approved equal.

125-2.5 Cable Connections. Cable Connections shall conform to Item L-108 Installation of Underground Cable for Airports.

125-2.6 Retroreflective Markers. Not required.

125-2.7 Runway and Taxiway Lights. Runway and taxiway lights shall conform to the requirements of AC 150/5345-46. Lamps shall be of size and type indicated, or as required by fixture manufacturer for each lighting fixture required under this contract. Filters shall be of colors conforming to the specification for the light concerned or to the standard referenced.

Lights

Type	Class	Mode	Style	Option	Base	Filter	Transformer	Notes
TWY Edge L-861T	2	1	N/A	LED	L-867	Blue	L-830-16	14”

125-2.8 Runway and Taxiway Signs. Runway and Taxiway Guidance Signs should conform to the requirements of AC 150/5345-44.

Signs

Type	Size	Style	Class	Mode	Notes
L-858Y	2	2	1	2	LED
L-858L	2	2	1	2	LED

125-2.9 Runway End Identifier Light (REIL). Not required.

125-2.10 Precision Approach Path Indicator (PAPI). Not required.

125-2.11 Circuit Selector Cabinet. Not used.

125-2.12 Light Base and Transformer Housings. Light Base and Transformer Housings should conform to the requirements of AC 150/5345-42. Light bases shall be Type L-867, Class 1A, Size B shall be provided as indicated or as required to accommodate the fixture or device installed thereon. Base plates, cover plates, and adapter plates shall be provided to accommodate various sizes of fixtures.

125-2.13 Isolation Transformers. Isolation Transformers shall be Type L-830, size as required for each installation. Transformer shall conform to AC 150/5345-47.

INSTALLATION

125-3.1 Installation. Contractor shall furnish, install, connect, and test all equipment, accessories, conduit, cables, wires, buses, grounds and support items necessary to ensure a complete and operable airport lighting system as specified here and shown in the plans.

The equipment installation and mounting shall comply with the requirements of the National Electrical Code and state and local code agencies having jurisdiction.

Contractor shall install the specified equipment in accordance with the applicable advisory circulars and the details shown on the plans.

125-3.2 Testing. All lights shall be fully tested by continuous operation for not less than 24 hours as a completed system prior to acceptance. The test shall include operating the constant current regulator in each step not less than 10 times at the beginning and end of the 24-hour test. The fixtures shall illuminate properly during each portion of the test.

125-3.3 Shipping and Storage. Equipment shall be shipped in suitable packing material to prevent damage during shipping. Store and maintain equipment and materials in areas protected from weather and physical damage. Any equipment and materials, in the opinion of Engineer, damaged during construction or storage shall be replaced by Contractor at no additional cost to Owner. Painted or galvanized surfaces that are damaged shall be repaired in accordance with the manufacturer's recommendations.

125-3.4 Elevated and In-pavement Lights. Water, debris, and other foreign substances shall be removed prior to installing fixture base and light.

A jig or holding device shall be used when installing each light fixture to ensure positioning to the proper elevation, alignment, level control, and azimuth control. Light fixtures shall be oriented with the light beams parallel to the runway or taxiway centerline and facing in the required direction. Outermost edge of fixture shall be level with the surrounding pavement. Surplus sealant or flexible embedding material shall be removed. The holding device shall remain in place until sealant has reached its initial set.

METHOD OF MEASUREMENT

125-4.1 Reflective markers will be measured by the number installed as completed units in place, ready for operation, and accepted by Engineer. Runway and taxiway lights will be measured by the number of each type installed as completed units in place, ready for operation, and accepted by Engineer. Guidance signs will be measured by the number of each type and size installed as completed units, in place, ready for operation, and accepted by Engineer.

BASIS OF PAYMENT

125-5.1 Payment will be made at Contract unit price for each complete runway or taxiway light, guidance sign, or reflective marker runway end identification light installed by Contractor and accepted by Engineer. This payment will be full compensation for furnishing all materials, preparation, assembly, and installation of materials, and all labor, equipment, tools, and incidentals necessary to complete this item.

Payment will be made under:

Item 125-5.1	Remove and Dispose, Off Site, Existing Taxiway Guidance Signage (including all underground conduit, wiring connections, boxes, and concrete pads), complete, per each
Item 125-5.2	Item L-125-5.2, Remove and Save Five Existing Taxiway Edge Lights to Reuse; Remove and Dispose off site Existing underground conduit, wiring connections, boxes, concrete pads, and associated items, complete, per each
Item L-125-3	Three Module, Size 2, Style 2, Internally Lighted LED Guidance Sign, Base Mounted on Concrete-Encased Can, complete, per each
Item L-125-4	Item L-125-5.4, L-1861, LED Medium Intensity Taxiway Edge Light (Blue), Base Mounted on Concrete-Encased L-867 Light Base, Complete with Transformer and PVC Transformer Support (Quantity Includes Reuse of Five Edge Light Fixtures Salvaged in Line Item 32), complete, per each

PARKHILL P140 TEMPORARY BARRICADES AND MARKING FOR PAVEMENT CLOSURE

DESCRIPTION

140-1.1 Work covered by this Section consists of furnishing all materials, equipment, labor, and performing all necessary operations to maintain a safe barricade system and personnel needed to flag/escort vehicles across active pavement on the Airport. Required project barricades, runway closure markings, lighting, etc. are detailed in the Project Plans. Contractor shall maintain barricades, runway closure markings, lights, etc. in good working order, and clean 24 hours per day throughout contract period.

METHOD OF MEASUREMENT

140-2.1 Measurement for this item will be by lump sum as Work progresses.

BASIS OF PAYMENT

140-3.1 All Work performed and materials furnished as prescribed in this item shall be measured and paid at contract lump sum price for "Temporary Barricades and Marking for Pavement Closure." Total lump sum shall be paid pro-rata per month and monthly amount calculated by dividing lump sum by contract time in months.

Payment will be made under:

Parkhill 140-3.1	Temporary Barricades and Marking for Pavement Closure, per lump sum.

RE: Report of Geotechnical Investigation,
Midland International Air and Space Port
Midland, Texas

Dear Mr. Jamalabad,

We have completed the geotechnical investigation for the referenced project. This report describes the investigative procedures and presents the findings of our investigation.

We appreciate the opportunity of working with you on this phase of this project. If you have any questions regarding this report, or if we can be of further service to you, please do not hesitate to call.

Respectfully Submitted,

Jose Melendez, P.E.

Geotechnical Investigation for
Midland International Air & Space Port
Midland, Texas

1. INTRODUCTION

Rodriguez Engineering Laboratories was retained by Parkhill to perform a geotechnical investigation for the airfield pavement rehabilitation project at the Midland International Air & Space Port in Midland, Texas.

2. PURPOSE OF STUDY

The purpose of this investigation is to determine the engineering properties of the in-situ subsurface material for the proposed pavement reconstruction of Taxiway E, West of Taxiway A. The scope of work for the field geotechnical investigation includes excavating test pits, obtaining HMAC cores, drilling boreholes, and collecting representative soil and base samples to perform the appropriate laboratory tests. The objective of this report is to submit a summary of the laboratory test results obtained on this geotechnical investigation.

3. SUBSURFACE INVESTIGATION

The subsurface investigation was performed under the supervision of Jose Melendez, P.E. The field inspection, drilling, and logging were performed by Ricardo A. Avila, P.E. The drilling operations included excavating two (2) test pits, obtaining three (3) HMAC cores, and advancing one (1) boring to 10 feet and two (2) borings to 4 feet due to auger refusal. The approximate boring depths were initiated from existing pavement elevations at the specified locations approved by Parkhill. Upon completion, the borings and test pits were appropriately backfilled.

Appendix C contains a map of the borehole locations. Appendix A contains information on each borehole and test pit along with the laboratory test results for Moisture Content, Atterberg Limits, Sieve Analysis, and Unified Soil Classification. The borings were drilled with a Giddings trailer-mounted drill rig with a six (6) inch diameter flight auger at the selected locations.

4. LABORATORY TESTING

The soil samples obtained during the exploration were sealed at the site and transported to the laboratory. A testing program was conducted on the sealed samples to aid in the classification and evaluation of the engineering properties required for analysis. The laboratory tests were performed by experienced laboratory technicians and monitored by the geotechnical engineer. The parameters were determined by the following laboratory tests:

- Potential volumetric shrinkage characteristics of the cohesive soils were determined by the Standard Test Methods for Liquid Limit, Plastic Limit, and Plasticity Index of Soils (ASTM D 4318).

- Material gradation for soil classification was determined by the Standard Practice for Classification of Soils for Engineering Purposes (ASTM D 2487).

- Material moisture content was determined by the Standard Test Method for Laboratory Determination of Water (Moisture) Content of Soil and Rock by Mass (ASTM D 2216).

- Field description of the material was determined by the Visual-Manual Procedure for Description and Identification of Soils (Test Method Tex-141-E) and supported by the TxDOT Geotechnical Manual.

The data can be found in Appendix A.

- The Moisture-Density relationship of the base and subgrade encountered was determined by the standard test method for Laboratory Compaction Characteristics of Soil Using Standard Effort (12,400 ft-lbf/ft^3(600 kN-m/m^3)) (ASTM D 698).

- An index of strength and deflection characteristics of the base and subgrade encountered was determined by performing the Standard Test Method for CBR (California Bearing Ratio) of Laboratory-Compacted Soils (ASTM D 1883).

The data can be found in Appendix B.

- The Stabilization of Subgrade was determined by the Standard Test Method for Using pH to Estimate the Soil-Lime Proportion Requirement for Soil Stabilization (ASTM D6276)

The data can be found in Appendix D.

- The pH of soils in an aqueous solution was determined by the Standard Test Method for Determining Soil pH (Tex-128-E).

The data can be found in table 2 of this report.

- The Soluble Sulfate Content was determined for the purpose of insuring that there would not be any potential adverse sulfate-lime reaction in the event lime stabilization is recommended by Standard Test Method for Sulfate Content in Soils Colorimetric Method (Tex-145-E).

The data can be found in table 2 and table 4 of this report.

5. SITE AND SUBSURFACE CONDITIONS

5.1 Site Conditions

The Midland International Air & Space Port is located approximately eight (8) miles southwest of Midland, Texas. The topography in the area is generally flat.

The Geological Atlas of Texas (Hobbs Sheet) published by the Bureau of Economic Geology at the University of Texas at Austin indicates that the general geology of the area is Quaternary with Windblown Cover Sand (Qcs) from the Pleistocene period. Windblown cover sand includes fine to medium-grained quartz, silty, calcareous, caliche nodules common, massive, grayish red; distinct soil profile; thickness up to 10 feet, feathers out locally (mostly Illinoian, may include younger deposits).

Appendix C includes an area map of the geological survey provided by the University of Texas at Austin Bureau of Economic Geology as well as a site map of the borehole locations.

5.2 Subsurface Conditions

Borings to depth were generally advanced with ease until a possible bedrock was encountered at boreholes No. 2 and 3 where borings were terminated before than the proposed depth, due to auger refusal. The material sampled varied from medium plasticity clayey sands to gravels with sand. The particular subsurface stratigraphy, as determined by the exploration, is shown in detail in the boring logs (i.e. Appendix A) and in the pictures shown in Appendix E.

Groundwater was not encountered during drilling operations. However, the short-term field observations generally do not permit an accurate evaluation of the subsurface water levels. Any groundwater elevation information provided is representative of conditions existing on the day and for the specific location where the information was taken. The actual groundwater elevation may fluctuate due to time, climatic conditions, and/or construction activities.

6. SUMMARY OF TEST RESULTS

The following is a summary of test results obtained from the field borings information, and laboratory tests of the representative soil samples.

6.1 Summary of Subgrade Materials Test Results

Soil classifications for the subgrade materials encountered are presented in Table 1.

Table 1. Summary of Subgrade Material Results.

Sample No.	Soil Classification	Liquid Limit	Plasticity Index	Moisture Content (%)	Material Passing (%)		
					#4	#40	#200
B1-S2	Clayey SAND (SC)	28	16	9.5	89.1	71.5	35.4
B2-S2	Clayey GRAVEL with Sand (GC)	27	16	8.9	57.3	38.1	21.4
B3-S1	Clayey SAND (SC)	26	14	10.5	96.8	88.4	38.6

6.2 Laboratory CBR Value on Subgrade

Soil classification for the subgrade material used on CBR tests is presented in Table 2.

Table 2. Soil Properties of the subgrade used in the CBR tests.

CBR No.	Soil Classification	Atterberg Limits		Moisture Content	Material Passing (%)			Soluble Sulfate Content (Avg)		Soil pH Value
		LL	PI	(%)	#4	#40	#200	PPM	%	
1	Brown, Clayey SAND with Gravel (SC)	30	16	9.5	73.7	60.9	30.4	120	0.012	9.1
2	Brown, Silty, Clayey GRAVEL with Sand (GC-GM)	18	7	8.9	60.8	50.5	24.7	120	0.012	9.3

The laboratory CBR value presented in Table 3 is based on a 95% maximum dry density (ASTM D-698) compaction level and a soaking period of 96 hours.

Table 3. Summary of CBR Results on subgrade material.

CBR No.	Sample Location	Laboratory Compacted – Soaked CBR	Maximum Dry Density (PCF)	Optimum Moisture (%)	Maximum Percent Swell Measured
1	Test Pit 1 at 31°56'36.70"N 102°12'36.31"W	5.4	117.3	12.7	0.2
2	Test Pit 2 at 31°56'34.91"N 102°12'38.45"W	2.8	118.4	11.9	0.1

The CBR and Proctor Data are shown in Appendix B.

6.3 Laboratory CBR Value on Existing Base/RAP (70/30)

Soil classification for the base materials used on CBR tests is presented in Table 4.

Table 4. Soil classification for the base used in the CBR tests.

CBR No.	Soil Classification	Liquid Limit	Plasticity Index	Moisture Content (%)	Material Passing No. 40 (%)	Material Passing No. 200 (%)	Soluble Sulfate Content (Avg.)	
							ppm	%
3 & 4	TP1: Clayey Sand with Gravel	25	8	5.8	34.8	20.3	100	0.010
	TP2: Silty Sand with Gravel	Non-Plastic		10.2	22.6	20.1	140	0.014

The laboratory CBR values presented in Table 5 are based on a 95% and 100% maximum dry density (MDD) (ASTM D-698) compaction level and a soaking period of 96 hours.

Table 5. Summary of CBR Results on Existing Base/RAP (70/30) material

CBR No.	Sample Location	Laboratory Compacted – Soaked CBR (95% MDD)	Laboratory Compacted – Soaked CBR (100% MDD)	Maximum Dry Density (PCF)	Optimum Moisture (%)
3	Existing Base with 30% RAP	15.8	23.3	123.0	10.0
4	Base From Test Pit 1 & 2	13.7	17.6	125.5	10.3

The CBR and proctor data are shown in Appendix B.

CBR test results are less consistent for materials containing a relatively high percentage of coarse aggregate (i.e., base material), during the construction phase more testing may be necessary to establish a reliable CBR for the Base/RAP material.

6.4 Laboratory Results of Existing Base

The actual gradations for the existing base material obtained from test pits are presented in Table 6.

Table 6. Summary of Base Gradation Results.

Sieve Size	Actual Cumulative Percent Passing		FAA Item P-154 Requirements	FAA Item P-209 Requirements
	TP1 Base	TP2 Base		
2"	100	100	—	100
1 ½"	100	100	100	95 – 100
1	94.5	93.1	—	70 – 95
¾"	88.9①	85.2①	70 – 100	55 – 85
3/8"	72.9	73.6	—	—
# 4	60.4①	62.4①	—	30 – 60
# 10	47.9	29.2	20 – 100	—

Sieve Size	Actual Cumulative Percent Passing		FAA Item P-154 Requirements	FAA Item P-209 Requirements
	TP1 Base	TP2 Base		
# 40	34.8①	22.6	5 – 60	10 – 30
# 200	20.3①②	20.1①②	0 – 10	0 – 5
Liquid Limit	25	Non-Plastic	25 Max	25 Max
Plasticity Index	8①②	Non-Plastic	6 Max	5 Max

① Does not meet specifications for Crushed Aggregate Base, FAA Item P-209.
② Does not meet specifications for Subbase Course, FAA Item P-154.

Base samples from Test Pit No. 1 and 2 were combined to perform the following tests. The test results are presented in Table 7.

Table 7. Properties of Base Materials.

Test Description	Test Results	FAA Item P-154 Requirements	FAA Item P-209 Specification
Flat or Elongated Particles, 5:1 Ratio (%) (ASTM D4791)	0.0	—	10 Max.
Two or More Crushed Faces (%) (ASTM D5821)	84①	—	90 Min.
Los Angeles Abrasion, A Grading (%) (ASTM C131)	31	—	45 Max.
Magnesium Soundness Based on Actual Gradation (%) (ASTM C88)	13	—	18 Max.
Clay Lumps and Friable Particles (%) (ASTM C142)	1	—	3 Max.
California Bearing Ratio (CBR) ③	23.3	20 Min	—

① Does not meet specifications for Crushed Aggregate Base, FAA Item P-209.
③ The CBR value reported above is for recycled Base (70% Base and 30% RAP) material and was based on a 100% maximum dry density (ASTM D-698) compaction level and a soaking period of 96 hours.

6.5 Summary of Existing Pavement Structure

Table 8 is a summary of the existing pavement structure and soil classification of the encountered base material:

Table 8. Summary of Existing Pavement.

Bore No.	Location	Pavement Thickness		Properties of Existing Base		
		HMAC (in)	BASE (in)	Soil Classification	LL	PI
B1	31°56'36.75"N 102°12'36.49"W	4	11	Clayey Gravel with Sand (GC)	24	10
B2	31°56'34.72"N 102°12'37.83"W	4-1/8	12	Clayey Sand with Gravel (SC)	25	11
B3	31°56'32.97"N 102°12'38.18"W	3	12	-	-	-

Base samples from boring locations were obtained by drilling method (i.e., B1, B2, & B3), drilling with an auger through the base layer might cause degradation of the coarse aggregate; therefore, gradation and plasticity test results of base samples obtained from the borings by drilling may vary from the in-place base material.

7. CONCLUSIONS AND RECOMMENDATIONS

The following conclusions and recommendations are based upon the data obtained from the field testing, borings, test pits, and laboratory testing of the soil samples, the project information provided to us by Parkhill, and experience with similar soils and site conditions.

7.1 General Pavement Recommendations

Areas containing unsuitable materials (with vegetable or organic matter) should be removed to avoid differential settlements due to the decomposition of these materials. Unsuitable materials shall be disposed to authorized areas or if approved, used for embankment slopes to support vegetation.

All undercut and grading of existing subgrade shall comply with the requirements of FAA Item P-152. The excavated areas may be refilled with suitable material obtained from the grading operations or borrow areas and compacted to a minimum of 95% of Proctor Density (Standard ASTM D-698 for aircraft with a gross weight of 60,000 pounds or less, and Modified ASTM D1557 for aircraft greater than 60,000 pounds) and the moisture content of the material during placement shall be within ±2% of the optimum moisture content.

If embankment is utilized for lower areas, it should comply with the requirements of FAA Item P-152. Compact the material to a minimum of 95% of Proctor Density (Standard ASTM D-698 for aircraft with a gross weight of 60,000 pounds or less, and Modified ASTM D1557 for aircrafts greater than 60,000 pounds) and the moisture content of the material during placement shall be within ±2% of the optimum moisture content. For non-cohesive material, the top six (6) inches of the embankment should be compacted to 100% maximum density. The material should be placed in successive horizontal layers of not less than six (6) inches nor more than 12 inches of compacted thickness, for the entire width of the cross-section. The compaction of side slopes should be parallel to the long direction of the side slopes. Pieces larger than 4 inches will not be allowed on the upper 6-inch course. The embankment should extend 5 feet from the pavement edge.

Subgrade preparation shall comply with the requirements of FAA Item P-152. Compact non-cohesive material to 100% or cohesive material to 95% of Proctor Density (Standard ASTM D-698 for aircraft with a gross weight of 60,000 pounds or less, and Modified ASTM D1557 for aircrafts greater than 60,000 pounds) and the moisture content of the material during placement shall be within ±2% of the optimum moisture content.

Two subgrade samples containing clay were analyzed for Sulfate Content and were found to be less than 3000 ppm by weight of dry soil. The *TxDOT Guidelines for Treatment of Sulfate-Rich Soils and Bases in Pavement Structures* (*) suggests that soils with sulfate levels of 3000 ppm or less pose a low potential for sulfate heave if stabilized with lime, provided that it's properly mixed with adequate moisture. If the clayey subgrade material contains a high concentration of sulfates, it will react with lime or cement and cause localized heave in the pavement. The heave can be extreme enough to cause propeller strikes or damage to the suspension of the planes. During construction, the subgrade should be periodically analyzed for sulfate content, obtaining samples every 500 feet as a minimum prior to the addition of any lime. If it is determined that the sulfate content of the soil is higher than what was determined during the geotechnical investigation, REL should be notified to re-evaluate the changed conditions. Material containing a high concentration of sulfate shall be replaced.

Subgrade material having a plasticity index (PI) exceeding 20 should be stabilized with lime slurry to a minimum depth of 10 inches. Subgrade material having a PI of 20 or less shall be stabilized using cement to a minimum depth of 10 inches. Geo-synthetics may be used for non-cohesive subgrade material.

If lime is used to stabilize the subgrade, it shall comply with the requirements of FAA Item P-155 (slurry-lime). The percentage (based on the dry weight of the soil) of lime required to stabilize the subgrade at the final elevation was not determined; however, testing should be performed during construction after cut/fill operations to determine the lime required to stabilize the final subgrade material. Compact the material to a minimum of 95% of Standard Proctor Density ASTM D-698 and the moisture content of the mixture at the start of the compaction shall not be below nor more than 2% of the optimum moisture. The lime-treated subgrade should extend at least nine (9) feet from the pavement edge.

If a subbase course is used, it shall comply with the requirements of FAA Item P-154. Compact the material to a minimum of 100% of the maximum dry density as determined by the Proctor Density (Standard ASTM D-698 for aircraft with gross weight of 60,000 pounds or less, and Modified ASTM D1557 for aircrafts greater than 60,000 pounds) and the moisture content of the material during placement shall be within ±2% of the optimum moisture content. Subbase material should extend 2 feet from the pavement edge.

If crushed aggregate base is used, it shall comply with the requirements of FAA Item P-209. Compact the material to a minimum of 100% of the maximum dry density as determined by the Proctor Density (Standard ASTM D-698 for aircraft with a gross weight of 60,000 pounds or less, and Modified ASTM D1557 for aircraft greater than 60,000 pounds) and the moisture content of the material during placement shall be within ±2% of the optimum moisture content. Base material should extend 2 feet from the pavement edge. Topsoil should be placed over the base extension to protect the base from excess water penetration and to prevent erosion.

HMAC pavement shall comply with the requirements of FAA specification Item P-401 (Plant Mix Bituminous Pavements) for 3/4" maximum nominal size aggregate (50-blow or 50-gyrations compaction for aircraft with a gross weight of less than 60,000 pounds or tire pressure of less than 100 Psi, and 75-blow or 75-gyrations compaction for aircraft of 60,000 pounds or more, or tire pressure of 100 Psi or more). Mix complying with this specification has sufficient asphalt to better resist oxidation and age hardening to which pavements receiving intermittent traffic are susceptible.

Care should be taken to slope the site to prevent water ponding around or on the pavement structure during and after construction. Once completed, the ground surface should slope away from the pavement and have enough topsoil to grow vegetative cover to prevent erosion. It should be known that the extensive use of a vibratory roller, or heavy construction equipment, might wick the groundwater through the soil and into the pavement causing pumping during construction. If this problem arises, the use of the vibratory roller, or heavy construction equipment, may need to be limited and the conditions may need to be evaluated.

It was also determined that the topsoil encountered during our investigation can be excavated using conventional earth-moving equipment (ripper, trencher, backhoe). However, if bedrock is encountered, rock hammers or possibly blasting may be required.

(*) *TxDOT Guidelines for Treatment of Sulfate-Rich Soils and Bases in Pavement Structures*

8. LIMITATIONS

This investigation was performed in accordance with accepted geotechnical engineering practices for the exclusive use of Parkhill in the preparation of the design, construction, drawings, and specifications for the proposed improvements at the Midland International Air Space Port in Midland, Texas. Verification of subsurface conditions for purposes of determining the difficulty of excavation, dewatering, trafficability, etc., is the responsibility of others specializing in those areas. Our geotechnical scope of work for this site did not include an environmental assessment or chemical testing and analysis of the property's air, water, and subsurface soils. This report is not intended for use in determining construction means and methods and may therefore be misleading if used for that purpose. In the event that any changes in the nature, design, or locations of these structures are made from those assumed herein, the conditions and recommendations contained in this report shall not be considered valid until the changes are reviewed and the conclusions are verified in writing.

LEGEND OF TERMINOLOGY

GRAVELS More than half of Coarse fraction is LARGER than No. 4 Sieve	**Clean Gravels** Little or no Fines	**GW**	Well-Graded, gravel-sand mixtures, mixtures, little or no fines
		GP	Poorly-Graded gravels, gravel-sand mixtures, little or no fines
	Gravels with Fines Appreciable Amount of fines	**GM**	Silty gravels, gravel-sand-silt mixtures
		GC	Clayey gravels, gravel-sand-clay Mixtures
SANDS More than half of Coarse fraction is SMALLER than No. 4 Sieve	**Clean Sands** Little or no Fines	**SW**	Well-Graded sands, gravely sands, little or no fines
		SP	Poorly-Graded sands, gravely sands little or no fines
	Sands with Fines Appreciable Amount of fines	**SM**	Silty sands, sand-silt mixtures
		SC	Clayey sands, sand-clay mixtures
SILTS and CLAYS Liquid Limit LESS than 50		**ML**	Inorganic silts & very fine sands, rock flour, silty or clayey fine sands or clayey silts w/slight plasticity
		CL	Inorganic clays of low to medium plasticity, gravely clays, sandy clays
		OL	Organic silts & organic silty clays of low plasticity
SILTS and CLAYS Liquid Limit GREATER than 50		**MH**	Inorganic silts, micoceous or diatomaceous fine sand or silty soils, elastic silts
		CH	Inorganic clays of high plasticity, fat clays
		OH	Organic clays of medium to high plasticity, organic silts
Highly ORGANIC Soils		**PI**	Peat & other highly organic soils

1. COORDINATION

A. PROJECT MEETINGS

Predesign Conference. Items discussed included Project scope, phasing, design, schedule, survey, unique Project elements/areas of potential concern, and utilities. Attendees included Midland International Air & Space Port (MAF) and Parkhill personnel.

Prebid Conference will be held In accordance with FAA AC 150/5300-12B, Prebid Conference will be held for Consulting Engineer, City of Midland, MAF, and FAA to go over Project details and allow contractors to ask Project-specific questions. Prebid conference will be led by City of Midland with assistance from Parkhill.

Preconstruction Meeting will be held before issuance of the Notice to Proceed (NTP) in accordance with FAA AC 150/5370-12B. At minimum, required attendees will be Director of Airports, Consulting Engineer, Resident Project Representative (RPR), Prime Contractor, and all subcontractors.

Construction Progress Meetings will be held throughout Project duration, typically at monthly intervals. At minimum, required attendees will be Airport administrative staff, Consulting Engineer, RPR, Prime Contractor and all subcontractors performing work during the current period. Construction phasing and safety will be a standing item at all construction progress meetings. Other ongoing agenda items will include:

- Project Schedule
- Safety/Security
- Project Coordination
- Construction Issues
- Submittals Review
- Request for Information (RFI) Review
- Change Orders Review
- Environmental Issues
- Quality Assurance (Test Reports)
- Record Drawings
- Pay Application Review
- General Discussion

Consulting Engineer will prepare and distribute meeting minutes for all meetings.

B. SCOPE

Project accomplished under this program includes reconstruction of existing asphalt taxiway, installation of new drainage pipe headwalls, and overall drainage improvements including concrete drainage flumes, and relocation of existing taxiway guidance sign.

Any changes in Project Scope will require a revision to the CSPP, which must be approved by MAF and FAA.

C. FAA AIR TRAFFIC CONTROL TOWER (ATCT) COORDINATION

At MAF, Contractor does not communicate directly with ATCT; therefore, coordinate all communication with MAF Operations, Consulting Engineer, and/or FAA.

2. PHASING

Refer to Phasing Plans included in Appendix A for limits of each phase.

A. BID PACKAGE (100 CALENDAR DAYS TOTAL)

- Phase 1 (60 Calendar Days): TWY A remains active during this phase. Work includes:
  - No aircraft access to hangar, apron, and taxilane.
  - Protecting existing apron pavement edge to remain.
  - Installing low-profile barricades and other safety measures as shown on details.
  - Demolishing/stockpiling existing asphalt taxiway and apron to be reused.
  - Demolishing taxiway edge lights and taxiway signage/foundation.
  - Removing/stockpiling unpaved area for TWY E construction to TWY A safety area.
  - Constructing Phase 1 pavement to top of base course including removing existing drainage pipe and extending new 42- and 27-inch drainage pipes and safety end treatments.
  - Completing grading along Phase 1 pavement limit.
- Phase 2 (30 Calendar Days): TWY A remains closed during this phase. Work to include:
  - Installing closed taxiway Xs on TWY A.
  - Installing low-profile barricades and other safety measures as shown on plan details.
  - Demolish and stockpile existing asphalt taxiway, taxiway edge lights, and taxiway signs/foundation inside TWY A safety area.

- Removing/stockpiling paved area for TWY E construction within TWY A safety area.
- Always allowing aircraft access to hangar and apron using alternate route through TWY T.
- Completing all electrical work except fixture installation.
- Preparing apron and taxiway pavement limit for constructing hot-mix asphalt course (Item P-401).
- NOTE: Contractor may start hot mix asphalt (Item P-401) operation during this phase.

- Punch List (10 Calendar Days).
- Construction Phasing Drawings may be reviewed in Appendix A.

B. PROJECT SCHEDULE

Contractor must submit a Project Schedule and Phasing Plan at/before the preconstruction meeting. Any changes made to Project Schedule or Phasing will require a revision to the CSPP, which must be approved by MAF and FAA.

3. AREAS/OPERATIONS AFFECTED BY CONSTRUCTION

Construction will be completed within these protected areas:

Table 3.1 – OPERATIONS AFFECTED BY CONSTRUCTION ACTIVITY

Taxiway	ADG	TSA Width (ft)	TOFA Width (ft)
16R-34L	C-IV	500	800
TWY A	3	118	171

4. NAVIGATION AID (NAVAID) PROTECTION

A. NAVAIDS IN CLOSE PROXIMITY TO WORK AREA

No NAVAIDs are near work area; therefore, no physical impact to any NAVAIDs is anticipated.

5. CONTRACTOR ACCESS

A. GENERAL

MAF to provide Airport visitor/contractor access procedures.

B. AIRPORT OPERATIONS AREA (AOA)

Airport Operations Area (AOA) is defined as any portion of Airport property normally secured against unauthorized entry. AOA includes all areas specifically reserved for operations of aircraft, aircraft support equipment, and personnel. Generally, AOA is defined by the Airport's outer security fencing and any building forming part of secured perimeter. When necessary to cross pavement surface on airfield, Contractor shall inspect all paved surfaces for Foreign Object Debris (FOD) daily and before reopening pavement surface to air traffic. Final inspection shall be by MAF. Contractor shall not leave opening in secure fence at any time.

C. CONTRACTOR'S ENTRANCE GATE

Adjacent to Contractor's entrance gate and outside AOA, Contractor shall provide a parking area for Contractor employees' personal automobiles. Engineer directs limits of parking/storage area. At Project completion, any damage done by Contractor to this area shall be repaired to Engineer

satisfaction at no additional cost to Owner. Repairs shall include but not be limited to regrading, reseeding, or repaving damaged areas.

D. CONTRACTOR'S PLANT SITE, STORAGE, AND OFFICE AREA

Contractor will be held completely responsible for any damage or deterioration in areas allowed for Contractor use. Contractor is also responsible for maintenance and dust control for project duration.

Direct negotiation may be conducted with the Director of Airports for any areas desired. Areas used by the Contractor may be subject to rental rates and fees as dust control for project duration.

Contractor shall completely restore, at own expense, areas Contractor and forces occupy including but not limited to regarding disturbed areas, complete removal of debris or any other material Contractor brings onto site, as well as complete replacement of topsoil, turf, asphalt pavement, concrete slabs or drives, etc. worn, deteriorated, or damaged while Contractor and forces occupied the area. All restoration shall be to the Director of Airport's satisfaction.

Prior to moving into an unpaved area, Contractor shall clear and grub as well as remove and stockpile a 6-inch minimum of existing topsoil. After Project completion and clearing site of materials, equipment, and debris, Contractor shall replace, spread, and grade salvaged topsoil followed by seeding and fertilizing.

All restoration activities shall be accomplished in accordance with applicable Technical Specifications.

No direct payment will be made to the Contractor for prepping or restoring plant site haul routes, storage, or office areas.

For all projects with an onsite concrete or hot-mix asphalt batch plant as well as those involving pug-mill produced material, a concrete or asphalt paved material stockpile area is required. Stockpile all materials to incorporate into concrete, hot-mix, cement-treated base (CTB), or other similar material on a specially prepared concrete or asphalt pad so stockpile contamination does not occur. Stockpile area shall be restored to pre-Project conditions.

E. VEHICLE ESCORT

All vehicles responsible to Contractor entering the AOA such as supplier vehicles, shall be escorted by an approved Contractor escort vehicle from point of AOA entry to construction site. The escort vehicle shall be clearly identified with standard FAA specified markings/flags and marked with Contractor name.

To facilitate safe movement of escort vehicle and escorted vehicles, driver of escort vehicle shall be approved for, issued, and display an MAF Operations security badge. Further, escort vehicle driver shall be familiar with MAF security and safety procedures. When required to cross active airfield runways, taxiways, or aprons, an MAF escort will be required.

F. TWO-WAY RADIO COMMUNICATIONS

MAF does not permit Contractor from contacting ATCT; therefore, Contractor will not be required to have two-way radios. Communication will be through MAF Operations staff.

G. CONTRACTOR'S SAFETY PLAN (CSP)

Contractor shall submit a Contractor's Safety Plan (CSP) as part of the submittal process before starting construction that must always be followed. MAF reserves the right to have Contractor amend CSP any time if concerns arise.

6. WILDLIFE MANAGEMENT

A. TRASH

Contractor must dispose all trash in a covered trash can or other method, not allowing trash to become a hazard or animal attractant.

B. STANDING WATER

Contractor shall minimize standing water.

C. TALL GRASS AND SEEDS

Contractor must maintain construction area grass to height required by MAF.

D. POORLY MAINTAINED FENCING AND GATES

Contractor shall maintain any fencing or gates in good condition, proper working order, and gap under fence or gate shall not exceed 3 inches.

E. DISRUPTION OF EXISTING WILDLIFE HABITAT

In event of wildlife habitat, Contractor will notify MAF and Engineer immediately.

7. FOREIGN OBJECT DEBRIS (FOD) MANAGEMENT

Contractor shall train and emphasize to construction site employees the need for continuous Foreign Object Debris (FOD) checks on or near active airfield pavement.

Contractor must conduct FOD checks before and after each construction shift at a minimum and monitor nearby active pavements throughout construction shift.

8. HAZARDOUS MATERIALS (HAZMAT) MANAGEMENT

Hazardous materials will be handled and stored per latest revision to FAA Advisory Circular 150/5370-2G - Operational Safety on Airports during Construction. Contractor must be prepared to immediately contain and clean spills resulting from fuel, oil, petroleum products, or hydraulic fluid leaks. Transportation and handling of other hazardous materials on the Airport requires additional special procedures as addressed in latest revisions to FAA Advisory Circular 150/5320-15 - Management of Airport Industrial Waste. All spills must be immediately reported to MAF at 432.560.2200 x3010.

9. CONSTRUCTION ACTIVITY NOTIFICATIONS

B. NOTICES TO AIRMEN (NOTAM)

- During airport emergencies, all ARFF vehicles always have the immediate right-of-way and may traverse any and all known roadways throughout airfield. Contractor, subcontractors, and suppliers shall immediately yield right-of-way to all Airport ARFF personnel and equipment.
- Owner and Engineer shall be notified in writing at least 72 hours in advance if water lines or fire hydrants are out of service. 72-hour advance notification shall also be provided prior to performing any work that may close or affect an emergency rescue and firefighting route.
- MAF Administration/Operations will communicate with MAF ARFF as needed to ensure MAF ARFF remain aware of construction activities.

C. EMERGENCY NOTIFICATION PROCEDURES

In case of emergency, Contractor shall immediately call 911 first then MAF Operations, then Engineer.

D. FAA NOTIFICATION

Contractor will notify Consulting Engineer and MAF 72 hours in advance of any workaround NAVAIDs or shutdowns affecting NAVAIDs owned by FAA. Contractor shall notify NAVAIDs owned by a separate party 72 hours in advance of any work around or shutdowns of NAVAIDs.

10. INSPECTION REQUIREMENTS

A. DAILY INSPECTIONS

Contractor shall perform daily safety, security, and phasing inspections to ensure CSPP compliance. Document inspections in Contractor's Daily Logs/Quality Control Logs.

Contractor is required to submit a Quality Control Plan (QCP) for Owner or designated representative review before any construction. QCP will address specific requirements for inspection of individual specification/pay items including test method, sampling point, testing frequency for each item, and proposed remediation action for each item if it does not meet Specification requirements. QCP will also provide direction on developing inspection reports and what to include. QCP will likely be developed in whole or in conjunction with selected Quality Control firm. QCP shall include and address Construction Management Plan (CMP) requirement.

B. FINAL INSPECTIONS

MAF will perform final safety inspection before opening any airfield pavement to aircraft.

11. UNDERGROUND UTILITIES

Contractor shall locate, mark, and protect all utilities and infrastructure during construction. Location of utilities shall include notification of Texas One Call system, as well as coordination with MAF.

12. PENALTIES

Contractor pays all penalty fines associated with any safety violation.

13. SPECIAL CONDITIONS

A. FAA FORM 7460-1

- Consulting Engineer will prepare and submit FAA Form 7460-1 for Project scope and proposed Construction Safety and Phasing Plan (CSPP).
- Contractor shall submit Form 7460-1 on all equipment over 20 feet high.
- A blank Form 7460-1 - Notice of Proposed Construction or Alteration, is included in Appendix D. Contractor shall submit supplemental FAA Form 7460-1 to FAA at least 45 days prior to utilization of equipment in excess of 20 feet in height.

B. ONSITE BURNING AND BLASTING

Onsite burning and blasting are prohibited.

C. GUN PROHIBITION ON AIRPORT PROPERTY

No firearms or guns are allowed on MAF property.

14. RUNWAY AND TAXIWAY VISUAL AIDS

Airport marking, lighting, signs, and visual NAVAIDs must be clearly visible to pilots, not misleading, confusing, or deceptive. All must be secured in place to prevent movement by prop wash, jet blast, wing vortices, or other wind currents and constructed of materials to minimize damage to an aircraft in the event of inadvertent contact.

Lighting, signs, and NAVAIDs located within object-free area must be frangible.

15. MARKING AND SIGNS

A. ACCESS ROUTE

Contractor required to mark access routes and haul routes with lathes and flag tape.

B. APPROVED WORK AREAS

Contractor must mark approved work areas with lathes and flag tape to ensure construction personnel and equipment remain in approved areas.

16. HAZARD MARKING AND LIGHTING

A. EQUIPMENT

- Contractor vehicles shall be clearly identified with Contractor name, standard FAA marking, lighting, and/or flags. Rotating amber beacons are required for all nighttime work.
- Contractor shall submit 7460s on all equipment over 20 feet in height.
- Any request to use nighttime lighting will be provided in writing two weeks prior to requested start time, from Contractor to Engineer and MAF for approval.

B. WORK AREAS

- Contractor shall provide temporary, low-profile barricades to delineate safe operating areas for aircrafts.
- Barricades shall have flashing red lights.
- Contractor must inspect lights each evening and immediately replace any lights not operating correctly.
- Contractor will be fined for non-working lights as indicated in Project Specifications.
- Line perimeter construction area with low-profile aviation barricades spaced at 5 feet.

17. WORK ZONE LIGHTING FOR NIGHT CONSTRUCTION

If accomplishing work at night, Contractor-provided lighting equipment must adequately illuminate work area. Present a Lighting Plan to MAF, Engineer, and FAA at least 28 days before commencing nighttime construction activities. Requirement for Lighting Plan are stated in Section 3.22 of FAA AC 150/5370-2G.

18. PROTECTION

A. RUNWAY SAFETY AREA (RSA)

No construction or material stockpile shall occur within an active RSA. Contractor shall mark out RSA before construction. RSA is 500 feet wide and extends 1,000 feet beyond runway end for RWYs 16R-34L and 10-28. RSA is 150 feet wide and extends 300 feet beyond runway end for RWY 16L-34R. RSA is 120 feet wide and extends 240 feet beyond runway end for RWY 4-22.

B. RUNWAY OBJECT FREE AREA (ROFA)

No material stockpile will occur within an active ROFA. ROFA is 800 feet wide and 1,000 feet beyond runway end for RWYs 16R-34L and 10 28. ROFA is 500 feet wide and 300 feet beyond runway end for RWY 16L-34R. ROFA is 400 feet wide and 240 feet beyond runway end for RWY 4-22.

C. TAXIWAY SAFETY AREA (TSA)

No construction or material stockpile shall occur within an active TSA. TSA is 118 feet wide.

D. TAXIWAY OBJECT FREE AREA (TOFA)

No material stockpile shall occur within an active TOFA. TOFA is 171 feet wide.

E. OBSTACLE FREE ZONE (OFZ)

No construction activity or material stockpile will penetrate OFZ.

F. RUNWAY APPROACH/DEPARTURE SURFACES

No construction activities will penetrate approach/departure surfaces.

G. OPEN TRENCHES

Open trenches are not permitted within RSA of an open runway or TSA of an open taxiway. Contractor shall prominently mark any open trench or excavation at construction site with lighted barricades.

H. SAFETY INFORMATION

Refer to Appendix B - Safety Details, for safety information.

I. JET BLAST

Contractor shall take precautions to minimize effects of jet blast, particularly in areas near runway threshold.

J. ELECTRICAL LOCK OUT/TAG OUT REQUIREMENTS

Contractor shall prepare lockout/tag out plan and communicate procedures to all staff.

K. UNUSED RUNWAY

Where shown on Construction/Safety Plan, Contractor shall denote unusable runway pavement using low-profile aviation barricades. Refer to Plans for details.

19. OTHER CONSTRUCTION LIMITATIONS

A. PROHIBITIONS

- No use of tall equipment over 20 feet unless a 7460-1 determination letter is issued for such equipment.
- No use of open-flame welding or torches.
- No use of electrical blasting caps.
- No use of flare pots.

B. RESTRICTIONS

- Any construction suspension required during specific airport operations will be coordinated by Engineer, Owner, and Contractor during construction.
- Areas that cannot be worked on simultaneously will be coordinated by Engineer, Owner, and Contractor during construction.
- Refer to Article 16 – Hazard Marking and Lighting, for night construction requirements.
- Seasonal construction restrictions will be coordinated by Engineer, Owner, and Contractor during construction.

A. INTRODUCTION

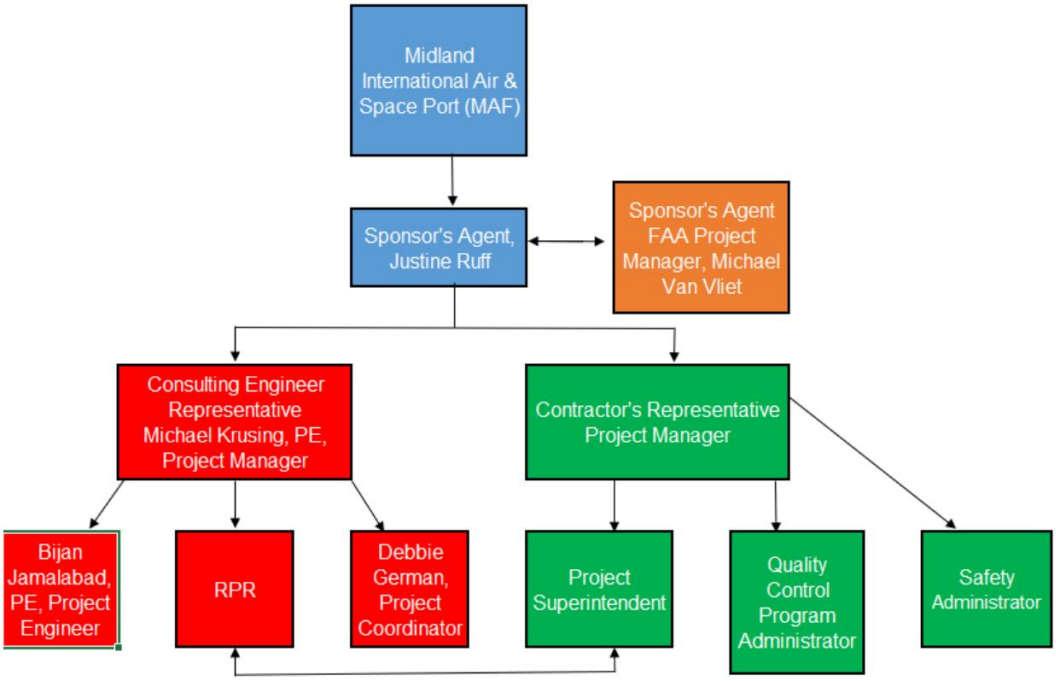
The Project accomplished under this program consists of reconstruction of Taxiway E, reconstruction of apron, and drainage improvements at the Midland International Air & Space Port (MAF).

B. PERSONNEL AND RESPONSIBILITIES

- Sponsor

  Ms. Justine Ruff, Director of Airports
  City of Midland
  PO Box 60305
  Midland Texas 79711
  432.560.2200 x3010
  jruff@midlandtexas.gov

  Federal Aviation Administration
  Michael Van Vliet, Project Manager
  FAA ADO- Southwest Region
  Texas Airports Development Office ASW-650
  10101 Hillwood Parkway
  Fort Worth Texas 76177
  817.222.5132
  Michael.e.van.vliet@faa.gov



- Consulting Engineer and Staff

  Michael Krusing, PE, Project Manager
  Parkhill
  4222 85th Street
  Lubbock Texas 79423
  806.473.3671
  mkrusing@Parkhill.com

  Bijan Jamalabad, PE, Project Engineer
  Parkhill
  11902 Burnet Road
  Austin Texas 78758
  512.676.2112
  bjamalabad@Parkhill.com

  Debbie German, Project Coordinator
  Parkhill
  4222 85th Street
  Lubbock Texas 79423
  806.473.3615
  dagerman@Parkhill.com

- Project Manager/Engineer will oversee construction phase services. Parkhill will also provide one, full-time Resident Project Representative (RPR) during Project construction. A second RPR will be provided if needed. RPR duties, responsibilities, and limitations of authority are described in the Professional Engineering Services Agreement. RPR will report directly to Parkhill Project Manager. Parkhill will compile a copy of all test reports to be delivered to TxDOT Aviation. Key personnel and chain of communication are described here:

- Contractor (Updated upon award)
  Firm: _____
  Address: _____
  Phone: _____
  Contact Name, Title: _____
  City State Zip: _____
  Email: _____
- Testing Lab(s) (TBD)
  - Sponsor's Quality Assurance Testing Lab
    [Testing Lab]
    [Contact Name, Title]
    [Address]
    [City State Zip]
    [Phone]
    [Email]
  - Contractor's Quality Control Testing Lab (TBD)
    [Testing Lab]
    [Contact Name, Title]
    [Address]
    [City State Zip]
    [Phone]
    [Email]

As required, Sponsor's Quality Assurance (QA) testing laboratory and Contractor's Quality Control (QC) testing laboratory must be certified according to ASTM D3666 and C1077. Laboratory certificates may be found in Appendix B. Sponsor's QA laboratory is responsible for reporting all construction period and material-compliant test results to Contractor, Sponsor, FAA, and Engineer. Contractor's QC laboratory is responsible for testing and reporting quality control test reports and periodic inspections to ensure quality of material required by Project Technical Specifications.

C. INSPECTION PROCEDURES AND FREQUENCIES

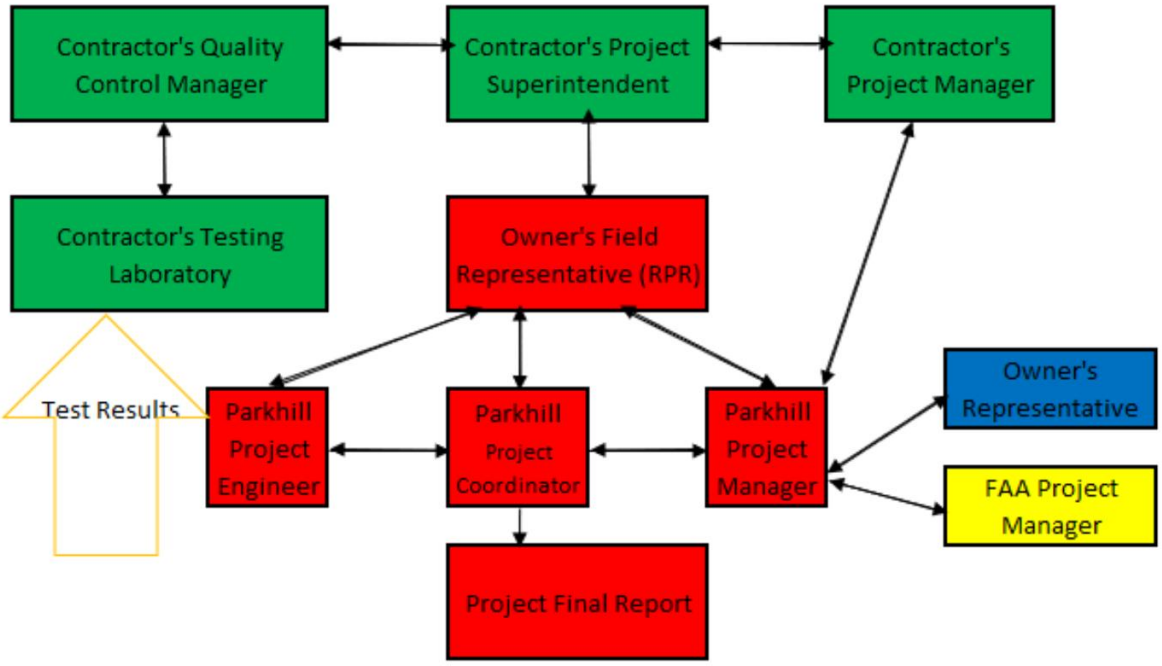
1. SURVEYING AND GRADE CONTROL.

- Engineer provides grade control as part of Construction Documents. Contractor is responsible for verifying control network at Project onset to confirm agreement. All construction staking is Contractor responsibility and Contractor is required to immediately report any deviations. As required by Technical Specifications, Contractor must employ a Texas licensed RPLS to verify field condition of various construction items. Provide all survey notes and measure to Engineer for verification of compliance with Project design. Engineer may employ a Texas-licensed RPLS to perform periodic verification of Contractor work, where applicable. This will include isolated spot checks only. Any discrepancies found will result in an immediate coordination meeting between Engineer and Contractor.

2. BY CONTRACTOR.

- Contractor is required to execute daily inspections on work performed and to be performed. All inspection notes shall be captured in Contractor's daily log, submitted as required. Contractor must also perform certain QC testing, where applicable. Testing shall be performed by Contractor's lab and all test reports made available to Engineer daily. Frequencies are defined in Project Specifications and Article E – Quality Control Testing (by Contractor). Contractor will detail QC testing further in their QC Program required by FAA Item C-100 – Contractor Quality Control Program.

3. BY CONSULTING ENGINEER.

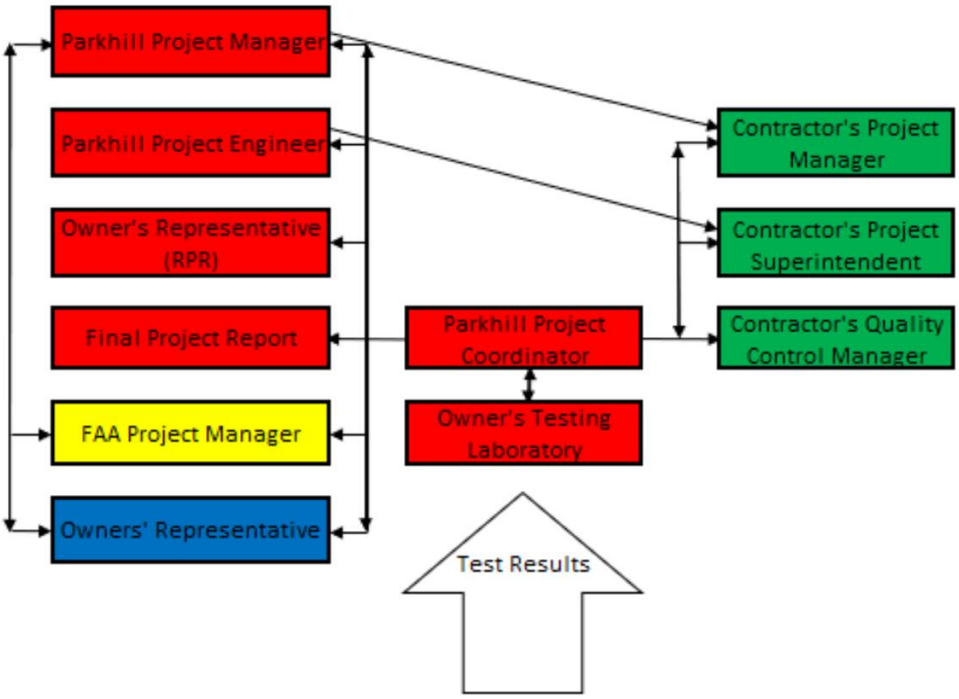


- Observation Procedures: RPR will be onsite full-time daily throughout Project duration. As per Agreement for Professional Services, RPR will check for "general conformance to plans and specifications." RPR will not "inspect" every detail of Contractor's Project nor direct Contractor operations. RPR will observe, document findings, and bring any concerns to Parkhill project manager. RPR will also coordinate Owner's QA testing laboratory. Tests will be performed as required by Technical Specifications and as stated in Article F – Acceptance Testing (by Owner's Representative). RPR will also monitor daily activity to confirm Contractor performs required QC testing. Observation notes will be captured in Procore.
- Daily Reporting/Diary: RPR will maintain daily logs [in Procore] for activity, progress, concerns, communication, testing, and other activity related to construction. Submit logs to Sponsor and FAA as part of Project Final Report, if applicable. RPR will also collect photos for reference where appropriate. Include all photos in Procore and transmit as part of the Project Final Report.
- Weekly Reporting: As required by FAA, Parkhill will prepare and submit weekly Construction Progress Reports by email and upload into FAA submission entry with electronic copies to Sponsor.

D. SUBMITTAL PROCESS

- Contractor must prepare and submit a complete submittal list at Preconstruction Meeting to populate into Procore and maintain throughout Project duration. Engineer will also maintain a record of submittal status in Procore. All submittals shall address "Buy American" and FAA-approved source requirements by having Contractor submit a written certification statement indicating requirements are met.
- A preliminary list of submittals may be found in Appendix C. This list was prepared to assist Contractor and does not permit Contractor to omit a submittal if not included on list.
- All submittals will be routed through Procore for review and approval.

E. QUALITY CONTROL TESTING (BY CONTRACTOR)



- Contractor must visually inspect all items used upon arrival and maintain control charts for applicable material production. Contractor shall perform and document all daily inspections and tests as determined in the Technical Specifications, FAA Item C-100 – Contractor Quality Control Program. Contractor shall make QC reports, test results, and inspection reports available to Engineer. Provide test results before start of the following day. Provide inspection reports on workday after day of record. All items of material and equipment are subject to Engineer surveillance. If Contractor determines to be noncompliant regarding any requirements of QC Program, Engineer may expect Contractor to:
  - replace ineffective or unqualified quality control personnel or subcontractors; or
  - stop operations until appropriate corrective action is taken.
- For a list of anticipated QC Tests, see Appendix D, Table 2 - Quality Control Testing (By Contractor). Test values are included in Project Specifications.
- Quality Control Testing Responsibility

- Summary of Action: If/when deficiencies arise during construction, instigate immediate communication as indicated. Action includes but not limited to:
  - Discussion of test results and potential implications.
  - Retest by Contractor to verify results.
  - If retest confirms deficiency, Contractor shall rework deficiency or potentially replace material depending on deficiency.
  - Reworked area or replaced material tested by Contractor's laboratory.
  - Contractor shall develop a plan for avoiding same deficiency on future segments of work.
  - Other specific courses of action defined in Contractor's QC Plan.

F. ACCEPTANCE TESTING (BY OWNER'S REPRESENTATIVE)

- For Testing Methods, see Appendix E, Table 3 - Quality Assurance (by Engineer).
- Quality Assurance Testing Responsibility:

G. PAY FACTORS

Pay Factors will be calculated on a per lot basis for construction of P-401. Basis of payment may be found in Technical Specifications.

H. TEST RESULTS AND DOCUMENTATION

- Daily Quality Control (QC) Tests: Contractor must document all QC test results performed on Project. Submit test results to RPR for review the day after testing is performed. If results are deficient, RPR will initiate dialogue with Contractor's Superintendent. If results are favorable, RPR will forward results to Parkhill Project Assistant to be compiled for Project Final Report.
- Daily Quality Acceptance (QA) Tests: RPR will coordinate testing with Owner's Laboratory. RPR will also document all test results at point of testing, using this data to reconcile test reports received from Owner's Testing Laboratory. RPR will also note tests performed in Procore. Deficient test results will be immediately communicated to Contractor's Project Superintendent.
- Failing Tests:
  - QC Testing: Whether passing or failing, RPR will obtain a copy of all QC test results performed by Contractor. Deficient results will result in immediate communication between Contractor and Engineer and subsequent action determined. Corresponding retests will be taken and documented.
  - QA Testing: RPR will document all test results as point test is performed by Owner's Testing Laboratory. Deficient results will result in immediate communication between Contractor and Engineer and an action plan for remediation developed. Retest results will be documented and all charges for failing tests invoiced to Contractor.

I. FINAL TEST AND QUALITY CONTROL REPORT

As part of the Project Final Report, Engineer, Contractor, and Owner's Testing Laboratory will coordinate preparation of a Final Test and Quality Control Report. Report will summarize number of tests performed versus number of tests required for each specification item. Failed tests and subsequent retests will be included. Where necessary, document acceptance of specification deficiencies.

APPENDIX A: CONSULTING ENGINEER STAFF RESUMES

Bijan Jamalabad, PE

Civil Engineer

Bijan Jamalabad joined Parkhill after spending 25 years with TxDOT Aviation Division. He led more than 275 General Aviation projects as the Director of Engineering and Project Management while at TxDOT Aviation in the last seven years. Bijan has over 32 years of aviation engineering and project management experience overseeing aviation project activities from planning and development phase through construction and a successful completion. He has extensive experience with airfield paving design, pavement maintenance and rehabilitation strategies, drainage, grading, airport lighting, NAVAIDs, construction, and project administration. Bijan has an extensive knowledge of airport transportation planning and development principles and practices. He has a thorough knowledge of TxDOT and FAA policies and standards, budget and compliance requirements.

- TxDOT Seymour Municipal Airport 2018
- TxDOT Stanton Airport Pavement Rehab Lighting
- TxDOT Sugar Land MP - Sub to RAWA
- TxDOT Winkler County Airport Pavement Improvements
- Winkler County Airport Hangars

Michael Krusing, PE

Civil Engineer | Associate

Michael Krusing, PE, is an Associate and Team Leader for Parkhill's Aviation Sector. After joining Parkhill in 2007, Michael worked with the infrastructure team in Amarillo, until 2010, when he joined Parkhill's Aviation team. In November 2014, Michael transferred from Parkhill's Amarillo office to the Lubbock office to better serve Parkhill's clients. Michael has gained experience by designing multiple projects for TxDOT Aviation and New Mexico Department of Transportation. He has also worked on projects benefiting Lubbock Preston Smith International Airport, Midland International Airport, and El Paso International Airport. Michael played a vital role in the designs of two projects that won Most Improved Airport in 2015 (Hemphill County) and 2017 (Hale County).

Lanell Pahe

Engineering Technician

Lanell Pahe is a member of Parkhill's Aviation Sector. Her design experience includes pavement design, FAAR field pavement evaluation, airfield site layout, marking and electrical layouts, pavement rehabilitation, drainage, site grading, Stormwater Pollution Prevention Plan (SWPPP), and Construction Safety and Phasing Plan Layout. Lanell has worked on multiple TxDOT Aviation Projects and Part 139 airports. She uses Civil 3D 2019, Aeroturn and G.I.S. for design and project cost estimating.

Tyler Scheller

Civil Engineering Technologist

Tyler Scheller of Parkhill's Aviation Sector brings CADD Technician/Drafter expertise to the team. Tyler's mechanical design background transitions seamlessly into the aviation field with a specific focus on Civil 3D drawings. He studies project specifications and creates drawings to meet Parkhill standards. Tyler's attention to detail and technical acumen ensure each drawing is accurate and aligns with project requirements.

Tyler is highly skilled and results-driven with a diverse background in project management, drafting, and design. With a keen eye for detail and a passion for excellence, he has overseen and documented numerous successful projects throughout his career. Tyler is known for his commitment to client satisfaction and ability to build strong relationships. He has successfully collaborated with customers on contracts, bids, and specifications, ensuring needs are met and change orders seamlessly managed. With a strong work ethic, exceptional attention to detail, and drive for continuous improvement, Tyler is dedicated to delivering high-quality work, exceeding client expectations, and contributing to the success of every project he undertakes.

Rodrigo Vela, EIT

Civil Engineer-in-Training

Rodrigo Vela is an engineer-in-training in Parkhill's Aviation Sector. Rodrigo joined Parkhill in 2013 as an intern in the Aviation Sector and was employed full-time as an engineer-in-training in 2015. Rodrigo has excelled in aviation planning and design, airfield drainage design, airport marking layout planning and design, and electrical lighting planning and design. He has a proven ability to work and communicate effectively with all personnel directly or indirectly involved in all projects. That dedication and his drive for design excellence have made him an asset to Parkhill.

APPENDIX B: LABORATORY CERTIFICATION
(Available upon request)

APPENDIX C: SUBMITTAL PROCESS SUMMARY

Table 1: SUMMARY OF SUBMITTALS									
Specification	**Spec Section**	**Submitted By**	**Material**	**Test Standard**	**Test Required**	**Sampling Locations**	**Minimum Test Frequency**	**Requirements**	**Notes**
C-100, Contracotr Quality Control Program	100-1	C					1/Project		Contractor shall establish a CQCP
C-102, Temporary Air and Water Pollution, Soil Erosion, and Siltation Control	102-1	C					1 / Project		Contractor to prepare SWPPP and NOI, submit copies to Engineer/Owner.
P-101, Surface Preparation	101-2	C					1/Project		Contractor to submit equipment and material list for Engineer's approval
	101-3.2	C	Emusified asphalt and Aggregate for cracks		Gradation	Source	1 / Project	Gradation table	<3% Cement; <20% natural sand
P-152, Excavation, Subgrade, and Embankment	None	C							
P-154 Subbase Course	154-2.1	C	Subbase	ASTM D1883	California Bearing Ration (CBR)	Source	1 / Project	A CBR value of at least 20	
	154-2.1	C	Subbase		Gradation	Source	1 / Project	Gradation Table	
	154-2.1	C	Subbase	ASTM D4318	Liquid Limit	Source	1 / Project	Material passing No. 40 sieve shall have a liquid limit not more than 25	
	154-2.1	C	Subbase	ASTM D4318	Plasticity Index	Source	1 / Project	Material passing No. 40 sieve shall have a plasticity index not more than 6	
	154-2.2a	C	Subbase	ASTM D75		Source		Verify Meets Specifications	
P-209, Crushed Aggregate Base Course	209-2.1	C	Coarse Aggregate	ASTM C88	Soundness	Source	1 / Project	Sodium Sulfate loss <12% or Magnesium Sulfate loss <18% after 5 cycles.	
	209-2.1	C	Coarse Aggregate	ASTM C131	Percentage of Wear	Source	1 / Project	% Wear of Crushed Aggregate Retained on No. 4 Sieve <40%.	
	209-2.1		Coarse Aggregate	ASTM D4791	Flat, elongated, and flat and elongated particles	Source	1/project	<5% by weight	
			Coarse Aggregate	ASTM D5821	Fractured Faces	Source	1/project	>90% by weight having 2 or more fractured faces and 100% by weight having at least 1 fractured face. Area of each face at least 75% of the smallest mid-sectional area of the piece. When 2 fractured faces are contiguous the angle between the fractures shall be at least 30 degrees.	Achieved by crushing.
	209-2.2	C	Aggregate	ASTM C117 and C136	Sieve Analysis	Source	1 / Project	Gradation table and the fraction of material passing #200 sieve shall not exceed one=half the fraction passing the # 40 sieve.	
	209-202		Aggregate	ASTM D422	Particle-Size Analysis	Source	1/Project		

Table 1: SUMMARY OF SUBMITTALS

Specification	Spec Section	Submitted By	Material	Test Standard	Test Required	Sampling Locations	Minimum Test Frequency	Requirements	Notes
Item 401, Hot Mix Asphalt (HMA) Pavements	401-2.1	C	Aggregate	Ferrous Sulfides/Iron Oxides	Lime Slurry	Source	1/project	No Brown Gelatinous Precipitate	
	401-2.1.a	C	Course Aggregate	ASTM C131	Percent of Wear	Source	1/project	<40%	
				ASTM C88	Sodium Sulfate Soundness Loss	Source	1/project	<12% or <18% after 5 cycles	
					Fractured Faces	Source	1/project	>75% by weight having 2 or more fractured faces and >85% by weight having at least 1 fractured face.	Achieved by crushing.
				ASTM D4791	Flat, elongated, and flat and elongated particles	Source	1/project	<8% by weight	
	401-2.1.b	C	Fine Aggregate	ASTM D4318	Plasticity Index (PI) and Liquid Limit (LL)	Source	1/project	PI < 6 LL < 25	
				ASTM C88	Soundness Loss (after 5 cycles)	Source	1/project	<10% (for sodium sulfate) or <15% (for magnesium sulfate)	
				ASTM C142	Clay lumps and friable particles	Source	1/project	<1% by weight	
			Natural Sand (if used)	ASTM D1073	Standard spec for fine aggregate (Grading, fineness modulus, and PI)	Source	1/project	Must meet requirements of ASTM D1073	Applies if natural sand is used.
			Natural Sand (if used)	ASTM D4318	Plasticity Index (PI) and Liquid Limit (LL)	Source	1/project	PI < 6 LL < 25	Applies if natural sand is used.
	401-2.2	C	Mineral Filler (if used)	ASTM D242	Standard spec for Mineral Filler	Source	1/project	Must meet requirements of ASTM D242	If filler, in addition to that naturally present in aggregate, is necessary, this applies.
	401-2.3	C	Asphalt Cement Binder	ASTMD6373	Standard Spec for Asphalt Cement Binder	Source	1/project	Munst meet requirements of ASTM D6373 for PG 64-28	Include manufacturer Certificate of Compliance in mix design. Supplier's certified test report provided to engineer for each load delivery to mix plant. If binder modified after delivery to mix plant, provide engineer with certified test report indicating grade certification.
	401-2.5	C	Anti-Stripping Agent or Additive	Shall be heat stable, not change the asphalt cement viscosity beyond specifications, contain no harmful ingredients, be added in recommended proportion by approved method, and APPROVED BY STATE DEPARTMENT OF					Applies if anti-stripping agent or additive required.
	401-3.2	C	HMA Job Mix Formula (JMF)	Designed Using: Asphalt Instutitue's MS-2 Mix Design Manual, 7th edition	JMF	Plant	1 per JMF used	Submitted > 30 days prior to start of paving operations.	
				ASTM D4867	Tensile Strength Ratio	Plant	1 per JMF used	>75 when tested at 70-80% saturation	If TSR <75, use anti stripping agent to achieve >75.
				JMF to include, as minimum:					
				a. Total combined aggregate gradation, individual gradation of all aggregate stockpiles, and percent by weight of each stockpile used in the JMF					
				b. Percent of Asphalt Cement					
				c. Asphatl performance grade and type of modifier (if used)					
				d. Number of gyrations					
				e. Laboratory mixing temperature					
				f. Laboratory compaction temperature					
				g. Temperature-viscosity o fthe PG binder showing acceptable range of mixing and compation temperatures (for modified binders include supplier recommended mixing and compaction temperatures)					
				h. Plot of the combined gradation on a 0.45 power gradation curve.					
				i.Graphical plots of air voids, VMA, and unit weight versus asphalt content.					
				j. Specific gravity and absorption of each aggregate					
				k. Percent natural sand (if used)					
				l. Percent fractured faces					
				m. Percent by weight of flat particles, elongated particles, and flat and elongated particles					
				n. Tensile Strength Ratio (TSR)					
				o. Anti-strip agent (if required)					
				p. Date JMF was developed (must not be from prior construction season and less than 90 days prior to production).					
				q. Percentage and properties of RAP, if used (asphalt content, binder properties, and aggregate properties).					
				Contractor shall submit result of verification testing of 3 samples prepared at optimum asphalt content. The average of these results will indicate conformance with the JMF requirements of Tables 1 and 3.					
				Table 1: Gyratory Design Criteria (75 gyrations)					
				Target Air Voids = 3.5%					
				VMA minimum = 15%					

Table 1: SUMMARY OF SUBMITTALS

Specification	Spec Section	Submitted By	Material	Test Standard	Test Required	Sampling Locations	Minimum Test Frequency	Requirements	Notes
				Gradation meeting Table 3 Gradation					
			HMA	Gyratory Design Using 75 Gyrations	Target Air Voids	Plant HMA Samples	3 per JMF	3.50%	
					Voids in Mineral Aggregate (VMA)	Plant HMA Samples	3 per JMF	15% (minimum)	
			HMA	ASTM D6307 or ASTM D2172	Asphalt Content	Plant HMA Samples	3 per JMF	5.0-7.5% (Stone or Gravel); 6.5-9.5% (Slag)	Use ASTM D2172 if correction factor in ASTM D6307 is >1.0.
			HMA	ASTM C136 and ASTM C117	Gradation	Plant HMA Samples	3 per JMF	Table 3	
	401-3.3	C	Recycled Asphalt Pavement (RAP)	RAP may only be used in Shoulder and base course design. RAP shall not be used in surface course. Max RAP allowed is 30%, other restrictions and requirements apply, see spec section.					
	401-4.11	C	Laydown Plan: Contractor shall submit a laydown plan prior to placement of HMA						Should be designed to minimize cold joints in pavement.
	401-6.1	C	Contractor Quality Control Plan: Contractor shall not be allowed to place test section until Contractor Quality Control Program has been approved. (401-3.5)						See section 401-6.1 for minimum plan elements.
P-602, Bituminous Prime Coat		C	Asphalt	ASTM D977, D2397, D2027 or D2028	Asphalt Type	Source	1 / Project	Conforms to test method.	
	602-2.1	C	Bituminous Material	ASTM D3628	Selection and Use of Emulsified Asphalts	Source	1 / Project		
	602-2.2	C	Herbicide			Source	Project	Herbicide Product	
P-603, Bituminous Tack Coat	603-2.1	C	Bituminous Material	(ASTM D3628) ASTM D977, D2028 or D2397	Selection and Use of Emulsified Asphalts	Source	1 / Project	Conforms to test method.	
P-608-R, Rapid Cure Seal Coat	608-R-2.1	C	Aggregate				1/Project	Manufacturer's Technical Data	
	608-R-2.2	C	Asphalt				1/Project	List of Airport pavement projects where product has been succesffully applied within at least 65 years of the project	
P-610, Structural Portland Cement Concrete	610-2.1.a.1	C	Fine and Coarse Aggregate	ASTM C1260	Alkali Reactivity of Aggregates	Source	1 / Coarse Aggregate; 1 / Fine Aggregate	<.1% at 28 days	
	610-2.1.a.2-3	C	Fine and Coarse Aggregate	ASTM C1567	Alkali Reactivity of Aggregates	Source	1 / Project	<.1% at 28 days	Combine Fine and Coarse Aggregate.
	610-2.2 and 610-2.2.1	C	Coarse Aggregate	ASTM C666	Freeze/Thaw Test	Lab/Source	1 / Project	Durability factor ≥ 95.	
	610-2.2 and 610-2.3	C	Fine and Coarse Aggregate	ASTM C33	Concrete Aggregates	Source	1 / Coarse Aggregate; 1 / Fine Aggregate	Conform to test method.	
	610-2.2 and 610-2.3	C	Fine and Coarse Aggregate	ASTM C136	Sieve Analysis	Source	1 / Coarse Aggregate; 1 / Fine Aggregate	Sieve Table	
	610-2.4	C	Cement	ASTM C150	Portland Cement	Source	1 / Project	Type II	
	610-2.6.a	C	Air-Entraining Admixture	ASTM C260	Air-Entraining Admixtures for Concrete	Source	1 / Project	Conform to test method.	
	610-2.6.b and 610-2.6.c	C	Chemical Admixture	ASTM C494	Chemical Admixtures	Source	1 / Project	Retarding shall meet Type A, B, or D; Set accelerating shall meet Type C; Calcium chloride and admixtures containing calcium chloride shall not be used.	
	610-2.7	C	Joint Filler	ASTM D1751 or ASTM D1752	Preformed Joint Filler	Source	1 / Project	Conform to test method.	
	610-2.9	C	Steel-Welded Wire Reinforcement	ASTM A1064	Standard Spec for Steel-Welded Wire Reinforcement	Source	1 / Project	Conform to test method.	Formerly ASTM A185.
	610-2.9	C	Billet-Steel Bars	ASTM A615	Standard Spec for Deformed and Plain Billet-Steel Bars	Source	1 / Project	Grade 60	
	610-2.10	C	Curing Material	ASTM C309	Liquid-Membrane Forming Curing Materials	Source	1 / Project	Type 2, CL B	
	610-3.2	C	PCC	ASTM C39	Compressive Strength of Cylindrical Concrete Specimens	Source/Lab	1 / Project	Shall develop a compressive strength of 3500psi in 28 days.	
	610-3.2 and 610-3.6	C	PCC	ASTM C143	Slump Test	Source	1 / Project	Slump not more than 4".	
	610-3.2	C	PCC	ASTM C231	Air Content Test	Source	1 / Structure	Concrete shall contain %5 of entrained air ±1%.	
		C	Epoxy-Coated Steel Bars	ASTM A775 or ASTM A934	Epoxy-Coated Steel Reinforcing Bars	Source	1 / Project	Conform to test method.	
		C						Mix Design	
P-620, Runway And Taxiway Marking	620-2.2	C	Paint			Source	Project	Paint Type	
	620-2.2.a	C	Paint	FED SPEC TT-P-1952E	Paint Spec.	Source	1 / Project	Conform to test method.	
	620-2.3	C	Reflective Media	FED SPEC TT-B-1325D	Reflective Media	Source	1 / Project	Conform to test method.	

Table 1: SUMMARY OF SUBMITTALS									
Specification	**Spec Section**	**Submitted By**	**Material**	**Test Standard**	**Test Required**	**Sampling Locations**	**Minimum Test Frequency**	**Requirements**	**Notes**
D-705, Pipe Underdrains For Airports	705-2.2	C	Pipe	ASTM F758	PVC Underdrain Systems	Source	1 / Project	Conform to test method.	
	705-2.2	C	Pipe	AASHTO M252	Corrugated Polyethylene Drainage Tubing	Source	1 / Project	Conform to test method.	
	705-2.3	C	Cement for Joint Mortar	ASTM C150	Portland Cement	Source	1 / Project	Type I	
	705-2.3	C	Sand for Joint Mortar	ASTM C144	Aggregate for Masonry Mortar	Source	1 / Project	Conform to test method.	
	705-2.4	C	Elastomeric Seals	ASTM F477	Elastomeric Seals for Joining Pipe	Source	1 / Project	Conform to test method.	
	705-2.5	C	Backfill	ASTM C136	Sieve Analysis	Source	1 / Project	Sieve Table	
	705-2.6	C	Granular Material for Backfill	ASTM D2321	Underground Installation of Thermoplastic Pipe	Source	1 / Project	Class 1A, 1B, or II	
	705-2.7	C	Filter Fabric	AASHTO M288-99	Geotextile Spec for Highway Applications	Source	1 / Project	Class 2	
	705-2.7 Table 2	C	Filter Fabric	ASTM D4632	Grab-Breaking Load and Elongation of Geotextiles	Source	1 / Project	Tensile strength : 125lbs min; Tensile elongation: 50% min.	
	705-2.7 Table 2	C	Filter Fabric	ASTM D3785	Standard Spec for Woven Necktie and Scarf Fabrics	Source	1 / Project	125psi min.	
	705-2.7 Table 2	C	Filter Fabric	ASTM D4533	Trapezoid Tearing	Source	1 / Project	55lbs min.	
	705-2.7 Table 2	C	Filter Fabric	ASTM D4833	Index Puncture Resistance	Source	1 / Project	40lbs min.	
	705-2.7 Table 2	C	Filter Fabric	ASTM D4886	Abrasion Resistance	Source	1 / Project	15lbs max loss.	
	705-2.7 Table 2	C	Filter Fabric	ASTM D4751	Determining Apparent Opening Size	Source	1 / Project	70-100	
	705-2.7 Table 2	C	Filter Fabric	ASTM D4491	Water Permeability	Source	1 / Project	0.8 sec^{-1}	
	705-2.7 Table 2	C	Filter Fabric	ASTM D4355	Deterioration of Geotextiles	Source	1 / Project	70%	
		C	Edge Drain Check Valve			Source	1 / Project		
		C	Rodent Screen			Source	1 / Project		
T-901, Seeding	901-2.1	C	Seed	Fed Spec JJJ-S-181	Type	Source	Project	Seed blend/quantity of pure live seed.	
	901-2.3	C	Fertilizer		Type	Source	Project	Fertilizer.	
T-905, Topsoiling	905-2.1	C	Topsoil	ASTM C117	Materials Finer Than No. 200 Analysis	Source	Project		
	905-2.1	C	Topsoil		pH	Source	Project	pH	
	905-2.1	C	Topsoil		% Organics	Source	Project	% of organics.	
L-108, Underground Power Cables for Airport		C		L-824 5 KV Cable					
		C						#6 AWG copper ground wire	
		C		L-823 Connector kits					
		C						Cable splicer qualifications	Send sample splices to Engineer for review.
L-110, Airport Underground Electrical Duct Banks and Conduits		C		2" SCH 40 PVC Conduit					
L-125, Installation of Airport Lighting Systems		C		L862 HIRL Fixture					
		C		L850 HIRL Fixture					
		C		L830-18 (150W) Transformer					
		C		L830-6 (200W) Transformer					
		C						PVC Transformer support	
		C						Figure ID tags	
Other Submittals		C	Low profile barricades, other traffic control devices.					Meets AC 150/5370-2.	

APPENDIX D: QUALITY CONTROL TESTING (BY CONTRACTOR)

Table 2: QUALITY CONTROL (by Contractor)

Specification	Spec Section	Test By	Material	Test Procedure	Test Required	Sampling Locations	Minimum Test Frequency	Requirements	Notes
P-101, Surface Preparation		C		None	None				
P-152, Excavation, Subgrade, and Embankment		C		None	None				
P-154 Subbase Course	154-2.2b	C	Subbase	Gradation	ASTM C136 and C117	In-place, un-compacted material	At least 1 sample	Verify meets specifications	
	154-3.9a	C	Subbase	Compaction		As specified by ASTM D3665	At a minimum of 400 sq. yds per each lift, or as determined by geotechnical engineer	Shall Achieve 100% of Lab Density and within 2% of optimum moisture content	
	154-3.9b	C	Base Course	Thickness				The thickness of the base course shall be within +0 and -1/2 inch of the specified thickness as determined by depth tests taken by the Contractor in the presence of the RPR	
P-156, Temporary Air and Water Pollution, Soil Erosion, and Siltation Control		C		None	None				
P-209, Crushed Aggregate Base Course	209-2.2.a	C	Aggregate	ASTM C117 and C136	Sieve Analysis	Source or stockpile	2 per lot	Gradation table and the fraction of material passing #200 sieve shall not exceed one=half the fraction passing the # 40 sieve.	May be done by Contractor or Engineer, check section to see who is specified to do this test.
	209-3.6		Base Course	12 ft Straightedge	Smoothness	Source	1/Project		
	209-3.7		Base Course	Depth test	Thickness	Completed Base Course	Minimum 1 per 300 SY	Must not be deficient by more than 1/2 inch	
P-401, Hot Mix Asphalt (HMA) Pavements	401-6.3.a	C	Asphalt Content	ASTM D6307 (or ASTM D2172)	Asphalt Content	During Production	2 / lot	5-7% (Stone or gravel) 6.5%-9.5% (Slag)	If pay factor in ASTM D6307 >1.0, use ASTM D2172.
	401-6.3.b	C	Aggregate	ASTM D5444, C136, and C117	Gradation	During Production	2 / lot	See Table 3	
	401-6.3.c	C	Aggregate	ASTM C566	Moisture Content of Aggregate	During Production	1 / lot		
	401-6.3.d	C	HMA	ASTM D1461 (or AASHTO T329 when determined by conventional oven or microwave)	Moisture Content of HMA	During Production	1 / lot	<0.5% (401-4.9	
	401-6.3.e	C	Binder and HMA	Manual	Temperature	Binder in storage tank, HMA at plan, and HMA at job site	4 / lot	Within limits of JMA	
	401-6.3.f	C	HMA	ASTM 2950	In-Place Density Monitoring	In-place	As needed to ensure density requirements are met	Mat 96.3-101.3% Joint 93.3%	
	401-6.3.g, Additional Testing	C	Contractor may perform other testing as desired to ensure quality standards are met.						
	401-6.3.h, monitoring	C	Engineer has the right to monitor any or all of the Constractor's QC testing.						
	401-6.5, Control Charts	C	HMA	Aggregate Gradation	Contractor to maintain linear control charts both for individual measurements and range. See 6.5.a for Individual measurement control chart limits and 6.5.b for Range control chart limits.				
				Asphalt Content					
				VMA					
	401-6.6, Quality Control Reports	C	Contractor shall maintain records and submit reports daily (See General Conditions, Section 100).						
P-602, Bituminous Prime Coat		C			None				
P-603, Bituminous Tack Coat					None				
P-608-R, Rapid Cure Seal Coat	608-R-2.1	C	Aggregate	ASTM C136	Gradation		1/ Project	Must meet Aggregate Characterists	
	608-R-2.2	C	Asphalt Content				1/Project	Must meet Properties for Asphalt Sealing Material, Tests on Residue from Distillation	
	610-2.3	C	Fine Aggregate	ASTM C33	Gradation	Source	1/ Project	Blending will be permitted to meet the gradation requirements for fine aggregate.	
	610-2.4	C	Cement	ASTM C150, Type I or II		Source	1/ Project		
	610-2.6	C	Water	ASTM C1602		Source	1/ Project		
	610-2.7a	C	Admixture	ASTM 260	Air Entrainment				

Table 2: QUALITY CONTROL (by Contractor)									
Specification	**Spec Section**	**Test By**	**Material**	**Test Procedure**	**Test Required**	**Sampling Locations**	**Minimum Test Frequency**	**Requirements**	**Notes**
P-610, Structural Portland Cement Concrete	610-2.7a	C	Admixture	ASTM C494, Type A, B or D	Water Reducer	Source	1/ Project	Type F and G high range water reducing admixtures and ASTM C1017 flowable admixtures shall not be used.	
	610-2.7a	C	Admixture	ASTM C494, Type A, B or D	Other chemical admixtures	Source	1/Project	Shall meet requirements of ASTM C494 Type C	Do not use calcium chloride and admixtures containing calcium chloride
		C	PCC	ASTM C143	Slump Test		1 / structure	Slump not more than 4"	RPR to monitor test.
		C	PCC	ASTM C231	Air Content		1 / structure	5% ± 1%	RPR to monitor test.
P-620, Runway And Taxiway Marking		C			None				
D-705, Pipe Underdrains For Airports		C			None				
T-901, Seeding		C			None				
T-905, Topsoiling		C			None				
L-108, Underground Power Cables for Airport		C		Submerged reel testing				See spec.	RPR to monitor test.
L-110, Airport Underground Electrical Duct Banks and Conduits		C						See spec.	RPR to monitor test.
L-125, Installation of Airport Lighting Systems		C						See spec.	RPR to monitor test.
Other Submittals		C			None				

APPENDIX E: ACCEPTANCE TESTING/QUALITY ASSURANCE (BY ENGINEER)

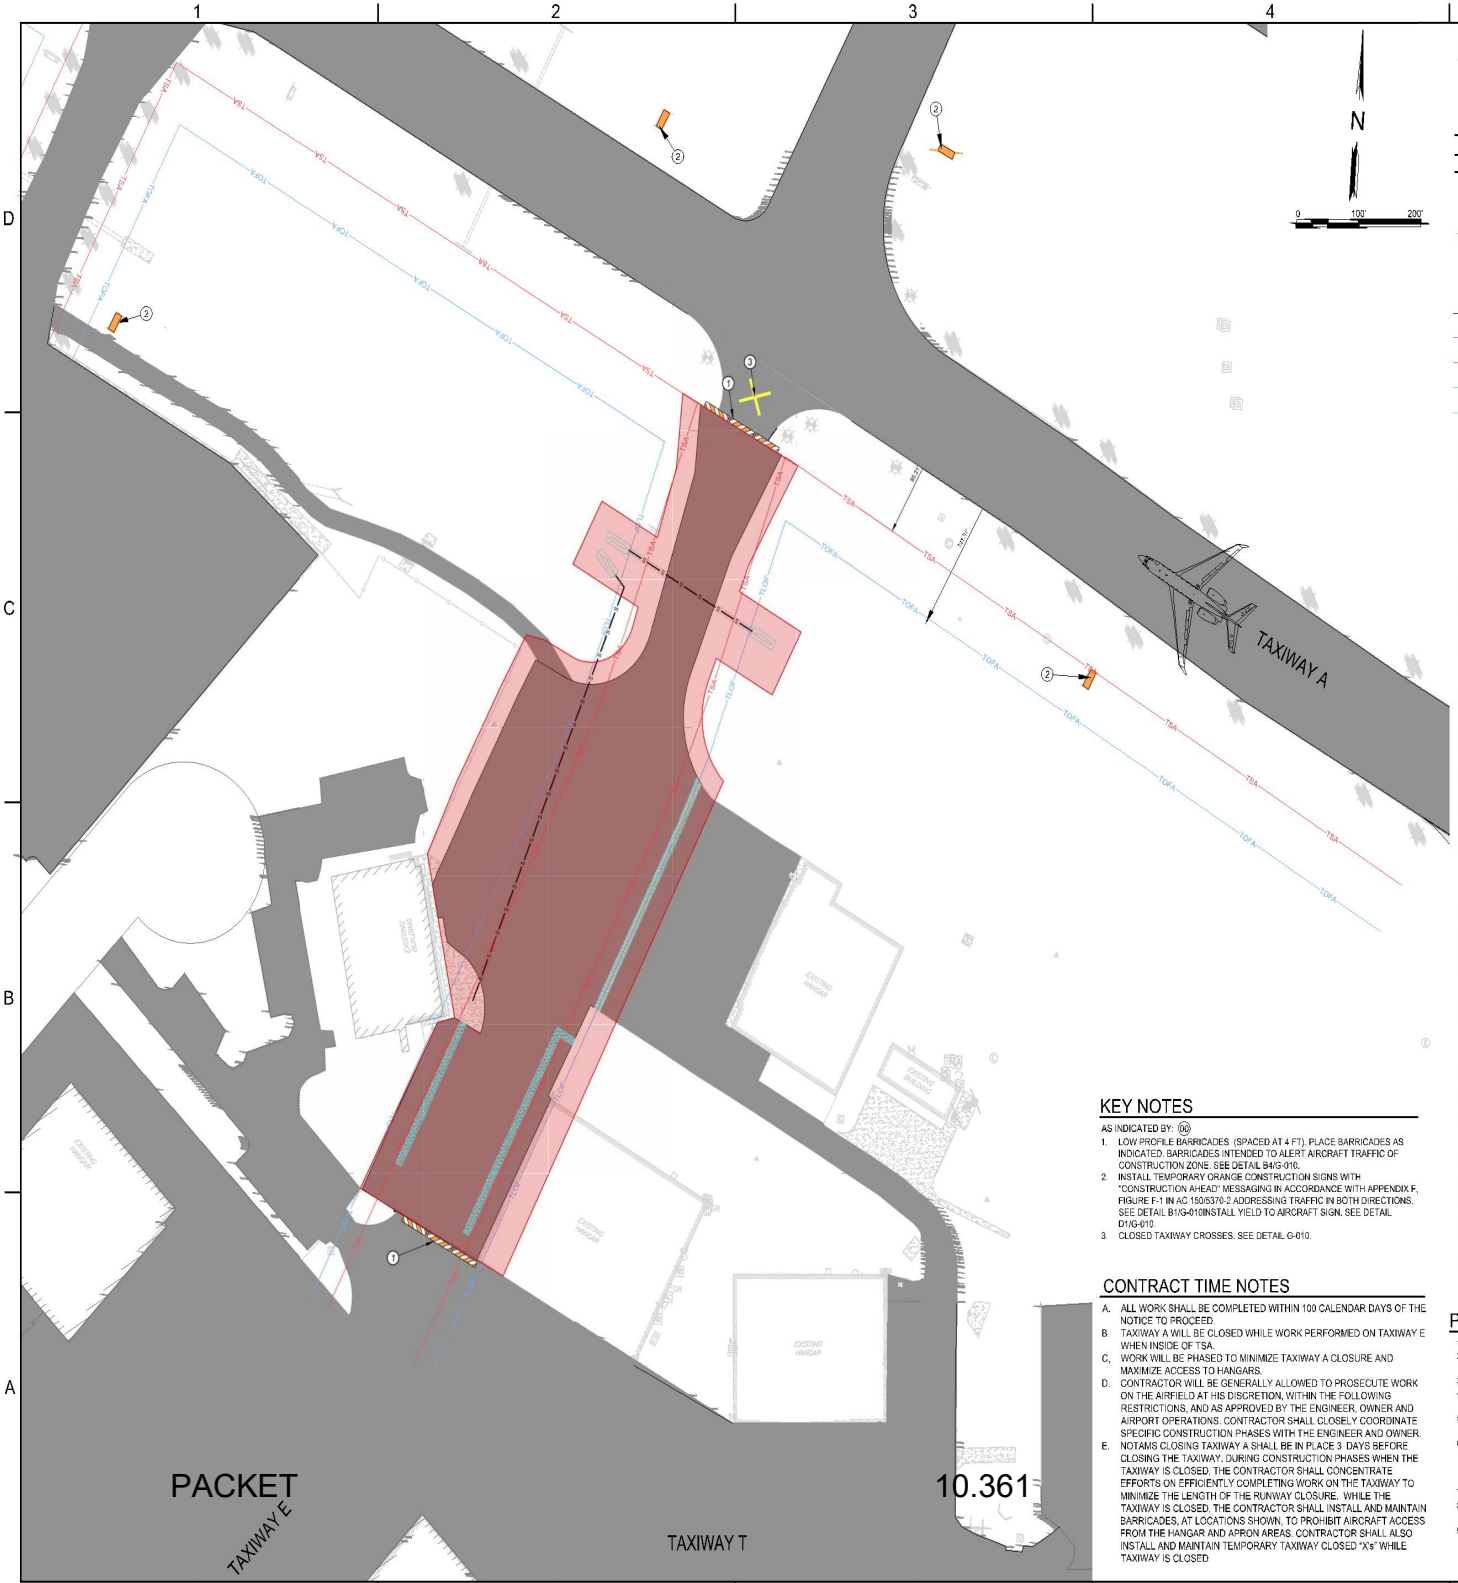

Table 3: QUALITY ASSURANCE (by Engineer)									
Specification	**Spec Section**	**Test By**	**Material**	**Test Procedure**	**Test Required**	**Sampling Locations**	**Minimum Test Frequency**	**Requirements**	**Notes**
P-101, Surface Preparation	101-3.9.4.a	E	Existng Pipe Material	ASTM D698	Compaction	Trenches under paved areas	1 / 500 SY	95% minimum compaction	
	101-3.9-4.b	E	Inlet Removal	ASTM D698	Compaction	Area under paved and outside paved areas	1 / 500 SY	95% minimum compaction	
	101-3.9.4.c	E	Removal of SET	ASTM D698	Compaction	Trenches under paved areas	1 / 500 SY	95% minimum compaction	
P-152, Excavation, Subgrade, and Embankment	152-2.5	E	Subgrade	ASTM D698	Nuclear Density Test	In-Place	1 / 500 SY	Top 12 inches of subgrade shall be compacted to no less than 100% maximum density for non-cohesive soils (PI <3) and 95% maximum desnity for cohesive soils	Determine % water requirement
	152-2.9	E	Subgrade		Proof Rolling	In-Place	Per lift	>1 inch or engineer discretion shall be removed or reworked	Tire loaded to min of 30,000lbs; tires min 125 psi.
	152-2.6	E	Subgrade	ASTM D6988 ASTM D1557	Proctor	Source	1 / 2,500 SY / layer		
	152-2.13	E	Subgrade	Straight-Edge Grade Tolerance	Surface smoothness	In-Place	Grid Spacing at 50-ft.	≤1/2" deviation (using 12' straight-edge); ±0.05' from true grade.	
P-154 Subbase Course	158-3.8	E	Subbase	Density		As specified by ASTM D3665	At a minimum of 400 sq. yds per each lift, or as determined by geotechnical engineer	Shall Achieve 100% of Lab Density and within 2% of optimum moisture content	
P-209, Crushed Aggregate Base Course	209-2.1	E	Aggregate	ASTM C131, ASTM C88, ASTM D5821, ASTM D4791, ASTM C29, ASTM C142, ASTM D4318		Source or stockpile	2 per lot	Must meet requirements of Crushed Aggregate Base Material Requirements listed in table	May be done by Contractor or Engineer, check section to see who is specified to do this test.
	209-2.2	E	Aggregate	ASTM C117 and ASTM C136	Gradation	Source or stockpile	2 per lot	Must meet requirements of Gradation of Aggregate Base listed in table	
	209-2.3	E	Base Course	ASTM D75	Aggregate base requirements and gradation.	Source	1 per sublot.		
	209-3.4	E	Base Course	Survey	Grade Verification	In Place, finished base course	50 foot stations	Finish Base Grade to be within -1/2 inch and +0 inches of specified grade	
	209-3.5	E	Base Course	ASTM D1557	Compaction	In Place, finished base course	1 per sublot.	100% maximum density, +/- 2% of optimum moisture	
P-156, Temporary Air and Water Pollution, Soil Erosion, and Siltation Control		E		None	None				

Table 3: QUALITY ASSURANCE (by Engineer)									
Specification	**Spec Section**	**Test By**	**Material**	**Test Procedure**	**Test Required**	**Sampling Locations**	**Minimum Test Frequency**	**Requirements**	**Notes**
P-401, Hot Mix (HMA) Pavements	401-5.1.a	E	Plant HMA	ASTM D3203	Air Voids	During production from trucks either at plant or onsite.	1 set of 3 specimens per sublot	2-5%	Based on Theoretical Maximum Specific Gravity.
				ASTM D6925	Lab Compacted Specimens	During production from trucks either at plant or onsite.	1 set of 3 specimens per sublot	See Table 1, 401-3.2 for number of gyrations.	
				ASTM D2726 or ASTM D6752	Bulk Specific Gravity of Lab Compacted Specimens	During production from trucks either at plant or onsite.	1 set of 3 specimens per sublot		
				ASTM D2041	Theoretical Maximum Specific Gravity	During production from trucks either at plant or onsite.	1/sublot		
	401-5.1.b	C	In-Place HMA	ASTM D979	Mat density Coring	By Engineer on random basis according to ASTM D3665	1/sublot	Minimum 5" diameter, not closer than 1' from joint.	Contractor responsible for coring using diamond core drill bit.
					Joint density coring		1/sublot	Minimum 5" diameter, centered on joint.	
		E		ASTM D2726 or ASTM D6752	Bulk Specific Gravity of In-Place Samples	Cores from finished HMA	1/sublot for Mat and Joint		See 5.1.b(4) for correct test.
		E		ASTM D3203	Air Voids	Cores from finished HMA	1/sublot	2-5%	Based on Theoretical Maximum Specific Gravity
		E		Mat Density	Mat % Compaction = Mat Core Bulk Specific Gravity / Lab Specimen Bulk Specific Gravity		1/sublot	>96.3% and <101.3%	
		E		Joint Density	Joint % Compaction = Joint Core Bulk Specific Gravity / Lab Specimen Bulk Specific Gravity		1/sublot	>93.3%	
	401-5.2	E	In-Place HMA	Visual From Cores	Thickness	Cores from finished HMA	1/sublot	Single Sample Defiency 1/4" max avg thickness shall not be less than indicated lift thickness.	
		E		12' Straightedge	Smoothness	Transverse (perpendicular to CL)	50' intervals	<1/4" Variance	
		E		12' Straightedge	Smoothness	Paving Joints Between Lots	50' intervals (or less per Engineer)	Prior to production	
		E		12' Straightedge	Short Section (<200' lot length) Longitudinal Smoothness	Parallel to CL of paving and at center of paving lanes when widths < 20', or at the 1/3rd points when paving lane >20'.	Full length of short lot section	<1/4" Variance	Shall not be made through grade changes or cross slope transitions.
		E		Profilograph verification (ASTM E1274)	Longitudinal Smoothness	Parallel to CL of paving and at center of paving lanes when widths < 20', or at the 1/3rd points when paving lane >20'.	Continuous full length of lots	<7 inch per mile	Contractor responsible for providing profilograph and testing.
		E		Licensed and Stamped Survey	Grade	In-place finished HMA at 50' intervals longitudinally, and transversely at each grade brake but not less than 50'.	Every day during paving	Within 1/2" of design	Contractor to submit data to engineer the following day.
		E				During Production from Trucks either at plant or on site	Every Truck	Collect batch tickets	Write applicable information on batch tickets. Number and scan tickets.
P-602, Bituminous Prime Coat		E			Monitor application rate.	Site			RPR to monitor.
P-603, Bituminous Tack Coat		E			Monitor application rate.	Site			RPR to monitor.

Table 3: QUALITY ASSURANCE (by Engineer)									
Specification	**Spec Section**	**Test By**	**Material**	**Test Procedure**	**Test Required**	**Sampling Locations**	**Minimum Test Frequency**	**Requirements**	**Notes**
P-608-R, Rapid Cure Seal Coat	608-R-3.1	E			Monitor application rate.	Site	1/ Project		RPR to monitor.
P-610, Structural Portland Cement Concrete	610-2.1.a	E	PCC	ASTM 1260	Reactivity	Source	1/ Project	Expansion of test specimens shall not exceed 0.08% at 14 days (16 days from casting)	
	610-2.2	E	PCC	ASTM C33	Gradation	Source	1/ Project	Must meet requirements of Coarse Aggregate Grading Requirements	
	610-2.2.1	E	PCC	ASTM C666	D-Cracking	Source	1/ Project	20 year service record for the same gradation supplied with no history of D-Cracking	
	610-2.3	E	Fine Aggregate	ASTM C33	Gradation	Source	1/ Project	Blending will be permitted to meet the gradation requirements for fine aggregate.	
	610-3.2	E	PCC	ASTM C39	Compressive Strength Cylinders		1 / structure	Develop compressive strength of 3500psi in 28 days.	
	610-3.2	E	PCC	ASTM C143	Slump Test		1 / structure	Not more than 4".	
	610-3.2	E	PCC	ASTM C231	Air Content		1 / structure	5% air ± 1%	
	610-3.20 and 3.21	E			Weather/ Ambient Temperature	Site	As needed throughout placement or as conditions change.	See spec.	
P-620, Runway And Taxiway Marking		E			None				
D-705, Pipe Underdrains For Airports		E			None				
T-901, Seeding		E			None			RPR to collect seed bag tags to verify blend and rate.	
T-905, Topsoiling		E			None				
L-108, Underground Power Cables for Airport		E			Insulation resistance			RPR to observe QC test.	
L-110, Airport Underground Electrical Duct Banks and Conduits		E			None				
L-125, Installation of Airport Lighting Systems		E			None				
Other Submittals		E			None				

APPENDIX F: PAY FACTORS

Table 4 - PAY FACTORS		
Specification	**Spec Section**	**Pay Factors**
P-101 Surface Preparation	101-5.1	No Pay Factors
P-152 Excavation, Subgrade, and Embankment	152-4.1	No Pay Factors
P-154 Subbase Course	154	No Pay Factors
P-209 Crushed Aggregate Base Course	209	No Pay Factors, Contractor to Correct Deficiencies out of tolerance
P-401 Hot Mix (HMA) Pavements	401-8.1.c (Table 6)	Lot Pay Factor (based on PWL)
	401-8.1.e (Table 7)	Smoothness Pay Factor
	401-8.1.e	Payment for Lot = (Tons of HMA) X (Lot Pay Factor) X (Unit Price per Ton) X (Smoothness Pay Factor)
P-602 Bituminous Prime Coat	602-5.1	No Pay Factors
P-603 Bituminous Tack Coat	603-5.1	No Pay Factors
P-608-R Asphalt Surface Treatment	608	No Pay Factors
P-610 Structural Portland Cement Concrete	610-5.1	No Pay Factors
P-620 Runway And Taxiway Marking	620-5.1	No Pay Factors
D-701 Reinforced Concrete Pipe	701-5.1	No Pay Factors
D-752 Concrete Reinforced Safety End Treatment	D-752-5.1	No Pay Factors
T-901 Seeding	901-5.1	No Pay Factors
T-905 Topsoiling	905-5.1	No Pay Factors
L-108 Underground Power Cables for Airport	108-5.1	No Pay Factors
L-110 Airport Underground Electrical Duct Banks and Conduits	110-5.1	No Pay Factors
L-125 Installation of Airport Lighting Systems	125-5.1	No Pay Factors
Other Submittals		No Pay Factors

LEGEND

- PHASE 1
- EXISTING PAVEMENT TO REMAIN
- EXISTING BUILDING
- ORANGE "CONSTRUCTION AHEAD" SIGN (B1/G-011)
- YIELD TO AIRCRAFT SIGN (D1/G-011)
- LOW-PROFILE AVIATION BARRICADE (B4/G-011)
- EXISTING CLOSED TO AIRCRAFT "X" MARKING
- ACTIVE TAXIWAY / TAXILANE
- Xx — EXISTING FENCE TO REMAIN
- UGEx — EXISTING UNDERGROUND ELECTRIC
- TSA — TAXIWAY SAFETY AREA
- TOFA — TAXILANE OBJECT FREE AREA
- TOFA — TAXIWAY OBJECT FREE AREA

GENERAL NOTES

A. THIS PAGE IS INTENDED TO BE PRINTED IN COLOR. IF NOT, CONTACT ENGINEER AS SOON AS POSSIBLE.
B. THIS PLAN IS INTENDED TO GIVE THE CONTRACTOR AN UNDERSTANDING OF THE PHASING GOALS. ANY DEVIATION, HOWEVER, SHALL BE APPROVED BY AND ENGINEER PRIOR TO THE RECONSTRUCTION MEETING.
C. SCHEDULE IS IN CALENDAR DAYS. ALLOWABLE CALENDAR DAYS INCLUDE HOLIDAYS AND WEEKENDS. WEATHER DAYS OVER AND/OR ABOVE THE HISTORICAL NORM CAN BE CREDITED IF JUSTIFIED AND AGREED UPON BY THE ENGINEER AND AGENT.
D. CONTRACTOR SHALL MEET ALL SCHEDULE AND PHASING GOALS. SEE GOALS LISTED ON PHASING PLAN.
E. TOTAL CONTRACT TIME OF 100 CALENDAR DAYS IS BASED ON THE NUMBER OF DAYS ALLOTTED TO COMPLETE PHASES 1 AND 2 INCLUDING CURE TIME AND COMPLETION OF PUNCH LIST.
F. INSTALL AVIATION BARRICADE ACROSS ALL AIRCRAFT MOVEMENT AREAS ADJACENT TO CONSTRUCTION AREAS WITH ONE OR A COMBINATION OF DETAIL B4/G-010. INSTALL OUTSIDE TAXIWAY SAFETY AREA, OR ALONG EDGE OF APRON.
G. THE CONTRACTOR SHALL MAINTAIN ALL AIRSIDE PAVEMENTS FREE OF CONSTRUCTION DEBRIS. IF EQUIPMENT IS ROUTED ACROSS PAVEMENT, SWEEP THE PAVEMENT AS NEEDED TO ENSURE AIRCRAFT SAFETY.
H. AIRCRAFT ALWAYS HAVE THE RIGHT-OF-WAY.
I. MARK AND LIGHT CONSTRUCTION AREAS AND VEHICLES AS REQUIRED IN LATEST EDITION OF AC 150/5370-2.
J. WORK AREA BOUNDARY IN ALL UNPAVED AREAS SHALL BE MARKED WITH LATHS OR ORANGE SAFETY FENCE. LATHS SHALL BE PLACED AT 10FT SPACING.
K. CONTRACTOR SHALL MAINTAIN A 10FT CLEAR AREA ADJACENT TO BUILDING, FENCE, OR AIRPORT STRUCTURE. AREA SHALL BE CLEAR OF STOCKPILES, MATERIAL OR EQUIPMENT.
L. AT ALL TIMES THE CONTRACTOR SHALL TAKE PRECAUTIONS NECESSARY TO PROTECT STRUCTURES AND TREES ADJACENT TO WORK AREA. ANY DAMAGE CAUSED BY THE CONTRACTORS OPERATIONS SHALL BE REPAIRED TO THE SATISFACTION OF THE ENGINEER, AT THE CONTRACTORS SOLE EXPENSE.
M. ANY WORK WITHIN ACTIVE TSA SHALL BE COORDINATED WITH OWNER, ENGINEER, AND RPR.
N. CREATE 1-1/2" DROP WHERE GRADING ALONG ALL PAVED SURFACES.
O. MATCH EXISTING ELEVATIONS ALONG BUILDINGS AND EXISTING PAVEMENT.
P. CONTRACTOR IS TO USE CAUTION DURING CONSTRUCTION TO PROTECT EXISTING TAXIWAY SIGNS, LIGHTS, NAVIGATIONAL AIDS, AND OTHER AIRPORT STRUCTURES.
Q. LOCATION OF EXISTING GAS AND ELECTRICAL LINES ARE APPROXIMATE AND NOT FROM SURVEY. CONTRACTOR WILL BE RESPONSIBLE FOR CONTACTING DIG TESS, THE CITY OF MIDLAND, THE AIRPORT, AND UTILITY OWNERS TO CONFIRM LOCATION OF ALL UTILITIES. PRECAUTIONS SHALL BE TAKEN TO PROTECT EXISTING UTILITIES AND OTHER INFRASTRUCTURE.
R. ISOLATE ALL PAVEMENT TO BE REMOVED BY SAW CUTTING, FORMING A CLEAN, STRAIGHT EDGE.
S. CONTRACTOR TO PROTECT EXISTING BOLLARDS, WELL CAPS, ELECTRICAL BOXES, AND OTHER INFRASTRUCTURE DURING DEMOLITION.
T. CONTRACTOR SHALL TAKE NECESSARY MEASURES TO PROTECT EXISTING STRUCTURES (BUILDINGS, FENCE, UTILITIES, ETC.). ANY DAMAGE SHALL BE REPAIRED AT THE CONTRACTORS SOLE EXPENSE.
U. ALL MARKINGS SHALL BE IN ACCORDANCE WITH THE LATEST CHANGE OF FAA AC 150/5340-1.
V. USE GLASS BEADS, AS SPECIFIED, IN ALL MARKINGS.
W. ALL NEW MARKING WILL BE PAID FOR AT THE CONTRACT UNIT PRICE PER SQUARE FOOT FOR NEW MARKINGS.
X. VERIFY LIMITS WITH ENGINEER PRIOR TO BEGINNING DEMOLITION.
Y. ANY DAMAGE TO EXISTING RUNWAY, APRON, CONNECTING STUB TAXIWAY PAVEMENT WILL BE REPAIRED AT CONTRACTOR'S EXPENSE.
Z. CONTRACTOR SHALL REQUIRE A PAVEMENT SWEEPER AT INTERSECTION OF RUNWAY AND PARTIAL PARALLEL TAXIWAY DURING TIMES OF MATERIAL TRANSFER NEAR RUNWAY TO ENSURE ANY FOREIGN OBJECT DEBRIS TO BE CLEARED AFTER CONSTRUCTION EQUIPMENT CROSSES.

KEY NOTES

AS INDICATED BY: (00)

1. LOW PROFILE BARRICADES (SPACED AT 4 FT). PLACE BARRICADES AS INDICATED. BARRICADES INTENDED TO ALERT AIRCRAFT TRAFFIC OF CONSTRUCTION ZONE. SEE DETAIL B4/G-010.
2. INSTALL TEMPORARY ORANGE CONSTRUCTION SIGNS WITH "CONSTRUCTION AHEAD" MESSAGING IN ACCORDANCE WITH APPENDIX F, FIGURE F-1 IN AC 150/5370-2 ADDRESSING TRAFFIC IN BOTH DIRECTIONS. SEE DETAIL B1/G-010INSTALL YIELD TO AIRCRAFT SIGN. SEE DETAIL D1/G-010.
3. CLOSED TAXIWAY CROSSES. SEE DETAIL G-010.

CONTRACT TIME NOTES

A. ALL WORK SHALL BE COMPLETED WITHIN 100 CALENDAR DAYS OF THE NOTICE TO PROCEED.
B. TAXIWAY A WILL BE CLOSED WHILE WORK PERFORMED ON TAXIWAY E WHEN INSIDE OF TSA.
C. WORK WILL BE PHASED TO MINIMIZE TAXIWAY A CLOSURE AND MAXIMIZE ACCESS TO HANGARS.
D. CONTRACTOR WILL BE GENERALLY ALLOWED TO PROSECUTE WORK ON THE AIRFIELD AT HIS DISCRETION, WITHIN THE FOLLOWING RESTRICTIONS, AND AS APPROVED BY THE ENGINEER, OWNER AND AIRPORT OPERATIONS. CONTRACTOR SHALL CLOSELY COORDINATE SPECIFIC CONSTRUCTION PHASES WITH THE ENGINEER AND OWNER.
E. NOTAMS CLOSING TAXIWAY A SHALL BE IN PLACE 3 DAYS BEFORE CLOSING THE TAXIWAY. DURING CONSTRUCTION PHASES WHEN THE TAXIWAY IS CLOSED, THE CONTRACTOR SHALL CONCENTRATE EFFORTS ON EFFICIENTLY COMPLETING WORK ON THE TAXIWAY TO MINIMIZE THE LENGTH OF THE RUNWAY CLOSURE. WHILE THE TAXIWAY IS CLOSED, THE CONTRACTOR SHALL INSTALL AND MAINTAIN BARRICADES, AT LOCATIONS SHOWN, TO PROHIBIT AIRCRAFT ACCESS FROM THE HANGAR AND APRON AREAS. CONTRACTOR SHALL ALSO INSTALL AND MAINTAIN TEMPORARY TAXIWAY CLOSED "Xs" WHILE TAXIWAY IS CLOSED.

PHASE 1 (60 DAYS)

1. TAXIWAY A TO REMAIN ACTIVE DURING THIS PHASE.
2. INSTALL LOW-PROFILE BARRICADES AND OTHER SAFETY MEASURES AS SHOWN ON PLAN DETAILS.
3. NO AIRCRAFT ACCESS TO HANGAR, APRON DURING THIS TIME.
4. DEMOLISH AND STOCKPILE EXISTING ASPHALT TAXIWAY AND APRON, TAXIWAY EDGE LIGHTS, TAXIWAY SIGNS/ FOUNDATION.
5. REMOVE AND STOCKPILE UNPAVED AREA FOR TAXIWAY E CONSTRUCTION UP TO TAXIWAY A SAFETY AREA.
6. CONSTRUCT PHASE 1 PAVEMENT TO TOP OF BASE COURSE, INCLUDING REMOVAL OF EXISTING DRAINAGE PIPE AND EXTENSION OF NEW 42 INCH AND 27 INCH DRAINAGE PIPES AND SAFETY END TREATMENTS.
7. COMPLETE GRADING ALONG PAVEMENT EDGE TIME.
8. ALL PAVEMENT MARKINGS/PAINTS SHALL BE COMPLETED AFTER ALL PAVEMENT CONSTRUCTION ITEMS HAVE BEEN COMPLETED.
9. PROTECT TAXIWAY/TAXILANE PAVEMENT EDGE AT ALL TIMES.

LEGEND

- PHASE 1
- EXISTING PAVEMENT TO REMAIN
- EXISTING BUILDING
- ORANGE "CONSTRUCTION AHEAD" SIGN (B1/G-011)
- YIELD TO AIRCRAFT SIGN (D1/G-011)
- LOW-PROFILE AVIATION BARRICADE (B4/G-011)
- EXISTING CLOSED TO AIRCRAFT "X" MARKING
- ACTIVE TAXIWAY / TAXILANE
- Xx EXISTING FENCE TO REMAIN
- UGEx EXISTING UNDERGROUND ELECTRIC
- TSA TAXIWAY SAFETY AREA
- TOFA TAXILANE OBJECT FREE AREA
- TOFA TAXIWAY OBJECT FREE AREA

GENERAL NOTES

A. THIS PAGE IS INTENDED TO BE PRINTED IN COLOR. IF NOT, CONTACT ENGINEER AS SOON AS POSSIBLE.
B. THIS PLAN IS INTENDED TO GIVE THE CONTRACTOR AN UNDERSTANDING OF THE PHASING GOALS. ANY DEVIATION, HOWEVER, SHALL BE APPROVED BY AND ENGINEER PRIOR TO THE PRECONSTRUCTION MEETING.
C. SCHEDULE IS IN CALENDAR DAYS. ALLOWABLE CALENDAR DAYS INCLUDE HOLIDAYS AND WEEKENDS. WEATHER DAYS OVER AND/OR ABOVE THE HISTORICAL NORM CAN BE CREDITED IF JUSTIFIED AND AGREED UPON BY THE ENGINEER AND AGENT.
D. CONTRACTOR SHALL MEET ALL SCHEDULE AND PHASING GOALS. SEE GOALS LISTED ON PHASING PLAN.
E. TOTAL CONTRACT TIME OF 100 CALENDAR DAYS IS BASED ON THE NUMBER OF DAYS ALLOTTED TO COMPLETE PHASES 1 AND 2 INCLUDING CURE TIME AND COMPLETION OF PUNCH LIST.
F. INSTALL AVIATION BARRICADE ACROSS ALL AIRCRAFT MOVEMENT AREAS ADJACENT TO CONSTRUCTION AREAS WITH ONE OR A COMBINATION OF DETAIL B4/G-010. INSTALL OUTSIDE TAXIWAY SAFETY AREA, OR ALONG EDGE OF APRON.
G. THE CONTRACTOR SHALL MAINTAIN ALL AIRSIDE PAVEMENTS FREE OF CONSTRUCTION DEBRIS. IF EQUIPMENT IS ROUTED ACROSS PAVEMENT, SWEEP THE PAVEMENT AS NEEDED TO ENSURE AIRCRAFT SAFETY.
H. AIRCRAFT ALWAYS HAVE THE RIGHT-OF-WAY.
I. MARK AND LIGHT CONSTRUCTION AREAS AND VEHICLES AS REQUIRED IN LATEST EDITION OF AC 150/5370-2.
J. WORK AREA BOUNDARY IN ALL UNPAVED AREAS SHALL BE MARKED WITH LATHS OR ORANGE SAFETY FENCE. LATHS SHALL BE PLACED AT 10FT SPACING.
K. CONTRACTOR SHALL MAINTAIN A 10FT CLEAR AREA ADJACENT TO BUILDING, FENCE, OR AIRPORT STRUCTURE. AREA SHALL BE CLEAR OF STOCKPILES, MATERIAL OR EQUIPMENT.
L. AT ALL TIMES THE CONTRACTOR SHALL TAKE PRECAUTIONS NECESSARY TO PROTECT STRUCTURES AND TREES ADJACENT TO WORK AREA. ANY DAMAGE CAUSED BY THE CONTRACTORS OPERATIONS SHALL BE REPAIRED TO THE SATISFACTION OF THE ENGINEER, AT THE CONTRACTORS SOLE EXPENSE.
M. ANY WORK WITHIN ACTIVE TSA SHALL BE COORDINATED WITH OWNER, ENGINEER, AND RPR.
N. CREATE 1-1/2" DROP WHERE GRADING ALONG ALL PAVED SURFACES.
O. MATCH EXISTING ELEVATIONS ALONG BUILDINGS AND EXISTING PAVEMENT
P. CONTRACTOR IS TO USE CAUTION DURING CONSTRUCTION TO PROTECT EXISTING TAXIWAY SIGNS, LIGHTS, NAVIGATIONAL AIDS, AND OTHER AIRPORT STRUCTURES.
Q. LOCATION OF EXISTING GAS AND ELECTRICAL LINES ARE APPROXIMATE AND NOT FROM SURVEY. CONTRACTOR WILL BE RESPONSIBLE FOR CONTACTING DIG TESS, THE CITY OF MIDLAND, THE AIRPORT, AND UTILITY OWNERS TO CONFIRM LOCATION OF ALL UTILITIES. PRECAUTIONS SHALL BE TAKEN TO PROTECT EXISTING UTILITIES AND OTHER INFRASTRUCTURE.
R. ISOLATE ALL PAVEMENT TO BE REMOVED BY SAW CUTTING, FORMING A CLEAN, STRAIGHT EDGE.
S. CONTRACTOR TO PROTECT EXISTING BOLLARDS, WELL CAPS, ELECTRICAL BOXES, AND OTHER INFRASTRUCTURE DURING DEMOLITION.
T. CONTRACTOR SHALL TAKE NECESSARY MEASURES TO PROTECT EXISTING STRUCTURES (BUILDINGS, FENCE, UTILITIES, ETC.). ANY DAMAGE SHALL BE REPAIRED AT THE CONTRACTORS SOLE EXPENSE.
U. ALL MARKINGS SHALL BE IN ACCORDANCE WITH THE LATEST CHANGE OF FAA AC 150/5340-1.
V. USE GLASS BEADS, AS SPECIFIED, IN ALL MARKINGS.
W. ALL NEW MARKING WILL BE PAID FOR AT THE CONTRACT UNIT PRICE PER SQUARE FOOT FOR NEW MARKINGS.
X. VERIFY LIMITS WITH ENGINEER PRIOR TO BEGINNING DEMOLITION.
Y. ANY DAMAGE TO EXISTING RUNWAY, APRON, CONNECTING STUB TAXIWAY PAVEMENT WILL BE REPAIRED AT CONTRACTOR'S EXPENSE.
Z. CONTRACTOR SHALL REQUIRE A PAVEMENT SWEEPER AT INTERSECTION OF RUNWAY AND PARTIAL PARALLEL TAXIWAY DURING TIMES OF MATERIAL TRANSFER NEAR RUNWAY TO ENSURE ANY FOREIGN OBJECT DEBRIS TO BE CLEARED AFTER CONSTRUCTION EQUIPMENT CROSSES.

KEY NOTES

AS INDICATED BY: (#)

1. LOW PROFILE BARRICADES (SPACED AT 4 FT). PLACE BARRICADES AS INDICATED. BARRICADES INTENDED TO ALERT AIRCRAFT TRAFFIC OF CONSTRUCTION ZONE. SEE DETAIL B4/G-010INSTALL TEMPORARY ORANGE CONSTRUCTION SIGNS WITH "CONSTRUCTION AHEAD" MESSAGING IN ACCORDANCE WITH APPENDIX F, FIGURE F-1 IN AC 150/5370-2 ADDRESSING TRAFFIC IN BOTH DIRECTIONS. SEE DETAIL B1/G-010
2. INSTALL YIELD TO AIRCRAFT SIGN. SEE DETAIL D1/G-010
3. CLOSED TAXIWAY CROSSES. SEE DETAIL D3/G-010.

PHASE 2 (30 DAYS)

1. TAXIWAY A CLOSED DURING THIS CONSTRUCTION.
2. INSTALL CLOSED TAXIWAY X's ON TAXIWAY A.
3. INSTALL LOW-PROFILE BARRICADES AND OTHER SAFETY MEASURES AS SHOWN ON PLAN DETAILS.
4. DEMOLISH AND STOCKPILE EXISTING ASPHALT TAXIWAY, TAXIWAY EDGE LIGHTS, TAXIWAY SIGNS/ FOUNDATION INSIDE TAXIWAY A SAFETY AREA.
5. REMOVE AND STOCKPILE PAVED AREA FOR TAXIWAY E CONSTRUCTION WITHIN TAXIWAY A SAFETY AREA.
6. AIRCRAFT ACCESS TO HANGAR, APRON AT ALL TIMES USING ALTERNATE ROUTE FROM TAXIWAY T.
7. COMPLETE ALL ELECTRICAL WORK WITH EXCEPTION OF FIXTURE INSTALLATION.
8. PREPARE APRON AND TAXIWAY PAVEMENT LIMIT FOR CONSTRUCTION OF HOT-MIX ASPHALT COURSE (ITEM P-401). ****NOTE: CONTRACTOR MAY START HOT MIX ASPHALT (ITEM P-401) OPERATION DURING THIS PHASE.
9. INSTALL TAXIWAY EDGE LIGHTS AND SIGNS AFTER ASPHALT PLACEMENT COMPLETED.
10. MARK PAVEMENT.

CONTRACT TIME NOTES

A. ALL WORK SHALL BE COMPLETED WITHIN 100 CALENDAR DAYS OF THE NOTICE TO PROCEED.
B. TAXIWAY A WILL BE CLOSED WHILE WORK PERFORMED ON TAXIWAY E WHEN INSIDE OF TSA.
C. WORK WILL BE PHASED TO MINIMIZE TAXIWAY A CLOSURE AND MAXIMIZE ACCESS TO HANGARS.
D. CONTRACTOR WILL BE GENERALLY ALLOWED TO PROSECUTE WORK ON THE AIRFIELD AT HIS DISCRETION, WITHIN THE FOLLOWING RESTRICTIONS, AND AS APPROVED BY THE ENGINEER, OWNER AND AIRPORT OPERATIONS. CONTRACTOR SHALL CLOSELY COORDINATE SPECIFIC CONSTRUCTION PHASES WITH THE ENGINEER AND OWNER.
E. NOTAMS CLOSING TAXIWAY A SHALL BE IN PLACE 3 DAYS BEFORE CLOSING THE TAXIWAY. DURING CONSTRUCTION, WHEN TAXIWAY A IS CLOSED, THE CONTRACTOR SHALL CONCENTRATE EFFORTS ON EFFICIENTLY COMPLETING WORK ON THE TAXIWAY TO MINIMIZE THE LENGTH OF THE RUNWAY CLOSURE. WHILE THE TAXIWAY IS CLOSED, THE CONTRACTOR SHALL INSTALL AND MAINTAIN BARRICADES, AT LOCATIONS SHOWN, TO PROHIBIT AIRCRAFT ACCESS FROM THE HANGAR AND APRON AREAS. CONTRACTOR SHALL ALSO INSTALL AND MAINTAIN TEMPORARY TAXIWAY CLOSED "Xs" WHILE TAXIWAY IS CLOSED.

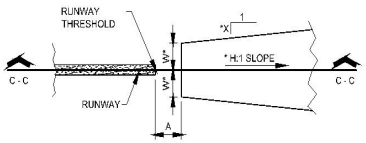
GENERAL CONSTRUCTION SAFETY AND PHASING NOTES

1. THE CONTRACTOR SHALL MAKE HIS OWN PROVISIONS FOR WATER, ELECTRICAL NATURAL GAS AND OTHER REQUIREMENTS AND SHALL PAY FOR WATER, ELECTRICITY, GAS OR FUEL CONSUMED DURING THE CONSTRUCTION OF THE PROJECT. THE CONTRACTOR SHALL CONSTRUCT HIS OWN SERVICE LINES AND SUCH CONSTRUCTION SHALL BE IN STRICT ACCORDANCE WITH ALL APPLICABLE CODES AND LAWS.
2. HAUL ROUTES SHALL NOT BE ALONG OR ACROSS ANY PAVED AIRPORT STREET, ROAD, APRON, TAXIWAY OR RUNWAY WITHOUT SPECIFIC WRITTEN AUTHORIZATION FROM THE AIRPORT ADMINISTRATION, EXCEPT AS SHOWN. ANY DAMAGE INCURRED BY THE CONTRACTOR'S EQUIPMENT SHALL BE REPAIRED BY AND AT THE EXPENSE OF THE CONTRACTOR AND AS REQUIRED BY THE ENGINEER AND MAF. THE CONTRACTOR SHALL MAINTAIN THE PAVED SURFACES, WHICH ARE ALLOWED TO BE USED AS HAULING ROUTES OR ACCESS ROUTES TO THE SITE, IN A CLEAN CONDITION, SUITABLE FOR USE AS DETERMINED BY AND MAF.
3. THE CONTRACTOR SHALL PROVIDE, ERECT AND MAINTAIN ALL NECESSARY BARRICADES, SIGNS, DANGER SIGNALS AND LIGHTS FOR THE PROTECTION OF THE WORK AND THE SAFETY OF THE PUBLIC FOR BOTH LAND AND AIR TRAFFIC. SUITABLE WARNING SIGNS AND BARRICADES SHALL BE ILLUMINATED AT NIGHT BY ACCEPTABLE LIGHT UNITS.
4. THE CONTRACTOR SHALL SCHEDULE HIS WORK WELL IN ADVANCE OF ACTUAL OPERATIONS AND SHALL KEEP THE AIRPORT ADVISED OF THE SCHEDULE SO THAT CLOSE COORDINATION CAN BE MAINTAINED WITH THE AIRPORT USERS AND WITH OTHER CONTRACTORS. AT LEAST (3) CALENDAR DAYS NOTICE WILL BE REQUIRED BEFORE CLOSING ANY PORTION OF A TAXIWAY, APRON OR RUNWAY. NOTICE TO AIRMEN (NOTAMS) REQUIRED FOR VARIOUS CONSTRUCTION OPERATIONS WILL BE FILED BY THE AIRPORT. COORDINATE ALL CONSTRUCTION ACTIVITIES WITH RPR AND MAF OPERATIONS FOR PLACING APPLICABLE NOTAM(S).
5. THE CONTRACTOR SHALL EXERT EVERY EFFORT TO MAINTAIN THE SAFETY OF THE AIRCRAFT TRAFFIC AND THE GENERAL PUBLIC AND SHALL ACQUAINT HIMSELF WITH THE RULES AND REGULATIONS CONCERNING AIRCRAFT TRAFFIC SAFETY. THE REQUIREMENTS OF FAA ADVISORY CIRCULAR 150/5370-2(LATEST REVISION), OPERATIONAL SAFETY ON AIRPORTS DURING CONSTRUCTION WILL BE MAINTAINED. VIOLATIONS OF THE SAFETY RULES BY THE CONTRACTOR'S WORKMEN SHALL RESULT IN THE DISCHARGE OF SUCH MEN IN ACCORDANCE WITH THE PROJECT SPECIFICATIONS. CONTINUED VIOLATION OF THE SAFETY RULES AND REGULATIONS BY THE CONTRACTOR, AFTER HAVING BEEN NOTIFIED OF SUCH VIOLATIONS BY THE ENGINEER, SHALL CONSTITUTE GROUNDS FOR SUSPENDING THE CONTRACTOR'S OPERATIONS UNTIL STEPS ARE TAKEN THAT WILL INSURE A SAFE OPERATION.
6. CONSTRUCTION ACTIVITIES WITHIN TAXIWAY OR APRON SAFETY AREAS WHEN THE TAXIWAY IS OPEN TO AIRCRAFT TRAFFIC SHALL BEGIN ONLY AFTER APPROVAL OF THE ENGINEER AND EQUIPMENT AND MATERIAL SHALL BE MAINTAINED. EXCAVATIONS, DITCHES OR TRENCHES OR OTHER CONDITIONS SHALL BE CONSPICUOUSLY MARKED AND LIGHTED AS SPECIFIED.
7. THE CONTRACTOR SHALL MINIMIZE AS MUCH AS POSSIBLE THE POTENTIAL DAMAGE TO THE CONTRACTOR'S ACCESS ROUTE. ANY DAMAGE TO THE ACCESS ROUTE BY THE CONTRACTOR WILL BE REPAIRED AT THE CONTRACTOR'S COST.
8. ALL EQUIPMENT AND MATERIAL SHALL BE MAINTAINED BELOW THE IMAGINARY SURFACES AT ALL TIMES.
9. CONTRACTOR TO COMPLY WITH REQUIREMENTS OF FAA AIRSPACE SAFETY.
10. CONTRACTOR TO MAINTAIN ACCESS TO ADJACENT HANGARS AT ALL TIMES DURING CONSTRUCTION.
11. CONTRACTOR TO MAINTAIN AN AOA SECURE FENCING AT ALL TIMES DURING CONSTRUCTION. ALL CONTRACTOR EMPLOYEES TO BE SUPERVISED BY MAF BADGED OFFICIAL AT ALL TIMES DURING CONSTRUCTION PERIOD.



PLAN VIEW

BARRICADE NOTES
1. BARRICADES ARE TO BE PLACED AROUND ALL AREAS CLOSED TO AIRCRAFT TRAFFIC. BARRICADE SPACING SHALL BE AS REQUIRED BY THE LATEST EDITION OF FAA AC150/5370-2
2. BARRICADES SHALL BE CHECKED DAILY FOR PROPER PLACEMENT AND OPERATION.
3. FOR ALL LOCATIONS WHERE BARRICADES ARE TO INSTALLED ACROSS RUNWAY OR TAXIWAY EXTEND BARRICADES FROM EDGE LIGHT LINE TO EDGE LIGHT LINE. MAINTAIN ONE 5' GAP EITHER SIDE OF CENTERLINE FOR VEHICLE PASSAGE.
4. CONTRACTOR SHALL PROVIDE MEANS OF RESTRAINING BARRICADES TO ENSURE THEY ARE NOT MOVED BY WIND OR JET BLAST.
5. FAA-APPROVED MANUFACTURED BARRICADES ARE ACCEPTABLE ALTERNATIVES TO DETAIL SHOWN.

APPENDIX C: ADVISORY CIRCULAR 150/5370-2G, OPERATIONAL SAFETY ON AIRPORTS DURING CONSTRUCTION

All contractors and subcontractors responsible for implementation of this CSPP must review all relevant sections of the FAA AC 150/5370-2G, Operating Safety on Airports During Construction prior to commencement of construction.

See here for link to the full Advisory Circular PDF:
https://www.faa.gov/documentLibrary/media/Advisory_Circular/150-5370-2G.pdf

APPENDIX D: FAA FORM 7460-1, NOTICE OF PROPOSED CONSTRUCTION OR ALTERATION (BLANK)

NOTICE OF PROPOSED CONSTRUCTION OR ALTERATION

§ 77.7 Form and time of notice.

(a) If you are required to file notice under §77.9, you must submit to the FAA a completed FAA Form 7460–1, Notice of Proposed Construction or Alteration. FAA Form 7460–1 is available at FAA regional offices and on the Internet.

(b) You must submit this form at least 45 days before the start date of the proposed construction or alteration or the date an application for a construction permit is filed, whichever is earliest.

(c) If you propose construction or alteration that is also subject to the licensing requirements of the Federal Communications Commission (FCC), you must submit notice to the FAA on or before the date that the application is filed with the FCC.

(d) If you propose construction or alteration to an existing structure that exceeds 2,000 ft. in height above ground level (AGL), the FAA presumes it to be a hazard to air navigation that results in an inefficient use of airspace. You must include details explaining both why the proposal would not constitute a hazard to air navigation and why it would not cause an inefficient use of airspace.

(e) The 45-day advance notice requirement is waived if immediate construction or alteration is required because of an emergency involving essential public services, public health, or public safety. You may provide notice to the FAA by any available, expeditious means. You must file a completed FAA Form 7460–1 within 5 days of the initial notice to the FAA. Outside normal business hours, the nearest flight service station will accept emergency notices.

§ 77.9 Construction or alteration requiring notice.

If requested by the FAA, or if you propose any of the following types of construction or alteration, you must file notice with the FAA of:

(a) Any construction or alteration that is more than 200 ft. AGL at its site.

(b) Any construction or alteration that exceeds an imaginary surface extending outward and upward at any of the following slopes:

(1) 100 to 1 for a horizontal distance of 20,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway more than 3,200 ft. in actual length, excluding heliports.

(2) 50 to 1 for a horizontal distance of 10,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway no more than 3,200 ft. in actual length, excluding heliports.

(3) 25 to 1 for a horizontal distance of 5,000 ft. from the nearest point of the nearest landing and takeoff area of each heliport described in paragraph (d) of this section.

(c) Any highway, railroad, or other traverse way for mobile objects, of a height which, if adjusted upward 17 feet for an Interstate Highway that is part of the National System of Military and Interstate Highways where overcrossings are designed for a minimum of 17 feet vertical distance, 15 feet for any other public roadway, 10 feet or the height of the highest mobile object that would normally traverse the road, whichever is greater, for a private road, 23 feet for a railroad, and for a waterway or any other traverse way not previously mentioned, an amount equal to the height of the highest mobile object that would normally traverse it, would exceed a standard of paragraph (a) or (b) of this section.

(d) Any construction or alteration on any of the following airports and heliports:

(1) A public use airport listed in the Airport/Facility Directory, Alaska Supplement, or Pacific Chart Supplement of the U.S. Government Flight Information Publications;

(2) A military airport under construction, or an airport under construction that will be available for public use;

(3) An airport operated by a Federal agency or the DOD.

(4) An airport or heliport with at least one FAA-approved instrument approach procedure.

(e) You do not need to file notice for construction or alteration of:

(1) Any object that will be shielded by existing structures of a permanent and substantial nature or by natural terrain or topographic features of equal or greater height, and will be located in the congested area of a city, town, or settlement where the shielded structure will not adversely affect safety in air navigation;

(2) Any air navigation facility, airport visual approach or landing aid, aircraft arresting device, or meteorological device meeting FAA-approved siting criteria or an appropriate military service siting criteria on military airports, the location and height of which are fixed by its functional purpose;

(3) Any construction or alteration for which notice is required by any other FAA regulation.

(4) Any antenna structure of 20 feet or less in height, except one that would increase the height of another antenna structure.

INSTRUCTIONS FOR COMPLETING FAA FORM 7460-1

PLEASE TYPE or PRINT

ITEM #1. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #2. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #3. New Construction would be a structure that has not yet been built.

Alteration is a change to an existing structure such as the addition of a side mounted antenna, a change to the marking and lighting, a change to power and/or frequency, or a change to the height. The nature of the alteration shall be included in ITEM #21 "Complete Description of Proposal".

Existing would be a correction to the latitude and/or longitude, a correction to the height, or if filing on an existing structure which has never been studied by the FAA. The reason for the notice shall be included in ITEM #21 "Complete Description of Proposal".

ITEM #4. If Permanent, so indicate. If Temporary, such as a crane or drilling derrick, enters the estimated length of time the temporary structure will be up.

ITEM #5. Enter the date that construction is expected to start and the date that construction should be completed.

ITEM #6. Please indicate the type of structure. DO NOT LEAVE BLANK.

ITEM #7. In the event that obstruction marking and lighting is required, please indicate type desired. If no preference, check "other" and indicate "no preference" DO NOT LEAVE BLANK. NOTE: High Intensity lighting shall be used only for structures over 500' AGL. In the absence of high intensity lighting for structures over 500' AGL, marking is also required.

ITEM #8. If this is an existing tower that has been registered with the FCC, enter the FCC Antenna Structure Registration number here.

ITEM #9 and #10. Latitude and longitude must be geographic coordinates, accurate to within the nearest second or to the nearest hundredth of a second if known. Latitude and longitude derived solely from a hand-held G P S instrument is NOT acceptable. A hand-held GPS is only accurate to within 100 meters (328 feet) 95 percent of the time. This data, when plotted, should match the site depiction submitted under ITEM #20.

ITEM #11. NAD 83 is preferred; however, latitude and longitude may be submitted in NAD 27. Also, in some geographic areas where NAD 27 and NAD 83 are not available other datum may be used. It is important to know which datum is used. DO NOT LEAVE BLANK.

ITEM #12. Enter the name of the nearest city and state to the site. If the structure is or will be in a city, enter the name of that city and state.

ITEM #13. Enter the full name of the nearest public-use (not private-use) airport or heliport or military airport or heliport to the site.

ITEM #14. Enter the distance from the airport or heliport listed in #13 to the structure.

ITEM #15. Enter the direction from the airport or heliport listed in #13 to the structure.

ITEM #16. Enter the site elevation above mean sea level and expressed in whole feet rounded to the nearest foot (e.g. 17'3" rounds to 17', 17'6" rounds to 18'). This data should match the ground contour elevations for site depiction submitted under ITEM #20.

ITEM #17. Enter the total structure height above ground level in whole feet rounded to the next highest foot (e.g. 17'3" rounds to 18'). The total structure height shall include anything mounted on top of the structure, such as antennas, obstruction lights, lightning rods, etc.

ITEM #18. Enter the overall height above mean sea level and expressed in whole feet. This will be the total of ITEM #16 + ITEM #17.

ITEM #19. If an FAA aeronautical study was previously conducted, enter the previous study number.

ITEM #20. Enter the relationship of the structure to roads, airports, prominent terrain, existing structures, etc. Attach an 8-1/2" x 11" non-reduced copy of the appropriate 7.5 minute U.S. Geological Survey (USGS) Quadrangle Map MARKED WITH A PRECISE INDICATION OF THE SITE LOCATION. To obtain maps, contact USGS at 1-888-275-8747 or via internet at "http://store.usgs.gov". If available, attach a copy of a documented site survey with the surveyor's certification stating the amount of vertical and horizontal accuracy in feet.

ITEM #21.

- For transmitting stations, include maximum effective radiated power (ERP) and all frequencies.
- For antennas, include the type of antenna and center of radiation (Attach the antenna pattern, if available).
- For microwave, include azimuth relative to true north.
- For overhead wires or transmission lines, include size and configuration of wires and their supporting structures (Attach depiction).
- For each pole/support, include coordinates, site elevation, and structure height above ground level or water.
- For buildings, include site orientation, coordinates of each corner, dimensions, and construction materials.
- For alterations, explain the alteration thoroughly.
- For existing structures, thoroughly explain the reason for notifying the FAA (e.g. corrections, no record or previous study, etc.).

Filing this information with the FAA does not relieve the sponsor of this construction or alteration from complying with any other federal, state or local rules or regulations. If you are not sure what other rules or regulations apply to your proposal, contact local/state aviation's and zoning authorities.

Paperwork Reduction Work Act Statement: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection displays a currently valid OMB Control Number. The OMB control number for this information collection is 2120-0001. Public reporting for this collection of information is estimated to be approximately 19 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, completing and reviewing the collection of information. All responses to this collection of information are mandatory for anyone proposing construction or alteration that meets the criteria contained in 14 CFR 77. This information is collected to evaluate the effect of proposed construction or alteration on air navigation and is not confidential. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177-1524.

Privacy Act Statement (5 U.S.C. § 552a, as amended): AUTHORITY: The FAA is responsible for issuing a determination based on extensive analysis completed in accordance with 49 United States Code (USC) Sections 44718. Title 14 of the Code of Federal Regulations (14 CFR), part 77 authorizes FAA to collect this information. PURPOSE(S): FAA will use the information provided to administer the Aeronautical Study Process. ROUTINE USE(S): In accordance with DOT's system of records notice, DOT/ALL 16 Mailing Management System and DOT/FAA 826 Petitions for Exemption, Other than Medical Exemption-Public Dockets, the information provided may be disclosed to officials within the Federal government and the public in general.

APPENDIX E: FAA CSPP REVIEW CHECKLIST

Project Manager to complete this checklist at final review before sealing CSPP.

Checklist for FAA CSPP Review

Airport Name: _____ LOCID: _____

Associate City: _____

Project No. _____

Project Name: _____

F.1.1. AC 150/5370-2G

This checklist identifies the main elements and sub-elements established under Chapter 2 of Advisory Circular 150/5370-2G. Project Managers (PM) are encouraged to use this checklist as an aid when reviewing a Sponsor's CSPP for conformance to the safety standards. Because the PM's approval/disapproval letter in OE/AAA represents the official FAA action, a completed checklist is not a required record the PM must sign or archive in the grant file.

City Council Meeting

Item Number: 11

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Adrian Acosta, Manager, Engineering (Development)

Subject: **Motion approving a request by Newton Engineering, to defer paving improvements for Midkiff Industrial Center, Section 28, and to waive the corresponding financial security guarantee valued at $84,496.00, an amount equal to the estimated cost to construct the public infrastructure. The subject property is generally located east of South Midkiff Road and south of West Industrial Avenue. The property is within the corporate limits of the City of Midland (DISTRICT 2) (ENGINEERING SERVICES)**

Purpose:

Motion approving a request by Newton Engineering, to defer paving improvements for Midkiff Industrial Center, Section 28, and to waive the corresponding financial security guarantee valued at $84,496.00, an amount equal to the estimated cost to construct the public infrastructure. The subject property is generally located east of S. Midkiff Road and south of W. Industrial Avenue. The property is within the corporate limits of the City of Midland.

Recommended City Council Action:

Approve

Fiscal Impact:

Water Distribution $ 0.00
Wastewater Collection $ 0.00
Paving $ 84,496.00
Sidewalk $ 0.00
Drainage $ 0.00

Total Value of Deferral $ 84,496.00

Discussion:

Midkiff Industrial Center, Section 28 is proposed as a 7.23-acre subdivision. The two-tract subdivision is generally located east of S. Midkiff Road and south of W. Industrial Avenue. The address for the property is 2 W Industrial Loop, inside the corporate limits of the City of Midland.

Newton Engineering, on behalf of the developer, Industrial Oils Inc, has requested to defer paving improvements, and waive the corresponding financial security guarantee, which is equal to 100% of the developer's portion of the construction costs.

Paving:
W. Industrial Loop is not currently constructed to City of Midland standards along the frontage of the proposed development. Newton Engineering is requesting to defer paving improvements along this stretch of W. Industrial Loop. It is the opinion of Engineering staff to accept the deferral request for paving improvements due to W. Industrial Loop being outside of City Limits. The developer will also be dedicating an additional 20 feet to Midkiff's R.O.W. Based on these circumstances, it is the recommendation of Engineering staff to accept the deferral request for paving improvements.

Should Council agree to the deferral for one or all improvements construction, staff will nevertheless require that the following note by added to the Final Plat.

The installation of public improvements may be required by the City of Midland at such time as: (1) the 7.23-acre tract is re-platted for subdivision into more than three lots, or (2) the property is rezoned for a more intensive use.

Attached are the deferral request, Opinion of Probable Cost and Preliminary Plat prepared by HPF Consultants. A location map is also included.

Midland, Texas 79702

RE: Midkiff Industrial Center, Section 28- Request for a Deferral of Public Improvement Installation

Mr. Ortiz:

On behalf of our client, Industrial Oils Inc., we respectfully request deferral of public improvements for Midkiff Industrial Center, Section 28, and waiver of the corresponding financial security guarantee valued at $84,496.00, an amount equal to the estimated cost of construction. The subject property is a 7.23-acre tract on the east side of S Midkiff Road approximately 0.25 miles south of W Industrial Avenue. The property is currently in the process of being replatted.

Fiscal Impact:

Paving Improvements	$84,496.00
Total Value of Deferral	$84,496.00
Cash deposit or other acceptable security (requested)	*$0.00*

The area surrounding the proposed development consists of industrial use. S Midkiff Road to the west is currently paved to City Standards. W Industrial Loop the east is currently strip paved to a width of approximately 21' with no curb and gutter. The pavement surface is in fair condition. Public paving and sidewalk improvements will be deferred.

1. Water Distribution: 12" water exists in Midkiff Road and 6" water exists in W Industrial Loop, therefore no public improvements are required.
2. Wastewater Collection: 15" Sewer exists in Midkiff Road and 6" sewer exists in the alley to the north, therefore no public improvements are required.
3. Paving: We are requesting to defer public paving of W Industrial Loop to City Standards, and waiver of the corresponding financial security guarantee, equal to

NEWTON ENGINEERING, PC
4501A Santa Rosa Dr.
Midland, Texas 79707
(432) 770-0499
F-13856
F-10194809

Odessa, Texas 79761
(432) 935-0707

the construction costs estimated to be $84,496.00. The subject property has access to S Midkiff Road, which is paved to City Standards. The W Industrial Loop ROW is not in a state that is ready for construction of a roadway built to City Standards. Adjacent to the subject property, the ROW is only approximately 45’ wide. Dedication of additional ROW by the owner, Industrial Oils Inc. is not practical due to an existing building at the southeast corner of the tract that would encroach on City ROW if dedicated. Additionally, the construction of curb and gutter could potentially disturb the existing drainage pattern in the ROW, and would necessitate more extensive redesign of W Industrial Loop to the north and to the south to prevent ponding. The deferral request includes repaving W Industrial Loop to a 41’ local section with curb and gutter on both sides along the platted frontage.

4. Drainage: No drainage study is required at this time due to the existing site being developed.

If you have any questions or need additional information please let me know.

Sincerely,

John Newton, P.E.

City Council Meeting

Item Number: 12

Meeting Date: July 11, 2023

To: City Council / City Manager

From: John Simmons, Manager, Right-of-Way

Subject: Motion authorizing the execution of a Right-of-Way License (23-329-008) with Enterprise Navitas Midstream Midland Basin, LLC regarding City-owned property described as Section 30, Block 36, Township 3 South, T&P RR Co. Survey, Midland County, Texas (DISTRICT: NONE) (UTILITIES)

Purpose:

This motion will provide the applicant a 3,500 square foot surface area for above-ground valve connection and a 30’ wide right of way to place a Twenty-Four inch (24) privately owned, poly construction, natural gas pipeline on the City of Midland owned Sprayberry Farm real property. The applicant will need additional temporary workspaces for construction as shown on the plats.

This Right-of-Way License is proposed for a single ten (10) year period, paid in advance. Terms are consistent with the City’s standard license for facilities of this nature

Recommended City Council Action:

Approve

Fiscal Impact:

10-Years Paid In advance:

24” pipeline (61.31 rods x $750/rod): $45,982.50

Surface use area (3,500 sq. ft. x $0.24 per sq. ft.): $840.00

Surface Damages: included in the new annual rate

Total Collected: $47,822.50

Discussion:

This Right of Way is in the South Half of Section 30 in the Sprayberry Farm area and is over 2 miles from COM infrastructure. The proposed pipeline is a private, poly-construction gas line and will be Twenty-Four Inches (24”) in diameter and will be buried a minimum of thirty-six inches (36”) deep.

Certificates of Insurance are on file

City Secretary is to record all documents.

METES AND BOUNDS DESCRIPTION

TEMPORARY RIGHT OF WAY "A"

BEING A PROPOSED 25 FOOT WIDE TEMPORARY RIGHT OF WAY SITUATED IN SECTION 30, BLOCK 36, TOWNSHIP 3 SOUTH, T. & P. RR. CO. SURVEY, ABSTRACT NO. 957, MIDLAND COUNTY, TEXAS. SAID RIGHT OF WAY BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT (N:10642713.47, E:1845085.93) IN SAID SECTION 30, FROM WHICH A 1" IRON PIPE FOUND FOR THE NORTHWEST CORNER OF SAID SECTION 30 BEARS N 20°20'03" W, A DISTANCE OF 4277.60 FEET (TIE);

THENCE N 74°24'34" E, A DISTANCE OF 6.99 FEET TO A POINT, FROM WHICH THE CALCULATED NORTHEAST CORNER OF SAID SECTION 30 BEARS N 34°33'18" E, A DISTANCE OF 6548.05 FEET (TIE), FROM WHICH A FOUND 1/2" BENT IRON PIPE BEARS S 14°51'28" E, A DISTANCE OF 0.38 FEET (TIE);
THENCE S 14°10'21" E, A DISTANCE OF 70.00 FEET TO A POINT;
THENCE N 75°49'39" E, A DISTANCE OF 19.75 FEET TO A POINT;
THENCE S 15°35'26" E, A DISTANCE OF 64.62 FEET TO A POINT;
THENCE S 60°35'26" E, A DISTANCE OF 73.67 FEET TO A POINT;
THENCE S 14°08'34" E, A DISTANCE OF 34.49 FEET TO A POINT;
THENCE N 60°35'26" W, A DISTANCE OF 107.79 FEET TO A POINT;

THENCE N 15°35'26" W, A DISTANCE OF 145.44 FEET TO THE POINT OF BEGINNING.

SAID RIGHT OF WAY CONTAINING A TOTAL OF 4,449 SQUARE FEET OR 0.102 ACRES IN SAID SECTION 30.

SURFACE SITE

BEING A PROPOSED SURFACE SITE SITUATED IN SECTION 30, BLOCK 36, TOWNSHIP 3 SOUTH, T. & P. RR. CO. SURVEY, ABSTRACT NO. 957, MIDLAND COUNTY, TEXAS. SAID SURFACE SITE BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT (N:10642715.35, E:1845092.66) IN SAID SECTION 30, FROM WHICH A 1" IRON PIPE FOUND FOR THE NORTHWEST CORNER OF SAID SECTION 30 BEARS N 20°25'38" W, A DISTANCE OF 4278.18 FEET (TIE);

THENCE N 75°49'39" E, A DISTANCE OF 50.00 FEET TO A POINT, FROM WHICH THE CALCULATED NORTHEAST CORNER OF SAID SECTION 30 BEARS N 34°15'53" E, A DISTANCE OF 6510.56 FEET (TIE), FROM WHICH A FOUND 1/2" BENT IRON PIPE BEARS S 14°51'28" E, A DISTANCE OF 0.38 FEET (TIE);
THENCE S 14°10'21" E, A DISTANCE OF 70.00 FEET TO A POINT;
THENCE S 75°49'39" W, A DISTANCE OF 50.00 FEET TO A POINT;

THENCE N 14°10'21" W, A DISTANCE OF 70.00 FEET TO THE POINT OF BEGINNING.

SAID SURFACE SITE CONTAINING A TOTAL OF 3,500 SQUARE FEET OR 0.080 ACRES IN SAID SECTION 30.

TEMPORARY RIGHT OF WAY "B"

BEING A PROPOSED 40 FOOT WIDE TEMPORARY RIGHT OF WAY SITUATED IN SECTION 30, BLOCK 36, TOWNSHIP 3 SOUTH, T. & P. RR. CO. SURVEY, ABSTRACT NO. 957, MIDLAND COUNTY, TEXAS. SAID RIGHT OF WAY BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT (N:10642705.53, E:1845203.22) IN SAID SECTION 30, FROM WHICH A 1" IRON PIPE FOUND FOR THE NORTHWEST CORNER OF SAID SECTION 30 BEARS N 21°45'15" W, A DISTANCE OF 4327.13 FEET (TIE);

THENCE N 75°24'28" E, A DISTANCE OF 40.00 FEET TO A POINT, FROM WHICH THE CALCULATED NORTHEAST CORNER OF SAID SECTION 30 BEARS N 33°28'00" E, A DISTANCE OF 6464.34 FEET (TIE), FROM WHICH A FOUND 1/2" BENT IRON PIPE BEARS S 14°51'28" E, A DISTANCE OF 0.38 FEET (TIE);
THENCE S 14°08'34" E, A DISTANCE OF 383.81 FEET TO A POINT;
THENCE S 15°26'17" E, A DISTANCE OF 117.96 FEET TO A POINT;
THENCE S 14°42'37" E, A DISTANCE OF 83.41 FEET TO A POINT;
THENCE S 14°28'43" E, A DISTANCE OF 378.24 FEET TO A POINT;

RIGHT OF WAY LICENSE

THE STATE OF TEXAS §
§ KNOW ALL MEN BY THESE PRESENTS:
COUNTY OF MIDLAND §

Date:	July 12, 2023
Licensor:	CITY OF MIDLAND, TEXAS, a home-rule municipal corporation
Licensor's Representative:	Morris Williams, Jr., Interim City Manager
Licensor's Mailing Address:	P.O. Box 1152 Midland, Texas 79702
Licensee:	**Enterprise Navitas Midstream Midland Basin LLC**
Licensee's Representative:	**Cody B. Trevino**
Licensee's Mailing Address:	1100 Louisiana Street, Suite 1000 Houston, Texas 77002
Property:	As described in Article III below
License Number:	**23-329-008**

Licensee desires use of certain Property (as defined below) owned by Licensor in Midland County, Texas, for purposes set forth below. Licensee acknowledges and agrees that it must obtain a license (the "License") in order to use the public lands of Licensor.

W I T N E S S E T H:

For and in consideration of the execution of this license (this "License") and the mutual promises and covenants of the parties hereto, it is mutually promised, understood and agreed as follows:

I. Term

A. Term. This License shall be for a term of ten (10) years commencing on the date of this License (the "Commencement Date") unless terminated earlier as provided hereafter.

B. Termination. Licensor may terminate this License if Licensee fails to pay, when due, any amount owing under this License and that failure continues for sixty (60) days or, if Licensee commits any material breach or material default in performance of any obligation, prohibition, restriction, provision or covenant contained in this License, and the breach or default continues for a period of thirty (30) days after Licensor delivers notice to Licensee reasonably detailing the breach or default.

Additionally, Licensor may terminate this License at will for any or no reason upon giving at least three hundred sixty-five (365) days' written notice to Licensee. The parties to this License understand and agree that it is in Licensor's sole discretion to terminate this License during the term of this License without penalty to Licensor. Licensee has no expectation and has received no guarantees that this License will not be terminated before the end of the License term. The parties have bargained for the flexibility of terminating this License upon tender of the requisite notice at any time during the term of this License. All work and services under this License shall be suspended upon termination of this License.

Upon expiration or termination of this License, Licensee shall remove all equipment and structures associated with the undertakings contemplated by this License. After removal of all equipment and structures associated with the undertakings contemplated by this License, the surface of the Property shall be restored at the expense of Licensee to its original condition, as close thereto as may be practical, subject to the approval of Licensor upon inspection by Licensor's Representative, which approval shall not be unreasonably withheld. All of said work shall be completed within one hundred eighty (180) days after the expiration or termination of this License. All of the terms, provisions and requirements of this paragraph shall survive the expiration or termination of this License.

II. Financial Consideration

A. License Fee. A license fee in the amount of FORTY-SIX THOUSAND EIGHT HUNDRED TWENTY-TWO and 50/100 Dollars ($46,822.50) ("License Fee") shall be due and payable on or prior to the Commencement Date.

In the event Licensor terminates this License pursuant to the provisions of Section I.B., Licensor agrees to refund to Licensee a pro rata share of the License Fee actually paid by Licensee to Licensor for that portion of the remaining term that is being terminated. For the avoidance of doubt, the amount of any refund payable to Licensee pursuant to this paragraph shall be determined net of any costs or expenses incurred by Licensor in connection with Licensee's unfulfilled obligations under this License (if any).

B. Application Fee. On or prior to the Commencement Date of this License, Licensee shall pay a non-refundable one-time fee of One Thousand and No/100 Dollars ($1,000.00) to Licensor's Representative. Said fee shall revert to Licensor and Licensee shall have no claim to said fee. The fee shall be used to process the application for this License.

C. Delivery of Payment. Payment of the above fees shall be made to Licensor at the office of Licensor's Representative, Attn: Right of Way Manager, P.O. Box 1152, Midland, Texas, 79702. Payment of the above fees shall be exclusive of and in addition to all general municipal taxes of whatever nature, including but not limited to ad valorem taxes and special taxes and assessments for public improvements.

D. Late Payment. Licensee's failure to make payment of any of the above fees within thirty (30) days after such fee is due shall constitute a late payment and Licensee shall pay Licensor a late charge of five percent (5%) of such fee.

III. Use

A. Permitted Use. Licensor does hereby grant unto Licensee, the right to enter upon the Property, being forty (40) feet in width of the locations as shown on **Exhibits A and B** attached hereto and incorporated herein for the purpose of operating, repairing, maintaining, replacing and removing, thereon, along the herein described locations, a poly construction pipeline, not to exceed twenty-four (24) inches in diameter, for the transportation of natural gas and a three thousand five hundred (3,500) square foot surface site for an above ground valve connection and to have the right of ingress and egress at convenient points for such purpose and said construction width shall revert to thirty (30) feet after the pipeline is completed (the "Property"). **Licensee shall provide Licensor with a complete as-built survey within sixty (60) days of completion of the pipeline(s) and facilities described herein. The parties agree Licensee's failure to provide Licensor with a complete as-built survey within sixty (60) days of completion of the pipeline(s) and facilities described herein may result in the termination of this License. The decision to accept a complete as-built survey after the sixty-day deadline prescribed herein, or, conversely, to terminate this License shall be in the sole and absolute discretion of Licensor.**

B. Road Repair. Licensee covenants and agrees that it will repair, at its own expense, any of Licensor's roads that Licensee, its employees, contractors, representatives, agents or assigns damage on Licensor's property, so that such roads will comply with Licensor's standard specifications.

C. Utility Repair. Licensee covenants and agrees that Licensee shall, at its own expense, repair all water lines, sewer lines, service lines, water meters and other utility lines owned by Licensor that Licensee, its employees, contractors, representatives, agents or assigns, damage so that such water lines, sewer lines, water meters and other utility lines shall comply with Licensor's standard specifications.

D. Pipeline Depth. Licensee covenants and agrees that it will bury the pipeline to be constructed hereunder no less than thirty-six (36) inches in depth. All backfill used in burying such pipeline shall be compacted to a density of ninety percent (90%), except where such pipeline crosses under a paved or traveled portion of any City of Midland right of way where such backfill shall be compacted to a density of ninety-five percent (95%). Licensor shall be afforded the opportunity to test the density on all backfill. Notwithstanding any provision to the contrary contained herein, Licensee covenants and agrees that, at any point that Licensee's pipeline intersects with a City of Midland utility line location, the pipeline shall be bored at a depth of at least (i) nine (9) feet under all City of Midland water utility lines and (ii) two (2) feet under all City of Midland sewer utility lines. Licensee agrees that it shall comply with 30 Tex. Admin. Code § 290.44(e), as amended, to the extent applicable to this License.

E. Approval of Bids. Before Licensee seeks bids on any phase of the repair of public streets, alleys, water lines, sewer lines or any other public utilities, Licensee shall first obtain written approval of the specifications therefor from Licensor's Representative, which approval shall be at Licensor's Representative's sole discretion.

F. Reservation of Rights. Licensor expressly reserves the right to install, repair, or reconstruct streets or roads and all ancillary public uses usual and customary in connection with streets and roads, expressly including but not limited to drainage facilities and related structures in the rights

of way used and occupied by Licensee.

Licensor reserves the right to lay and permit to be laid, sewer, gas, water, and other pipelines or cables and conduits, and to do and permit to be done, any underground or overhead installation or improvement that may be deemed necessary or proper by the governing body of Licensor, in, on, across, along, over, under, and through any property occupied by Licensee. In permitting such work to be done, Licensor shall not be liable to Licensee for any damage so caused to Licensee's system or property, **NOR SHALL LICENSOR BE LIABLE TO LICENSEE FOR ANY DAMAGES TO LICENSEE'S PIPELINE OR OTHER PERMITTED FACILITIES ARISING OUT OF THE NEGLIGENCE BY LICENSOR, ITS EMPLOYEES, OFFICERS OR AGENTS, OR LICENSOR'S CONTRACTORS OR SUBCONTRACTORS.** If Licensor requires Licensee to remove, alter, change, adapt, or conform Licensee's facilities because of changes in the grade or construction of a street or in the location or manner of constructing a water pipe, sewer pipe, or other surface, underground or aboveground structure owned by Licensor, Licensee shall make the alterations or changes as soon as practicable, and in no event longer than one hundred eighty (180) days, when ordered in writing by Licensor, without claim for reimbursement for the cost of the relocation or for damages against Licensor. If these requirements impose a financial hardship upon Licensee, Licensee shall have the right to present alternative proposals for Licensor's consideration.

G. Non-exclusive. Licensor expressly reserves the full right to grant other easements or rights of way crossing or running parallel with the rights of way used by Licensee.

H. Abandonment. It is especially provided, however, that as an express condition of this License, and not as a mere covenant, in the event Licensee abandons any equipment or appurtenances associated with the undertakings contemplated by this License, or the Property ceases to be used for the purposes enumerated herein for any period of twelve (12) consecutive months, or longer, other than the time elapsing between the date hereof and construction, and upon giving Licensee one hundred and twenty (120) days' written notice, then and in that event, this License shall automatically terminate and revert to Licensor, its successors or assigns, free and clear of any right, title, or interest of Licensee.

I. Approval of Specifications. In the event Licensee desires to reconstruct, repair, alter, replace or remove any pipeline or other permitted facilities built hereunder, Licensee shall submit the plans and specifications that pertain to the rebuilding or repairs of Licensor's streets and roads and the rebuilding or repairs of any of Licensor's public utilities to Licensor's Representative for his or her prior written approval, which approval shall be at Licensor's Representative's sole discretion. In the event of emergency repairs necessary to restore service, Licensee shall notify Licensor's Representative before making any repairs if during a Licensor workday. If not on a workday, Licensee shall notify Licensor's Representative on the first workday after repairs have begun.

J. Gates and Fences. Without altering or expanding the limitations on ingress, egress and access to the Property set forth in Paragraph A. of Article III above, Licensee agrees to use existing gates and roadways where available, to enter, leave and cross the Property; provided that Licensee shall not use any road marked "Closed". Licensee and all persons entering or leaving the Property in connection with Licensee's operations hereunder shall keep all outside and interior gates securely closed except during operations related to this License. Licensee shall keep all outside gates, and all other gates designated by Licensor, securely locked except during operations related to this

License. At any gate that is to be locked, Licensor may install its own lock in addition to Licensee's lock.

Licensee agrees that Licensee shall not cut or go over any fence at any time or in connection with any operations on the Property without first obtaining Licensor's express prior consent thereto in writing. All gates or openings in fences shall be at mutually agreeable location(s) between Licensee and Licensor and shall be constructed as reasonably required by Licensor. Upon the termination of this License, at Licensor's election, gates in fences shall be left in place and shall thereafter be owned by Licensor or Licensee shall remove such gates and restore the fence to its original condition as nearly as reasonably practicable. The terms, provisions and requirements of this provision shall survive the termination or expiration of this License.

K. Trash. Licensee shall keep the Property free of trash and debris at all times. Under no circumstances, will Licensee be allowed to bury any trash, debris or foreign material of any kind on or under the Property. Licensor shall have the right to expel and permanently ban from the Property any person observed disposing of trash on the Property. Upon the completion of any operations, all ribbons, flags, stakes and similar items shall by promptly removed from the Property.

L. Hunting, Fishing and Alcohol Prohibited. No agent, employee, representative, contractor or subcontractor of Licensee or any other person allowed to enter the Property by Licensee shall be permitted to hunt, fish, trap, camp, picnic, ride motorcycles or four-wheelers or otherwise conduct any social gathering on the Property, nor shall any such persons be permitted to bring firearms, archery equipment, dogs, alcoholic beverages or illegal drugs on the Property at any time. Violations of this provision shall cause the violator to be regarded as a trespasser and subject to prosecution under trespass laws of the State of Texas. Licensor shall have the right to expel and permanently ban from the Property any person observed on the Property in violation of this provision.

M. Storage of Machinery and Equipment. Licensee shall use no part of the Property to store machinery, equipment, or other property of Licensee while it is not being used.

N. Additional Reservations. Licensor reserves the right to use the surface, subsurface or airspace on, below or above the land covered by this License for any purpose allowed by law and deemed necessary or proper by Licensor and to do and permit to be done, any work in connection therewith which may be deemed necessary or proper by Licensor in, on, across, along, over, under, and through any portion of the Property. In the event of such work in connection with said purposes it shall be deemed necessary or proper by Licensor, at Licensor's sole discretion, to alter, change, or relocate any pipeline, property, or casing of Licensee, such alteration or change or relocation shall be commenced and completed by Licensee within one hundred eighty (180) days after being ordered in writing by Licensor pursuant to directions from Licensor without any claim for reimbursement for the cost of the alteration, change or relocation or damages against Licensor. The relocation, change, or alteration shall be at the sole cost of Licensee. Provided, however, that Licensee shall at all times be entitled to receive from appropriate governmental bodies, excluding Licensor, payment for alteration, change or relocation of its system to which it may be lawfully entitled to under applicable federal or state laws with respect to relocation payments. Without limiting the foregoing, Licensor expressly reserves the full right to grant other licenses, easements and/or rights-of-way in, on, across, along, over, under or through all or any portion of the Property.

Licensor expressly reserves the right to use and grant to third parties the right to use all or any portion of the Property and the surface, subsurface or airspace on, below or above the Property for any purpose.

IV. Standard General Conditions

A. Insurance. Licensee shall at all times during the term of this License maintain and keep in full force and effect insurance in the following types and minimum amounts with companies authorized to do business in the State of Texas:

Commercial General Liability (including Contractual liability):	
■ Personal Injury:	$1,000,000.00 per person $1,000,000.00 per occurrence
■ Property Damage:	$100,000.00 per occurrence
Business Automobile Liability:	$1,000,000.00 combined single limit-- Personal Injury and Property Damage
Workers' Compensation:	Statutory limits
Employers' Liability:	$1,000,000.00 per accident or occurrence
Umbrella Liability:	$10,000,000.00 each occurrence $10,000,000.00 aggregate

The Commercial General Liability shall be on an occurrence basis. This insurance shall name Licensor as an additional insured and all insurance shall waive subrogation in favor of Licensor.

The Workers' Compensation coverage provided by Licensee shall inure to the benefit of employees injured during the course and scope of their employment by Licensee pursuant to this License. The Workers' Compensation insurance shall waive all rights of subrogation against Licensor.

The Business Automobile Liability insurance provided by Licensee shall cover any auto for bodily injury and property damage, including owned vehicles, hired and non-owner vehicles, and employee non-ownership, and the amount of such policy shall be a minimum of $1,000,000.00 covering any vehicle used for the execution of the work that is the subject of this License. This insurance shall name Licensor as an additional insured and all insurance shall waive subrogation in favor of Licensor.

All insurance required pursuant to this License, except for Worker's Compensation Insurance, shall name Licensor as an additional insured. All insurance required pursuant to this License, including Worker's Compensation Insurance, shall provide for a waiver of subrogation as to Licensor. The parties agree that, prior to the execution of this License, Licensee shall provide one or more certificates of insurance showing that the requirements of this article have been met. Licensor shall determine, in its sole discretion, whether such requirements have been satisfied.

Licensor shall be provided written notice by Licensee's insurance provider not later than thirty

(30) days prior to any reduction or termination of such coverage. Licensor shall not be required to provide any insurance whatsoever pursuant to this License.

Licensee shall contractually require all contractors, subcontractors, and sub-subcontractors that work on any portion of the work that is the subject of this License to obtain insurance coverage that meets or exceeds the policy requirements and minimum amounts as required herein and name the City of Midland as an additional insured (except as to Worker's Compensation Insurance). Licensee certifies that the one or more certificates of insurance provided as required herein complies with the requirements of Chapter 1811 of the Texas Insurance Code. Licensee shall not use an unapproved certificate of insurance or insert inappropriate language on a certificate. Compliance with state law is the sole responsibility of Licensee.

B. Indemnity. TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, LICENSEE, ITS SUCCESSORS AND ASSIGNS, AGREE TO INDEMNIFY, PROTECT, DEFEND AND HOLD HARMLESS LICENSOR AND LICENSOR'S REPRESENTATIVES, AGENTS, ATTORNEYS, EMPLOYEES, SUCCESSORS AND ASSIGNS (COLLECTIVELY, "INDEMNITEES") FOR, FROM AND AGAINST ANY AND ALL CLAIMS, LOSSES, DAMAGES, LIABILITIES, LIENS, FINES, PENALTIES, CAUSES OF ACTION, SUITS, CHARGES, JUDGMENTS, ADMINISTRATIVE ORDERS, REMEDIATION REQUIREMENTS, ENFORCEMENT ACTIONS OF ANY KIND, PERSONAL INJURIES, PROPERTY DAMAGE, AND ALL COSTS AND EXPENSES INCURRED IN CONNECTION THEREWITH (INCLUDING, BUT NOT LIMITED TO, ATTORNEYS' FEES AND EXPENSES, INCLUDING, WITHOUT LIMITATION, ALL ATTORNEYS' FEES AND EXPENSES INCURRED IN ENFORCING THIS INDEMNITY) OF ANY NATURE, KIND OR DESCRIPTION OF ANY PERSON OR ENTITY, DIRECTLY OR INDIRECTLY ARISING OUT OF, CAUSED BY OR RESULTING FROM (IN WHOLE OR IN PART) THIS LICENSE, LICENSEE'S USE OF OR ACTIVITIES ON THE PROPERTY OR ANY OTHER PROPERTY OWNED BY LICENSOR, OR ANY ACT OR OMISSION OF LICENSEE, ANY CONTRACTOR, SUBCONTRACTOR, ANYONE DIRECTLY OR INDIRECTLY EMPLOYED BY THEM, OR ANYONE THAT THEY CONTROL OR EXERCISE CONTROL OVER (COLLECTIVELY, "LIABILITIES"), EVEN IF SUCH LIABILITIES ARISE FROM OR ARE ATTRIBUTED, IN WHOLE OR IN PART, TO THE NEGLIGENCE OF ANY INDEMNITEE. LICENSEE SHALL PROMPTLY ADVISE LICENSOR OF ANY ACTION, ADMINISTRATIVE OR LEGAL PROCEEDING OR INVESTIGATION TO WHICH THIS INDEMNIFICATION MAY APPLY, AND OF WHICH LICENSEE HAS RECEIVED NOTICE, AND LICENSEE, AT LICENSEE'S EXPENSE, SHALL ASSUME ON BEHALF OF LICENSOR (AND THE OTHER INDEMNITEES) AND CONDUCT WITH DUE DILIGENCE AND IN GOOD FAITH THE DEFENSE THEREOF WITH COUNSEL REASONABLY SATISFACTORY TO LICENSOR; PROVIDED, HOWEVER, THAT ANY INDEMNITEE SHALL HAVE THE RIGHT, AT ITS OPTION, TO BE REPRESENTED THEREIN BY COUNSEL OF ITS OWN SELECTION AND AT ITS OWN EXPENSE. IN THE EVENT OF FAILURE BY LICENSEE TO ASSUME THE DEFENSE OF LICENSOR IN ACCORDANCE WITH THIS INDEMNIFICATION, LICENSOR, AT ITS OPTION, AND WITHOUT RELIEVING LICENSEE OF ITS OBLIGATION HEREUNDER, MAY ASSUME SUCH DEFENSE, AFTER WRITTEN NOTICE THEREOF TO LICENSEE AND LICENSEE'S FAILURE TO RESPOND THERETO WITHIN TEN (10) BUSINESS DAYS AFTER

RECEIPT OF SUCH NOTICE (SAID TEN (10) DAY PERIOD SHALL NOT APPLY IN ANY CASE WHERE IMMEDIATE ANSWERS, RESPONSES, OR OTHER AFFIRMATIVE ACTION IS REQUIRED TO PRESERVE THE RIGHTS OF LICENSOR) BUT ALL REASONABLE COSTS AND EXPENSES SO INCURRED BY LICENSOR IN THAT EVENT SHALL BE REIMBURSED BY LICENSEE TO LICENSOR, TOGETHER WITH INTEREST ON THE SAME FROM THE DATE ANY SUCH EXPENSE WAS PAID BY LICENSOR UNTIL REIMBURSED BY LICENSEE, AT THE RATE OF INTEREST PROVIDED TO BE PAID ON JUDGMENTS, BY THE LAWS OF THE STATE OF TEXAS.

WITHOUT LIMITING THE FOREGOING, LICENSEE AGREES THAT LICENSEE SHALL INDEMNIFY, PROTECT, DEFEND AND SAVE LICENSOR HARMLESS FROM ANY AND ALL CLAIMS, LIENS, JUDGMENTS, SUITS, CAUSES OF ACTION, AND DEMANDS OF ANY SUBCONTRACTORS, LABORERS, WORKMEN, MECHANICS, MATERIALMEN, OR FURNISHERS OF MACHINERY AND PARTS THEREOF, EQUIPMENT, POWER TOOLS, OR SUPPLIES, IN CONNECTION WITH THE CONSTRUCTION, OPERATION, REPAIR, MAINTENANCE, REPLACEMENT OR REMOVAL OF THE PIPELINE OR OTHER PERMITTED FACILITIES DESCRIBED HEREIN.

WITHOUT LIMITING ANY OF THE FOREGOING, LICENSEE SHALL INDEMNIFY, PROTECT AND HOLD HARMLESS AND DEFEND EACH INDEMNITEE FROM ALL LIABILITIES, SUITS, ACTIONS, CLAIMS, DAMAGES, CAUSES OF ACTION, CHARGES, JUDGMENTS, PERSONAL INJURIES, ACCIDENTAL DEATH, PROPERTY DAMAGE, LOSSES AND EXPENSES OF ANY CHARACTER WHATSOEVER, INCLUDING, WITHOUT LIMITATION, ATTORNEY'S FEES, BROUGHT FOR OR ON ACCOUNT OF ANY INJURIES OR DAMAGES RECEIVED OR SUSTAINED BY ANY PERSON OR PERSONS OR PROPERTY ON ACCOUNT OF ANY NEGLIGENT ACT OF ANY INDEMNITEE, WHETHER SUCH NEGLIGENT ACT WAS THE SOLE PROXIMATE CAUSE OF THE INJURY OR DAMAGE OR A PROXIMATE CAUSE JOINTLY AND CONCURRENTLY WITH LICENSEE OR LICENSEE'S EMPLOYEES', REPRESENTATIVES', AGENTS', CONTRACTORS' OR SUBCONTRACTORS' NEGLIGENCE, IN THE EXECUTION, SUPERVISION AND OPERATIONS GROWING OUT OF OR IN ANY WAY CONNECTED WITH THE PERFORMANCE OF THIS LICENSE, INCLUDING, WITHOUT LIMITATION, SUCH NEGLIGENT ACTS ARISING FROM OR IN ANY WAY CONNECTED WITH THE PLACEMENT, CONSTRUCTION, OPERATION, REPAIR, MAINTENANCE, REPLACEMENT OR REMOVAL OF ANY PART OF LICENSEE'S PIPELINE OR PERMITTED FACILITIES ON LICENSOR'S PROPERTY. LICENSEE WILL BE REQUIRED TO PAY ANY JUDGMENT WITH COSTS WHICH MAY BE OBTAINED AGAINST LICENSOR OR ANY INDEMNITEE, INCLUDING RELATED ATTORNEY'S FEES.

WITHOUT LIMITING ANY OF THE FOREGOING, LICENSEE, ITS SUCCESSORS AND ASSIGNS, SHALL INDEMNIFY, PROTECT, DEFEND AND HOLD INDEMNITEES HARMLESS FROM AND AGAINST ALL CLAIMS, LOSSES, DAMAGES, LIABILITIES, LIENS, FINES, PENALTIES, CAUSES OF ACTION, SUITS, CHARGES, JUDGMENTS, ADMINISTRATIVE ORDERS, REMEDIATION

REQUIREMENTS, ENFORCEMENT ACTIONS OF ANY KIND, PERSONAL INJURIES, PROPERTY DAMAGE, AND ALL COSTS AND EXPENSES INCURRED IN CONNECTION THEREWITH (INCLUDING, BUT NOT LIMITED TO, ATTORNEYS' FEES AND EXPENSES, INCLUDING, WITHOUT LIMITATION, ALL ATTORNEYS' FEES AND EXPENSES INCURRED IN ENFORCING THIS INDEMNITY) OF ANY NATURE, KIND OR DESCRIPTION OF ANY PERSON OR ENTITY, DIRECTLY OR INDIRECTLY ARISING OUT OF, CAUSED BY OR RESULTING FROM (IN WHOLE OR IN PART) (i) FAILURE OF LICENSEE, ANY CONTRACTOR, SUBCONTRACTOR, ANYONE DIRECTLY OR INDIRECTLY EMPLOYED BY THEM, OR ANYONE THAT THEY CONTROL OR EXERCISE CONTROL OVER (COLLECTIVELY, THE "INDEMNIFYING PARTIES"), TO COMPLY WITH ALL APPLICABLE LOCAL, FEDERAL AND/OR STATE ENVIRONMENTAL LAWS, INCLUDING BUT NOT LIMITED TO THE RESOURCE CONSERVATION AND RECOVERY ACT (RCRA) AND THE COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION, AND LIABILITY ACT (CERCLA) (AS THEY MAY BE REAUTHORIZED AND/OR AMENDED) AND ALL OTHER LOCAL, FEDERAL AND STATE LAWS, IN CONNECTION WITH OR RELATED TO ANY INDEMNIFYING PARTY'S OPERATIONS OR ACTIVITIES ON THE PROPERTY, OR (ii) ANY INDEMNIFYING PARTY'S HANDLING, STORING, RELEASING OR TRANSPORTING OR DISPOSING OF ALL SUBSTANCES, INCLUDING BUT NOT LIMITED TO HAZARDOUS SUBSTANCES AND HAZARDOUS WASTES, ON OR FROM THE PROPERTY OR ANY OTHER LANDS OF LICENSOR.

IT IS THE INTENTION OF THE PARTIES HERETO THAT THE PROVISIONS OF THIS INDEMNIFICATION SHALL APPLY TO AND PROTECT EACH INDEMNITEE FROM THE CONSEQUENCES OF STRICT LIABILITY IMPOSED OR THREATENED TO BE IMPOSED ON SUCH INDEMNITEE, AS WELL AS FROM THE CONSEQUENCES OF THE NEGLIGENCE OF ANY INDEMNITEE, WHETHER OR NOT THAT NEGLIGENCE IS A CONTRIBUTING OR CONCURRING CAUSE OF ANY LIABILITY INDEMNIFIED AGAINST IN THIS ARTICLE IV.B.

THE TERMS, PROVISIONS, REQUIREMENTS AND OBLIGATIONS OF THIS ARTICLE IV.B. SHALL SURVIVE TERMINATION OR EXPIRATION OF THIS LICENSE, AND SHALL NOT BE LIMITED BY OR TO DAMAGES, COMPENSATION OR BENEFITS PAYABLE UNDER INSURANCE POLICIES, WORKER'S COMPENSATION ACTS, DISABILITY BENEFIT ACTS OR OTHER EMPLOYEES' BENEFIT ACTS.

C. Assignment. The provisions of this License shall inure to the benefit of and be binding upon Licensor and Licensee and their respective successors and permitted assigns. The rights and privileges granted by Licensor under this License inure to the benefit of Licensee. No rights, privileges or obligations hereunder shall be assignable by Licensee without the express prior written consent of Licensor. Any required consent is to be evidenced by a letter written by Licensor's City Manager that fully recites the terms and conditions, if any, upon which consent is given. The granting of consent is in the sole discretion of Licensor's City Manager

D. Independent Contractor. It is expressly understood and agreed that Licensee shall perform all work described herein as an independent contractor and not as an officer, agent, servant or

employee of Licensor; that Licensee shall have exclusive control of and the exclusive right to control the details of the work performed hereunder, and all persons performing the same; and shall be solely responsible for the acts and omissions of its officers, agents, employees, contractors and subcontractors; that the doctrine of respondeat superior shall not apply as between Licensor and Licensee, its officers, agents, employees, contractors and subcontractors; and that nothing herein shall be construed as creating a partnership or joint enterprise between Licensor and Licensee. No person performing any of the work described hereunder shall be considered an officer, agent, servant or employee of Licensor. Further, it is specifically understood and agreed that nothing in this License is intended or shall be construed as creating a "Community of Pecuniary Interest" or "An Equal Right of Control" which would give rise to vicarious liability. Licensee shall be an independent contractor under this License and shall assume all of the rights, obligations and liabilities applicable to it as such independent contractor hereunder. Licensor does not have the power to direct the order in which the work is done. Licensor shall not have the right to control the means, methods or details of Licensee's work. Licensee shall assume exclusive responsibility for the work. Licensee is entirely free to do the work in its own way. The provisions of this subparagraph (D.) shall not be deemed or construed as contradicting, limiting or conflicting with the provisions of subparagraph (M.) below.

E. Attorney Fees. SHOULD LICENSOR BE REQUIRED TO RESORT TO EMPLOYMENT OF ATTORNEYS TO ENFORCE THIS LICENSE, OR ANY OF ITS RIGHTS UNDER THIS LICENSE, LICENSOR SHALL BE ENTITLED TO REIMBURSEMENT FROM LICENSEE FOR LICENSOR'S ATTORNEYS' FEES. LICENSEE SHALL REIMBURSE LICENSOR FOR LICENSOR'S ATTORNEYS' FEES INCURRED IN CONNECTION WITH THE PREPARATION AND NEGOTIATION OF THIS LICENSE. BY EXECUTING THIS LICENSE, LICENSEE AGREES TO WAIVE, AND DOES HEREBY KNOWINGLY, CONCLUSIVELY, VOLUNTARILY AND INTENTIONALLY WAIVE, ANY CLAIM IT HAS OR MAY HAVE IN THE FUTURE AGAINST LICENSOR REGARDING THE AWARD OF ATTORNEY'S FEES, WHICH ARE IN ANY WAY RELATED TO THIS LICENSE, OR THE CONSTRUCTION, INTERPRETATION, VALIDITY OR BREACH OF THIS LICENSE. WITHOUT LIMITING THE FOREGOING, LICENSEE SPECIFICALLY AGREES THAT IF LICENSEE BRINGS OR COMMENCES ANY LEGAL ACTION OR PROCEEDING RELATED TO THIS LICENSE, OR TO THE CONSTRUCTION, INTERPRETATION, VALIDITY OR BREACH OF THIS LICENSE, INCLUDING BUT NOT LIMITED TO ANY ACTION PURSUANT TO THE PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE SECTION 37.001, ET SEQ., AS AMENDED), OR CHAPTER 271 OF THE TEXAS LOCAL GOVERNMENT CODE, LICENSEE AGREES TO ABANDON, WAIVE AND RELINQUISH ANY AND ALL RIGHTS TO THE RECOVERY OF ATTORNEY'S FEES TO WHICH LICENSEE MIGHT OTHERWISE BE ENTITLED.

LICENSEE AGREES THAT THIS IS THE VOLUNTARY AND INTENTIONAL RELINQUISHMENT AND ABANDONMENT OF A PRESENTLY EXISTING, KNOWN RIGHT. LICENSEE ACKNOWLEDGES THAT IT UNDERSTANDS ALL TERMS AND CONDITIONS OF THIS LICENSE. LICENSEE FURTHER ACKNOWLEDGES AND AGREES THAT THERE WAS AND IS NO DISPARITY OF BARGAINING POWER BETWEEN LICENSOR AND LICENSEE. THIS SECTION SHALL NOT BE CONSTRUED OR INTERPRETED AS A WAIVER OF GOVERNMENTAL IMMUNITY.

LICENSEE AND LICENSOR ARE RELYING ON THEIR OWN JUDGMENT. EACH PARTY HAD THE OPPORTUNITY TO DISCUSS THIS LICENSE WITH LEGAL COUNSEL PRIOR TO ITS EXECUTION.

F. Governing Law & Venue. All performance and payments made pursuant to this License shall be deemed to have occurred in Midland County, Texas. Exclusive venue for any claims, suits or any other action arising from or connected in any way to this License, or the performance of this License shall be in Midland County, Texas. The obligations and undertakings of each of the parties to this License shall be deemed to have been performed in Midland County, Texas. This License shall be construed, interpreted and enforced under the laws of the State of Texas. The laws of the State of Texas shall govern, construe and enforce all the rights and duties of the parties, including but not limited to tort claims and any and all other claims or disputes, arising from or relating in any way to the subject matter of this License, without regard to conflict of laws and rules that would direct application of the laws of another jurisdiction.

G. Release. NOTWITHSTANDING ANY OTHER PROVISIONS OF THIS LICENSE, LICENSEE HEREBY RELEASES, ACQUITS, RELINQUISHES AND FOREVER DISCHARGES LICENSOR, AND LICENSOR'S EMPLOYEES AND OFFICERS FROM ANY AND ALL DEMANDS, CLAIMS, DAMAGES OR CAUSES OF ACTION OF ANY KIND WHATSOEVER WHICH LICENSEE HAS OR MIGHT HAVE IN THE FUTURE, INCLUDING BUT NOT LIMITED TO BREACH OF CONTRACT, QUANTUM MERUIT, CLAIMS UNDER THE DUE PROCESS AND TAKINGS CLAUSES OF THE TEXAS AND UNITED STATES CONSTITUTIONS, TORT CLAIMS, OR LICENSOR'S NEGLIGENCE.

H. Governmental Immunity. By executing this License, Licensor is not waiving its right of governmental immunity. Licensor is retaining its immunity from suit. Licensor is not granting consent to be sued by legislative resolution or action. **THERE IS NO WAIVER OF GOVERNMENTAL IMMUNITY.**

I. Third Party Beneficiary. Except as provided in Article IV.B. above with respect to Indemnitees, (i) Licensor's granting of this License does not create any third-party beneficiary, (ii) there is no third-party beneficiary to this License, and (iii) no person or entity who is not a party to this License shall have any third party beneficiary or other rights hereunder.

J. Notices. Any notice or communication required in the administration of this License shall be sent by certified mail, return receipt requested, to the parties' respective mailing addresses as set forth hereinabove.

K. Notice of Alleged Breach; Statutory Prerequisite. Without limiting the provisions of Article IV.G. above, as a condition precedent to filing suit for alleged damages incurred by an alleged breach of an express or implied provision of this License, Licensee or its legal representative, shall give the City Manager, or any other reasonable official of Licensor, notice in writing (consisting of one (1) original and seven (7) copies of notice attached to a copy of this License) of such damages, duly verified, within one hundred eighty (180) days after the same has been sustained. The discovery rule does not apply to the giving of this notice. The notice shall include when, where and how the damages occurred, the apparent extent thereof, the amount of damages sustained, the

amount for which Licensee will settle, the physical and mailing addresses of Licensee at the time and date the claim was presented and the physical and mailing addresses of Licensee for the six (6) months immediately preceding the occurrence of such damages, and the names and addresses of the witnesses upon whom Licensee relies to establish its claim; and a failure to so notify the City Manager or other such official of Licensor within the time and manner provided herein shall exonerate, excuse and except Licensor from any liability whatsoever. Licensor is under no obligation to provide notice to Licensee that Licensee's notice is insufficient. Licensor reserves the right to request reasonable additional information regarding the claim. Said additional information shall be supplied within thirty (30) days after receipt of notice.

The statutory prerequisites outlined herein constitute jurisdictional requirements pursuant to Section 271.154 of the Texas Local Government Code and Section 311.034 of the Texas Government Code. Notwithstanding any other provision, Licensee's failure to comply with the requirements herein shall perpetually bar Licensee's claim for damages under Chapter 271 of the Texas Local Government Code, and Section 311.034 of the Texas Government Code, regardless if Licensor has actual or constructive notice or knowledge of said claim or alleged damages. Licensee agrees that the requirements of this entire License are reasonable.

L. Consideration. The terms of this License are supported by good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged by the parties named herein.

M. Waiver of Governmental Immunity; Chapter 271, TEX. LOC. GOV'T CODE. The parties hereto agree that this License does not constitute a "Contract" for providing goods and/or services to Licensor as discussed in Subchapter I of Chapter 271 of the Texas Local Government Code, and Licensor does not waive, to the maximum extent allowed by law, any constitutional, statutory or common law right to sovereign immunity or governmental immunity from liability or suit. Licensor expressly does not consent to be sued or be liable. To the maximum extent allowed by law, nothing in this License constitutes a waiver of Licensor's governmental immunity and the parties hereto expressly agree that this License shall not constitute, nor be interpreted as a waiver of Licensor's governmental immunity under Subchapter I of Chapter 271 of the Texas Local Government Code, nor shall it constitute nor be interpreted as a waiver of Licensor's governmental immunity for the benefit of any third-party lacking privity to this License.

This License does not obligate Licensee to use the Property to construct, repair, operate, replace, or maintain Licensor's facilities or structures described herein, rather, it merely prohibits Licensee from using the Property for any other purpose. This License restricts the use of the Property to a specific purpose but does not require the use of the Property for a specific purpose. Licensee is not providing a service to Licensor. Licensee is paying Licensor for temporary rights in real property, not for a service. Any such provision shall be deemed to be a covenant against noncomplying use, not a covenant to use. Licensee's use of the Property in compliance with a restriction shall not constitute a service, and such complying use shall not operate to waive Licensor's governmental immunity.

N. Compliance. Licensee agrees that it shall comply with Texas Government Code Section 2252.908, as amended, to the extent that this statute applies to this License. Licensee agrees that it shall comply with Texas Local Government Code Section 176.006, as amended, to the extent that this statute applies to this License.

O. Texas Historical Commission Survey. Licensee agrees that it shall comply with Chapter 191 of the Texas Natural Resources Code. By executing this License, Licensee represents that it has contacted the Texas Historical Commission (the "Commission") for the purpose of determining whether the Commission will request that an archaeological survey be completed before Licensee commences operations on the Property, as contemplated herein. Licensee agrees that it shall complete or cause to be completed an archaeological survey before commencing any operations on the Property if the Commission so requests and deliver the same to Licensor. Notwithstanding any provision contained herein, in the event that any site, object, artifact, or other feature of archaeological, scientific, educational, cultural, or historical interest is encountered during the operations authorized by this License, Licensee will immediately notify Licensor and the Commission so that adequate measures may be undertaken to protect or recover such discoveries or findings, as deemed appropriate by Licensor or the Commission.

P. Waiver. No waiver of any of the provisions of this License shall be deemed or constitute a waiver of any other provisions of this License, nor shall such waiver constitute a continuing waiver unless otherwise expressly provided. Likewise, the failure of Licensor to enforce any provision of this License shall not be deemed nor shall constitute a waiver of the right of Licensor to enforce such provision.

Q. Counterpart Execution. This License may be executed in several counterparts, and any such agreement shall be deemed an original for all intents and purposes.

R. No Release of Liability. Notwithstanding anything to the contrary contained in this License, the termination or expiration of this License shall not relieve Licensee of any liability, duty or obligation under this License, nor shall it preclude Licensor from asserting any right to specific performance, damages or any other rights or remedies to which Licensor may be entitled. Upon termination or expiration of this License for any reason, Licensee shall execute and deliver a recordable release of this License to Licensor in form and substance satisfactory to Licensor.

S. Entire Agreement. This License constitutes the entire agreement between Licensor and Licensee concerning the subject matter hereof, superseding all negotiations, prior discussions, prior licenses and prior agreements and understandings related to the subject matter hereof. This License may only be amended by written instrument executed by Licensor and Licensee.

City Council Meeting

Item Number: 13

Meeting Date: July 11, 2023

To: City Council / City Manager

From: John Simmons, Manager, Right-of-Way

Subject: Motion authorizing the execution of a Right-of-Way License (23-329-031) between the City of Midland and Targa Pipeline Mid-Continent West-Tex LLC regarding City-owned property described as Sections 29, 31, 32 and 41, Block 38, Township 1 South, T&P RR Co. Survey, Midland County, Texas (DISTRICT 2) (UTILITIES)

Purpose:

This motion will provide the third 10-year renewal of a 30' wide right of way for an existing Eight inch (8") private, poly construction, pipeline buried thirty-six (36) inches deep in the City of Midland-owned Right of Way for Todd Road. Current Right of Way License 2013-188 dated June 26, 2013, with Atlas Pipeline Mid-Continent Westtex, is paid up to date with the "as-built" pipeline survey provided.

This Right-of-Way License is proposed for a single ten (10) year period, paid in advance. Terms are consistent with the City's standard license for facilities of this nature.

Recommended City Council Action:

Approve

Fiscal Impact:

Application fee (one time): $1,000

ten-year term paid in advance

8" pipeline ($170.00 per rod x 510.91 rods) $86,854.70

Total Collected: $87,854.70

Discussion:

This is the third 10-year renewal of the ROW License recorded as Instrument number 2013-24356 in the Midland County Hall of Records.

This pipeline is a poly construction, private gas line Eight inches (8”) in diameter and buried thirty-six inches (36) deep. This motion will allow the operator to continue to operate the pipeline buried within the Todd Road Right of Way, operator may be required to relocate the pipeline when Todd Road is expanded.
Certificates of Insurance (COI) with the City of Midland named as additional insured and a waiver of subrogation in favor of the City of Midland has been collected and are on file.

RIGHT OF WAY LICENSE

THE STATE OF TEXAS	§	
	§	KNOW ALL MEN BY THESE PRESENTS:
COUNTY OF MIDLAND	§	

Date:	July 12, 2023
Licensor:	CITY OF MIDLAND, TEXAS, a home-rule municipal corporation
Licensor's Representative:	Morris Williams, Jr., Interim City Manager
Licensor's Mailing Address:	P.O. Box 1152 Midland, Texas 79702
Licensee:	**Targa Pipeline Mid-Continent WestTex LLC**
Licensee's Representative:	**Norman L. Winter**
Licensee's Mailing Address:	811 Louisiana St., Suite 2100 Houston, Texas 77002
Property:	As described in Article III below
License Number:	**23-329-031**

Licensee desires use of certain Property (as defined below) owned by Licensor in Midland County, Texas, for purposes set forth below. Licensee acknowledges and agrees that it must obtain a license (the "License") in order to use the public lands of Licensor.

W I T N E S S E T H:

For and in consideration of the execution of this license (this "License") and the mutual promises and covenants of the parties hereto, it is mutually promised, understood and agreed as follows:

I. Term

A. Term. This License shall be for a term of ten (10) years commencing on the date of this License (the "Commencement Date") unless terminated earlier as provided hereafter.

B. Termination. Licensor may terminate this License if Licensee fails to pay, when due, any amount owing under this License and that failure continues for sixty (60) days or, if Licensee commits any material breach or material default in performance of any obligation, prohibition, restriction, provision or covenant contained in this License, and the breach or default continues for a period of thirty (30) days after Licensor delivers notice to Licensee reasonably detailing the breach or default.

Additionally, Licensor may terminate this License at will for any or no reason upon giving at least three hundred sixty-five (365) days' written notice to Licensee. The parties to this License understand and agree that it is in Licensor's sole discretion to terminate this License during the term of this License without penalty to Licensor. Licensee has no expectation and has received no guarantees that this License will not be terminated before the end of the License term. The parties have bargained for the flexibility of terminating this License upon tender of the requisite notice at any time during the term of this License. All work and services under this License shall be suspended upon termination of this License.

Upon expiration or termination of this License, Licensee shall remove all equipment and structures associated with the undertakings contemplated by this License. After removal of all equipment and structures associated with the undertakings contemplated by this License, the surface of the Property shall be restored at the expense of Licensee to its original condition, as close thereto as may be practical, subject to the approval of Licensor upon inspection by Licensor's Representative, which approval shall not be unreasonably withheld. All of said work shall be completed within one hundred eighty (180) days after the expiration or termination of this License. All of the terms, provisions and requirements of this paragraph shall survive the expiration or termination of this License.

II. Financial Consideration

A. License Fee. A license fee in the amount of EIGHTY-SIX THOUSAND EIGHT HUNDRED FIFTY-FOUR and 70/100 Dollars ($86,854.70) ("License Fee") shall be due and payable on or prior to the Commencement Date.

In the event Licensor terminates this License pursuant to the provisions of Section I.B., Licensor agrees to refund to Licensee a pro rata share of the License Fee actually paid by Licensee to Licensor for that portion of the remaining term that is being terminated. For the avoidance of doubt, the amount of any refund payable to Licensee pursuant to this paragraph shall be determined net of any costs or expenses incurred by Licensor in connection with Licensee's unfulfilled obligations under this License (if any).

B. Application Fee. On or prior to the Commencement Date of this License, Licensee shall pay a non-refundable one-time fee of One Thousand and No/100 Dollars ($1,000.00) to Licensor's Representative. Said fee shall revert to Licensor and Licensee shall have no claim to said fee. The fee shall be used to process the application for this License.

C. Delivery of Payment. Payment of the above fees shall be made to Licensor at the office of Licensor's Representative, Attn: Right of Way Manager, P.O. Box 1152, Midland, Texas, 79702. Payment of the above fees shall be exclusive of and in addition to all general municipal taxes of whatever nature, including but not limited to ad valorem taxes and special taxes and assessments for public improvements.

D. Late Payment. Licensee's failure to make payment of any of the above fees within thirty (30) days after such fee is due shall constitute a late payment and Licensee shall pay Licensor a late charge of five percent (5%) of such fee.

III. Use

A. Permitted Use. Licensor does hereby grant unto Licensee, the right to enter upon the Property, being thirty (30) feet in width of the pipeline location as shown on **Exhibit A** attached hereto and incorporated herein for the purpose of operating, repairing, maintaining, replacing and removing, thereon, along the herein described pipeline locations, a poly construction pipeline, not to exceed eight (8) inches in diameter, for the transportation of natural gas and to have the right of ingress and egress at convenient points for such purpose. **Licensee shall provide Licensor with a complete as-built survey within sixty (60) days of completion of the pipeline(s) and facilities described herein. The parties agree Licensee's failure to provide Licensor with a complete as-built survey within sixty (60) days of completion of the pipeline(s) and facilities described herein may result in the termination of this License. The decision to accept a complete as-built survey after the sixty-day deadline prescribed herein, or, conversely, to terminate this License shall be in the sole and absolute discretion of Licensor.**

B. Road Repair. Licensee covenants and agrees that it will repair, at its own expense, any of Licensor's roads that Licensee, its employees, contractors, representatives, agents or assigns damage on Licensor's property, so that such roads will comply with Licensor's standard specifications.

C. Utility Repair. Licensee covenants and agrees that Licensee shall, at its own expense, repair all water lines, sewer lines, service lines, water meters and other utility lines owned by Licensor that Licensee, its employees, contractors, representatives, agents or assigns, damage so that such water lines, sewer lines, water meters and other utility lines shall comply with Licensor's standard specifications.

D. Pipeline Depth. Licensee covenants and agrees that it will bury the pipeline to be constructed hereunder no less than forty-eight (48) inches in depth. All backfill used in burying such pipeline shall be compacted to a density of ninety percent (90%), except where such pipeline crosses under a paved or traveled portion of any City of Midland right of way where such backfill shall be compacted to a density of ninety-five percent (95%). Licensor shall be afforded the opportunity to test the density on all backfill. Notwithstanding any provision to the contrary contained herein, Licensee covenants and agrees that, at any point that Licensee's pipeline intersects with a City of Midland utility line location, the pipeline shall be bored at a depth of at least (i) nine (9) feet under all City of Midland water utility lines and (ii) two (2) feet under all City of Midland sewer utility lines. Licensee agrees that it shall comply with 30 Tex. Admin. Code § 290.44(e), as amended, to the extent applicable to this License.

E. Approval of Bids. Before Licensee seeks bids on any phase of the repair of public streets, alleys, water lines, sewer lines or any other public utilities, Licensee shall first obtain written approval of the specifications therefor from Licensor's Representative, which approval shall be at Licensor's Representative's sole discretion.

F. Reservation of Rights. Licensor expressly reserves the right to install, repair, or reconstruct streets or roads and all ancillary public uses usual and customary in connection with streets and roads, expressly including but not limited to drainage facilities and related structures in the rights of way used and occupied by Licensee.

Licensor reserves the right to lay and permit to be laid, sewer, gas, water, and other pipelines or cables and conduits, and to do and permit to be done, any underground or overhead installation or improvement that may be deemed necessary or proper by the governing body of Licensor, in, on, across, along, over, under, and through any property occupied by Licensee. In permitting such work to be done, Licensor shall not be liable to Licensee for any damage so caused to Licensee's system or property, **NOR SHALL LICENSOR BE LIABLE TO LICENSEE FOR ANY DAMAGES TO LICENSEE'S PIPELINE ARISING OUT OF THE NEGLIGENCE BY LICENSOR, ITS EMPLOYEES, OFFICERS OR AGENTS, OR LICENSOR'S CONTRACTORS OR SUBCONTRACTORS**. If Licensor requires Licensee to remove, alter, change, adapt, or conform Licensee's facilities because of changes in the grade or construction of a street or in the location or manner of constructing a water pipe, sewer pipe, or other surface, underground or aboveground structure owned by Licensor, Licensee shall make the alterations or changes as soon as practicable, and in no event longer than one hundred eighty (180) days, when ordered in writing by Licensor, without claim for reimbursement for the cost of the relocation or for damages against Licensor. If these requirements impose a financial hardship upon Licensee, Licensee shall have the right to present alternative proposals for Licensor's consideration.

G. Non-exclusive. Licensor expressly reserves the full right to grant other easements or rights of way crossing or running parallel with the rights of way used by Licensee.

H. Abandonment. It is especially provided, however, that as an express condition of this License, and not as a mere covenant, in the event Licensee abandons any equipment or appurtenances associated with the undertakings contemplated by this License, or the Property ceases to be used for the purposes enumerated herein for any period of twelve (12) consecutive months, or longer, other than the time elapsing between the date hereof and construction, and upon giving Licensee one hundred and twenty (120) days' written notice, then and in that event, this License shall automatically terminate and revert to Licensor, its successors or assigns, free and clear of any right, title, or interest of Licensee.

I. Approval of Specifications. In the event Licensee desires to reconstruct, repair, alter, replace or remove any pipeline built hereunder, Licensee shall submit the plans and specifications that pertain to the rebuilding or repairs of Licensor's streets and roads and the rebuilding or repairs of any of Licensor's public utilities to Licensor's Representative for his or her prior written approval, which approval shall be at Licensor's Representative's sole discretion. In the event of emergency repairs necessary to restore service, Licensee shall notify Licensor's Representative before making any repairs if during a Licensor workday. If not on a workday, Licensee shall notify Licensor's Representative on the first workday after repairs have begun.

J. Gates and Fences. Without altering or expanding the limitations on ingress, egress and access to the Property set forth in Paragraph A. of Article III above, Licensee agrees to use existing gates and roadways where available, to enter, leave and cross the Property; provided that Licensee shall not use any road marked "Closed". Licensee and all persons entering or leaving the Property in connection with Licensee's operations hereunder shall keep all outside and interior gates securely closed except during operations related to this License. Licensee shall keep all outside gates, and all other gates designated by Licensor, securely locked except during operations related to this License. At any gate that is to be locked, Licensor may install its own lock in addition to Licensee's lock.

Licensee agrees that Licensee shall not cut or go over any fence at any time or in connection with any operations on the Property without first obtaining Licensor's express prior consent thereto in writing. All gates or openings in fences shall be at mutually agreeable location(s) between Licensee and Licensor and shall be constructed as reasonably required by Licensor. Upon the termination of this License, at Licensor's election, gates in fences shall be left in place and shall thereafter be owned by Licensor or Licensee shall remove such gates and restore the fence to its original condition as nearly as reasonably practicable. The terms, provisions and requirements of this provision shall survive the termination or expiration of this License.

K. Trash. Licensee shall keep the Property free of trash and debris at all times. Under no circumstances, will Licensee be allowed to bury any trash, debris or foreign material of any kind on or under the Property. Licensor shall have the right to expel and permanently ban from the Property any person observed disposing of trash on the Property. Upon the completion of any operations, all ribbons, flags, stakes and similar items shall by promptly removed from the Property.

L. Hunting, Fishing and Alcohol Prohibited. No agent, employee, representative, contractor or subcontractor of Licensee or any other person allowed to enter the Property by Licensee shall be permitted to hunt, fish, trap, camp, picnic, ride motorcycles or four-wheelers or otherwise conduct any social gathering on the Property, nor shall any such persons be permitted to bring firearms, archery equipment, dogs, alcoholic beverages or illegal drugs on the Property at any time. Violations of this provision shall cause the violator to be regarded as a trespasser and subject to prosecution under trespass laws of the State of Texas. Licensor shall have the right to expel and permanently ban from the Property any person observed on the Property in violation of this provision.

M. Storage of Machinery and Equipment. Licensee shall use no part of the Property to store machinery, equipment, or other property of Licensee while it is not being used.

N. Additional Reservations. Licensor reserves the right to use the surface, subsurface or airspace on, below or above the land covered by this License for any purpose allowed by law and deemed necessary or proper by Licensor and to do and permit to be done, any work in connection therewith which may be deemed necessary or proper by Licensor in, on, across, along, over, under, and through any portion of the Property. **In the event of such work in connection with said purposes it shall be deemed necessary or proper by Licensor, at Licensor's sole discretion, to alter, change, or relocate any pipeline, property, or casing of Licensee, such alteration or change or relocation shall be commenced and completed by Licensee within one hundred eighty (180) days after being ordered in writing by Licensor pursuant to directions from Licensor without any claim for reimbursement for the cost of the alteration, change or relocation or damages against Licensor. Licensee acknowledges the potential need for relocation, change or alteration of any of Licensee's pipeline, property or casing due to road expansion and that the relocation, change, or alteration shall be at the sole cost of Licensee**. Provided, however, that Licensee shall at all times be entitled to receive from appropriate governmental bodies, excluding Licensor, payment for alteration, change or relocation of its system to which it may be lawfully entitled to under applicable federal or state laws with respect to relocation payments. Without limiting the foregoing, Licensor expressly reserves the full right to grant other licenses, easements and/or rights-of-way in, on, across, along, over, under or through all or any portion of the Property. Licensor expressly reserves the right to use and grant to third parties the right to use

all or any portion of the Property and the surface, subsurface or airspace on, below or above the Property for any purpose.

IV. Standard General Conditions

A. Insurance. Licensee shall at all times during the term of this License maintain and keep in full force and effect insurance in the following types and minimum amounts with companies authorized to do business in the State of Texas:

Commercial General Liability (including Contractual liability):	
■ Personal Injury:	$1,000,000.00 per person $1,000,000.00 per occurrence
■ Property Damage:	$100,000.00 per occurrence
Business Automobile Liability:	$1,000,000.00 combined single limit-- Personal Injury and Property Damage
Workers' Compensation:	Statutory limits
Employers' Liability:	$1,000,000.00 per accident or occurrence
Umbrella Liability:	$10,000,000.00 each occurrence $10,000,000.00 aggregate

The Commercial General Liability shall be on an occurrence basis. This insurance shall name Licensor as an additional insured and all insurance shall waive subrogation in favor of Licensor.

The Workers' Compensation coverage provided by Licensee shall inure to the benefit of employees injured during the course and scope of their employment by Licensee pursuant to this License. The Workers' Compensation insurance shall waive all rights of subrogation against Licensor.

The Business Automobile Liability insurance provided by Licensee shall cover any auto for bodily injury and property damage, including owned vehicles, hired and non-owner vehicles, and employee non-ownership, and the amount of such policy shall be a minimum of $1,000,000.00 covering any vehicle used for the execution of the work that is the subject of this License. This insurance shall name Licensor as an additional insured and all insurance shall waive subrogation in favor of Licensor.

All insurance required pursuant to this License, except for Worker's Compensation Insurance, shall name Licensor as an additional insured. All insurance required pursuant to this License, including Worker's Compensation Insurance, shall provide for a waiver of subrogation as to Licensor. The parties agree that, prior to the execution of this License, Licensee shall provide one or more certificates of insurance showing that the requirements of this article have been met. Licensor shall determine, in its sole discretion, whether such requirements have been satisfied.

Licensor shall be provided written notice by Licensee's insurance provider not later than thirty (30) days prior to any reduction or termination of such coverage. Licensor shall not be required to

provide any insurance whatsoever pursuant to this License.

Licensee shall contractually require all contractors, subcontractors, and sub-subcontractors that work on any portion of the work that is the subject of this License to obtain insurance coverage that meets or exceeds the policy requirements and minimum amounts as required herein and name the City of Midland as an additional insured (except as to Worker's Compensation Insurance). Licensee certifies that the one or more certificates of insurance provided as required herein complies with the requirements of Chapter 1811 of the Texas Insurance Code. Licensee shall not use an unapproved certificate of insurance or insert inappropriate language on a certificate. Compliance with state law is the sole responsibility of Licensee.

B. Indemnity. TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, LICENSEE, ITS SUCCESSORS AND ASSIGNS, AGREE TO INDEMNIFY, PROTECT, DEFEND AND HOLD HARMLESS LICENSOR AND LICENSOR'S REPRESENTATIVES, AGENTS, ATTORNEYS, EMPLOYEES, SUCCESSORS AND ASSIGNS (COLLECTIVELY, "INDEMNITEES") FOR, FROM AND AGAINST ANY AND ALL CLAIMS, LOSSES, DAMAGES, LIABILITIES, LIENS, FINES, PENALTIES, CAUSES OF ACTION, SUITS, CHARGES, JUDGMENTS, ADMINISTRATIVE ORDERS, REMEDIATION REQUIREMENTS, ENFORCEMENT ACTIONS OF ANY KIND, PERSONAL INJURIES, PROPERTY DAMAGE, AND ALL COSTS AND EXPENSES INCURRED IN CONNECTION THEREWITH (INCLUDING, BUT NOT LIMITED TO, ATTORNEYS' FEES AND EXPENSES, INCLUDING, WITHOUT LIMITATION, ALL ATTORNEYS' FEES AND EXPENSES INCURRED IN ENFORCING THIS INDEMNITY) OF ANY NATURE, KIND OR DESCRIPTION OF ANY PERSON OR ENTITY, DIRECTLY OR INDIRECTLY ARISING OUT OF, CAUSED BY OR RESULTING FROM (IN WHOLE OR IN PART) THIS LICENSE, LICENSEE'S USE OF OR ACTIVITIES ON THE PROPERTY OR ANY OTHER PROPERTY OWNED BY LICENSOR, OR ANY ACT OR OMISSION OF LICENSEE, ANY CONTRACTOR, SUBCONTRACTOR, ANYONE DIRECTLY OR INDIRECTLY EMPLOYED BY THEM, OR ANYONE THAT THEY CONTROL OR EXERCISE CONTROL OVER (COLLECTIVELY, "LIABILITIES"), EVEN IF SUCH LIABILITIES ARISE FROM OR ARE ATTRIBUTED, IN WHOLE OR IN PART, TO THE NEGLIGENCE OF ANY INDEMNITEE. LICENSEE SHALL PROMPTLY ADVISE LICENSOR OF ANY ACTION, ADMINISTRATIVE OR LEGAL PROCEEDING OR INVESTIGATION TO WHICH THIS INDEMNIFICATION MAY APPLY, AND OF WHICH LICENSEE HAS RECEIVED NOTICE, AND LICENSEE, AT LICENSEE'S EXPENSE, SHALL ASSUME ON BEHALF OF LICENSOR (AND THE OTHER INDEMNITEES) AND CONDUCT WITH DUE DILIGENCE AND IN GOOD FAITH THE DEFENSE THEREOF WITH COUNSEL REASONABLY SATISFACTORY TO LICENSOR; PROVIDED, HOWEVER, THAT ANY INDEMNITEE SHALL HAVE THE RIGHT, AT ITS OPTION, TO BE REPRESENTED THEREIN BY COUNSEL OF ITS OWN SELECTION AND AT ITS OWN EXPENSE. IN THE EVENT OF FAILURE BY LICENSEE TO ASSUME THE DEFENSE OF LICENSOR IN ACCORDANCE WITH THIS INDEMNIFICATION, LICENSOR, AT ITS OPTION, AND WITHOUT RELIEVING LICENSEE OF ITS OBLIGATION HEREUNDER, MAY ASSUME SUCH DEFENSE, AFTER WRITTEN NOTICE THEREOF TO LICENSEE AND LICENSEE'S FAILURE TO RESPOND THERETO WITHIN TEN (10) BUSINESS DAYS AFTER RECEIPT OF SUCH NOTICE (SAID TEN (10) DAY PERIOD SHALL NOT APPLY IN

ANY CASE WHERE IMMEDIATE ANSWERS, RESPONSES, OR OTHER AFFIRMATIVE ACTION IS REQUIRED TO PRESERVE THE RIGHTS OF LICENSOR) BUT ALL REASONABLE COSTS AND EXPENSES SO INCURRED BY LICENSOR IN THAT EVENT SHALL BE REIMBURSED BY LICENSEE TO LICENSOR, TOGETHER WITH INTEREST ON THE SAME FROM THE DATE ANY SUCH EXPENSE WAS PAID BY LICENSOR UNTIL REIMBURSED BY LICENSEE, AT THE RATE OF INTEREST PROVIDED TO BE PAID ON JUDGMENTS, BY THE LAWS OF THE STATE OF TEXAS.

WITHOUT LIMITING THE FOREGOING, LICENSEE AGREES THAT LICENSEE SHALL INDEMNIFY, PROTECT, DEFEND AND SAVE LICENSOR HARMLESS FROM ANY AND ALL CLAIMS, LIENS, JUDGMENTS, SUITS, CAUSES OF ACTION, AND DEMANDS OF ANY SUBCONTRACTORS, LABORERS, WORKMEN, MECHANICS, MATERIALMEN, OR FURNISHERS OF MACHINERY AND PARTS THEREOF, EQUIPMENT, POWER TOOLS, OR SUPPLIES, IN CONNECTION WITH THE CONSTRUCTION, OPERATION, REPAIR, MAINTENANCE, REPLACEMENT OR REMOVAL OF THE PIPELINE OR OTHER PERMITTED FACILITIES DESCRIBED HEREIN.

WITHOUT LIMITING ANY OF THE FOREGOING, LICENSEE SHALL INDEMNIFY, PROTECT AND HOLD HARMLESS AND DEFEND EACH INDEMNITEE FROM ALL LIABILITIES, SUITS, ACTIONS, CLAIMS, DAMAGES, CAUSES OF ACTION, CHARGES, JUDGMENTS, PERSONAL INJURIES, ACCIDENTAL DEATH, PROPERTY DAMAGE, LOSSES AND EXPENSES OF ANY CHARACTER WHATSOEVER, INCLUDING, WITHOUT LIMITATION, ATTORNEY'S FEES, BROUGHT FOR OR ON ACCOUNT OF ANY INJURIES OR DAMAGES RECEIVED OR SUSTAINED BY ANY PERSON OR PERSONS OR PROPERTY ON ACCOUNT OF ANY NEGLIGENT ACT OF ANY INDEMNITEE, WHETHER SUCH NEGLIGENT ACT WAS THE SOLE PROXIMATE CAUSE OF THE INJURY OR DAMAGE OR A PROXIMATE CAUSE JOINTLY AND CONCURRENTLY WITH LICENSEE OR LICENSEE'S EMPLOYEES', REPRESENTATIVES', AGENTS', CONTRACTORS' OR SUBCONTRACTORS' NEGLIGENCE, IN THE EXECUTION, SUPERVISION AND OPERATIONS GROWING OUT OF OR IN ANY WAY CONNECTED WITH THE PERFORMANCE OF THIS LICENSE, INCLUDING, WITHOUT LIMITATION, SUCH NEGLIGENT ACTS ARISING FROM OR IN ANY WAY CONNECTED WITH THE PLACEMENT, CONSTRUCTION, OPERATION, REPAIR, MAINTENANCE, REPLACEMENT OR REMOVAL OF ANY PART OF LICENSEE'S PIPELINE OR PERMITTED FACILITIES ON LICENSOR'S PROPERTY. LICENSEE WILL BE REQUIRED TO PAY ANY JUDGMENT WITH COSTS WHICH MAY BE OBTAINED AGAINST LICENSOR OR ANY INDEMNITEE, INCLUDING RELATED ATTORNEY'S FEES.

WITHOUT LIMITING ANY OF THE FOREGOING, LICENSEE, ITS SUCCESSORS AND ASSIGNS, SHALL INDEMNIFY, PROTECT, DEFEND AND HOLD INDEMNITEES HARMLESS FROM AND AGAINST ALL CLAIMS, LOSSES, DAMAGES, LIABILITIES, LIENS, FINES, PENALTIES, CAUSES OF ACTION, SUITS, CHARGES, JUDGMENTS, ADMINISTRATIVE ORDERS, REMEDIATION REQUIREMENTS, ENFORCEMENT ACTIONS OF ANY KIND, PERSONAL

INJURIES, PROPERTY DAMAGE, AND ALL COSTS AND EXPENSES INCURRED IN CONNECTION THEREWITH (INCLUDING, BUT NOT LIMITED TO, ATTORNEYS' FEES AND EXPENSES, INCLUDING, WITHOUT LIMITATION, ALL ATTORNEYS' FEES AND EXPENSES INCURRED IN ENFORCING THIS INDEMNITY) OF ANY NATURE, KIND OR DESCRIPTION OF ANY PERSON OR ENTITY, DIRECTLY OR INDIRECTLY ARISING OUT OF, CAUSED BY OR RESULTING FROM (IN WHOLE OR IN PART) (i) FAILURE OF LICENSEE, ANY CONTRACTOR, SUBCONTRACTOR, ANYONE DIRECTLY OR INDIRECTLY EMPLOYED BY THEM, OR ANYONE THAT THEY CONTROL OR EXERCISE CONTROL OVER (COLLECTIVELY, THE "INDEMNIFYING PARTIES"), TO COMPLY WITH ALL APPLICABLE LOCAL, FEDERAL AND/OR STATE ENVIRONMENTAL LAWS, INCLUDING BUT NOT LIMITED TO THE RESOURCE CONSERVATION AND RECOVERY ACT (RCRA) AND THE COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION, AND LIABILITY ACT (CERCLA) (AS THEY MAY BE REAUTHORIZED AND/OR AMENDED) AND ALL OTHER LOCAL, FEDERAL AND STATE LAWS, IN CONNECTION WITH OR RELATED TO ANY INDEMNIFYING PARTY'S OPERATIONS OR ACTIVITIES ON THE PROPERTY, OR (ii) ANY INDEMNIFYING PARTY'S HANDLING, STORING, RELEASING OR TRANSPORTING OR DISPOSING OF ALL SUBSTANCES, INCLUDING BUT NOT LIMITED TO HAZARDOUS SUBSTANCES AND HAZARDOUS WASTES, ON OR FROM THE PROPERTY OR ANY OTHER LANDS OF LICENSOR.

IT IS THE INTENTION OF THE PARTIES HERETO THAT THE PROVISIONS OF THIS INDEMNIFICATION SHALL APPLY TO AND PROTECT EACH INDEMNITEE FROM THE CONSEQUENCES OF STRICT LIABILITY IMPOSED OR THREATENED TO BE IMPOSED ON SUCH INDEMNITEE, AS WELL AS FROM THE CONSEQUENCES OF THE NEGLIGENCE OF ANY INDEMNITEE, WHETHER OR NOT THAT NEGLIGENCE IS A CONTRIBUTING OR CONCURRING CAUSE OF ANY LIABILITY INDEMNIFIED AGAINST IN THIS ARTICLE IV.B.

THE TERMS, PROVISIONS, REQUIREMENTS AND OBLIGATIONS OF THIS ARTICLE IV.B. SHALL SURVIVE TERMINATION OR EXPIRATION OF THIS LICENSE, AND SHALL NOT BE LIMITED BY OR TO DAMAGES, COMPENSATION OR BENEFITS PAYABLE UNDER INSURANCE POLICIES, WORKER'S COMPENSATION ACTS, DISABILITY BENEFIT ACTS OR OTHER EMPLOYEES' BENEFIT ACTS.

C. Assignment. The provisions of this License shall inure to the benefit of and be binding upon Licensor and Licensee and their respective successors and permitted assigns. The rights and privileges granted by Licensor under this License inure to the benefit of Licensee. No rights, privileges or obligations hereunder shall be assignable by Licensee without the express prior written consent of Licensor. Any required consent is to be evidenced by a letter written by Licensor's City Manager that fully recites the terms and conditions, if any, upon which consent is given. The granting of consent is in the sole discretion of Licensor's City Manager

D. Independent Contractor. It is expressly understood and agreed that Licensee shall perform all work described herein as an independent contractor and not as an officer, agent, servant or employee of Licensor; that Licensee shall have exclusive control of and the exclusive right to

control the details of the work performed hereunder, and all persons performing the same; and shall be solely responsible for the acts and omissions of its officers, agents, employees, contractors and subcontractors; that the doctrine of respondeat superior shall not apply as between Licensor and Licensee, its officers, agents, employees, contractors and subcontractors; and that nothing herein shall be construed as creating a partnership or joint enterprise between Licensor and Licensee. No person performing any of the work described hereunder shall be considered an officer, agent, servant or employee of Licensor. Further, it is specifically understood and agreed that nothing in this License is intended or shall be construed as creating a "Community of Pecuniary Interest" or "An Equal Right of Control" which would give rise to vicarious liability. Licensee shall be an independent contractor under this License and shall assume all of the rights, obligations and liabilities applicable to it as such independent contractor hereunder. Licensor does not have the power to direct the order in which the work is done. Licensor shall not have the right to control the means, methods or details of Licensee's work. Licensee shall assume exclusive responsibility for the work. Licensee is entirely free to do the work in its own way. The provisions of this subparagraph (D.) shall not be deemed or construed as contradicting, limiting or conflicting with the provisions of subparagraph (M.) below.

E. Attorney Fees. SHOULD LICENSOR BE REQUIRED TO RESORT TO EMPLOYMENT OF ATTORNEYS TO ENFORCE THIS LICENSE, OR ANY OF ITS RIGHTS UNDER THIS LICENSE, LICENSOR SHALL BE ENTITLED TO REIMBURSEMENT FROM LICENSEE FOR LICENSOR'S ATTORNEYS' FEES. LICENSEE SHALL REIMBURSE LICENSOR FOR LICENSOR'S ATTORNEYS' FEES INCURRED IN CONNECTION WITH THE PREPARATION AND NEGOTIATION OF THIS LICENSE. BY EXECUTING THIS LICENSE, LICENSEE AGREES TO WAIVE, AND DOES HEREBY KNOWINGLY, CONCLUSIVELY, VOLUNTARILY AND INTENTIONALLY WAIVE, ANY CLAIM IT HAS OR MAY HAVE IN THE FUTURE AGAINST LICENSOR REGARDING THE AWARD OF ATTORNEY'S FEES, WHICH ARE IN ANY WAY RELATED TO THIS LICENSE, OR THE CONSTRUCTION, INTERPRETATION, VALIDITY OR BREACH OF THIS LICENSE. WITHOUT LIMITING THE FOREGOING, LICENSEE SPECIFICALLY AGREES THAT IF LICENSEE BRINGS OR COMMENCES ANY LEGAL ACTION OR PROCEEDING RELATED TO THIS LICENSE, OR TO THE CONSTRUCTION, INTERPRETATION, VALIDITY OR BREACH OF THIS LICENSE, INCLUDING BUT NOT LIMITED TO ANY ACTION PURSUANT TO THE PROVISIONS OF THE TEXAS UNIFORM DECLARATORY JUDGMENTS ACT (TEXAS CIVIL PRACTICE AND REMEDIES CODE SECTION 37.001, ET SEQ., AS AMENDED), OR CHAPTER 271 OF THE TEXAS LOCAL GOVERNMENT CODE, LICENSEE AGREES TO ABANDON, WAIVE AND RELINQUISH ANY AND ALL RIGHTS TO THE RECOVERY OF ATTORNEY'S FEES TO WHICH LICENSEE MIGHT OTHERWISE BE ENTITLED.

LICENSEE AGREES THAT THIS IS THE VOLUNTARY AND INTENTIONAL RELINQUISHMENT AND ABANDONMENT OF A PRESENTLY EXISTING, KNOWN RIGHT. LICENSEE ACKNOWLEDGES THAT IT UNDERSTANDS ALL TERMS AND CONDITIONS OF THIS LICENSE. LICENSEE FURTHER ACKNOWLEDGES AND AGREES THAT THERE WAS AND IS NO DISPARITY OF BARGAINING POWER BETWEEN LICENSOR AND LICENSEE. THIS SECTION SHALL NOT BE CONSTRUED OR INTERPRETED AS A WAIVER OF GOVERNMENTAL IMMUNITY.

LICENSEE AND LICENSOR ARE RELYING ON THEIR OWN JUDGMENT. EACH PARTY HAD THE OPPORTUNITY TO DISCUSS THIS LICENSE WITH LEGAL COUNSEL PRIOR TO ITS EXECUTION.

F. Governing Law & Venue. All performance and payments made pursuant to this License shall be deemed to have occurred in Midland County, Texas. Exclusive venue for any claims, suits or any other action arising from or connected in any way to this License, or the performance of this License shall be in Midland County, Texas. The obligations and undertakings of each of the parties to this License shall be deemed to have been performed in Midland County, Texas. This License shall be construed, interpreted and enforced under the laws of the State of Texas. The laws of the State of Texas shall govern, construe and enforce all the rights and duties of the parties, including but not limited to tort claims and any and all other claims or disputes, arising from or relating in any way to the subject matter of this License, without regard to conflict of laws and rules that would direct application of the laws of another jurisdiction.

G. Release. NOTWITHSTANDING ANY OTHER PROVISIONS OF THIS LICENSE, LICENSEE HEREBY RELEASES, ACQUITS, RELINQUISHES AND FOREVER DISCHARGES LICENSOR, AND LICENSOR'S EMPLOYEES AND OFFICERS FROM ANY AND ALL DEMANDS, CLAIMS, DAMAGES OR CAUSES OF ACTION OF ANY KIND WHATSOEVER WHICH LICENSEE HAS OR MIGHT HAVE IN THE FUTURE, INCLUDING BUT NOT LIMITED TO BREACH OF CONTRACT, QUANTUM MERUIT, CLAIMS UNDER THE DUE PROCESS AND TAKINGS CLAUSES OF THE TEXAS AND UNITED STATES CONSTITUTIONS, TORT CLAIMS, OR LICENSOR'S NEGLIGENCE.

H. Governmental Immunity. By executing this License, Licensor is not waiving its right of governmental immunity. Licensor is retaining its immunity from suit. Licensor is not granting consent to be sued by legislative resolution or action. **THERE IS NO WAIVER OF GOVERNMENTAL IMMUNITY.**

I. Third Party Beneficiary. Except as provided in Article IV.B. above with respect to Indemnitees, (i) Licensor's granting of this License does not create any third-party beneficiary, (ii) there is no third-party beneficiary to this License, and (iii) no person or entity who is not a party to this License shall have any third party beneficiary or other rights hereunder.

J. Notices. Any notice or communication required in the administration of this License shall be sent by certified mail, return receipt requested, to the parties' respective mailing addresses as set forth hereinabove.

K. Notice of Alleged Breach; Statutory Prerequisite. Without limiting the provisions of Article IV.G. above, as a condition precedent to filing suit for alleged damages incurred by an alleged breach of an express or implied provision of this License, Licensee or its legal representative, shall give the City Manager, or any other reasonable official of Licensor, notice in writing (consisting of one (1) original and seven (7) copies of notice attached to a copy of this License) of such damages, duly verified, within one hundred eighty (180) days after the same has been sustained. The discovery rule does not apply to the giving of this notice. The notice shall include when, where and how the damages occurred, the apparent extent thereof, the amount of damages sustained, the amount for which Licensee will settle, the physical and mailing addresses of Licensee at the time

and date the claim was presented and the physical and mailing addresses of Licensee for the six (6) months immediately preceding the occurrence of such damages, and the names and addresses of the witnesses upon whom Licensee relies to establish its claim; and a failure to so notify the City Manager or other such official of Licensor within the time and manner provided herein shall exonerate, excuse and except Licensor from any liability whatsoever. Licensor is under no obligation to provide notice to Licensee that Licensee's notice is insufficient. Licensor reserves the right to request reasonable additional information regarding the claim. Said additional information shall be supplied within thirty (30) days after receipt of notice.

The statutory prerequisites outlined herein constitute jurisdictional requirements pursuant to Section 271.154 of the Texas Local Government Code and Section 311.034 of the Texas Government Code. Notwithstanding any other provision, Licensee's failure to comply with the requirements herein shall perpetually bar Licensee's claim for damages under Chapter 271 of the Texas Local Government Code, and Section 311.034 of the Texas Government Code, regardless if Licensor has actual or constructive notice or knowledge of said claim or alleged damages. Licensee agrees that the requirements of this entire License are reasonable.

L. Consideration. The terms of this License are supported by good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged by the parties named herein.

M. Waiver of Governmental Immunity; Chapter 271, TEX. LOC. GOV'T CODE. The parties hereto agree that this License does not constitute a "Contract" for providing goods and/or services to Licensor as discussed in Subchapter I of Chapter 271 of the Texas Local Government Code, and Licensor does not waive, to the maximum extent allowed by law, any constitutional, statutory or common law right to sovereign immunity or governmental immunity from liability or suit. Licensor expressly does not consent to be sued or be liable. To the maximum extent allowed by law, nothing in this License constitutes a waiver of Licensor's governmental immunity and the parties hereto expressly agree that this License shall not constitute, nor be interpreted as a waiver of Licensor's governmental immunity under Subchapter I of Chapter 271 of the Texas Local Government Code, nor shall it constitute nor be interpreted as a waiver of Licensor's governmental immunity for the benefit of any third-party lacking privity to this License.

This License does not obligate Licensee to use the Property to construct, repair, operate, replace, or maintain Licensor's facilities or structures described herein, rather, it merely prohibits Licensee from using the Property for any other purpose. This License restricts the use of the Property to a specific purpose but does not require the use of the Property for a specific purpose. Licensee is not providing a service to Licensor. Licensee is paying Licensor for temporary rights in real property, not for a service. Any such provision shall be deemed to be a covenant against noncomplying use, not a covenant to use. Licensee's use of the Property in compliance with a restriction shall not constitute a service, and such complying use shall not operate to waive Licensor's governmental immunity.

N. Compliance. Licensee agrees that it shall comply with Texas Government Code Section 2252.908, as amended, to the extent that this statute applies to this License. Licensee agrees that it shall comply with Texas Local Government Code Section 176.006, as amended, to the extent that this statute applies to this License.

O. Texas Historical Commission Survey. Licensee agrees that it shall comply with Chapter 191

of the Texas Natural Resources Code. By executing this License, Licensee represents that it has contacted the Texas Historical Commission (the "Commission") for the purpose of determining whether the Commission will request that an archaeological survey be completed before Licensee commences operations on the Property, as contemplated herein. Licensee agrees that it shall complete or cause to be completed an archaeological survey before commencing any operations on the Property if the Commission so requests and deliver the same to Licensor. Notwithstanding any provision contained herein, in the event that any site, object, artifact, or other feature of archaeological, scientific, educational, cultural, or historical interest is encountered during the operations authorized by this License, Licensee will immediately notify Licensor and the Commission so that adequate measures may be undertaken to protect or recover such discoveries or findings, as deemed appropriate by Licensor or the Commission.

P. Waiver. No waiver of any of the provisions of this License shall be deemed or constitute a waiver of any other provisions of this License, nor shall such waiver constitute a continuing waiver unless otherwise expressly provided. Likewise, the failure of Licensor to enforce any provision of this License shall not be deemed nor shall constitute a waiver of the right of Licensor to enforce such provision.

Q. Counterpart Execution. This License may be executed in several counterparts, and any such agreement shall be deemed an original for all intents and purposes.

R. No Release of Liability. Notwithstanding anything to the contrary contained in this License, the termination or expiration of this License shall not relieve Licensee of any liability, duty or obligation under this License, nor shall it preclude Licensor from asserting any right to specific performance, damages or any other rights or remedies to which Licensor may be entitled. Upon termination or expiration of this License for any reason, Licensee shall execute and deliver a recordable release of this License to Licensor in form and substance satisfactory to Licensor.

S. Entire Agreement. This License constitutes the entire agreement between Licensor and Licensee concerning the subject matter hereof, superseding all negotiations, prior discussions, prior licenses and prior agreements and understandings related to the subject matter hereof. This License may only be amended by written instrument executed by Licensor and Licensee.

City Council Meeting

Item Number: 14

Meeting Date: June 27, 2023, July 11, 2023

To: City Council / City Manager

From: Landon Ochoa, Senior Planner

Subject: AN ORDINANCE VACATING AND ABANDONING A 0.069-ACRE PORTION OF ALLEY RIGHT-OF-WAY LOCATED ADJACENT TO LOTS 1 THROUGH 3 AND LOTS 6 THROUGH 8, BLOCK 75, WEST END ADDITION, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED ON THE EAST SIDE OF ANDREWS HIGHWAY, APPROXIMATELY 200 FEET SOUTH OF WEST TEXAS AVENUE); ADOPTING THE APPRAISAL BY THE CITY MANAGER OF $12,024.00; RETAINING A NONEXCLUSIVE UTILITY EASEMENT; AND ORDERING RECORDATION BY THE CITY SECRETARY (DISTRICT 3) (DEVELOPMENT SERVICES)

Purpose:

Kevin Matson and Aaron Burrell is requesting to vacate a 0.069-acre alley, located in Lots 1-3, Lots 6-8, Block 75, West End Addition, City and County of Midland, Texas, to replat into one lot for future development.

Recommended City Council Action:

Approve

Fiscal Impact:

Not applicable.

Discussion:

The approximated area that will be vacated is 3,005.64 square feet (0.069-acres).

This request has been circulated and reviewed by all pertinent City departments and franchise utility companies. Their comments, conditions, and requests are as follows:

Code Compliance: (Approved)

No oil and gas issues.

Building Code: (Approved)

No objections.

Engineering: (Approved)

No objections to vacation. Applicant shall be responsible for relocating any utilities, if existing, or providing easements as needed.

Fire: (Approved)

No objections.

Transportation: (Approved)

No objections to vacation. Applicant shall be responsible for relocating any utilities, if existing, or providing easements as needed.

GIS: (Approved)

Please indicate POB on visual. Also, please include another set of x-y coordinates.

AT&T: (Approved)

I don’t see anything down the alley, but we do have cable on North O Street going into 200 Andrews Hwy.

Atmos: (Approved)

Atmos Energy currently has facilities located within the above-described alley Right of Way E. of Andrews Hwy. between W. Illinois and W. Texas. We currently have a gas main that extends into the proposed vacate area. Atmos would have no objection to this vacation if a utility easement is maintained or, if requested, the line was to be relocated or retired. Any relocation/retirement costs would be passed on to the individual or entity requesting the vacate.

Astound: (Approved)

It looks like we do not have services in the vicinity per astound maps.

Oncor: (Approved)

Oncor does have facilities in the alley and since it will be vacated and a utility easement will be in place on the new re-plat, Oncor is good with the utility easement and the alley can be vacated.

Optimum: (Approved)

We, Optimum, do not have any plant in that alley.

Planning:

Pertinent City departments and franchise utility companies have reviewed this vacation request and have approved the request. The City will retain an accessible nonexclusive utility easement across, thru, over, under, on and along the property until all entities that were using the property for utility purposes have abandoned their uses of the property.

Therefore, staff recommends approval of the vacation of a 0.069-acre alley, located in Lots 1-3, Lots 6-8, Block 75, West End Addition, City and County of Midland, Texas to replat lots 1-3 into one lot for future development, subject to conditions A through B.

Conditions:

A. **That the value of the property shall be $12,024.**

B. **That a replat of the subject property is approved by the City of Midland and filed and recorded with the County Clerk of Midland County.**

Letters of Objection:

As of June 15, 2023, staff has not received any letters of objection to this request.

ORDINANCE NO. _____

AN ORDINANCE VACATING AND ABANDONING A 0.069-ACRE PORTION OF ALLEY RIGHT-OF-WAY LOCATED ADJACENT TO LOTS 1 THROUGH 3 AND LOTS 6 THROUGH 8, BLOCK 75, WEST END ADDITION, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED ON THE EAST SIDE OF ANDREWS HIGHWAY, APPROXIMATELY 200 FEET SOUTH OF WEST TEXAS AVENUE); ADOPTING THE APPRAISAL BY THE CITY MANAGER OF $12,024.00; RETAINING A NONEXCLUSIVE UTILITY EASEMENT; AND ORDERING RECORDATION BY THE CITY SECRETARY

WHEREAS, it has been determined by the Midland City Council that a 0.069-acre portion of alley right-of-way located adjacent to Lots 1 through 3 and Lots 6 through 8, Block 75, West End Addition, City and County of Midland, Texas, as described in Exhibit "A" attached hereto and made a part hereof for all legal purposes (the "Property"), is no longer needed for public use; and

WHEREAS, Section 272.001 of the Texas Local Government Code provides that a political subdivision may not convey, sell, or exchange its interest in land without observing notice and bid requirements, unless the conveyance is to one or more abutting property owners; and

WHEREAS, an application for vacating the Property has been received by the City from the abutting property owner; and

WHEREAS, the City Manager has appraised the value of the City's property interest in the Property at $12,024.00, as shown in Exhibit "B" attached hereto and incorporated herein by reference; and

WHEREAS, the Council finds it to be in the public interest to abandon and vacate the Property;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF MIDLAND, TEXAS:

SECTION ONE. That the Property is hereby vacated and abandoned for all public

purposes. Provided, however, that the City is hereby abandoning only the public interest in the Property, and this ordinance in no way affects any private easement or access easement which abutting property owners may have in the Property.

SECTION TWO. That this ordinance shall not be effective until:

A. the City of Midland has received from the abutting property owner(s) the sum of $12,024.00; and

B. a replat of the Property is approved by the City of Midland and filed and recorded with the County Clerk of Midland County, Texas.

SECTION THREE. That the City herein retains an accessible nonexclusive utility easement across, through, over, under, on and along the Property until all entities that were using the Property for utility purposes as of the date of approval of this ordinance have abandoned their uses of the Property.

SECTION FOUR. That upon the City's receipt of the sum set forth in Section Two hereof, the City Secretary is hereby authorized and directed to file a certified copy of this ordinance with the County Clerk of Midland County, Texas, for purposes of recording in the Official Records of Midland County, Texas.

The above and foregoing ordinance was duly proposed, read in full and adopted on first reading, the _____ day of _____, A.D., 2023; and passed to second reading on motion of Council member _____, seconded by Council member _____, by the following vote:

Council members voting "AYE":

Council members voting "NAY":

The above and foregoing ordinance was read in full and finally adopted by the following vote upon motion of Council member _____, seconded by Council member _____, on the _____ day of _____, A.D., 2023, at a regular meeting of the City Council:

Council members voting "AYE":

Council members voting "NAY":

Office of the City Manager

June 15, 2023

Midland City Council
City of Midland, Texas

RE: Request for vacation of a 0.069-acre portion of alley right-of-way located adjacent to Lots 1 through 3 and Lots 6 through 8, Block 75, West End Addition, City and County of Midland, Texas

Dear Members of the City Council:

The above-referenced property has been appraised in accordance with Chapter 272 of the Texas Local Government Code. The fair market value of the property is $12,024.00. Upon the City's receipt of this sum from the adjoining property owner(s), the ordinance vacating and abandoning the City's interest in the property may be recorded in the Midland County Clerk's office.

Very truly yours,

Morris Williams, Jr.
Interim City Manager

EXHIBIT "B"

MIDLAND Planning Division

Vacate Right-of-Way/Public Utility Easement/Land/Street Application

Project Number: V-23-0052

Case Number: _____

Applicant *(if acting as Agent, see affidavit on page 2)* Printed Name: Kevin Mattson / Aaron Burrell		Phone (972) 369-4123 Email Kmattson@redskyholdings.com & aaron@asbsurveyors.com
Address 15110 Dallas Pkwy, Ste 440	City Dallas	State TX Zip 75248

Application is hereby made to the City Council to vacate the following:

- ☑ Right-of-Way
- ☐ Public Utility Easement
- ☐ Land
- ☐ Street

Description of Address: 20 Foot Alley in Block 75, West End Addition, City of Midland, Texas.

Reason for Request: Replatting into one lot w/ Lots 1-3 for future re-building.

Reasons, in applicant's opinion, why the requested vacation will not adversely affect the public welfare or will contribute to it in a positive way: Access & utility easements will continue to exist.

Submittal and Fees

Items to be submitted with this application form:

- Application Fee – Payable to the 'City of Midland' $400.00
- Sealed metes and bounds description of the property to be vacated (included on the map) and total square feet of vacation. Include ownership, legal and deed information for adjacent property owners
- Digital Copies of Survey (PDF/JPEG)

Utility Company Approval

Clearance is needed from the following utility companies:

- City of Midland
- AT&T
- Atmos Energy
- Suddenlink Cable TV Co.
- Oncor Electric
- Grande Communications

The City will route the request to these companies, but it is the applicant's responsibility to ensure clearance has been obtained to resolve any issues that may arise.

Policies

1. If the vacation request involves only a portion of a section right-of-way, such that approval would not affect the public's ability to travel along said right-of-way, then the request will be scheduled for consideration by the City Council. No public hearing will be needed.

2. If the vacation request involves an entire section of right-of-way, such that approval would cause the public to lose all rights to use it, then the following procedures apply:

   a. Nearby land owners who have a reasonable expectation to use said right-of-way, as determined by the Transportation Division, must first agree to the proposed vacation. It is the applicant's responsibility to obtain a letter of concurrence signed by the affected landowners.

   b. If all letters are received indicating that the affected landowners agree to the request, then a public hearing before the City Council will be scheduled. The Planning Division will mail public notice of the hearing to landowners within 400 feet of the affected right-of-way.

   c. If a request is approved, the right-of-way shall be divided into two equal parts, with each half becoming the property of the respective abutting owner. If the applicant desires to own the entire width, he or she must negotiate with the opposite landowner.

City Council Meeting

Item Number: 15

Meeting Date: June 27, 2023, July 11, 2023

To: City Council / City Manager

From: Alexandra Walling, Senior Planner

Subject: AN ORDINANCE AMENDING THE ZONING DISTRICT MAP OF THE CITY OF MIDLAND TO REZONE LOT 2E, BLOCK 33, NORTHGATE ADDITION, SECTION 21, CORRECTION PLAT, CITY AND COUNTY OF MIDLAND, TEXAS, FROM PD, PLANNED DEVELOPMENT DISTRICT FOR A SHOPPING CENTER TO AN AMENDED PD, PLANNED DEVELOPMENT DISTRICT FOR A SHOPPING CENTER (GENERALLY LOCATED AT THE NORTHEAST CORNER OF NORTHCREST DRIVE AND WEST LOOP 250 NORTH); CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OR FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION (DISTRICT 1) (DEVELOPMENT SERVICES)

Purpose:

The applicant, Yelena Fiester, is requesting a Zone Change from PD, Planned Development District for a Shopping Center to an amended PD, Planned Development District for a Shopping Center to amend the adopted site plan for the addition of a cooler and new parking.

Recommended City Council Action:

Approve.

Fiscal Impact:

No City funds would be required for this project.

Current Zoning:

PD, Planned Development District for a Shopping Center with a base zoning RR, Regional Retail District (Ordinance 9725).

Surrounding Zoning and Land Use:

The property to the north is zoned PD, Planned District for a Shopping Center (Ordinance No. 7844) and the location of a retail store. The property to the east is zoned PD, Planned District for a Shopping Center (Ordinance No. 7844) and the location of a restaurant. The properties to the south are zoned PD, Planned District for a Shopping Center and the location of restaurants and retail stores (Ordinance No. 7664). The property to the west is zoned MF-16, Multiple-Family Dwelling District, and the location of apartments.

Analysis:

The property is located at 4512 West Loop 250 North Frontage Road and is currently the location of Texas Roadhouse. The applicant is requesting the addition of a ±120 sq. ft. exterior cooler to be attached to the north side of the main building, additional parking on the west side of the restaurant for 99 spaces, and one new disabled parking space on the north side of the restaurant as illustrated on Exhibit "A.". The applicant's original site plan satisfies parking requirements, and the additional 99 spaces (total of 224) will provide additional parking for the restaurant. The additional parking area to the west is contingent on approval by Engineering Services at the site plan stage as it is located within a storm drainage easement.

The proposed Zone Change has been circulated to the respective City departments for internal review and their comments, conditions, and requirements are as follows:

Fire: (Approved)

No comments or objections.

Building: (Approved)

No issues. All future structures must adhere to the 2018 International Building Codes, the 2015 International Energy Code, the 2020 NEC requirements, the 2015 International Fire Codes, local city ordinances, zoning requirements, established setbacks, oil and gas considerations, and floodplain requirements if necessary. Code versions are subject to change depending on time of new code edition adoption in the City of Midland and date of permit application.

Engineering (Approved):

No objection to zone change. [For the Applicant's information only.]

Site drainage, utilities, driveway access, and traffic circulation may be adjusted during construction drawing review as necessary to receive building permit approval from Engineering and Traffic Operations. [For the Applicant's information only.]

Code: (Approved)

No Oil and Gas issues.

Transportation: (Approved)

Site drainage, utilities, driveway access, and traffic circulation may be adjusted during construction drawing review as necessary to receive building permit approval from Engineering and Traffic Operations. [For the Applicant's information only.]
No objection to zone change. [For the Applicant's information only.]

Planning:

The request fits with the Tall City Tomorrow Comprehensive Plan, Chapter 3-Land Use Vision. The land use map indicates that this area shall be used for CC, Community Commercial developments which include a broad range of retail uses such as Texas Roadhouse. The current PD includes a base zoning of RR, Regional Retail which allows the restaurant to be consistent with the Tall City Plan.

The proposed PD zone change will allow for alterations to the previously adopted Site Plan, which includes the exterior cooler and parking additions. These alterations cannot be changed without an amendment to the PD.

Staff recommends approval of this Zone Change from PD, Planned Development District for a Shopping Center, to Amended PD, Planned Development District for a Shopping Center, subject to condition A.

Condition(s):

A. **That the use and development of the property shall significantly conform to the site plan attached hereto as Exhibit "A".**

Letters of Objection:

Staff has not received any letters of objection as of June 15, 2023.

ORDINANCE NO. _____

AN ORDINANCE AMENDING THE ZONING DISTRICT MAP OF THE CITY OF MIDLAND TO REZONE LOT 2E, BLOCK 33, NORTHGATE ADDITION, SECTION 21, CORRECTION PLAT, CITY AND COUNTY OF MIDLAND, TEXAS, FROM PD, PLANNED DEVELOPMENT DISTRICT FOR A SHOPPING CENTER TO AN AMENDED PD, PLANNED DEVELOPMENT DISTRICT FOR A SHOPPING CENTER (GENERALLY LOCATED AT THE NORTHEAST CORNER OF NORTHCREST DRIVE AND WEST LOOP 250 NORTH); CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OR FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION

WHEREAS, the City Planning and Zoning Commission and the Governing Body of the City of Midland, in compliance with the City Charter, the City Code, and State law, have given the requisite notices by United States mail, publication and otherwise; and after a full and fair hearing to all of the property owners generally and particularly to those interested persons situated in the affected area and in the vicinity thereof, the Governing Body finds that the public health, safety and general welfare will be best served by rezoning Lot 2E, Block 33, Northgate Addition, Section 21, Correction Plat, City and County of Midland, Texas (the "Property") to an amended PD, Planned Development District for a Shopping Center and adopting a site plan therefor, as set out hereinafter;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF MIDLAND, TEXAS:

SECTION ONE. That the Zoning District Map of the City of Midland, Texas, is hereby amended to rezone the Property from PD, Planned Development District for a Shopping Center to an amended PD, Planned Development District for a Shopping Center.

SECTION TWO. That the base zoning district to which the use and development of the Property shall conform, except as modified by Section Three of this ordinance, is the RR, Regional Retail District.

SECTION THREE. That a site plan, which is attached hereto as Exhibit "A" and

incorporated herein for all purposes, is hereby adopted, and the use and development of the Property shall be subject to the following conditions and restrictions:

That the Property shall significantly conform to the site plan attached hereto as Exhibit "A".

SECTION FOUR. That the definitions given in the zoning regulations contained in the City Code of the City of Midland, Texas, shall be applicable to such of those terms as are used herein.

SECTION FIVE. The provisions of this ordinance are to be cumulative of all other ordinances or parts of ordinances governing or regulating the same subject matter as that covered herein; provided, however, that all prior ordinances or parts of ordinances inconsistent with or in conflict with any of the provisions of this ordinance are hereby expressly repealed to the extent of any such inconsistency or conflict.

SECTION SIX. If any section, subsection, sentence, clause or phrase of this ordinance is, for any reason, held to be unconstitutional or invalid, such holding shall not affect the validity of the remaining portions of this ordinance. The Council of the City of Midland hereby declares that it would have passed this ordinance and each section, subsection, sentence, clause, or phrase hereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, or phrases be declared unconstitutional or invalid.

SECTION SEVEN. The penalty for violation of this ordinance shall be in accordance with the general penalty provisions contained in Section 1-3-1 of the City Code of Midland, Texas, which provides for a fine not exceeding two thousand dollars ($2,000.00).

SECTION EIGHT. The City Secretary is hereby authorized and directed to publish the descriptive caption of this ordinance in the manner and for the length of time prescribed by the law as an alternative method of publication.

The above and foregoing ordinance was duly proposed, read in full and adopted on

first reading, the _____ day of _____, A.D., 2023; and passed to second reading on motion of Council member _____, seconded by Council member _____, by the following vote:

Council members voting "AYE":

Council members voting "NAY":

The above and foregoing ordinance was read in full and finally adopted by the following vote upon motion of Council member _____, seconded by Council member _____, on the _____ day of _____, A.D., 2023, at a regular meeting of the City Council:

Council members voting "AYE":

City Council Meeting

Item Number: 16

Meeting Date: June 27, 2023, July 11, 2023

To: City Council / City Manager

From: Alexandra Walling, Senior Planner

SUBJECT: **AN ORDINANCE VACATING AND ABANDONING A 0.03-ACRE PORTION OF MADISON STREET RIGHT-OF-WAY AND A 0.03-ACRE PORTION OF CARVER STREET RIGHT-OF-WAY, BOTH LOCATED ADJACENT TO BLOCK 9, EAST MIDLAND ADDITION, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED AT THE SOUTHEAST CORNER OF THE INTERSECTION OF GARDEN LANE AND MADISON STREET AND AT THE SOUTHWEST CORNER OF THE INTERSECTION OF GARDEN LANE AND CARVER STREET); ADOPTING THE APPRAISAL BY THE CITY MANAGER OF $5,227.20; RETAINING A NONEXCLUSIVE UTILITY EASEMENT; AND ORDERING RECORDATION BY THE CITY SECRETARY (DISTRICT 2) (DEVELOPMENT SERVICES)**

Purpose:

The applicant, Schumann Engineering, is requesting to vacate a 0.03-acre portion of Madison Street right-of-way and a 0.03-acre portion of Carver Street right-of-way, both located adjacent to Block 9, East Midland Addition, City and County of Midland, Texas, for ownership purposes.

Recommended Planning and Zoning Commission Action:

☒ Approve ☐ Deny ☐ Direction/Informational

Fiscal Impact:

The 2023 appraised value of the right-of-way is $2.00 per square foot, for a total value of $5227.20.

Discussion:

The approximated area that will be vacated is 2,613-square feet (0.06-acres). The applicant is requesting to vacate for future development.

This request has been circulated and reviewed by all pertinent City departments and franchise utility companies. Their comments, conditions, and requests are as follows:

Code Compliance: (Approved)

No Oil and Gas issues.

Building Code: (Approved)

No objections.

Engineering: (Approved)

No objections to vacation. Applicant shall be responsible for relocating any utilities, if existing, or providing easements as needed. [For Applicant's Information Only.]

Fire: (Approved)

No objections.

Transportation: (Approved)

No objections to vacation. Applicant shall be responsible for relocating any utilities, if existing, or providing easements as needed.

GIS: (Approved)

No comments.

AT&T: (Approved with conditions)

We have fiber on the power poles that is going across where the easement vacation is requested. We are okay with the vacation if there is a utility easement.

Atmos: (Approved with Conditions)

Atmos Energy currently has facilities located within the above-described Right of Way along the West side of Carver street. We currently have two gas lines that extend along a portion of the proposed vacate area. Atmos would have no objection to vacation of the referenced area if our facilities are within a designated utility easement.

Astound: (Approved)

After looking at our maps it does not seem that we have any services in the highlighted sections that you have marked per your map.

Oncor: (Approved)

Oncor Electric Delivery has no objection to the vacation of the above referenced road vacancy of East 10' of N Madison St in the East Midland Addition in the City & County of Midland, TX. Oncor Electric Delivery has no objection to the road vacancy of West 10' of N Carver St with the exception of 30ft in length by 10ft in width at South end of proposed road vacancy. Oncor Electric has overhead facilities located in the dedicated right of way as noted on the attached drawing and plat that will remain in dedicated right of way.

Altice: (Approved with Conditions)

Optimum, has aerial coax plant in the alley & the ROW west of Carver St. We cannot vacate unless the requestor's pay for relocating our plant. As long as it stays aerial we will be okay, if they want us to go underground, they will need to pay to relocate.

Midland Central Appraisal District: (Approved)

The vacation area indicated has a current value of $2.00 per square foot or $5227.20.

Planning:

Pertinent City departments and franchise utility companies have reviewed this vacation request and have approved the request.

Therefore, staff recommends approval of the vacation of a 0.03-acre portion of Madison Street right-of-way and a 0.03-acre portion of Carver Street right-of-way, both located adjacent to Block 9, East Midland Addition, City and County of Midland, Texas, for future development to be subject to conditions A through C.

Conditions:

A. **That the City of Midland has received from the property owner the sum of $5227.20.**

B. **That a replat of the subject property is approved by the City of Midland and filed and recorded with the County Clerk of Midland County.**

C. **That an accessible nonexclusive utility easement is retained.**

Letters of Objection:

As of June 15, 2023, staff has not received any letters of objection to this request.

ORDINANCE NO. _____

AN ORDINANCE VACATING AND ABANDONING A 0.03-ACRE PORTION OF MADISON STREET RIGHT-OF-WAY AND A 0.03-ACRE PORTION OF CARVER STREET RIGHT-OF-WAY, BOTH LOCATED ADJACENT TO BLOCK 9, EAST MIDLAND ADDITION, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED AT THE SOUTHEAST CORNER OF THE INTERSECTION OF GARDEN LANE AND MADISON STREET AND AT THE SOUTHWEST CORNER OF THE INTERSECTION OF GARDEN LANE AND CARVER STREET); ADOPTING THE APPRAISAL BY THE CITY MANAGER OF $5,227.20; RETAINING A NONEXCLUSIVE UTILITY EASEMENT; AND ORDERING RECORDATION BY THE CITY SECRETARY

WHEREAS, it has been determined by the Midland City Council that a 0.03-acre portion of Madison Street right-of-way and a 0.03-acre portion of Carver Street right-of-way, both located adjacent to Block 9, East Midland Addition, City and County of Midland, Texas, as described in Exhibit "A" attached hereto and made a part hereof for all legal purposes (the "Property"), is no longer needed for public use; and

WHEREAS, Section 272.001 of the Texas Local Government Code provides that a political subdivision may not convey, sell, or exchange its interest in land without observing notice and bid requirements, unless the conveyance is to one or more abutting property owners; and

WHEREAS, an application for vacating the Property has been received by the City from the abutting property owner; and

WHEREAS, the City Manager has appraised the value of the City's property interest in the Property at $5,227.20, as shown in Exhibit "B" attached hereto and incorporated herein by reference; and

WHEREAS, the Council finds it to be in the public interest to abandon and vacate the Property;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF MIDLAND, TEXAS:

SECTION ONE. That the Property is hereby vacated and abandoned for all public purposes. Provided, however, that the City is hereby abandoning only the public interest in the Property, and this ordinance in no way affects any private easement or access easement which abutting property owners may have in the Property.

SECTION TWO. That this ordinance shall not be effective until:

A. the City of Midland has received from the abutting property owner(s) the sum of $5,227.20; and

B. a replat of the Property is approved by the City of Midland and filed and recorded with the County Clerk of Midland County, Texas.

SECTION THREE. That the City herein retains an accessible nonexclusive utility easement across, through, over, under, on and along the Property until all entities that were using the Property for utility purposes as of the date of approval of this ordinance have abandoned their uses of the Property.

SECTION FOUR. That upon the City's receipt of the sum set forth in Section Two hereof, the City Secretary is hereby authorized and directed to file a certified copy of this ordinance with the County Clerk of Midland County, Texas, for purposes of recording in the Official Records of Midland County, Texas.

The above and foregoing ordinance was duly proposed, read in full and adopted on first reading, the _____ day of _____, A.D., 2023; and passed to second reading on motion of Council member _____, seconded by Council member _____, by the following vote:

Council members voting "AYE":

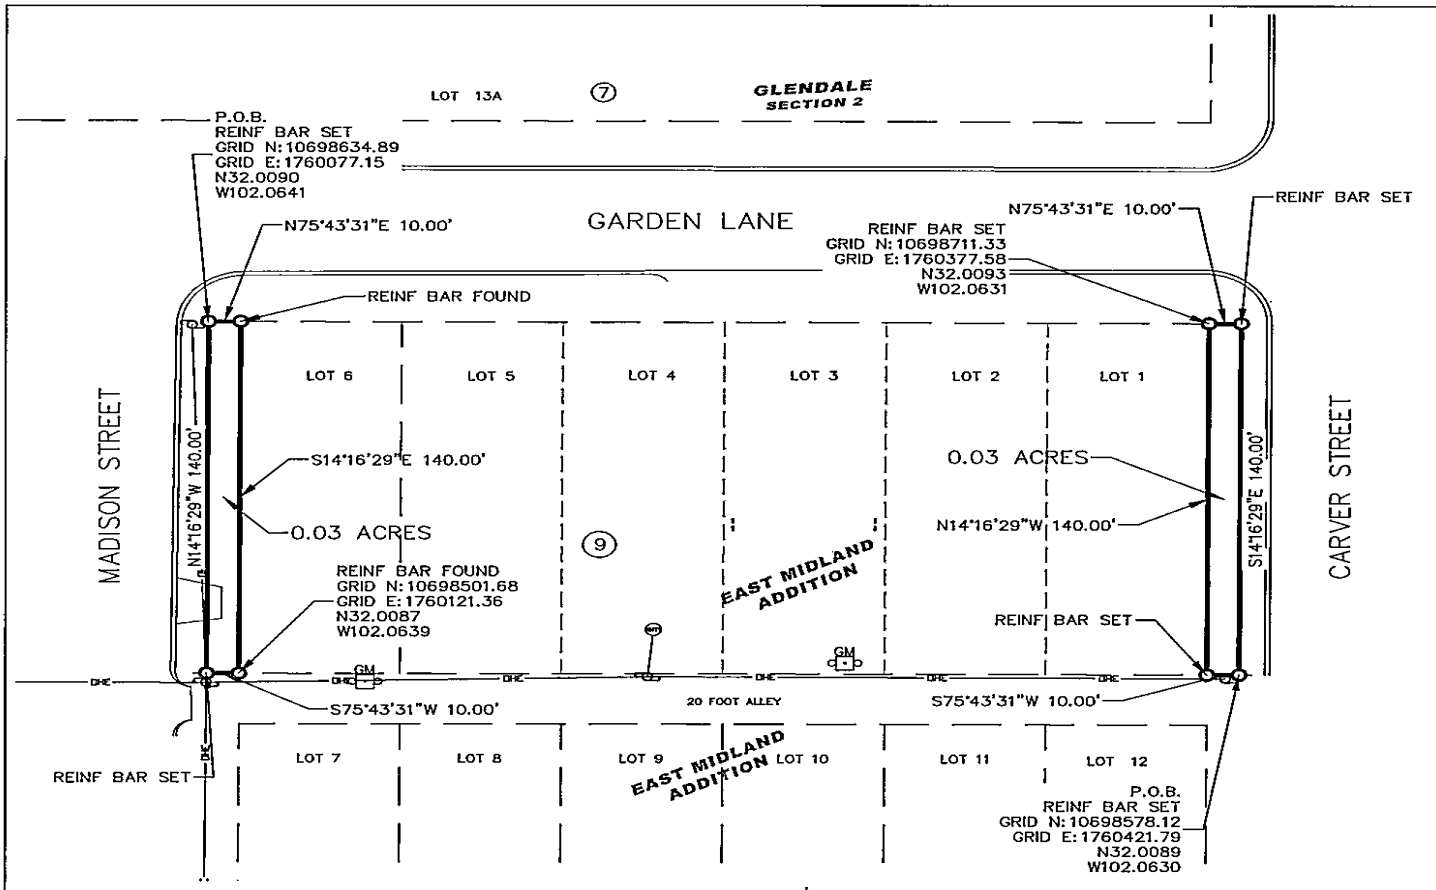
City of Midland, Texas

RE: Request for vacation of a 0.03-acre portion of Madison Street right-of-way and a 0.03-acre portion of Carver Street right-of-way, both located adjacent to Block 9, East Midland Addition, City and County of Midland, Texas

Dear Members of the City Council:

The above-referenced property has been appraised in accordance with Chapter 272 of the Texas Local Government Code. The fair market value of the property is $5,227.20. Upon the City's receipt of this sum from the adjoining property owner(s), the ordinance vacating and abandoning the City's interest in the property may be recorded in the Midland County Clerk's office.



Very truly yours,

Morris Williams Jr.

Morris Williams, Jr.

Vacate Right-of-Way/Public Utility Easement/Land/Street Application

Project Number: _____

Case Number: _____

Applicant *(if acting as Agent, see affidavit on page 2)* Printed Name: CATHOLIC DIOCESE OF SAN ANGELO		Phone (325) 651-7500 Email mwise@sanangelodiocese.org	
Address PO Box 1829	City SAN ANGELO	State TX	Zip 76902

Application is hereby made to the City Council to vacate the following:

- ☑ Right-of-Way
- ☐ Public Utility Easement
- ☐ Land
- ☐ Street

Description of Address: 1400, 1402, 1404, 1406, 1408, and 1410 Garden Ln.

Reason for Request: To obtain 10' off East ROW of Madison St. & 10' off the West ROW of Carver St.

Reasons, in applicant's opinion, why the requested vacation will not adversely affect the public welfare or will contribute to it in a positive way: They own the Entire North half of Block 9.

Submittal and Fees

Items to be submitted with this application form:

- Application Fee – Payable to the 'City of Midland'
- Sealed metes and bounds description of the property to be vacated (included on the map) and total square feet of vacation. Include ownership, legal and deed information for adjacent property owners
- Digital Copies of Survey (PDF/JPEG)

Utility Company Approval

Clearance is needed from the following utility companies:

- City of Midland
- AT&T
- Atmos Energy
- Suddenlink Cable TV Co.
- Oncor Electric
- Grande Communications

The City will route the request to these companies, but it is the applicant's responsibility to ensure clearance has been obtained to resolve any issues that may arise.

Policies

1. If the vacation request involves only a portion of a section right-of-way, such that approval would not affect the public's ability to travel along said right-of-way, then the request will be scheduled for consideration by the City Council. No public hearing will be needed.

2. If the vacation request involves an entire section of right-of-way, such that approval would cause the public to lose all rights to use it, then the following procedures apply:

   a. Nearby land owners who have a reasonable expectation to use said right-of-way, as determined by the Transportation Division, must first agree to the proposed vacation. It is the applicant's responsibility to obtain a letter of concurrence signed by the affected landowners.

   b. If all letters are received indicating that the affected landowners agree to the request, then a public hearing before the City Council will be scheduled. The Planning Division will mail public notice of the hearing to landowners within 400 feet of the affected right-of-way.

   c. If a request is approved, the right-of-way shall be divided into two equal parts, with each half becoming the property of the respective abutting owner. If the applicant desires to own the entire width, he or she must negotiate with the opposite landowner.

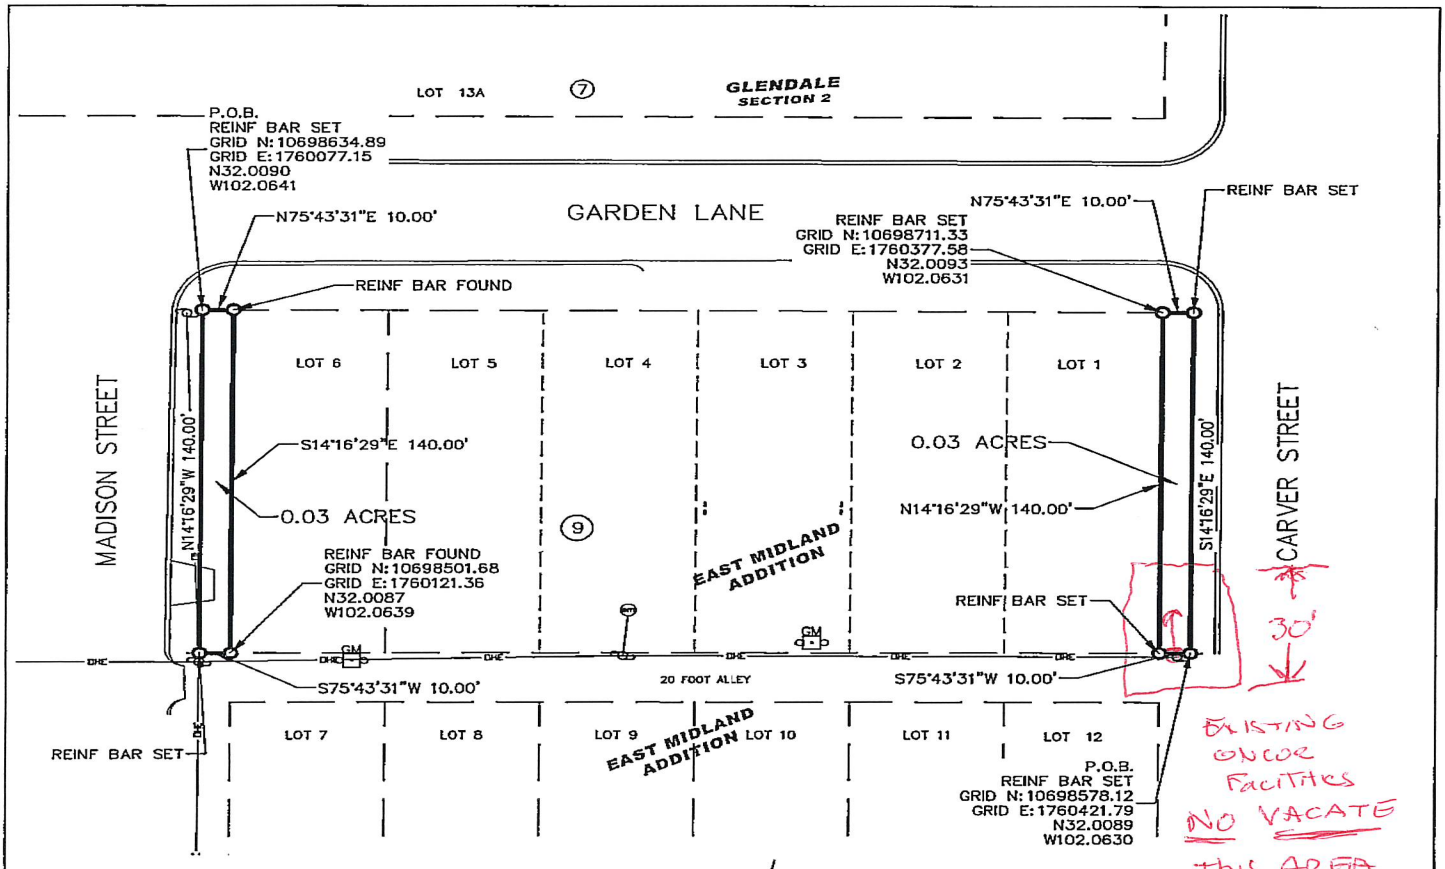
RE: Our Lady of Guadalupe – V-23-0051

Ms. Walling,



Oncor Electric Delivery has no objection to the vacation of the above referenced road vacancy of East 10' of N Madison St St in the East Midland addition in the City & County of Midland, TX. Oncor Electric Delivery has no objection to the road vacancy of West 10' of N Carver St with the exception of 30ft in length by 10ft in width at South end of proposed road vacancy. Oncor Electric has overhead facilities located in the dedicated right of way as noted on the attached drawing and plat that will remain in dedicated right of way.

Please let me know if you have any questions.

Sincerely,

Jeffrey R. Henderson

Oncor Electric Delivery Company

Subject: RE: External E-mail - New Vacation of city ROW

Optimum, has aerial coax plant in the alley & the ROW west of Carver St.
The blue border highlights what cable routes will be affected.
The red highlighted lines indicate the coax cables, that will be affected & subject to changes.
We cannot vacate unless the requestor's pay for relocating our plant.

On your map, it shows in green the vacate area that is needed, it seems like those poles we are attached to, are or will be removed.

I am usure of that at the moment as they have not replied. But once they do if they inform me, they are moving their poles I will let you know as well.

For your comments I will put you are okay with the vacation as long as an easement is obtained. Is that okay with you?

I am good with that. Is Oncor leaving their poles and power in place? If they gave it up and are rerouting we would have to reroute as well to be off their pole but it would still be at the customers cost.

Thanks,
Jerry

We aren't buried there, we are on Oncors poles. I don't want to give up the ROW since we are already there . If they want us to give it up, it will need to be approved by our ROW department and they would need to pay to reroute our cable.

Thanks,
Jerry

Re: Case Name: Our Lady of Guadalupe
Case Number: V-23-0051

Alexandra,

Atmos Energy currently has facilities located within the above-described Right of Way along the West side of Carver street. We currently have two gas lines that extend along a portion of the proposed vacate area. Atmos would have no objection to vacation of the referenced area if our facilities are within a designated utility easement.
Please let me know if you have any further questions.

Sincerely,

Mark Lieb

City Council Meeting

Item Number: 17

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Tina Jauz, Assistant City Manager

Subject: AN ORDINANCE OF THE CITY OF MIDLAND, TEXAS, DESIGNATING LOTS 22, 23 AND 24, BLOCK 65, ORIGINAL TOWN ADDITION, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED ON THE WEST SIDE OF SOUTH LORAINE STREET, APPROXIMATELY 130 FEET NORTH OF WEST MISSOURI AVENUE) AS TAX ABATEMENT REINVESTMENT ZONE NUMBER 2023-02 FOR COMMERCIAL AND INDUSTRIAL TAX ABATEMENT AS AUTHORIZED BY CHAPTER 312 OF THE TEXAS TAX CODE; ESTABLISHING THE BOUNDARIES THEREOF AND OTHER MATTERS RELATING THERETO; DECLARING FINDINGS OF FACT; AND PROVIDING A SAVINGS AND SEVERABILITY CLAUSE (DISTRICT 2) (CITY MANAGER)

Purpose:

An ordinance designating Lots 22, 23, and 24, Block 65, Original Town Addition, City and County of Midland, Texas (Generally located on the west side of South Loraine Street, approximately 130 feet north of West Missouri Avenue) as a Tax Abatement Reinvestment Zone Number 2023-02 for commercial and industrial tax abatement as authorized by Chapter 312 of the Texas Tax Code; establishing the boundaries thereof and other matters relating thereto; declaring findings of fact; and providing a savings and severability clause.

Recommended City Council Action:

Approve

Fiscal Impact:

None.

Discussion:

The public hearing is the first step in establishing a Reinvestment Zone. A public notice was issued and all taxing entities were notified of the proposed Reinvestment Zone. If approved, following a second reading of the ordinance, the city will have the ability to enter into a Tax Abatement Agreement with any interested party. Any such agreement would be subject to City Council approval.

On November 15, 2022, the City Council approved a resolution adopting guidelines and criteria for Tax Abatement Agreements as authorized by Chapter 312 of the Texas Tax Code. The guidelines are in place for two years.

Morris Williams Jr.

City Manager's Office

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY OF MIDLAND, TEXAS, DESIGNATING LOTS 22, 23 AND 24, BLOCK 65, ORIGINAL TOWN ADDITION, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED ON THE WEST SIDE OF SOUTH LORAINE STREET, APPROXIMATELY 130 FEET NORTH OF WEST MISSOURI AVENUE) AS TAX ABATEMENT REINVESTMENT ZONE NUMBER 2023-02 FOR COMMERCIAL AND INDUSTRIAL TAX ABATEMENT AS AUTHORIZED BY CHAPTER 312 OF THE TEXAS TAX CODE; ESTABLISHING THE BOUNDARIES THEREOF AND OTHER MATTERS RELATING THERETO; DECLARING FINDINGS OF FACT; AND PROVIDING A SAVINGS AND SEVERABILITY CLAUSE

WHEREAS, the City Council of the City of Midland, Texas (the "City"), desires to promote the development or redevelopment of a certain contiguous geographic area within its jurisdiction by the creation of a reinvestment zone for commercial and industrial tax abatement as authorized by Chapter 312 of the Texas Tax Code; and

WHEREAS, by Resolution No. 2001-129, dated April 24, 2001, the City Council of the City of Midland stated its intention to consider granting tax abatement within the City; and

WHEREAS, by Resolution No. 2022-162, dated November 15, 2022, the City Council of the City of Midland adopted Guidelines and Criteria governing tax abatement reinvestment zones and agreements within the City; and

WHEREAS, at the City Council meeting scheduled for 10:00 a.m. on July 11, 2023, the City Council of the City of Midland held a public hearing regarding the designation of Lots 22, 23 and 24, Block 65, Original Town Addition, City and County of Midland, Texas (the "Area") as a reinvestment zone for tax abatement purposes as authorized by the Texas Tax Code; and

WHEREAS, not later than the seventh day before the date of the public hearing, notice of the public hearing was published in a newspaper having general circulation in the municipality and delivered in writing to the presiding officer of the governing body of each taxing unit that includes in its boundaries real property that is to be included in the proposed

reinvestment zone; and

WHEREAS, the City Council at such public hearing invited interested persons to speak and present evidence for or against said designation; and

WHEREAS, all interested persons were provided an opportunity to present comments on said designation;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF MIDLAND, TEXAS:

SECTION ONE. That the facts and recitations contained in the preamble of this ordinance are hereby found and declared to be true and correct.

SECTION TWO. That the City Council, after conducting such public hearing and having heard such evidence and testimony, has made the following findings and determinations based on the testimony presented to it:

A. That a public hearing on the designation of the Area as a reinvestment zone was properly held and conducted and that notice of such public hearing was published and delivered in writing to the presiding officer of the governing body of each taxing unit that includes in its boundaries real property that is to be included in the reinvestment zone as required by law;

B. That the boundaries of the reinvestment zone shall be the boundaries of the Area;

C. That the improvements sought are feasible and practical and would be a benefit to the land to be included in the reinvestment zone and to the City after the expiration of an agreement entered into under Section 312.204 of the Texas Tax Code;

D. That the Area meets the criteria for designation as a reinvestment zone as set forth in Section 312.202 of the Texas Tax Code in that it is reasonably likely as a result of the designation to contribute to the retention or expansion of primary employment or to attract major investment in the zone that would be a benefit to the property and that would contribute to the economic development of the City; and

E. That the Area meets the criteria for the designation of a reinvestment zone as set forth in the City of Midland's Guidelines and Criteria governing tax abatement reinvestment zones and agreements within the City.

SECTION THREE. That pursuant to Section 312.201 of the Texas Tax Code, the City hereby designates the Area as a reinvestment zone for commercial and industrial tax abatement, and such reinvestment zone shall hereafter be officially designated as Tax

Abatement Reinvestment Zone Number 2023-02, City of Midland, Midland County, Texas.

SECTION FOUR. That said designation of the Area as Tax Abatement Reinvestment Zone Number 2023-02 shall take effect immediately upon the final adoption of this ordinance.

SECTION FIVE. That in order for a commercial-industrial project to be considered for an agreement for tax abatement, the project shall:

A. Be located wholly within Tax Abatement Reinvestment Zone Number 2023-02 as established herein;

B. Not include property that is owned or leased by a member of the City Council of the City of Midland; and

C. Conform to the requirements of the Guidelines and Criteria governing tax abatement reinvestment zones and agreements within the City, and all other applicable laws and regulations.

SECTION SIX. That written agreements for tax abatement as provided for by Section 312.205 of the Texas Tax Code shall:

A. List the kind, number, and location of all proposed improvements of the property;

B. Provide access to and authorize inspection of the property by municipal employees to ensure that the improvements or repairs are made according to the specifications and conditions of the agreement;

C. Limit the uses of the property consistent with the general purpose of encouraging development or redevelopment of the zone during the period that property tax exemptions are in effect;

D. Provide for recapturing property tax revenue lost as a result of the agreement if the owner of the property fails to make the improvements, repairs, or provide employment as provided by the agreement;

E. Contain each term agreed to by the owner of the property;

F. Require the owner of the property to certify annually to the governing body of each taxing unit that the owner is in compliance with each applicable term of the agreement; and

G. Provide that the governing body of the municipality may cancel or modify the agreement if the property owner fails to comply with the agreement.

SECTION SEVEN. If any section, subsection, sentence, clause or phrase of this ordinance is, for any reason, held to be unconstitutional or invalid, such holding shall not

affect the validity of the remaining portions of this ordinance. The Council of the City of Midland hereby declares that it would have passed this ordinance and each section, subsection, sentence, clause, or phrase hereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, or phrases be declared unconstitutional or invalid.

SECTION EIGHT. The designation of Tax Abatement Reinvestment Zone Number 2023-02 shall expire five years from the effective date of this ordinance. The designation of a tax abatement reinvestment zone may be renewed for periods not exceeding five years. The expiration of a reinvestment zone designation does not affect an existing tax abatement agreement authorized by the City Council of the City of Midland, Texas.

The above and foregoing ordinance was duly proposed, read in full and adopted on first reading, the _____ day of _____, A.D., 2023; and passed to second reading on motion of Council member _____, seconded by Council member _____, by the following vote:

City Council Meeting

Item Number: 18

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Alexandra Walling, Senior Planner

Subject: AN ORDINANCE EXTENDING THE BOUNDARIES OF THE CITY OF MIDLAND, TEXAS, BY ADDING THERETO A CERTAIN AREA ADJOINING THE PRESENT CITY LIMITS, BEING A 17.345-ACRE TRACT OF LAND OUT OF SECTION 35, BLOCK 40, T-1-S, T&P RR CO. SURVEY, MIDLAND COUNTY, TEXAS (GENERALLY LOCATED ON THE NORTH SIDE OF HIGHWAY 191, APPROXIMATELY 700 FEET WEST OF HIGHWAY 158); ORDERING PUBLICATION; AND ORDERING RECORDATION BY THE CITY SECRETARY (EXTRATERRITORIAL JURISDICTION) (DEVELOPMENT SERVICES)

Purpose:

The applicant, Charles Hodges, is requesting an Annexation of a 17.345-acre tract of land out of Section 35, Block 40, T-1-S, T&P RR. Co Survey, Midland County, Texas, located north of State Highway 191, approximately 700-feet west of State Highway 158. An associated Initial Zoning is also in review to zone the land to RR, Regional Retail District.

Recommended City Council Action:

Approve

Fiscal Impact:

Additional land to be developed under City regulations in an expanded growth area.

Discussion:

The applicant, Charles Hodges is requesting to annex a 17.345-acre tract of land out of Section 35, Block 40, T-1-S, T&P RR. Co Survey, Midland County, Texas. The proposed

annexation will allow the provision of City services to the property. This is considered a voluntary annexation.

On May 10, 2023, the service agreement between the City and the petitioner was executed. This is the next step in the annexation process.

This project has been circulated to all respective departments for internal review and received no objections.

Engineering: (Approved)

No objection.

Transportation: (Approved)

No objections.

Fire: (Approved)

All future development shall meet the requirements of IFC 2015 ed. and local ordinances.

Building Code: (Approved)

No objection.

Oil and Gas: (Approved)

No Oil and Gas Issues. Informational: No Oil or Gas wells identified within 500 ft. permitted well radius or in the 135 ft. non-permitted well radius of location on plat. Please note if oil & gas wells are not identified or left off plat, this could prevent receiving city permits for structures. Any plugged and abandoned (P&A) well would need to be identified. No construction is allowed on top of P&A wells.

GIS: (Approved)

Portion of annexation along HWY 158 does not connect to city limits.

Planning:

The Future Land Use Map in the Tall City Tomorrow Comprehensive Plan calls for Urban-Medium (U-M) and Urban-High (U-H) utilization in this area which represents commercial land uses, single-family dwellings, and high connectivity with good access to highways, freeways, and arterial roads.

As this proposed development will conform with the Tall City Tomorrow Comprehensive Plan,

staff recommends approval of this annexation.

Letters of Objection:

As of June 14, 2023, staff has received no letters of objection to this request.

July 12, 2022

City Council Meeting

Item Number: 19

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Alexandra Walling, Senior Planner

Subject: AN ORDINANCE ESTABLISHING THE INITIAL ZONING CLASSIFIATION OF THE AREA INDICATED AS BEING A 17.345-ACRE TRACT OF LAND OUT OF SECTION 35, BLOCK 40, T-1-S, T&P RR CO. SURVEY, MIDLAND COUNTY, TEXAS, AS AN RR, REGIONAL RETAIL DISTRICT; SAID TRACT BEING GENERALLY LOCATED ON THE NORTH SIDE OF STATE HIGHWAY 191, APPROXIMATELY 700 FEET WEST OF STATE HIGHWAY 158; CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OR FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION (DISTRICT: NONE) (DEVELOPMENT SERVICES)

Purpose:

The applicant, Charles Hodges, is requesting the initial zoning of RR, Regional Retail of a 17.345-acre tract of land out of Section 35, Block 40, T-1-S, T&P RR Co. Survey, Midland County, Texas. An associated annexation is also in review.

The Planning and Zoning Commission reviewed this request on June 20, 2023, and recommended approval.

Recommended City Council Action:

Approve

Fiscal Impact:

Additional land to be developed under City regulations in an expanded growth area.

Discussion:

The applicant, Charles Hodges, is requesting an initial zoning of the annexed land to RR, Regional Retail District.

The site is currently in the process of being annexed into City Limits as well as in the process of being platted.

This project has been circulated to all respective departments for internal review and received no objections.

Engineering: (Approved)

No objections to zoning/zone change. [For Applicant's Information Only.]

Transportation: (Approved)

Site drainage, utilities, driveway access, and traffic circulation may be adjusted during construction drawing review as necessary to receive building permit approval from Engineering and Traffic Operations. [For the Applicant's information only.]

No objection to zone change. [For the Applicant's information only.]

Fire: (Approved)

No objection.

Code Administration: (Approved)

No Objection.

Oil and Gas: (Approved)

No Oil and Gas Issues. Informational: No Oil or Gas wells identified within 500 ft. permitted well radius or in the 135 ft. non-permitted well radius of location on plat. Please note if oil & gas wells are not identified or left off plat, this could prevent receiving city permits for structures. Any plugged and abandoned (P&A) well would need to be identified. No construction is allowed on top of P&A wells.

GIS: (Approved)

No comment.

Planning:

The Future Land Use Map in the Tall City Tomorrow Comprehensive Plan calls for Urban-Medium (U-M) and Urban-High (U-H) utilization in this area which represents commercial land uses, single-family dwellings, and high connectivity with good access to highways, freeways, and arterial roads.

As this proposed initial zoning conforms to the Tall City Tomorrow Comprehensive Plan, staff recommends approval of this initial zoning of RR, Regional Retail District subject to condition A.

Condition(s):

A. That the use and development of this property shall conform to the regulations of the RR, Regional Retail District.

Letters of Objection:

As of June 28, 2023, staff has received no letters of objection to this request.

ORDINANCE NO. _____

AN ORDINANCE ESTABLISHING THE INITIAL ZONING CLASSIFICATION OF THE AREA INDICATED AS BEING A 17.345-ACRE TRACT OF LAND OUT OF SECTION 35, BLOCK 40, T-1-S, T&P RR CO. SURVEY, MIDLAND COUNTY, TEXAS, AS AN RR, REGIONAL RETAIL DISTRICT; SAID TRACT BEING GENERALLY LOCATED ON THE NORTH SIDE OF HIGHWAY 191, APPROXIMATELY 700 FEET WEST OF HIGHWAY 158; CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OR FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION

WHEREAS, notice has been given to all parties in interest and citizens by publication in the official newspaper and otherwise of a public hearing to be held before the City Council on July 11, 2023 (the "Hearing Date"), to consider an amendment to the Zoning District Map of the City of Midland, Texas, so as to establish the initial zoning classification of the property described in Section One hereof as an RR, Regional Retail District, as set out in Title XI, Chapter 1 of the City Code of Midland, Texas; and

WHEREAS, such a public hearing was held in the Council Chambers on the Hearing Date, as advertised; and

WHEREAS, after a full hearing, at which all parties in interest and citizens were given an opportunity to be heard; and after considering among other things, the character of the property involved and the surrounding area and its peculiar suitability for particular uses; and with a view to conserving the value of buildings and encouraging the most appropriate use of land throughout such municipality, the Council finds it to be in the best interest of the health, safety, morals and general welfare of the City of Midland to amend the Zoning District Map accordingly;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF MIDLAND, TEXAS:

SECTION ONE. That the initial zoning classification of the area indicated on Exhibit "A", attached hereto and incorporated herein by reference, is hereby established as

a RR, Regional Retail District, and the Zoning District Map of the City of Midland, Texas, is hereby amended to reflect the establishment of this initial zoning classification.

SECTION TWO. The provisions of this ordinance are to be cumulative of all other ordinances or parts of ordinances governing or regulating the same subject matter as that covered herein; provided, however, that all prior ordinances or parts of ordinances inconsistent with or in conflict with any of the provisions of this ordinance are hereby expressly repealed to the extent of any such inconsistency or conflict.

SECTION THREE. If any section, subsection, sentence, clause or phrase of this ordinance is, for any reason, held to be unconstitutional or invalid, such holding shall not affect the validity of the remaining portions of this ordinance. The Council of the City of Midland hereby declares that it would have passed this ordinance and each section, subsection, sentence, clause, or phrase hereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, or phrases be declared unconstitutional or invalid.

SECTION FOUR. The penalty for violation of this ordinance shall be in accordance with the general penalty provisions contained in Section 1-3-1 of the City Code of Midland, Texas, which provides for a fine not exceeding two thousand dollars ($2,000.00).

SECTION FIVE. The City Secretary is hereby authorized and directed to publish the descriptive caption of this ordinance in the manner and for the length of time prescribed by the law as an alternative method of publication.

The above and foregoing ordinance was duly proposed, read in full and adopted on first reading, the ___day of _____, A.D., 2023; and passed to second reading on motion of Council member _____, seconded by Council member _____, by the following vote:

Council members voting "AYE":

Council members voting "NAY":

The above and foregoing ordinance was read in full and finally adopted by the following vote upon motion of Council member _____, seconded by Council member _____, on the ___ day of _____, A.D., 2023, at a regular meeting of the City Council:

Council members voting "AYE":

Council members voting "NAY":

PASSED AND APPROVED THIS _____ day of _____, A.D., 2023.

ALTA/NSPS SURVEY

OF A 17.345-ACRE TRACT OF LAND, SITUATED IN SECTION 35, BLOCK 40, TOWNSHIP 1 SOUTH, TEXAS and PACIFIC RAILWAY COMPANY SURVEY, MIDLAND COUNTY, TEXAS

City Council Meeting

Item Number: 20

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Alexandra Walling, Senior Planner

Subject: AN ORDINANCE AMENDING THE ZONING DISTRICT MAP OF THE CITY OF MIDLAND TO GRANT A SPECIFIC USE DESIGNATION WITH TERM FOR A 3,400-SQUARE FOOT PORTION OF LOT 12, BLOCK 38, ORIGINAL TOWN, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED ON THE EAST SIDE OF NORTH MAIN STREET, APPROXIMATELY 25 FEET SOUTH OF EAST ILLINOIS AVENUE), WHICH IS PRESENTLY ZONED CB, CENTRAL BUSINESS DISTRICT, ALLOWING SAID PROPERTY TO BE USED FOR THE SALE OF ALL ALCOHOLIC BEVERAGES IN A BAR FOR ON-PREMISES CONSUMPTION; MAKING SAID DESIGNATION SUBJECT TO CERTAIN CONDITIONS AND RESTRICTIONS CONTAINED HEREIN; CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OR FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION (DISTRICT 2) (DEVELOPMENT SERVICES)

Purpose:

The applicant, Lori Michele Kettle, is requesting a Specific Use Designation (SUD) with Term for Alcoholic Beverages Sales for On-Premises Consumption in a Bar.

Recommended City Council Action:

Approve

Fiscal Impact:

This proposal does not have a significant financial impact to the City.

Current Zoning:

CB, Central Business District.

Surrounding Zoning and Land Use:

The properties to the north, east, south, and west are all zoned CB, Central Business District. A church is located to the north, a parking lot is located to the east, a business office is located to the south, and retail stores to the west of the property.

Analysis:

The property is zoned CB, Central Business District which allows for Alcoholic Beverages Sales for On-Premises Consumption in a Bar with the approval of an SUD. The total bar area is 3,400-square feet and the proposed alcohol serviceable area is 1,835-square feet. The property has an existing SUD for Alcoholic Beverage Sales for On-Premises Consumption for the same bar, Buffalo Nickel (Ordinance No. 9910). The applicant is requesting this SUD to expand the hours of operation from the current Monday through Saturday from 3:00 p.m. to 11:00 p.m., and Sunday from 12:00 p.m. to 12:00 a.m. to the hours below:

Monday through Sunday from 12 p.m. to 2 a.m.

Per Midland City Code 5.4.4. –Prohibited place of business

The sale of any alcoholic beverage is hereby prohibited by any person, where the place of business of any such dealer is within 300 feet of any church, public school, public school ground, athletic stadium used by any public school or public hospital, the measurements to be along the property lines of the street fronts and from front door to front door and in a direct line across intersections where they occur.

There are no churches, private schools, public schools, public school grounds, athletic stadium, public hospital within 300 feet measurement along the property lines of the street fronts, and from the front door in a direct line across intersection where they occur within this site.

This project has been circulated to all City departments for review. Below are the department comments.

Fire: (Approved)

No objections.

Engineering: (Approved)

No objections. [For Applicant's Information Only.]

Transportation: (Approved)

No objections. [For the Applicant's information only.]

Building Code: (Approved)

The SUD is approved based on the current occupant load pending that no changes to the occupancy, seating count, physical structure, and/or the floor layout has taken place when compared to previously approved SUDs. Occupancy loads must be posted in accordance with section 1004.3 of the 2015 International Fire Code.

Planning:

The request follows the *Tall City Tomorrow Comprehensive Plan, Chapter 6-Character Plan Goal 4,* "Encourage the development of places where Midland residents can gather and socialize to build connections." (Tall City Tomorrow page 137). The existing Buffalo Nickel is a destination where Midland residents gather and socialize.

This request meets all requirements; therefore, staff recommends approval of the request of the Specific Use Designation with Term for the sale of all alcoholic beverages, for on-premises consumption, in a bar, subject to Condition A through E.

Conditions:

A. **That the serviceable area of the Establishment shall be limited to approximately 1,835-square feet as shown in Exhibit "A", which is attached hereto and incorporated herein for all purposes.**

B. **That the sale and on-premises consumption of alcoholic beverages shall conform to all applicable state and local laws.**

C. **That the occupancy of the Establishment shall not exceed the maximum occupancy determined by the Building Code and Fire Code.**

D. **That the days and hours of alcoholic beverage sales and consumption shall be limited to Monday through Sunday from 12:00 p.m. (noon) to 2:00 a.m. of the following day.**

E. **That the Establishment shall meet the requirements of the Fire Department and the Code Administration Division.**

Letters of Objection:

As of June 28, 2023, staff has not received any letters of objection.

Attachments:

City Manager's Office

ORDINANCE NO. _____

AN ORDINANCE AMENDING THE ZONING DISTRICT MAP OF THE CITY OF MIDLAND TO GRANT A SPECIFIC USE DESIGNATION WITH TERM FOR A 3,400-SQUARE FOOT PORTION OF LOT 12, BLOCK 38, ORIGINAL TOWN, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED ON THE EAST SIDE OF NORTH MAIN STREET, APPROXIMATELY 25 FEET SOUTH OF EAST ILLINOIS AVENUE), WHICH IS PRESENTLY ZONED CB, CENTRAL BUSINESS DISTRICT, ALLOWING SAID PROPERTY TO BE USED FOR THE SALE OF ALL ALCOHOLIC BEVERAGES IN A BAR FOR ON-PREMISES CONSUMPTION; MAKING SAID DESIGNATION SUBJECT TO CERTAIN CONDITIONS AND RESTRICTIONS CONTAINED HEREIN; CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OF FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION

WHEREAS, the City Planning and Zoning Commission and the Governing Body of the City of Midland, Texas, in compliance with the City Charter, the City Code, and State law, have given the requisite notices by United States mail, publication and otherwise; and

after holding due hearings affording a full and fair hearing to all of the property owners generally, and particularly to those interested persons situated in the affected area and in the vicinity thereof, the Governing Body of the City of Midland finds that the public convenience and welfare will be best served by granting the Specific Use Designation With Term for the sale of alcoholic beverages as set forth herein; and

WHEREAS, the Property shall be subject to the following conditions (together, the "Property"), as set out hereinafter, with respect to the present CB, Central Business District.

restrictions:

A. That the serviceable area of the Establishment shall be limited to approximately 1,835 square feet as shown in Exhibit "A" which is attached hereto and incorporated herein for all purposes.

B. That the sale and on-premises consumption of alcoholic beverages shall conform to all applicable state and local laws.

C. That the days and hours of alcoholic beverage sales and consumption shall be limited to Monday through Sunday from 12:00 p.m. (noon) to 2:00 a.m. of the following day.

D. That the maximum occupancy determined by the Building Code and Fire Code.

E. That the Establishment shall meet the requirements of the Fire Department and the Code Administration Division.

SECTION FOUR. If any section, subsection, sentence, clause or phrase of this ordinance is, for any reason, held to be unconstitutional or invalid, such holding shall not affect the validity of the remaining portions of this ordinance. The Council of the City of Midland hereby declares that it would have passed this ordinance and each section, subsection, sentence, clause, or phrase hereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, or phrases be declared unconstitutional or invalid.

SECTION THREE. The provisions of this ordinance are to be cumulative of all other ordinances or parts of ordinances governing or regulating the same subject matter as that covered herein; provided, however, that all prior ordinances or parts of ordinances, inconsistent with or in conflict with any of the provisions of this ordinance, are hereby expressly repealed to the extent of any such inconsistency or conflict.

SECTION FIVE. The penalty for violation of this ordinance shall be in accordance with the general penalty provisions contained in Section 1-3-1 of the City Code of Midland, Texas, which provides for a fine not exceeding two thousand dollars ($2,000.00).

SECTION SIX. The City Secretary is hereby authorized and directed to publish the law as an alternative method of publication. descriptive caption of this ordinance in the manner and for the length of time prescribed by

From: Alexandra Walling, Senior Planner

Subject: AN ORDINANCE AMENDING THE ZONING DISTRICT MAP OF THE CITY OF MIDLAND TO GRANT A SPECIFIC USE DESIGNATION WITH TERM FOR A 1,595-SQUARE FOOT PORTION OF LOT 24, BLOCK 53, ORIGINAL TOWN, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED AT THE SOUTHEAST CORNER OF THE INTERSECTION OF NORTH MAIN STREET AND EAST TEXAS AVENUE), WHICH IS PRESENTLY ZONED CB, CENTRAL BUSINESS DISTRICT, ALLOWING SAID PROPERTY TO BE USED FOR THE SALE OF ALL ALCOHOLIC BEVERAGES IN A BAR FOR ON-PREMISES CONSUMPTION; MAKING SAID DESIGNATION SUBJECT TO CERTAIN CONDITIONS AND RESTRICTIONS CONTAINED HEREIN; CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OR FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION (DISTRICT 2) (DEVELOPMENT SERVICES)

Purpose:

The applicant, Ariel Windsor, is requesting a Specific Use Designation with Term (SUD) for the sale of Alcoholic Beverages Sales, for On-Premises Consumption in a Bar.

Recommended City Council Action:

Approve

Fiscal Impact:

This proposal does not have a significant financial impact to the City.

Current Zoning:

CB, Central Business District.

Surrounding Zoning and Land Use:

The properties to the north are zoned CB, Central Business District and the location of businesses. The properties to the east and south are zoned PD, Planned Development District and the location of apartments. The properties to the west are zoned CB, Central Business District, and the location of businesses.

Discussion:

The property is zoned CB, Central Business District which allows for Alcoholic Beverages Sales for On-Premises Consumption with the approval of an SUD. The total bar area is 1,595-square feet with an alcohol serviceable area of 885.5-square feet. The property has an existing SUD for Alcoholic Beverages Sales for On-Premises Consumption in a bar (Ordinance No. 8953). The applicant is requesting an amendment to the current SUD to change their hours from 12:00 p.m. to 1:30 a.m., Monday through Sunday, to the new hours as specified below:

Monday through Sunday from 11 a.m. to 2 a.m. (the next day)

Per Midland City Code 5-4-4, Prohibited place of business

The sale of any alcoholic beverage is hereby prohibited by any person, where the place of business of any such dealer is within 300 feet of any church, public school, public school ground, athletic stadium used by any public school or public hospital, the measurements to be along the property lines of the street fronts and from front door to front door and in a direct line across intersections where they occur.

There are no churches, private schools, public schools, public school grounds, athletic stadium, or public hospital within 300 feet measurement along the property lines of the street fronts, and from the front door in a direct line across intersection where they occur within this site.

This project has been circulated to all City departments for review. Below are the department comments.

Fire: (Approved)

No comments or objections.

Engineering: (Approved)

No objections. [For Applicant's Information Only.]

Transportation: (Approved)

No objections. [For the Applicant's information only.]

Building Code: (Approved)

The SUD for Bourbon Street is acceptable. The property must adhere to the maximum occupant load of 59 for the alcohol serviceable area. Occupancy loads must be posted in accordance with section 1004.3 of the 2015 International Fire Code.

Planning:

The request follows the Tall City Tomorrow Comprehensive Plan, Chapter 6-Character Plan Goal 4, "Encourage the development of places where Midland residents can gather and socialize to build connections." (Tall City Tomorrow page 137). The new bar, Bourbon Street, is intended to be a destination where Midland residents can gather and socialize.

This request meets all requirements; therefore, staff recommends approval of the request of the Specific Use Designation with Term for the sale of all alcoholic beverages, for on-premises consumption, in a bar, subject to Condition A through E.

Conditions:

A. **That the serviceable area of the Establishment shall be limited to approximately 885.5-square feet as shown in Exhibit A, which is attached hereto and incorporated herein for all purposes.**

B. **That the sale and on-premises consumption of alcoholic beverages shall conform to all applicable state and local laws.**

C. **That the days and hours of alcoholic beverage sales and consumption shall be limited to: Monday through Sunday from 11:00 a.m. to 2:00 a.m. of the following day.**

D. **That the occupancy of the Establishment shall not exceed the maximum occupancy determined by the Building Code and Fire Code.**

E. **That the Establishment shall meet the requirements of the Fire Department and the Code Administration Division.**

Letters of Objection:

As of June 14, 2023, staff has not received any letters of objection.

ORDINANCE NO. _____

AN ORDINANCE AMENDING THE ZONING DISTRICT MAP OF THE CITY OF MIDLAND TO GRANT A SPECIFIC USE DESIGNATION WITH TERM FOR A 1,595-SQUARE FOOT PORTION OF LOT 24, BLOCK 53, ORIGINAL TOWN, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED AT THE SOUTHEAST CORNER OF THE INTERSECTION OF NORTH MAIN STREET AND EAST TEXAS AVENUE), WHICH IS PRESENTLY ZONED CB, CENTRAL BUSINESS DISTRICT, ALLOWING SAID PROPERTY TO BE USED FOR THE SALE OF ALL ALCOHOLIC BEVERAGES IN A BAR FOR ON-PREMISES CONSUMPTION; MAKING SAID DESIGNATION SUBJECT TO CERTAIN CONDITIONS AND RESTRICTIONS CONTAINED HEREIN; CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OR FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION

WHEREAS, the City Planning and Zoning Commission and the Governing Body of the City of Midland, Texas, in compliance with the City Charter, the City Code, and State law, have given the requisite notices by United States mail, publication and otherwise; and after holding due hearings affording a full and fair hearing to all of the property owners generally, and particularly to those interested persons situated in the affected area and in the vicinity thereof, the Governing Body of the City of Midland finds that the public convenience will be best served by granting a Specific Use Designation With Term for a 1,595-square foot portion of Lot 24, Block 53, Original Town, City and County of Midland, Texas (the "Property"), as set out hereinafter;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF MIDLAND, TEXAS:

SECTION ONE. That the Zoning District Map of the City of Midland, Texas, is hereby amended to grant the Property a Specific Use Designation With Term for the sale of all alcoholic beverages in a bar (the "Establishment") for on-premises consumption, together with the uses permitted in the present CB, Central Business District.

SECTION TWO. That the Property shall be subject to the following conditions and

restrictions:

A. That the serviceable area of the Establishment shall be limited to approximately 885.5 square feet as shown in Exhibit "A", which is attached hereto and incorporated herein for all purposes.

B. That the sale and on-premises consumption of alcoholic beverages shall conform to all applicable state and local laws.

C. That the days and hours of alcoholic beverage sales and consumption shall be limited to Monday through Sunday from 11:00 a.m. to 2:00 a.m. of the following day.

D. That the occupancy of the Establishment shall not exceed the maximum occupancy determined by the Building Code and Fire Code.

E. That the Establishment shall meet the requirements of the Fire Department and the Code Administration Division.

SECTION THREE. The provisions of this ordinance are to be cumulative of all other ordinances or parts of ordinances governing or regulating the same subject matter as that covered herein; provided, however, that all prior ordinances or parts of ordinances, inconsistent with or in conflict with any of the provisions of this ordinance are hereby expressly repealed to the extent of any such inconsistency or conflict.

SECTION FOUR. If any section, subsection, sentence, clause or phrase of this ordinance is, for any reason, held to be unconstitutional or invalid, such holding shall not affect the validity of the remaining portions of this ordinance. The Council of the City of Midland hereby declares that it would have passed this ordinance and each section, subsection, sentence, clause, or phrase hereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, or phrases be declared unconstitutional or invalid.

SECTION FIVE. The penalty for violation of this ordinance shall be in accordance with the general penalty provisions contained in Section 1-3-1 of the City Code of Midland, Texas, which provides for a fine not exceeding two thousand dollars ($2,000.00).

SECTION SIX. The City Secretary is hereby authorized and directed to publish the descriptive caption of this ordinance in the manner and for the length of time prescribed by the law as an alternative method of publication.

The above and foregoing ordinance was duly proposed, read in full and adopted on first reading, the _____ day of _____, A.D., 2023; and passed to second reading on motion of Council member _____, seconded by Council member _____, by the following vote:

Council members voting "AYE":

CASE NO. S-11-016

City Council Meeting

Item Number: 22

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Jeffrey Fisher, Planning Manager

Subject: AN ORDINANCE AMENDING THE ZONING DISTRICT MAP OF THE CITY OF MIDLAND TO GRANT A SPECIFIC USE DESIGNATION WITH TERM FOR LOTS 1 AND 2, BLOCK 182, SOUTHERN ADDITION, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED AT THE SOUTHWEST CORNER OF THE INTERSECTION OF SOUTH BIG SPRING STREET AND WEST FLORIDA AVENUE), WHICH IS PRESENTLY ZONED RR, REGIONAL RETAIL DISTRICT, ALLOWING SAID PROPERTY TO BE USED FOR THE SALE OF ALL ALCOHOLIC BEVERAGES IN A RESTAURANT FOR ON-PREMISES CONSUMPTION; MAKING SAID DESIGNATION SUBJECT TO CERTAIN CONDITIONS AND RESTRICTIONS CONTAINED HEREIN; CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OR FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION (DISTRICT 2) (DEVELOPMENT SERVICES)

Purpose:

The applicant, Leovardo Leon, is requesting a Special Use Designation (SUD) for the sale of Alcoholic Beverages for On-Premises Consumption in a restaurant.

Recommended City Council Action:

Approve

Fiscal Impact:

This proposal does not have a significant financial impact to the City.

Current Zoning:

RR, Regional Retail District.

Surrounding Zoning and Land Use:

The property to the north is zoned RR, Regional Retail District, and the location of a gas station. The properties to the east are zoned RR, Regional Retail District, and the location of a restaurant and automotive dealership. The property to the south is zoned RR, Regional Retail District and the location of retail uses. The property to the west is zoned C, Commercial, and the location of retail uses.

Analysis:

The subject property is zoned RR, Regional Retail District, which allows Alcoholic Beverages Sales for On-Premises Consumption in a Restaurant with the approval of a Specific Use Designation. The total restaurant area is 2,790-square feet with an alcohol serviceable area of 987-square feet.

The applicant is requesting the following days and hours for Alcoholic Beverages Sales for On-Premises Consumption as specified below:

> **Monday through Sunday from 10:30 a.m. to 12:00 a.m. (midnight)**

Per Midland City Code Section 5.4.4. – Prohibited place of business

> *The sale of any alcoholic beverage is hereby prohibited by any person, where the place of business of any such dealer is within 300 feet of any church, public school, public school ground, athletic stadium used by any public school or public hospital, the measurements to be along the property lines of the street fronts and from front door to front door and in a direct line across intersections where they occur.*

There are no churches, private schools, public schools, public school grounds, athletic stadiums, or public hospitals within 300 feet measurement along the property lines of the street fronts, and from the front door in a direct line across the intersection where they occur within this site.

Adequate parking has been provided on the site.

This project has been circulated to all City departments for review. Below are the departments' comments.

Fire: (Approved)

No objections.

Engineering: (Approved)

No objections. [For Applicant's Information Only.]

Transportation: (Approved)

No objections. [For the Applicant's information only.]

Building Code: (Approved)

The SUD for Tacos Wey is acceptable. The property must adhere to the maximum occupant load of 65 for the alcohol serviceable area. Occupancy loads must be posted in accordance with section 1004.3 of the 2015 International Fire Code.

Code Compliance: (Approved)

No objections. [For the Applicant's information only.]

Planning: (Approved)

The request is in compliance with *Tall City Tomorrow Plan, Chapter 6-Character Plan Goal 4,* "Encourage the development of places where Midland residents can gather and socialize to build connections." (Tall City Tomorrow page 137). The approval this Specific Use Designation will provide a place to gather and socialize to build connections.

Staff recommends approval of the request for a Specific Use Designation with Term for Alcoholic Beverages Sales for On-Premises Consumption in a Restaurant, subject to Conditions A through E.

Conditions:

A. **That the serviceable area of the Establishment shall be limited to approximately 987-square feet as shown in "Exhibit "A", which is attached hereto and incorporated herein for all purposes.**

B. **That the sale and on-premises consumption of alcoholic beverages shall conform to applicable state and local laws.**

C. **That the days and hours of alcoholic beverages sales and consumption shall be limited to Monday through Sunday from 10:30 a.m. to 12:00 a.m. (midnight).**

D. **That the occupancy of the Establishment shall not exceed the maximum occupancy determined by the Building Code and Fire Code.**

E. **That the establishment shall meet all requirements of the Fire Department and Code Administration.**

Letters of Objection:

As of June 28, 2023, staff have received no letters of objection for this request.

ORDINANCE NO. _____

AN ORDINANCE AMENDING THE ZONING DISTRICT MAP OF THE CITY OF MIDLAND TO GRANT A SPECIFIC USE DESIGNATION WITH TERM FOR LOTS 1 AND 2, BLOCK 182, SOUTHERN ADDITION, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED AT THE SOUTHWEST CORNER OF THE INTERSECTION OF SOUTH BIG SPRING STREET AND WEST FLORIDA AVENUE), WHICH IS PRESENTLY ZONED RR, REGIONAL RETAIL DISTRICT, ALLOWING SAID PROPERTY TO BE USED FOR THE SALE OF ALL ALCOHOLIC BEVERAGES IN A RESTAURANT FOR ON-PREMISES CONSUMPTION; MAKING SAID DESIGNATION SUBJECT TO CERTAIN CONDITIONS AND RESTRICTIONS CONTAINED HEREIN; CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OR FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION

WHEREAS, the City Planning and Zoning Commission and the Governing Body of the City of Midland, Texas, in compliance with the City Charter, the City Code, and State law, have given the requisite notices by United States mail, publication and otherwise; and after holding due hearings affording a full and fair hearing to all of the property owners generally, and particularly to those interested persons situated in the affected area and in the vicinity thereof, the Governing Body of the City of Midland finds that the public convenience will be best served by granting a Specific Use Designation With Term for Lots 1 and 2, Block 182, Southern Addition, City and County of Midland, Texas (the "Property"), as set out hereinafter;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF MIDLAND, TEXAS:

SECTION ONE. That the Zoning District Map of the City of Midland, Texas, is hereby amended to grant the Property a Specific Use Designation With Term for the sale of all alcoholic beverages in a restaurant (the "Establishment") for on-premises consumption, together with the uses permitted in the present RR, Regional Retail District.

SECTION TWO. That the Property shall be subject to the following conditions and

restrictions:

A. That the serviceable area of the Establishment shall be limited to approximately 987 square feet as shown in Exhibit "A", which is attached hereto and incorporated herein for all purposes.

B. That the sale and on-premises consumption of alcoholic beverages shall conform to all applicable state and local laws.

C. That the days and hours of alcoholic beverage sales and consumption shall be limited to Monday through Sunday from 10:30 a.m. to 12:00 a.m. (midnight).

D. That the occupancy of the Establishment shall not exceed the maximum occupancy determined by the Building Code and Fire Code.

E. That the Establishment shall meet the requirements of the Fire Department and the Code Administration Division.

SECTION THREE. The provisions of this ordinance are to be cumulative of all other ordinances or parts of ordinances governing or regulating the same subject matter as that covered herein; provided, however, that all prior ordinances or parts of ordinances, inconsistent with or in conflict with any of the provisions of this ordinance are hereby expressly repealed to the extent of any such inconsistency or conflict.

SECTION FOUR. If any section, subsection, sentence, clause or phrase of this ordinance is, for any reason, held to be unconstitutional or invalid, such holding shall not affect the validity of the remaining portions of this ordinance. The Council of the City of Midland hereby declares that it would have passed this ordinance and each section, subsection, sentence, clause, or phrase hereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, or phrases be declared unconstitutional or invalid.

SECTION FIVE. The penalty for violation of this ordinance shall be in accordance with the general penalty provisions contained in Section 1-3-1 of the City Code of Midland, Texas, which provides for a fine not exceeding two thousand dollars ($2,000.00).

SECTION SIX. The City Secretary is hereby authorized and directed to publish the descriptive caption of this ordinance in the manner and for the length of time prescribed by the law as an alternative method of publication.

The above and foregoing ordinance was duly proposed, read in full and adopted on first reading, the _____ day of _____, A.D., 2023; and passed to second reading on motion of Council member _____, seconded by Council member _____, by the following vote:

Council members voting "AYE":

PD, Planned Development District for a Shopping Center. (Ordinance No. 7771).

Surrounding Zoning and Land Use:

The properties to the north are zoned O-1, Office District, and PD, Planned District for a Housing Development (Ordinance No. 7449), and the location of a hotel and assisted living facility. The properties to the east are zoned SF-2, Single-Family Dwelling District, and PD, Planned District for a Shopping Center (Ordinance No. 8261), and the location of single-family houses and mini storage units. The property to the south is zoned SF-1, Single-Family Dwelling District, and the location of the Midland Airpark. The properties to the west are zoned PD, Planned District for a Shopping Center (Ordinance No. 7256) and LR, Local Retail District, and the location of retail stores and a hotel.

Analysis:

The property is zoned PD, Planned District for a Shopping Center. The original Ordinance 5864 approved the Shopping Center with a base zoning of LR-2, Local Retail District which is now RR, Regional Retail District in the current Zoning Ordinance. The RR zoning allows for Alcoholic Beverages Sales for On-Premises Consumption in a Restaurant with the approval of an SUD. The total area of the restaurant, Fuoco, is 6,529-square feet and the proposed alcohol serviceable area is 3,569.5-square feet.

The applicant is requesting the following days and hours for Alcoholic Beverages Sales for On-Premises Consumption as specified below:

Monday through Sunday from 11 a.m. to 2 a.m. (the next day)

Per Midland City Code, Section 5-4-4, Prohibited Places of Business:

The sale of any alcoholic beverage is hereby prohibited by any person, where the place of business of any such dealer is within 300 feet of any church, public-school, public-school ground, athletic stadium used by any public school or public hospital, the measurements to be along the property lines of the street fronts and from front door to front door and in a direct line across intersections where they occur.

There are no churches, private schools, public schools, public school grounds, athletic stadium, public hospital within 300 feet measurement along the property lines of the street fronts, and from the front door in a direct line across intersection where they occur within this site.

Adequate parking has been provided on site.

This project has been circulated to all City departments for review. Below are the department comments.

Fire: (Approved)

All future development shall meet the requirements of IFC 2015 ed. and local ordinances.

Engineering: (Approved)

No objection to zone change. [For the Applicant's information only.]

Site drainage, utilities, driveway access, and traffic circulation may be adjusted during construction drawing review as necessary to receive building permit approval from Engineering and Traffic Operations. [For the Applicant's information only.]

Transportation: (Approved)

Site drainage, utilities, driveway access, and traffic circulation may be adjusted during construction drawing review as necessary to receive building permit approval from Engineering and Traffic Operations. [For the Applicant's information only.]

No objection to zone change. [For the Applicant's information only.]

Building Code: (Approved)

The SUD is acceptable. The property must adhere to the maximum occupant load of 237 for the alcohol serviceable area. Occupancy loads must be posted in accordance with section 1004.3 of the 2015 International Fire Code.

Planning: (Approved with Conditions)

The request is in compliance with the *Tall City Tomorrow Comprehensive Plan, Chapter 6-Character Plan Goal 4, which is to* "Encourage the development of places where Midland residents can gather and socialize to build connections." (Tall City Tomorrow page 137). Fuoco is a destination where Midland residents will gather and socialize.

This request meets all requirements; therefore, staff recommends approval of the request of the Specific Use Designation with Term for the sale of all alcoholic beverages, for on-premises consumption, in a bar, subject to Condition A through E.

Conditions:

A. That the serviceable area of the Establishment shall be limited to approximately 3,569.5 square feet as shown in Exhibit "A" which is attached hereto and incorporated herein for all purposes.

B. That the sale and on-premises consumption of alcoholic beverages shall conform to applicable state and local laws.

C. **That the days and hours of alcoholic beverages sales and consumption shall be limited to Monday through Sunday from 11:00 a.m. to 2:00 a.m. of the following day.**

D. **That the occupancy of the Establishment shall not exceed the maximum occupancy determined by the Building Code and Fire Code.**

E. **That the Establishment shall meet all requirements of the Fire Department and Code Administration.**

Letters of Objection:

As of June 28, 2023, staff has not received any letters of objections.

ORDINANCE NO. _____

AN ORDINANCE AMENDING THE ZONING DISTRICT MAP OF THE CITY OF MIDLAND TO GRANT A SPECIFIC USE DESIGNATION WITH TERM FOR A 6,529-SQUARE FOOT PORTION OF LOT 1, BLOCK 8, POLO PARK, SECTION 3, CITY AND COUNTY OF MIDLAND, TEXAS (GENERALLY LOCATED AT THE NORTHEAST CORNER OF THE INTERSECTION OF NORTH GARFIELD STREET AND WEST LOOP 250 NORTH), WHICH IS PRESENTLY ZONED PD, PLANNED DEVELOPMENT DISTRICT FOR A SHOPPING CENTER, ALLOWING SAID PROPERTY TO BE USED FOR THE SALE OF ALL ALCOHOLIC BEVERAGES IN A RESTAURANT FOR ON-PREMISES CONSUMPTION; MAKING SAID DESIGNATION SUBJECT TO CERTAIN CONDITIONS AND RESTRICTIONS CONTAINED HEREIN; CONTAINING A CUMULATIVE CLAUSE; CONTAINING A SAVINGS AND SEVERABILITY CLAUSE; PROVIDING FOR A MAXIMUM PENALTY OR FINE OF TWO THOUSAND DOLLARS ($2,000.00); AND ORDERING PUBLICATION

WHEREAS, the City Planning and Zoning Commission and the Governing Body of the City of Midland, Texas, in compliance with the City Charter, the City Code, and State law, have given the requisite notices by United States mail, publication and otherwise; and after holding due hearings affording a full and fair hearing to all of the property owners generally, and particularly to those interested persons situated in the affected area and in the vicinity thereof, the Governing Body of the City of Midland finds that the public convenience will be best served by granting a Specific Use Designation With Term for a 6,529-square foot portion of Lot 1, Block 8, Polo Park, Section 3, City and County of Midland, Texas (the "Property"), as set out hereinafter;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF MIDLAND, TEXAS:

SECTION ONE. That the Zoning District Map of the City of Midland, Texas, is hereby amended to grant the Property a Specific Use Designation With Term for the sale of all alcoholic beverages in a restaurant (the "Establishment") for on-premises consumption, together with the uses permitted in the present PD, Planned Development District for a Shopping Center.

SECTION TWO. That the Property shall be subject to the following conditions and restrictions:

A. That the serviceable area of the Establishment shall be limited to approximately 3,569.5 square feet as shown in Exhibit "A", which is attached hereto and incorporated herein for all purposes.

B. That the sale and on-premises consumption of alcoholic beverages shall conform to all applicable state and local laws.

C. That the days and hours of alcoholic beverage sales and consumption shall be limited to Monday through Sunday from 11:00 a.m. to 2:00 a.m. of the following day.

D. That the occupancy of the Establishment shall not exceed the maximum occupancy determined by the Building Code and Fire Code.

E. That the Establishment shall meet the requirements of the Fire Department and the Code Administration Division.

SECTION THREE. The provisions of this ordinance are to be cumulative of all other ordinances or parts of ordinances governing or regulating the same subject matter as that covered herein; provided, however, that all prior ordinances or parts of ordinances, inconsistent with or in conflict with any of the provisions of this ordinance are hereby expressly repealed to the extent of any such inconsistency or conflict.

SECTION FOUR. If any section, subsection, sentence, clause or phrase of this ordinance is, for any reason, held to be unconstitutional or invalid, such holding shall not affect the validity of the remaining portions of this ordinance. The Council of the City of Midland hereby declares that it would have passed this ordinance and each section, subsection, sentence, clause, or phrase hereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, or phrases be declared unconstitutional or invalid.

SECTION FIVE. The penalty for violation of this ordinance shall be in accordance with the general penalty provisions contained in Section 1-3-1 of the City Code of Midland, Texas, which provides for a fine not exceeding two thousand dollars ($2,000.00).

SECTION SIX. The City Secretary is hereby authorized and directed to publish the

descriptive caption of this ordinance in the manner and for the length of time prescribed by the law as an alternative method of publication.

The above and foregoing ordinance was duly proposed, read in full and adopted on first reading, the _____ day of _____, A.D., 2023; and passed to second reading on motion of Council member _____, seconded by Council member _____, by the following vote:

City Council Meeting

Item Number: 24

Meeting Date: July 11, 2023

To: City Council / City Manager

From: Adrian Acosta, Manager, Engineering (Development)

Subject: Motion approving a request by Magrym Consulting, Inc., to defer paving and water improvements for Lindsay Acres, Section 14, and to waive the corresponding financial security guarantee valued at $269,089, an amount equal to the estimated cost to construct the public infrastructure. The subject property is generally located east of Moran Street and north of Marlin Avenue. The property is within the corporate limits of the City of Midland (DISTRICT 2) (ENGINEERING SERVICES)

Purpose:

Motion approving a request by Magrym Consulting,Inc., to defer paving and water improvements for Lindsay Acres, Section 14, and to waive the corresponding financial security guarantee valued at $269,089.00, an amount equal to the estimated cost to construct the public infrastructure. The subject property is generally located east of Moran Street and north of Marlin Avenue. The property is within the corporate limits of the City of Midland.

Recommended City Council Action:

Deny

Fiscal Impact:

Water Distribution $ 82,823.00
Wastewater Collection $ 0.00
Paving $ 186,266.00
Sidewalk $ 0.00
Drainage $ 0.00

Total Value of Deferral $ 269,089.00

Discussion:

Lindsay Acres, Section 14 is proposed as a 0.94-acre subdivision. The five-tract subdivision is located at the northeast corner of the intersection of Moran Street and Marlin Avenue, within the corporate limits of the City of Midland.

Magrym Consulting Inc., on behalf of the developer, Daniel Lira, has requested to defer paving and water improvements, and waive the corresponding financial security guarantee, which is equal to 100% of the developer's portion of the construction costs. The developer is not requesting to defer the drainage study. A drainage study will be required.

Paving:
Moran Street and Marlin Avenue is not currently constructed to City of Midland standards along the frontage of the proposed development. Magrym Consulting is requesting to defer paving improvements along this stretch of Moran Street and Marlin Avenue. The obligated paving improvements along the platted frontage will be installed by the city as a COMPASS Project. Based on these circumstances, it is the recommendation of Engineering staff to accept the deferral request for paving improvements.

Water:
Magrym Consulting is requesting to defer water utility improvements being installed along the platted frontage of both Moran Street and Marlin Avenue. The nearest water main is a 6-inch pipeline located approximately 115 feet north of the subdivision at the intersection of Moran Street and West Montgomery Avenue. The City of Midland is currently designing the extension of the water main along Camp Street, Marlin Avenue, and Johnston Street, thus creating a loop with the 6-inch water main in Montgomery Avenue. The timeline for construction has not yet been announced. Based on these circumstances, it is the recommendation of Utilities staff to have the developer provide a $82,823.00 security for water improvements along the platted frontage of Marlin Avenue and to accept the deferral request for water improvements along Moran Street.

Engineering Staff will support the determination of the council regarding the deferral of paving improvements. However, Utilities does not support the deferral of water improvements along Marlin Avenue. It is recommended that the developer provide the $82,823.00 security for water improvements.

Should Council agree to the deferral for one or all improvements construction, staff will nevertheless require that the following note by added to the Final Plat.

The installation of public improvements may be required by the City of Midland at such time as the property is rezoned for a more intensive use.

Attached are the deferral request and opinion of probable cost prepared by Magrym Consulting Inc., a Preliminary Plat prepared by Schumann Engineering, and a location map prepared by staff.

Re: **Deferral Request**
Lindsay Acres, Section 14
A replat of the west 608.00 feet of the north 134.4 feet of tract 6, Lindsay Acres Addition, City and County of Midland, Texas.

Dear Mr. Ortiz:

Magrym Consulting Inc., on behalf of the property owner, Daniel Lira, is respectfully requesting deferrals for the construction of public improvements of water distribution and paving, and to waive the financial security guarantee associated with public improvements with a value of **$269,089.00**. This letter presents a discussion of the public infrastructure and deferral request related to the Lindsay Acres, Section 14.

Should you have any questions, please do not hesitate to contact us at claudius.sanchez@magrym.com or 432-999-2737.

Sincerely,

Magrym Consulting, Inc.

Claudius Sanchez Czyzewska, P.E., CFM
Principal

1.0 INTRODUCTION

1.1 Location Map

Lindsay Acres, Section 14 is a replat of the west 608.00 feet of the north 134.4 feet of tract 6, Lindsay Acres Addition, City and County of Midland, Texas. The property is on the east side of Moran Street and adjacent to Marlin Street.

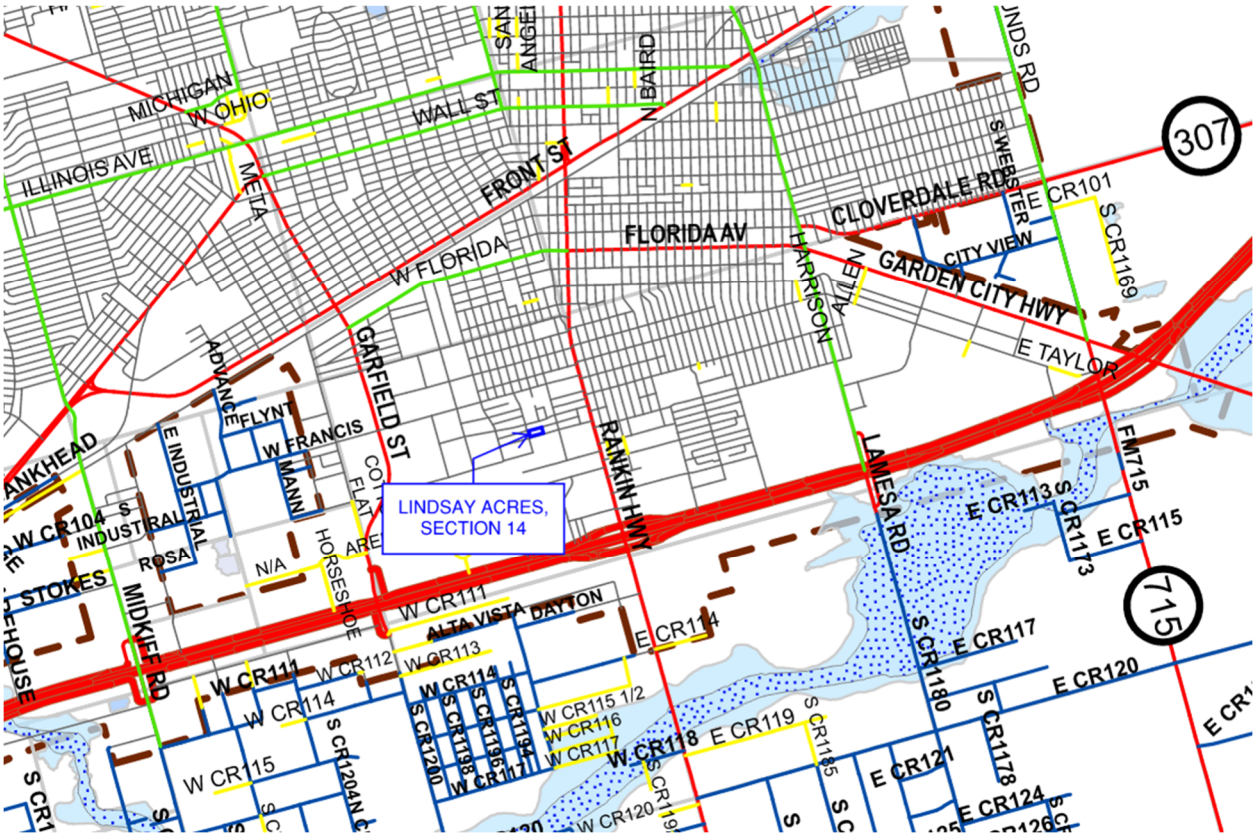

Figure 1: Project Location Map

1.2 Description of Property & Project

The project consists of a 5-lot subdivision for Residential use, each lot with sizes varying from 0.13 to 0.26 acres. Access to the subdivision will be accomplished through Marlin Street which is an existing unpaved City Street with a 60-foot right-of-way, in poor condition. And Moran Street which is also an existing unpaved City Street with a 60-foot right-of-way, in poor condition.

2.0 WATER DISTRIBUTION

Lindsay Acres, Section 14 is located in an area where public water facilities are not currently accessible. Private water wells will be constructed for each lot in the subdivision in accordance with City of Midland Code of Ordinances Title 11-2-5-(A)-3-(b)-(2).

Deferral value: $82,823.00

The nearest water main is located at the intersection of Moran Street and Marlin Avenue. According to recent communications with City staff, the City of Midland is currently designing the extension of the water main along Camp Street, Marlin Avenue and Johnson Street, thus creating a loop with the 6-inch water main in Montgomery Avenue.

3.0 PAVING

Lindsay Acres, Section 14 is located adjacent to Marlin Street to the south, Moran Street to the west. The opinion of probable cost was calculated in accordance with City of Midland Code of Ordinances Title 11-2-6-(B)-1. The criteria used was local street classification with an adjacent zoning SF3 where the developer's share corresponds to the full cost of the street, based on a maximum 40 feet width, including C&G and local construction standards, for one side of the road to which the subdivision abuts.

Deferral value: $186,266.00

Planning and Zoning Commission

Approved for Agenda:
Elizabeth Shaughnessy

MEETING DATE: **November 21, 2022**

TO: **PLANNING AND ZONING COMMISSION**

FROM: **Kelly Martinez, Senior Planner**

SUBJECT: **Motion approving with staff's recommended conditions, a proposed Preliminary Plat of Lindsay Acres, Section 13, being a replat of The West half of the West 608-feet of the north 134.4-feet of Tract 6, Lindsay Acres Addition, City and County of Midland, Texas. (Generally located on the northeast corner of the intersection of Marlin Avenue and Moran Street - Council District 2 (DEVELOPMENT SERVICES)**

Recommended Planning and Zoning Commission Action:

__X__ **Approve** _____ **Deny** _____ **Directional/Informational**

Details of Request:

The applicant, Schumann Engineering, is requesting to replat the West half of the West 608-feet of the north 134.4-feet of Tract 6, Lindsay Acres Addition, City and County of Midland, Texas., to divide one tract of land into 5 lots. This is a residential replat; therefore, a public hearing is required.

Current Zoning:

MH, Manufactured Housing District

Departmental Review:

This request has been routed to all respective departments for internal review. The comments are below.

BUILDING CODE: (Approved)

No issues. All future structures must adhere to the 2018 International Building Codes, the 2015 International Energy Code, the 2020 NEC requirements, the 2015 International Fire

Codes, local city ordinances, zoning requirements, established setbacks, and floodplain requirements if necessary. Code versions are subject to change depending on time of new code edition adoption in the City of Midland and date of permit application.

SURVEYOR: (Approved with Conditions)

Moran St. shown on the west side of plat does not appear to be a 60' right-of-way.

ENGINEERING: (Approved with Conditions)

IMPACT FEES: Okay as shown. [For the Applicant's information only.]

ROW: See Transportation's comments. [For the Applicant's information only.]

PAVING: Moran and Marlin are sub-standard. Construct to City standards for entire platted frontage or request a deferral. [Reference City Code Section 11-2-3(G)1 & 11-2-4(A)2(a)]

WATER: None existing. Construct to City standards along entire platted frontage, serving all lots with looped system. [Reference City Code Section 11-2-3(G)1 & 11-2-4(A)2(a)]

FIRE HYDRANTS: Required as needed to meet NFPA, IFC & City Fire Code; and/or comply with directives of City Fire Marshal. After January 14, 2020 - Fire hydrants shall be spaced no more than 500' apart, Pressure Indicator Rings are to be installed and will require the developers/contractors to pay for the flow test. [For the Applicant's information only.]

PRO RATA: None. [For the Applicant's information only.]

SEWER: 6" wastewater line exists in the alley north of tract, okay as it. No public wastewater improvements required. [For the Applicant's information only.]

DRAINAGE: Drainage study not required for development into single family residences. Development considered infill. [For the Applicant's information only.]

EASEMENTS: Show existing and proposed. [For the Applicant's information only.]

SIDEWALKS: Required with building permit. [For the Applicant's information only.]

DIMENSION: * * *

OTHER: * * *

TRANSPORTATION: (Approved with Conditions)

Provide 10 ft x 10 ft intersection corner clips at property corners adjacent to all public street intersections. [Reference City Code Section 11-2-5(C)3(k).]

Label 20 ft Alley as right-of-way dedication.

No additions or changes to site access are approved with plat or zoning review. Driveways or other access points are approved only with construction drawing review. [For the Applicant's information only.]

FIRE: (Approved)

Future development shall meet the requirements of IFC 2015 ed. and local ordinances.

Oil and Gas: (Approved)

No Oil and Gas Issues. Informational: No Oil or Gas wells identified within 500 ft. permitted well radius or in the 135 ft. non-permitted well radius of location on plat. Please note if oil & gas wells are not identified or left off plat, this could prevent receiving city permits for structures. Any plugged and abandoned well would need to be identified.

GIS: (Approved)

The survey matches previous plat.

PLANNING: (Approved with Conditions)

Utility company names have changed. [Informational]

Double check the legal description under the owner's certificate. [Informational]

This plat should be Lindsay Acres, Section 13. [Informational]

Double check the width of existing ROW (see surveyor's comment)

Label all existing and proposed easements near the plat. There is an easement east of this plat that is labeled incorrectly as a 20 ft alley. [Midland City Code 11-2-3(D)4(f)] [Midland City Code 11-2-3(H)3(b)11]

Under the Certificate of Approval, it should read for approval of the commission not by the director of development services. [Midland City Code 11-2-3(H)3(m)3]

Staff recommends approval of the Preliminary Plat of Lindsay Acres, Section 13, Subject to condition A through D.

Conditions:

A. **Approval of this preliminary plat is subject to the final plat containing 10'x10' corner clips adjacent to all public street intersections. [Midland City Code Section 11-2-5(C)3(k)]**

B. Approval of this preliminary plat is subject to the final plat containing all existing and proposed easements. [Midland City Code 11-2-3(D)4(f)] [Midland City Code 11-2-3(H)3(b)11]

C. Approval of this preliminary plat is subject to the final plat containing an accurate certificate of approval. [Midland City Code 11-2-3(H)3(m)3]

D. Approval of this preliminary plat is subject to the final plat containing the accurate ROW width of Moran Street. [Midland City Code 11-2-3(H)3(6)]

NOTES:

1. BEARINGS, DISTANCES AND ACREAGE SHOWN ARE BASED ON GPS OBSERVATIONS AND CONFORM TO THE "TEXAS COORDINATE SYSTEM" TEXAS CENTRAL ZONE, NORTH AMERICAN DATUM OF 1983.

2. MONUMENTS ARE A 1/2 INCH REINFORCING BAR SET WITH YELLOW PLASTIC CAP STAMPED "SCHUMANN ENGINEERING" UNLESS OTHERWISE NOTED.

3. SELLING A PORTION OF THIS ADDITION BY METES AND BOUNDS MAY BE A VIOLATION OF CITY ORDINANCE AND STATE LAW AND SUBJECT TO FINES AND WITHHOLDING OF UTILITIES AND BUILDING PERMITS.

4. APPROVAL OF A SITE PLAN BY THE CITY OF MIDLAND MAY BE REQUIRED BEFORE THE DEVELOPMENT OF ANY LOT AND BEFORE A BUILDING PERMIT MAY BE OBTAINED.

5. INITIAL IMPACT FEES WILL BE ASSESSED DURING THE FINAL PLATTING PROCESS. IMPLEMENTATION AND COLLECTION OF IMPACT FEES WILL TAKE PLACE DURING THE BUILDING PERMIT PROCESS. ADDITIONAL IMPACT FEES OR INCREASE OF FEES MAY NOT BE ASSESSED AGAINST THE TRACT UNLESS THE NUMBER OF SERVICE UNITS TO BE DEVELOPED ON THE TRACT INCREASES.

6. THE INSTALLATION OF PUBLIC IMPROVEMENTS MAY BE REQUIRED BY THE CITY OF MIDLAND AS SUCH TIME AS: (1) A PLAT IS RE-PLATTED FOR SUBDIVISION INTO MORE THAN ONE TRACT OR (2) THE PROPERTY IS REZONED FOR A MORE INTENSIVE USE.

7. THIS PROPERTY IS IN FEMA'S FLOOD INSURANCE RATE MAP NO. 48329C0202F, EFFECTIVE DATE, SEPTEMBER 16, 2005, ALL OF TRACT IS IN ZONE "X" AND NOT IN A SPECIAL FLOOD HAZARD AREA.

THAT I, RJ DAUM, A REGISTERED PROFESSIONAL LAND SURVEYOR, DO HEREBY CERTIFY THAT I PREPARED THIS PLAT FROM AN ACTUAL AND ACCURATE SURVEY OF THE LAND AND THAT THE CORNER MONUMENTS SHOWN THEREON WERE PROPERLY PLACED UNDER MY PERSONAL SUPERVISION, IN ACCORDANCE WITH THE SUBDIVISION REGULATIONS OF THE CITY OF MIDLAND, TEXAS.

"THIS DOCUMENT IS RELEASED FOR THE PURPOSE OF INTERIM REVIEW AND MARK-UP UNDER THE AUTHORITY OF RJ DAUM, RPLS 4826, ON AUGUST 26TH, 2022. IT IS NOT TO BE USED FOR CONSTRUCTION, BIDDING, PERMIT OR RECORDING PURPOSES."

City of Midland

Office Memorandum

DATE: July 5, 2023

TO: The Honorable Mayor and City Council Members

FROM: John Ohnemiller, City Attorney

SUBJECT: Motion appointing Mr. Tomas Gonzalez as the new City Manager of the City of Midland effective July 31, 2023; and authorizing the Mayor to execute an employment agreement between the City of Midland and the City Manager.

The proposed motion would appoint Mr. Tomas Gonzalez as the new City Manager of the City of Midland effective July 31, 2023. The motion also authorizes the Mayor to execute, on behalf of the City of Midland, an employment agreement with Mr. Gonzalez.

If you have any questions regarding this matter, please do not hesitate to contact me.
